being very watery, others very coarse in texture, and some possessed of acrid and even poisonous properties. Some species of scirpus, or club-rush, however, serve as food for cattle: *S. cespitosus*, for instance, is the principal food of cattle and sheep in the highlands of Scotland, from the beginning of March till the end of May. Varieties of *S. maritimus*, found in different countries, and a few of the numerous kinds of Cyperaceæ common in Indian pastures, as *Cyperus dubius* and *herastachyus*, are also eaten by cattle. Therefore, if any specific plant is intended, as seems implied in what goes before, it is perhaps one of the edible species of scirpus or cyperus, perhaps *C. esculentus*, which, however, has distinct Arabic names: or it may be a true grass; some species of panicum, for instance, which form excellent pasture in warm countries, and several of which grow luxuriantly in the neighbourhood of water.

174. [*Cyperus esculentus*.]

But it is well known to all acquainted with warm countries subject to excessive drought, that the only pasturage to which cattle can resort is a green strip of different grasses, with some sedges, which runs along the banks of rivers or of pieces of water, varying more or less in breadth according to the height of the bank, that is, the distance of water from the surface. Cattle emerging from rivers, which they may often be seen doing in hot countries, as has been well remarked in the 'Pictorial Bible' on Gen. xli. 2, would naturally go to such green herbage as is intimated in this passage of Genesis, and which, as indicated in Job xviii. 2, could not grow without water in a warm dry country and climate.

FLAGON. The word thus rendered in the English Bibles (2 Sam. vi. 19; 1 Chron. xvi. 3; Hos. iii. 1; Cant. ii. 5) means rather a *cake*, especially of dried figs or raisins, pressed into a particular form [Fruits].

FLAX. From the numerous references to flax and linen, there is no doubt that the plant was extensively cultivated, not only in Egypt, but also in Palestine. As to Egypt we have proof in the mummy cloth being made of linen, and also in the representations of the flax cultivation in the paintings of the Grotto of el Kah, which represent the whole process with the utmost clearness; and numerous testimonies might be adduced from ancient authors, of the esteem in which the linen of

Egypt was held. Flax continues to be extensively cultivated in the present day. That it was also much cultivated in Palestine, and well known to the Hebrews, we have proofs in the number of times it is mentioned; as in Josh. xi. 6, where Rahab is described as concealing the two Hebrew spies with the stalks of flax which she had laid in order upon the roof. In several passages, as Lev. xiii. 47, 48, 52, 59; Dent. xxii. 11; Jer. xiii. 1; Ezek. xl. 3; xlv. 17, 18, we find it mentioned as forming different articles of clothing, as girdles, cords, and bands. In Prov. xxxi. 13, the careful housewife 'seeketh wool and flax, and worketh it willingly with her hands.'

FLEA occurs only 1 Sam. xxiv. 14; xxvii. 20, where David thus addresses his persecutor Saul at the cave of Adullam: 'After whom is the king of Israel come out? after whom dost thou pursue?—after a flea?' 'The king of Israel is come out to seek a flea?' In both these passages the Hebrew means to pursue after, to seek *one* or a *single* flea. David's allusion to the flea displays great address. It is an appeal founded upon the immense disparity between Saul as the king of Israel, and himself as the poor contemptible object of the monarch's laborious pursuit. Hunting a flea is a comparison, in other ancient writings, for much labour expended to secure a worthless result.

Although this insect has been used as a *popular* emblem for insignificance, yet, when considered by itself, it has high claims upon the attention of the naturalist. Even to the naked eye there is something pleasing in its appearance, and elegant in its postures; but it is indebted to the *microscope* for our acquaintance with the flexible, highly polished, and ever clean suit of armour in which it is encased *cap-a-pie*, its finely-arched neck, large beautiful eye, antennæ, muscular jointed legs, its piercer and sucker—forming one most complicated instrument—the two long, hooked, sharp claws, in which its legs severally terminate. The agility of the flea places it at the head of all the leaping insects, when its strength is considered in relation to its size, it being able to leap, unaided by wings, 200 times its own length. Owing to the habits of the lower orders, fleas abound so profusely in Syria, especially during the spring, in the streets and dusty bazaars, that persons of condition always change their long dresses upon returning home. There is a popular saying in Palestine that 'the king of the fleas keeps his court at Tiberias;' though many other places in that region might dispute the distinction with that town (Kitto's *Physical History of Palestine*, p. 421).

FLESH. This word bears a variety of significations in Scripture:—

1. It is applied, generally, to the whole animated creation, whether man or beast; or, to all beings whose material substance is flesh (Gen. vi. 13, 17, 19; vii. 15, &c.).

2. But it is more particularly applied to 'mankind;' and is, in fact, the only Hebrew word which answers to that term (Gen. vi. 12; Ps. xlv. 3; cxlv. 21; Isa. xl. 5, 6). In this sense it is used somewhat figuratively to denote that evil principle which is opposed to the spirit, and to God, and which it is necessary to correct and subdue (Gen. vi. 5; Job x. 4; Isa. xxxi. 3; Matt. xvi. 17; Gal. i. 16, &c.).

3. The word 'flesh' is opposed to 'soul,' or 'spirit,' just as we oppose *body* and *soul* (Job xiv. 22; Prov. xiv. 30; Isa. x. 18).

4. The ordinary senses of the word, namely, the flesh of men or beasts (Gen. xli. 2, 19; Job xxxi. 23-25), and flesh as used for food (Exod. xvi. 12; Lev. viii. 19), are both sufficiently obvious; and with respect to the latter see Food.

5. The word 'flesh' is also used as a modest general term for the secret parts, in such passages as Gen. xvii. 11; Exod. xxviii. 42; Lev. xx. 2; Ezek. xxiii. 20; 2 Pet. ii. 7, 8, 10; Jude 7. In Prov. v. 11, the 'flesh of the intemperate' is described as being consumed by infamous diseases.

FLOCKS. [PASTURAGE.]

FLOOD. [DELUGE.]

FLOUR. [BREAD; MILL; OFFERINGS.]

FLUTE. [MUSIC.]

FLY. This word occurs Exod. viii. 21, 22, 24, 29, 31; Ps. lxxviii. 45, and cv. 21; all which passages relate to the plague of flies inflicted upon Pharaoh and his people. Some suppose that the dog-fly is meant. Philo, in his *Life of Moses*, expressly describes this insect as a biting insidious creature, which comes like a dart, with great noise, and rushing with great impetuosity on the skin, ticks to it most tenaciously. All the ancient translators understand by the original word a mixture of noxious creatures. More modern writers are of opinion that a single species only is intended, and have proposed several different insects. Thus, one of the meanings of the original word is 'to darkeu,' and Mousset observes that the name agrees with no kind of flies better than with those *black*, large, compressed flies, which boldly beset cattle, and not only obtain ichor, as other flies, but also suck out blood from beneath, and occasion great pain. He observes that they have no prolocosis, but, instead of it, have double sets of teeth, like wasps, which they infix deeply in the skin; and adds that they greatly infest *the ears of dogs*. Others have proposed the *Matta Orientalis* or *Egyptia* of Linnaeus, as answering considerably to the characteristics of voracity, intrusion into houses, &c. &c. The miracle involved in the plague of flies consisted, partly at least, in the creature being brought again at the Egyptians in so great an abundance during *winter*. The particular species is, however, at present undetermined.

FOLD. [PASTURAGE.]

FOOD. The productions of a country, at an early period of the world, necessarily determined its food. Palestine abounded with grain and various kinds of vegetables, as well as with animals of different species. Such, accordingly, in general, was the sustenance which its inhabitants took.

The use of fire, and the state of the arts of life in a country, must also have important influence on its cookery; in other words, will go far to determine the state in which the natural productions of the earth will be eaten. If the grain is to become bread, a long and by no means easy process has to be gone through. Skill in preparing food is therefore held in high repute.

Bread formed 'the staff of life' to the ancient Hebrews even more than to ourselves; but the modes of preparing it have been noticed under other heads [1 READ; MILL].

On a remarkable occasion a calf, tender and

good, is taken, slain, dressed (roasted, most probably, Judg. vi. 19; Gen. xxvii. 7; 1 Sam. ii. 13; Exod. xii. 8, 9; boiling was not known till long afterwards), and set before the guests, while the entertainer (Abraham) respectfully stood at their side, doubtless to render any desirable service. The sauce or accompaniments on this occasion were butter and milk. From ch. xix. 3, it may be inferred that the bread was unleavened.

The cases, however, to which reference has been made were of a special nature; and from them, as well as from what is recorded touching Isaac and Esau and Jacob, it appears that flesh meat was reserved as food for guests, or as a dainty for the sick; lentils, pulse, onions, grain, honey, and milk being the ordinary fare.

The agreeable, and perhaps in part the salubrious qualities of salt, were very early known and recognised: in Lev. ii. 13, it is expressly enjoined, 'Every oblation of thy meat-offering shalt thou season with salt; with all thine offerings shalt thou offer salt.'

Locusts were a permitted (Lev. xi. 22) and a very common food. At the present day they are gathered by the Bedouins at the beginning of April, and being roasted on plates of iron, or dried in the sun, are kept in large bags, and, when need-d, eaten strewed with salt by handfuls.

Of four-footed animals and birds, the favourite food were sheep, goats, oxen, and doves. There are few traces of the eating of fish, at least in Palestine (Num. xi. 5; Lev. xi. 9-22). In the last passage a distinction is made between certain fish which might be eaten, and others which were forbidden. 'These shall ye eat of all that are in the waters: whatsoever hath fins and scales in the waters, in the seas, and in the rivers, them shall ye eat; and all that have not fins and scales, they shall be an abomination unto you.'

The distinction of clean and unclean animals, and of animals which might and those which might not be eaten, is found to have existed to a great extent in ancient Egypt. Among fish the oxyrinchus, the phagrus, and the lepidotus, were sacred, and might not even be touched. The inhabitants of Oxyrinchus objected to eat any fish caught by a hook, lest it should have been defiled by the blood of one they held so sacred. The phagrus was the eel; and the reason of its sanctity, like that of the oxyrinchus, was probably owing to its unwholesome qualities; the most effectual method of forbidding its use being to assign it a place among the sacred animals of the country.

Neither the hippopotamus nor the crocodile appears to have been eaten by the ancient Egyptians. Some of the Egyptians considered the crocodile sacred, while others made war upon it (Herod. ii. 69). In some places it was treated with the most marked respect, fed, attended, adorned, and after death embalmed. But the people of Apollinopolis, Tentyris, Hieracleopolis, and other places, held the animal in abhorrence.

Cats as well as dogs were held in high esteem by the ancient Egyptians. The former especially were objects of superstitious regard. When a cat died in a house a natural death, a general mourning throughout the family ensued; and to kill one of these revered animals was a capital offence.

Though it appears that swine frequently formed part of the stock of an Egyptian farm-yard, yet

was the animal unclean and an abomination in the estimation of the Egyptians.

The Mosaic laws which regulated the use of animal food may be found in Lev. xi. and Deut. xiv. The grounds of many of these regulations may be ascertained with a greater or less degree of probability, provided the student is well acquainted with the mind and spirit of Hebrew antiquity. Considerations drawn from idolatrous usages, regard to health, the furtherance of agriculture, and established customs and tastes, had in each case an influence in the promulgation of these laws.

In the earliest times water was the common drink. That wine of an intoxicating tendency was drunk at a very early period appears from what happened to Noah (Gen. ix. 20), who seems to have made as well as drunk wine. Bread and wine are spoken of in Gen. xiv. 18, as offered for refreshment to Abraham by Melchizedek, king of Salem. Water was sometimes put to the wine; at others a strong drink was made by mixing with the wine aromatic herbs (Ps. lxxv. 9; Isa. v. 22), or a decoction derived from them; myrrh was used for this purpose. Date-wine was in use, and probably the Egyptian or malt-wine. 'The common people' (Mark xii. 37) drank an acrid sort of wine, which is rendered vinegar in our English version (Ruth ii. 14; Matt. xxvii. 48). The Orientals frequently used wine in excess, so as to occasion intoxication, whence are drawn many striking figures in Holy Writ (Isa. v. 11; xxviii. 1; xlix. 26; Jer. viii. 14; ix. 14; xvi. 48; Dent. xxxii. 42; Ps. lxxviii. 65). That indulgence in wine was practised in very ancient days is manifest from there being in the court of Pharaoh, at the time of Joseph, state-officers, who had charge of the wine, and served the monarch with it when he drank (Gen. xl. 1, 11; comp. Neh. i. 11; 1 Kings x. 5; 2 Chron. ix. 4).

For drinking-vessels there were used the cup and the bowl (Jer. xxxv. 5; Amos vi. 6; Exod. xxv. 33; Num. vii. 13, 84). The cup was generally of brass covered with tin, in form resembling a lily, sometimes circular. It is still used by travellers, and may be seen in both shapes in the ruins of Persepolis (1 Kings vii. 26). The bowl (Exod. xxv. 33) assumed a variety of shapes, and bears many names. Some of these 'chargers' appear, from the presents made by the princes of Israel (Num. vii.), to have been of large size and great splendour; some were silver, some gold (1 Kings x. 21).

In eastern climes the chief meal, or what we

[75. (Egyptian Table with Dishes.)]

term dinner, is, in consequence of the heat of the middle period of the day, deferred till towards

evening, a slight repast being taken before noon. But from Gen. xlii. 16, 25, it appears to have been the custom to dine at noon in the days of the patriarchs. The same seems to have been the case in Palestine at a later period (1 Kings xx. 16; comp. Acts x. 10; Luke xi. 37). Convivialities, however, were postponed till evening, and sometimes protracted to the following morning (Isa. v. 11; Mark vi. 21; Luke xiv. 24). The meal was preceded by washing of hands (Luke xi. 38; Mark vii. 2), which the mode of eating rendered necessary; and by an invocation of the divine blessing (1 Sam. ix. 13; Luke ix. 16; John vi. 11).

176. (Modern Syrians at Meut.)

The Hebrews, like the Greeks and Romans in their earlier history, ate sitting (Gen. xxvii. 19; Judg. xix. 6; 1 Sam. x. 25). A carpet was spread, on which the meal was partaken. At a later period, however, particularly when Palestine came under the influence of Roman manners, the Jews reclined on cushions or couches (Esth. i. 6; Amos vi. 4; Luke vii. 37; not 'sat,' as in the common translation, but 'reclined'). The custom of giving preference in point of seat or position to guests of high consideration appears from 1 Sam. ix. 22, to have been of ancient date (Amos iii. 12). In the time of Christ (Luke xiv. 8) the Pharisees, always eager for distinction, coveted the place of honour at meals and feasts. Women were not admitted to eat with the men, but had their meals supplied in their own private apartment (Esth. i. 6-9). In Babylon and Persia, however, females mingled with males on festive occasions (Dan. v. 2). In general the manner of eating was similar to what it is in the East at the present day. Special care was taken of favoured persons (Gen. xliii. 34; 1 Sam. i. 4; ix. 22; John xiii. 26). Neither knives, forks, nor spoons were employed for eating. The food was conveyed from the dish to the mouth by the right hand. The parties sat with their legs bent under them round a dish placed in the centre, and either took the flesh meat with their fingers from the dish, or dipped bits of their bread into the savoury mess, and conveyed them to their mouths. In Ruth ii. 14, Boaz says to Ruth, 'Dip thy morsel in the vinegar,' which explains the language of our Lord, John xiii. 26, 'He it is to whom I shall give a sop when I have dipped it.' This presenting of food to a person

is still customary, and was designed originally as a mark of distinction, the choice morsels being selected by the head of the family for the purpose. Drink was handed to each one of the guests in cups or goblets, and, at a very ancient period, in a separate cup to each person. Hence the word cup is used as equivalent to what we term a man's lot or destiny (Ps. xl. 6; lxxv. 8; Isa. li. 22; Matt. xxvi. 39).

FOOL. 'The fool of Scripture is not an idiot, but an absurd person; not one who does not reason at all, but one who reasons wrong; also any one whose conduct is not regulated by the dictates of reason and religion. Foolishness, therefore, is not a private condition, but a condition of wrong action in the intellectual or sentient being, or in both (2 Sam. xiii. 12, 13; Ps. xxxviii. 5). In the Proverbs, however, 'foolishness' appears to be sometimes used for lack of understanding, although more generally for perverseness of will.

FOOT. Of the various senses in which the word 'foot' is used in Scripture, the following are the most remarkable. Such phrases as the 'slipping' of the foot, the 'stumbling' of the foot, 'from head to foot' (to express the entire body), and 'foot-steps' (to express tendencies, as when we say of one that he walks in another's foot-steps), require no explanation, being common to most languages. The extreme modesty of the Hebrew language, which has perhaps seldom been sufficiently appreciated, dictated the use of the word 'feet,' to express the parts and the acts which it is not allowed to name. Hence such phrases as the 'hair of the feet,' the 'water of the feet,' 'between the feet,' 'to open the feet,' 'to cover the feet,' all of which are sufficiently intelligible, except perhaps the last, which certainly does not mean 'going to sleep' as some interpreters suggest, but 'to dismiss the refuse of nature.'

'To be under any one's feet' denotes the subjection of a subject to his sovereign, or of a servant to his master (Ps. viii. 6; comp. Heb. ii. 8; 1 Cor. xv. 25); and was, doubtless, derived from the symbolical action of conquerors, who set their feet upon the neck or body of the chiefs whom they had vanquished, in token of their triumph. This custom is expressly mentioned in Scripture (Josh. x. 24), and is figured on the monuments of Egypt, Persia, and Rome.

In like manner, 'to be at any one's feet,' is used for being at the service of any one, following him, or willingly receiving his instructions (Judg. iv. 10). The passage (Acts xxii. 3) where Paul is described as being brought up 'at the feet of Gamaliel,' will appear still clearer, if we understand that, as the Jewish writers allege, pupils actually did sit on the floor before, and therefore at the feet of, the doctors of the law, who themselves were raised on an elevated seat.

'Lameness of feet' generally denotes affliction or calamity, as in Ps. xxxv. 15; xxxviii. 18; Jer. xx. 10; Micah iv. 6, 7; Zech. iii. 9.

'To set one's foot' in a place signifies to take possession of it, as in Deut. i. 36; xi. 34, and elsewhere.

'To water with the feet' (Deut. xi. 10) implies that the soil was watered with as much ease as a garden, in which the small channels for irrigation may be turned, &c. with the foot [GARDEN].

An elegant phrase, borrowed from the feet, occurs in Gal. ii. 14, where St. Paul says, 'When I saw that they walked not uprightly—literally, 'not with a straight foot,' or 'did not foot it straightly.'

Nakedness of feet expressed mourning (Ezek. xxiv. 17). This must mean appearing abroad with naked feet; for there is reason to think that the Jews never used their sandals or shoes within doors. The modern Orientals consider it disrespectful to enter a room without taking off the outer covering of their feet. It is with them equivalent to uncovering the head among Europeans. The practice of feet-washing implies a similar usage among the Hebrews [WASHING OF FEET]. Uncovering the feet was also a mark of adoration. Moses put off his sandals to approach the burning where the presence of God was manifested (Exod. iii. 5). Among the modern Orientals it would be regarded the height of profanation to enter a place of worship with covered feet. The Egyptian priests officiated barefoot; and most commentators are of opinion that the Aaronite priests served with bare feet in the tabernacle, as, according to all the Jewish writers, they did afterwards in the temple, and as the frequent washings of their feet enjoined by the law seem to imply [SANDALS].

Respecting the 'washing of feet,' see ABLUTION and WASHING.

FOREHEAD. Marks upon the forehead, for the purpose of distinguishing the holy from the profane, are mentioned in Ezek. ix. 4, and again in Rev. vii. 3.

The classical idolaters used to consecrate themselves to particular deities on the same principle. The marks used on these occasions were various. Sometimes they contained the name of the god; sometimes his particular ensign, or else they marked themselves with some mystical number whereby the god was described.

If this analogy be admitted, the mark on the forehead may be taken to be derived from the analogous custom among the heathen of bearing on their forehead the mark of the gods whose votaries they were. Some, however, would rather understand the allusion to refer to the custom of marking cattle, and even slaves, with the sign of ownership [STIGMATA].

FORESKIN, the prepuce, which was taken off in circumcision [CIRCUMCISION].

FOREST. Tracts of wood-land are mentioned by travellers in Palestine, but rarely what we should call a forest. The word translated by 'forest' does not necessarily mean more than 'wood-land.' There are, however, abundant intimations in Scripture that the country was in ancient times much more wooded than at present, and in parts densely so. The localities more particularly mentioned as woods or forests are—

1. *The forest of cedars on Mount Lebanon* (1 Kings vii. 2; 2 Kings xix. 23; Hos. xiv. 5, 6), which must have been much more extensive formerly than at present.

The name of '*House of the Forest of Lebanon*' is given in Scripture (1 Kings vii. 2; x. 27) to a palace which was built by Solomon in, or not far from, Jerusalem, and which is supposed to have been so called on account of the quantity of cedar-trees employed in its construction; or, per-

haps, because the numerous pillars of cedar-wood suggested the idea of a forest of cedar-trees.

2. *The forest of oaks, on the mountains of Bashan.* The trees of this region have been already noticed under BASHAN.

3. *The forest or wood of Ephraim,* already noticed under EPHRAIM, 4.

4. *The forest of Hareth,* in the south of Judah, to which David withdrew to avoid the fury of Saul (1 Sam. xxii. 5). The precise situation is unknown.

FOREST is used symbolically to denote a city, kingdom, polity, or the like (Ezek. xiv. 26). Devoted kingdoms are also represented under the image of a forest, which God threatens to burn or cut down. See Isa. x. 17, 18, 19, 34, where the briars and thorns denote the common people; 'the glory of the forest' are the nobles and those of highest rank and importance. See also Isa. xxxii. 19; xxxvii. 24; Jer. xxi. 14; xxii. 7; xlv. 23; Zech. xi. 2.

FORNICATION. In Scripture this word occurs more frequently in its symbolical than in its ordinary sense.

In the Prophets woman is often made the symbol of the church or nation of the Jews, which is regarded as affianced to Jehovah by the covenant on Mount Sinai. Therefore when the Israelites acted contrary to that covenant, by forsaking God and following idols, they were very properly represented by the symbol of a harlot or adulteress, offering herself to all comers (Isa. i. 21; Jer. ii. 20; Ezek. xvi. 1; Hos. i. 2; iii. 11). And thus fornication, or adultery (which is fornication in a married state), became, and is used as, the symbol of idolatry itself (Jer. iii. 8, 9; Ezek. xvi. 26, 29; xxxiii. 37).

FORTIFICATIONS. 'FENCED CITIES.' Inventions for the defence of men in social life are older than history. The walls, towers, and gates represented on Egyptian monuments, though dating back to a period of fifteen centuries before the Christian era, bear evidence of an advanced state of fortifications—of walls built of squared stones, or of squared timber judiciously placed on the summit of scarped rocks, or within the circumference of one or two wet ditches, and furnished on the summit with regular battlements to protect the defenders. All these are of later invention than the accumulation of unhewn or rudely chipped uncemented stones, piled on each other in the form of walls, in the so-called Cyclopean, Pelasgian, Etruscan, and Celtic styles, where there are no ditches, or towers, or other gateways than mere openings occasionally left between the enormous blocks employed in the work. As the three first styles occur in Etruria they show the progressive advance of military architecture, and may be considered as more primitive, though perhaps posterior to the era when the progress of Israel, under the guidance of Joshua, expelled several Canaanitish tribes, whose system of civilization, in common with that of the rest of Western Asia, bore an Egyptian type, and whose towers and battlements were remarkably high, or rather were erected in very elevated situations. When, therefore, the Israelites entered Palestine, we may assume that the 'fenced cities' they had to attack were, according to their degree of antiquity, fortified with more or less of art, but all with huge stones in the lower walls.

like the Etruscan. Indeed, Asia Minor, Armenia, Syria, and even Jerusalem, still bear marks of this most ancient system. Stones from six to fifty feet in length, with suitable proportions, can still be detected in many walls of the cities of those regions, wherever quarries existed, from

177.

Nineveh, where beneath the surface there still remain ruins and walls of huge stones, sculptured with bas-reliefs, originally painted, to Babylon, and Bassorah, where bricks, sun-dried or baked, and stamped with letters, are yet found, as well as in all the plains of the rivers where that material alone could be easily procured. The wall was sometimes double or triple (2 Chron. xxxii. 5), successively girding a rocky elevation; and 'building a city' originally meant the construction of the wall.

Before wall-towers were introduced, the gate of a city, originally single, formed a kind of citadel, and was the strongest part of all the defences: it was the armoury of the community, and the council-house of the authorities. 'Sitting in the gate' was, and still is, synonymous with the possession of power, and even now there is commonly in the fortified gate of a royal palace in the East, on the floor above the door-way, a council room with a kind of balcony, whence the sovereign sometimes sees his people, and where he may sit in judgment. The tower was another fortification of the earliest date, being often the citadel or last retreat when a city was taken; or, standing alone in some naturally strong position, was intended to protect a frontier, command a pass, or to be a place of refuge and deposit of

178.

treasure in the mountains, when the plain should be no longer defensible. Watch-towers used by shepherds all over Asia, and even now built on eminences above some city in the plain, in order

to keep a look-out upon the distant country, were already in use and occasionally converted into places of defence (2 Chron. xxvii. 10; xxvii. 4). The gateways were closed by ponderous folding doors, the valves or folds being secured by wooden bars: both the doors and bars were in after times plated with metal. A ditch, where the nature of the locality required it, was dug in front of the rampart, and sometimes there was an inner wall, with a second ditch before it. As the experience of ages increased, huge 'counter forts,' double buttresses, or masses of solid stone and masonry were built in particular parts to sustain the outer wall, and afford space on the summit to place military engines (2 Chron. xxvi. 15).

In the cut, No. 179, taken from another Egyptian work, we have a series of towers, that in the middle being evidently the citadel or keep, and a gateway indicating that the wall is omitted, or is intended by the lines of the oval surrounding the whole. Here also we see a regular labarum, the most ancient example extant of this form of ensign, and the towers are manned with armed soldiers. No. 177 is taken from a seal, and is a symbol of Babylon, where the city, sustained by two lions, is shown standing on both sides of the Euphrates, having an outer wall; the inner rampart is flanked by numerous elevated and embattled towers. There is another, but less antique representation of Babylon, with its lions and towers, &c.; but the battlements are squared, not pointed, as in the first. The towers are here crowded with soldiers, some of whom, from the form of their shields, are obviously Egyptians.

179.

These are sufficient to give a general idea of cities fenced entirely by art.

FORTUNATUS, a disciple of Corinth, of Roman birth or origin, as his name indicates, who visited Paul at Ephesus, and returned, along with Stephanus and Achaicus, in charge of that Apostle's first Epistle to the Corinthian church, A.C. 59 (1 Cor. xvi. 17).

FOUNTAIN, a stream of 'living' or constantly running water, in opposition to standing or stagnant pools, whether it issues immediately from the ground or from the bottom of a well.

From the value of such supplies of water in arid countries, fountains figure much in the poetry of the East as the natural images of perennial blessings of various kinds. In the Scriptures fountains are made the symbols of refreshment to the weary, and also denote the perpetuity and inexhaustible nature of the spiritual comforts which God imparts to his people, whether by the influences of the Spirit, or through the ordinances of public worship. There are also various texts in which children, or an extended posterity, are, by a beautifully apt image, described as a foun-

tain, and the father or progenitor as the source or spring from which that fountain flows (Dent. xxxiii. 28; Ps. lxxviii. 26; Prov. v. 16, 18; xiii. 14, &c.).

FOWL. [Bird; Cock.]

FOX. Two distinct terms are in our version rendered by the word 'fox,' although that denomination is not uniformly employed in different texts (Judg. xv. 4; Neh. iv. 3; xi. 27; Ps. lxxiii. 10; Cant. ii. 15; Lam. v. 18; Ezek. xiii. 4). Fox is thus applied to two or more species, though only strictly applicable in a systematic view to *Taaleb*, which is the Arabic name of a wild canine, probably the Syrian fox, *Vulpes Thaleb* or *Taaleb* of modern zoologists, and the only genuine species indigenous in Palestine. There is in the language of the ancients, how-

160. [Syrian Fox.]

ever, a vague and often an indiscriminating use of zoological names: the name may therefore be employed as a general denomination; for, of vulpine animals, though the *taaleb* alone is considered indigenous, there is the so-called Turkish fox of Asia Minor, not unknown to the south as far as the Orontes, and therefore likely to be an occasional visitant at least of the woods of Libanus. There is, besides, one of a third group, namely, *Thous anthus*, or *deeb* of the Arabs, occasionally held to be the wolf of Scripture, because it resembles the species in general appearance, though so far inferior in weight, size, and powers, as not to be in the least dangerous, or likely to be the wolf of the Bible. The two first do not howl, and the third is solitary and howls seldom; but there is a fourth (*Canis Syriacus*) which howls, is lower and smaller than a fox, has a long ill-furnished tail, small ears, and a rufous-grey livery. This may be the jackal of Palestine. The German naturalists seem not to have considered it identical with the common jackal, which is sufficiently common along the coast, is eminently gregarious, offensive in smell; howls intolerably in complete concert with all others within hearing; burrows; is crepuscular and nocturnal, impudent, thievish; penetrates into outhouses; ravages poultry-yards more ruinously than the fox; feeds on game, lizards, locusts, insects, garbage, grapes; and leaves not even the graves of man himself undisturbed. It may ultimately turn out that *Canis Syriacus* is not a jackal, but a chryseus, or wild-dog, belonging to the group of *Dholes*, well known in India, and, though closely allied to, distinct from the jackal.

Vulpes Taaleb, or *Taleb*, the Syrian fox, is of the size of an English cur fox, and similarly formed; but the ears are wider and longer, the fur in general ochry-rufous above, and whitish beneath; there is a faint black ring towards the

tip of the tail, and the back of the ears are sooty, with bright fulvous edges. The species burrows, is silent and solitary, extends eastward into Southern Persia, and is said to be found in Natoria. It is reputed to be very destructive in the vineyards, or rather a plunderer of ripe grapes; but he is certainly less so than the jackal, whose ravages are carried on in troops and with less fear of man.

None of the explanations which we have seen of the controverted passage in Judg. xv. 4, 5, relative to the foxes, jackals, or other canines, which Samson employed to set fire to the corn of the Philistines, is altogether satisfactory to our mind.

Commentators, following the reading of the Sept., have with common consent adopted the interpretation, that two foxes were tied together by their tails with a firebrand between them. We consider this highly improbable, and therefore understand the text to mean that each fox had a separate brand; and most naturally so, for it may be questioned whether two united would run in the same direction. They would assuredly pull counter to each other, and ultimately fight most fiercely; whereas there can be no doubt that every canine would run, with fire attached to its tail, not from choice but necessity, through standing corn, if the field lay in the direction of the animal's burrow; for foxes and jackals, when chased, run direct to their holes, and sportsmen well know the necessity of stopping up those of the fox while the animal is abroad, or there is no chance of a chase. We therefore submit that by the words rendered 'tail to tail' we should understand the end of the firebrand attached to the extremity of the tail. Finally, as the operation of tying 300 brands to as many fierce and irascible animals could not be effected in one day by a single man, nor produce the result intended if done in one place, it seems more probable that the name of Samson, as the chief director of the act, is employed to represent the whole party who effected his intentions in different places at the same time, and thereby insured that general conflagration of the harvest which was the signal of open resistance on the part of Israel to the long-endured oppression of the Philistine people.

FRANKINCENSE. The original word is *lebonah*, which first occurs here, and is afterwards constantly mentioned among the ingredients of the perfume to be consumed upon the incense altar (Lev. ii. 1, 2, 15, 16; v. 11; vi. 15; xxiv. 7; Num. v. 15; 1 Chron. ix. 29; Neh. xiii. 5). In some other passages it is used in a figurative sense (Sol. Song, iii. 6; iv. 6; Isa. xliii. 23; lxvi. 3). In other passages, as an article of distant commerce, it is described as being brought by caravans from Sheba, &c. (Isa. lx. 6; Jer. vi. 20). From all which texts we learn that it was an article of foreign and distant commerce, that it was known very early, and that it was probably of a resinous nature, and very fragrant. In the New Testament the same word is employed in the Greek form of *libanos*, also rendered by 'frankincense.' The original is supposed to be found in the Hebrew *laban*, 'white;' but it is equally similar to the Arabic *laban*, signifying 'milk;' and, in a secondary sense, a gummy or resinous exudation from a tree, especially *frank-*

incense. There are other words in the Arabic which have a similar meaning, and which it is most probable were all originally derived from the same root as the Hebrew *lebannah*, and the Arabic *laban*, applied in both languages to the same substance. This was called by the Greeks *libanos*, and by the Romans *thus*, and now commonly as *olibanum*, from the addition of the letter *o* to the original name. Several kinds of resinous substances have at different times been confounded together under the names of 'incense' and 'frankincense,' as well as under the Latin *thus*, which is derived from *thuo*, 'to sacrifice.'

The ancient writers seem to state that there were two sorts of frankincense, one from the coasts of Arabia, and the other from India, but they more generally speak of it as derived from the former quarter, specially indicating the region of Saba or Sheba, from whence the Scripture also describes it as being brought. The Periplus, however, refers it to Africa. There is, however, no direct evidence for the existence of the tree or shrub producing frankincense in the southern coasts of Arabia. Wellsted could not see it when travelling in the quarter where it should be sought; and although Niebuhr affirms that it is cultivated, he adds that it was introduced from Abyssinia, a fact which would not have passed out of memory had it been anciently produced in the country. That it might be described as coming from or produced in Arabia, even though grown in another country, is common to other products which the regions west and north of Arabia received through Arabian merchants. A number of circumstances render it probable that it was obtained by the Arabians from the coast of Africa, to which it was brought from the interior. Mr. Johnson, in his *Travels in Southern Abyssinia*, states that frankincense, called *attar*, is exported in large quantities from Berbera, on the Somalæ coast of Africa; that it is brought thither from the interior, and that a camel load of two hundred and fifty pounds is sold for three dollars. In conformity with this is the statement of Cosmo Indicopleustes, who describes the land of frankincense as lying 'at the furthest end of Ethiopia, fifty days' journey from Axum, at no great distance from the ocean. The inhabitants of the neighbouring Barbaria, or the country of Sozee, fetch from thence frankincense and other costly spices, which they transport by water to Arabia Felix and India.' The substance thus indicated, called on the Continent African or Arabian olib, is rarely met with in this country. Dr. Pereira states it consists of smaller tears than that of the Indian variety, and is intermixed with crystals of carbonate of lime. Even the country which produces the olibanum being itself uncertain, the cautious naturalist will hesitate to indicate with decisiveness the species of tree by which it is afforded. More distinct information on the subject is still needed.

FROG (Exod. liii. 2). Although the common frog is so well known that no description is needed to satisfy the reader, it may be necessary to mention that the only species recorded as existing in Palestine is the green (*Rana esculenta*), and that of all the authorities we have been able to consult, Dr. Richardson alone refers the species of Egypt to the green speckled grey frog (*Rana*

punctata). But considering the immense extent of the Nile from south to north, and the amazing abundance of these animals which it contains in the state of spawn, tadpole, and complete frog, it is likely that the speckled is not the only species found in its waters, and that different species, if they do not occur in the same locality, are at least to be met with in different latitudes. The speckled species is found westward even to the north of France, but is not common in Europe. It is lively, but no strong swimmer, the webs on the hinder toes extending only half their length; hence, perhaps, it is more a terrestrial animal than the common green frog, and, like the brown species, is given to roam on land in moist weather.

Although it is very hazardous, in transactions of an absolutely miraculous nature, to attempt to point out the instruments that may have served to work out the purposes of the Almighty, we may conjecture that, in the plague of frogs, a species, the one perhaps we have just mentioned, was selected for its agility on land, and that, although the fact is not expressly mentioned, the awful visitation was rendered still more ominous by the presence of dark and rainy weather—an atmospheric condition never of long duration on the coast of Egypt, and gradually more and more rare up the course of the river. We have ourselves witnessed, during a storm of rain, frogs crowding into our cabin, in the low lands of Guiana, till they were packed up in the corners of the apartment, and continually falling back in their attempts to ascend above their fellows; and the door could not be opened without others entering more rapidly than those within could be expelled. Now, as the temples, palaces, and cities of Egypt stood, in general, on the edge of the ever dry desert, and always above the level of the highest inundations, to be there visited by a continuation of immense number of frogs was assuredly a most distressing calamity; and as this phenomenon, in its ordinary occurrence within the tropics, is always accompanied by the storms of the monsoon or of the setting in of the rainy season, the dismay it must have caused may be judged of when we reflect that the plague occurred where rain seldom or never falls, where none of the houses are fitted to lead off the water, and that the animals appeared in localities where they had never before been found, and where, at all other times, the scorching sun would have destroyed them in a few minutes. Nor was the selection of the frog as an instrument of God's displeasure without portentous meaning in the minds of the idolatrous Egyptians, who considered that animal a type of their creative power, and also an indication of man in embryo. The magicians, indeed, appeared to make frogs come up out of the waters; but we must not understand that to them was given also the power of producing the animals. The effect which they claimed as their own was a simple result of the continuation of the prodigy effected by Moses and Aaron; for that they had no real power is evident, not only from their inability to stop the present plague, the control which even Pharaoh discovered to be solely in the hands of Moses, but also the utter failure of their enchantments in that of lice, where their artifices were incompetent to impose upon the king and his people.

FRONTLETS. [PHYLACTERIES.]

FRUITS. Under this head may perhaps be most appropriately noticed a classification of produce of great importance to a right understanding of the Bible. We propose to show that the Hebrews had three generic terms designating three great classes of the fruits of the land, closely corresponding to what may be expressed in English as, 1. *Cornfruit*, or field produce; 2. *Vintage fruit*; 3. *Orchard fruit*.

The term 'summer-fruits' appears to denote those less important species of fruit which were adapted only to immediate consumption, or could not be easily or conveniently conserved for winter use (Jer. xl. 10, 12). It would seem to indicate either the existence of some contrasted term, as 'winter-fruits,' or to imply that the products of the class under which it ranked as a species were generally distinguished by their capability of being preserved throughout the year. The three terms spoken of as being so frequently associated in the Scriptures, and expressive of a most comprehensive triad of blessings, are *DAGAN*, *TIROSH*, and *YITZHAR*.

1. *Dagan*, 'fruit of the field,' or agricultural produce. Under this term the Hebrews classed almost every object of *field culture* (AGRICULTURE). Dr. Jahn says, 'the word is of general signification, and comprehends in itself different kinds of grain and pulse, such as wheat, millet, spelt, wall-barley, barley, beans, lentils, meadow-cumin, pepper-wort, flax, cotton, various species of the cucumber, and perhaps rice.' There is now no doubt among scholars that *dagan* comprehends the largest and most valuable species of vegetable produce; and therefore it will be allowed that the rendering of the word in the common version by '*corn*,' and sometimes by '*wheat*,' instead of '*every species of corn*' or field produce, tends to limit our conceptions of the Divine bounty, as well as to impair the beauty of the passages where it occurs.

2. *Tirosh*, 'the fruit of the vine' in its natural or its solid state, comprehending grapes, moist or dried, and the fruit in general, whether in the early cluster or the mature and ripened condition (1 Sam. xxv. 18; 2 Sam. xvi. 1; 1 Chron. xii. 40; Hos. iii. 1; Isa. lxx. 8). In the Authorized Version it is usually rendered 'wine,' which is an improper restriction of its meaning.

It is also distinctly referred to as the *yielder* of wine, and therefore was not wine itself, but the raw material from which it was expressed or prepared. Dr. Conquest's amended translation of Micah vi. 15, is, 'Thou shalt sow, but thou shalt not reap.'

3. *Yitzhar*, 'orchard-fruits,' especially winter or keeping fruits, as dates, figs, olives, pomegranates, citrons, nuts, &c.

Thus the triad of terms we have been considering would comprehend every vegetable substance of necessity and luxury commonly consumed by the Hebrews, of which first-fruits were presented or tithes paid; and this view of their meaning will also explain why the injunctions concerning offerings and tithes were sufficiently expressed by these terms alone (Num. xviii. 12; Deut. xiv. 23). Had *dagan* in these texts been restricted to *wheat*, no obligation would thereby have been imposed to present the first-fruits or the tithes of barley and other grain: had *tirosh* signified

grape-juice, then this law could have been easily evaded by drying the fruit as raisins, or preserving it in other ways; and had *yitzhar* signified *oil*, it would have been difficult at all, and from these texts impossible, to educe the obligation to pay tithes or present first-fruits of a large and most valuable class of products, as dates, citrons, pomegranates, &c. But these texts are the most definite we can find in relation to the subject, and are evidently designed to be very comprehensive; and, consequently, as tithes were paid of all those fruits, the practice must interpret these expressions as including, 1st. Fruits of the field or land; 2nd. Fruits of the vintage; and, 3rd. Fruits of the orchard, including both summer and preserving fruits.

FULLER. At the transfiguration our Saviour's robes are said to have been white, 'so as no fuller on earth could whiten them' (Mark ix. 3). Elsewhere we read of 'fullers' soap' (Mal. iii. 2), and of 'the fullers' field' (2 Kings xviii. 17). Of the processes followed in the art of cleaning cloth and the various kinds of stuff among the Jews we have no direct knowledge. In an early part of the operation they seem to have trod the cloths with their feet, as the Hebrew *Ain Rogel*, or En-rogel, literally Foot-fountain, has been rendered, on Rabbinical authority, 'Fullers' fountain,' on the ground that the fullers trod the cloths there with their feet. A subsequent operation was probably that of rubbing the cloth on an inclined plane, in a mode which is figured in the Egyptian paintings, and still preserved in the East.

FULLERS' FOUNTAIN. [EN-ROGEL.] FULLERS' SOAP. The word thus rendered occurs in two passages of Scripture—first, in Jerem. ii. 22; and again in Malachi iii. 2. From neither of these passages does it distinctly appear whether the substance referred to was obtained from the mineral or from the vegetable kingdom. But it is evident that it was possessed of cleansing properties. It is probable that the ashes of plants may be alluded to, as there is no proof that soap is intended, though it may have been known to the same people at very early periods. Usually the ashes only of plants growing on the sea-shore have been thought to be intended. All these would yield barilla, or carbonate of soda. Many of them have been burnt, for the soda they yield, on the coasts of India, of the Red Sea, and of the Mediterranean.

FUNERALS. [BURIAL; MOURNING.]

G.

GA'AL (*miscarriage*), son of Ebed. He went to Shechem with his brothers when the inhabitants became discontented with Abimelech, and so engaged their confidence that they placed him at their head. At the festival at which the Shechemites offered the first-fruits of their vintage in the temple of Baal, Gaal, by apparently drunken bravadoes, roused the valour of the people, and strove yet more to kindle their wrath against the absent Abimelech. It would seem as if the natives had been in some way intimately connected with, or descended from, the original inhabitants; for Gaal endeavoured to awaken

their attachment to the ancient family of Hamor, the father of Shechem, which ruled the place in the time of Abraham (Gen. xxiv. 2, 6), and which seems to have been at this time represented by Gaal and his brothers. Although deprived of Shechem, the family appears to have maintained itself in some power in the neighbourhood; which induced the Shechemites to look to Gaal when they became tired of Abimelech. Whether he succeeded in awakening among them a kind feeling towards the descendants of the ancient masters of the place does not appear; but eventually they went out under his command, and assisted doubtless by his men, to intercept and give battle to Abimelech, when he appeared before the town. He, however, fled before Abimelech, and his retreat into Shechem being cut off by Zebul, the commandant of that place, he went to his home, and we hear of him no more. The account of this attempt is interesting, chiefly from the slight glimpse it affords of the position, at this period, of what had been one of the reigning families of the land before its invasion by the Israelites (Judg. ix. 26-48) n.c. 1026.

GAB'BATHA occurs John xix. 13, where the Evangelist states that Pontius Pilate, alarmed at last in his attempts to save Jesus, by the artful insinuation of the Jews, 'If thou let this man go thou art not Caesar's friend,' went into the prætorium again, and brought Jesus out to them, and sat down once more upon the tribunal, in a place called in Greek Lithostratos, but in the Hebrew Gabbatha. The Greek word signifies literally *stone-paved*, and is frequently used to denote a pavement, formed of ornamental stones of various colours, commonly called a *tessellated* or *mosaic pavement*. The partiality of the Romans for this kind of pavement is well known. From this fact it has been inferred by many eminent writers, that the place where Pilate's tribunal was set on this occasion, was covered by a tessellated pavement, which, as a piece of Roman magnificence, was appended to the prætorium at Jerusalem. The emphatic manner in which St. John speaks of it agrees with this conjecture. It further appears from his narrative that it was *outside* the prætorium; for Pilate is said to have 'come out' to the Jews, who, for ceremonial reasons, did not go into it, on this as well as on other occasions (John xviii. 28, 29, 38; xix. 4, 13). Besides which, the Roman governors, although they tried causes, and conferred with their council (Acts xxv. 12), *within* the prætorium, always pronounced sentence in the open air. May not then this tessellated pavement, on which the tribunal was now placed, have been inlaid on some part of the terrace, &c. running along one side of the prætorium, and overlooking the area where the Jews were assembled, or upon a landing-place of the stairs immediately before the grand entrance?

The word Gabbatha is probably synonymous with Lithostratos.

GABRIEL (*the mighty one* [or *hero*] of God), the heavenly messenger who was sent to Daniel to explain the vision of the ram and the he-goat (Dan. viii.), and to communicate the prediction of the Seventy Weeks (Dan. ix. 21-27). Under the new dispensation he was employed to announce the birth of John the Baptist to his father Zechariah (Luke i. 11), and that of the Messiah to the

Virgin Mary (Luke i. 26). Both by Jewish and Christian writers, Gabriel has been denominated an archangel. The Scriptures, however, affirm nothing positively respecting his rank, though the importance of the commissions on which he was employed, and his own words 'I am Gabriel, that stand in the presence of God' (Luke i. 19), are rather in favour of the notion of his superior dignity. But the reserve of the Inspired Volume on such points strikingly distinguishes its angelology from that of the Jews and Mohammedans, and we may add, of the Fathers and some later Christian writers. In all the solemn glimpses of the other world which it gives, a great moral purpose is kept in view. Whatever is divulged tends to elevate and refine: nothing is said to gratify a prurient curiosity.

GAD (*a troop, or fortunate*). 1. A son of Jacob by his concubine Zilpah (Gen. xxx. 10, sq.), and who became the progenitor of one of the twelve tribes. The sons of Gad are enumerated in Gen. xlv. 15, sq., and Num. xxvi. 15, sq. At the time of the conquest of Canaan, the tribe of Gad counted 45,650 warriors (Num. i. 24, 25): the position of their camp in the desert is given Num. ii. 14, and the names of their chiefs, i. 14; ii. 14; vii. 42, sq.

As a reward for their having formed the vanguard in war of the army of the tribes collectively, they were allowed to appropriate to their exclusive use some pastoral districts beyond the Jordan (Num. xxxii. 17, sq.).

The inheritance of this tribe, called the *land of Gad* (1 Sam. xiii. 7; Jer. xlix. 1), was situated beyond the Jordan in Gilead, north of Reuben, and separated on the east from Ammon by the river Jabbok. According to 1 Chron. v. 11, the Gadites had extended their possessions on the east as far as Salcah, though the latter had been allotted by Moses to Manasseh (Deut. iii. 10, 13): a proof how difficult it is to draw a strong line of demarcation between the possessions of pastoral tribes. The territory of Gad forms a part of the present Belka.

In Josh. xiii. 25, the land of Gad is called 'half the land of the children of Ammon,' not because the latter were then in possession of it, but probably because the part west of the Jabbok had formerly borne that name (comp. Judg. xi. 13).

The principal cities of Gad pass by the general appellation of the Cities of Gilead (Josh. xiii. 25).

The Gadites were a warlike people, and were compelled to be continually armed and on the alert against the inroads of the surrounding Arabian hordes (comp. Gen. xlix. 19; Deut. xxxiii. 20; 1 Chron. v. 19, sq.).

2. GAD, a prophet contemporary with David, and probably a pupil of Samuel, who early attached himself to the son of Jesse (1 Sam. xxii. 5). Instances of his prophetic intercourse with David occur in 2 Sam. xxiv. 11, sq.; 1 Chron. xxi. 9, sq.; xxix. 25. Gad wrote a history of the reign of David, to which the author of the 2nd book of Samuel seems to refer for further information respecting that reign (1 Chron. xxix. 29), n.c. 1062-1017.

GADARA was the chief city or metropolis of Perara, lying in the district termed Gadarithy some small distance from the southern extremity

of the sea of Galilee, sixty stadia from Tiberias, to the south of the river Hieromax, and also of the Scheriat-al-Mandhur. It was fortified, and stood on a hill of limestone. Its inhabitants were mostly heathens. After the place had been destroyed in the domestic quarrels of the Jews, it was rebuilt by Pompey, in order to gratify Demetrius of Gadara, one of his freedmen. Augustus added Gadara, with other places, to the kingdom of Herod; from which, on the death of that prince, it was sundered, and joined to the province of Syria (Joseph. *De Bell. Jud.* ii. 6, 5). At a later period it was the seat of an episcopal see.

Most modern authorities find Gadara in the present village of Om-keis. The hill on which it stood was full of caverns, which were used for tombs. The summit of the hill commands a very fine view.

The city formed nearly a square. The upper part of it stood on a level spot, and appears to have been walled all round, the acclivities of the hill being on all sides exceedingly steep. The eastern gate of entrance has its portals still remaining. Among the ruins Buckingham found a theatre, an Ionic temple, a second theatre, besides traces and remnants of streets and houses. The prevalent orders of architecture are the Ionic and the Corinthian.

Burckhardt also found near Gadara warm sulphurous springs. According to Epiphanius, a yearly festival was held at these baths.

Gadara is the scene of the miracle recorded in Matt. viii. 28; Mark v. 1; Luke viii. 26. Buckingham's remarks on this event are well worth quoting:—'The accounts given of the habitation of the demoniac from whom the legion of devils was cast out here struck us very forcibly, while we ourselves were wandering among rugged mountains, and surrounded by tombs still used as dwellings by individuals and whole families. A finer subject for a masterly expression of the passions of madness in all their violence, contrasted with the serenity of virtue and benevolence in him who went about doing good, could hardly be chosen for the pencil of an artist; and a faithful delineation of the rugged and wild majesty of the mountain scenery here on the one hand, with the still calm of the waters of the lake on the other, would give an additional charm to the picture.' One of the ancient tombs was, when our traveller saw it, used as a carpenter's shop, the occupier of it being employed in constructing a rude plough. A perfect sarcophagus remained within, which was used by the family as a provision-chest.

GALATIA, a province of Asia Minor, bounded on the north by Bithynia and Paphlagonia, on the south by Lycania, on the east by Pontus and Cappadocia, and on the west by Phrygia and Bithynia. It derived its name from the Gallic or Celtic tribes who, about 280 years B.C., made an irruption into Macedonia and Thrace. At the invitation of Nicomedes, king of Bithynia, they passed over the Hellespont to assist that prince against his brother Ziboea. Having accomplished this object, they were unwilling to retrace their steps; and, strengthened by the accession of fresh hordes from Europe, they overran Bithynia and the neighbouring countries, and supported themselves by predatory excursions, or by imposts exacted from the native chiefs. After the lapse

of forty years, Attalus I., king of Pergamus, succeeded in checking their nomadic habits, and confined them to a fixed territory. Of the three principal tribes, the Trocmi settled in the eastern part of Galatia, near the banks of the Halys; the Teutosages in the country round Ancyra; and the Tolistobogii in the south-western parts, near Pessinus. They retained their independence till the year B.C. 189, when they were brought under the power of Rome by the consul C. Manlius, though still governed by their own princes. In the year B.C. 25 Galatia became a Roman province. Under the successors of Augustus the boundaries of Galatia were so much enlarged, that it reached from the shores of the Euxine to the Pisidian Taurus. In the time of Constantine a new division was made, which reduced it to its ancient limits; and by Theodosius I. or Valens it was separated into *Galatia Prima*, the northern part, occupied by the Trocmi and Teutosages, and *Galatia Secunda* or *Salutaris*: Ancyra was the capital of the former, and Pessinus of the latter.

From the intermixture of Gauls and Greeks, Galatia was also called Gallo-Grecia, and its inhabitants Gallo-Greci. But even in Jerome's time they had not lost their native language.

The Gospel was introduced into this province by the Apostle Paul. His first visit is recorded in Acts xvi. 6, and his second in Acts xviii. 23.

GALATIANS, EPISTLE TO THE. The Pauline origin of this epistle is attested not only by the superscription which it bears (i. 1), but also by frequent allusions in the course of it to the great Apostle of the Gentiles (comp. i. 13-23; ii. 1-14), and by the unanimous testimony of the ancient church. It is corroborated also by the style, tone, and contents of the epistle, which are perfectly in keeping with those of the Apostle's other writings.

The parties to whom this epistle was addressed are described in the epistle itself as 'the churches of Galatia' (i. 2; comp. iii. 1). Into this district the Gospel was first introduced by Paul himself (Acts xvi. 6; Gal. i. 8; iv. 13, 19). Churches were then also probably formed; for on revisiting this district some time after his first visit, it is mentioned that he 'strengthened the disciples' (Acts xviii. 23). These churches seem to have been composed principally of converts directly from heathenism, but partly, also, of Jewish converts, both pure Jews and proselytes. Unhappily, the latter, not thoroughly emancipated from early opinions and prepossessions, or probably influenced by Judaizing teachers who had visited these churches, had been seized with a zealous desire to incorporate the rites and ceremonies of Judaism with the spiritual truths and simple ordinances of Christianity. So active had this party been in disseminating their views on this head through the churches of Galatia, that the majority at least of the members had been seduced to adopt them (i. 6; iii. 1, &c.). From some passages in this epistle (*e. gr.* i. 11-24; ii. 1-21) it would appear also that insinuations had been disseminated among the Galatian churches to the effect that Paul was not a divinely-commissioned Apostle, but only a messenger of the church at Jerusalem; that Peter and he were at variance upon the subject of the relation of the Jewish rites to Christianity; and that Paul him-

self was not at all times so strenuously opposed to those rites as he had chosen to be among the Galatians. Of this state of things intelligence having been conveyed to the Apostle, he wrote this epistle for the purpose of vindicating his own pretensions and conduct, of counteracting the influence of these false views, and of recalling the Galatians to the simplicity of the Gospel which they had received. The importance of the case was probably the reason why the Apostle put himself to the great labour of writing this epistle with his own hand (vi. 11).

The epistle consists of three parts. In the first part (i.-ii.), after his usual salutations, Paul vindicates his own Apostolic authority and independence as a directly-commissioned ambassador of Christ to men, and especially to the Gentile portion of the race, asserting that the Gospel which he preached was the only Gospel of Christ,—expressing his surprise that the Galatians had allowed themselves to be so soon turned from him who had called them, to a different Gospel,—denouncing all who had thus seduced them as troublers of the church, perverters of the doctrine of Christ, and deserving, even had they been angels from heaven, to be placed under an anathema instead of being followed,—maintaining the divine origin of his Apostolic commission, which he illustrates by the history of his conversion and early conduct in the service of Christ,—and declaring that, so far from being inferior to the other Apostles, he had ever treated with them on equal terms, and been welcomed by them as an equal. Having in the close of this part of the epistle been led to refer to his zeal for the great doctrine of salvation by the grace of God through faith in Christ, he enters at large, in the second part (iii.-iv.), upon the illustration and defence of this cardinal truth of Christianity. He appeals to the former experience of the Galatians as to the way in which they had received the Spirit, to the case of Abraham, and to the testimony of Scripture in support of his position that it is by faith and not by the works of the law that men are accepted of God (iii. 1-9). He proceeds to remind them that the law has brought a curse upon men because of sin, a curse which it has no power to remove, and from which the sinner can be redeemed only through the substitutionary work of Christ, by whose means the blessing of Abraham comes upon the Gentiles. And lest any should object that the law being of more recent origin than the covenant must supersede it, he shows that this cannot be the case, but that the covenant must be perpetual, whilst the law is to be regarded only in the light of a temporary and intercalary arrangement, the design of which was to forward the fulfilment of the promise in Christ (10-29). The relation of the Jewish church to the Christian is then illustrated by the case of an heir under tutors and governors as contrasted with the case of the same person when he is of age and has become master of all; and the Galatians are exhorted not willingly to descend from the important and dignified position of sons to that of mere servants in God's house—an exhortation which is illustrated and enforced by an allegorical comparison of the Jewish church to Ishmael, the son of Hagar, and of the Christian to Isaac, the son of Sarah, and the Child of Promise (iv. 1-31). The third part of the Epistle

(v.-vi.) is chiefly hortatory and admonitory. It sets forth the necessity of steadfast adherence to the liberty of the Gospel in connection with obedience to the moral law as a rule of duty, the importance of mutual forbearance and love among Christians, and the desirableness of maintaining a firm adherence to the doctrine of Christ and Him crucified. The epistle concludes with benedictions and prayers.

Respecting the time when and the place where this epistle was written, great diversity of opinion prevails. But the majority of writers on this subject concur in the opinion that the Apostle wrote and despatched this epistle not long after he had left Galatia for the second time, and, perhaps, whilst he was residing at Ephesus (comp. Acts xviii. 23; xix. 1, seq.).

GALBANUM is mentioned in Exod. xxx. 34, as one of the substances from which the incense for the sanctuary was to be prepared: 'Take unto thee sweet spices, stacte and onycha and galbanum.' The substance itself is well known, but the plant which yields it is yet to be ascertained.

Galbanum is in the present day imported into this country both from the Levant and from India. That from the latter country is exported from Bombay, having been first imported thither, probably from the Persian Gulf. It is therefore probable that it may be produced in the countries at the head of that gulf, that is, in the northern parts of Arabia or in Persia, (portions of which, as is well known, were included in the Syria of the ancients;) perhaps in Kurdistan, which nearly corresponds with ancient Assyria.

Galbanum, then, is either a natural exudation, or obtained by incisions from some umbelliferous plant. It occurs in commerce in the form either of tears or masses, commonly called *lump-galbanum*. The latter is of the consistence of wax, tenacious, of a brownish or brownish yellow colour, with white spots in the interior, which are the agglutinated tears. Its odour is strong and balsamic, but disagreeable, and its taste warm and bitter. It is composed of 66 per cent. of resin, and 6 of volatile oil, with gum, &c., and impurities. It was formerly held in high esteem as a stimulant and anti-spasmodic medicine, and is still employed as such, and for external application to discuss indolent tumours. It was the practice of the ancients to mix galbanum with the most fragrant substances with which they were acquainted. The effect of such mixture must depend upon the proportion in which it or any other strong-smelling substance is intermixed, more than upon what is its peculiar odour when in a concentrated state. We need not, therefore, inquire into the reasons which have been assigned to account for galbanum being intermixed with stacte and onycha as sweet spices. We see it was the custom so to do both in other ancient nations, as the Greeks and the Egyptians.

GALILEE, the name given to one of the three principal divisions of Palestine, the other two being Judæa and Samaria. This name of the region was very ancient. It occurs in the Hebrew forms of *Galil* and *Galilath*, Josh. xx. 7; xxi. 3; 1 Kings ix. 11; 2 Kings xv. 29; and in Isa. viii. 23 we have 'Galilee of the nations;' 1 Mace. v. 15; Matt. iv. 15.

Galilee was the northernmost of the three divi

sions, and was divided into Upper and Lower. The former district had Mount Lebanon and the countries of Tyre and Sidon on the north; the Mediterranean Sea on the west; Abilene, Iturea, and the country of Decapolis on the east; and Lower Galilee on the south. This was the portion of Galilee which was distinctively called 'Galilee of the nations,' or of the 'Gentiles,' from its having a more mixed population, i.e. less purely Jewish than the others. Caesarea Philippi was its principal city. Lower Galilee had Upper Galilee on the north, the Mediterranean on the west, the Sea of Galilee or Lake of Gennesareth on the east, and Samaria on the south. Its principal towns were Tiberias, Chorazin, Bethsaida, Nazareth, Caus, Capernaum, Nain, Caesarea of Palestine, and Ptolemais. This is the district which was of all others the most honoured with the presence of our Saviour. Here he lived entirely until he was thirty years of age; and although, after the commencement of his ministry, he frequently visited the other provinces, it was here that he chiefly resided. Here also he made his first appearance to the Apostles after his resurrection; for they were all of them natives of this region, and had returned hither after the sad events at Jerusalem (Matt. xxviii. 7).

Hence the disciples of Christ were called 'Galileans.' They were easily recognised as such; for the Galileans spoke a dialect of the vernacular Syriac different from that of Judaea, and which was of course accounted rude and impure, as all provincial dialects are considered to be, in comparison with that of the metropolis. It was this which occasioned the detection of St. Peter as one of Christ's disciples (Mark xiv. 70). The Galilean dialect was of a broad and rustic tone, which affected the pronunciation not only of letters but of words.

The Galileans are mentioned by Josephus as a turbulent and rebellious people, ready on all occasions to rise against the Roman authority. This character of them explains what is said in Luke xiii. 1, with regard to 'the Galileans whose blood Pilate had mingled with their sacrifices.' Josephus, indeed, does not mention any Galileans slain in the Temple by Pilate; but the character which he gives that people sufficiently corroborates the statement. The tumults to which he alludes were, as we know, chiefly raised at the great festivals, when sacrifices were slain in great abundance; and on all such occasions the Galileans were much more active than the men of Judaea and Jerusalem, as is proved by the history of Archelaus, which case, indeed, furnishes an answer to those who deny that the Galileans attended the feasts with the rest of the Jews.

This seditious character of the Galileans also explains why Pilate, when sitting in judgment upon Jesus, caught at the word Galilee when used by the chief priests, and asked if he were a Galilean (Luke xxiii. 6). To be known to belong to that country was of itself sufficient to prejudice Pilate against him, and to give some countenance to the charges, unsupported by impartial evidence, which were preferred against him, and which Pilate himself had, just before, virtually declared to be false.

GALLILEK, SEA OF. [SEA.]

GALL occurs in its *primary* and *proper* meaning, as denoting the substance secreted in the

gall-bladder of animals, commonly called bile, in the following passages; Job. xvi. 13, 'He poureth out my gall.' The metaphors in this verse are taken from the practice of huntsmen, who first surround the beast, then shoot it, and next take out the entrails. The meaning, as given by Bp. Heath, is, 'he entirely destroyeth me.' Job xx. 14 (describing the remorse of a wicked man), 'the gall of adders' (which according to the ancients is the seat of their poison). Job xx. 23, where, to describe the certainty of a wicked man's destruction, it is said, 'the glittering sword cometh out of his gall.' In the story of Tobit the gall of a fish is said to have been used to cure his father's blindness (Tobit vi. 8; xi. 10, 13). Pliny refers to the use of the same substance for diseases of the eye. Galen and other writers praise the use of the liver of the *silurus* in cases of dimness of sight.

GALL is also employed in the Authorized Version as the meaning of the word *Rosh*, which is generally considered to signify some plant. This we may infer from its being frequently mentioned along with 'wormwood,' as in Deut. xxix. 18, 'lest there should be among you a root that beareth gall (*rosh*) and wormwood; so also in Jer. ix. 15; xxiii. 15; and in Lament. iii. 19, 'Remembering mine affliction and my misery, the wormwood and the gall.' That it was a berry-bearing plant, has been inferred from Deut. xxxii. 32, 'For their vine is of the vine of Sodom, and their grapes are grapes of gall (*rosh*), their clusters are bitter.' In Jer. viii. 14, 'water of gall' (*rosh*), is mentioned; which may be either the expressed juice of the fruit or of the plant, or a bitter infusion made from it. That it was a plant is very evident from Hosea x. 4, where it is said 'their judgment springeth up as hemlock (*rosh*) in the furrows of the field.'

Though *rosh* is generally acknowledged to indicate some plant, yet a variety of opinions have been entertained respecting its identification: some, as the Auth. Vers. in Hosea x. 4, and Amos vi. 12, consider *cicuta* or *hemlock* to be the plant intended, but there is little or no proof adduced that this is the case.

Some have concluded that it must be *darnel*, which is remarkable among grasses for its poisonous and intoxicating properties. It is, however, rather sweetish in taste, and its seeds being intermixed with corn, are sometimes made into bread. It is well known to grow in corn-fields, and would therefore suit the passage of Hosea; but it has not a berry-like fruit, nor would it yield any juice: the infusion in water, however, might be so understood, though it would not be very bitter or disagreeable in taste. Hiller adduces the *centaury* as a bitter plant, which corresponds with much of what is required. Two kinds of *centaury*, the larger and smaller, and both conspicuous for their bitterness, were known to the ancients. The latter is one of the family of gentians, and still continues to be employed as a medicine on account of its bitter and tonic properties. From the extreme bitterness of taste, from growing in fields, and being a native of warm countries, some plant like *centaury*, and of the tribe of gentians, might answer all the passages in which *rosh* is mentioned, with the exception of that (Deut. xxxii. 32) where it is supposed to have a berried fruit. Dr. Harris, quoting

Blaney on Jerem. viii. 14, says, 'In Ps. lxi. 21. which is justly considered as a prophecy of our Saviour's sufferings, it is said, "they gave me gall to eat." And accordingly it is recorded in the history, Matt. xxvii. 34, "They gave him vinegar to drink, mingled with gall." But in the parallel passage (Mark xv. 23) it is said to be "wine mingled with myrrh," a very bitter ingredient. From whence I am induced to think that perhaps *rosk* may be used as a general name for whatever is exceedingly bitter; and consequently, when the sense requires, it may be put specially for any bitter herb or plant.'

GALLIO. Junius Annæus Gallio, elder brother of Seneca the philosopher. His name was originally M. Ann. Novatus, but changed to Jun. Ann. Gallio in consequence of his adoption by Jun. Gallio the rhetorician. Seneca dedicated to him his treatise *De Vita Beata*, and in the preface to the fourth book of his *Naturales Questiones* describes him as a man universally beloved; and who, while exempt from all other vices, especially abhorred flattery. According to Eusebius, he committed suicide before the death of Seneca; but Tacitus speaks of him as alive after that event, and Dion Cassius states that he was put to death by order of Nero. He was *Proconsul of Achaia* (Acts xviii. 12) under the Emperor Claudius, when Paul first visited Corinth, and nobly refused to abet the persecution raised by the Jews against the Apostle. Dr. Lardner has noticed the strict accuracy of Luke in giving him this designation, which is obscured in the Auth. Vers. by the use of the term *deputy*.

GAMALIEL (God is my rewarder), a member of the Sanhedrim in the early times of Christianity, who, by his favourable interference, saved the Apostles from an ignominious death (Acts v. 34). He was the teacher of the Apostle Paul before the conversion of the latter (Acts xxii. 3). He bears in the Talmud the surname of 'the old man,' and is represented as the son of Rabbi Simeon, and grandson of the famous Hillel: he is said to have occupied a seat, if not the presidency, in the Sanhedrim during the reigns of Tiberius, Caligula, and Claudius, and to have died eighteen years after the destruction of Jerusalem.

There are idle traditions about his having been converted to Christianity by Peter and John; but they are altogether irreconcilable with the esteem and respect in which he was held even in later times by the Jewish Rabbins, by whom his opinions are frequently quoted as an all-silencing authority on points of religious law. Neither does his interference in behalf of the Apostles at all prove—as some would have it—that he secretly approved their doctrines. He was a dispassionate judge, and reasoned in that affair with the tact of worldly wisdom and experience, urging that religious opinions usually gain strength by opposition and persecution (Acts v. 36, 37), while, if not noticed at all, they are sure not to leave any lasting impression on the minds of the people, if devoid of truth (ver. 38); and that it is vain to contend against them, if true (ver. 39). That he was more enlightened and tolerant than his colleagues and contemporaries, is evident from the very fact that he allowed his zealous pupil Saul to turn his mind to Greek literature, which, in a great measure, qualified him afterwards to become the Apostle of the Gentiles; while by the Jewish

Palestine laws, after the Maccabæan wars, even the Greek language was prohibited to be taught to the Hebrew youth.

Another proof of the high respect in which Gamaliel stood with the Jews long after his death, is afforded by an anecdote told in the Talmud respecting his tomb, to the effect that Onkelos (the celebrated Chaldean translator of the Old Testament) spent seventy pounds of incense at his grave in honour of his memory.

GAMES. If by the word are intended mere secular amusements, which are the natural expression of vigorous health and joyous feeling, fitted, if not designed, to promote health, hilarity, and friendly feeling, as well as to aid in the development of the corporeal frame, we must look to other quarters of the globe, rather than to Palestine, for their origin and encouragement. The Hebrew temperament was too deep, too earnest, too full of religious emotion, to give rise to games having a national and permanent character. Whatever of amusement, or rather of recreation, the descendants of Abraham possessed, partook of that religious complexion which was natural to them; or rather the predominant religiousness of their souls gave its own hue, as to all their engagements, so to their recreations. The influence of religion pervaded their entire being; so that whatever of recreation they needed or enjoyed is for the most part found blended with religious exercises. Hence their great national festivals served at once for the devout service of Almighty God, and the recreation and refreshment of their own minds and bodies.

Games, however, are so natural to man, especially in the period of childhood, that no nation has been or can be entirely without them. Accordingly a few traces are found in the early Hebrew history of at least private and childish diversions. The heat of the climate too in Syria would indispose the mature to more bodily exertion than the duties of life imposed, while the gravity which is characteristic of the Oriental character might seem compromised by anything so light as sports. Dignified ease therefore corresponds with the idea which we form of Oriental recreation. The father of the family sits at the door of his tent, or reclines on the housetop, or appears at the city gate, and there tranquilly enjoys repose, broken by conversation, under the light and amid the warmth of the bright and breezy heavens, in the cool of the retiring day, or before the sun has assumed his burning ardours (Deut. xvi. 14; Lam. v. 14). Even among the active Egyptians, whose games have been figured on their mural tablets, we find little which suggests a comparison with the vigorous contests of the Grecian games. One of the most remarkable is the following (No. 181), showing what appears to be play with the single-stick.

Zechariah (viii. 5) alludes to the sportiveness of children in the streets as a sign and consequence of that peace and prosperity which are so free from alarm that the young take their usual games, and are allowed entire liberty by their parents:—"and the streets of the city shall be full of boys and girls playing in the streets thereof" (comp. Jer. xxx. 19). An interesting passage illustrative of these street-amusements is found in Matt. xi. 16:—"This generation is like unto children sitting in the markets and calling

unto their fellows, We have piped unto you and ye have not danced, we have mourned unto you, and ye have not lamented.'

181.

That the elegant amusement of playing with tamed and trained birds was not unusual may be learnt from Job xli. 5:—'Wilt thou play with him (leviathan) as with a bird?' Commenting on Zech. xii. 3, Jerome mentions an amusement of the young, which we have seen practised in more than one part of the north of England. 'It is customary,' he says, 'in the cities of Palestine, and has been so from ancient times, to place up and down large stones to serve for exercise for the young, who, according in each case to their degree of strength, lift these stones, some as high as their knees, others to their middle, others above their heads, the hands being kept horizontal and joined under the stone.'

Music, song, and dancing, were recreations reserved mostly for the young or for festive occasions. From Lam. v. 16, 'the crown is fallen from our head' (see the entire passage on the subject of games), it might be inferred that, as among the Greeks and Latins, chaplets of flowers were sometimes worn during festivity. To the amusements just mentioned frequent allusions are found in holy writ, among which may be given Ps. xxx. 11; Jer. xxxi. 13; Luke xv. 25. In Isaiah xxx. 29, a passage is found which serves to show how much of festivity and mirth was mingled with religious observances; the journey on festival occasions up to Jerusalem was enlivened by music, if not by dancing:—'Ye shall have a song as in the night when a holy solemnity is kept; and gladness of heart, as when one goeth with a pipe to come into the mountain of the Lord, to the Mighty One of Israel.' A passage occurs in 2 Sam. ii. 14, which may indicate the practice among the ancient Israelites of games somewhat similar to the jousts and tournaments of the middle ages. No trace is found in Hebrew antiquity of any of the ordinary games of skill or hazard which are so numerous in the western world.

The Grecian influence which made itself felt after the Exile, led to a great change in the manners and customs of the Hebrew nation. They were soon an almost different people from what we find them in the days of their national independence and primitive simplicity. In Macc. i. 14, we find evidence that the Grecian games were introduced, and that a gymnasium was built under Antiochus Epiphanes:—'They built a place of exercise at Jerusalem, according to the custom of the heathen.' Compare 2 Macc. iv. 12,

13, 14, where special mention is made of the prevalence of 'Greek fashions,' and 'the game of discus'; though, as appears clearly from the last passage (v. 17), these practices were considered contrary to the Mosaic institutions, and were hateful to pious Israelites. The Herodian princes had theatres and amphitheatres built in Jerusalem and other cities of Palestine, in which were held splendid games, sometimes in honour of their Roman masters. The drama does not appear to have been introduced, but Jews were in foreign countries actors of plays.

These facts make it the less surprising that allusions should be found in the New Testament writings to the Grecian games, on which we think it desirable to supply somewhat detailed information, in order to serve as illustrations of Scriptural language.

The fact that, as we have seen, the games of the amphitheatre were celebrated even in Jerusalem, serves to make it very likely that Paul, in 1 Cor. xv. 32; iv. 9, alludes to these detestable practices, though it is not probable that the Apostle was himself actually exposed to the fury of the raging animals. Contrary to the opinion of some writers, the reference to these combats appears to us very clear, though it was only metaphorically that Paul 'fought with beasts at Ephesus.'

The word which the Apostle (1 Cor. xv. 32) uses is emphatic and descriptive. The beast-fight constituted among the Romans a part of the amusements of the circus or amphitheatre. It consisted in the combat of human beings with animals. The persons destined to this barbarous kind of amusement were generally of two classes—1. Voluntary, that is, persons who fought either for amusement or for pay; these were clothed and provided with offensive and defensive weapons. 2. Condemned persons, who were

182.

mostly exposed to the fury of the animals unclothed, unarmed, and sometimes bound. As none but the vilest of men were in general devoted to these beast-fights, no punishment could be more condign and cruel than what was frequently inflicted on the primitive Christians, when they were hurried away 'to the lions' (as the phrase was), merely for their fidelity to conscience and to Christ, its Lord. Ephesus appears to have had some unenviable distinction in these brutal exhibitions, so that there is a peculiar propriety in the language of the Apostle.

The New Testament, in several places, contains references to the celebrated Grecian Games, though it may be allowed that some commentators have imagined allusions where none were designed. As might, from his heathen learning, be expected, it is Paul who chiefly supplies the

passages in question (see Gal. ii. 2; v. 7; Phil. ii. 16; Heb. xii. 1, 4; Phil. iii. 14; 2 Tim. ii. 5). The most signal passage, however, is found in 1 Cor. ix. 24-27, 'Know ye not that they which run in a race run all, but one receiveth the prize? So run that ye may obtain. And every man that striveth for the mastery is temperate in all things. Now they do it to obtain a corruptible crown; but we an incorruptible. I therefore so run, not as uncertainly; so fight I, not as one that beateth the air; but I keep under my body, and bring it into subjection, lest that by any means, when I have preached to others, I myself should be a castaway.' In the Old Testament two passages contain a clear reference to games; Ps. xix. 5; Eccl. ix. 11.

Four of these games stood far above the rest, bearing the appellation of 'sacred,' and deriving their support from the great Hellenic family at large, though each one had special honour in its own locality: these four were the Olympic, Pythian, Nemean, and Isthmian. The first were held in the highest honour. The victors at the Olympic games were accounted the noblest and happiest of mortals, and every means was taken that could show the respect in which they were held. These games were celebrated every five years at Olympia, in Elis, on the west side of the Peloponnesus. Hence the epoch called the Olympiads.

The gymnastic exercises were laid down in a well-planned systematic series, beginning with the easier, and proceeding on to the more difficult.

183.

Some of these were specially fitted to give strength, others agility; some educated the hands, others the feet. Among the lighter exercises was reckoned running, leaping, quoiting, hurling the javelin. When skill had been obtained in these, and the consequent strength, then followed a severer course of discipline. This was two-fold—1, simple; 2, compound. The simple consisted of wrestling, boxing; the compound

184

we find in the Pentathlon (the five contests), and the Pankration (or general trial of strength).

The Pentathlon was made up of the union of leaping, running, quoiting, wrestling, and hurling

185.

the spear; the Pankration consisted of wrestling and boxing.

Racing may be traced back to the earliest periods of Grecian antiquity, and may be regarded as the first friendly contest in which men engaged. Accordingly the Olympic and Pythian, probably also the other games, opened with foot-races. Foot-racing, perfected by systematic practice, was divided into different kinds. If you ran merely to the end of the course, it was called stadium; if you went thither and back, you ran the double course. The long course re-

186.

quired extraordinary speed and power of endurance. What it involved the ancients have left in no small uncertainty. It is sometimes given as seven times over the stadium; at others, twelve times; at others again, twenty; and even the number of four and twenty times is mentioned. These lengths will give some idea of the severity of the trial, and serve to illustrate the meaning of the Apostle when he speaks of running with patience (*sustained effort*) the race set before him (Heb. xii. 1). Indeed, one Ladas, a victor at the Olympic games, in the 'long race,' was so exhausted by his efforts, that, immediately on gaining the honour and being crowned, he yielded up his breath,—a fact which also serves to throw light on Scriptural language, as showing with what intense eagerness these aspirants strove for perishing chaplets. In the preparatory discipline everything was done which could conduce to swiftness and strength. The exercises were performed with the body naked and well oiled. Minute directions were established in order to prevent foul play of any kind, so that all the competitors might start and run on terms of entire equality, illustrating the words of Paul on the necessity of running lawfully (2 Tim. ii. 5). The contest was generally most severe; to reach the goal sooner by one foot was enough to decide

the victory. How true and graphic then the descriptions given by Paul; it was, as the Apostle states, in the race-course that the contests took place: every one striving for the victory was temperate in all things; nay more, he kept under his body, and brought it into subjection. A passage is found in the *Enchiridion* of Epictetus, which shows with what propriety the terms which the Apostle employs were chosen by him: 'You wish to conquer at the Olympic games? so also do I; for it is honourable; but bethink yourself what this attempt implies, and then begin the undertaking. You must subject yourself to a determinate course; must submit to dietetic discipline; must pursue the established exercises at fixed hours in heat and cold; must abstain from all delicacies in meat and drink; yield yourself unreservedly to the control of the presiding physician, and even endure flogging.'

It may well be supposed that the competitors employed all their ability, and displayed the greatest eagerness to gain the prize. The nearer, too, they approached to the goal, the more did they increase their efforts. Sometimes the victory depended on a final spring; happy he that retained power enough to leap first to the goal. The spectators also used every encouragement in their power, these favouring one competitor, those another.

All these remarks go to show how wisely Paul acted in selecting the figure, and how carefully he has preserved the imagery which belongs to it. A word employed in the Common Version, 1 Cor. ix. 27, 'Lest when I have preached to others I myself should be a castaway'—namely, *preached*, mars the figure. The original means 'acted the part of herald,' whose business it was to call the competitors to the contest and proclaim their victory, functions which Paul spent his life in performing.

Paul speaks in the same connection of running not as uncertainly, of fighting not as one who beareth the air; alluding to the preludial exercises, trials of individual and of comparative strength, which took place in the course of training. These runnings and boxings had no immediate aim nor result, and implied no real competitor; hence the propriety of the terms which the sacred writer employs.

In writing to the Christians at Corinth there was a special propriety, on the part of the Apostle, in making allusions to the public games. Corinth was the place where one of the four Greek national games was celebrated, namely, the Isthmian. These games were so called from being held on the isthmus which joins northern with southern Greece, a spot of land most celebrated in Grecian history, alike in martial and commercial matters. The Corinthians appear to have been inordinately fond of these amusements. They were held every three years. They comprised three leading divisions—musical, gymnastical, and equestrian contests. In the first the tyrant Nero carried off a crown, by destroying his too highly-gifted antagonist. The gymnastic contests were the same as those of which we have already spoken. A few words, however, may here be introduced as to the horse-racing, which has not been hitherto described. Generally the same kinds prevailed as at the Olympic and Pythian games. Chariot-races seem to have been

practised in the earliest heroic times, since chariots were as early as this used in battle, and the notices which have come down to us refer this kind of sport to the early period now indicated. It stood pre-eminently before other games. The skill and outlay which it required prevented any but persons of distinction—the wealthy, governors, princes, and kings—from engaging in its enjoyments. The number of chariots that

167.

might appear on the course at once cannot be accurately determined. Pindar praises Arkesilas of Cyrene for having calmly brought off his chariot uninjured, in a contest where no fewer than forty took part. The course had to be gone over twelve times. The agency of the drivers, the speed and exhaustion of the horses, may easily be imagined. The greatest skill was needed in turning the pillar which marked the extremity of the course, especially when the contending chariots were numerous.

At the Olympic games the prize was simply a chaplet made of wild olive. The crowns were laid on a tripod, and placed in the middle of the course, so as to be seen of all. On the same table there were also exposed to view palm-branches, one of which was given into the hand of each conqueror at the same time with the chaplet. The victors, having been summoned by proclamation, were presented with the ensigns of victory, and conducted along the stadium, preceded by a herald, who proclaimed their honours, and announced their name, parentage, and country.

The real reward, however, was in the fame which ensued. A chaplet won in the chariot-races at Olympia was the highest of earthly honours. What congratulations from friends; how was the public eye directed to the fortunate conqueror; what honour had he conferred on his native city, and for what office was such an one unfit! What intense and deep delight must his bosom have been filled with when the full acclaim of assembled Greece fell upon his ear, coming in loud salutations and applause from every part of the crowded course! Then came the more private attentions of individual friends. One brought a chaplet of flowers; another bound his head with ribbons. Afterwards came the triumphal sacrifice made to the twelve gods, accompanied by sumptuous feasting. The poet now began his office, gaining, in some cases, both for himself and the happy victor, an unexpected immortality. Music also lent her aid, and his name was sung wherever the noble accents of the Greek tongue asserted their supremacy. In order to perpetuate the memory of these great men, their names and achievements were entered into a public register, which was under the care of suitable officers. A

no less privilege was that of having a statue of themselves placed either at the expense of their country or their friends, in the sacred grove of Jupiter. A perhaps still greater honour awaited the victor on his return home. The conquerors at the Isthmian games were wont to be received in their chariots, superbly attired, amid thronging and jubilant multitudes.

One or two other privileges belonged to these victors, such as immunity from public offices, and a certain yearly stipend. If to all this be added the strict scrutiny which competitors were obliged to undergo (in the best ages), so that none could enter the lists but such as were of pure Greek blood, and incorrupt in life, none but such as had undergone the required disciplinary training, and (in the case of the chariot and horse-races) none but those who could afford to possess and train horses in a country in which, as in Greece, horses, particularly in the earlier ages, were very scarce and dear; it will be seen that the distinction of the prize was not over-rated, when it was compared with a Roman triumph.

At the Isthmian games the prize was parsley during the mythic periods. In later ages the victor was crowned with a chaplet of pine leaves. Parsley, however, appears to have been also employed. If the conqueror had come off victorious in the three great divisions—music, gymnastics, and racing—he was in the Pythian, as well as in the other sacred games, presented also with a palm-branch.

GARDEN. Several gardens are mentioned in the Scriptures, as the garden of Eden (Gen. ii. 8, 9, 10, 15), Ahab's garden of herbs (1 Kings xxi. 2), the royal garden near the fortress of Zion (2 Kings xxi. 18; xxv. 4), the royal garden of the Persian kings at Susa (Esther i. 5; vii. 7, 8), the garden of Joseph of Arimathea (John xix. 41), and the garden of Gethsemane (John xviii. 1). It is clear, from Josh. v. 2, and Lam. ii. 6, that gardens were generally hedged or walled, as indeed Josephus expressly states respecting the gardens near Jerusalem. In Neh. ii. 5, and John xx. 15, gardeners and keepers of gardens by occupation are indicated.

Gardens were planted not only with fragrant and beautiful plants, but with various fruit-bearing and other trees (Gen. ii. 9; Jer. xxix. 5; Amos ix. 14). Thus we find mention of nut-gardens (Cant. vi. 14), pomegranate-gardens (Cant. iv. 13), olive-gardens (Deut. viii. 8; 1 Chron. xxvii. 28), vine-gardens (Cant. iv. 2; viii. 8). Here, however, we are not to suppose that the gardens were exclusively occupied by these fruits, but that they were severally predominant in the gardens to which they gave name. The distinction, for instance, between a vine-garden and a vineyard would be, that, in the latter, the vine was cultivated solely for use, whereas in the former it was planted for solace and ornament, to cover walls, and to be trained in arbours and on trellises.

Gardens were, when possible, planted near streams, which afforded the means of easy irrigation. This explains such passages as Gen. ii. 9, sq., and Isa. i. 30. But streams were few in Palestine, at least such as afforded water in summer, when alone water was wanted for irrigation; hence rain-water, or water from the streams which dried up in summer, was in winter stored

up in reservoirs, spacious enough to contain all the water likely to be needed during the dry season. In fact many of our own large nurseries are watered in the same manner from reservoirs of rain-water. The water was distributed through the garden in numerous small rills, which traversed it in all directions, and which were supplied either by a continued stream from the reservoir, or had water poured into them by the gardeners, in the manner shown in the Egyptian monuments. These rills being turned and directed by the foot, gave rise to the phrase 'watering by the foot,' as indicative of garden irrigation (Deut. xi. 10). The following representation (No. 188) very clearly shows the way in which water was raised, by a balanced lever, from the stream or reservoir, and poured into a trough, whence it flowed into the various canals for irrigation. This method is still in use.

188. [Watering Garden.]

Gardens were dedicated to various uses among the Hebrews, such as we still find prevailing in the East. One most essential difference between them and our own is that they are not attached to or in any way connected with the residence but are situated in the suburbs. We have known gardens from half a mile to a mile distant from the houses of the persons to whom they belonged. It is manifest that all the gardens mentioned in Scripture were outside the several towns. This is, however, to be understood of regular gardens, for shrubs and flowers were often planted in the open courts of the dwelling-houses.

People repair to their suburban gardens to take the air, to walk, and to refresh and solace themselves in various ways. For their use there is mostly in each garden a kind of summer-house or pavilion, fitted up with much neatness, gaily painted, and furnished with seats, where the visitants may sit and enjoy themselves. Here sometimes banquets were and are still given, attended by singing and music (Isa. ii. 3; lxx. 3). The custom of burying the dead in gardens is indicated in Gen. xxiii. 19, 20; 2 Kings xxi. 4; 1 Sam. xxv. 1; Mark xv. 46; and still occurs sometimes in the East, but is not very prevalent.

We find it also among the Greeks and the Romans.

189. [Garden-houses.]

It is evident that the gardens of the Hebrews were in a very considerable degree devoted to the culture of medicinal herbs, the preparation of which in various ways was a matter of much solicitude with them (Jer. viii. 22). This is still the case in the East, where vegetable simples are as much employed in medicine as they were in this country in the times of Gerard and Culpeper.

It would seem that the Jews were much in the habit of performing their devotions in gardens (Gen. xxiv. 63; Matt. xvi. 30; John ii. 48; xviii. 1, 2). This interesting practice, however, was idolatrously abused; for the worship of idols in these shady seclusions was not of unfrequent occurrence, and is often mentioned in Scripture (1 Kings xiv. 23; 2 Kings xvi. 4; xvii. 10; 2 Chron. xviii. 4; Isa. lxxv. 3; lxxvi. 17; Jer. ii. 20; iii. 6; Ezek. xx. 23).

Such are the principal points of information concerning gardens which may be collected from Scripture, or which may be connected with the Scriptural intimations.

There is no reason to suppose that the gardens of the ancient Jews differed in any material respect from those which are still found in Palestine. Such difference as did exist was doubtless occasioned chiefly by the minute rules which were founded upon the law forbidding the intermixture of diverse plants and seeds. The gardens of the Holy Land have been mentioned by travellers in terms too vague and general to afford the basis of a satisfactory description. Dr. Olin seems to have paid most attention to them. Of the gardens near Shechem he says, 'Upon turning an angle in the steep gorge we found ourselves, as if by enchantment, in the midst of fruitful gardens filled with vegetables, flowers, and fruit-trees, and all in the highest perfection of luxuriance and beauty. Olives, vines, acacias, pomegranates, figs, mulberries, and several species of trees which I did not recognise,

are crowded together in small enclosures, forming an impervious shade as well as an impenetrable thicket; and yet the capabilities of the soil seem not to be overburdened. Each separate tree and plant thrives to admiration, and seems rather to profit than suffer from the thick dark canopy of branches and foliage, which entirely excludes the sun's rays from the tangled huddle of trunks and roots. A beautiful mountain stream runs through the midst of this forest of gardens, in a channel mostly artificial and sometimes covered; but the water often rises into small fountains, and forms several cascades.' The orange and citron trees which abound in these gardens near Shechem were probably those not recognised by Dr. Olin, from their not being in fruit at the time of his visit.

GARLIC occurs only once in Scripture, and that in the passage (Num. xi. 5) in which the Israelites are described as murmuring, among other things, for the leeks, the onions, and the garlic (*shumim*) of Egypt. There can be no doubt of its being correctly so translated, as the corresponding Arabic word still signifies a species of garlic, which is cultivated and esteemed throughout Eastern countries. Ancient authors mention that garlic was cultivated in Egypt and highly esteemed there. Herodotus enumerates it as one of the substances upon which a large sum (1600 talents) was spent for feeding labourers employed in building the Pyramids. The species considered to have been thus cultivated in Egypt, is *Allium Ascalonicum*, which is the most common in Eastern countries, and obtains its specific name from having been brought into Europe from Ascalon. It is now usually known in the kitchen garden by the name of 'eschalot' or 'shallot,' and is too common to require a fuller notice.

GATE, DOOR, the entrance to enclosed grounds, buildings, dwelling-houses, towns, &c. Thus we find mentioned—1. *Gates of cities*, as of Jerusalem, its sheep-gate, fish-gate, &c. (Jer. xxxvii. 13; Neh. i. 3; ii. 3; vii. 3); of Sodom (Gen. xix. 1); of Gaza (Judg. xvi. 3). 2. *Gates of royal palaces* (Neh. iii. 8). 3. *Gates of the Temple*. The temple of Ezekiel had two gates, one towards the north, the other towards the east; the latter closed (Ezek. xliv. 1, 2), the other must have been open. 4. *Gates of tombs* (Matt. xxvii. 60). 5. *Gates of prisons*. In Acts xii. 10, mention is made of the iron-gate of Peter's prison (xvi. 27). Prudentius speaks of gatekeepers of prisons. 6. *Gates of caverns* (1 Kings xix. 13). 7. *Gates of camps* (Exod. xxxii. 26, 27; see Heb. xiii. 12). The camps of the Romans had generally four gates. The camp of the Trojans is also described as having had gates.

We do not know of what materials the enclosures and gates of the temporary camps of the Hebrews were formed. In Egyptian monuments such enclosures are indicated by lines of upright shields, with gates apparently of wicker, defended by a strong guard.

GATES OF TOWNS.—As the gates of towns served the ancients as places of security (**FORTIFICATIONS**), a durable material was required for them, and accordingly we find mentioned—1. *Gates of iron and brass* (Ps. cvii. 16; Isa. xlv. 2; Acts xii. 10). It is probable that gates thus described were, in fact, only sheeted with

plates of copper or iron; and it is probably in this sense we are to interpret the hundred brazen gates ascribed to the ancient Babylon. Thevenot describes the six gates of Jerusalem as covered with iron, which is probably still the case with the four gates now open. Other iron-covered gates are mentioned by travellers, such as some of the town gates of Algiers, and of the towers of the so-called iron-bridge at Antioch. The principal gates of the great mosque at Damascus are covered with brass. Gates of iron are also mentioned by Hesiod and by Ovid.

190. [Egyptian Camp-gate.]

2. *Gates of stone and of pearls* are mentioned in Isa. liv. 12, and Rev. xxi. 21, which, it has justly been supposed, refer to such doors, cut out of a single slab, as are occasionally discovered in ancient countries. At Essouan (Syene), in Upper Egypt, there is a granite gateway bearing the name of Alexander, the son of Alexander the Great (Wilkinson, iii. 403). The doors leading to the several chambers of the so-called 'Tombs of the Kings' near Jerusalem, were each formed of a single stone seven inches thick, sculptured so as to resemble four panels: the styles, muntins, and other parts were cut with great art, and exactly resembled those of a door made by a carpenter at the present day, the whole being completely smooth and polished, and most accurate in their proportions. The doors turned on pivots, of the same stone of which the rest of them were composed, which were inserted in corresponding sockets above and below, the lower tenon being of course short. This is one of the modes in which heavy doors of wood are now hung in the East. One of these doors was still hanging in Maundrell's time, and 'did not touch its lintel by at least three inches.' But all these doors are now thrown down and broken. Similar doors are described by Dr. Clarke in the remarkable excavated sepulchres at Telmessus, on the southern coast of Asia Minor; and others were noticed by Irby and Mangles in the sepulchres near Beisan (Bethshan). There are stone doors to the houses in the Haouran beyond the Jordan; and the present writer has repeatedly seen in the north of Persia the street-doors of superior houses composed of a single slab of a kind of slate.

3. *Gates of wood.* Of this kind were probably the gates of Gaza (Judg. xvi. 3). They had generally two valves, which, according to Faber's description, had sometimes smaller doors, or wickets, to afford a passage when the principal gate was closed, a fact which he applies to the illustration of Matt. vii. 13.

Gates were generally protected by some works against the surprises of enemies (Jer. xxxix. 4). Sometimes two gates were constructed, one be-

hind another, an outer and inner one; or there were turrets on both sides (2 Sam. xviii. 24, 33). The gates of the ancients were generally secured with strong heavy bolts and locks of brass or iron (Deut. iii. 5; 1 Sam. xxiii. 7; 1 Kings iv. 13; 2 Chron. viii. 5; Jer. xiv. 7; xlix. 31; Ps. cxlvii. 13). This was probably done with a view to the safety of the town, and to prevent hostile inroads. The keys of gates, as well as of doors, were generally of wood; and Thevenot observes that gates might be opened even with the finger put into the key-hole, from which Harmer elucidates the passage in the Song of Solomon, v. 4.

The gates of towns were kept open or shut according to circumstances: in time of war they were closed against the inroads of the enemy (Josh. ii. 5), but they were opened when the enemy had been conquered. On festive occasions they were also thrown wide open, to which Ps. xxiv. 7 alludes. This opening of the gates, as well as closing them, was done by means of keys. That near the gates towers were often constructed, serving for defence against attacks of the enemy, may be inferred from Deut. iii. 5; 2 Sam. xviii. 24; Judg. ix. 35, comp. with 52. Enemies, therefore, in besieging towns were most anxious to obtain possession of the gates as quickly as possible (Deut. xxviii. 52; Judg. ix. 40; 2 Sam. x. 8; xi. 23; 1 Kings viii. 37; Job v. 4; Isa. xxii. 7; xxviii. 6); and generally the town was

191. [Gate of Konieh.]

conquered when its gates were occupied by the invading troops (Deut. xxviii. 57; Judg. v. 8). In or near the gates, therefore, they placed watchmen, and a sufficiently strong guard, to keep an eye on the movements of the enemy, and to defend the works in case of need (Judg. xviii. 16; 2 Kings vii. 3; Neh. xiii. 22).

We read that some portions of the law were to be written on the gates of towns, as well as on the doors of houses (Deut. vi. 9; xi. 20); and if this is to be literally understood, it receives illustration from the practice of the Moslems in painting passages of the Koran on their public and private

gates. Various artificial figures and inscriptions were engraved on their gates by the Romans.

Criminals were punished without the gates (1 Kings xxi. 13; Acts vii. 59), which explains the passage in Heb. xiii. 12. The same custom existed among the Romans. As to the gate through which Christ was led, before his crucifixion, opinions differ; some taking it to have been the dung-gate; others understand it of the gate of judgment. But for all that concerns the gates of Jerusalem, we must refer to the article JERUSALEM.

Gates are often mentioned in Scripture as places at which were holden courts of justice, to administer the law and determine points in dispute: hence *judges in the gate* are spoken of (Gen. xix. 1; xxiii. 10, 18; xxxiv. 20; Dent. xvi. 18; xvii. 8; xxi. 19; xxv. 6, 7; Josh. xx. 4; Ruth iv. 1; 1 Sam. iv. 18; 2 Sam. xviii. 24; xix. 8; 1 Kings xxii. 10; Job xxix. 7; Prov. xxii. 22; xxiv. 7; Lament. v. 14; Amos v. 12; Zech. viii. 16). The reason of this custom is apparent; for the gates being places of great concourse and resort, the courts held at them were of easy access to all the people; witnesses and auditors to all transactions were easily secured (a matter of much importance in the absence or scanty use of written documents); and confidence in the integrity of the magistrate was ensured by the publicity of the proceedings. There was within the gate a particular place, where the judges sat on chairs, and this custom must be understood as referred to when we read that courts were held *under the gates*, as may be proved from 1 Kings xxii. 10; 2 Chron. xxi. 9. Apart from the holding of courts of justice, the gate served for reading the law, and for proclaiming ordinances, &c. (2 Chron. xxxii. 6; Neh. viii. 1, 3). We see from Prov. xxxi. 23; Lam. v. 14, that the inferior magistrates held a court in the gates, as well as the superior judges (Jer. xxxvi. 10); and even kings, at least occasionally, did the same (1 Kings xxii. 10, comp. with Ps. cxxvii. 5). The gates at Jerusalem served the same purpose; but for the great number of its inhabitants, many places of justice were required. Thus we find that Nehemiah (iii. 32) calls a particular gate of this city the counsel-gate, or justice-gate; which seems to have had a preference, though not exclusive, since courts must have been holden in the other gates also. The same custom prevails to the present day among other Oriental nations, as in the kingdom of Morocco, where courts of justice were holden in the gate of the capital town. Respecting the Abyssinians and inhabitants of Hindostan, we are likewise assured that they employed their gates for courts of justice. Homer states of the Trojans that their elders assembled in the gates of the town to determine causes, and Virgil says the same. From Juvenal it appears that with the Romans the Porta Capena was used for this purpose.

In Palestine gates were, moreover, the places where, sometimes at least, the priests delivered their sacred addresses and discourses to the people; and we find that the prophets often proclaimed their warnings and prophecies in the gates (Prov. i. 21; viii. 3; Isa. xxix. 21 Jer. xvii. 19, 20; xxvi. 10; xxxvi. 10).

Among the heathen gates were connected with sacrifices, which were offered in their immediate vicinity; in which respect the hills near the gates

are mentioned (2 Kings xxiii. 8). In Acts xiv. 13, the gates of Lystra are referred to, near which sacrifice was offered.

The gate was, further, a public place of meeting and conversation, where the people assembled in large numbers to learn the news of the day, and by various talk to while away the too tedious hours (Ps. lxxix. 12). It was probably with this view that Lot sat under the gate of Sodom (Gen. xix. 1); which is more probable than the Jewish notion that he sat there as one of the judges of the city.

Under the gates they used to sell various merchandises, provisions, victuals, *e. g.* at Samaria (2 Kings vii. 1); and for this purpose there were generally recesses in the space under them. The same is stated by Aristophanes of the gates of the Greeks. But with respect to the markets at gates, the present writer would note what has often occurred to his own notice in different parts of the East, which is, that the commodities sold at the gates are almost exclusively country produce, animal or vegetable, for the supply of the city, and not manufactured goods, which are invariably sold in the bazaars in the heart of the town. The gate-markets also are only held for a few hours early in the morning.

On an uproar having broken out at Jerusalem, the heads of the people met under the New-gate (Jer. xxix. 26), where they were sure to find insurgents. The town-gates were to the ancient Orientals what the coffee-houses, exchanges, markets, and courts of law, are in our large towns: and such is still the case in a great degree, although the introduction of coffee-houses has in this, and other respects, caused some alteration of Eastern manners.

192.

Gates are put figuratively for public places of towns and palaces. The gates of a town are also put instead of the town itself (Gen. xii. 17; xxiv. 60; Deut. xii. 12; Ps. lxxxvii. 2).

The *gates of death*, and of *hell*, occur in Job xxxviii. 17; Ps. ix. 14; Micah ii. 13. Doors and gates of hell are chiefly introduced, Prov. v. 5; Isa. xxxviii. 10; Matt. xvi. 19; and the Jews go

so far in their writings as to ascribe real gates to hell. The origin of this metaphorical expression is not difficult to explain; for it was very common to use the word gates as an image of large empires (Ps. xxiv. 7); and in pagan authors the abode of departed souls is represented as the residence of Pluto. In the passage, then, Matt. xvi. 19, by 'gates of hell' must be understood all aggressions by the infernal empire upon the Christian church.

Among the ancient Egyptians, doors were frequently stained so as to imitate foreign wood. They were either of one or two valves, turning on pins of metal, and were secured within by bars and bolts. Some of the bronze pins have been discovered in the tombs of Thebes, and two of them, after Wilkinson, are figured in No. 192, figs. 2, 3. They were fastened to the wood with nails of the same metal. The stone lintels and floor behind the threshold of the tombs and temples still exhibit the holes in which the pins turned, as well as those of the bolts and bars, and the recess for receiving the opening valves. The folding-doors had bolts in the centre, sometimes above as well as below; a bar was placed across from one wall to the other; and in many cases they were secured by wooden locks passing over the centre (No. 193, fig. 4) at the junction of the

East, was nothing more than a peculiarly constructed open bolt of wood, which the wooden or metal key was adapted to raise and thrust back. The forms of the Egyptian doors may be seen from the cuts. Fig. 1, No. 192, is from a curious ancient model in the British Museum, of a small ancient Egyptian house, and may serve to show very clearly how the doors of small houses were formed, hung, and secured. The elegant cornice of the door, fig. 2, No. 193, will not escape observation; fig. 1 is a remarkable instance of a folding-door.

192.

two folds. For greater security they were also occasionally sealed with a mass of clay. This was also a custom of the ancient Egyptians, as appears from Herodotus (ii. 121); from tombs actually so closed at Thebes; and from the sculptures, as in No. 193, fig. 3, where the door is thus closed and sealed. To this custom there is an allusion in Job [CLAY]. At a later period, when iron came into general use, keys were made of that metal, of the shape shown in No. 192, fig. 4. Of the kind thus indicated were probably the lock and key which fastened the summer-parlour of King Eglon (Judg. iii. 23, 25). In this case Ehud locked the door and took away the key; but when the servants became alarmed, they easily opened it with another key; which suggests that the lock, as in ancient Egypt or the modern

194.

A comparison of the ancient Egyptian doors with those now used in the East will probably suggest no incorrect notion of the provision among the ancient Hebrews in this respect. A sort of intermediate idea arising from this comparison will be found to furnish very satisfactory illustrations of most of the passages of Scripture which relate to the subject. No. 194 is a very usual form of the street-door of a private house. The inscription on the central compartment is usually painted in white or black. It means, 'He (i. e. God) is the Creator, the Everlasting,' and brings strongly to mind the Hebrew custom to which we have more than once alluded. Doors are generally unpainted throughout Western Asia and in Egypt. The other doors shown in the cuts belong to the internal front of the houses, and not to the external frontage or screen. Fig. 2, No. 193, has an open lattice over the door, and the elegant proportion of the whole entrance claims attention. No. 195 shows different forms of

195.

common doors, and the whole piece affords an interesting illustration of the basement of an Eastern house, with the stone steps leading to the gallery, into which all the state rooms and family rooms open.

In the interior of houses it is not unusual to see curtains instead of doors, especially in summer. This helps to keep the apartment cool, and also

enables servants to enter without noise. This custom originated in the use of tents. Accordingly we find that all the entrances of the tabernacle had curtains, although the framework was of wood (Exod. xxvi. 31-33, 36, 37); and even in the temple a curtain or 'vail' formed the separation between the Holy and the Most Holy place.

GATH, one of the five princely cities of the Philistines, of which mention is made in Josh. xiii. 3. It was one of the cities upon which the ark is said to have brought calamity (1 Sam. v. 8, 9), and which offered in connection therewith a trespass-offering, each one a golden emerod (1 Sam. vi. 17). Goliath, of the family of giants which Joshua spared (Josh. xi. 22), of which other members may be found mentioned in Scripture (1 Chron. xxi. 5-8; 2 Sam. xxi. 19-22), has rendered Gath a word familiar from our childhood; but it is not certain whether Goliath was a native or merely a resident of Gath (1 Sam. xvii. 4). To Achish, king of Gath, David fled for fear of Saul (1 Sam. xxi. 10; xxvii. 2-7; Ps. lvi.). At his own entreaty David received from Achish the city of Ziklag. David dwelt in the country of the Philistines 'a full year and four months.' It was conquered by David, and fortified both by him and by Rehoboam (2 Sam. viii. 1; 1 Chron. xviii. 1; 2 Chron. xi. 8). From 2 Sam. xv. 18, it appears that David had a band (600 men) of Gittites in his service at the time of the rebellion of Absalom. Their devotedness to him under Ittai their leader forms a beautiful episode in the history of David's varied fortune (2 Sam. xv. 19, sq.). Shimei's visit to Gath and its fatal consequences to himself may be read in 1 Kings ii. 39-46. In the reign of Solomon mention is made of a king of Gath (1 Kings iv. 24), who was doubtless a tributary prince, but powerful enough to cause apprehension to Solomon, as appears from the punishment he inflicted on Shimei. Under Jehoshaphat, Hazael, king of Syria, took Gath (2 Kings xii. 17); from his successor, Benhadad, the place was recovered (2 Kings xiii. 24). It must, however, have soon revolted; for Uzziah (2 Chron. xxvi. 6), finding it necessary to war against the Philistines, 'broke down the wall of Gath.' Probably the conquest was not of long duration. This constant withstanding of the power of Jerusalem shows that Gath was a place of great resources and high eminence—a conclusion which is confirmed by the language employed by the prophets (Amos vi. 2; Micah i. 10). 'Gath,' says Jerome, (on Micah i.), 'is one of the five Philistine cities lying near the confines of Judah, on the road from Eleutheropolis to Gaza; now it is a very large village.' On Jerem. xxv. the same authority declares that Gath was not far from Azotus. Modern travellers give no description of the place.

There was a Gath-hepher belonging to the children of Zebulun (Josh. xix. 10, sq.), the birth-place of the prophet Jonah (2 Kings xiv. 25), lying not far from Sepphoris on the road to Tiberias. Another Gath (Gath-rimmon, Josh. xix. 45) lay in the territory of Dan. It was a Levite city (Josh. xxi. 24; 1 Chron. vi. 69). In the time of Eusebius it was a very large village, 'twelve miles from Diospolis, as you go hence to Eleutheropolis.'

GAULONTIS. [GOLAN.]

GAZA lies on the road leading from Akabah

to Hebron, which passes along nearly the whole length of the great Wady-el-Arabah. It is on the sea-coast, in lat. 31° 29', long. 34° 29' in the country of the Philistines (Josh. xv. 47). It is a very ancient place, as we find it mentioned in Gen. x. 19, where it is given as one of the border-cities of the Canaanites. In Dent. ii. 23, it is found as the place unto which the Avim dwelt. Joshua

196.

smote the Canaanites as far as Gaza (Josh. x. 41), but spared the Anakim (giants) that dwelt there (Josh. xi. 21, 22). In the division of the land, Gaza fell to the lot of Judah (Josh. xv. 47), and was taken by him with the coast thereof (Judg. i. 18), but its inhabitants were not exterminated (Judg. iii. 3). Gaza was one of the five Philistine cities which gave each a golden emerod as a trespass-offering to the Lord (1 Sam. vi. 17). Solomon's kingdom extended as far as Gaza (1 Kings iv. 24). But the place appears always as a Philistine city in Scripture (Judg. iii. 3; xvi. 1; 1 Sam. vi. 17; 2 Kings xviii. 8). Hezekiah smote the Philistines as far as Gaza (2 Kings xviii. 8). Gaza fell into the hands of the Egyptians, probably Pharaoh-Necho (Jer. xlvii. 1; comp. Herod. ii. 159). The prophets speak in severe terms against it (Jer. xxv. 20; xlvii. 5; Amos i. 6, 7; Zeph. ii. 4; Zech. ix. 5). After the destruction of Tyre it sustained a siege of two months against Alexander the Great. Jonathan Maccabæus destroyed its suburbs; Simon Maccabæus took the city itself, though not without extraordinary efforts. Alexander Jannæus spent a year in besieging it and punishing its inhabitants. The place was rebuilt by Gabinus. It was among the cities given by Augustus to Herod, after whose death it was united to the province of Syria.

Gaza is celebrated for the exploit recorded of Samser (Judg. xvi. 1-3), who 'took the doors of the gate of the city, and the two posts, and went away with them, bar and all, and put them on his shoulders, and carried them up to the top of a hill that is before Hebron.' The Philistines afterwards took Samson, and put out his eyes, and brought him to Gaza, and bound him with fetters of brass, and he did grind in the prison-house: he, however, pulled down the temple of Dagon, god of the Philistines, and slew, together with himself, 'all the lords of the Philistines,' besides men and women (Judg. xvi. 21-30). It was near Gaza—

on the road from Jerusalem to that place—that Philip baptized the eunuch 'of great authority under Candace, queen of the Ethiopians' (Acts viii. 26, sq.).

Gaza lay some distance from the sea, though it had a port on the sea, called 'Gaza on the sea,' called also Majama, which Constantine called Constantia, from the name of his son, giving it, at the same time, municipal rights. Julian took away this name and ordered it to be called the port of Gaza. Subsequent emperors restored the name and the privileges of the place. It was afterwards called the sea-coast of Gaza.

GE'BA. It is often stated that Geba and Gibeah were names of the same place. The two names are indeed only masculine and feminine forms of the same word, signifying 'hill'; but that they were two different places is evident from Josh. xviii. 24; comp. 28; 1 Sam. xiii. 2, comp. 3; Isa. x. 29. Geba belonged to the tribe of Benjamin (Josh. xviii. 24), and was assigned to the priests (Josh. xxi. 17; 1 Chron. vii. 40). The Philistines were smitten from Geba unto Gazer by David (2 Sam. v. 25); Asa rebuilt Geba and Mizpeh with the stones of Ramah (1 Kings xv. 22; 2 Chron. xvi. 6). 'From Geba (in the north) to Beersheba' (in the south) (2 Kings xxiii. 8), expressed the whole extent of the separate kingdom of Judah, just as 'from Dan to Beersheba' expressed the whole length of Palestine. It would seem, from the manner in which Geba (Gaba) and Ramah are coupled in Neh. vii. 30, that they were very near each other; but the site of Geba is now unknown.

1. GE'BAL, a district, or perhaps sovereignty, south of Judaea, in the land of Edom. Gebal signifies a mountain, and apparently belongs not to the most ancient times, as it does not occur when the Israelites were actually in this quarter, but is first found in Ps. lxxxiii. 8, which was probably written in the time of Jehoshaphat. The country south of the Dead Sea, and on the east of the Ghor, or great valley, bears the same name (Jebal or Djebal) at the present day, and is doubtless the same as the Gebal of Scripture. We may therefore take Gebal as the name of the northernmost portion of Idumea, which was nearest to Palestine.

2. GEBAL. [GIBLITES.]

GEDALIAH (*God-greatened*); son of Ahikam, and appointed by Nebuchadnezzar governor of Judaea after the destruction of Jerusalem. He was probably of the number of those who quitted the city at the instance of the prophet, justly despairing of the successful defence of a place which God had abandoned. Gedaliah had inherited his father's respect for Jeremiah (Jer. xl. 5, sq.), and was moreover enjoined by Nebuzaradan to look to his safety and welfare. Gedaliah was in every way worthy of the difficult post he had to fill; and he adopted as the principle of his conduct that submission to existing circumstances which was requisite in one who believed that Judah had, according to the declared will of God, been justly doomed and punished for her iniquities, and who yet believed that His loving kindness had not utterly departed from her. He established the seat of his melancholy government at Mizpeh in the tribe of Benjamin: and there the Jews, who had fled at the advance of the Chaldean armies, or when the troops of Zedekiah were dispersed in the plains of Jericho, quitting their retreats, began to gather

around him. Gedaliah wisely counselled them to submission and quietness; and he promised on that condition to ensure them the undisturbed enjoyment of their possessions, and of the produce of the ground. In this hope the labours of the field were resumed, and the extraordinary returns of that season secured as if specially given to repair the recent injuries of war. But this calm was of short duration. Among those who returned was a member of the royal family, named Ishmael, who had taken refuge with Baalis, king of the Ammonites. He appears to have been irritated at seeing one who was not of the house of David seated upon even the shadow of David's throne; and some of the friends of Gedaliah believed him to be in a plot with Baalis to take away his life. But the noble-minded governor refused to entertain such a suspicion, and rejected with horror the proposal of an over-zealous friend, who offered to assassinate Ishmael. The suspicion which he thus generously repelled was, however, correct. He was murdered in the midst of a repast by this very Ishmael, whom he had received as a friend.

This event happened about two months after the destruction of Jerusalem, and by it the present ruin of Judaea seemed to be consummated, n.c. 588 (2 Kings xxv. 22-26; Jer. xxxix. 14; xl. 5; xli. 18).

GE'DER. This word signifies *a wall, enclosure, or fortified place*, and must be understood in this sense in the ensuing names. Geder itself was the name of an ancient town of the Canaanites, in the plain country of Judah (Josh. xii. 13), and was perhaps the same as Gederah.

GEDERAH, a city in the plain of Judah (Josh. xv. 36), probably the same with the preceding Geder, and with Bethgader of 1 Chron. ii. 51. It seems to have belonged to the family of Caleb.

GEDE'ROTH, a city in the plain country of Judah (Josh. xv. 41), and one of those which the Philistines took from king Ahaz (2 Chron. xxviii. 18).

GE'DOR, an ancient city in the mountains of Judah (Josh. xv. 58), some of whose inhabitants joined David at Ziklag (1 Chron. xii. 7). It is doubtful whether this be the same Gedor in whose fertile valley the Simeonites found good pasture for their flocks (1 Chron. iv. 39). Dr. Robinson, travelling from Jerusalem to Gaza, came in sight of a place called Jedur, with ruins, on the brow of a mountain ridge, which he identifies with Gedor.

GEHAZI (*vision valley*), a servant of Elisha, whose entire confidence he enjoyed. His history is involved in that of his master [ELISHA]. He personally appears in reminding his master of the best mode of rewarding the kindness of the Shunamite (2 Kings iv. 14). He was present at the interview in which the Shunamite made known to the prophet that her son was dead, and was sent forward to lay Elisha's staff on the child's face, which he did without effect (2 Kings iv. 31). The most remarkable incident in his career is that which caused his ruin. When Elisha, with a noble disinterestedness, declined the rich gifts pressed upon him by the illustrious leper whom he had healed, Gehazi felt distressed that so favourable an opportunity of profiting by the gratitude of Naaman had been so wilfully thrown away. He therefore ran after the retiring chariot, and requested, in his master's name, a portion of the gifts which had before been refused, on the ground that visitors had just arrived for whom

he was unable to provide. He asked a talent of silver and two dresses; and the grateful Syrian made him take two talents instead of one. Having deposited this spoil in a place of safety, he again appeared before Elisha, whose honour he had so seriously compromised. His master asked him where he had been? and on his answering, 'Thy servant went no whither,' the prophet put on the severities of a judge, and having denounced his crime, passed upon him the terrible doom, that the leprosy of which Naaman had been cured, should cleave to him and his for ever. 'And he went forth from his presence a leper as white as snow' (2 Kings v. 20-27). *n.c.* 894.

We afterwards find Gehazi recounting to king Joram the great deeds of Elisha, and, in the providence of God, it so happened that when he was relating the restoration to life of the Shunammite's son, the very woman with her son appeared before the king to claim her house and lauds, which had been usurped while she had been absent abroad during the recent famine. Struck by the coincidence, the king immediately granted her application (2 Kings viii. 1-6).

GEMARIAH (*God-perfected*), the son of Shaphan, and a scribe of the temple in the time of Jehoiakim. Baruch read aloud the prophecies of Jeremiah to the people at the official chamber of Gemariah, which was attached to the new gate of the temple built by king Jotham (Jer. xxxvi. 10; comp. 2 Kings xv. 35). Gemariah's son Michaiah having reported this to his father, Baruch was invited to repeat the reading at the scribes' chamber in the palace, before Gemariah and other scribes and councillors, who gave an account of the matter to the king (Jer. xxxvi. 10-26). *n.c.* 607.

2. GEMARIAH, son of Hilkiah, who, with Elasah, son of Shaphan, was sent to Babylon by king Zedekiah with his tribute-money for Nebuchadnezzar. He also took charge of a letter from Jeremiah to the Jewish captives at Babylon, warning them against the false prophets who deluded them by promises of a speedy return to their own land (Jer. xxix. 3, 4). *n.c.* 599.

GEMS. [STONES, PRECIOUS.]

GENEALOGY signifies a list of ancestors set down both in their direct and collateral order.

We read of no nation which was more careful to frame and preserve its genealogical tables than Israel. Their sacred writings contain genealogies which extend through a period of more than 3500 years, from the creation of Adam to the captivity of Judah. Indeed, we find from the books of Ezra and Nehemiah that the same carefulness in this

matter was observed *after* the captivity; for in Ezra ii. 62 it is expressly stated that some who had come up from Babylon had sought their register among those that were reckoned by genealogy, but were not found; therefore were they, as polluted, removed from the priesthood. The division of the whole Hebrew nation into tribes, and the allotment to each tribe of a specified portion of the land of Canaan as an inalienable possession, rendered it indispensable that they should keep genealogical tables. God had, however, a still higher object than that of giving stability to property in Israel, in leading successive generations of His people thus to keep an accurate list of their ancestry. That they should do this was especially required from the moment that the voice of prophecy declared that the promised Messiah should be of the seed of Abraham, of the posterity of Isaac, of the sons of Jacob, of the tribe of Judah, and of the family of David.

The Rabbins affirm that after the Captivity the Jews were most careful in keeping their pedigrees (*Babyl. Gemar. Gloss.* fol. xiv. 2). Josephus (*De Vita sua*, p. 998, D) states that he traced his own descent from the tribe of Levi by public registers. And he informs us that, however dispersed and depressed his nation were, they never neglected to have exact genealogical tables prepared from the authentic documents which were kept at Jerusalem; and that in all their sufferings they were particularly careful to preserve those tables, and to have them renewed from time to time. Since, however, the period of their destruction as a nation by the Romans, all their tables of descent seem to be lost, and now they are utterly unable to trace the pedigree of any one Israelite who might lay claim to be their promised, and still expected, Messiah. Hence Christians assert, with a force that no reasonable and candid Jew can resist, that *Shiloh must have come*.

We find traces of the existence of the public tables of descent, to which Josephus refers, in the New Testament: the taxation spoken of by St. Luke (ii. 2, 3) would clearly indicate this; for how could each one be able to go to his own city, unless he knew the specific tribe to which he belonged? Hence it was, we think, that St. Paul was able with confidence to appeal to the Hebrews concerning the lineage of Christ; 'for it is evident,' says he, 'that our Lord sprung out of Judah' (Heb. vii. 14; 2 Tim. ii. 8). To evince this beyond reasonable doubt, it pleased God to give us by his inspired servants, St. Matthew and St. Luke, the following genealogies:—

MATTHEW i. 2.

1 Abraham	1 Solomon	1 Jechonias, i. e. Jehoiachin.
2 Isaac	2 Roboam	2 Salathiel.
3 Jacob	3 Abia	3 Zorobabel.
4 Judas	4 Asa	4 Abiud.
5 Phares	5 Josaphat	5 Eliakim.
6 Esrom	6 Joram	6 Azor.
7 Aram	7 Ozias	7 Sadoc.
8 Aminadab	8 Joatham	8 Achim.
9 Naasson	9 Achaz	9 Eliud.
10 Salmon	10 Ezekias	10 Eleazar.
11 Booz	11 Manasses	11 Matthan.
12 Obed	12 Amon	12 Jacob.
13 Jesse	13 Josias	13 Joseph.
14 David	14 Jechonias, i. e. Jehoiachin or Eliakim	14 Jesus.

Go.

LUKE iii. 23.

1 Adam	1 Thara	1 Eliakim	1 Joanna.
2 Seth	2 Abraham	2 Jonan	2 Juda.
3 Enos	3 Isaac	3 Joseph	3 Joseph.
4 Cainan	4 Jacob	4 Juda	4 Semel.
5 Maleleel	5 Juda	5 Simeon	5 Mattathias.
6 Jared	6 Phares	6 Levi	6 Maath.
7 Enoch	7 Esrom	7 Matthat	7 Nagge.
8 Mathusala	8 Aram	8 Jorim	8 Esli.
9 Lamech	9 Aminadab	9 Eliezer	9 Naum.
10 Noe	10 Naasson	10 Jose	10 Amos.
11 Sem	11 Salmon	11 Er	11 Mattathias.
12 Arphaxad	12 Booz	12 Elmodan	12 Joseph.
13 Cainan	13 Obed	13 Cosam	13 Janna.
14 Sala	14 Jesse	14 Addi	14 Melchi.
15 Heber	15 David	15 Melchi	15 Levi.
16 Phalec	16 Nathan	16 Neri	16 Matthat.
17 Ragau	17 Mattatha	17 Salathiel	17 Heli.
18 Sarach	18 Menan	18 Zorobabel	18 Joseph.
19 Nachor	19 Melca	19 Rhesa	19 Jesus.

We do not find that there was any objection made to these genealogies, either by Jew or Gentile, during the first century. Had any difficulty on this head existed, we may reasonably suppose that the Jews, of all others, would have been but too ready to detect and expose it. We may therefore fairly conclude that, whatever difficulty meets us now in harmonizing our Lord's pedigree as given by the two Evangelists, it could have had no place in the first age of the Christian church. In subsequent ages, however, objections were and still are made to the genealogies of Matthew and Luke.

The chief ground of objection is the alleged inconsistency of the Evangelists with each other. The first solution of their apparent discrepancies is that of Africanus, which, he informs us, he received from the relatives of our Lord. It is to the effect that Matthan, the third in the list from Joseph, in Matthew's genealogy, and Melchi, the third in Luke's list, married successively the same woman, by whom the former begat Jacob, and the latter Heli. Heli dying without issue, his maternal brother took his widow to wife, by whom he had Joseph, who, according to law (Deut. xxv. 6), was registered by Luke as the son of Heli, though naturally the son of Jacob, as Matthew records him. This is the explanation which was generally admitted by Eusebius, Nazianzen, and others, for ages.

Grotius, however, availing himself of the tradition that Heli and Jacob were both sons of the same mother, but of different fathers (Matthan and Melchi), supposes that Luke traces the natural pedigree of Christ, and Matthew the legal. This he argues on two grounds. First, that Salathiel could not have been the natural son of Jechonias, who was *childless*—according to the declaration of God by Jeremiah (xxii.)—and was, therefore, as Luke states, the son, properly so called, of Neri, of Nathan's line; and, secondly, that the *Levirate* law imposed no necessity on Jacob to marry Heli's widow, they being only *uterine* brothers. But both the reasons assigned by Grotius for differing from the solution of Africanus would seem to be founded on a *petitio principii*. It does not appear an ascertained fact that Salathiel was not the natural son of Jechonias, nor yet that the law which obliged a man to marry the widow of his deceased brother might be departed from when they were only *maternal* brethren; for

even in cases of distant relationship the law seemed obligatory, as we see in the case of Boaz marrying Ruth, the widow of his distant kinsman.

Dr. Barrett objects to the above theory as given by Africanus and altered by Grotius, on the ground principally, that it refers entirely to the descent of Joseph from David, without attempting to prove that the son of Mary was the son of David. Dr. Barrett then states his own hypothesis, viz., that Matthew relates the genealogy of Joseph, and Luke that of Mary. He supposes a sufficient reason, that after Matthew had given his genealogical table another should be added by St. Luke, fully to prove that Christ, according to the flesh, derived his descent from David, not only by his supposed father Joseph, but also by his real mother Mary.

In constructing their genealogical tables, it is well known that the Jews reckoned wholly by males, rejecting, where the blood of the grandfather passed to the grandson through a daughter, the name of the daughter herself, and counting that daughter's husband for the son of the maternal grandfather (Num. xxvi. 33; xxvii. 4-7). On this principle Joseph, begotten by Jacob, marries Mary, the daughter of Heli; and in the genealogical register of his wife's family, is counted for Heli's son. Salathiel, begotten by Jechonias, marries the daughter of Neri, and, in like manner, is accounted his son: in Zorobabel, the offspring of Salathiel and Neri's daughter, the lines of Solomon and Nathan coalesce; Joseph and Mary are of the same tribe and family; they are both descendants of David in the line of Solomon; they have in them both the blood of Nathan, David's son. Joseph deduces his descent from Abiud (Matt. i. 13), Mary from Rhesa (Luke iii. 27), sons of Zorobabel. The genealogies of Matthew and Luke are parts of one perfect whole, and each of them is essential to the explanation of the other. By Matthew's table we prove the descent of Mary, as well as Joseph, from Solomon; by Luke's we see the descent of Joseph, as well as Mary, from Nathan.

GENERATION. Considerable obscurity attends the use of this word in the English Version, which arises from the translators having merged the various meanings of the same original word, and even of several different words, in one common term 'generation.' The following instances

seem to require the original words to be understood in some or other of their derivative senses—Gen. ii. 4, 'These are the generations,' rather 'origin,' 'history,' &c. The same Greek words, Matt. i. 1, are rendered 'genealogy,' &c., by recent translators: Campbell has 'lineage.' Gen. v. 1, 'The book of the generations' is properly a *family register*, a history of Adam. The same words, Gen. xxxvii. 2, mean a history of Jacob and his descendants; so also Gen. vi. 9, x. 1, and elsewhere. Gen. vii. 1, 'In this generation' is evidently 'in this age.' Gen. xv. 6, 'In the fourth generation' is an instance of the word in the sense of a *certain assigned period*. Ps. xlix. 19, 'The generation of his fathers' Gesenius renders 'the dwelling of his fathers,' i. e. the grave, and adduces Isa. xxxviii. 12. Ps. lxxiii. 15, 'The generation of thy children' is 'class,' 'order,' 'description,' as in Prov. xxx. 11, 12, 13, 14. Isa. liiii. 8, 'Who shall declare his generation?' Lowth renders 'manner of life.' Michaelis renders it 'Where was the providence that cared for his life?' Gesenius and Rosenmüller, 'Who of his contemporaries reflected?' Seiler, 'Who can describe his length of life?' In the New Testament, Matt. i. 17, it is a series of persons, a succession from the same stock. Matt. iii. 7, is well rendered by Doddridge and others 'brood of vipers.' Matt. xxiv. 34, means the generation or persons then living *contemporary with Christ*. Luke xvi. 8, 'in their generations,' &c., wiser in regard to their dealings with the men of their generation. 1 Pet. ii. 8, is 'a chosen people.' The ancient Greeks, and, if we may credit Herodotus and Diodorus Siculus, the Egyptians also, assigned a *certain period* to a generation. The Greeks reckoned three generations for every hundred years, i. e. 33½ years to each. This is nearly the present computation. The ancient Hebrews also reckoned by the generation, and assigned different spaces of time to it at different periods of their history. In the time of Abraham it was one hundred years (comp. Gen. xv. 16, 'in the fourth generation they shall come hither'). This is explained in verse 13, and in Exod. xii. 40, to be four hundred years. Caleb was *fourth* in descent from Judah, and Moses and Aaron were *fourth* from Levi. In Dent. i. 35, ii. 14, Moses uses the term for thirty-eight years. In later times it clearly means ten years. In Matt. i. 17, it means a single descent from father to son [GENEALOGY].

GENESIS, the first book of the Pentateuch. This venerable monument, with which the sacred literature of the Hebrews commences, and which forms its real basis, is divided into two main parts; one universal, and one special. The most ancient history of the whole human race is contained in chapters i.-xi., and the history of Israel's ancestors, the patriarchs, in chapters xii.-l. These two parts are, however, so intimately connected with each other, that it would be erroneous to ascribe to the first merely the aim of furnishing a universal history. The chief aim which pervades the whole is to show how the theocratic institution subsequently founded by Moses was rendered possible and necessary. The book, therefore, takes its starting-point from the original unity of the human race, and their original relation to God, and proceeds thence to the interruption of that relation by the appearance of sin,

which gradually and progressively wrought an external and internal division in the human race for want of the principles of divine life which originally dwelt in man in general, but which had subsequently been preserved only among a small and separate race—a race which in progress of time became more and more isolated from all the other tribes of the earth, and enjoyed for a series of generations the special care, blessing, and guidance of the Lord. The mosaical theocracy appears, therefore, by the general tenor of Genesis, partly as a restoration of the original relation to God, of the communion of man with God, and partly as an institution which had been preparing by God himself through a long series of manifestations of his power, justice, and love. Genesis thus furnishes us with the primary view and notion of the whole of the theocracy, and may therefore be considered as the historical foundation without which the subsequent history of the covenant people would be incomplete and unintelligible.

The *unity and composition* of the work, which is a point in dispute among the critics in regard to all the books of the Pentateuch, have been particularly questioned in the case of Genesis. Some suppose that Genesis is founded on two principal original documents, distinguished by the terms *Elohim* and *Jehovah*, the names which they respectively give to God. That of *Elohim* is closely connected in its parts, and forms a whole, while that of *Jehovah* is a mere complementary document, supplying details at those points where the former is abrupt and deficient, &c. These two documents are said to have been subsequently combined by the hand of an editor, so able as often to render their separation difficult, if not altogether impossible. Others maintain that Genesis is a book closely connected in all its parts, and composed by only one author, while the use of the two different names of God is not owing to two different sources on which Genesis is founded, but solely to the different significations of these two names. The use of each of the two names, *Jehovah* and *Elohim*, is everywhere in Genesis adapted to the sense of the passages in which the writer has purposely inserted the one name or the other. This point of view is the more to be considered, as it is the peculiar object of the author to point out in Genesis the gradual and progressive development of the divine revelations. The opponents have in vain attempted to discover in Genesis a few contradictions indicative of different documents in it; their very admission, that a fixed plan and able compilation visibly pervade the whole of the book, is in itself a refutation of such supposed contradictions, since it is hardly to be conceived, that an editor or compiler who has shown so much skill and anxiety to give unity to the book should have cared so little about the removal of those contradictions. The whole of Genesis is pervaded by such a freedom in the selection and treatment of the existing traditions, such an absence of all trace of any previous source or documents which might in some measure have confined the writer within certain limits of views and expressions, as to render it quite impracticable to separate and fix upon them specifically, even if there were portions in Genesis drawn from earlier written documents.

That first question concerning the unity of the book is closely connected with another question, respecting its authenticity, or whether Moses was the author of Genesis. We confine ourselves here to only a few remarks on the authenticity of Genesis in particular, and refer the reader for further information to the article PENTATEUCH. Some critics have attempted to ascertain the period when Genesis was composed, from a few passages in it, which they say must be *anachronisms*, if Moses was really the author of the book. Among such passages are, in particular, Gen. xii. 6; xiii. 7; 'And the Canaanite was then in the land.' This remark, they say, could only have been made by a writer who lived in Palestine after the extirpation of the Canaanites. But the sense of the passage is not that the Canaanites had not as yet been extirpated, but merely that Abraham, on his arrival in Canaan, had already found there the Canaanites. This notice was necessary, since the author subsequently describes the intercourse between Abraham and the Canaanites, the lords of the country. According to the explanation given to the passage by the opponents, such an observation would be quite a superfluous triviality. Also the name *Hebron* (Gen. xiii. 18; xxiii. 2), they say, was not introduced till after the time of Moses (Josh. xiv. 15; xv. 13). This, however, does not prove anything, since *Hebron* was the original Hebrew name for the place, which was subsequently changed into *Arbus* (by a man of that name), but was restored by the Israelites on their entrance into Canaan. The opponents also maintain that the name of the place Dan (Gen. xiv. 14) was given only in the post-Mosaic period (Josh. xix. 47; Judg. xviii. 29). But the two last passages speak of quite a different place. There were two places called *Dan*; *Dan-Jaan* (2 Sam. xxiv. 6), and *Dan-Laish*, or *Lehem*. In Genesis, they further add, frequently occurs the name *Bethel* (xii. 8; xxviii. 19; xxxv. 15); while even in the time of Joshua the place was as yet called *Luz* (Josh. xviii. 13). But the name *Bethel* was not first given to the place by the Israelites in the time of Joshua, there being no occasion for it, since *Bethel* was the old patriarchal name, which the Israelites restored in the place of *Luz*, a name given by the Canaanites. Another passage in Genesis (xxxvi. 31), 'Before there reigned any king over the children of Israel,' is likewise supposed to have been written at a period when the Jews had already a king over them. But the broachers of these objections forget that this passage refers to those promises contained in the Pentateuch in general, and in Genesis in particular (comp. Gen. xxxv. 11), that there should hereafter be kings among the Israelites as an independent nation. In comparing Israel with Edom (Gen. xxxvi.), the sacred writer cannot refrain from observing that Edom, though left without divine promises of possessing kings, nevertheless possessed them, and obtained the glory of an independent kingdom, long before Israel could think of such an independence; and a little attention to the sense of the passage will show how admirably the observation suits a writer in the Mosaic period. The passage (Gen. xv. 18) where the land of Israel is described as extending from the river of Egypt (the Nile) to the great river (Euphrates), it is alleged, could only have

been penned during the splendid period of the Jews, the times of David and Solomon. *Literally* taken, however, the remark is inapplicable to any period, since the kingdom of the Jews at no period of their history extended so far. That promise, must, therefore, be taken in a rhetorical sense, describing the central point of the proper country as situated between the two rivers.

With regard to the historical character of the book, *Genesis* consists of two contrasting parts: the first part introduces us into the greatest problems of the human mind, such as the Creation and the fall of man; and the second, into the quiet solitude of a small defined circle of families. In the former, the most sublime and wonderful events are described with childlike simplicity; while, in the latter, on the contrary, the most simple and common occurrences are interwoven with the sublimest thoughts and reflections, rendering the small family circle a whole world in history, and the principal actors in it prototypes for a whole nation, and for all times. The contents in general are strictly religious. Not the least trace of mythology appears in it. It is true that the narrations are fraught with wonders. But primeval wonders, the marvellous deeds of God, are the very subject of Genesis. None of these wonders, however, bear a fantastical impress, and there is no useless prodigality of them. They are all penetrated and connected by one common leading idea, and are all related to the counsel of God for the salvation of man. This principle sheds its lustrous beams through the whole of Genesis; therefore the wonders therein related are as little to be ascribed to the invention and imagination of man as the whole plan of God for human salvation. The foundation of the divine theocratical institution throws a strong light upon the early patriarchal times; the reality of the one proves the reality of the other, as described in Genesis.

The separate accounts in Genesis also manifest great internal evidence of truth if we closely examine them. They bear on their front the most beautiful impress of truth. The *cosmogony* in Genesis stands unequalled among all others known in the ancient world. No mythology, no ancient philosophy, has ever come up to the idea of a *creation out of nothing*. All the ancient systems end in Pantheism, Materialism, emanation-theory, &c. But the Biblical *cosmogony* occupies a place of its own, and therefore must not be ranked among, or confounded with, any of the ancient systems of mythology or philosophy. The mythological and philosophical *cosmogonies* may have been derived from the Biblical, as being later depravations and misrepresentations of Biblical truth; but the contents of Genesis cannot, *vice versa*, have been derived from mythology or philosophy. The historical delineation also of the Creation and of the fall of man does not bear the least national interest or colouring, but is of a truly universal nature, while every mythus bears the stamp of the national features of the nation and country where it originated and found development. All myths are subject to continual development and variations, but among the Hebrews the accounts in Genesis stand firm and immutable for all times, without the least thing being added or altered in them for the purpose of further development.

even by the New Testament. What a solid guarantee must there be in this foundation of all subsequent revelations, since it has been admitted and maintained by all generations with such immovable firmness! The ancient heathen traditions coincide in many points with the Biblical accounts, and serve to illustrate and confirm them. This is especially the case in the ancient traditions concerning the Deluge (Gen. vi. 9), and in the list of nations in the tenth chapter; for instance (Gen. x. 4), Tarshish is called the son of Javan. This indicates that the ancient inhabitants of Tarshish or Tartessus in Spain were erroneously considered to be a Phœnician colony like those of other towns in its neighbourhood, and that they sprang from Javan, that is, Greece. That they were of Greek origin is clear from the account of Herodotus. Also (ver. 8), Nimrod, the ruler of Babel, is called the son of *Cush*, which is in remarkable unison with the mythological tales concerning *Bel* and his Egyptian descent. *Sidon* alone is mentioned (ver. 15), but not *Tyrus* (comp. xlix. 13), which arose only in the time of Josiua (Josh. xix. 29); and that *Sidon* was an older town than *Tyrus*, by which it was afterwards eclipsed, is certified by a number of ancient reports.

With the patriarchal history (xii. sqq.) begins an historical sketch of a peculiar character. The circumstantial details in it allow us to examine more closely the historical character of these accounts. The numerous descriptions of the mode of life in those days furnish us with a very vivid picture. We meet everywhere a sublime simplicity quite worthy of patriarchal life, and never to be found again in later history. One cannot suppose that it would have been possible in a later period, estranged from ancient simplicity, to invent such a picture.

The fidelity of the author everywhere exhibits itself. Neither the blemishes in the history of Abraham, nor the gross sins of the sons of Jacob, among whom even *Levi*, the progenitor of the sacerdotal race, forms no exception, are concealed.

The same author, whose moral principles are so much blamed by the opponents of Genesis, on account of the description given of the life of Jacob, produces, in the history of Abraham, a picture of moral greatness which could have originated only in facts.

The faithfulness of the author manifests itself also especially in the description of the expedition of the kings from Upper to Western Asia; in his statements concerning the person of Melchizedek (Gen. xiv.); in the circumstantial details given of the incidents occurring at the purchase of the hereditary burial-place (ch. xxiii.); in the genealogies of Arabian tribes (ch. xxv.); in the genealogy of Edom (ch. xxxvi.); and in many remarkable details which are interwoven with the general accounts. In the history of Joseph the patriarchal history comes into contact with Egypt, and here the accounts given by ancient classical writers, as well as the monuments of Egypt, frequently furnish some splendid confirmations. For instance, the account given (xlvi. 13-26) of the manner in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus, and by Diodorus Sicu-

lus. The manner of embalming described in Gen. i. entirely agrees with the description of Herodotus, ii. 84, &c.

For the important commentaries and writings on Genesis, see the article PENTATEUCH.

GENNESARETH. [CINERETH].

GENNESARETH, LAKE OF. [SEA.]

GENTILES, a word which means literally, 'the nations.' It was applied by the Hebrews to all individuals or communities not under the law—that is, all the nations of the world excepting the Jews. But in later times some small states, and many individuals, embraced the law; and they were distinguished from the Gentiles, as well as from the Jews, by the name of PROSELYTES. In some places our authorized version has the word 'Gentiles' where the original should properly be rendered 'Greeks.'

GERAH, the smallest piece of money among the Hebrews. Twenty made a shekel; one of them would therefore be worth three halfpence, according to the present value of silver (Exod. xxx. 13).

GERAR, a town and district on the southernmost borders of Palestine, in the country of the Philistines, and not far from Gaza. It was visited by Abraham after the destruction of Sodom (Gen. xx. 1), and by Isaac when there was a dearth in the rest of Canaan (Gen. xxvi. 1). The incidents of their sojourn show that the district was very fertile. It was the seat of the first Philistine kingdom we read of, and gave name to it. The intercourse, differences, and alliances of the Hebrew fathers with the king and people of Gerar form a very curious and interesting portion of patriarchal history. It was still an important place in later times, as we may gather from 1 Chron. xiv. 13, 14. According to the ancient accounts Gerar lay in or near a valley, which appears to be no other than the great Wady Sheriah (or one of the branches of it), that comes down from Beersheba; besides we know that it was in the land of the Philistines, and that it was not far from Beersheba when Isaac resided there (Gen. xxvi. 1, 20, 23; 26-33; comp. xx. 1). The name continued to exist (perhaps as a matter of tradition) for several centuries after the Christian era, but no traces of it can now be found.

GERASA, not JERASH (not named in the Bible), was in the Decapolis, and formed the eastern boundary of Perma. It lay on elevated ground, according to Ptolemy, in 68° 15' = 31° 45'. Its inhabitants were mostly heathen. After the Roman conquests in the East, the country in which Gerasa lies became one of their favourite colonies, and ten principal cities were built on the east of the Jordan, giving the name of Decapolis to the land in which they stood. Gerasa was one, but not the greatest of these. The place was taken by storm by Alexander Jannæus, who was actuated by a desire of gaining a large treasure. Alexander died near it while besieging Regaba. Before the place had time to recover from this calamity, it was included among the number of those cities which were burnt by the enraged Jews in their vengeance on the Syrians, and on the Roman power generally, for the massacre of a number of their nation at Cesarea. A terrible revenge was taken by other cities, but Gerasa is honourably excepted. Annian, general under Vespasian, took the city; 'after which

he set fire to their houses,' and what was remaining was all burnt down.' Its ruins were first discovered by Seetzen and have often been subse-

197.

quently visited. They have been pronounced superior to those of Palmyra.

GERGESENES'. [GADARA.]

GERTIZIM, MOUNT. [FAL AND GERTIZIM.]

GERSHOM (*a stranger here*), one of the two sons (the other was Eliezer) who were born to Moses in the land of Midian by Zipporah (Exod. ii. 22; xviii. 3). These sons of the great lawgiver held no other rank than that of simple Levites, while the sons of their uncle Aaron enjoyed all the privileges of the priesthood (1 Chron. xxiii. 14). The glory of being the children of such a father doubtless availed them more than the highest dignities; but we must nevertheless admire the rare disinterestedness of Moses in making no public provision—as he might so easily have done—for his own children.

GERSHON (*same as Gershom*), eldest son of the patriarch Levi, born in Canaan before the going down into Egypt. He is only known from his name having been given to one of the three great branches of the Levitical tribe. The office of the Gershonites, during the marches in the wilderness, was to carry the veils and curtains of the tabernacle, and their place in the camp was west of the ark (Gen. xlii. 11; Exod. vi. 16; Num. ii. 17).

GESHEM (*rain*), one of the enemies of the Jews under Nehemiah (Neh. vi. 6). He was probably a Samaritan, although on some account or other designated an Arabian (Neh. ii. 19), and seems to have been a subaltern officer at Jerusalem. He opposed the designs of the Jewish governor, talking of them as seditious, and turning them into ridicule. Eventually he took part in the plots of Tobiah against the life of Nehemiah (Neh. ii. 19; vi. 2-9), about B.C. 445.

GESHUR, a district of Syria (2 Sam. xv. 8; 1 Chron. ii. 23), which adjoined, on the east side of the Jordan, the northern border of the Hebrew territory, and lay between Mount Hermon, Maachah, and Bashan (Deut. iii. 13, 14; Josh. xii. 5). According to the boundaries of the Holy Land, as defined by Moses, Geshur would have formed part of it; but in Josh. xiii. 2, 13, it is stated that the Israelites had expelled neither the Geshurites nor

the Maachathites, but dwelt together with them. That the Hebrews did not afterwards permanently subdue Geshur appears from the circumstance that, in David's time, this district had a king of its own, called Talmai, whose daughter, Maachah, was one of the wives of David (2 Sam. iii. 3). She was the mother of Absalom, who took refuge with his grandfather after the murder of Amnon, and remained three years in Geshur (2 Sam. xiii. 37; xv. 8). The word *Geshur* signifies a bridge, and corresponds with the Arabic *Jisr*; and in the same region where, according to the above data, we must fix Geshur, between Mount Hermon and the lake of Tiberias, there still exists an ancient stone bridge over the upper Jordan, called Jisr-Beni-Jakub, or 'the bridge of the children of Jacob,' i. e. the Israelites.

GESHURITES, GESHURI; 1. The inhabitants of the above region [GESHUR]. 2. A people in the south of Palestine, near the Philistines (Josh. xiii. 2; 1 Sam. xxvii. 8).

GETHSEMANE (seemingly from *oil-press*), the name of a small field, or garden, just out of Jerusalem, over the brook Kidron, and at the foot of the Mount of Olives. That which is now pointed out as the garden in which our Lord underwent his agony, occupies part of a level space between the brook and the foot of the Mount, and corresponds well enough in situation and distance with all the conditions which the narrative requires. It is about fifty paces square, and is enclosed by a wall of no great height, formed of rough loose stones. Eight very ancient olive-trees now occupy this enclosure, some of which are of very large size, and all exhibit symptoms of decay clearly denoting their great age. The garden belongs to one of the monastic establishments, and much care has been taken to preserve the old trees from destruction. Dr. Robinson admits the probability that this is the site which Eusebius and Jerome had in view; and, as no other site is suggested as preferable, we may be content to receive the traditional indication.

GEZER, formerly a royal city of the Canaanites, and situated in what became the western part of the tribe of Ephraim. The Canaanites were not expelled from it at the conquest (Josh. x. 33; xvi. 5, 10; Judg. i. 29). It was, nevertheless, assigned to the Levites (Josh. xxi. 21). In after times, having been, on some occasion, destroyed by the Egyptians, it was rebuilt by Solomon.

GIANTS. These beings of unusual height are found in the early history of all nations, sometimes of a purely human origin, but more frequently supposed to have partaken also, in some way, of the supernatural and the divine.

1. In Gen. vi. 4, we have the first mention of giants—'There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men which were of old, men of renown.' In our judgment the bearing of this passage obviously favours the common notion of giants, and that the rather because their origin is traced to some unexplained connection with 'the sons of God,' that is, with beings of high endowments, if not of a superior nature.

2. In Gen. xiv. 5, we meet with a race termed Rephaim, as settled on the other side of the Jordan, in Ashteroth-Karnaim, whom Chedorlaomer

defeated. Of this race was Og, king of Bashan, who alone remained, in the days of Moses (Deut. iii. 10), of the remnant of the Rephaim. This race gave their name to a valley near Jerusalem.

3. The Anakim. In Num. xiii. the spies sent by Moses before his army to survey the promised land, report among other things—'The people be strong that dwell in the land; and, moreover, we saw the children of Anak' (ver. 28). This indirect mention of the children of Anak shows that they were a well-known gigantic race. In the 32nd and 33rd verses the statement is enhanced,— 'It is a land that eateth up the inhabitants; and all the people that we saw in it are men of great stature. And there we saw the giants, the sons of Anak which came of the giants; and we were in our own sight as grasshoppers, and so we were in their sight.' However much of exaggeration fear may have given to the description, the passage seems beyond a doubt to show the writer's belief in a race of giants (Deut. ix. 2). From Deut. ii. 10 it appears that the size of the Anakim became proverbial, and was used as a standard with which to compare others. In the time of Moses they dwelt in the environs of Hebron (Josh. xi. 22). They consisted of three branches or clans—'Ahiman, Sheshai, and Talmi—the children of Anak' (Num. xiii. 22). They were destroyed by Joshua (Josh. xi. 21; xiv. 12; Judg. i. 20).

4. From the remnant of the Anakim left in Gath of the Philistines (Judg. i. 20; Josh. xiv. 12) proceeded the famous Goliath (1 Sam. xvii. 4). This giant is said to have been in height six cubits and a span. Other giants of the Philistines are mentioned in the passage before cited, 2 Sam. xxi. 16, sq., namely:—1. 'Ishbi-benob, which was of the sons of the giant, the weight of whose spear weighed three hundred shekels of brass, he being girded with a new sword, thought to have slain David; but Abishai, the son of Zeruiah, succoured him, and smote the Philistine and killed him.' 2. Saph, which was of the sons of the giant who was slain by Sibbechai. 3. 'A man of great stature, that had on every hand six fingers and on every foot six toes, four and twenty in number, and he also was born to the giant; and when he defied Israel, Jonathan, the son of Shimeah, the brother of David, slew him.' These four were sons of the giant in Gath, that is, probably of the Goliath of Gath whom David slew (1 Kings xx. 8; 2 Sam. xx. 22; 1 Sam. xvii. 4).

5. Another race is mentioned in Deut. ii. 10, the Emim, who dwelt in the country of the Moabites. They are described as a people 'great and many, and tall as the Anakim, which were also accounted giants' (Gen. xiv. 5).

6. The Zamzummim also (Deut. xxi. 20), whose home was in the land of Ammou—'that also was accounted a land of giants: giants dwelt therein of old time, and the Ammouites called them Zamzummims, a people great and many, and tall as the Anakim; but the Lord destroyed them before them, and they (the Israelites) succeeded them, and dwelt in their stead.'

From this enumeration it is clear that the Scriptures tell of giants in the olden time, and of races of giants: and that, though giants are mentioned as something singular, and consequently as comparatively rare, they appear to have been,

relatively to the numbers of the population, of frequent occurrence.

That the primitive races of men greatly surpassed others in stature is an opinion which finds ample support in ancient authors generally; and at an early period and under favourable circumstances, individuals and even tribes may have reached an unusual height and been of extraordinary strength. But many things concur to show that the size of the race did not differ materially from what it is at present. This is seen in the remains of human beings found in tombs; especially among the mummies of Egypt. To the same effect is the size of ancient armour, as well as architectural dimensions, and the measures of length which have been received from antiquity. Ancient writers who are free from the influence of fable, are found to give a concurrent testimony.

That great diversity as to height and size prevails in the human family, is well known. What the precise limits may be within which nature has worked in the formation of man, it would be difficult to determine. But the inhabitants of northern latitudes are well known to be below the ordinary standard, many of them scarcely exceeding four feet; while in temperate climates the height of the human race averages from four feet and a half to six feet; and instances are not wanting of persons who measured eight or nine feet.

The possibility of a race of giants cannot well be denied. There is a known tendency in the human frame to perpetuate peculiarities which have been once evolved. Why not extraordinary 'procrity' as well as any other? In fact, the propagation of stature, whether high or low, is a phenomenon which we all see presented daily before our own eyes. Tall parents give birth to tall children. The tallness is found to remain in families; and, doubtless, did not circumstances intervene to reduce the stature by intermarriage with short persons, the unusual height would be perpetuated in any given line. The inhabitants of Potsdam, descended to a great extent from the famous regiment of tall grenadiers which Frederick of Prussia took so much pains to bring together, are said to be still remarkable for exceeding the average height. The family of Scalligers appears to have been unusually tall.

GIBBETHON, a city of the Philistines, which was included in the territories of the tribe of Dan (Josh. xix. 44), and was assigned to the Levites (Josh. xxi. 23). It was still in the hands of the Philistines in the time of Nadab, king of Israel, who besieged it, and was slain under its walls by Baasha, one of his own officers (1 Kings xx. 27; xvi. 15). Nothing is known of its site.

GIBEAH. There were several places of this name, which, as before remarked [GEB], is the feminine form of the word Gibeah, and signifies a hill. Without doubt all the places so named were situated upon hills.

1. GIBEAH OF BENJAMIN is historically the most important of the places bearing this name. It is often mentioned in Scripture. It was the scene of that abominable transaction which involved in its consequences almost the entire extirpation of the tribe of Benjamin (Judg. xix. 14, sq.). It was the birth-place of Saul, and continued to be his residence after he became

king (1 Sam. x. 26; xi. 4; xv. 33; xxiii. 19; xxvi. 1); and here was the scene of Jonathan's romantic exploit against the Philistines (1 Sam. xiv.). It was doubtless on account of this its intimate connection with Saul, that the Gibeonites hanged up here his seven descendants (2 Sam. xxi. 6). Jerome speaks of Gibeah as, in his time, level with the ground, and since then it does not appear to have been visited by travellers till recently. Dr. Robinson, who made many valuable observations in this neighbourhood, detected Gibeah in the small and half-ruined village of Jeba, which lies upon a low, conical, or rather round eminence, on the broad ridge which shelves down towards the Jordan valley, and spreads out below the village in a fine sloping plain. The views of the Dead Sea and the Jordan, and of the Eastern mountains, are here very extensive. Among the ruins some large hewn stones, indicating antiquity, are occasionally seen. This place is about five miles north by east from Jerusalem.

2. GIBEAH in the mountains of Judah (Josh. xv. 37), which, under the name of Gabaatha, Eusebius and Jerome place twelve Roman miles from Eleutheropolis, and state that the grave of the prophet Habakkuk was there to be seen. Dr. Robinson identifies it with the village of Jebah, which stands upon an isolated hill, in the midst of Wady-el-Musurr, about ten miles south-west of Jerusalem.

3. GIBEAH in Mount Ephraim, called Gibeah of Phineas, where the high-priest Eleazar, son of Aaron, was buried by his son Phineas (Josh. xxiv. 33). Dr. Robinson finds it in a narrow valley called Wady-el-Jib, the Geib of Maundrell, lying just midway on the road between Jerusalem and Shechem.

GIBEON, a town celebrated in the Old Testament, but not mentioned in the New. It was 'a great city,' as one of the royal cities; and to its jurisdiction originally belonged Beeroth, Chephirah, and Kirjath-jearim (Josh. ix. 17; x. 2). It is first mentioned in connection with the deception practised by the inhabitants upon Joshua, by which, although Canaanites (Hivites), they induced the Jewish leader not only to make a league with them, and to spare their lives and cities, but also, in their defence, to make war upon the five kings by whom they were besieged. It was in the great battle which followed, that 'the sun stood still upon Gibeon' (Josh. x. 12, 1-14). The place afterwards fell to the lot of Benjamin, and became a Levitical city (Josh. xviii. 25; xxi. 17), where the tabernacle was set up for many years under David and Solomon (1 Chron. xvi. 39; xxi. 29; 2 Chron. i. 3), the ark being at the same time at Jerusalem (2 Chron. i. 4). It was here, as being the place of the altar, that the young Solomon offered a thousand burnt-offerings, and was rewarded by the vision which left him the wisest of men (1 Kings iii. 4-15; 2 Chron. i. 3-13). This was the place where Abner's challenge to Joab brought defeat upon himself, and death upon his brother Asael (2 Sam. ii. 12-32), and where Amasa was afterwards slain by Joab (2 Sam. xx. 8-12). None of these passages mark the site of Gibeon; but there are indications of it in Josephus, who places it fifty stadia north-west from Jerusalem; and in Jerome: which leave little doubt that Gibeon is to be iden-

tified with the place which still bears the name of El-Jib.

El-Jib is a moderately sized village, seated on the summit of a hill, five miles north by west from Jerusalem. The houses stand very irregularly and unevenly, sometimes almost above one another. They seem to be chiefly rooms in old massive ruins, which have fallen down in every direction. One large building still remains, probably a former castle or tower of strength. Towards the east the ridge of the hill sinks a little, and here, a few rods from the village, just below the top of the ridge towards the north, is a fine fountain of water. It is in a cave, excavated in and under the high rock, so as to form a large subterranean reservoir. Not far below it, among olive-trees, are the remains of an open reservoir, about one hundred and twenty feet in length by one hundred in breadth. It was doubtless designed to receive the superfluous waters of the cavern, and there can be little question but that this was 'the Pool of Gibeon' mentioned in 2 Sam. ii. 13; and, in the whole, we find the 'Great [or many] waters of Gibeon' of Jer. xli. 12.

GIBLITES, the inhabitants of the city and district of Gebal in Phœnicia, 34° 7' N. lat., 35° 42' E. long., on the shore of the Mediterranean, under Mount Lebanon. 'The land of the Giblites,' with 'all Lebanon,' was assigned to the Israelites by the original appointment (Josh. xiii. 5); but it does not seem that they ever possessed themselves of it. The Giblites are denoted by the word rendered 'stone-squarers' in 1 Kings v. 18; from which it would seem that they were then subject to, or in close connection with Tyre. It is doubtful whether this Gebal, or the one in Edom, is that mentioned in Ps. lxxxiii. 7. But in Ezek. xxvii. 9, the Phœnician Giblites are distinctly mentioned as such, and preferably employed upon the shipping which formed the glory and strength of Tyre.

Gebal was an important place, and celebrated for the birth and worship of Adonis, the Syrian Tammuz. The town still subsists under the name of Jehail. It is seated on a rising ground near the sea, at the foot of Lebanon, which here approaches close to the coast. It is walled on the three sides towards the land, and open on the west towards the sea, being perhaps about half a mile in circuit. Within the wall, which seems of the age of the Crusades, the chief building is an old castle, which has received modern repairs, and is now used as the abode of the agha or commandant. There are three or four open and lofty buildings belonging to the chief people of the place, a mosque with a low minaret, and an old Maronite church of good masonry; but the houses generally are of poor construction, and nearly half the space within the walls is occupied with the gardens of the inhabitants. The population is estimated at 2000.

GID'EON (*destroyer*), surnamed JERUBBAAL or JERUBBESHETH, fifth Judge in Israel, and the first of them whose history is circumstantially narrated. He was the son of Joash, of the tribe of Manasseh, and resided at Ophrah in Gilead beyond the Jordan.

The Midianites, in conjunction with the Amalekites and other nomadic tribes, invaded the country every year, at the season of produce, in

great numbers, with their flocks and herds. They plundered and trampled down the fields, the vineyards, and the gardens; they seized the cattle, and plundered man and house, rioting in the country, after the manner which the Bedouin Arabs practise at this day. After Israel had been humbled by seven years of this treatment, the Lord raised up a deliverer in the person of Gideon. He was threshing corn by stealth, for fear of its being taken away by the Midianites, when an angel of God appeared before him, and thus saluted him:—‘the Lord is with thee, thou mighty man of valour.’ Gideon expressed some doubt whether God was still with a people subject to such affliction, and was answered by the most unexpected commission—‘Go in this thy might, and thou shalt save Israel from the hand of the Midianites: have not I sent thee?’ Gideon still urged, ‘Wherewith shall I save Israel? Behold my family is poor in Manasseh, and I am the least in my father’s house.’ The ‘Wherewith’ was answered by ‘Surely I will be with thee.’ He then demurred no more, but pressed his hospitality upon the heavenly stranger, who, however, ate not of what was set before him, but directing Gideon to lay it out upon the rock as upon an altar, it was consumed by a supernatural fire, and the angel disappeared. Assured by this of his commission, Gideon proceeded at once to cast down the local image and altar of Baal; and, when the people would have avenged this insult to their false god, their anger was averted through the address of his father, who, by dwelling on the inability of Baal to avenge himself, more than insinuated a doubt of his competency to protect his followers. This was a favourite argument among the Hebrews against idolatry. It occurs often in the prophets, and was seldom urged upon idolatrous Israelites without some effect upon their consciences.

Gideon soon found occasion to act upon his high commission. The allied invaders were encamped in the great plain of Jezreel or Esdraelon, when he blew the trumpet, and thus gathered round him a daily increasing host, the summons to arms which it implied having been transmitted through the northern tribes by special messengers. The inquietude connected with great enterprises is more sensibly felt some days before than at the moment of action; and hence the two miraculous signs which, on the two nights preceding the march, were required and given as tokens of victory. The first night a fleece was laid out in the middle of an open threshing-floor, and in the morning it was quite wet, while the soil was dry all around. The next night the wonder was reversed, the soil being wet and the fleece perfectly dry (Judg. vii.).

Encouraged by these divine testimonies, Gideon commenced his march, and advanced to the brook Harod, in the valley of Jezreel. He was here at the head of 32,000 men; but, lest so large a host should assume the glory of the coming deliverance, which of right belonged to God only, two operations, remarkable both in motive and procedure, reduced this large host to a mere handful of men. First, by divine direction, proclamation was made that all the faint-hearted might withdraw; and no fewer than 22,000 availed themselves of the indulgence. The remaining 10,000 were still declared too numerous: they were

therefore all taken down to the brook, when only those who lapped the water from their hands, like active men in haste, were reserved for the enterprise, while all those who lay down leisurely to drink were excluded. The former numbered no more than 300, and these were the appointed vanquishers of the huge host which covered the great plain (Judg. vii. 1-8).

The overheard relation of a dream, by which Gideon was encouraged (Judg. vii. 9-14), and the remarkable stratagem, with pitchers and torches, by which he overcame (ver. 15-23), are well known.

The routed Midianites fled towards the Jordan, but were pursued with great slaughter, the country being now roused in pursuit of the flying oppressor. The Ephraimites rendered good service by seizing the lower fords of the Jordan, and cutting off all who attempted escape in that direction, while Gideon himself pursued beyond the river those who escaped by the upper fords. Gideon crossed the Jordan a little below where it leaves the lake of Gennesareth, in pursuit of the Midianitish princes Zeba and Zalmunna. On that side the river, however, his victory was not believed or understood, and the people still trembled at the very name of the Midianites. Hence he could obtain no succour from the places which he passed, and town after town refused to supply even victuals to his fatigued and hungry, but still stout-hearted troop. He denounced vengeance upon them, but postponed its execution till his return; and when he did return, with the two princes as his prisoners, he by no means spared those towns which, like Succoth and Penuel, had added insult to injury (Judg. viii. 4-17).

In his days captives of distinction taken in war were almost invariably slain, Zeba and Zalmunna had made up their minds to this fate; and yet it was Gideon’s intention to have spared them, till he learned that they had put to death his own brothers under the same circumstances; upon which, as the avenger of their blood, he slew the captives with his own hand (Judg. viii. 18-21).

Among the fugitives taken by the Ephraimites were two distinguished emirs of Midian, named Oreb and Zeeb, whom they put to death. They took their heads over to Gideon, which amounted to an acknowledgment of his leadership; but still the always haughty and jealous Ephraimites were greatly annoyed that they had not in the first instance been summoned to the field; and serious consequences might have followed, but for the tact of Gideon in speaking in a lowly spirit of his own doings in comparison with theirs (Judg. vii. 14; viii. 1, sq.).

Gideon having thus delivered Israel from the most afflictive tyranny to which they had been subject since they quitted Egypt, the grateful people, and particularly the northern tribes, made him an offer of the crown for himself and his sons. But the hero was too well acquainted with his true position, and with the principles of the theocratical government, to accept this unguarded offer: ‘I will not rule over you,’ he said, ‘neither shall my son rule over you: JEHOVAH, he shall rule over you.’ He would only accept the golden ear-rings which the victors had taken from the ears of their slaughtered foes [EAR-RINGS]; and a

cloth being spread out to receive them, the admiring Israelites threw in, not only the ear-rings, but other ornaments of gold, including the chains of the royal camels, and added the purple robes which the slain monarchs had worn, being the first indication of purple as a royal colour. The ear-rings alone weighed 1700 shekels, equal to 74 pounds 4 ounces, and worth, at the present value of gold, about 3300*l*. With this 'Gideon made an ephod, and put it in his city, even in Ophrah; and all Israel went thither a whoring after it; which thing became a snare unto Gideon and to his house.' An ephod, at least that of the high-priest, was an outer garment like a sleeveless tunic, to which was attached the oracular breast-plate, composed of twelve precious stones set in gold, and graven with the names of the twelve tribes. Another plainer description of ephod was worn by the common priests. The object of Gideon in making an ephod with his treasure is not very clear. Some suppose that it was merely designed as a trophy of Israel's deliverance: if so, it was a very strange one. It is more probable that as Gideon had, on his being first called to his high mission, been instructed to build an altar and offer sacrifice at this very place, he conceived himself authorized, if not required, to have there a sacerdotal establishment—for at least the tribes beyond the river—where sacrifices might be regularly offered. In this case the worship rendered there was doubtless in honour of Jehovah, but was still, however well intended, highly schismatical and irregular. Even in his lifetime it must have had the effect of withdrawing the attention of the people east of the Jordan from the Tabernacle at Shiloh, and thus so far tended to facilitate the step into actual idolatry, which was taken soon after Gideon's death. The probability of this explanation is strengthened when we recollect the schismatical sacerdotal establishments which were formed by Micah on Mount Ephraim, and by the Danites at Laish (Judg. xvii. 5-13; xviii. 29-31).

The remainder of Gideon's life was peaceable. He had seventy sons by many wives, and died at an advanced age, after he had 'ruled Israel' (principally the northern tribes and those beyond the river) for forty years: B.C. 1249 to 1209. He is mentioned in the discourse of Samuel (1 Sam. xii. 11), and his name occurs in Heb. xi. 32, among those of the heroes of the faith.

1. GĪ'HON, a fountain near Jerusalem. The place outside the city to which the young Solomon was taken to be anointed king, was called Gihon, but its direction is not indicated (1 Kings i. 33, 38). Subsequently king Hezekiah 'stopped the upper water-course [or upper out-flow of the waters] of Gihon, and brought it straight down to the west side of the city of David (2 Chron. xxxii. 30; xxxiii. 14). This was, perhaps, on occasion of the approach of the Assyrian army under Sennacherib, when, to prevent the besiegers from finding water, great numbers of the people laboured with much diligence in stopping the water of the fountains without the city, and in particular of 'the brook that ran through the midst of the land' (2 Chron. xxxii. 3, 4). The author of the book of Sirach (xlviii. 17) also states, that 'Hezekiah brought water into the midst of the city; he dug with iron into the rock, and built fountains for the waters.' The foun-

tain of Gihon is also mentioned by Josephus. From a comparison of these passages the editor of the *Pictorial Bible* (on 2 Chron. xxxii.) arrived at the conclusion, since confirmed by Dr. Robinson, that there existed anciently a fountain of Gihon, on the west side of the city, which was 'stopped' or covered over by Hezekiah, and its waters brought by subterranean channels into the city. Before that time it would naturally have flowed down through the valley of Gihon, and probably formed the brook which was stopped at the same time. 'The fountain may have been stopped, and its waters thus secured very easily by digging deep and erecting over it one or more vaulted subterranean chambers.'

2. GIHON; the name of one of the rivers of Paradise. [PARADISE.]

GIL'BOA, a mountain memorable for the defeat of Saul by the Philistines, where his three sons were slain, and where he himself died by his own hand (1 Sam. xxviii. 4; xxxi. 1-8; 2 Sam. i. 6-21). The circumstances of the narrative would alone suffice to direct our attention to the mountains which bound the great plain of Esdraelon on the south-east, and are interposed between it and the Jordan valley. Here there are a number of ridges with a general direction from north-west to south-east, separated by valleys running in the same direction. The largest of these valleys is the southernmost: it is a broad deep plain about two miles and a half wide, and leading direct into the Jordan valley. This is supposed to be distinctively (for the plain of Esdraelon is sometimes so called) the Valley of Jezreel. The mountains which bound it on the north appear to be those of Little Hermon; and the higher mountains which bound it on the south undoubtedly form Mount Gilboa. There is still, indeed, an inhabited village, in whose name of Jelbon that of Gilboa may be recognised.

GIL'EAD. 1. A group of mountains connected with Lebanon by means of Mount Hermon. It begins not far from the latter, and extends southward to the sources of the brooks Jabbok and Arnon, thus enclosing the whole eastern part of the land beyond the Jordan (Gen. xxxi. 21; Cant. iv. 1). According to Michaelis, this mountain, which gave its name to the country so called, must be situated beyond the region sketched in our maps, and somewhere about the Euphrates.

2. (a) The name of a large district beyond the Jordan, continually mentioned in the Scriptures in contradistinction to, or apart from, Bashan (Deut. iii. 13; Josh. xii. 5; xiii. 11; xvii. 1; 2 Kings x. 33; 1 Chron. v. 16; Mic. vii. 14): though, to judge from its geographical position (as given Num. xxxii. 26; Dent. iii. 12), it must have comprised the entire possessions of the two tribes of Gad and Reuben, and even the southern part of Manasseh (Deut. iii. 13; Num. xxxii. 40; Josh. xvii. 1-6). The cities Ramoth, Jabosh, and Jazer, are usually designated as lying in Gilead.

This region was distinguished for its rich pastures (Num. xxxii. 1) and aromatic simples; from which latter different sorts of balsam were prepared—facts confirmed by modern travellers, with the addition that the whole region is covered with groups of limestone mountains, intersected by fertile valleys.

(b) The name of the whole eastern part of the

Jordan (Deut. xxxiv. 1; comp. 2 Kings x. 33; Judg. xx. 1).

The name *Gilead* continued to be used, in a general and geographical sense, even after the exile.

1. *GILGAL*, the place where the Israelites formed their first encampment in Palestine, and which continued for some time to be their headquarters while engaged in the conquest of the land (Josh. iv. 19, 20; ix. 6: x. 6, 7, &c.). It was here that they set up the twelve stones which they took out of the bed of the Jordan (iv. 19), which another head will bring under consideration [Stones]. Samuel used to visit Gilgal in his annual circuit as a judge; and here there was a school of the prophets (1 Sam. vii. 16; 2 Kings iv. 38). There is no notice of the place after the Captivity. Indeed, it does not seem that the name belonged at first to a town, although Gilgal eventually became an inhabited place. It appears to have been early abandoned, and Josephus does not seem to mention it as existing in his time. This writer places it on the east border of Jericho, ten stadia from that city, and fifty from the Jordan. From this it would seem to have been in the vicinity of the present village of the pseudo-Jericho, Riha, which is about the assigned distance from the river. No trace of the name or site can now be discovered.

2. *GILGAL*, a place in the region of Dor, whose king was subdued by Joshua (Josh. xii. 23). The Gilgal of Neh. xii. 29, and 1 Macc. ix. 2, is probably the same as this; as well as the ancient Galgala, which Eusebius and Jerome place six Roman miles north of Antipatris. In this neighbourhood there is still a village called Jiljuleh, which probably represents the ancient site.

GIRDLE. The original word translated 'girdle'

198.

literally means a *band* or *bandage*, and from the

places in which it occurs it appears to have been made of fine linen, variously wrought and used to bind as a girdle about the body of persons in authority, especially the Jewish priests (Exod. xxix. 9; xxviii. 39; xxxix. 29; Lev. viii. 13; Isa. xxii. 21). These girdles may be considered as fairly represented by those which we observe on such persons in the Egyptian paintings.

GIRGASHITES, one of the families of Canaan, who are supposed to have been settled in that part of the country which lay to the east of the Lake of Gennesareth.

The Girgashites are conjectured to have been a part of the large family of the Hivites, as they are omitted in nine out of ten places in which the nations or families of Canaan are mentioned, while in the tenth they are mentioned, and the Hivites omitted. Josephus states that nothing but the name of the Girgashites remained in his time. In the Jewish commentaries of R. Nachman, and elsewhere, the Girgashites are described as having retired into Africa, fearing the power of God; and Procopius, in his *History of the Vandals*, mentions an ancient inscription in Mauritania Tingitana, stating that the inhabitants had fled thither from the face of Joshua the son of Nun. The fact of such a migration is not unlikely; but we have very serious doubts respecting the inscription.

GITTITES, inhabitants or natives of Gath (Josh. xiii. 3). Obed-edom, although a Levite, is called a Gittite (2 Sam. vi. 10), possibly because he had been with David when at Gath, but much more probably from his being a native of Gath-rimmon, which was a city of the Levites. There seems no reason for extending this interpretation to Ittai (2 Sam. xv. 19), seeing that David expressly calls him 'a stranger' (foreigner), and, what is more, 'an exile.' He was at the head of 600 men, who were also Gittites, for they are called (ver. 22) his 'brethren.' They appear to have formed a foreign troop of experienced warriors, chiefly from Gath, in the pay and service of David; which they had perhaps entered in the first instance for the sake of sharing in the booty obtainable in his wars. We can conceive that the presence of such a troop must have been useful to the king in giving to the Hebrew army that organization and discipline which it did not possess before his time.

GITTITH, a word which occurs in the title of Ps. viii., lxxxi., lxxxiv. [PSALMS.]

GLASS, according to Pliny, was discovered by what is termed accident. Some merchants kindled a fire on that part of the coast of Phœnicia which lies near Ptolemais, between the foot of Carmel and Tyre, at a spot where the river Belus casts the fine sand which it brings down; but, as they were without the usual means of suspending their cooking vessels, they employed for that purpose logs of nitre, their vessel being laden with that substance; the fire fusing the nitre and the sand produced glass. The Sidonians, in whose vicinity the discovery was made, took it up, and having in process of time carried the art to a high degree of excellence, gained thereby both wealth and fame. Other nations became their pupils; the Romans especially attained to very high skill in the art of fusing, blowing, and colouring glass. Even glass mirrors were invented by the Sidonians.

This account of Pliny is in substance corroborated by Strabo and by Josephus. Yet, notwithstanding this explicit statement, it was long denied that the ancients were acquainted with glass properly so called; nor did the denial entirely disappear even when Pompeii offered evidences of its want of foundation. Our knowledge of Egypt has, however, set the matter at rest—showing at the same time how careful men should be in setting up mere abstract reasonings in opposition to the direct testimony of history. Wilkinson, in his *Ancient Egyptians* (iii. 88, sq.), has adduced the fullest evidence that glass was known to and made by that ingenious people at a very early period of their national existence. Upward of 3500 years ago, in the reign of the first Osirtasen, they appear to have practised the art of blowing glass. The process is represented

199.

in the paintings of Beni Hassan, executed in the reign of that monarch. In the same age images of glazed pottery were common. Ornaments of glass were made by them about 1500 years B.C.; for a bead of that date has been found, being of the same specific gravity as that of our crown glass. Many glass bottles, &c. have been met with in the tombs, some of very remote antiquity. Glass vases were used for holding wine as early as the Exodus. Such was the skill of the Egyptians in this manufacture, that they successfully counterfeited the amethyst, and other precious stones. It was sometimes used by the Egyptians even for coffins. They also employed it, not only for drinking utensils and ornaments of the person, but for mosaic-work, the figures of deities, and sacred emblems, attaining to exquisite workmanship, and a surprising brilliancy of colour. The art too of cutting glass was known to them at the most remote periods; for which purpose, as we learn from Pliny, the diamond was used. That the ancients had mirrors of glass is clear from the above-cited words of Pliny; but the mirrors found in Egypt are made of mixed metal, chiefly copper. So admirably did the skill of the Egyptians succeed in the composition of metals, that their mirrors were susceptible of a polish which has been but partially revived at the present day. The mirror was nearly round, having a handle of wood, stone, or metal. The form varied with the taste of the owner. The same kind of metal mirror was used by the Israelites, who, doubtless, brought it from Egypt. In Exod. xxxviii. 8, it

is expressly said that Moses 'made the laver of brass of the looking-glasses (brazen mirrors) of the women.'

It would be justifiable to suppose that the Hebrews brought glass, and a knowledge how to manufacture it, with them out of Egypt, were not the evidence of history so explicit that it was actually discovered and wrought at their own doors. Whether it was used by them for mirrors is another question. That glass, however, was known to the Hebrews appears beyond a doubt.

GLEDE (Dent, xiv. 13) is an obsolete name for the common kite. It is a species that rises to a towering height, hangs apparently motionless in the sky, and darts down with immense velocity; but the legs and claws being weak, it is cowardly, and feeds upon carrion, fish, insects, mice, and small birds. About Cairo kites are particularly abundant, mixing with the carrion vultures in their wheeling flight, and coming in numbers to the daily distribution of food awarded them. But the question whether the kite of Europe and that of Egypt are the same species, is not decided, though there is no want of scientific names for both species found in the valley of the Nile; one of which is certainly distinct from the European, and the other, if not so, is still a strongly marked variety. The bill of this species

200. [Milvus Ater.]

is dark; head and throat whitish, with brown streaks; body above dark grey brown, pale ferruginous below; tail but slightly forked; legs yellow. It is found in hieroglyphic paintings coloured with sufficient 'accuracy not to be mistaken. The other species, which we figure above as *Milvus ater*, is the black kite. It has the head, neck, and back dark rusty grey; scapulars bordered with rusty; wing-coverts and primaries black, the last mentioned tipped with white; tail rusty grey above, white beneath; bill dark; legs yellow. The manners of both species are much the same: it is likely that they are equally abundant at Cairo, and spread into Palestine (Hawk).

GNAT. Our Saviour's allusion to the gnat is a kind of proverb, either in use in his time, or invented by himself, 'Blind guides, who strain out a gnat, and swallow down [bolt, as we say] a camel.' He adopts the antithesis of the *smallest insect* to the *largest animal*, and applies it to those who are superstitiously anxious in avoiding small faults, yet do not scruple to commit the

greatest sins. The typographical error, 'strain at a goat,' first found its way into King James's translation, 1611. It is 'strain out' in the previous translations. The custom of filtering wine, among the Jews, for this purpose, was founded on the prohibition of 'all flying, creeping things' being used for food, excepting the *saltatori* (Lev. xi. 23). According to the Talmud, eating a goat incurred scourging or excommunication.

GOAT. The races of this animal either known to or kept by the Hebrew people were

201. [Syrian Goat.]

probably—1. The domestic Syrian long-eared breed, with horns rather small and variously bent; the ears longer than the head, and pendulous; hair long, often black;—2. The Angora, or rather Anadolli breed of Asia Minor, with long hair, more or less fine;—3. The Egyptian breed, with small spiral horns, long brown hair, very long ears;—4. A breed from Upper Egypt without horns, having the nasal bones singularly elevated, the nose contracted, with the lower jaw protruding the incisors, and the female with udder very low and purse-shaped. This race, the most degraded by climate and treatment of all the domestic varieties, is clad in long coarse hair, commonly of a rufous brown colour, and so early distinct, that the earlier monuments of Egypt represent it with obvious precision.

The natural history of the domestic goat requires no illustration in this place, and its economic uses demand only a few words. Notwithstanding the offensive lasciviousness which causes it to be significantly separated from sheep, the goat was employed by the people of Israel in many respects as their representative. It was a pure animal for sacrifice (Exod. xii. 5), and a kid might be substituted as equivalent to a lamb: it formed a principal part of the Hebrew flocks; and both the milk and the young kids were daily articles of food. Among the poorer and more sober shepherd families, the slaughter of a kid was a token of hospitality to strangers, or of unusual festivity; and the prohibition, thrice repeated in the Mosaic law, 'not to see a kid in its mother's milk' (Exod. xxiii. 19; xxxiv. 26; and Deut. xiv. 21), may have originated partly in a desire to recommend abstemiousness, which the legislators and moralists of the East have since invariably enforced with success, and partly with a view to discountenance a practice which was connected with idolatrous festivals, and the rites they involved. It is from goatskins that the leathern bottles to contain wine and other liquids are made in the Levant. For this purpose, after the head and feet are cut away, the

case or hide is drawn off the carcass over the neck, without opening the belly; and the extremities being secured, it is dried with the hair in or outside, according to the use it is intended for. The old worn-out skins are liable to burst: hence the obvious propriety of putting new wine into new bottles (Matt. ix. 17). Harmer appears to have rightly referred the allusion in Amos iii 12, to the long-eared race of goats: 'As the shepherd taketh out of the mouth of the lion two legs or a piece of ear, so shall the children of Israel be taken out that dwell in Samaria and Damascus.'

Beside the domestic goats, Western Asia is possessed of one or more wild species—all large and vigorous mountain animals, resembling the ibex or bouquetin of the Alps. Of these, Southern Syria, Arabia, Sinai, and the borders of the Red Sea, contain at least one species, known to the Arabs by the name of Beden or Beddan, and Taytal. We take this animal to be that noticed in 1 Sam. xxiv. 2; Job xxxix. 1; Ps. civ. 18: Prov. v. 19. The male is considerably taller and more robust than the larger he-goats, the horns forming regular curves backwards, and with from 15 to 24 transverse elevated cross-ridges, being sometimes near three feet long, and exceedingly ponderous: there is a beard under the chin, and the fur is dark brown; but the limbs are white, with regular black marks down the front of the legs, with rings of the same colour above the knees and on the pasterns. The females are smaller than the males, more slenderly made, brighter rufous, and with the white

202. [Wild Goat of Sinai.]

and black markings on the legs not so distinctly visible. This species live in troops of 15 or 20, and plunge down precipices with the same fearless impetuosity which distinguishes the ibex. Their horns are sold by the Arabs for knife-handles, &c.; but the animals themselves are fast diminishing in number.

GOAT, SCAPE. The particulars respecting the two goats, one of which was to be offered in sacrifice and the other suffered to escape, are contained in Lev. xvi. 7-10. The two goats were to be brought to the door of the tabernacle and the high-priest was to cast lots upon them, 'one lot for the Lord, and the other for the scape-goat,' or rather 'for Azazel.' The goat on which the lot of the Lord fell was to be brought and offered up for a sin-offering, but the goat on which the lot of Azazel fell was to be presented alive before the Lord, to make an atonement

with him, to let him go for a scape-goat (or 'for Azazel') into the wilderness. Of the former the blood was to be carried within the veil to be sprinkled upon the mercy-seat, and before the mercy-seat, in order that atonement might be made for the holy place because of the uncleanness of the children of Israel. When, on the other hand, the live goat was brought, the high-priest was to lay both his hands upon his head to confess over it all the iniquities of the children of Israel; after which he was to send it by the hand of 'a fit man' that it might bear upon it all their iniquities into a land not inhabited.

The only difficulty here, and that is a great one, is with respect to the meaning of the word *Azazel*, which our translators, in common with a large class of modern commentators, regard as applied to the goat itself, and render it by 'scape-goat.' Others produce reasons, not easily answered, for showing that the word must be taken as a proper name. Then arises the question, What is the name? Several of the Rabbinical writers regard it as the name of the *place* to which the scape-goat was conducted; but this notion has obtained little attention among Biblical scholars. Others, taking a hint from the Septuagint, which translates the difficult phrase by 'one lot for the Apomompous,' or 'the sender away,' or 'the averter,' hold it to denote one of that class of demons or deities called by the Latins *Dii Averunci*, or 'the deities who send away or avert evil from their votaries,' in which case the word would denote here a demon dwelling in the wilderness, and placated by victims. It is hard to suppose that a solemn ceremony was framed so as to give some sanction to the notion supposed to be involved in this statement. A step further, however, brings it more within the range of our recognition—this is, that *Azazel* is but a name for Satan, as was the opinion of most of the Jewish writers and of the early Christian church; and that the meaning of the ceremony is, that while the remission of sin is effected by the sacrificed goat (for without shedding of blood there was no remission, Heb. ix. 22), the other was laden with the sins already, through the other goat, pardoned, by way of symbolically notifying the fact to Satan, and of triumphing in his discomfiture. That, in any case, the liberated goat is understood to bear away the burden of pardoned sin, so that it shall be seen no more, and stands in the place which the victim goat would have occupied could it have been brought to life again after having been offered, seems to be shown by the somewhat parallel case of the two figures used in the purification of the leprous person (Lev. i. 4), one of which is slain, and the other dipped in its blood, and then suffered to fly away. There is another more common explanation, which, if correct, forms a very beautiful interpretation of the typical rite. This view recognises the substantial typical identity of the two goats, and in the victim goat sees Christ dying for our sins, and in the liberated goat views him as rising again for our justification. But it must be admitted that the whole subject forms one of the greatest difficulties of Scripture.

G. D. The two principal Hebrew names of the supreme Being used in the Scriptures are *Jehovah* and *Elohim*. Dr. Havernick proposes the reading *Jahveh* instead of *Jehovah*, meaning

'the Existing One.' Both names, he admirably proves, are used by Moses indiscriminately, in strict conformity with the theological idea he wished to express in the immediate context; and, pursuing the Pentateuch nearly line by line, it is astonishing to see that Moses never uses any of the names at mere random or arbitrarily, but is throughout consistent in the application of the respective terms. *Elohim* is the abstract expression for absolute *Deity* apart from the special notions of unity, holiness, substance, &c. It is more a philosophical than devotional term, and corresponds with our term *Deity*, in the same way as *state* or *government* is abstractedly expressive of a king or monarch. *Jehovah*, however, he considers to be the revealed *Elohim*, the Manifest, Only, Personal, and Holy *Elohim*: *Elohim* is the Creator. *Jehovah* the Redeemer, &c.

To *Elohim*, in the later writers, we usually find affixed the adjective 'the living' (Jer. x. 10; Dan. vi. 20, 26; Acts xiv. 15; 2 Cor. vi. 16), probably in contradistinction to *idols*, which might be confounded in some cases with the true God.

The attributes ascribed to God by Moses are systematically enumerated in Exod. xxxiv. 6, 7, though we find in isolated passages in the Pentateuch and elsewhere, additional properties specified, which bear more directly upon the dogmas and principles of religion, such as *e. g.* that he is not the author of sin (Gen. i. 31), although since the fall, man is born prone to sin (Gen. vi. 5; viii. 21, &c.). But as it was the avowed design of Moses to teach the Jews the Unity of God in opposition to the polytheism of the other nations with whom they were to come in contact, he dwelt particularly and most prominently on that point, which he hardly ever omitted when he had an opportunity of bringing forward the attributes of God (Deut. vi. 4; x. 17; iv. 39; ix. 16, &c.; Num. xvi. xxii.; xxxiii. 19, &c.; Exod. xv. 11; xxxiv. 6, 7, &c.).

In the Prophets and other sacred writers of the Old Testament, these attributes are still more fully developed and explained by the declarations that God is the first and the last (Isa. xlv. 6), that He changes not (Hab. iii. 6), that the earth and heaven shall perish, but He shall endure (Ps. cii. 26)—a distinct allusion to the 'last day'—and that He is Omnipresent (Prov. xv. 3; Job xxxiv. 22, &c.).

In the New Testament also we find the attributes of God systematically classified (Rev. v. 12, and vii. 12), while the peculiar tenets of Christianity embrace, if not a further, still a more developed idea, as presented by the Apostles and the primitive teachers of the church.

The expression 'to see God' (Job xix. 26; xlii. 5; Isa. xxxviii. 11) sometimes signifies merely to experience his help; but in the Old Testament Scriptures it more usually denotes the approach of death (Gen. xxxii. 30; Judg. vi. 23; xiii. 22; Isa. vi. 5).

The term 'son of God' applies to kings (Ps. ii. 7; lxxxii. 6, 27). The usual notion of the ancients, that the royal dignity was derived from God, may here be traced to its source. This notion, entertained by the Oriental nations with regard to kings, made the latter style themselves *gods* (Ps. lxxvii. 6).

'Sons of God,' in the plural, implies inferior gods, angels (Gen. vi. 2; Job i. 6); as also faith-

ful adherents, worshippers of God (Deut. xiv. 1; Ps. lxxiii. 15; Prov. xiv. 26).

'Man of God' is sometimes applied to an angel (Judg. xiii. 6, 8); as also to a prophet (1 Sam. ii. 27; ix. 6; 1 Kings xiii. 1).

GOG occurs Ezek. xxxviii. 3, 14, and xxxix. 11, as a proper name—that of a prince of *Magog*, a people that were to come from the North to invade the land of Israel, and be there defeated. In a different sense, but corresponding with the assertions of other Oriental authors, in whose traditions this people occupy an important place, *Gog* occurs in Rev. xx. 8, as the name of a country.

Interpreters have given very different explanations of the terms *Gog* and *Magog*; but they have generally understood them as symbolical expressions for the heathen nations of Asia, or more particularly for the Scythians, a vague knowledge of whom seems to have reached the Jews in Palestine about that period. As a collective name, *Magog* seems also to indicate in the Hebrew the tribes about the Caucasian mountains. According to Reinege, some of the Caucasian people call their mountains *Gog*, and the highest northern points *Magog*.

GOLAN or GAULON, a Levitical town of Bashan, in the tribe of Manasseh (Deut. iv. 43; Josh. xx. 8; xxi. 27; 1 Chron. vi. 71), from which the small province of Gaulonitis took its name. The word is recognised in the present Jolan or Djolan, mentioned by Borchardt as giving name to a district lying east of the lake of Tiberias, and composed of the ancient Gaulonitis, with part of Bashan and Argob.

GOLD was known and valued in very early times. Abraham was rich in gold (Gen. xiii. 2; xxiv. 35); and female ornaments were made of gold (Gen. xxiv. 22).

To judge from 1 Chron. xxii. 14; xxix. 4, the Jews must have been, in their prosperous days, in possession of enormous quantities of this metal, considering the many tons of gold that were spent in the building of the temple alone, though the expression, *plenteous as stones* (2 Chron. i. 15), may be considered as hyperbolic. It is, however, confirmed by the history of the other Asiatic nations, and more especially of the Persians, that the period referred to really abounded in gold, which was imported in vast masses from Africa and the Indies. The queen of Sheba brought with her (from Arabia Felix), among other presents, 120 talents of gold (2 Chron. ix. 9).

GOLGOTHA. The original word signifies 'a skull,' as does its Latin representative, *Calvaria*, *Calvary*. Different opinions have prevailed as to why the place was so termed. Many have held that Golgotha was the place of public execution, the Tyburn of Jerusalem; and that hence it was termed the 'place of a skull.' Another opinion is that the place took its name from its shape, being a hillock of a form like a human skull. The last is the opinion to which the writer of these remarks inclines. That the place was of some such shape seems to be generally agreed, and the traditional term *mount*, applied to Calvary, appears to confirm this idea. And such a shape, it must be allowed, is in entire agreement with the name—that is, 'skull.' To these considerations there are added certain difficulties which arise from the second explanation. So far as we know there is no historical evidence to

show that there was a place of public execution where Golgotha is commonly fixed, nor that any such place, in or near Jerusalem, bore the name Golgotha. In truth, the context seems to show that the Roman guard hurried Jesus away and put him to death at the first convenient spot; and that the rather because there was no small fear of a popular insurrection, especially as he was attended by a crowd of people. But where was the place? Not far, we may suppose from what has been said, from the judgment-hall, which was doubtless near the spot (Fort Antonia) where the Roman forces in Jerusalem were concentrated. From our plan of Jerusalem it will be seen that Fort Antonia lay on the north-west angle of the temple. Was it likely, then, that in the highly excited state of the public mind the soldiers should take Jesus southward, that is, through the whole breadth of the city? Somewhere in the north, it is clear, they would execute him, as thus they would most easily effect their object. But if they chose the north, then the road to Joppa or Damascus would be most convenient; and no spot in the vicinity would probably be so suitable as the slight rounded elevation which bore the name of Calvary. That some hillock would be preferred, it is easy to see, as thus the exposure of the criminal and the alleged cause of his crucifixion would be most effectually secured. But the particulars detailed by the sacred historians show that our Lord was not crucified on the spot, or very near the spot, where he was condemned, but was conducted some distance through the city. If so, this, as appears from our plan, must have been towards the west. Two points seem thus determined: the crucifixion was at the north-west of the city.

The account, as given in the Evangelists, touching the place of the crucifixion and burial of our Lord, is as follows:—Having been delivered by Pilate to be crucified, Jesus was led away, followed by a great company of people and women, who bewailed his fate. On the way the soldiers met one Simon, a Cyrenian, coming out of the country, who is compelled to bear Jesus' cross. When they were come to the place which is called Calvary, there they crucified him. This place was high to the city; and, sitting down, they watched him there. They that passed by reviled him, wagging their heads and scoffing. Likewise also the chief priests mocked him, with the scribes and elders; and the people stood beholding. The soldiers too mocked him. There stood by the cross of Jesus his mother, and his mother's sister, and Mary Magdalene. And all his acquaintance and the women that followed him from Galilee stood afar off, beholding these things. In the place where he was crucified there was a garden, and in the garden a new sepulchre, hewn out in the rock; there laid they Jesus, and rolled a great stone to the door of the sepulchre. The writer of the epistle to the Hebrews adds, that Jesus suffered *without the gate*, signifying, 'let us, therefore, go forth to him without the camp (or the city) bearing his reproach' (Heb. xiii. 12, 13; Matt. xxvii.; Mark xv.; Luke xxiii.; John xix.).

We thus learn, as a positive fact, that the crucifixion and burial took place out of the city, and yet nigh to the city; and the statement of the writer to the Hebrews is confirmed by the Jewish

dental remark (Mark xv. 21), that the soldiers seized Simon, as he was 'coming out of the country.' It now appears, then, that Calvary lay at the north-west, and at the outside, of the city. The reader, on perusing the abstract just given of the evangelical narrators, combined with previous remarks, will find reason to think that Calvary was only just on the outer side of the second wall. It is also clear that the place was one around which many persons could assemble, near which wayfarers were passing, and the sufferers in which could be seen or addressed by persons who were both near and remote: all which concurs in showing that the spot was one of some elevation, and equally proves that 'this thing was not done in a corner,' but at a place and under circumstances likely to make Calvary well known and well remembered alike by the foes and the friends of our Lord. Other events which took place immediately after, in connection with the resurrection, would aid (if aid were needed) in fixing the recollection of the spot deep and ineffaceably in the minds of the primitive disciples.

Was it likely that this recollection would perish? Surely of all spots Calvary would become the most sacred, the most endearing, in the primitive church. The spot where Jesus was crucified, died, was buried, and rose again, must have been bound to the heart of every disciple in the strongest and most grateful bonds. Perhaps no one spot on earth had ever so many to remember it and know its precise locality, as the place where Jesus died and rose again. First in Jerusalem, and soon in all parts of the earth, were there hearts that held the recollection among their most valued treasures.

The traditional recollection of this remarkable spot must have been greatly strengthened by the erection of the Temple of Venns on the place, after the capture of Jerusalem by the Romans. The temple thus takes up the tradition and transmits it in stone and marble to coming ages. This continuation of the tradition is the more important, because it begins to operate at a time when the Christians were driven from Jerusalem. But the absence of the Christians from the holy city was not of long duration, and even early in the third century we find pilgrimages from distant places to the Holy Land had already begun, for the express purpose of viewing the spots which the presence and sufferings of the Saviour had rendered sacred and memorable. A century later, Eusebius (A.D. 315) informs us that Christians visited Jerusalem from all regions of the earth for the same object. So early and so decided a current towards the holy city presupposes a strong, wide-spread, and long pre-eminent feeling—an established tradition in the church touching the most remarkable spots; a tradition of that nature which readily links itself with the actual record in Hebrews.

Early in the fourth century Eusebius and Jerome write down the tradition and fix the locality of Calvary in their writings. Pilgrims now streamed to Jerusalem from all parts of the world, and that site was fixed for Golgotha which has remained to the present hour. This was done not merely by the testimony of these two learned fathers, but by the acts of the Emperor Constantine and his mother Helena. This empress, when very far advanced in life, visited Jerusalem for

the express purpose of erecting a church on the spot where the Lord Jesus had been crucified. 'On her arrival at Jerusalem she inquired diligently of the inhabitants. Yet the search was uncertain and difficult, in consequence of the obstructions by which the heathen had sought to render the spot unknown. These being all removed, the sacred sepulchre was discovered, and by its side three crosses, with the tablet bearing the inscription written by Pilate.' On the site thus ascertained was erected, whether by Constantine or Helena, certainly by Roman influence and treasure, a splendid and extensive Christian temple. This church was completed and dedicated A.D. 335. It was a great occasion for the Christian world. In order to give it importance and add to its splendour, a council of bishops was convened, by order of the emperor, from all the provinces of the empire, which assembled first at Tyre, and then at Jerusalem. The church of the holy sepulchre was burnt by the Persians in A.D. 614. It was shortly after rebuilt by Modestus with resources supplied by John Elemer, patriarch of Alexandria. The Basilica or Martyrion erected under Constantine remained as before. The Mohammedans next became masters of Jerusalem. At length Harun er Rashid made over to Charlemagne the jurisdiction of the holy sepulchre. Palestine again became the scene of battles and bloodshed. Muezz, of the race of the Fatimites, transferred the seat of his empire to Cairo, when Jerusalem fell into the hands of new masters, and the holy sepulchre is said to have been again set on fire. It was fully destroyed at the command of the third of the Fatimite kalifs in Egypt, the building being razed to the foundations. In the reign of his successor it was rebuilt, being completed A.D. 1048; but instead of the former magnificent Basilica over the place of Golgotha, a small chapel only now graced the spot. The crusaders soon began. The crusaders regarded the edifices connected with the sepulchre as too contracted, and erected a stately temple, the walls and general form of which are admitted to remain to the present day. So recently, however, as A.D. 1808 the church of the holy sepulchre was partly consumed by fire; but being rebuilt by the Greeks, it now offers no traces of its recent desolation.

We have thus traced down to the present day the history, traditional and recorded, of the buildings erected on Golgotha, and connected these edifices with the original events by which they are rendered memorable. To affirm that the evidence is irresistible may be going too far; but few antiquarian questions rest on an equally solid basis, and few points of history would remain settled were they subject to the same sceptical, not to say unfair, scrutiny which Robinson has here applied.

The sole evidence of any weight in the opposite balance is that urged by Robinson, that the place of the crucifixion and the sepulchre are now found in the midst of the modern city. But to render this argument decisive it should be proved that the city occupies now the same ground that it occupied in the days of Christ. It is, at least, as likely that the city should have undergone changes as that the site of the crucifixion should have been mistaken. The identity of such a spot is more likely to be preserved than the site and relative proportions of a city which has undergone more violent changes than probably any other

place on earth. The present walls of Jerusalem were erected so late as A.D. 1542; and Robinson himself remarks, *en passant*, that a part of Zion is now left out (p. 67). If, then, the city has been contracted on the south, and if, also, it was after the death of Christ expanded on the north, what should we expect but to find Golgotha in the midst of the modern city?

Two or three additional facts in confirmation of the identity of the present place may, finally, be adduced. Buckingham says, 'the present rock called Calvary, and enclosed within the church of the holy sepulchre, bears marks in every part that is naked, of its having been a round nodule of rock standing above the common level of the surface.' Scholz states that he traced the remains of a wall, which ran as the second wall on the plan runs, excluding Golgotha and taking in the pool of Hezekiah. At most, a very few hundred yards only can the original Golgotha have lain from the present site; and the evidence in favour of its identity, if not decisive, is far stronger than any that has been adduced against it.

GOMER. 1. The eldest son of Japhet, son of Noah, whose descendants Bochart supposes to have settled in Phrygia (Gen. x. 3; comp. 1 Chron. i. 5). Most of the interpreters take him to be the ancestor of the Celte, and more especially of the *Cimmerii*, who were already known in the time of Homer. To judge from the ancient historians, they had in early times settled to the north of the Black Sea, and gave their name to the Crimea, the ancient *Chersonesus Taurica*. But the greater part of them were driven from their territories by the Scythians, when they took refuge in Asia Minor, B.C. 7.

In the Scriptures, however, the people named Gomer imply rather an obscure and but vaguely known nation of the barbarous north.

Josephus says expressly, that the ancestor of the Galatians, a Celtic colony, was called Gomer.

2. The name of the daughter of Diblaim, wife of the prophet Hosea (Hosea i. 3).

GOMORRAH, one of 'the cities of the plain,' destroyed along with Sodom. An account of that catastrophe is given under Sodom.

GOPHER WOOD is mentioned only once in Scripture, as the material of which Noah was directed to build the ark (Gen. vi. 14), 'Make thee an ark of gopher wood; rooms shalt thou make in the ark, and shalt pitch it within and without with pitch' (probably 'bitumen'). In endeavouring to ascertain the particular kind of wood which is mentioned in the above passage, we can get assistance only from the name, the country where the wood was supposed to have been procured, or the traditional opinions respecting it. That nothing very satisfactory has been ascertained is evident from the various interpretations that have been given of this word, so that some have preferred, as in our Authorized Version, to retain the original Hebrew. The greatest number of writers have been of opinion that by the gopher wood we are to understand the cypress. Besides an argument attempted to be drawn from the similarity of the name, it is argued that the wood of the cypress, being almost incorruptible, was likely to be preferred; that it was frequently employed in later ages in the construction of temples, bridges, and even ships; and that it was very abundant in the countries

where, according to these authors, the ark is supposed to have been built, that is, in Assyria, where other woods are scarce. But wherever the ark was built, there would be no deficiency of timber if there was a certain degree of moisture with warmth of climate; and we know not what change of climate may have taken place at the Deluge. The pine tribe, including the cypress, appears as likely as any other to have been employed, usually growing as they do in extensive forests, and yielding straight and easily worked timber, calculated, from its resinous nature, effectually to resist moisture, especially if covered with pitch and tar, which might easily have been prepared from the refuse branches and timber, and used as well as the natural bitumen. But the whole of these suggestions amount only to conjectures, and there seems no possibility of arriving at a satisfactory conclusion.

GOSHEN, a province or district of Egypt in which Jacob and his family settled through the instrumentality of his son Joseph, and in which they and their descendants remained for a period of 430 years (Gen. xlv. 10; xlv. 28; xlvii. 27; l. 8; Exod. viii. 22; ix. 26). The Bible does not present any definite information as to the precise locality of Goshen, and of course later authorities possess only an inferior value. There are, however, incidental expressions, allusions, and implications in the Scriptures, which afford aid in determining the spot. That Goshen lay on the eastern side of the Nile may be justifiably inferred from the fact that Jacob is not reported to have crossed that river; nor does it appear that the Israelites did so in their flight out of Egypt. With this inference all the language employed (see the passages as given above), to say the least, agrees, if it does not afford an indirect evidence in its favour. By comparing Exod. xiii. 17 and 1 Chron. vii. 21, it appears that Goshen bordered on Arabia as well as Palestine, and the passage of the Israelites out of Egypt shows that the land was not far removed from the Red Sea. It appears probable that we may fix the locality of Goshen in Lower Egypt, on the east side of the Pelusiac branch of the Nile, in the district around Heropolis.

This district was suitable for a nomadic people, who would have been misplaced in the narrow limits of the valley of the Nile. Children of the desert, or at least used as they were to wander freely from one fertile plain to another with their flocks and herds, the sons of Jacob required a spot where the advantages of an advanced civilization could be united with unrestricted freedom, and abundance be secured without the forfeiture of early and cherished habits. The several opinions entertained on this point substantially agree in referring Goshen to the country intervening between the desert of Arabia and Palestine on the one side, and the Pelusiac arm of the Nile on the other, with the Mediterranean at the base. The district assigned to Jacob and his family was chosen for its superiority (Gen. xlvii. 6), 'In the best of the land make thy father and brethren to dwell, in the land of Goshen let them dwell,' and the subsequent increase of the Israelites themselves, as well as the multiplication of their cattle, shows that the territory was one of extraordinary fertility. Time and circumstances have doubtless had their effect on the fertility of

a country in which the desert is ever ready to make encroachments as soon as the repelling hand of man is relaxed or withdrawn. But La-borde represents the vicinity of Heliopolis as still covered with palm-trees, and as having an enclosure, comprehending a considerable space of ground, which is covered every year by the inundation of the Nile to the height of five feet. We are not, however, to expect evidences of luxuriant fertility. The country was chosen for its pre-eminent fitness for shepherds. If a nomadic tribe had wide space and good pasture-grounds, they would have 'the best (for themselves) of the land,' and these advantages the district in which we have placed Goshen abundantly supplied in ancient times, when the waters of the Nile were more liberally dispensed than at present to the eastern side of the country. Nothing is needed but water to make the desert fertile. 'The water of the Nile soaks through the earth for some distance under the sandy tract (the neighbourhood of Heliopolis), and is everywhere found on digging wells eighteen or twenty feet deep. Such wells are very frequent in parts which the inundation does not reach. The water is raised from them by wheels turned by oxen and applied to the irrigation of the fields. Whenever this takes place the desert is turned into a fruitful field. In passing to Heliopolis we saw several such fields in the different stages of being reclaimed from the desert; some just laid out, others already fertile. In returning by another way more eastward, we passed a succession of beautiful plantations wholly dependent on this mode of irrigation' (Robinson's *Palestine*, vol. i. p. 36).

GOSPEL. The Greek word, which literally signifies *glad tidings*, is translated in the English Version by the word *Gospel*, viz., *God's spell*, or *the Word of God*. The central point of Christian preaching was the joyful intelligence that the Saviour had come into the world (Matt. iv. 23; Rom. x. 15); and the first Christian preachers, who characterized their account of the person and mission of Christ by the term *Gospel*. This name was also prefixed to the written accounts of Christ. We possess four such accounts; the first by Matthew, announcing the Redeemer as the promised King of the Kingdom of God; the second by Mark, declaring him 'a Prophet mighty in deed and word' (Luke xxiv. 19); the third by Luke, of whom it might be said that he represented Christ in the special character of the Saviour of sinners (Luke vii. 36, sq.; xv. 18-9, sq.); the fourth by John, who represents Christ as the son of God, in whom deity and humanity became one. The ancient church gave to Matthew the symbol of the lion, to Mark that of man, to Luke that of the ox, and to John that of the eagle; these were the four faces of the cherubim. The cloud in which the Lord revealed himself was borne by the cherubim, and the four Evangelists were also the bearers of that glory of God which appeared in the form of man.

Concerning the order which they occupy in the Scriptures, the oldest Latin and Gothic Versions place Matthew and John first, and after them Mark and Luke, while the other MSS. and the old versions follow the order given to them in our Bibles. As dogmatical reasons render a different order more natural, there is much in favour of

the opinion that their usual position arose from regard to the chronological dates of the respective composition of the four gospels: this is the opinion of Origen, Irenæus, and Eusebius. All ancient testimonies agree that Matthew was the earliest, and John the latest: Evangelist. The relation of the Gospel of John to the other three Gospels, and the relation of the Gospels of Matthew, Mark, and Luke to each other, is very remarkable. With the exception of the history of the Baptist, and that of Christ's passion and resurrection, we find in John not only narratives of quite different events, but also different statements even in the above sections. On the other hand, the first three Evangelists not only tolerably harmonize in the substance and order of the events they relate, but correspond even sentence by sentence in their separate narratives (comp. *ex. gr.* Mark i. 21-28 with Luke iv. 31-37; Matt. viii. 31-34; Mark vi. 34; v. 17; Luke viii. 32-37, etc.). The thought that first suggests itself on considering this surprising harmony is, that they all had mutually drawn their information from one another. Some critics are of opinion that Matthew was the oldest source, and that Mark drew his information both from Matthew and Luke; again, according to others, Luke was the oldest, and Matthew made use of Luke and Mark; while most critics in Germany have adopted the view that Matthew was the oldest, and was made use of by Luke, and that Mark derived his information both from Matthew and Luke. Some of the most modern critics are, on the other hand, of opinion that Mark was the original evangelist, and that Matthew and Luke derived their information from him. The difference of these opinions leads to the suspicion that none of them are right, more especially when we consider that, notwithstanding the partial harmony of the three evangelists in the choice of their sentences, there is still a surprising difference in them as regards the words of those sentences; a fact which compelled the critics who suppose that the evangelists made use of each other's writings, to account everywhere for such deviations, and frequently to have recourse to the most trivial and pedantic arguments. To us these differences in word and phrase would appear inconceivable were we disposed to assume that the evangelists had copied one another.

As the three Evangelists mutually supply and explain each other, they were early joined to each other, by Tatian, about A.D. 170, and by Ammonius, about A.D. 230,* and the discrepancies among them early led to attempts to reconcile them.† And with this view various elaborate treatises have been composed, both in ancient and modern times. But when we consider that one and the same writer, namely, Luke, relates the conversion of Paul (Acts ix. 22, 26), with different incidental circumstances, after three various documents, though it would have been very easy for him to have annulled the discrepancies, we cannot help being convinced that the Evangelists attached but little weight to minute preciseness in the incidents, since, indeed, the historical truth of a narration consists less in them, in the relation of minute details, than in

* Such putting together is called *synopsis*.

† Harmonies.

the correct conception of the *character* and *spirit* of the event.

GOURD. The word thus rendered (*kikayon*) occurs only in *Jonah* iv., where it is several times mentioned, as in ver. 6, 7, 9, 10. In the margin of the English Bible, *Palm-Christ* is given. In the Vulgate it is translated 'ivy.' Neither the gourd nor ivy is considered by modern writers to indicate the plant intended; which is remarkable for having given rise to some fierce controversies in the early ages of the Church. The difficulties here, however, do not appear to be so great as in many other instances. But before considering these, it is desirable to ascertain what are the characteristics of the plant as required by the text. We are told, 'The Lord God prepared a gourd (*kikayon*), and made it to come over *Jonah*, that it might be a shadow over his head' (ver. 6). 'But God prepared a worm when the morning rose the next day, and it smote the gourd that it withered' (ver. 7). And in ver. 10 it is said of the gourd that it 'came up in a night, and perished in a night.' Hence it appears that the growth of the *kikayon* was miraculous, but that it was probably a plant of the country, being named specifically; also that it was capable of affording shade, and might be easily destroyed. There does not appear anything in this account to warrant us in considering it to be the ivy, which is a plant of slow growth, cannot support itself, and is, moreover, not likely to be found in the hot and arid country of ancient Nineveh, though we have ourselves found it in more southern latitudes, but only in the temperate climate of the Himalayan Mountains. 'The Christians and Jews of Mosul (Nineveh) say it was not the *heroa* whose shadow refreshed *Jonah*, but a sort of gourd, *el-hera*, which has very large leaves, very large fruit, and lasts but about four months'

203. [*Ricinus communis*.]

(Niebuhr, *Arabia*, as quoted by Dr. Harris). So Volney: 'Whoever has travelled to Cairo or

Rosetta knows that the species of gourd called *hera* will, in twenty-four hours, send out shoots near four inches long' (*Trav.* i. 71).

The Hebrew name *kikayon* is so similar to the *kiki* of Dioscorides, that it was early thought to indicate the same plant. The *kiki* or *croton* corresponds with the castor-oil plant, of which the seeds have some resemblance to the insect commonly called *tick* in English, and which is found on dogs and other animals. It has also been called *Penta-dactylus* and *Palma Christi*, from the palmate division of its leaves. It was known at much earlier times, as Hippocrates employed it in medicine; and Herodotus mentions, when speaking of Egypt:—'The inhabitants of the marshy grounds make use of an oil which they term *kiki*, expressed from the Silicyprian plant.' That it has been known there from the earliest times is evident from Cailliaud having found castor-oil seeds in some very ancient sarcophagi. This oil was not only employed by the Greeks, but also by the Jews, being the *kik*-oil of the Talmudists, prepared from the seeds of the *ricinus*. Lady Calcott states that the modern Jews of London use this oil, by the name of oil of *kik*, for their Sabbath lamps, it being one of the five kinds of oil which their traditions allow them to employ.

Having ascertained that the *kiki* of the Greeks is what is now called *Ricinus communis*, or castor-oil plant, we shall find that its characters correspond with everything that is required, except the rapidity of growth, which must be granted was miraculous. Dr. Harris indeed states that the passage means, 'Son of the night it was, and as a son of the night it died'; and that, therefore, we are not compelled to believe that it grew in a single night, but rather, by a strong Oriental figure, that it was of rapid growth. This, there is no doubt, it is highly susceptible of in warm countries where there is some moisture. It attains a considerable size in one season; and though in Europe it is only known as a herb, in India it frequently may be seen, especially at the margins of fields, the size of a tree. So at Busra Niebuhr saw an *el-heroa* which had the form and appearance of a tree. The stems are erect, round, and hollow; the leaves broad, palmate, 5 to 8 or 10 lobed, peltate, supported on long foot-stalks. From the erect habit, and the breadth of its foliage, this plant throws an ample shade, especially when young. From the softness and little substance of its stem, it may easily be destroyed by insects, which Rumphius describes as sometimes being the case. It would then necessarily dry up rapidly. As it is well suited to the country, and to the purpose indicated in the text, and as its name *kiki* is so similar to *kikayon*, it is doubtless the plant which the sacred penman had in view.

GOZAN, a river of Media, to the country watered by which Tiglathpileser first, and afterwards Shalmaneser, transported the captive Israelites (1 Chron. v. 26; 2 Kings xvii. 6). It is now almost universally admitted that the Gozan is no other than the present Ozan, or, with the prefix, Kizzil-Ozan (Golden River), which is the principal river of that part of Persia that answers to the ancient Media. This river rises eight or nine miles south-west of Sennah, in Kurdistan. It runs along the north-west frontier of Irak, and passes under the Kafulan Koh, or

Mountain of Tigris, where it is met by the Karanku. These two rivers combined force a passage through the great range of Caucasian, and, during their course, form a junction with the Sharood. The collective waters, under the designation of Sifeed Rood or White River, so named from the foam occasioned by the rapidity of its current, flow in a meandering course through Ghilan to the Caspian Sea.

GRAPE. [VINE.]

GRASS. The original word which is thus translated in 1 Kings xviii. 5, 2 Kings xix. 26, Job xl. 15, Ps. xxxvii. 2, &c.; is rendered *herb* in Job. viii. 12; *hay*, in Prov. xxvii. 25, and Isa. xv. 6; and *court*, in Isa. xxxiv. 13: but in Num. xi. 5, it is translated *leeks*. Hebrew scholars state that the word signifies 'greens' or 'grass' in general; and it is no doubt clear, from the context of most of the above passages, that this must be its meaning. There is therefore no reason why it should not be so translated in all the passages where it occurs, except in the last. It is evidently incorrect to translate it *hay*, as in the above passages of Proverbs and Isaiah, because the people of Eastern countries, as it has been observed, do not make hay.

In Num. xi. 5, the word is rendered *leeks*, and the name is supposed to have been applied to them from the resemblance of their leaves to grass, and from their being conspicuous for their green colour. It is probable, however, as suggested by Hengstenberg, that the vegetable really meant is a kind of grass called the fenn-grec, an annual plant known in Egypt under the name of Helbeh. It very much resembles clover, except that it has more pointed leaves and whitish blossoms, and is eaten by the common people in Egypt with special relish. 'Although,' says Sonnini, 'horses, oxen, and the buffaloes eat this helbeh with equal relish, it appears not to be destined equally for the sustenance of animals. The Egyptians themselves eat the fenn-grec so much, that it can properly be called the food of men. In the month of November they cry 'Green helbeh for sale' in the streets of the towns. It is tied up in large bunches which the inhabitants eagerly purchase at a low price, and which they eat with incredible greediness, without any species of seasoning. They pretend that this singular diet is an excellent stomachic or specific against worms and dysentery; in fine, a preservative against a great number of maladies. After so many excellent properties, real or supposed, it is not astonishing that the Egyptians hold this 'grass' in so great estimation, that, according to one of their proverbs, 'Fortunate are the feet which tread the earth on which grows the helbeh.'

GRASSHOPPER. The creature denoted by this Hebrew word so evidently belongs to the class of 'flying creeping things' (Lev. xi. 21, 22), that the grasshopper, according to the common acceptance of the word, can scarcely be the proper translation. Other reasons render it most probable that a species of locust is intended. It is, therefore, referred to the general English word [Locust].

GRAVE. [BURIAL.]

GREECE. The relations of the Hebrews with the Greeks were always of a distant kind, until the Macedonian conquest of the East: hence

in the Old Testament the mention of the Greeks is naturally rare.

The few dealings of the Greeks with the Hebrews seem to have been rather unfriendly, to judge by the notice in Zech. ix. 13. In Joel iii. 6, the Tyrians are reproached for selling the children of Judah and Jerusalem to the Grecians: but at what time, and in what circumstances, must depend on the date assigned to the book of Joel (see JOEL). With the Greeks of Cyprus or Chittim, the Hebrews were naturally better acquainted; and this name, it would seem, might easily have extended itself in their tongue to denote the whole Greek nation. Such at least is the most plausible explanation of its use in 1 Macc. i. 1, and viii. 1.

The Greeks were eminent for their appreciation of beauty in all its varieties: indeed their religious creed owed its shape mainly to this peculiarity of their mind; for their logical acuteness was not exercised on such subjects until quite a later period. The puerile or indecent fables of the old mythology may seem to a modern reader to have been the very soul of their religion; but to the Greek himself these were a mere accident, or a vehicle for some embodiment of beauty. He thought little whether a legend concerning Artemis or Apollo was true, but much whether the dance and music celebrating the divinity were solemn, beautiful, and touching. The worship of Apollo, the god of youth and beauty, has been regarded as characterizing the Hellenic in contrast with the older Pelasgian times; nor is the fact without significance, that the ancient temple and oracle of Jupiter at Dodona fell afterwards into the shade in comparison with that of Apollo at Delphi. Indeed the Dorian Spartans and the Ionian Athenians alike regarded Apollo as their tutelary god. Whatever the other varieties of Greek religious ceremonies, no violent or frenzied exhibitions arose out of the national mind; but all such *orgies* (as they were called) were imported from the East, and had much difficulty in establishing themselves on Greek soil. Quite at a late period the managers of orgies were evidently regarded as mere jugglers of not a very reputable kind; nor do the Greek States, as such, appear to have patronized them. On the contrary, the solemn religious processions, the sacred games and dances, formed a serious item in the public expenditure; and to be permanently exiled from such spectacles would have been a moral death to the Greeks. Wherever they settled they introduced their native institutions, and varied temples, gymnasia, baths, porticoes, sepulchres, of characteristic simple elegance. The morality and the religion of such a people naturally were alike superficial; nor did the two stand in any close union. Bloody and cruel rites could find no place in their creed, because faith was not earnest enough to endure much self-abandonment. Religion was with them a sentiment and a taste rather than a deep-seated conviction. On the loss of beloved relatives they felt a tender and natural sorrow, but unclouded with a shade of anxiety concerning a future life. Through the whole of their later history, during Christian times, it is evident that they had little power of remorse, and little natural firmness of conscientious principle: and, in fact, at an earlier and critical time, when the intellect of the nation was ripening, an

atrocious civil war, that lasted for twenty-seven years, inflicted a political and social demoralization, from the effects of which they could never recover. Besides this, their very admiration of beauty, coupled with the degraded state of the female intellect, proved a frightful source of corruption, such as no philosophy could have adequately checked. From such a nation then, whatever its intellectual pretensions, no healthful influence over its neighbours could flow, until other and higher inspiration was infused into its sentiment.

Among the Greeks the arts of war and peace were carried to greater perfection than among any earlier people. In navigation they were little behind the Tyrians and Carthaginians; in political foresight they equalled them; in military science, both by sea and land, they were decidedly their superiors; while in the power of reconciling subject-foreigners to the conquerors and to their institutions, they perhaps surpassed all nations of the world. Their copious, cultivated, and flexible tongue carried with it no small mental education to all who learned it thoroughly; and so sagacious were the arrangements of the great Alexander throughout his rapidly acquired Asiatic empire, that in the twenty years of dreadful war between his generals which followed his death, no rising of the natives against Greek influence appears to have been thought of. Without any change of population adequate under other circumstances to effect it, the Greek tongue and Greek feeling spread far and sank deep through the Macedonian dominions. Half of Asia Minor became a new Greece; and the cities of Syria, North Palestine, and Egypt, were deeply imbued with the same influence. Yet the purity of the Hellenic stream varied in various places; and some account of the mixture it underwent will be given in the Article HELLENISTS.

When a beginning had been made of preaching Christianity to the Gentiles, Greece immediately became a principal sphere for missionary exertion. The vernacular tongue of the Hellenistic Christians was understood over so large an extent of country, as almost of itself to point out in what direction they should exert themselves. The Grecian cities, whether in Europe or Asia, were the peculiar field for the Apostle Paul; for whose labours a superintending Providence had long before been providing, in the large number of devout Greeks who attended the Jewish synagogues. Greece Proper was divided by the Romans into two provinces, of which the northern was called Macedonia, and the southern Achaia (as in 2 Cor. ix. 2, &c.); and we learn incidentally from Acts xviii. that the proconsul of the latter resided at Corinth. To determine the exact division between the provinces is difficult; nor is the question of any importance to a Biblical student. Achaia, however, had probably very nearly the same frontier as the kingdom of modern Greece, which is limited by a line reaching from the gulf of Volo to that of Arta, in great part along the chain of Mount Othrys. Of the cities celebrated in Greek history, none are prominent in the early Christian times except Corinth, Laconia, and its chief town Sparta, had ceased to be of any importance: Athens was never eminent as a Christian church. In Macedonia were the

two great cities of Philippi and Thessalonica (formerly called Therme); yet of these the former was rather recent, being founded by Philip the Great; the latter was not distinguished above the other Grecian cities on the same coast. Nicopolis, on the gulf of Ambracia (or Arta), had been built by Augustus, in memory of his victory at Actium, and was, perhaps, the limit of Achaia on the western coast. It had risen into some importance in St. Paul's days, and, as many suppose, it is to this Nicopolis that he alludes in his epistle to Titus. (See further under ACHAEA and NICOPOLIS.)

GRINDING. [MILL.]

GUEST. [HOSPITALITY.]

H.

HAB'AKKUK (*embrace*), one of the most distinguished Jewish prophets, who flourished about 610 B.C., the name denoting as well a 'favourite' as a 'struggler.' Of this prophet's birth-place, parentage, and life we have only apocryphal and conflicting accounts. The Pseudo-Epiphanius states that he was of the tribe of Simeon, and born in a place called Bedzoker; that he fled to Ostratine when Nebuchadnezzar attacked Jerusalem, but afterwards returned home, and died two years before the return of his countrymen. But rabbinical writers assert that he was of the tribe of Levi, and name different birth-places. Eusebius notices that in his time the tomb of Habakkuk was shown in the town of Ceila, in Palestine; still there are other writers who name different places where, according to common opinion, he had been buried.

A full and trustworthy account of the life of Habakkuk would explain his imagery, and many of the events to which he alludes; but since we have no information on which we can depend, nothing remains but to determine from the book itself its historical basis and its age. Now, we find that in chap. i. the prophet sets forth a vision, in which he discerned the injustice, violence, and oppression committed in his country by the rapacious and terrible Chaldeans, whose oppressions he announces as a divine retribution for sins committed; consequently he wrote in the Chaldean period, shortly before the invasion of Nebuchadnezzar which rendered Jehoiakim tributary to the king of Babylon (2 Kings xxiv. 1). When he wrote the first chapter of his prophecies, the Chaldeans could not yet have invaded Palestine, otherwise he would not have introduced Jehovah saying (i. 5), 'I will work a work in your days, which ye will not believe, though it be told you;' (ver. 6) 'for I raise up the Chaldeans, that bitter and hasty nation, which shall march through the breadth of the land to possess the dwelling-places that are not theirs.' From ver. 12 it is also evident that the ruin of the Jews had not then been effected; it says, 'the Lord ordained them for judgment, established them for correction.' Agreeably to the general style of the prophets, who to lamentations and announcements of divine punishment add consolations and cheering hopes for the future, Habakkuk then proceeds in the second chapter to foretell the future humiliation of the conquerors who plundered so many nations. He also there promulgates a vision of events

shortly to be expected; (ver. 3) 'the vision is yet for an appointed time, but at the end it shall speak, and not lie; though it tarry, wait for it, because it will surely come; it will not tarry.' This is succeeded in the third chapter by an ode, in which the prophet celebrates the deliverances wrought by the Almighty for his people in times past, and prays for a similar interference now to mitigate the coming distresses of the nation; which he goes on to describe, representing the land as already waste and desolate, and yet giving encouragement to hope for a return of better times. Some interpreters are of opinion that ch. ii. was written in the reign of Jehoiaquin, the son of Jehoiakim (2 Kings xxiv. 6), after Jerusalem had been besieged and conquered by Nebuchadnezzar, the king made a prisoner, and, with many thousands of his subjects, carried away to Babylon; none remaining in Jerusalem, save the poorest class of the people (2 Kings xxiv. 14). But of all this nothing is said in the book of Habakkuk, nor even so much as hinted at; and what is stated of the violence and injustice of the Chaldeans does not imply that the Jews had already experienced it. The prophet distinctly mentions that he sets forth what he had discerned in a vision, and he, therefore, speaks of events to be expected and coming. It is also a supposition equally gratuitous, according to which some interpreters refer ch. iii. to the period of the last siege of Jerusalem, when Zedekiah was taken, his sons slain, his eyes put out, the walls of the city broken down, and the temple burnt (2 Kings xxv. 1-10). There is not the slightest allusion to any of these incidents in the third chapter of Habakkuk; and from the 16th verse it appears, that the destroyer is only coming, and that the prophet expresses fears, not of the entire destruction of the city, much less of the downfall of the state, but only of the desolation of the country. It thus appears beyond dispute, that Habakkuk prophesied in the beginning of the reign of Jehoiakim, about the year stated above. Carpoz and Jahn refer our prophet to the reign of Manasseh, thus placing him thirty odd years earlier; but at that time the Chaldeans had not as yet given just ground for apprehension, and it would have been injudicious in Habakkuk prematurely to fill the minds of the people with fear of them. Some additional support to our statement of the age of this book is derived from the tradition, reported in the apocryphal appendix to Daniel and by the Pseudo-Epiphanius, that Habakkuk lived to see the Babylonian exile; for if he prophesied under Manasseh he could not have reached the exile at an age under 90 years; but if he held forth early in the reign of Jehoiakim he would have been only 50 odd years old at the time of the destruction of Jerusalem and of the exile. He was, then, a contemporary of Jeremiah, but much younger, as the latter made his first appearance in public as early as B.C. 629, in the thirteenth year of Josiah.

The style of this prophet has been always much admired. He equals the most eminent prophets of the Old Testament—Joel, Amos, Nahum, Isaiah; and the ode in ch. iii. may be placed in competition with Ps. xviii. and lxxviii. for originality and sublimity. His figures are all great, happily chosen, and properly drawn out. His denunciations are terrible, his derision bitter, his

consolation cheering. Instances occur of borrowed ideas (ch. iii. 19, comp. Ps. xviii. 34; ch. ii. 6, comp. Isa. xiv. 7; ch. ii. 14, comp. Isa. xi. 9); but he makes them his own in drawing them out in his peculiar manner. With all the boldness and fervour of his imagination, his language is pure and his verse melodious. The ancient catalogues of canonical books of the Old Testament do not mention Habakkuk by name; but they must have counted him in the twelve minor prophets, whose number would otherwise not be full. In the New Testament some expressions of his are introduced, but his name is not added (Rom. i. 17; Gal. iii. 11; Heb. x. 38, comp. Hab. ii. 4; Acts xiii. 40, 41, comp. Hab. i. 5).

HABERGEON. [ARMS; ARMOUR.]

HA'BOR, or rather CHABOR, a city or country of Media, to which portions of the ten tribes were transported, first by Tiglathpileser, and afterwards by Shalmaneser (2 Kings xvii. 6; xviii. 11). It is thought by some to be the same mountainous region between Media and Assyria which Ptolemy calls Chaboras. This notion has the name, and nothing but the name, in its favour. Habor was by the river Gozan; and as we have accepted Major Rennell's conclusion, that Gozan was the present Kizil-Ozan [GOZAN], we are bound to follow him in fixing the position of Habor at the town of Abbar, which is situated on a branch of that river, and has the reputation of being very ancient. At this place Mr. Morier found ruins composed of large sun-dried bricks compacted with straw, like some of those found at Babylon. As this kind of construction is an infallible sign of remote antiquity, it so far affords a most important corroboration of Major Rennell's conjecture.

HA'DAD (*sharp*) is equivalent to Adad, the name of the chief deity of the Syrians [ADAD], and borne, with or without additions, as a proper name, or more probably as a title, like 'Pharaoh' in Egypt, by several of the kings of Southern Syria.

1. HADAD, king of Edom, who defeated the Midianites in the intervening territory of Moab (Gen. xxxvi. 35; 1 Chron. i. 46). This is the only one of the ancient kings of Edom whose exploits are recorded by Moses. Another king of Edom of the same name is mentioned in 1 Chron. i. 51.

2. HADAD, king of Syria, who reigned in Damascus at the time that David attacked and defeated Hadadezer, king of Zobah, whom he marched to assist, and shared in his defeat. This fact is recorded in 2 Sam. viii. 5, but the name of the king is not given. It is supplied, however, by Josephus, who reports after Nicolas of Damascus, that he carried succours to Hadadezer as far as the Euphrates, where David defeated them both.

3. HADAD, a young prince of the royal race of Edom, who, when his country was conquered by David, contrived, in the heat of the massacre committed by Joab, to escape with some of his father's servants, or rather was carried off by them into the land of Midian. Thence Hadad went into the desert of Paran, and eventually proceeded to Egypt. He was there most favourably received by the king, who assigned him an estate and establishment suited to his rank, and even gave him in marriage the sister of his own consort, by whom he had a son, who was brought up in the palace

with the sons of Pharaoh. Hadad remained in Egypt till after the death of David and Joab, when he returned to his own country in the hope of recovering his father's throne (1 Kings xi. 14-22). The Scripture does not record the result of this attempt further than by mentioning him as one of the troubleshooters of Solomon's reign, which implies some measure of success.

HADADEZER (*Hadad-helped*), or HADADREZER, king of Zobah, a powerful monarch in the time of David, and the only one who seems to have been in a condition seriously to dispute with him the predominancy in south-western Asia. He was defeated by the Israelites in the first campaign (B.C. 1032) in the neighbourhood of the Euphrates, with a great loss of men, war-chariots, and horses, and was despoiled of many of his towns (2 Sam. viii. 3; 1 Chron. xviii. 3). This check not only impaired, but destroyed his power. A diversion highly serviceable to him was made by a king of Damascus-Syria (whom the Scripture does not name, but who is the same with Hadad 3), who, coming to his succour, compelled David to turn his arms against him, and abstain from reaping all the fruits of his victory (2 Sam. x. 6, sq.; 1 Chron. xix. 6, sq.). The breathing-time thus afforded Hadadezer was turned by him to such good account that he was able to accept the subsidies of Hanun, king of the Ammonites, and to take a leading part in the confederacy formed by that monarch against David. The first army brought into the field was beaten and put to flight by Abishai and Joab; but Hadadezer, not yet discouraged, went into the countries east of the Euphrates, and got together the forces of all his allies and tributaries, which he placed under the command of Shophach, his general. To confront so formidable an adversary, David took the field in person, and in one great victory so completely broke the power of Hadadezer, that all the small tributary princes seized the opportunity of throwing off his yoke, of abandoning the Ammonites to their fate, and of submitting quietly to David, whose power was thus extended to the Euphrates.

HADES, a Greek word, which occurs frequently in the New Testament, where it is usually rendered 'hell' in the English version. The word *hades* means literally *that which is in darkness*. In the classical writers it is used to denote *Orcus*, or the infernal regions. According to the notions of the Jews, *sheol* or *hades* was a vast receptacle where the souls of the dead existed in a separate state until the resurrection of their bodies. The region of the blessed during this interval, or the inferior paradise, they supposed to be in the upper part of this receptacle; while beneath was the abyss or *gehenna* (Tartarus), in which the souls of the wicked were subjected to punishment.

The question whether this is or is not the doctrine of the Scriptures is one of much importance, and has, first and last, excited no small amount of discussion. It is a doctrine received by a large portion of the nominal Christian church; and it forms the foundation of the Roman Catholic doctrine of Purgatory, for which there would be no ground but for this interpretation of the word *hades*.

The question therefore rests entirely upon the interpretation of this word, and as the Septuagint

gives this as the meaning of the Hebrew word *sheol*, the real question is, what is the meaning which *sheol* bears in the Old Testament, and *hades* in the New? A careful examination of the passages in which these words occur will probably lead to the conclusion, that they afford no real sanction to the notion of an intermediate place of the kind indicated, but are used by the inspired writers to denote *the grave*—the resting-place of the bodies both of the righteous and the wicked; and that they are also used to signify *hell*, the abode of miserable spirits. But it would be difficult to produce any instance in which they can be shown to signify the abode of the spirits of just men made perfect, either before or after the resurrection.

In the great majority of instances *sheol* is in the Old Testament used to signify *the grave*, and in most of these cases is so translated in the Authorized Version. It can have no other meaning in such texts as Gen. xxxvii. 35; xlii. 38; 1 Sam. ii. 6; 1 Kings ii. 6; Job xiv. 13; xvii. 13, 16; and in numerous other passages in the writings of David, Solomon, and the prophets. But as the grave is regarded by most persons, and was more especially so by the ancients, with awe and dread, as being the region of gloom and darkness, so the word denoting it soon came to be applied to that more dark and gloomy world which was to be the abiding place of the miserable. Where our translators supposed the word to have this sense, they rendered it by 'hell.' Some of the passages in which this has been done may be doubtful; but there are others of which a question can scarcely be entertained. Such are those (as Job xi. 8; Ps. cxxxix. 8; Amos ix. 2) in which the word denotes the opposite of heaven, which cannot be the grave, nor the general state or region of the dead, but hell. Still more decisive are such passages as Ps. ix. 17; Prov. xxiii. 14; in which *sheol* cannot mean any place, in this world or the next, to which the righteous as well as the wicked are sent, but the penal abode of the wicked as distinguished from and opposed to the righteous. The only case in which such passages could by any possibility be supposed to mean the grave, would be if the grave—that is, extinction—were the final doom of the unrighteous.

In the New Testament the word *hades* is used in much the same sense as *sheol* in the Old, except that in a less proportion of cases can it be construed to signify 'the grave.' There are still, however, instances in which it is used in this sense, as in Acts ii. 31; 1 Cor. xv. 55; but in general the *hades* of the New Testament appears to be no other than the world of future punishments (e.g. Matt. xi. 23; xvi. 18; Luke xvi. 23).

The principal arguments for the intermediate *hades*, as deduced from Scripture, are founded on those passages in which things 'under the earth' are described as rendering homage to God and the Saviour (Philip. ii. 10; Rev. v. 13, &c.). If such passages, however, be compared with others (as with Rom. xiv. 10, 11, &c.), it will appear that they must refer to the day of judgment, in which every creature will render some sort of homage to the Saviour; but *then* the bodies of the saints will have been already raised, and the intermediate region, if there be any, will have been deserted.

One of the seemingly strongest arguments for

the opinion under consideration is founded on 1 Pet. iii. 19, in which Christ is said to have gone and 'preached to the spirits in prison.' These spirits in prison are supposed to be the holy dead—perhaps the virtuous heathen—imprisoned in the intermediate place, into which the soul of the Saviour went at death, that he might preach to them the Gospel. This passage must be allowed to present great difficulties. The most intelligible meaning suggested by the context is, however, that Christ by his spirit preached to those who in the time of Noah, while the ark was preparing, were disobedient, and whose spirits are *now* in prison, abiding the general judgment. The prison is doubtless *hades*, but what *hades* is must be determined by other passages of Scripture; and, whether it is the grave or hell, it is still a prison for those who yet await the judgment-day. This interpretation is in unison with other passages of Scripture, whereas the other is conjecturally deduced from this single text.

Another argument is deduced from Rev. xx. 14, which describes 'death and *hades*' as 'cast into the lake of fire' at the close of the general judgment—meaning, according to the advocates of the doctrine in question, that *hades* should then cease as an intermediate place. But this is also true if understood of the grave, or of the general intermediate condition of the dead, or even of hell, as once more and for ever reclaiming what it had temporarily yielded up for judgment—just as we every day see criminals brought from prison to judgment, and after judgment returned to the prison from which they came.

It is further urged, in proof of Hades being an intermediate place other than the grave, that the Scriptures represent the happiness of the righteous as incomplete till after the resurrection. This must be admitted; but it does not thence follow that their souls are previously imprisoned in the earth, or in any other place or region corresponding to the Tartarus of the heathen. Although at the moment of death the disembodied spirits of the redeemed ascend to heaven, and continue there till the resurrection, it is very possible that their happiness shall be incomplete until they have received their glorified bodies from the tomb, and entered upon the full rewards of eternity.

A view supported by so little force of Scripture, seems unequal to resist the contrary evidence which may be produced from the same source, and which it remains briefly to indicate. The effect of this is to show that the souls of the redeemed are described as proceeding, after death, at once to heaven—the place of final happiness, and those of the unredeemed to the place of final wretchedness.

In Heb. vi. 12, the righteous dead are described as being in actual inheritance of the promises made to the fathers. Our Saviour represents the deceased saints as already, before the resurrection (for so the context requires), 'like unto the angels,' and 'equal to the angels' (Matt. xxii. 30; Luke xx. 36); which is not very compatible with their imprisonment even in the happier region of the supposed Hades. Our Lord's declaration to the dying thief—'This day shalt thou be with me in Paradise' (Luke xxiii. 43), has been urged on both sides of the argument; but the word is here not Hades, but Paradise, and

no instance can be produced in which the paradise beyond the grave means anything else than that 'third heaven,' that 'paradise' into which the Apostle was caught up, and where he heard 'unutterable things' (2 Cor. xii. 2, 4). In the midst of that paradise grows the mystic 'tree of life' (Rev. ii. 7), which the same writer represents as growing near the throne of God and the Lamb (xxii. 2). In Eph. iii. 15, the Apostle describes the whole church of God as being at present in heaven or on earth. But, according to the view under consideration, the great body of the church would be neither in heaven nor on earth, but in Hades—the intermediate place. In Heb. xii. 21-24, we are told that in the city of the living God dwell not only God himself, the judge of all, and Jesus, the mediator of the new covenant, and the innumerable company of angels, but also 'the spirits of just men made perfect'—all dwelling together in the same holy and happy place. To the same effect, but, if possible, still more conclusive, are the various passages in which the souls of the saints are described as being, when absent from the body, present with Christ in heaven (comp. 2 Cor. v. 1-8; Philip. i. 23; 1 Thess. v. 10). To this it is scarcely necessary to add the various passages in the Apocalyptic vision, in which St. John beheld, as inhabitants of the highest heaven, around the throne of God, myriads of redeemed souls, even before the resurrection (Rev. v. 9; vi. 9; vii. 9; xiv. 1, 3). Now the 'heaven' of these passages cannot be the place to which the term Hades is ever applied, for that word is never associated with any circumstances or images of enjoyment or happiness [HEAVEN].

As these arguments seem calculated to disprove the existence of the more favoured region of the alleged intermediate place, a similar course of evidence militates with equal force against the existence of the more penal region of the same place. It is admitted by the staunchest advocates for the doctrine of an intermediate place, that the souls of the wicked, when they leave the body, go immediately into punishment. Now the Scripture knows no place of punishment after death but that which was prepared for the devil and his angels. This place they *now* inhabit; and this is the place to which, after judgment, the souls of the condemned will be consigned (comp. 2 Pet. ii. 4; Matt. xxv. 41). This verse of Peter is the only one in Scripture in which any reference to the word Tartarus occurs: here then, if anywhere, we should find that intermediate place corresponding to the Tartarus of the heathen, from whom the word is borrowed. But from the other text we can be quite certain that the Tartarus of Peter is no other than the hell which is to be the final, as it is, in degree, the present doom of the wicked. That this hell is Hades is readily admitted, for the course of the argument has been to show that Hades is hell, whenever it is not the grave. Dr. Enoch Pond, whose interesting article on the subject, in the *American Biblical Repository*, we have chiefly followed, well remarks: 'Whether the righteous and the wicked, after the judgment, will go literally to the same places in which they were before situated, it is not material to inquire. But, both before and after the judgment, the righteous will be in the same place with their glorified Saviour

and his holy angels; and this will be heaven: and before and after the judgment the wicked will be in the same place with the devil and his angels; and this will be hell.

HA'GAR (*a stranger*), a native of Egypt, and servant of Abraham; but how or when she became an inmate of his family we are not informed. Whatever were her origin and previous history, her servile condition in the family of Abraham must have prevented her from being ever known beyond the limits of her humble sphere, had not her name, by a spontaneous act of her mistress, become indissolubly linked with the patriarch's history. The long continued sterility of Sarah suggested to her the idea (not uncommon in the East) of becoming a mother by proxy through her handmaid, whom, with that view, she gave to Abraham as a secondary wife [ABRAHAM: ADOPTION: CONCUBINE].

The honour of such an alliance and elevation was too great and unexpected for the weak and ill-regulated mind of Hagar; and no sooner did she find herself in a delicate situation, which made her, in the prospect of becoming a mother, an object of increasing interest and importance to Abraham, than she openly indulged in triumph over her less favoured mistress, and showed by her altered behaviour a growing habit of disrespect and insolence. The feelings of Sarah were severely wounded, and she broke out to her husband in loud complaints of the servant's petulance; and Abraham, whose meek and prudent behaviour is strikingly contrasted with the violence of his wife, leaves her with unfettered power, as mistress of his household, to take what steps she pleases to obtain the required redress.

Hagar, though taken into the relation of concubine to Abraham, continued still, being a dotal maid-servant, under the absolute power of her mistress, who was neither reluctant nor sparing in making the minion reap the fruits of her insolence. Sarah, indeed, not content with the simple exertion of her authority, seems to have resorted even to corporal chastisement. Sensible, at length, of the hopelessness of getting the better of her mistress, Hagar determined on flight; and having seemingly formed the purpose of returning to her relations in Egypt, she took the direction of that country; which led her to what was afterwards called Shur, through a long tract of sandy uninhabited country, lying on the west of Arabia Petrea, to the extent of 150 miles between Palestine and Egypt. In that lonely region she was sitting by a fountain to replenish her skin-bottle or recruit her wearied limbs, when the angel of the Lord, whose language on this occasion bespeaks him to have been more than a created being, appeared, and in the kindest manner remonstrated with her on the course she was pursuing, and encouraged her to return by the promise that she would ere long have a son, whom Providence destined to become a great man, and whose wild and irregular features of character would be indelibly impressed on the mighty nation that should spring from him. Obedient to the heavenly visitor, and having distinguished the place by the name of Beer-lahai-roi, 'the well of the visible God,' Hagar retraced her steps to the tent of Abraham, where in due time she had a son; and having probably narrated this remarkable interview to Abraham,

that patriarch, as directed by the angel, called the name of the child Ishmael, 'God hath heard.'

Fourteen years had elapsed after the birth of Ishmael when an event occurred in the family of Abraham, by the appearance of the long-promised heir, which entirely changed the prospects of that young man, though nothing materially affecting him took place till the weaning of Isaac, which, as is generally thought, was at the end of his third year. Ishmael was then a lad of seventeen years of age; and being fully capable of understanding his altered relations to the inheritance, as well as having felt perhaps a sensible diminution of Sarah's affection towards him, it is not wonderful that a disappointed youth should inconsiderately give vent to his feelings on a festive occasion, when the newly-weaned child, clad according to custom with the sacred symbolic robe, which was the badge of the birth-right, was formally installed heir of the tribe. The harmony of the weaning feast was disturbed by Ishmael being discovered mocking. This conduct gave mortal offence to Sarah, who from that moment would be satisfied with nothing short of his irrevocable expulsion from the family; and as his mother also was included in the same condemnation, there is ground to believe that she had been repeating her former insolence, as well as instigating her son to his improprieties of behaviour. So harsh a measure was extremely painful to the affectionate heart of Abraham; but his scruples were removed by the timely appearance of his divine counsellor, who said, 'Let it not be grievous in thy sight, because of the lad, and because of thy bondwoman: in all that Sarah hath said unto thee, hearken unto her voice.' The incident affords a very remarkable instance of an overruling Providence in making this family feud in the tent of a pastoral chief 4000 years ago the occasion of separating two mighty nations, who, according to the prophecy, have ever since occupied an important chapter in the history of man. Hagar and Ishmael departed early on the day fixed for their removal, Abraham furnishing them with the necessary supply of travelling provisions.

In spite of their instructions for threading the desert, the two exiles missed their way. Overcome by fatigue and thirst, increasing at every step under the unmitigated rays of a vertical sun, the strength of the young Ishmael, as was natural, first gave way, and his mother laid him down in complete exhaustion under one of the stunted shrubs of this arid region, in the hope of his obtaining some momentary relief from smelling the damp in the shade. The burning fever, however, continued unabated, and the poor woman, forgetting her own sorrow, destitute and alone in the midst of a wilderness, and absorbed in the fate of her son, withdrew to a little distance, unable to witness his lingering sufferings; and there 'she lifted up her voice and wept.' In this distressing situation the angel of the Lord appeared for the purpose of comforting her, and directed her to a fountain, which, concealed by the brushwood, had escaped her notice, and from which she drew a refreshing draught, that had the effect of reviving the almost lifeless Ishmael.

Of the subsequent history of Ishmael we have no account, further than that he established him-

self in the wilderness of Paran, in the neighbourhood of Sinai, was married by his mother to a countrywoman of her own, and maintained both himself and family by the produce of his bow.

HAGARENES. [ARABIA.]

HAGGAI, one of the twelve minor prophets, and the first of the three who, after the return of the Jews from the Babylonian exile, prophesied in Palestine. Of the place and year of his birth, his descent, and the leading incidents of his life, nothing is known which can be relied on. This much appears from his prophecies, that he flourished during the reign of the Persian monarch Darius Hystaspis, who ascended the throne B.C. 521. These prophecies are comprised in a book of two chapters, and consist of discourses remarkably brief and summary. Their object generally is to urge the rebuilding of the Temple, which had indeed been commenced as early as B.C. 535 (Ezra iii. 10), but was afterwards discontinued, the Samaritans having obtained an edict from the Persian king, which forbade further procedure, and influential Jews pretending that the time for rebuilding the Temple had not arrived, since the seventy years predicted by Jeremiah applied to the Temple also, from the time of the destruction of which it was then only the sixty-eighth year. As on the death of Pseudo-Smerdis, and the consequent termination of his interdict, the Jews still continued to wait for the end of the seventy years, and were only engaged in building splendid houses for themselves, Haggai began to prophesy in the second year of Darius, B.C. 520.

His first discourse (ch. i.), delivered on the first day of the sixth month of the year mentioned, foretells that a brighter era would begin as soon as Jehovah's house was rebuilt; and a notice is subjoined, stating that the address of the prophet had been effective, the people having resolved on resuming the restoration of the Temple. The second discourse (ch. ii. 1-9), delivered on the twenty-first day of the seventh month, predicts that the glory of the new Temple would be greater than that of Solomon's, and shows that no fear need be entertained of the Second Temple not equalling the first in splendour, since, in a remarkable political revolution, the gifts of the Gentiles would be brought thither. The third discourse (ch. ii. 10-19), delivered on the twenty-fourth day of the ninth month, refers to a period when building materials had been collected, and the workmen had begun to put them together; for which a commencement of the Divine blessing is promised. The fourth and last discourse (ch. ii. 20-23), delivered also on the twenty-fourth day of the ninth month, is exclusively addressed to Zerubbabel, the political chief of the new Jewish colony, who, it appears, had asked for an explanation regarding the great political revolutions which Haggai had predicted in his second discourse: it comforts the governor by assuring him they would not take place very soon, and not in his lifetime. The style of the discourses of Haggai is suitable to their contents: it is pathetic when he exhorts; it is vehement when he reproves; it is somewhat elevated when he treats of future events; and it is not altogether destitute of a poetical colouring, though a prophet of a higher order would have depicted the splendour of the Second Temple in brighter hues. The

language labours under a poverty of terms, as may be observed in the constant repetition of the same expressions. The prophetic discourses of Haggai are referred to in the Old and New Testament (Ezra v. 1; vi. 14; Heb. xii. 26; comp. Hag. ii. 7, 8, 22). In most of the ancient catalogues of the canonical books of the Old Testament, Haggai is not, indeed, mentioned by name; but as they specify the twelve minor prophets, he must have been included among them, as otherwise their number would not be full.

HAIR is frequently mentioned in Scripture, and in scarcely anything has the caprice of fashion been more strikingly displayed than in the various forms which the taste of different countries and ages has prescribed for disposing of this natural covering of the head. The Greeks let their hair grow to a great length. The early Egyptians, again, who were proverbial for their habits of cleanliness, removed the hair as an incumbrance, and the almost unavoidable occasion of sordid and offensive negligence. All classes amongst that people, not excepting the slaves imported from foreign countries, were required to submit to the tonsure (Gen. xli. 14); and yet, what was remarkable in the inhabitants of a hot climate, while they removed their natural hair, they were accustomed to wear wigs, which were so constructed that 'they far surpassed,' says Wilkinson, 'the comfort and coolness of the modern turban, the reticulated texture of the groundwork on which the hair was fastened allowing the heat of the head to escape, while the hair effectually protected it from the sun.' Different from the custom both of the Greeks and the Egyptians, that of the Hebrews was to wear their hair generally short, and to check its growth by the application of scissors only. The priests at their inauguration shaved off all their hair, and when on actual duty at the temple, were in the habit, it is said, of cutting it every fortnight. The only exceptions to this prevailing fashion are found in the case of the Nazarites, whose hair, from religious duty, was not to be cropped during the term of their vow; of young persons who, during their minority, allowed their hair to hang down in luxuriant ringlets on their shoulders; of such effeminate persons as Absalom (2 Sam. xiv. 26); and of Solomon's horse-guards, whose vanity affected a puerile extravagance, and who strewed their heads every day with particles of gold-dust. Although the Hebrews wore their hair short, they were great admirers of strong and thickest locks; and so high a value did they set on the possession of a good head of hair, that they deprecated nothing so much as baldness. To prevent or remedy this defect they seem, at an early period, to have availed themselves of the assistance of art, not only for beautifying the hair, but increasing its thickness; while the heads of the priests were anointed with an unguent of a peculiar kind, the ingredients of which, with their various proportions, were prescribed by divine authority, and the composition of which the people were prohibited, under severe penalties, from attempting to imitate (Exod. xxx. 32). This custom spread till anointing the hair of the head became a general mark of gentility and an essential part of the daily toilet; the usual cosmetics employed consisting of the best oil of olives mingled with spices, a decoction of parsley-

seed in wine, and more rarely of spikeard (Ps. xxiii. 5; xlv. 7; Eccles. ix. 8; Mark xiv. 3). The prevailing colour of hair among the Hebrews was dark; 'locks bushy and black as a raven,' being mentioned in the description of the bridegroom as the perfection of beauty in mature manhood (Sol. Song v. 11). Hence the appearance of an old man with a snow-white head in a company of younger Jews, all whose heads, like those of other Eastern people, were jet black—a most conspicuous object—is beautifully compared to an almond-tree, which in the early part of the year is in full blossom, while all the others are dark and leafless (Eccles. xii. 5). Among the Romans it was customary to employ artificial means for changing or disguising the silver hue of age. From Rome the fashion spread into Greece and other provinces, and it appears that the members of the church of Corinth were, to a certain extent, captivated by the prevailing taste, some Christians being evidently in the eye of the Apostle, who had attracted attention by the cherished and womanly decoration of their hair (1 Cor. xi. 14-16). To them the letter of Paul was intended to administer a timely reproof for allowing themselves to fall in with a style of manners which, by confounding the distinctions of the sexes, threatened a baneful influence on good morals; and that not only the Christian converts in that city, but the primitive church generally, were led by this admonition to adopt simpler habits, is evident from the remarkable fact that a criminal, who came to trial under the assumed character of a Christian, was proved to the satisfaction of the judge to be an impostor, by the luxuriant and frizzled appearance of his hair.

With regard to women, the possession of long and luxuriant hair is allowed by Paul to be an essential attribute of the sex—a graceful and modest covering provided by nature; and yet the same Apostle elsewhere (1 Tim. ii. 9) concurs with Peter (1 Pet. iii. 9) in launching severe invectives against the ladies of his day for the pride and passionate fondness they displayed in the elaborate decorations of their head-dress. As the hair was pre-eminently the 'instrument of their pride' (Ezek. xvi. 39, margin), all the resources of ingenuity and art were exhausted to set it off to advantage and load it with the most dazzling finery; and many when they died caused their longest locks to be cut off, and placed separately in an urn, to be deposited in their tomb as the most precious and valued relics.

From the great value attached to a profuse head of hair arose a variety of superstitious and emblematic observances, such as shaving parts of the head, or cropping it in a particular form; parents dedicating the hair of infants to the gods; young women theirs at their marriage; warriors after a successful campaign; sailors after deliverance from a storm; hanging it up on consecrated trees, or depositing it in temples; burying it in the tomb of friends, as Achilles did at the funeral of Patroclus; besides shaving, cutting off, or plucking it out, as some people did; or allowing it to grow in sordid negligence, as was the practice with others, according as the calamity that befel them was common or extraordinary, and their grief was mild or violent.

Various metaphorical allusions are made to hair by the sacred writers, especially the pro-

phets. 'Cutting off the hair' is a figure used to denote the entire destruction of a people by the righteous retributions of Providence (Isa. vii. 20). 'Gray hairs here and there on Ephraim' portended the decline and fall of the kingdom of Israel (Hos. vii. 9). 'Hair like women's' forms part of the description of the Apocalyptic locusts, and historically points to the prevailing head-dress of the Saracens, as well as the voluptuous effeminacy of the Antichristian clergy (Rev. ix. 8). And, finally, 'hair like fine wool' was a prominent feature in the appearance of the deified Redeemer, emblematic of the majesty and wisdom that belong to him (Rev. i. 14).

HA'LAH, or rather CHALACH, a city or district of Media, upon the river Gozan, to which, among other places, the captives of Israel were transplanted by the Assyrian kings. Many have conceived this Halah or Chalach to be the Calachene which Ptolemy places in the north of Assyria. But if the river Gozan be the Kizil-Ozan, Halah must needs be sought elsewhere, and near that river. Accordingly Major Rennell indicates as lying along its banks a district of some extent, and of great beauty and fertility, named Chalchal, having within it a remarkably strong position of the same name, situated on one of the hills adjoining to the mountains which separate it from the province of Ghilan.

HALLELU'JAH, or ALLELUIA, a word which stands at the beginning of many of the Psalms. From its frequent occurrence in this position it grew into a formula of praise, and was chanted as such on solemn days of rejoicing. This expression of joy and praise was transferred from the synagogue to the church, and is still occasionally heard in devotional psalmody.

HAM. 1. The youngest son of Noah (Gen. v. 32; comp. ix. 24). Having provoked the wrath of his father by an act of indecency towards him, the latter cursed him and his descendants to be slaves to his brothers and their descendants (ix. 25). To judge, however, from the narrative, Noah directed his curse only against Canaan (the fourth son of Ham) and his race, thus excluding from it the descendants of Ham's three other sons, Cush, Mizraim, and Phut (Gen. x. 6). The general opinion is, that all the Southern nations derive their origin from Ham. Cush is supposed to have been the progenitor of the nations of East and South Asia, more especially of South Arabia, and also of Ethiopia; Mizraim, of the African nations, including the Philistines and some other tribes which Greek fable and tradition connect with Egypt; Phut, likewise of some African nations; and Canaan, of the inhabitants of Palestine and Phœnicia.

2. A poetical name for the land of Egypt (Ps. lxxviii. 51; cv. 23, 27; cvi. 22).

In Gen. xiv. 5 occurs a country or place called Ham, belonging to the *Zuzim*, but its geographical situation is unknown.

HA'MAN, a name of the planet *Mercury*; a favourite of the king of Persia, whose history is involved in that of Esther and Mordecai. He is called an Agagite; and as Agag was a kind of title of the kings of the Amalekites [AGAG], it is supposed that Haman was descended from the royal family of that nation. He or his parents probably found their way to Persia as captives

or hostages; and that the foreign origin of Haman was no bar to his advancement at court, is a circumstance quite in union with the most ancient and still subsisting usages of the East. Joseph, Daniel, and Mordecai afford other examples of the same kind.

It is unnecessary to repeat the particulars of a story so well known as that of Haman. The circumstantial details of the height which he attained and of his sudden downfall, afford, like all the rest of the book of Esther, a most faithful picture of the customs of an Oriental court and government, and furnish invaluable materials for a comparison between the regal usages of ancient and modern times. The result of such a comparison will excite surprise by the closeness of the resemblance; for there is not a single fact in the history of Haman which might not occur at the present day, and which, indeed, is not of frequent occurrence in different combinations. The death of Haman appears to have taken place about the year a.c. 510.

HAMATH, one of the smaller kingdoms of Syria, having Zobah on the east and Rehob on the south. This last kingdom, lying within the greater Mount Hermon, is expressly said to have been taken possession of by the Israelites, and, like Dan or Laish, which is represented to have been in the valley of Bethrehab (Judg. xviii. 28), is used to denote the northern boundary of the Holy Land. The approach to it from the south is by an opening or mountain-pass, called 'the entrance of Hamath,' and 'the entering in of Hamath,' which, being the passage from the northern extremity of the land of Israel into Syria, is sometimes used to describe the boundary of the former in this direction, as 'from the entering in of Hamath to the river of Egypt' (1 Kings viii. 65).

The kingdom of Hamath, or, at least, the southern or central parts of it, appear to have nearly corresponded with what was afterwards denominated Coele-Syria; but northwards, it stretched as far as the city Hamath on the Orontes, which seems to have been the capital of the whole country. Toi was king of Hamath at the time when David conquered the Syrians of Zobah; and it appears that he had reason to rejoice in the humiliation of a dangerous neighbour, as he sent his own son Joram to congratulate the victor (2 Sam. viii. 9, 10). In the time of Hezekiah the town along with its territory was conquered by the Assyrians (2 Kings xvii. 24; xviii. 34; xix. 13; Isa. x. 9; xi. 11); and afterwards by the Chaldeans (Jer. xxxix. 2, 5). Hamath is still a picturesque town, of considerable circumference, and with wide and convenient streets. In Burckhardt's time the attached district contained 120 inhabited villages, and 70 or 80 that lay waste. The western part of this district forms the granary of Northern Syria, though the harvest never yields more than a tenfold return, chiefly on account of the immense numbers of mice, which sometimes completely destroy the crops.

HANAMEEL, a kinsman of Jeremiah, to whom, before the siege of Jerusalem, he sold a field which he possessed in Anathoth, a town of the Levites (Jer. xxxii. 6-12). If this field belonged to Hanameel as a Levite, the sale of it would imply that an ancient law had fallen into disuse (Lev. xxv. 34); but it is possible that it

may have been the property of Hanameel in right of his mother. The transaction was conducted with all the forms of legal transfer, and was intended to evince the certainty of restoration from the approaching exile, by showing that possessions which could be established by documents would yet be of future value to the possessor (a.c. 587).

1. HANANI (*gracious*), a prophet under the reign of A. a, king of Judah, by whom he was seized and imprisoned for announcing that he had lost, from want of due trust in God, an advantage which he might have gained over the king of Syria (2 Chron. xvi. 7).

2. HANANI, a brother of Nehemiah, who went from Jerusalem to Shushan, being sent most probably by Ezra, and brought that information respecting the miserable condition of the returned Jews which led to the mission of Nehemiah. Hanani came back to Judaea, probably along with his brother, and, together with one Hananiah, was appointed to take charge of the gates of Jerusalem, and see that they were opened in the morning and closed in the evening at the appointed time. The circumstances of the time and place rendered this an important and responsible duty, not unattended with some danger (Neh. vii. 2, 3). a.c. 455.

1. HANANI'AH (*Jehovah's goodness*), a false prophet of Gibeon, who, by opposing his prophecies to those of Jeremiah, brought upon himself the terrible sentence, 'Thou shalt die *this year*, because thou hast taught rebellion against the Lord.' He died accordingly (Jer. xxviii. 1, sq.), a.c. 596.

2. HANANIAH. [SHADRACH.]

3. HANANIAH, the person who was associated with Nehemiah's brother Hanani in the charge of the gates of Jerusalem. The high eulogy is bestowed upon him, that 'he was a faithful man, and feared God above many' (Neh. vii. 2) [HANANI 2].

HAND, the organ of feeling, rightly denominated by Galen the instrument of instruments, since by its position at the end of the fore-arm, its structure and its connection with the mind, the hand admirably executes the behests of the human will, and acquires and imparts to man incomparable skill and power. By the peculiarities of its conformation—the inclination of the thumb to the palm, the comparative length of the thumb and of the fingers, 'the hollow of the hand,' and the fleshy protuberances by which that hollow is mainly formed—this member is wonderfully adapted to the purposes for which it was designed, and serves to illustrate the wisdom and providence of the great Creator. The hand itself serves to distinguish man from other terrestrial beings. No other animal has any member comparable with the human hand. Of the two hands the right has a preference derived from natural endowment. Its universal use, as the chief instrument in acting, serves to show that its superiority is something more than an accident. But the preference which it holds is only a part of the general advantage which the right side has over the left, not only in muscular strength, but also in its vital or constitutional properties.

From the properties already described, the student of Scripture is prepared to see the hand employed in holy writ as a symbol of skill,

strength, and efficacy. As a part of that general anthropomorphism, without whose aid men in the early ages could probably have formed no conception of God, the Deity is frequently spoken of in the records of revelation as if possessed of hands.

The phrase 'sitting at the right hand of God,' as applied to the Saviour of the world, is derived from the fact that with earthly princes a position on the right hand of the throne was accounted the chief place of honour, dignity, and power:—'upon thy right-hand did stand the queen' (Ps. xlv. 9; compare 1 Kings ii. 19; Ps. lxxx. 17). The immediate passage out of which sprang the phraseology employed by Jesus may be found in Ps. cx. 1: 'Jehovah said unto my Lord, sit thou at my right hand until I make thine enemies thy footstool.' Accordingly the Saviour declares before Caiaphas (Matt. xxvi. 64; Mark xiv. 62), 'Ye shall see the Son of man sitting on the right hand of power, and coming in the clouds of heaven'; where the meaning obviously is that the Jews of that day should have manifest proofs that Jesus held the most eminent place in the divine favour, and that his present humiliation would be succeeded by glory, majesty, and power (Luke xxiv. 26; 1 Tim. iii. 16). So when it is said (Mark xvi. 19; Rom. viii. 34; Col. iii. 1; 1 Pet. iii. 22; Heb. i. 3; viii. 1) that Jesus 'sits at the right hand of God,' 'at the right hand of the Majesty on high,' we are obviously to understand the assertion to be that, as his Father, so he worketh always (John v. 17) for the advancement of the kingdom of heaven, and the salvation of the world.

As the hand is the great instrument of action, so is it eminently fitted for affording aid to the mind, by the signs and indications which it makes. Thus to lay the hand on any one was a means of pointing him out, and consequently an emblem of setting any one apart for a particular office or dignity. *Imposition of hands* accordingly formed, at an early period, a part of the ceremonial observed on the appointment and consecration of persons to high and holy undertakings. (See Num. xxvii. 19; Acts viii. 15-17; 1 Tim. iv. 14; 2 Tim. i. 6.) A corruption of this doctrine was, that the laying on of hands gave of itself divine powers; and on this account Simon, the magician (Acts viii. 18), offered money, saying, 'Give me also this power, that on whomsoever I lay hands he may receive the Holy Ghost,' intending probably to carry on a gainful trade by communicating the gift to others.

HANDICRAFT. In the early periods to which the Scriptural history refers we do not meet with those artificial feelings and unreasonable prejudices against hand-labour which prevail and are so banefully influential in modern society. The primitive history which the Bible presents is the history of hand-labourers. Adam dressed the garden in which God had placed him (Gen. ii. 15), Abel was a keeper of sheep, Cain a tiller of the ground (Gen. iv. 3), Tubal-cain a smith (Gen. iv. 22). The general nature of this article does not require any extensive or detailed inquiry into the hand-labours which the Israelites practised before their descent into Egypt; but the high and varied culture which they found there must have contributed greatly to increase their knowledge of the practical arts of life, though the herdsman-sort of

life which the Hebrews continued to lead was not favourable to their advancement in either science or art.

Another source of knowledge to the Hebrews of handicrafts were the maritime and commercial Phœnicians. Commerce and navigation imply great skill in art and science; and the pursuits to which they lead largely increase the skill whence they emanate. It is not, therefore, surprising that the origin of so many arts has been referred to the north-eastern shore of the Mediterranean Sea; nor is there any difficulty in understanding how arts and letters should be propagated from the coast to the interior, conferring high advantages on the inhabitants, of Syria in general, as well before as after the settlement of the Hebrew tribes in the land of promise.

The skill of the Hebrews during their wanderings in the desert does not appear to have been inconsiderable; but the pursuits of war and the entire absorption of the energies of the nation in the one great work of gaining the land which had been given to them, may have led to their falling off in the arts of peace; and from a passage in 1 Sam. (xiii. 20) it would appear that not long after they had taken possession of the country they were in a low condition as to the instruments of handicraft. A comparatively settled state of society, however, soon led to the revival of skill by the encouragement of industry. A more minute division of labour ensued. Trades, strictly so called, arose, carried on by persons exclusively devoted to one pursuit. Thus in Judg. xvii. 4 and Jer. x. 14, 'the founder' is mentioned, a trade which implies a practical knowledge of metallurgy; the smelting and working of metals were well known to the Hebrews (Job xxxvii. 18); brass was in use before iron; arms and instruments of husbandry were made of iron. In Exodus (xxxv. 30-35) a passage occurs which may serve to specify many arts that were practised among the Israelites, though it seems also to intimate that at the time to which it refers artificers of the description referred to were not numerous. From the ensuing chapter (ver. 34) it appears that gilding was known before the settlement in Canaan. The ark (Exod. xxxvii. 2) was overlaid with pure gold within and without. The cherubim were wrought ('beaten,' Exod. xxxvii. 7) in gold. The candlestick was of beaten gold (verses 17, 22). Wire-drawing was probably understood (Exod. xxxviii. 4; xxxix. 3). Covering with brass (Exod. xxxviii. 2) and with silver (Prov. xxvi. 23) was practised. Architecture and the kindred arts do not appear to have made much progress till the days of Solomon, who employed an incredible number of persons to procure timber (1 Kings v. 13, sq.); but the men of skill for building his temple he obtained from Hiram, king of Tyre (1 Kings v. sq.; 1 Chron. xiv. 1; 2 Chron. ii. 7). The intercourse which the Babylonish captivity gave the Jews seems to have greatly improved their knowledge and skill in both the practical and the fine arts, and to have led them to hold them in very high estimation. The arts were even carried on by persons of learning, who took a title of honour from their trade. It was held a sign of a bad education if a father did not teach his son some handicraft.

In the Apocrypha and New Testament there

are mentioned tanners (Acts ix. 43), tent-makers (Acts xviii. 3); in Josephus, cheese-makers, domestics; in the Talmud, with others we find tailors, shoe-makers, blood-letters, glaziers, goldsmiths, plasterers. Certain handicraftsmen could never rise to the rank of high-priest, such as weavers, barbers, fullers, perfumers, cuppers, tanners; which pursuits, especially the last, were held in disesteem. In large cities particular localities were set apart for particular trades, as is the case in the East to the present day. Thus in Jeremiah (xxxvii. 21) we read of 'the bakers' street.' So in the Talmud mention is made of a flesh-market; in Josephus, of a cheese-market; and in the New Testament (John v. 2) we read of a sheep-market.

HANDKERCHIEF, NAPKIN, occurs in Luke xix. 20; John xi. 44; xx. 7; Acts xix. 12. The word is employed in Scripture in a variety of meanings. In the first instance (Luke xix. 20) it means a wrapper, in which the 'wicked servant' had laid up the pound intrusted to him by his master. In the second instance (John xi. 44) it appears as a kerchief, or cloth attached to the head of a corpse. It was perhaps brought round the forehead and under the chin. In many Egyptian mummies it does not *cover the face*. In ancient times among the Greeks it *did*. The next instance is that of the 'napkin' which had been 'about the head' of our Lord, but which, after his resurrection, was found rolled up, as if deliberately, and put in a place separately from the linen clothes. The last instance of the Biblical use of the word occurs in the account of 'the special miracles' wrought by the hands of Paul (Acts xiv. 11); 'so that handkerchiefs, napkins, wrappers, shawls, &c., were brought from his body to the sick; and the diseases departed from them, and the evil spirits went out of them.' The Ephesians had not unnaturally inferred that the apostle's miraculous power could be communicated by such a mode of contact; and certainly cures thus received by parties at a distance, among a people famed for their addictedness to 'curious arts,' i. e. magical skill, &c., would serve to convince them of the truth of the gospel, by a mode well suited to interest their minds.

HANGING. [PUNISHMENTS.]

HAN'NAH, properly **CHANNAH** (*graciousness*), wife of a Levite named Elkanah, and mother of Samuel. She was very dear to her husband, but being childless was much aggrieved by the insults of Elkanah's other wife Peninnah, who was blessed with children. The family lived at Ramathaim-zophim, and, as the law required, there was a yearly journey to offer sacrifices at the sole altar of Jehovah, which was then at Shiloh. Women were not bound to attend; but pious females free from the cares of a family often did so, especially when the husband was a Levite. Every time that Hannah went there childless she declined to take part in the festivities which followed the sacrifices, being then, as it seems, peculiarly exposed to the taunts of her rival. At length, on one of these visits to Shiloh, while she prayed before returning home, she vowed to devote to the Almighty the son which she so earnestly desired (Num. xxx. 1, sq.). It seems to have been the custom to pronounce all vows at the holy place in a loud voice, under the immediate notice of the priest (Deut. xxiii. 23; Ps.

xxvi. 14); but Hannah prayed in a low tone, so that her lips only were seen to move. This attracted the attention of the high-priest, Eli, who suspected that she had taken too much wine at the recent feast. From this suspicion Hannah easily vindicated herself, and returned home with a lightened heart. Before the end of that year Hannah became the rejoicing mother of a son, to whom the name of Samuel was given, and who was from his birth placed under the obligations of that condition of Nazariteship to which his mother had vowed him. n.c. 1171.

Hannah went no more to Shiloh till her child was old enough to dispense with her maternal services, when she took him up with her to leave him there, as it appears was the custom when one already a Levite was placed under the additional obligations of Nazariteship. When he was presented in due form to the high-priest, the mother took occasion to remind him of the former transaction: 'For this child,' she said, 'I prayed, and the Lord hath given me my petition which I asked of him' (1 Sam. i. 27). Hannah's gladness afterwards found vent in an exulting chant, which furnishes a remarkable specimen of the early lyric poetry of the Hebrews, and of which many of the ideas and images were in after times repeated by the Virgin Mary on a somewhat similar occasion (Luke i. 46, sq.).

After this Hannah failed not to visit Shiloh every year, bringing a new dress for her son, who remained under the eye and near the person of the high-priest [SAMUEL]. That great personage took kind notice of Hannah on these occasions, and bestowed his blessing upon her and her husband. The Lord repaid her abundantly for that which she had, to use her own expression, 'lent to him'; for she had three sons and two daughters after Samuel.

HANUN (*bestower*), son and successor of Nahash, king of the Ammonites. David, who had in his troubles been befriended by Nahash, sent, with the kindest intentions, an embassy to condole with him on the death of his father, and to congratulate him on his own accession. The rash young king, however, was led to misapprehend the motives of this embassy, and to treat with gross and inexpiable indignity the honourable personages whom David had charged with this mission. Their beards were *half* shaven, and their robes cut short by the middle, and they were dismissed in this shameful trim, which can be appreciated only by those who consider how reverently the beard has always been regarded by the Orientals [BEARD] (B.C. 1038). When the news of this affront was brought to David, he sent word to the ambassadors to remain at Jericho till the growth of their beards enabled them to appear with decency in the metropolis. He vowed vengeance upon Hanun for the insult; and the vehemence with which the matter was taken up forms an instance, interesting from its antiquity, of the respect expected to be paid to the person and character of ambassadors. Hanun himself looked for nothing less than war as the consequence of his conduct; and he subsidized Hadadzer and other Syrian princes to assist him with their armies. The power of the Syrians was broken in two campaigns, and the Ammonites were left to their fate, which was severe even beyond the usual severities of war in that remote

age [AMMONITES; DAVID] (2 Sam. x. 1; 1 Chron. xix.).

HARA (*mountain*). One of the places to which the tribes beyond the Jordan were carried away by Tiglath-pileser. The word occurs only in a single passage (1 Chron. v. 26). Bochart and Gesenius conjecture that it is a name for the northern part of Media.

HARADAIL, a camp or station of the Israelites (Num. xxxiii. 24) [WANDERING].

HARAM. [HOUSE.]

1. **HARAN**, eldest son of Terah, brother of Abraham and Nahor, and father of Lot, Milcah, and Iscah. He died before his father Terah, which, from the manner in which it is mentioned, appears to have been a much rarer case in those days than at present (Gen. xi. 27, sq.).

HARAN, or rather **CHARAN**, called by the Greeks **Charran**, and by the Romans **Charrie**. It was situated in the north-western part of Mesopotamia, on a river of the same name running into the Euphrates. It is supposed to have been so called from Haran, the father of Lot and brother of Abraham; but there appears no ground for this conclusion except the identity of names. Abraham, after he had been called from Ur of the Chaldees, tarried here till his father Terah died, when he proceeded to the land of Canaan (Gen. xi. 31, 38; Acts vii. 4). The elder branch of the family still remained at Haran, which led to the interesting journeys thither described in the patriarchal history—first, that of Abraham's servant to obtain a wife for Isaac (Gen. xxiv.), and next, that of Jacob when he fled to evade the wrath of Esau (Gen. xxviii. 10). The plain bordering on this town is celebrated in history as the scene of a battle in which the Roman army was defeated by the Parthians, and the *Triumvir Crassus* killed.

Haran still retains its ancient name in the form of **Harran**, and is only peopled by a few families of wandering Arabs, who are led thither by a plentiful supply of water from several small streams. It is situated in a flat and sandy plain, in 36° 40' N. lat., 39° 2' 43" E. long.

HARE occurs in Lev. xi. 6, and Deut. xiv. 7, and in both instances it is prohibited from being used as food, because it chews the cud, although

204. [Syrian Hare.]

it has not the hoof divided. The hare however does not actually chew the cud, but has incisor teeth above and below, set like chisels, and calculated for gnawing, cutting, and nibbling, and when in a state of repose is engaged in working the incisor teeth upon each other. This practice is a necessary condition of existence, for the friction keeps them fit for the purpose of nibbling, and prevents their growing beyond a proper length. As hares do not subsist on hard substances, but

on tender shoots and grasses, they have more cause, and therefore a more constant craving, to abrade their teeth; and this they do in a manner which, combined with the slight trituration of the occasional contents of the cheeks, even modern writers, not zoologists, have mistaken for real rumination. It follows therefore we should understand the original in the above passages, rendered 'chewing the cud,' as merely implying a second mastication, more or less complete. The act of 'chewing the cud' and 're-chewing' being considered identical by the Hebrews, the sacred lawgiver, not being occupied with the doctrines of science, no doubt used the expression in the sense in which it was then understood. It may be added, that a similar opinion, and consequent rejection of the hare as food, pervaded many nations of antiquity.

There are two distinct species of hare in Syria: one, the Syrian hare, nearly equal in size to the common European, having the fur ochry buff; and the hare of the desert, smaller and brownish. They reside in the localities indicated by their names, and are distinguished from the common hare, by a greater length of ears, and a black tail with white fringe. There is found in Egypt, and higher up the Nile, a third species, represented in the outline paintings on ancient monuments, but not coloured with that delicacy of tint required for distinguishing it from the others, excepting that it appears to be marked with the black speckles which characterize the existing species.

HARETH, a forest in Judah, to which David fled from Saul (1 Sam. xxii. 5) [FOREST].

HAROD, a brook not far from Jezreel and Mount Gilboa. The name means 'palpitation,' and it has been suggested that it originated in consequence of the alarm and terror of most of the men who were here tested by Gideon (Judg. vii. 1-3); but this supposition seems very far-fetched, and the name more probably arose from some peculiarity in the outflow of the stream.

HAR'OSHEETH OF THE GENTILES, a city supposed to have been situated near Hazor, in the northern parts of Canaan, called afterwards Upper Galilee, or Galilee of the Gentiles [GALILEE]. Harosheth is said to have been the residence of Sisera, the general of the armies of Jabin, king of Canaan, who reigned in Hazor. To this place Jabin himself was pursued and defeated by Deborah and Barak (Judg. iv. 2, 13, 16).

HARP. [MUSIC.]

HART. The word thus translated is **AJAIL** (it occurs in Dent. xii. 15; Ps. xlii. 1; Isa. xxxv. 6), and differs only by the feminine termination from that rendered 'hind' in many other passages of Scripture. There is, upon the whole, no reason to doubt that the male and female of a species of deer are really intended by these words. It is indeed true that the existence of animals of the deer kind in Asia has been denied, and Cuvier for some time doubted whether any could be found in Africa. Yet, although never abundant where water is scarce, the existence of deer from Morocco and the Nile has now been satisfactorily established, and there are traces of their presence in Syria, where they were probably more numerous formerly than at present. The *Cervus Barbatus*, or *Barbary Stag*, is the African species; and an individual of this species was obtained by

a friend of the writer in the region east of the Jordan. This species is in size between our red and fallow deer, distinguished by the want of a bis-antler, or second branch in the horns reckoned from below, and for a spotted livery which is effaced only in the third or fourth year. There is also in Asia the Persian stag, or Maral of the Tartar natives, and Gewaze of the Armenians. This is larger than the stag of Europe, has a heavy mane, and is, like the former, destitute of bis-antlers. This species seems, under the name of Soigur, to extend its habitat to the northern frontier of Syria and Palestine; but taking all circumstances into account, it seems less probable that this should be the 'hart' of Scripture than the *Cervus Barbatus*.

HAVILAH. 1. A district in Arabia Felix, deriving its name from the second son of Cush (Gen. x. 7), or, according to others, from the second son of Joktan (Gen. x. 29; comp. xxv. 18). There can be no doubt, however, of the existence of a double Havilah; one founded by the descendant of Ham, and the other by that of Shem. From Gen. xxv. 18, it would appear that the land of Havilah formed the eastern boundary of the Israelites, and so likewise from 1 Sam. xv. 7, where it seems, moreover, to have been a possession belonging to the Amalekites. 2. A land rich in gold, bdellium, and shoham, mentioned in Gen. ii. 11, in the geographical description of Paradise. Some identify this with the preceding; but others take it to be *Chevala* on the Caspian Sea; and others suppose it a general name for India, in which case the river *Pison*, mentioned as surrounding it, would be identified with the *Ganges*.

HAV'OTH-JA'IR. *Havoth* signifies 'cabins' or 'huts,' such as belong to the Arabians, and a collection of which is regarded as forming a hamlet or village. The district of Havoth-jair (*Jair's hamlets*), mentioned in Num. xxxii. 41, and Dent. iii. 14, was beyond the Jordan in the land of Gilead, and belonged to the half-tribe of Manasseh.

HAU'RAN, a tract or region of Syria, south of Damascus, which is twice mentioned under this name in Scripture (Ezek. xlvii. 16, 18). It was probably of small extent originally; but received extensive additions from the Romans under the name of Anranitis. At present it reaches from about twenty miles south of Damascus to a little below Bozra, including the rocky district of el-Ledja, the ancient Trachonitis, and the mountainous region of Jebel-Hauran. Within its limits are also included, besides Trachonitis, Iturea or Ittur, now called Jedour, and part of Batanea or Bashan. It is represented by Burckhardt as a volcanic region, composed of porous tufa, pumice, and basalt, with the remains of a crater on the Tel Shoba, which is on its eastern border. It produces, however, crops of corn, and has many patches of luxuriant herbage, which are frequented in summer by the Arab tribes for pasturage. It also abounds with interesting remains of cities, scattered over its surface, among which are found Greek inscriptions.

HAWK, an unclean bird (Lev. xi. 16; Dent. xiv. 15; Job xxxix. 26). The English name is an altered form of the old word 'fawk' or 'falk.' Western Asia and Lower Egypt, and consequently the intermediate territory of Syria and Palestine, are the habitation or transitory residence of a con-

siderable number of species of the order *Raptores*, which, even including the shortest-winged, have great powers of flight, are remarkably enterprising, live to a great age, are migratory, or followers upon birds of passage, or remain in a region so abundantly stocked with pigeon and turtle-dove as Palestine, and affording such a variety of ground to hunt their particular prey—abounding as it does in mountain and forest, plain, desert, marsh, river and sea-coast. We shall here enumerate, so far as our information will permit, the *Falconida* of this region, exclusive of those mentioned in other articles [EAGLE; GLEDE; KITE; OSFART].

205. [Peregrine Falcon.]

Falcons, or the 'noble' birds of prey used for hawking, have for many ages been objects of great interest, and still continue to be bought at high prices. They are consequently imported from distant countries, as central Asia, Iceland, Barbary, &c. Their love of liberty often renders them irreclaimable when once on the wing; and their powers and boldness, independent of circumstances, and the extent of range which the long-winged species in particular can take, are exemplified by their presence in every quarter of the globe. The Peregrine falcon is so generally diffused as to occur even in New Holland and South America.

Next we may place *Falco Aroeris* of Sir J. G. Wilkinson, the sacred hawk of Egypt. This, if it be not in reality the same as, or a mere variety of the Peregrine, should have retained the ancient epithet of *Hierax*, and the hawk's name of *Sacre*. Innumerable representations of it occur in Egyptian monuments.

The Hobby is no doubt a second or third species of sacred hawk, having similar gerronia. Both this bird and the tractable Merlin are used in the falconry of the inferior Moslem landowners of Asiatic Turkey.

Besides these the Kestrel occurs in Syria, and the lesser Kestrel in Egypt; and it is probable that both species visit these two territories according to the seasons.

To the 'noble' birds we may add the Gerv-falcon, which is one-third larger than the Peregrine: it is imported from Tartary and sold at Constantinople, Aleppo, and Damascus. The great birds fly at antelopes, bustards, cranes, &c.; and of the genus *Asur*, with shorter wings than true falcons, the Goshawk, and the Falcon Gentil are either imported, or taken in their nests, and used to fly at lower and aquatic game. The smaller and less powerful hawks of the genus

Nisus are mostly in use on account of the sport they afford being less fatiguing, as they are employed to fly at pigeons, partridges, quails, &c.

HAZAEI (*cision of God*), an officer of Benhadad, king of Syria, whose eventual accession to the throne of that kingdom was made known to Elijah (1 Kings xix. 15); and who, when Elisha was at Damascus, was sent by his master, who was then ill, to consult the prophet respecting his recovery. He was followed by forty camels bearing presents from the king. When Hazael appeared before the prophet, he said, 'Thy son Benhadad, king of Syria, hath sent me to thee saying, Shall I recover of this disease?' The answer was, that he *might* certainly recover. 'Howbeit,' added the prophet, 'the Lord hath showed me that he shall surely die.' He then looked stedfastly at Hazael till he became confused; on which the man of God wept; and when Hazael respectfully inquired the cause of this outburst, Elisha replied by describing the vivid picture then present to his mind of all the evils which the man now before him would inflict upon Israel. Hazael exclaimed, 'But what! Is thy servant a dog that he should do this great thing?' The prophet exclaimed that it was as king of Syria he should do it. Hazael then returned, and delivered to his master that portion of the prophetic response which was intended for him. But the very next day this man, cool and calculating in his cruel ambition, took a thick cloth, and, having dipped it in water, spread it over the face of the king, who, in his feebleness, and probably in his sleep, was smothered by its weight, and died what seemed to his people a natural death (2 Kings viii. 8, &c.), *n.c.* 885. We are not to imagine that such a project as this was conceived and executed in a day, or that it was suggested by the words of Elisha. His discomposure at the earnest gaze of the prophet, and other circumstances, show that Hazael at that moment regarded Elisha as one to whom his secret purposes were known. In that case, his cry, 'Is thy servant a dog,' &c., was not, as some suppose, a cry of joy at the first view of a throne, but of horror at the idea of the public atrocities which the prophet described. This was likely to shock him more than it would do after he had committed his first crime, and obtained possession of a throne acquired at such a cost.

The further information respecting Hazael which the Scriptures afford is limited to brief notices of his wars with Ahaziah and Joash, kings of Judah, and with Jehoram, Jehu, and Jehoahaz, kings of Israel (2 Kings viii. 28; ix. 14; x. 32; xii. 17; xiii. 3; 2 Chron. xxii. 5). It is difficult to distinguish the several campaigns and victories involved in these allusions, and spread over a reign of forty years; but it is certain that Hazael always had the advantage over the Hebrew princes. He devastated their frontiers, rent from them all their territories beyond the Jordan, traversed the breadth of Palestine, and carried his arms into the states of the Philistines; he laid siege to Jerusalem, and only retired on receiving the treasures of the temple and the palace. The details of these conquests redeemed to the very letter the appalling predictions of Elisha. This able and successful, but unprincipled usurper left the throne at his death to his son Benhadad.

HA'ZAR-MA'VETH, the third son of Jokta. (Gen. x. 26), whose name is judged to have been preserved in the Arabian province of Hadramau [ARABIA].

HAZEL occurs only once in the Old Testament, namely, in Gen. xxx. 37, where it indicates one of the kinds of rod from which Jacob peeled the bark and which he placed in the water-troughs of the cattle. *Luz* is translated *hazel* in the Authorized Version, as well as in several others; in some it is rendered by words equivalent to 'walnut,' but 'almond' appears to be its true meaning; for the same word denotes that tree in the Arabic language [ALMOND].

HAZEROTH, the third station of the Israelites after leaving Sinai, and either four or five days' march from that mountain (Num. xi. 35; xxxiii. 17; comp. x. 33) [WANDERING].

HA'ZEZON-TAMAR. [EN-GEDI.]
HA'ZOR, a city near the waters of lake Merom (Hulch), the seat of Jabin, a powerful Canaanitish king, as appears from the summons sent by him to all the neighbouring kings to assist him against the Israelites. He and his confederates were, however, defeated and slain by Joshua, and the city burnt to the ground (Josh. xi. 1, 10-13; Joseph. *Antiq.* v. 5. 1). But by the time of Deborah and Barak the Canaanites had recovered part of the territory then lost, had rebuilt Hazor, and were ruled by a king with the ancient royal name of Jabin, under whose power the Israelites were, in punishment for their sins, reduced. From this yoke they were delivered by Deborah and Barak, after which Hazor remained in quiet possession of the Israelites, and belonged to the tribe of Naphtali (Josh. xix. 36; Judg. iv. 2). Hazor was one of the towns rebuilt or much improved by Solomon (1 Kings ix. 15), and was one of the fortified places of Galilee which the Assyrians under Tiglath-pileser first took on invading Palestine from the north (2 Kings xv. 29). There is no modern notice of this town.

HEAD. As the head is the topmost part of the human body, it came derivatively to signify that which is highest, chief, the highest in position locally being regarded as highest in office, rank, or dignity: whence, as the head is the centre of the nervous system, holds the brain, and stands above all the other parts, Plato regarded it as the seat of the deathless soul; and it has generally been considered as the abode of the intellect or intelligence by which man is enlightened and his walk in life directed; while the heart, or the parts placed near it, have been accounted the place where the affections lie (Gen. iii. 15; Ps. iii. 3; Eccles. ii. 14). The head and the heart are sometimes taken for the entire person (Isa. i. 5). Even the head alone, as being the chief member, frequently stands for the man (Prov. x. 6). The head also denotes sovereignty (1 Cor. xi. 3). Covering the head, and cutting off the hair, were signs of mourning and tokens of distress, which were enhanced by throwing ashes on the head, together with sack cloth (Amos viii. 10; Job i. 20; Lev. xxi. 5; Dent. xiv. 1; 2 Sam. xiii. 10; Esther iv. 1); while anointing the head was practised on festive occasions, and considered an emblem of felicity (Eccles. ix. 8; Ps. xxiii. 5; Luke vii. 46). It was usual to swear by the head (Matt. v. 36).

The general character of the human head is such as to establish the identity of the human race, and to distinguish man from every other animal. At the same time different families of

206. 1. Ethiopian; 2. Mongolian; 3. Caucasian; 4. Malay; 5. American.

mankind are marked by peculiarities of construction in the head, which, though in individual cases, and when extremes are compared together, they run one into the other to the entire loss of distinctive lines, yet are in the general broadly contrasted one with the other. These peculiarities in the structure of the skull give rise to and are connected with other peculiarities of feature and general contour of face. In the union of cranial peculiarities with those of the face certain clear marks are presented, by which physiologists have been able to range the individuals of our race into a few great classes, and in so doing to afford an unintentional corroboration of the information which the Scriptures afford regarding the origin and dispersion of mankind. Physiologists have established five classes of heads, corresponding with five great families. 1. The Caucasian family, comprising the nations of Europe, some of the Western Asiatics, &c., have the head of the most symmetrical shape, almost round, the forehead of moderate extent, the cheek bones rather narrow, without any projection, but a direction downwards from the molar process of the frontal bone; the alveolar edge well rounded; the front teeth of each jaw placed perpendicularly; the face of oval shape, straight, features moderately prominent; forehead arched; nose narrow, slightly arched; mouth small; chin full and round. 2. The second is the Mongolian variety. 3. Ethiopian. 4. Malay and South Sea Islanders. 5. American. The description of their peculiarities may be found in Prichard's *Researches into the Physical History of Man*, 2nd edition, vol. i. p. 167, sq.

HEART. All the phrases, more or less metaphorical, in which this word occurs, are rendered intelligible, without detailed examples, when we are told that the heart was, among the Hebrews, regarded poetically not only as the seat of the passions and emotions, as of love, pleasure, and grief, but also of the intellectual faculties—the mind, the understanding. In the original Scriptures, as well as in the English and other translations, the word 'heart' therefore, constantly occurs where 'mind' is to be understood, and would be used by a modern English writer. We say modern, because the ancient usage of the English word 'heart' was more conformable than the present to that of the Hebrews.

HEATH. *Oror*, the word thus rendered occurs in two or three places of Scripture, and has been variously translated, as *tamarisk*; *tamarin*, which is an Indian tree, the tamarind; *retama*, that is the broom; and also, as in the French and English versions, *heath*, which is perhaps the most incorrect of all, though Hasselquist mentions finding heath near Jericho, in Syria. As far as the context is concerned, some of these plants, as the *retam* and *tamarisk*, would answer very well; but the Arabic name *arar*, is applied to a totally different plant, a species of juniper.

Several species of juniper are no doubt found in Syria and Palestine. Robinson met with some in proceeding from Hebron to Wady Musa, near the romantic pass of Nemela: 'On the rocks above we found the juniper tree, Arabic *ar'ar*; its berries have the appearance and taste of the common juniper, except that there is more of the aroma of the pine. These trees were ten or fifteen feet in height, and hung upon the rocks even to the summits of the cliffs and needles.' In a note the author says: 'This is doubtless the Hebrew *aror* (Jer. xlviii. 6); whence both the English version and Luther read incorrectly *heath*' (*Bibl. Researches*, ii. 506). In proceeding S.E. he states: 'Large trees of the juniper become quite common in the Wadys and on the rocks.' It is mentioned in the same situations by other travellers, and is no doubt common enough, particularly in wild, uncultivated, and often inaccessible situations, and is thus suitable to Jer. xlviii. 6: 'Flee, save your lives, and be like the *heath* (*aror*) in the wilderness.'

HEAVEN, the state and place of blessedness in the life to come.

As we can have no distinct conception of those joys which never have been and never will be experienced by us here in their full extent, we have of course no words in human language to express them, and cannot therefore expect any clear description of them even in the Holy Scriptures. Hence the Bible describes this happiness sometimes in general terms designating its greatness (as in Rom. viii. 18–22; 2 Cor. iv. 17, 18); and sometimes by various figurative images and modes of speech, borrowed from everything which we know to be attractive and desirable.

The following are the principal terms, both literal and figurative, which are applied in Scripture to the condition of future happiness.

Among the *literal* appellations we find 'life,' 'eternal life,' and 'life everlasting,' literally 'a happy life,' or 'eternal well-being' (Matt. vii. 14; xix. 16, 29; xxv. 46); 'glory,' 'the glory of God' (Rom. ii. 7, 10; v. 2); and 'peace'

(Rom. ii. 10). Also 'an eternal weight of glory' (2 Cor. iv. 17); and 'salvation,' 'eternal salvation' (Heb. v. 9), &c.

Among the *figurative* representations, we may place the word 'heaven' itself. The abode of departed spirits, to us who live upon earth, and while we remain here, is invisible and inaccessible, beyond the bonds of the visible world, and entirely separated from it. There they live in the highest well-being, and in a nearer connection with God and Christ than here below. This place and state cannot be designated by any more fit and brief expression than that which is found in almost every language, namely, 'heaven,'—a word in its primary and material signification denoting the region of the skies, or the visible heavens. It is there that the highest sanctuary or temple of God is situated, i.e., it is there that the omnipresent God most gloriously reveals himself. This, too, is the abode of God's highest spiritual creation. Thither Christ was transported; he calls it the house of his Father, and says that he has therein prepared an abode for his followers (John xiv. 2).

This place, this 'heaven,' was never conceived of in ancient times, as it has been by some modern writers, as a particular planet or world, but as the wide expanse of heaven, high above the atmosphere, or starry heavens; hence it is sometimes called the *third* heaven, as being neither the atmosphere nor the starry heavens.

Another figurative name is 'Paradise,' taken from the abode of our first parents in their state of innocence, and transferred to the abode of the blessed (Luke xxiii. 43; 2 Cor. xii. 4; Rev. ii. 7; xii. 2).

Again, this place is called 'the heavenly Jerusalem' (Gal. iv. 26; Heb. xii. 22; Rev. iii. 12), because the earthly Jerusalem was the capital city of the Jews, the royal residence, and the seat of divine worship; 'the kingdom of heaven' (Matt. xxv. 1; Jas. ii. 5); the 'heavenly kingdom' (2 Tim. iv. 18); the 'eternal kingdom' (2 Pet. i. 11). It is also called an 'eternal inheritance' (1 Pet. i. 4; Heb. ix. 15), meaning the possession and full enjoyment of happiness, typified by the residence of the ancient Hebrews in Palestine. The blessed are said 'to sit down at table with Abraham, Isaac, and Jacob,' that is, to be a sharer with the saints of old in the joys of salvation; 'to be in Abraham's bosom' (Luke xvi. 22; Matt. viii. 11), that is, to sit near or next to Abraham [bosom]; 'to reign with Christ' (2 Tim. ii. 11), i.e. to be distinguished, honoured, and happy as he is—to enjoy regal felicities: to enjoy 'a Sabbath,' or 'rest' (Heb. iv. 10, 11), indicating the happiness of pious Christians, both in this life and in the life to come.

All that we can with certainty know or infer from Scripture or reason respecting the blessedness of the life to come, may be arranged under the following particulars:—1. We shall hereafter be entirely freed from the sufferings and adversities of this life. 2. Our future blessedness will involve a continuance of the real happiness of this life.

1. The entire exemption from suffering and all that causes suffering here, is expressed in the Scripture by words which denote rest, repose, refreshment, after performing labour and enduring affliction. But all the terms which are employed

to express this condition, define (in the original) the promised 'rest,' as rest after labour, and exemption from toil and grief; and not the absence of employment, not inactivity or indolence (2 Thess. i. 7; Heb. iv. 9, 11; Rev. xiv. 13; comp. vii. 17).

This deliverance from the evils of our present life includes—

1. Deliverance from this earthly body, the seat of the lower principles of our nature and of our sinful corruption, and the source of so many evils and sufferings (2 Cor. vi. 1, 2; 1 Cor. xviii. 15).

2. Entire separation from the society of wicked and evil-disposed persons, who, in various ways, injure the righteous man and embitter his life on earth (2 Tim. iv. 18).

3. Upon this earth everything is inconstant, and subject to perpetual change; and nothing is capable of completely satisfying our expectations and desires. But in the world to come it will be different. The bliss of the saints will continue without interruption or change, without fear of termination, and without satiety (Luke xx. 36; 2 Cor. iv. 16, 18; 1 Pet. i. 4; v. 10; 1 John iii. 2, sq.).

11. Besides being exempt from all earthly trials, and having a continuance of that happiness which we had begun to enjoy even here, we have good reason to expect hereafter other rewards and joys, which stand in no natural or necessary connection with the present life. For our entire felicity would be extremely defective and scanty, were it to be confined merely to that which we carry with us from the present world, or were we compelled to stop short with that meagre and elementary knowledge which we possess here. Besides the natural rewards of goodness, there must, therefore, be others, which are *positive*, and dependent on the will of the Supreme Legislator.

In the doctrine of the New Testament positive rewards are considered most obviously as belonging to our future felicity, and as constituting a principal part of it. For it always represents the joys of heaven as resulting strictly from the *favour of God*, and as being *undeserved* by those on whom they are bestowed. Hence there must be something more added to the natural good consequences of our actions, something which cannot be considered as the necessary and natural consequences of the good actions we may have here performed. But, on this subject, we know nothing more in general than this, that God will so appoint and order our circumstances, and make such arrangements, that the principal faculties of our souls—reason and affection, will be heightened and developed, so that we shall continually obtain more pure and distinct knowledge of the truth, and make continual advances in holiness.

Some theologians have supposed that the saints in heaven may be taught by *immediate divine revelations*, especially those who may enter the abodes of the blessed without knowledge, or with only a small measure of it; e.g. children and others who have died in ignorance, for which they themselves were not to blame. On this subject nothing is definitely taught in the Scriptures; but both Scripture and reason warrant us in believing that provision will be made for all such persons in the world to come. A principal part of our future happiness will consist, according to the Christian doctrine, in the enlarging and cor-

recting of our knowledge respecting God, his nature, attributes, and works, and in the salutary application of this knowledge to our own moral benefit, to the increase of our faith, love, and obedience.

In the Scripture revelations respecting heaven Christ is always represented as one who will be *personally visible* to us, and whose personal, familiar intercourse and guidance we shall enjoy. Herein Christ himself places a chief part of the joy of the saints (John xiv. xvii., &c.); and the apostles often describe the blessedness of the pious by the phrase *being with Christ*. To his guidance has God intrusted the human race, in heaven and on earth. And Paul says (2 Cor. iv. 6), we see 'the brightness of the divine glory in the face of Christ,' he is 'the visible representative of the invisible God' (Col. i. 15). According to the representation contained in the Holy Scriptures, the saints will dwell together in the future world, and form, as it were, a kingdom or state of God (Luke xvi.; xx. 38; Rom. viii. 10; Rev. vii. 9; Heb. xii. 22). They will there partake of a common felicity. Their enjoyment will doubtless be very much heightened by friendship, and by their confiding intercourse with each other.

1. **HEBER** (*one of the other side*), son of Salah, who became the father of Peleg at the age of 34 years, and died at the age of 464 (Gen. x. 24; xi. 14; i Chron. i. 25). His name occurs in the genealogy of Christ (Luke iii. 35). There is nothing to constitute Heber an historical personage; but there is a degree of interest connected with him from the notion, which the Jews themselves entertain, that the name of Hebrews, applied to them, was derived from this alleged ancestor of Abraham.

2. **HEBER**, a descendant of Hobab, son of Jethro, and brother of the wife of Moses. His wife was the Jael who slew Sisera, and he is called Heber the Kenite (Judg. iv. 11, 17; v. 24), which seems to have been a name for the whole family (Judg. i. 16). Heber appears to have lived separate from the rest of the Kenites, leading a patriarchal life, amid his tents and flocks. He must have been a person of some consequence, from its being stated that there was peace between the house of Heber and the powerful king Jabin. At the time the history brings him under our notice his camp was in the plain of Zaanaim, near Kedesh in Naphtali (**JAEL; KENITES**).

HEBREW OF THE HEBREWS, emphatically a Hebrew, one who was so by both parents, and that by a long series of ancestors, without admixture of Gentile or even proselyte blood.

HEBREWS, EPISTLE TO THE. In the received text this composition appears as part of the Canonical Scriptures of the New Testament, and also as the production of the apostle Paul. But on no subject, perhaps, in the department of the higher criticism of the New Testament, have opinions been more divided and more keenly discussed, than on this. Of those who have rejected the claims of the apostle Paul to the authorship of this epistle, some have advocated those of Barnabas, others those of Luke, others those of Clement of Rome, others those of Silas, others those of Apollon, others those of some unknown Christian of Alexandria, and others those of some 'apostolic man,' whose name is no less unknown. Of these hypotheses some are so purely conjectural

and destitute of any basis either historical or internal, that the bare mention of them as the vagaries of learned men is almost all the notice they deserve. Our limited space will not permit us to enter upon an examination of these theories; we must therefore content ourselves with presenting a condensed outline of the evidence that the epistle was written by the Apostle Paul; and we shall commence with the *internal* evidence.

1. A person familiar with the doctrines on which Paul is fond of insisting in his acknowledged epistles, will readily perceive that there is such a correspondence in this respect between these and the Epistle to the Hebrews, as supplies good ground for presuming that the latter proceeded also from his pen. That Christianity as a system is superior to Judaism in respect of clearness, simplicity, and moral efficiency; that the former is the substance and reality of what the latter had presented only the typical adumbration; and that the latter was to be abolished to make way for the former, are points which, if more fully handled in the Epistle to the Hebrews, are familiar to all readers of the Epistles of Paul (comp. 2 Cor. iii. 6-19; Gal. iii. 22; iv. 1-9, 21-31; Col. ii. 16, 17, &c.). The same view is given in this epistle as in those of Paul, of the divine glory of the Mediator, as the 'image of God,' the reflection or manifestation of Deity to man (comp. Col. i. 15-20; Phil. ii. 6; Heb. i. 3, &c.); His condescension is described as having consisted in an impoverishing, and lessening, and lowering of Himself for man's behalf (2 Cor. viii. 9; Phil. ii. 7, 8; Heb. ii. 9); and His exaltation is set forth as a condition of royal dignity, which shall be consummated by all His enemies being put under His footstool (1 Cor. xv. 25-27; Heb. ii. 8; x. 13; xii. 2). He is represented as discharging the office of a mediator, a word which is never used except by Paul and the writer of this epistle (Gal. iii. 19, 20; Heb. viii. 6); His death is represented as a sacrifice for the sins of man; and the peculiar idea is announced in connection with this, that He was prefigured by the sacrifices of the Mosaic dispensation (Rom. iii. 22-26; 1 Cor. v. 7; Eph. i. 7; v. 2; Heb. vii.-x.). Peculiar to Paul and the author of this epistle is the phrase 'the God of peace' (Rom. xv. 33, &c.; Heb. xiii. 20). It is worthy of remark also that the momentous question of a man's personal acceptance with God is answered in this epistle in the same peculiar way as in the acknowledged Epistles of Paul. All is made to depend upon the individual's exercising what both Paul and the author of this epistle call 'faith,' and which they both represent as a realizing apprehension of the facts, and truths, and promises of revelation. By both also the power of this 'faith' is frequently referred to and illustrated by the example of those who had distinguished themselves in the annals of the Jewish race (comp. Rom. iii. 4; v. 2; Heb. iii. 6; Gal. iii. 5-14; Heb. x. 38; xi. 40). On all these points the sentiments of this epistle are so obviously Pauline, that even the most decided opponents of its Pauline authorship in recent times have laid it down as undeniable that it must have been written by some companion and disciple of Paul. 2. Some of the figures and allusions employed in this epistle are strictly Pauline. Thus the word of God is compared to a *sword* (Eph. vi. 17; Heb. iv. 12); inexperienced Christians are

children who need milk, and must be instructed in the elements, whilst those of maturer attainments are full-grown men who require strong meat (1 Cor. iii. 1, 2; xiv. 20; Gal. iv. 9; Col. iii. 14; Heb. v. 12, 13; vi. 1); redemption through Christ is an introduction and an entrance with confidence unto God (Rom. v. 2; Eph. ii. 18; iii. 12; Heb. x. 19); afflictions are a contest or strife (Phil. i. 30; Col. ii. 1; Heb. x. 32); the Christian life is a race (1 Cor. ix. 24; Phil. iii. 14; Heb. xii. 1); a person under the constraint of some unworthy feeling or principle is 'a subject of bondage' (Gal. v. 1; Heb. ii. 15), &c. The fact that these and other such like figurative phrases occur only in this epistle and in the acknowledged Epistles of Paul, affords strong evidence that the former is his production, for in nothing does a writer more readily betray himself than by the use of peculiar and favourite figures. 3. Certain unmarked characteristics of Paul's style are found in this epistle. Paley, in enumerating these (*Horæ Paulinæ*), has laid stress chiefly on the following: A disposition to the frequent use of a word, which cleaves as it were to the memory of the writer, so as to become a sort of *cant* word in his writings; a propensity 'to go off at a word,' and enter upon a parenthetic series of remarks suggested by that word; and a fondness for the periphrasis, or play upon words. In the Epistle to the Hebrews these peculiarities of Paul's style are richly exemplified. 4. There is a striking analogy between Paul's use of the Old Testament and that made by the writer of this epistle. Both make frequent appeals to the Old Testament; both are in the habit of accumulating passages from different parts of the Old Testament, and making them bear on the point under discussion (comp. Rom. iii. 10-18; ix. 7-33, &c.; Heb. i. 5-14; iii. 1; x. 5-17); both are fond of linking quotations together by means of the expression 'and again' (comp. Rom. xv. 9-12; 1 Cor. iii. 19, 20; Heb. i. 5; ii. 12, 13; iv. 4; x. 30); both make use of the same passages, and that occasionally in a sense not naturally suggested by the context whence they are quoted (1 Cor. xv. 27; Eph. i. 22; Heb. ii. 8; Rom. i. 17; Gal. iii. 11; Heb. x. 38); and both, in one instance, quote the same passage in the same way, but in a form in which it does not agree with the Sept., and with an addition of the words 'saith the Lord,' not found in the Hebrew; thereby indicating that the passage is given in both instances as it was present to the memory of one and the same writer (comp. Rom. xii. 19; Heb. x. 30). *In fine*: The Epistle to the Hebrews contains some personal allusions on the part of the writer which strongly favour the supposition that he was Paul. These are the mention of his intention to pay those to whom he was writing a visit speedily, in company with Timothy, whom he affectionately styles 'our brother,' and whom he describes as having been set at liberty, and expected soon to join the writer (Heb. xiii. 23); the allusion to his being in a state of imprisonment at the time of writing, as well as of his having partaken of their sympathy while formerly in a state of bondage among them (Heb. xiii. 19; x. 34); and the transmission to them of a salutation from the believers in Italy (Heb. xiii. 24); all of which agree well with the supposition that Paul wrote this epistle while a prisoner at Rome.

It now remains that we should look at the ex-

ternal evidence bearing on this question. Here we shall find the same conclusion still more decisively supported.

Passing by, as somewhat uncertain, the alleged testimony of Peter, who is supposed (2 Pet. iii. 15, 16) to refer to the Epistle to the Hebrews as the composition of Paul, and passing by, also, the testimonies of the apostolic fathers, which, though very decisive as to the antiquity and canonical authority of this epistle, yet say nothing to guide us to the author, we come to the testimony of the Eastern church upon this subject. Here we meet the important fact, that of the Greek fathers not one ascribes this epistle to any but Paul. Nor does it appear that in any part of the Eastern church the Pauline origin of this epistle was ever doubted or suspected.

In the Western church this epistle did not meet with the same early and universal reception. Notwithstanding the regard shown for it by Clement, the church at Rome seems to have placed it under a ban; and hence Tertullian ascribed it to Barnabas, and others to Luke and Clement, whilst no Latin writer is found during the first three centuries who ascribed it to Paul. In the middle of the fourth century, Hilary of Poitiers quotes it as Paul's; and from that time the opinion seems to have gained ground till the commencement of the fifth century, when it speedily became as general in the Western as it had been in the Eastern churches.

The result of the previous inquiry may be thus stated. 1. There is no substantial evidence external or internal in favour of any claimant to the authorship of this epistle except Paul. 2. There is nothing incompatible with the supposition that Paul was the author of it. 3. The preponderance of the internal, and all the direct external, evidence, go to show that it was written by Paul.

Assuming the Pauline authorship of the epistle, it is not difficult to determine *when* and *where* it was written. The allusions in ch. xiii. 19, 21, point to the closing period of the apostle's two years' imprisonment at Rome as the season during 'the serene hours' of which, as Hug describes them, he composed this noblest production of his pen. In this opinion almost all who receive the epistle as Paul's concur; and even by those who do not so receive it, nearly the same time is fixed upon, in consequence of the evidence furnished by the epistle itself of its having been written a good while after those to whom it is addressed had become Christians, but yet before the destruction of the Temple.

That the parties to whom this epistle was addressed were converted Jews, the epistle itself plainly shows. Ancient tradition points out the church at Jerusalem, or the Christians in Palestine generally, as the recipients. Stuart contends for the church at Casarea, not without some show of reason.

Some have doubted whether this composition be justly termed an epistle, and have proposed to regard it rather as a treatise. The salutations, however, at the close, seem rather to favour the common opinion; though it is of little moment which view we espouse.

The design of this epistle is to dissuade those to whom it is written from relapsing into Judaism, and to exhort them to hold fast the truths of

Christianity which they had received. For this purpose the apostle shows the superiority of the latter over the former, in that it was introduced by one far greater than angels, or than Moses, from whom the Jews received their economy (i. iii.), and in that it affords a more secure and complete salvation to the sinner than the former (iv.-x.). In demonstrating the latter position the apostle shows that in point of dignity, perpetuity, sufficiency, and suitableness, the Jewish priesthood and sacrifices were far inferior to those of Christ, who was the substance and reality, whilst these were but the type and shadow. He shows, also, that by the appearance of the anti-type the type is necessarily abolished; and adduces the important truth, that now, through Christ, the privilege of personal access to God is free to all. On all this he founds an exhortation to a life of faith and obedience, and shows that it has ever been only by a spiritual recognition and worship of God that good men have participated in his favour (xi.). The epistle concludes, as is usual with Paul, with a series of practical exhortations and pious wishes (xii.-xiii.).

HEBRON, a town in the south of Palestine and in the tribe of Judah, 18 miles south from Jerusalem, in $31^{\circ} 32' 30''$ N. lat., $35^{\circ} 8' 20''$ E. long., at the height of 2,64 Paris feet above the level of the sea. It is one of the most ancient cities existing, having, as the sacred writer informs us, been built seven years before Zoan in Egypt, and being mentioned even prior to Damascus (Num. xiii. 22; Gen. xiii. 18; comp. xv. 2). Its most ancient name was Kirjath-arba, that is, 'the city of Arba,' from Arba, the father of Anak and of the Anakim who dwelt in and around Hebron (Gen. xxiii. 2; Josh. xiv. 15; xv. 3; xxi. 12; Judg. i. 10). It appears to have been also called Mamre, probably from the name of Abraham's Amoritic ally (Gen. xxiii. 19; xxxv. 27; comp. xiv. 13, 28). The ancient city lay in a valley; and the two remaining pools, one of which at least existed in the time of David, serve, with other circumstances, to identify the modern with the ancient site (Gen. xxxvii. 14; 2 Sam. iv. 12). Much of the life-time of Abraham, Isaac, and Jacob was spent in this neighbourhood, where they were all entombed; and it was from hence that the patriarchal family departed for Egypt by the way of Beersheba (Gen. xxxvii. 14; xlv. 1). After the return of the Israelites, the city was taken by Joshua and given over to Caleb, who expelled the Anakim from its territories (Josh. x. 36, 37; xiv. 6-15; xv. 13, 14; Judg. i. 20). It was afterwards made one of the cities of refuge, and assigned to the priests and Levites (Josh. xx. 7; xxi. 11, 13). David, on becoming king of Judah, made Hebron his royal residence. Here he reigned seven years and a half; here most of his sons were born; and here he was anointed king over all Israel (1 Sam. ii. 1-4, 11; 1 Kings ii. 11; 2 Sam. v. 1, 3). On this extension of his kingdom Hebron ceased to be sufficiently central, and Jerusalem then became the metropolis. It is possible that this step excited a degree of discontent in Hebron which afterwards encouraged Absalom to raise in that city the standard of rebellion against his father (2 Kings xv. 9, 10). Hebron was one of the places fortified by Rehoboam (2 Chron. xi. 10); and after the exile the Jews who returned to Pal-

estine occupied Hebron and the surrounding villages (Neh. xi. 15).

Hebron is not named by the prophets, nor in the New Testament; but we learn from the first book of Maccabees, and from Josephus, that it came into the power of the Edomites, who had taken possession of the south of Judah, and was recovered from them by Judas Maccabeus. During the great war, Hebron was seized by the rebel Simon Giorides, but was re-captured and burnt by Cerealis, an officer of Vespasian. Josephus describes the tombs of the patriarchs as existing in his day; and both Eusebius and Jerome, and all subsequent writers who mention Hebron down to the time of the Crusades, speak of the place chiefly as containing these sepulchres. Among the Moslems it is still called el-Khulil, from the name which they give to Abraham, meaning 'the friend' (of God).

Since the capture of Jerusalem by Saladin in 1187, Hebron has always remained in the possession of the Moslems. In the modern history of Hebron the most remarkable circumstance is the part which the inhabitants of the town and district took in the rebellion of 1834, and the heavy retribution which it brought down upon them. They held out to the last, and gave battle to Ibrahim Pasha near Solomon's Pools. They were defeated; but retired and entrenched themselves in Hebron, which Ibrahim carried by storm, and gave over to sack and pillage. The town has not yet recovered from the blow it then sustained.

In the fourteenth century pilgrims passed from Sinai to Jerusalem direct through the desert by Beersheba and Hebron, and it continued to be occasionally visited by European travellers down to the latter part of the seventeenth century; but from that time till the present century it appears to have been little frequented by them.

The town of Hebron lies low down on the sloping sides of a narrow valley (of Mamre), chiefly on the eastern side, but in the southern part stretches across also to the western side. The houses are all of stone, high and well built, with windows and flat roofs, and on these roofs are small domes, sometimes two or three to each house. The shops are well furnished, better indeed than those of towns of the same class in Egypt, and the commodities are of a very similar description. The only display of local manufactures is the produce of the glass-works, for which the place has long been celebrated in these parts. Gates are placed not only at the entrance of the city, but in different parts of the interior, and are closed at night for the better preservation of order, as well as to prevent communication between the different quarters.

There are nine mosques in Hebron, none of which possess any architectural or other interest, with the exception of the massive structure which is built over the tombs of the patriarchs. This is esteemed by the Moslems one of their holiest places, and Christians are rigorously excluded from it. At the period, however, when the Holy Land was in the power of the Christians, access was not denied; and Benjamin of Tudela says that the sarcophagi above ground were shown to the generality of pilgrims as what they desired to see; but if a rich Jew offered an additional fee, 'an iron door is opened, which dates from

the time of our forefathers who rest in peace, and with a burning taper in his hands the visitor descends into a first cave, which is empty, traverses a second in the same state, and at last reaches a third, which contains six sepulchres, those of Abraham, Isaac, and Jacob, and of Sarah, Rebekah, and Leah, one opposite the other. All these sepulchres bear inscriptions, the letters being engraved; thus upon that of Abraham: "This is the sepulchre of our father Abraham, upon whom be peace;" even so upon that of Isaac and all the other sepulchres. The identity of this place with the cave of Machpelah has not been called in question.

The court in which the mosque stands is surrounded by an extensive and lofty wall, formed of large stones, and strengthened by square buttresses. This wall is the greatest antiquity in Hebron, and even Dr. Robinson supposes that it may be substantially the same which is mentioned by Josephus, and by Eusebius and Jerome as the sepulchre of Abraham. Besides this venerable wall, there is nothing at Hebron bearing the stamp of antiquity, save two reservoirs for rain water outside the town. As these pools are doubtless of high antiquity, one of them is in all likelihood the 'pool of Hebron' over which David hanged up the assassins of Ishbosheth (2 Sam. iv. 12).

The present population of Hebron has not been clearly ascertained, but it probably amounts to about 5000. Most of the inhabitants are Moslems, of fierce and intolerant character. There are no resident Christians. The Jews amount to about one hundred families, mostly natives of different countries of Europe, who have emigrated to this place for the purpose of having their bones laid near the sepulchres of their illustrious ancestors. They have two synagogues and several schools.

The environs of Hebron are very fertile. Vineyards and plantations of fruit-trees, chiefly olive-trees, cover the valleys and arable grounds; while the tops and sides of the hills, although stony, are covered with rich pastures, which support a great number of cattle, sheep, and goats, constituting an important branch of the industry and wealth of Hebron. The hill country of Judah, of which it is the capital, is indeed highly productive, and under a paternal government would be capable of sustaining a large population. That it did so once, is manifest from the great number and extent of ruined terraces and dilapidated towns. It is at present abandoned, and cultivation ceases at the distance of two miles north of the town. The hills then become covered with prickly and other stunted trees, which furnish Bethlehem and other villages with wood.

HEIFER, RED. [SACRIFICE.]

HEIR. [BIRTHRIGHT; INHERITANCE.]

HELBON, or CHELBON, a name which occurs only in Ezek. xxvii. 18, where 'the wine of Helbon' is named among the commodities brought to the great market of Tyre. Helbon is supposed to be identified with Chalybon, an old city of Syria, famous for wine.

Now, it is generally agreed that the ancient Chalybon is represented by the modern Aleppo. Aleppo, styled by the natives Haleb, is situated in N. lat. 36° 11' 25", E. long. 37° 9', and is seventy-six miles from the sea by way of Scanderoon, in a

straight line, and ninety miles by way of Antioch. It is one of the few ancient cities of these parts which have retained their ancient importance; and this it owes to its happy position upon the line of the commercial intercourse of Asia Minor and Syria with Egypt, and of Europe and Westernmost Asia with the countries beyond the Euphrates. It has long ranked as the capital of Syria, and as the third, if not the second city of the Ottoman empire. It has suffered dreadfully from earthquakes at different times, and has never recovered the terrible visitation of this kind which it sustained in 1822: the population, which was formerly reckoned above 200,000, is not supposed to reach half that number at present.

HELL, the name given in our Authorized Version of the Scriptures to the place of final punishment for sinners. It is also distinctively indicated by such phrases as 'the place of torment' (Luke xvi. 28); 'everlasting fire' (Matt. xxv. 41); 'the hell of fire, where the worm dieth not, and the fire is not quenched' (Mark ix. 44). The dreadful nature of the abode of the wicked is implied in various figurative expressions, such as 'outer darkness,' 'I am tormented in this flame,' 'furnace of fire,' 'unquenchable fire,' 'where the worm dieth not,' 'the blackness of darkness,' 'torment in fire and brimstone,' 'the ascending smoke of their torment,' 'the lake of fire that burneth with brimstone' (Matt. viii. 12; xiii. 42; xxii. 13; xxv. 30; Luke xvi. 24; comp. Matt. xxv. 41; Mark ix. 43-48; Jude 13; comp. Rev. xiv. 10, 11; xix. 20; xx. 14; xxi. 8). The figure by which hell is represented as burning with fire and brimstone is probably derived from the fate of Sodom and Gomorrah, as well as that which describes the smoke as ascending from it (comp. Rev. xiv. 10, 11, with Gen. xix. 24, 28). To this coincidence of description Peter also most probably alludes in 2 Pet. ii. 6.

The names which in many of the other instances are given to the punishments of hell are doubtless in part figurative, and many of the terms which were commonly applied to the subject by the Jews are retained in the New Testament. The images, it will be seen, are generally taken from death, capital punishments, tortures, prisons, &c. And it is the obvious design of the sacred writers, in using such figures, to awaken the idea of something terrible and fearful. They mean to teach that the punishments beyond the grave will excite the same feelings of distress as are produced on earth by the objects employed to represent them. We are so little acquainted with the state in which we shall be hereafter, and with the nature of our future body, that no strictly literal representation of such punishments could be made intelligible to us. Many of the Jews, indeed, and many of the Christian fathers, took the terms employed in Scripture in an entirely literal sense, and supposed there would be actual fire, &c. in hell. But from the words of Christ and his apostles nothing more can with certainty be inferred than that they meant to denote great and unending miseries.

The punishments of sin may be distinguished into two classes.—1. *Natural* punishments, or such as necessarily follow a life of servitude to sin: 2. *Positive* punishments, or such as God shall see fit, by his sovereign will, to inflict.

1. Among the natural punishments we may rank the privation of eternal happiness (Matt. vii. 21, 23; xxii. 13; xxv. 41; comp. 2 Thess. i. 9); the painful sensations which are the natural consequence of committing sin, and of an impenitent heart; the propensities to sin, the evil passions and desires which in this world fill the human heart, and which are doubtless carried into the world to come. The company of fellow-sinners and of evil spirits, as inevitably resulting from the other conditions, may be accounted among the natural punishments, and must prove not the least grievous of them.

2. The positive punishments have been already indicated. It is to these chiefly that the Scripture directs our attention. 'There are but few men in such a state that the merely natural punishments of sin will appear to them terrible enough to deter them from the commission of it. Experience also shows that to threaten positive punishment has far more effect, as well upon the cultivated as the uncultivated, in deterring them from crime, than to announce, and lead men to expect, the merely natural consequences of sin, be they ever so terrible. Hence we may see why it is that the New Testament says so little of natural punishments (although these beyond question await the wicked), and makes mention of them in particular far less frequently than of positive punishments; and why, in those passages which treat of the punishments of hell, such ideas and images are constantly employed as suggest and confirm the idea of positive punishments.'

As the sins which shut out from heaven vary so greatly in quality and degree, we should expect from the justice of God a corresponding variety both in the natural and the positive punishments. This is accordingly the uniform doctrine of Christ and his apostles. 'The servant who knows his lord's will and does it not, deserves to be beaten with many stripes.' 'To whom much is given, of him much will be required' (Matt. x. 15; xi. 22, 24; xxiii. 15; Luke xii. 48). Hence St. Paul says that the heathen who acted against the law of nature would indeed be punished; but that the Jews would be punished more than they, because they had more knowledge (Rom. ii. 9-29). In this conviction, that God will, even in hell, justly proportion punishment to sin, we must rest satisfied. We cannot now know more; the precise degrees as well as the precise nature of such punishments are things belonging to another state of being, which in the present we are unable to understand.

HELLENIST. In the New Testament this word seems to be appropriated as the name of those persons who, being of Jewish extraction, nevertheless talked Greek as their mother-tongue; which was the case generally with the Jews in Egypt, Syria, Asia Minor, and Greece; and in fact through the influence of the Greek cities in northern Palestine (Decapolis), it would appear that the Galileans from their childhood learned nearly as much Greek as Hebrew. The appellation *Hellenist* is opposed to that of *Hebrew* in Acts vi. 1; in Acts ix. 23, the reading is not so certain, yet probably it should there also be 'Hellenists,' meaning unconverted Jews.

HELMET. [ARMS; ARMOUR.]

HELPS. In the New Testament it occurs once, viz. in the enumeration of the several

orders or classes of persons possessing miraculous gifts among the primitive Christians (1 Cor. xii. 28), where it seems to be used by metonymy, the abstract for the concrete, and to mean *helpers*; like the words 'miracles,' i. e. *workers* of miracles; 'governments,' that is, *governors*, &c., in the same enumeration. The Americans, it is well known, by a similar idiom, call their servants 'helps.' Great difficulty attends the attempt to ascertain the nature of the office so designated among the first Christians. Many conjectures have been hazarded regarding it; but after all it must be confessed, with Doddridge, that 'we can only guess at the meaning of the words in question, having no principles on which to proceed in fixing it absolutely.'

1. HEMAN, a person of the tribe of Judah, named with others celebrated for their wisdom, to which that of Solomon is compared (1 Kings iv. 31; 1 Chron. ii. 6). The considerations stated under ERMAN will distinguish this Heman from the following, with whom he is sometimes confounded.

2. HEMAN, a Kohathite of the tribe of Levi, and one of the leaders of the temple-music as organized by David (1 Chron. vi. 33; xvi. 41, 42). This, doubtless, is the Heman to whom the 88th Psalm is ascribed.

HERAKLES is mentioned in 2 Macc. iv. 19, as the Tyrian god to whom the Jewish high-priest Jason sent a religious embassy, with the offering of 300 drachmæ of silver. There can be little doubt that this Tyrian Hercules is the same as the Tyrian Baal, whose worship prevailed in the reign of Ahab, and was introduced directly from Phœnicia by Ahab's marriage with the Sidonian princess Jezebel (1 Kings xvi. 31).

The power of nature, which was worshipped under the form of the Tyrian Hercules, Melkarth, Baal, Adonis, Moloch, and whatever his other names are, was that which originates, sustains, and destroys life. These functions of the Deity, according to the Phœnicians, were represented, although not exclusively, by the *sun*, the influence of which both animates vegetation by its genial warmth, and scorches it up by its fervour.

Almost all that we know of the worship of the Tyrian Hercules is preserved by the classical writers, and relates chiefly to the Phœnician colonies, and not to the mother-state. The eagle, the lion, and the thunny-fish, were sacred to him, and are often found on Phœnician coins. Pliny expressly testifies that human sacrifices were offered up every year to the Carthaginian Hercules; which coincides with what is stated of Baal in Jer. xix. 5, and with the acknowledged worship of Moloch.

HERMAS, one of the Christians at Rome to whom Paul addressed special salutations in his Epistle (Rom. xvi. 14). Of his history and station in life nothing is known. By several writers, ancient and modern, he has been reputed to be the author of a work entitled *The Shepherd of Hermas*, which, from its high antiquity and the supposed connection of the writer with St. Paul, has been usually classed with the epistles of the so-called Apostolic Fathers. It was originally written in Greek, but we possess it only in a Latin version (as old as the time of Tertullian), a few fragments excepted, which are found as

quotations in other ancient authors. It has been divided by modern editors (for in the manuscript copies there is no such division) into three books; the first consisting of four visions, the second of twelve commands, and the third of ten similitudes. It is called 'The Shepherd,' because the Angel of Repentance, at whose dictation Ilermas professes that he wrote the second and third books, appeared in the garb of a shepherd. It is doubtful whether the author really believed that he saw the visions he describes, or merely adopted the fiction to render his work more attractive. Impartial judges will probably agree with Mosheim, that '*The Shepherd*' contains such a mixture of folly and superstition with piety, of egregious nonsense with momentous truth, as to render it a matter of astonishment that men of learning should ever have thought of giving it a place among the inspired writings.

HERMES, the Mercurius of the Romans, was the messenger of the gods, and was equally characterized by adroitness of action and readiness of speech. He was also the customary attendant of Jupiter when he appeared on earth. These circumstances explain why the inhabitants of Lystra (Acts xiv. 12), as soon as ever they were disposed to believe that the gods had visited them in the likeness of men, discovered Hermes in Paul, as the chief speaker, and as the attendant of Jupiter.

HERMOGENES and PHYCELLUS, disciples of Asia Minor, and probably companions in labour of St. Paul. They abandoned him during his second imprisonment at Rome, doubtless from alarm at the perils of the connection (2 Tim. i. 15).

HERMON, a mountain which formed the northernmost boundary of the country beyond the Jordan which the Hebrews conquered from the Amorites (Deut. iii. 8), and which, therefore, must have belonged to Anti-Libanus. Since modern travellers have made us acquainted with the country beyond the Jordan, no doubt has been entertained that the Mount Hermon of those texts is no other than the present Jebel esh-sheikh, or the Sheikh's mountain, or, which is equivalent, Old Man's Mountain, a name it is said to have obtained from its fancied resemblance (being topped with snow, which sometimes lies in lengthened streaks upon its sloping ridges) to the hoary head and beard of a venerable sheikh. This Jebel esh-sheikh is a south-eastern, and in that direction culminating, branch of Anti-Libanus. It is probably the highest of all the Lebanon mountains, and is thought to rival Mont Blanc, though, as Elliot observes, the high ground on which it stands detracts considerably from its apparent altitude, and makes it a less imposing object than that king of European mountains as viewed from the Italian valley of Aosta. Its top is covered with snow throughout the summer, and must therefore rise above the point of perpetual congelation, which in this quarter is about 11,000 feet. It might, perhaps, be safe to add another 1000 feet for the height above that point, making in all 12,000 feet; but we must wait the result of more accurate observations than have yet been made.

HERODIAN FAMILY. Josephus introduces us to the knowledge of the Herodian family in the fourteenth book of his *Antiquities*. He there

tells us (c. i. § 3) that among the chief friends of Hyrcanus, the high-priest, was an Idumean, named Antipater, distinguished for his riches, and no less for his turbulent and seditious temper. He also quotes an author who represented him as descended from one of the best of the Jewish families which returned from Babylon after the captivity, but adds that this statement was founded on no better grounds than a desire to flatter the pride and support the pretensions of Herod the Great. The times were favourable to men of Antipater's character; and, while he obtained sovereign authority over his native province of Idumæa, he contrived to subject Hyrcanus completely to his will, and to induce him to form an alliance with Aretas, from which he trusted to secure the best means for his own aggrandizement. Having so far accomplished his designs as to make himself the favourite ally of Rome, he obtained for his son Phasaelus the governorship of Jerusalem, and for Herod, then only fifteen years old, the chief command in Galilee.

Herod soon distinguished himself by his talents and bravery. The country was at that time infested with numerous bands of robbers. These he assailed and vanquished, and his success was proclaimed, not only throughout Galilee, but in Judea and the neighbouring countries. This increasing popularity of a member of the family of Antipater alarmed the ruling men at Jerusalem, and they willingly hearkened to the complaints made against Herod by some of the relatives of those whom he had slain. He was accordingly summoned to take his trial before the Sanhedrim: nor did he disobey the summons; but on the day of trial he appeared at the tribunal gorgeously clad in purple, and surrounded by a numerous band of armed attendants. His acquittal was speedily pronounced. One only of the judges ventured to speak of his guilt, and the venerable old man prophesied that, sooner or later, this same Herod would punish both them and Hyrcanus for their pusillanimity.

In the events which followed the death of Cæsar, Herod found fresh opportunities of accomplishing his ambitious designs. By collecting a considerable tribute for Cassius in Galilee, he obtained the friendship of that general, and was appointed to the command of the army in Syria. No less successful with Marc Antony, he overcame the powerful enemies who represented the dangerous nature of his ambitious views, and was exalted, with his brother Phasaelus, to the dignity of tetrarch of Judea. They had not, however, long enjoyed their office when the approach of Antigonus against Jerusalem compelled them to meditate immediate flight. Phasaelus and Hyrcanus fell into the hands of the enemy; but Herod, making good his escape, hastened to Rome, where he pleaded his cause and his former merits with so much skill, that he was solemnly proclaimed king of the Jews, and endowed with the proper ensigns and rights of royalty. Augustus, three years afterwards, confirmed this act of the senate; and Herod himself scrupled not to perpetrate the most horrible crimes to give further stability to his throne. The murder of his wife Mariamne, a daughter of Hyrcanus, and of his two sons Alexander and Aristobulus, place him in the foremost rank of those tyrants whose names blacken the page of history. Of the massacre at Bethlehem

the Jewish historian says nothing; but it has been well observed that such an event, in a reign marked by so many horrible deeds, and occurring as it did in a small, obscure town, was not likely to obtain a place in the national annals. The reign of Herod, prolonged through thirty-seven years, was in many respects prosperous; and the splendour of his designs restored to Jerusalem, as a city, much of its earlier magnificence.

According to the custom of the times, Herod made his sons the heirs to his kingdom by a formal testament, leaving its ratification to the will of the emperor. Augustus assenting to its main provisions, Archelaus became tetrarch of Judæa, Samaria, and Idumæa; Philip, of Trachonitis and Ituræa; and

HEROD ANTIPAS, of Galilee and Peræa. This Herod was first married to a daughter of King Aretas of Arabia; but forming an unholy attachment for Herodias, the wife of his brother Philip, he soon became involved in a course of guilt which ended in his utter ruin. Aretas, to avenge his daughter, sent a considerable army against Herod, whose generals in vain attempted to oppose its progress. The forces which they led were totally destroyed, and instant ruin seemed to threaten both Herod and his dominions. An appeal to the Romans afforded the only hope of safety. Aretas was haughtily ordered by the emperor to desist from the prosecution of the war; and Herod accordingly escaped the expected overthrow. But he was not allowed to enjoy his prosperity long. His nephew Agrippa having obtained the title of King, Herodias urged him to make a journey to Italy and demand the same honour. He weakly assented to his wife's ambitious representations; but the project proved fatal to them both. Agrippa anticipated their designs; and when they appeared before Caligula they were met by accusations of hostility to Rome, the truth of which they in vain attempted to disprove. Sentence of deposition was accordingly passed upon Herod, and both he and his wife were sent into banishment, and died at Lyons in Gaul.

HEROD AGRIPPA, alluded to above, was the son of Aristobolus, so cruelly put to death by his father Herod the Great. The earlier part of his life was spent at Rome, where the magnificence and luxury in which he indulged reduced him to poverty. After a variety of adventures and sufferings he was thrown into bonds by Tiberius; but on the succession of Caligula was not only restored to liberty, but invested with royal dignity, and made tetrarch of Abilene, and of the districts formerly pertaining to the tetrarchy of Philip. His influence at the Roman court increasing, he subsequently obtained Galilee and Peræa, and at length Judæa and Samaria, his dominion being thus extended over the whole country of Palestine.

To secure the good-will of his subjects, he yielded to their worst passions and caprices. Memorable instances are afforded of this in the apostolic history, where we are told that 'He stretched forth his hands to vex certain of the church, and he killed James, the brother of John, with the sword; and because he saw it pleased the Jews, he proceeded further to take Peter also' (Acts xii. 1-3). His awful death, described in the same chapter, and by Josephus almost in the same words, occurred in the fifty-fourth year of his age.

HEROD AGRIPPA, the son of the above-named, was in his seventeenth year when his father died. The emperor Claudius, at whose court the young Agrippa was then residing, purposed conferring upon him the dominions enjoyed by his father. From this he was deterred, says Josephus, by the advice of his ministers, who represented the danger of trusting an important province of the empire to so youthful a ruler. Herod was, therefore, for the time, obliged to content himself with the small principality of Chalcis, but was not long after created sovereign of the tetrarchies formerly belonging to Philip and Lysanias; a dominion increased at a subsequent period by the grant of a considerable portion of Peræa. The habits which he had formed at Rome, and his strong attachment to the people to whose rulers he was indebted for his prosperity, brought him into frequent disputes with his own nation. He died, at the age of seventy, in the early part of the reign of Trajan.

HERODIANS, a class of Jews that existed in the time of Jesus Christ, whether of a political or religious description it is not easy, for want of materials, to determine. The passages of the New Testament which refer to them are the following: Mark iii. 6; xii. 13; Matt. xxii. 16; Luke xx. 20. They were associated with the emissaries of the chief priests sent to our Lord with the express but covert design of ensnaring him in his speech, that thus they might compass his destruction. The question they put to him was one of the most difficult—'Is it lawful to pay tribute to Cæsar?' The way in which Jesus extricated himself from the difficulty and discomfited his enemies is well known.

Herod Antipas, Tetrarch of Galilee, was at that time specially the ruler of Jesus, whose home was in that province. The Herodians then may have been subjects of Herod, Galileans, whose evidence the priests were wishful to procure, because theirs would be the evidence of fellow-countrymen, and of special force with Antipas as being that of his own immediate subjects (Luke xxiii. 7).

Herod's relations with Rome were in an unsafe condition. He was a weak prince, given to ease and luxury, and his wife's ambition conspired with his own desires to make him strive to obtain from the Emperor Caligula the title of king. For this purpose he took a journey to Rome, and was banished to Lyons in Gaul.

The Herodians may have been favourers of his pretensions: if so, they would be partial hearers, and eager witnesses against Jesus before the Roman tribunal. It would be a great service to the Romans to be the means of enabling them to get rid of one who aspired to be king of the Jews. It would equally gratify their own lord, should the Herodians give effectual aid in putting a period to the mysterious yet formidable claims of a rival claimant of the crown.

We do not see that the two characters here ascribed to the Herodians are incompatible; and if they were a Galilean political party who were eager to procure from Rome the honour of royalty for Herod (Mark vi. 14, the name of king is merely as of courtesy), they were chosen as associates by the Sanhedrim with special propriety.

The deputation were to 'feign themselves just men,' that is, men whose sympathies were entirely

Jewish, and, as such, anti-heathen: they were to intimate their dislike of paying tribute, as being an acknowledgment of a foreign yoke; and by flattering Jesus, as one who loved truth, feared no man, and would say what he thought, they meant to inveigle him into a condemnation of the practice. In order to carry these base and hypocritical designs into effect, the Herodians were appropriately associated with the Pharisees; for as the latter were the recognised conservators of Judaism, so the former were friends of the aggrandisement of a native as against a foreign prince.

HERODIAS. [HERODIAN FAMILY.]

HERON (Lev. xi. 19; Deut. xiv. 18). The original word *anaphah* is a disputed name of an unclean bird, and which has also been translated kite, woodcock, parrot, and crane. For the first of these see GLEDE; the second is rare and only a momentary visitor in Palestine; the third, surely, required no prohibition where it was not a resident species, and probably not imported till the reign of Solomon; and as the crane, we have already shown it to have been likewise exotic, making only a momentary appearance, and that rarely, in Syria. If the Hebrew name be derived from a word signifying 'to breathe short,' or 'to sniff through the nostrils with an irritated expression,' the most obvious application would be to the goose, a bird not, perhaps, otherwise noticed in the Hebrew Scriptures, though it was constantly eaten in Egypt, was not held unclean by the Jews, and, at some seasons, must have frequented the lakes of Palestine. The heron, though not constantly hissing, can utter a similar sound of displeasure with much more meaning, and the common species is found in Egypt, and is also abundant in the Hauran of Palestine, where it frequents the margins of lakes and pools, and the reedy watercourses in the deep ravines, striking and devouring an immense quantity of fish.

207. [*Ardea cinerea*.]

HESH'BON, a town in the southern district of the Hebrew territory beyond the Jordan, parallel with, and twenty-one miles east of, the point where the Jordan enters the Dead Sea, and nearly midway between the rivers Jabbok and Arnon. It originally belonged to the Moabites; but when the Israelites arrived from Egypt, it was found to be in the possession of the Amorites, whose king, Sihon, is styled both king of the Amorites and king of Heshbon, and is expressly said to have 'reigned in Heshbon' (Josh. iii. 10; comp. Num. xxi. 26; Deut. ii. 9). It was taken by Moses (Num. xxi. 23-26), and eventually became a Levitical city (Josh. xxi. 39; 1 Chron. vi. 81)

in the tribe of Reuben (Num. xxxii. 37; Josh. xiii. 17); but being on the confines of Gad, is sometimes assigned to the latter tribe (Josh. xxi. 39; 1 Chron. vi. 81). After the ten tribes were sent into exile, Heshbon was taken possession of by the Moabites, and hence is mentioned by the prophets in their declarations against Moab (Isa. xv. 4; Jer. xlviii. 2, 34, 45). Under King Alexander Jannæus we find it again reckoned as a Jewish city. At the present day it is known by its ancient name of Heshbon, in the slightly modified form of Hesban. The ruins of a considerable town still exist, covering the sides of an insulated hill, but not a single edifice is left entire. The view from the summit is very extensive, embracing the ruins of a vast number of cities, the names of some of which bear a strong resemblance to those mentioned in Scripture.

HEZEKIAH, son of Ahaz, and thirteenth king of Judah, who reigned from B.C. 725 to B.C. 696.

From the commencement of his reign the efforts of Hezekiah were directed to the reparation of the effects of the grievous errors of his predecessors; and during his time the true religion and the theocratical policy flourished as they had not done since the days of David. The temple was cleared and purified; the utensils and forms of service were restored to their ancient order; all the changes introduced by Ahaz were abolished; all the monuments of idolatry were destroyed, and their remains cast into the brook Kedron. Among the latter was the brazen serpent of Moses, which had been deposited first in the tabernacle, and then in the temple, as a memorial of the event in which it originated; and it is highly to the credit of Hezekiah, and shows more clearly than any other single circumstance the spirit of his operations, that even this interesting relic was not spared when it seemed in danger of being turned to idolatrous uses. Having succeeded by his acts and words in rekindling the zeal of the priests and of the people, the king appointed a high festival, when, attended by his court and people, he proceeded in high state to the temple, to present sacrifices of expiation for the past irregularities, and to commence the re-organised services. A vast number of sacrifices evinced to the people the zeal of their superiors, and Judah, long sunk in idolatry, was at length reconciled to God (2 Kings xviii. 1-8; 2 Chron. xxx.).

The revival of the great annual festivals was included in this reformation. The Passover, which was the most important of them all, had not for a long time been celebrated according to the rites of the law; and the day on which it regularly fell, in the first year of Hezekiah, being already past, the king, nevertheless, justly conceiving the late observance a less evil than the entire omission of the feast, directed that it should be kept on the 14th day of the second month, being one month after its proper time. Couriers were sent from town to town, inviting the people to attend the solemnity; and even the ten tribes which formed the neighbouring kingdom were invited to share with their brethren of Judah in a duty equally incumbent on all the children of Abraham. Of these some received the message gladly, and others with disdain; but a considerable number of persons belonging to the northernmost tribes (which had more seldom than the others been brought into hostile contact with

Judah) came to Jerusalem, and by their presence imparted a new interest to the solemnity. A profound and salutary impression appears to have been made on this occasion; and so strong was the fervour and so great the number of the assembled people, that the festival was prolonged to twice its usual duration; and during this time the multitude was fed abundantly from the countless offerings presented by the king and his nobles. 'Never since the time of Solomon, when the whole of the twelve tribes were wont to assemble at the Holy City, had the Passover been observed with such magnificence' (2 Chron. xxx.).

The good effect of this procedure was seen when the people carried back to their homes the zeal for the Lord which had thus been kindled, and proceeded to destroy and cast forth all the abominations by which their several towns had been defiled; thus performing again, on a smaller scale, the doings of the king in Jerusalem. Even the 'high places,' which the pious kings of former days had spared, were on this occasion abolished and overthrown; and even the men of Israel, who had attended the feast, were carried away by the same holy enthusiasm, and, on returning to their homes, broke all their idols in pieces (2 Chron. xxxi. 1).

The attention of this pious and able king was extended to whatever concerned the interests of religion in his dominions. He caused a new collection of Solomon's proverbs to be made, being the same which occupy chaps. xxv. to xxix. of the book which bears that name. The sectional divisions of the priests and Levites were re-established; the perpetual sacrifices were recommenced, and maintained from the royal treasure; the stores of the temple were once more filled by the offerings of the people, and the times of Solomon and Jehoshaphat seemed to have returned (2 Chron. xxxi.).

This great work having been accomplished and consolidated (2 Kings xvii. 7, &c.), Hezekiah applied himself to repair the calamities, as he had repaired the crimes, of his father's government. He took arms, and recovered the cities of Judah which the Philistines had seized. Encouraged by this success, he ventured to withhold the tribute which his father had paid to the Assyrian king; and this act, which the result shows to have been imprudent, drew upon the country the greatest calamities of his reign. Only a few years before, namely, in the fourth of his reign, the Assyrians had put an end to the kingdom of Israel and sent the ten tribes into exile; but had abstained from molesting Hezekiah, as he was already their tributary. Seeing his country invaded on all sides by the Assyrian forces under Sennacherib, and Lachish, a strong place which covered Jerusalem, on the point of falling into their hands, Hezekiah, not daring to meet them in the field, occupied himself in all necessary preparations for a protracted defence of Jerusalem, in hope of assistance from Egypt, with which country he had contracted an alliance (Isa. xxx. 1-7). Such alliances were not favoured by the Divine sovereign of Israel and his prophets, and no good ever came of them. But this alliance did not render the good king unmindful of his true source of strength; for in quieting the alarms of the people he directed their attention to

the consideration that they in fact had more of power and strength in the divine protection than the Assyrian king possessed in all his host. Nevertheless, Hezekiah was himself distrustful of the course he had taken, and at length, to avert the calamities of war, sent to the Assyrian king offers of submission. Sennacherib, who was anxious to proceed against Egypt, consented to withdraw his forces on the payment of three hundred talents of silver and thirty talents of gold; which the king was not able to raise without exhausting both his own treasury and that of the temple, and stripping off the gold with which the doors and pillars of the Lord's house were overlaid (2 Kings xviii. 7-16).

But after he had received the silver and gold, the Assyrian king broke faith with Hezekiah, and continued to prosecute his warlike operations. While he employed himself in taking the fortresses of Judah, which it was important to secure before he marched against Egypt, he sent three of his generals, Rabshakeh, Tartan, and Rabсарis, with part of his forces, to threaten Jerusalem with a siege unless it were surrendered, and the inhabitants submitted to be sent into Assyria; and this summons was delivered in language highly insulting not only to the king and people, but to the God they worshipped. When the terms of the summons were made known to Hezekiah, he gathered courage from the conviction that God would not fail to vindicate the honour of his insulted name. In this conviction he was confirmed by the prophet Isaiah, who, in the Lord's name, promised the utter discomfiture and overthrow of the blasphemous Assyrian: 'Lo, I will send a blast upon him, and he shall hear a rumour, and shall return to his own land, and I will cause him to die by the sword in his own land' (2 Kings xix. 7). The rumour which Sennacherib heard was of the advance of Tirhakah the Ethiopian to the aid of the Egyptians, with a force which the Assyrians did not deem it prudent to meet; but, before withdrawing to his own country, Sennacherib sent a threatening letter to Hezekiah, designed to check the gladness which his retirement was likely to produce. But that very night the predicted blast—probably the hot pestilential south wind—smote 180,000 men in the camp of the Assyrians, and released the men of Judah from all their fears (2 Kings xviii. 17-37; xix. 1-34; 2 Chron. xxxii. 1-23; Isa. xxxvi. 37).

It was in the same year, and while Jerusalem was still threatened by the Assyrians, that Hezekiah fell sick of the plague; and the aspect which the plague-bill assumed assured him that he must die. In this he was confirmed by Isaiah, who warned him that his end approached. The love of life, the condition of the country—the Assyrians being present in it, and the throne of David without an heir—caused him to grieve at this doom, and to pray earnestly that he might be spared. And his prayer was heard in heaven. The prophet returned with the assurance that in three days he should recover, and that fifteen additional years of life should be given to him. This communication was altogether so extraordinary, that the king required some token by which his belief might be justified; and accordingly the 'sign' which he required was granted to him. The shadow of the sun went back upon

the dial of Ahaz the ten degrees it had gone down [DIAL]. This was a marvel greater than that of the cure which the king distrusted; for there is no known principle of astronomy or natural philosophy by which such a result could be produced. A cataplasm of figs was then applied to the plague-boil, under the direction of the prophet, and on the third day, as foretold, the king recovered (2 Kings xx. 1-11; 2 Chron. xxxii. 24-26; Isa. xxxviii.). [PLAGUE.]

The destruction of the Assyrians drew the attention of foreign courts for a time towards Judaea, and caused the facts connected with Hezekiah's recovery, and the retrogression of the shadow on the dial, to be widely known. Among others, Merodach Baladan, king of Babylon, sent ambassadors with presents to make inquiries into those matters, and to congratulate the king on his recovery. Since the time of Solomon the appearance of such embassies from distant parts had been rare at Jerusalem; and the king, in the pride of his heart, made a somewhat ostentatious display to Baladan's ambassadors of all his treasures, which he had probably recovered from the Assyrians, and much increased with their spoil. Josephus (*Antiq.* x. 2. 2) says that one of the objects of the embassy was to form an alliance with Hezekiah against the Assyrian empire; and if so, his readiness to enter into an alliance adverse to the theological policy, and his desire to magnify his own importance in the eyes of the king of Babylon, probably furnished the ground of the divine disapprobation with which his conduct in this matter was regarded. He was reprimanded by the prophet Isaiah, who revealed to him the mysteries of the future, so far as to apprise him that all these treasures should hereafter be in the possession of the Babylonians, and his family and people exiles in the land from which these ambassadors came. This intimation was received by the king with his usual submission to the will of God; and he was content to know that these evils were not to be inflicted in his own days. He has sometimes been blamed for this seeming indifference to the fate of his successors; but it is to be borne in mind that at this time he had no children. This was in the fourteenth year of his reign, and Manasseh, his successor, was not born till three years afterwards (2 Kings xx. 12-19; 2 Chron. xxxii. 31; Isa. xxxix.). The rest of Hezekiah's life appears to have been peaceable and prosperous. No man before or since ever lived under the certain knowledge of the precise length of the span of life before him. When the fifteen years had expired, Hezekiah was gathered to his fathers, after a reign of twenty-nine years. He died sincerely lamented by all his people, and the public respect for his character and memory was testified by his corpse being placed in the highest niche of the royal sepulchre (2 Kings xx. 20, 21; 2 Chron. xxxii. 32, 33).

HIBL (*God liveth*), a native of Beth-el, who rebuilt Jericho, above 500 years after its destruction by the Israelites, and who, in so doing, incurred the effects of the imprecation pronounced by Joshua (1 Kings xvi. 34):
Accursed the man in the sight of Jehovah,
Who shall arise and build this city, even Jericho;
With the loss of his first-born shall he found it,
And with the loss of his youngest shall he fix its gates (Josh. vi. 26).

HIERAPOLIS, a city of Phrygia, not far from Colossæ and Laodicea, where there was a Christian church under the charge of Epaphros, as early as the time of St. Paul, who commends him for his fidelity and zeal (Colos. iv. 12, 13). The place is visible from the theatre at Laodicea, from which it is five miles distant northward.

The place now bears the name of Pamluck-kale (Cotton-castle), from the white appearance of the cliffs of the mountain on the lower summit, or rather an extended terrace, on which the ruins are situated. It owed its celebrity, and probably the sanctity indicated by its ancient name (Holy City), to its very remarkable springs of mineral water, the singular effects of which, in the formation of stalactites and incrustations by its deposits, are shown in the accounts of Pococke and Chandler, to have been accurately described by Strabo. A great number and variety of sepulchres are found in the different approaches to the site, which on one side is sufficiently defended by the precipices overlooking the valleys of the Lycus and Mæander, while on the other sides the town walls are still observable. The magnificent ruins clearly attest the ancient importance of the place.

HIGH PLACES AND GROVES. As high places and groves are almost constantly associated in Scripture, it seems undesirable to separate them in our consideration.

By 'high places' we are content to understand natural or artificial eminences, where worship by sacrifice or offering was made, usually upon an altar erected thereon.

By a 'grove' we understand a plantation of trees around a spot in the open air set apart for worship and other sacred services, and therefore around or upon the 'high places' which were set apart for the same purposes.

We find traces of the custom of worshipping in groves and upon high places so soon after the deluge, that it is probable they existed prior to that event. It appears that the first altar after the deluge was built by Noah upon the mountain on which the ark rested (Gen. viii. 20). Abraham, on entering the Promised Land, built an altar upon a mountain between Bethel and Hai (xii. 7, 8). At Beersheba he planted a grove, and called there upon the name of the everlasting God (Gen. xxi. 33). The same patriarch was required to travel to the mount Moriah, and there to offer up his son Isaac (xxii. 2, 4). It was upon a mountain in Gilead that Jacob and Laban offered sacrifices before they parted in peace (xxxi. 54). In fact, such seem to have been the general places of worship in those times; nor does any notice of a temple, or other covered or enclosed building for that purpose, occur. Thus far all seems clear and intelligible. There is no reason in the nature of things why a hill or a grove should be an objectionable, or, indeed, why it should not be a very suitable, place for worship. Yet by the time the Israelites returned from Egypt, some corrupting change had taken place, which caused them to be repeatedly and strictly enjoined to overthrow and destroy the high places and groves of the Canaanites wherever they found them (Exod. xxxiv. 13; Deut. vii. 5; xii. 2, 3). That they were not themselves to worship the Lord on high places or in groves is implied in the fact that they were to have but one altar for regular and constant sacrifice; and it was expressly en-

joined that near this sole altar no trees should be planted (Deut. xvi. 21).

It is possible that the Canaanites had not yet fallen into rank idolatry in the time of Abraham—at least, not into such idolatries as defiled the very places in which they worshipped. We know, at all events, that their iniquity was not full in those earlier times, but that when the Israelites invaded the land their iniquity was full to overflowing. As included in this, we may with tolerable certainty infer that their religion had become so grossly erroneous and impure, that it was needful to place under ban even their places of worship, which might otherwise bring the Israelites into danger by the associations which had become connected with them.

The great object of the law was to attach the Israelites to the worship of the One Jehovah, the Creator of heaven and earth, and to preserve them from the polytheism into which the nations had fallen. Now it is certain that the Canaanites had become polytheistic, and, consequently, that their high places and groves were dedicated to different gods. By continuing or adopting the use of this custom, the Israelites would infallibly have fallen into the same notions.

The groves which ancient usage had established around the places of sacrifice for the sake of shade and seclusion, idolatry preserved not only for the same reasons, but because they were found convenient for the celebration of the rites and mysteries, often obscene and abominable, which were gradually superadded. Then the presence of a grove of a particular species of tree at the principal seat of the worship of a particular god, would occasion trees of the same kind to be planted at other seats of the same worship; whence that kind of tree came to be regarded as specially appropriate to the particular idol; and, in process of time, there was no important tree which had not become the property of some god or goddess, so that every stranger who passed by a sacred grove could determine by the species of tree of which it was composed to what God the high place, altar, or temple with which it was connected belonged.

This statement of the notions connected with religious worship in high places and in groves seems amply to support the view we have taken as to the nature of the dangers which the prohibition of it was designed to obviate. The explanation as to the special appropriation of trees to particular gods alone suffices to throw a flood of light upon the injunction to cut down the sacred groves of the Canaanites; seeing that while these groves remained, it would be impossible to dissociate the idea of the god to which the trees had been consecrated; and the disgraceful orgies which were celebrated under their obscure shade, would alone suffice to explain the same injunction on the ground of the holy abhorrence with which the scene of such abominations must be regarded by One who is of purer eyes than to behold iniquity.

The injunctions, however, respecting the high places and groves were very imperfectly obeyed by the Israelites; and their inveterate attachment to this mode of worship was such that even pious kings, who opposed idolatry by all the means in their power, dared not abolish the high places at which the Lord was worshipped. And it appears

to us likely, that this toleration of an acknowledged irregularity arose from the indisposition of the people living at a distance from the temple to be confined to the altar which existed there; to their determination to have places nearer home for the chief acts of their religion—sacrifice and offering; and to the apprehension of the kings that if they were prevented from having places for offerings to the Lord in their own neighbourhood, they would make the offerings to idols. This view of the case seems to be strongly confirmed by the fact that we hear no more of this proneness to worship in high places and in groves after synagogues and regular religious services had been established in the towns and gave sufficient operation to the disposition among men to create a local interest in religious observances.

HIGH-PRIEST. [PRIESTS.]

HILKIAH. Several persons of this name occur in Scripture, of whom the following are the chief: 1. The father of Jeremiah (Jer. i. 1). 2. A high-priest in the reign of Josiah (2 Kings xxii. 4, 8, 10). 3. The father of Eliakim (2 Kings xviii. 18, 26; Isa. xxii. 20).

HIN, a Hebrew liquid measure [WEIGHTS AND MEASURES].

HIND (Gen. xlix. 21; 2 Sam. xxii. 34; Job xxxix. 1; Ps. xviii. 33, &c.), the female of the hart or stag, doe being the female of the fallow-deer, and roe being sometimes used for that of the roebuck. All the females of the *Cervidae*, with the exception of the reindeer, are hornless. It may be remarked that the emendation of Bochart on the version of Gen. xlix. 21, where for 'Naphthali is a hind let loose, he giveth goodly words,' he, by a small change in the punctuation of the original, proposes to read 'Naphthali is a spreading tree, shooting forth beautiful branches,' restores the text to a consistent meaning, agreeing with the Sept., the Chaldee paraphrase, and the Arabic version. [HART.]

HIN'NOM, or rather Ben-Hinnom, an unknown person, whose name was given to the valley which bounds Jerusalem on the north, below Mount Zion, and which in Scripture is often mentioned in connection with the horrid rites of Moloch, which under idolatrous kings were there celebrated (Josh. xv. 8; xviii. 16; Neh. xi. 30; Jer. vii. 31; xix. 2). When Josiah overthrew this idolatry, he defiled the valley by casting into it the bones of the dead, the greatest of all pollutions among the Hebrews; and from that time it became the common jakes of Jerusalem, into which all refuse of the city was cast, and where the combustible portions of that refuse were consumed by fire. Hence it came to be regarded as a sort of type of hell, the Gehenna of the New Testament being no other than the name of this valley of Hinnom (Ge-Hinnom); see Matt. v. 22, sq.; Mark ix. 43; Luke vii. 5; John iii. 6.

1. HIRAM, king of Tyre, at the commencement of David's reign. He sent an embassy to felicitate David on his accession, which led to an alliance, or strengthened a previous friendship between them. It seems that the dominion of this prince extended over the western slopes of Lebanon; and when David built himself a palace, Hiram materially assisted the work by sending cedar-wood from Lebanon, and able workmen to Jerusalem (2 Sam. v. 11; 1 Chron. xiv. 1), *b.c.* 1055.

2. **HIRAM**, king of Tyre, son of Abibaal, and grandson of the Hiram who was contemporary with David, in the last years of whose reign he ascended the throne of Tyre. Following his grandfather's example, he sent to Jerusalem an embassy of condolence and congratulation when David died and Solomon succeeded, and contracted with the new king a more intimate alliance than ever before or after existed between a Hebrew king and a foreign prince. The alliance seems to have been very substantially beneficial to both parties, and without it Solomon would scarcely have been able to realise all the great designs he had in view. In consideration of large quantities of corn, wine, and oil, furnished by Solomon, the king of Tyre agreed to supply from Lebanon the timber required for the temple, to float it along the coast, and deliver it at Joppa, which was the port of Jerusalem (1 Kings v. 1, sq.; ix. 10, sq.; 1 Chron. ii. 3, sq.). The vast commerce of Tyre made gold very plentiful there; and Hiram supplied no less than 500 talents to Solomon for the ornamental works of the temple, and received in return twenty towns in Galilee; which, when he came to inspect them, pleased him so little, that he applied to them a name of contempt, and restored them to the Jewish king (2 Chron. viii. 2) [CABUL]. It does not, however, appear that the good understanding between the two kings was broken by this unpleasant circumstance; for it was after this that Hiram suggested, or at least took part in, Solomon's traffic to the Eastern seas—which certainly could not have been undertaken by the Hebrew king without his assistance in providing ships and experienced mariners (1 Kings ix. 27; x. 11, &c.; 2 Chron. viii. 18; ix. 10, &c.), B.C. 1007 [OPHIR; SOLOMON; PHENICIANS].

3. **HIRAM**, or **HURAM**, son of a widow of the tribe of Dan, and of a Tyrian father. He was sent by the king of the same name to execute the principal works of the interior of the temple, and the various utensils required for the sacred services. It is probable that he was selected for this purpose by the king from among others equally gifted, in the notion that his half Hebrew blood would render him the more acceptable at Jerusalem.

HITTITES, or children of Heth, one of the tribes of Canaanites which occupied Palestine before the Israelites (Gen. xv. 20; Exod. iii. 8; xxiii. 23). They lived in and about Hebron; and Abraham, when he abode in that neighbourhood, was treated by them with respect and consideration (Gen. xxiii. 3-7, 11, 12). This intimacy led to Esau's marriage with two women of this nation, to the grief and annoyance of his parents (Gen. xxvi. 34, 35; xxxvi. 2). The Hittites are described in Num. xiii. 29, along with the Amorites, as 'dwelling in the mountains,' that is, in what were afterwards called 'the mountains of Judah,' of which Hebron was the chief town. Uriah, who had the high honour of being one of David's thirty 'worthies,' is called a Hittite (2 Sam. xi. 3, 6; 1 Kings ix. 20). He was, doubtless, a proselyte, and probably descended from several generations of proselytes; but the fact shows that Canaanitish blood was in itself no bar to advancement in the court and army of David. Solomon subjected the remaining Hittites to the same tribute of bond-service as the other remnants of the

Canaanite nations (1 Kings ix. 20). Of all these the Hittites appear to have been the most important, and to have been under a king of their own; for 'the kings of the Hittites' are, in 1 Kings x. 29, coupled with the kings of Syria as purchasers of the chariots which Solomon imported from Egypt. The Hittites were still present in Palestine as a distinct people after the Exile, and are named among the alien tribes with whom the returned Israelites contracted those marriages which Ezra urged, and Nehemiah compelled them to dissolve (Ezra ix. 1, &c.; comp. Neh. xiii. 23-28). After this we hear no more of the Hittites, who probably lost their national identity by intermixture with the neighbouring tribes or nations.

HIVITES, one of the nations of Canaan which occupied Palestine before the Israelites (Gen. x. 17; Exod. iii. 8, 17; xxiii. 23; Josh. iii. 10). They occupied the northern and north-eastern part of the country. In Judg. iii. 3, it is stated that 'the Hivites dwelt in Mount Hermon, from Mount Baal-hermon unto the entering in of Hamath'; and in Josh. xi. 3, the Hivites are described as living 'under Hermon in the land of Mizpeh.' The 'cities of the Hivites' are mentioned in 2 Sam. xxiv. 7, and, from being associated with Sidon and Tyre, must have been in the north-west. A remnant of the nation still existed in the time of Solomon, who subjected them to a tribute of personal labour, with the remnants of other Canaanitish nations which the Israelites had been unable to expel (1 Kings ix. 20). A colony of this tribe was also found in Northern Palestine, occupying the towns of Gideon, Chephirah, Beeroth, and Kirjath-jearim: and these obtained from Joshua a treaty of peace by stratagem (Josh. ix. 3-17; xi. 19).

HOBAB, kinsman of Moses and priest or prince of Midian, a tract of country in Arabia Petraea, on the eastern border of the Red Sea, at no great distance from Mount Sinai. The family of this individual seems to have observed the worship of the true God in common with the Hebrews (Exod. xviii. 11, 12).

Considerable difficulty has been felt in determining who this person was, as well as his exact relation to Moses; for the word, which, in Exod. iii. 1, Num. x. 29, Judg. iv. 11, is translated *father-in-law*, and in Gen. xix. 14, *son-in-law*, is a term of indeterminate signification, denoting simply relationship by marriage; and besides, the transaction which in one place (Exod. xviii. 27) is related of Jethro, is in another related of Hobab. The probability is, that as forty years had elapsed since Moses' connection with this family was formed, his father-in-law (Exod. ii. 18) Reuel or Raguel (the same word in the original is used in both places) was dead, or confined to his bed by the infirmities of age, and that the person who visited Moses at the foot of Sinai was his brother-in-law, called Hobab in Num. x. 29, Judg. iv. 11; Jethro in Exod. iii. 1; and the Kenite in Judg. i. 16.

About a year after the Exodus he paid a visit to Moses, while the Hebrew camp was lying in the environs of Sinai, bringing with him Zipporah, Moses' wife, who, together with her two sons, had been left with her family while her husband was absent on his embassy to Pharaoh. The interview was on both sides affectionate, and was cele-

brated first by the solemn rites of religion, and afterwards by festivities, of which Aaron and the elders of Israel were invited to partake. On the following day, observing Moses incessantly occupied in deciding causes that were submitted to him for judgment, his experienced kinsman remonstrated with him on the speedy exhaustion which a perseverance in such arduous labours would superinduce; and in order to relieve himself, as well as secure a due attention to every case, he urged Moses to appoint a number of subordinate officers to divide with him the duty of the judicial tribunals, with power to decide in all common affairs, while the weightier and more serious matters were reserved to himself. This wise suggestion the Hebrew legislator adopted (Exod. xviii.).

When the Hebrews were preparing to decamp from Sinai, the kinsman of Moses announced his intention to return to his own territory; but if he did carry that purpose into execution, it was in opposition to the urgent solicitations of the Jewish leader, who entreated him, for his own advantage, to cast in his lot with the people of God; at all events to continue with them, and afford them the benefit of his thorough acquaintance with the wilderness. 'Leave us not, I pray thee,' said Moses, 'forasmuch as thou knowest how we are to encamp in the wilderness, and thou mayest be to us instead of eyes'; in other words, that Hobab might perform the office of a hybeer or guide (CARAVAN)—his influence as an Arab chief, his knowledge of the routes, the situation of the wells, the places for fuel, the prognostics of the weather, and the most eligible stations for encamping, rendering him peculiarly qualified to act in that important capacity. It is true that God was their leader, by the pillar of cloud by day and of fire by night, the advancement or the halting of which regulated their journeys and fixed their encampments. But beyond these general directions the tokens of their heavenly guide did not extend. And as smaller parties were frequently sallying forth from the main body in quest of forage and other necessities, which human observation or enterprise was sufficient to provide, so Moses discovered his wisdom and good sense in enlisting the aid of a native sheik, who, from his family connection with himself, his powerful influence, and his long experience, promised to render the Israelites most important services.

HOG. [BOAR; SWINE.]

HONEY. In the Scripture there are three words denoting different sweet substances, all of which are rendered by 'honey' in the Authorized Version. These it is necessary to distinguish.

1. *Yaar*, which only occurs in 1 Sam. xiv. 25, 27, 29; Cant. v. 1; and denotes the honey of bees, and that only.

2. *Nopeth*, honey that drops, usually associated with the comb, and therefore bee-honey. This occurs in Ps. xix. 10; Prov. v. 3; xxiv. 13; xxvii. 7; Cant. iv. 11.

3. *Debesh*. This is the most frequent word. It sometimes denotes bee-honey, as in Judg. xiv. 8, but more commonly a vegetable honey distilled from trees, and called *manna* by chemists; also the syrup of dates, and even dates themselves. It appears also sometimes to stand as a general term for all kinds of honey.

We shall here confine our remarks to honey in

general, and that of bees in particular, referring for the vegetable honey to MANNA, and for the date-honey to DRINK, STRONG.

It is very evident that the land of Canaan abounded in honey. It is indeed described as 'a land flowing with milk and honey' (Exod. iii. 8, &c.); which we apprehend to refer to all the sweet substances which the different Hebrew words indicate, as the phrase seems too large to be confined to the honey of bees alone. Yet the great number of bees in Palestine has been noticed by many travellers; and they were doubtless still more common in ancient times when the soil was under more general cultivation [BEE; FOOD].

The 'wild honey' which, with locusts, formed the diet of John the Baptist, was probably the vegetable honey, which we refer to MANNA.

Honey was not permitted to be offered on the altar (Lev. ii. 11). As it is coupled with leaven in this prohibition, it would seem to amount to an interdiction of things sour and sweet. Aben Ezra and others allege that it was because honey partook of the fermenting nature of leaven, and when burnt yielded an unpleasant smell—qualities incompatible with offerings made by fire of a sweet savour unto the Lord. But Maimonides and others think it was for the purpose of making a difference between the religious customs of the Jews and the heathen, in whose offerings honey was much employed. The first-fruits of honey were, however, to be presented, as these were destined for the support of the priests, and not to be offered upon the altar.

Under the different heads to which we have referred, the passages of Scripture relating to honey are explained. The remarkable incident related in 1 Sam. xiv. 24-32, requires, however, to be here noticed. Jonathan and his party coming to the wood, find honey dropping from the trees to the ground, and the prince extends his rod to the honeycomb to taste the honey. On this the present writer is unable to add anything to what he has stated elsewhere (*Pictorial Bible*, in loc.), which is to the following effect:—First, we are told that the honey was on the ground, then that it dropped, and lastly, that Jonathan put his rod into the honeycomb. From all this it is clear that the honey was bee-honey, and that honeycombs were above in the trees, from which honey dropped upon the ground; but it is not clear whether Jonathan put his rod into a honeycomb that was in the trees or shrubs, or into one that had fallen to the ground, or that had been formed there.

Where wild bees are abundant they form their combs in any convenient place that offers, particularly in cavities, or even on the branches of trees. In India particularly, and in the Indian islands, the forests often swarm with bees. We have good reason to conclude, from many allusions in Scripture, that this was also, to a considerable extent, the case formerly in Palestine. The woods on the western coast of Africa, between Cape Blanco and Sierra Leone, and particularly near the Gambia, are full of bees, to which the negroes formerly, if they do not now, paid considerable attention for the sake of the wax. They had bee-hives, like baskets, made of reeds and sedge, and hung on the out-boughs of the trees, which the bees easily appropriated for

the purpose of forming their combs in them. In some parts these hives were so thickly placed that at a distance they looked like fruit. There was also much wild honey in the cavities of the trees. As to the other supposition, that the honeycomb had been formed on the ground, we think the context rather bears against it; but the circumstance is not in itself unlikely, or incompatible with the habits of wild bees. For want of a better resource they sometimes form their honey in any tolerably convenient spot they can find in the ground, such as small hollows, or even holes formed by animals.

HOOK, HOOKS. Several Hebrew words are so rendered in the English Version.

1. (2 Kings xix. 28), 'I will put my hook in thy nose.' The parallel passage (Isa. xxxvii. 29) the Sept. reads 'I will put my muzzle, halter, or noose,' &c. Jehovah here intimates his absolute control over Sennacherib, by an allusion to the practice of leading buffaloes, camels, dromedaries, &c. by means of a cord, or of a cord attached to a ring, passed through the nostrils. Job xli. 1 [xl. 25] 'Canst thou draw out Leviathan with a hook? or his tongue with a cord which thou lettest down? Canst thou place a reed-cord in his nose, or bore through his cheek with a thorn? (clasp, or possibly bracelet, &c.). 'Wilt thou draw out a dragon with a hook? Wilt thou bind a band about his nose? Wilt thou fasten a ring in his nose, or bore his lip with a bracelet?' This passage in Job has undergone the following speculations. It has been assumed, that Bochart has completely proved the Leviathan to mean the crocodile. Herodotus has then been quoted, where he relates that the Egyptians near Lake Mæris select a crocodile, render him tame, and suspend ornaments to his ears, and sometimes gems of great value; his fore-feet being adorned with bracelets (ii. 69); and the mummies of crocodiles, having their ears thus bored, have been discovered. Hence it is concluded that this passage in Job refers to the facts mentioned by Herodotus; and, doubtless, the terms employed, especially by the Sept. and Vulg., and the *third and following verses*, favour the supposition; for there the captive is represented as suppliant and obsequious, in a state of security and servitude, and the object of diversion, 'played with' as with a bird, and serving for the sport of maidens. Herodotus is further quoted to show that in his time the Egyptians captured the crocodile with a hook, and with which he was drawn ashore; and accounts are certainly given by modern travellers of the continuance of this practice. But does not the *entire description* go upon the supposition of the impossibility of so treating Leviathan? Supposing the allusions to be correctly interpreted, is it not as much as to say, 'Canst thou treat him as thou canst treat the crocodile and other fierce creatures?' Dr. Lee has, indeed, given reasons which render it doubtful, at least, whether the Leviathan does mean the crocodile in this passage, or whether it does not mean some species of whale, as was formerly supposed; the common grampus, found in the Mediterranean, the Red Sea, and also in the Nile. [LEVIATHAN.] Ezek. xxix. 4, 'I will put my hooks in thy jaws,' &c.; 'and I will cause thee to come up out of the midst of thy rivers,' where the prophet foretells the destruction of Pharaoh, king of Egypt, by allusions

to the destruction, possibly, of a crocodile, the symbol of Egypt. Thus Pliny states, that the Teatyrite (inhabitants of Egypt) followed the crocodile, swimming after it in the river, sprang upon its back, thrust a bar into its mouth, which, being held by its two extremities, serves as a bit, and enables them to force it on shore (comp. Ezek. xxix. 3. 4).

2. (Exod. xxvi. 32, 37; xxxviii. 19), 'hooks,' where the Sept. and Jerome seem to have understood the capitals of the pillars; and it has been urged that this is more likely to be the meaning than hooks, especially as 1775 shekels of silver were used in making them for the pillars, overlaying the chapters, and filleting them (ch. xxxviii. 28); and that the hooks are really the *taches* (Exod. xxvi. 6, 11, 33, 35; xxxix. 33). Yet the Sept. also renders the word 'rings' or 'clasps' (Exod. xxvii. 10, 11; Exod. xxxviii. 17, 19); and from a comparison of these two latter passages it would seem that these hooks, or rather *enters*, rose out of the chapters or heads of the pillars.

3. (1 Sam. ii. 13, 14), 'flesh-hook.' This was evidently a trident 'of three teeth,' a kind of fork, &c. for turning the sacrifices on the fire, and for collecting fragments, &c. (2) (Is. ii. 4, and elsewhere) 'beat their spears into pruning-hooks.' In Mic. iv. 3, *weeding-hooks*, or *shovels*, spades, &c. Joel reverses the metaphor 'pruning-hooks into spears' (iii. 10). (3) Ezek. xl. 43), 'hooks,' which Gesenius explains *stalls* in the courts of the Temple, where the sacrificial victims were fastened: our translators give in the margin 'endrons, or the two hearth-stones.' Dr. Lightfoot, in his chapter 'On the north side of the altar were six orders of rings, each of which contained six, at which they killed the sacrifices. Near by were *low pillars* set up, upon which were laid overthwart beams of cedar; on these were fastened rows of hooks, on which the sacrifices were hung; and they were flayed on marble tables, which were between these pillars.'

HOPHNI AND PHINEHAS, the sons of Eli, whose misconduct in the priesthood (as described in 1 Sam. ii. 12-17) brought down that doom of ruin and degradation upon the house of Eli which formed the first divine communication through the young Samuel (1 Sam. iii.). Hophni and Phinehas were slain in the battle in which the ark of God was taken by the Philistines, n.c. 1141 (1 Sam. iv. 11). [ELL.]

HOPHRA (or PHARAOH-HOPHRA), king of Egypt in the time of Zedekiah king of Judah, and of Nebuchadnezzar king of Babylon. He formed alliance with the former against the latter, and his advance with an Egyptian army constrained the Chaldeans to raise the siege of Jerusalem (Jer. xxxvii. 5); but they soon returned and took and destroyed the city. This momentary aid, and the danger of placing reliance on the protection of Hophra, led Ezekiel to compare the Egyptians to a broken reed, which was to pierce the hand of him that leaned upon it (Ezek. xxxix. 6, 7). This alliance was, however, disapproved by God; and Jeremiah was authorized to deliver the prophecy contained in his 44th chapter, which concludes with a prediction of Hophra's death and the subjugation of his country by the Chaldeans [comp. Egypt].

This Pharaoh-hophra is identified with the Apries or Vaphres of ancient authors, and he may be the Psamatik III. of the monuments. Under this identification we may conclude that his wars with the Syrians and Cyrenians prevented him from affording any great assistance to Zedekiah. Apries is described by Herodotus (ii. 169) as a monarch who, in the zenith of his glory, felt persuaded that it was not in the power even of a deity to dispossess him of his kingdom, or to shake the stability of his sway; and this account of his arrogance fully accords with that contained in the Bible. Ezekiel (xxix. 3) speaks of this king as 'the great dragon that lieth in the midst of the rivers, which hath said, my river is mine own, and I have made it for myself.' His overthrow and subsequent captivity and death are foretold with remarkable precision by Jeremiah xlv. 30; 'I will give Pharaoh-

hophra, king of Egypt, into the hands of his enemies, and into the hands of them that seek his life.' This was brought about by a revolt of the troops, who placed Amasis at their head, and after various conflicts took Apries prisoner. He was for a time kept in easy captivity by Amasis, who wished to spare his life; but he was at length constrained to give him up to the vengeance of his enemies, by whom he was strangled.

HOR, a mountain of Arabia Petraea, on the confines of Idumaea, and forming part of the mountain of Seir or Edom. It is only mentioned in Scripture in connection with the circumstances recorded in Num. xx. 22-29. The Israelites were encamped before it, when Aaron was summoned to its top to die there, in the presence of his brother and son, who alone witnessed his final departure [AARON].

The mountain now identified with Mount Hor

206. [Mount Hor.]

is the most conspicuous in the whole range of Mount Seir, and at this day bears the name of Mount Aaron (Jebel Haroun). It is in N. lat. 30° 18', E. long. 35° 33', about mid-way between the Dead Sea and the Ælanitic Gulf. It may be open to question if this is really the Mount Hor on which Aaron died, seeing that the whole range of Seir was anciently called by that name; yet, from its height and the conspicuous manner in which it rises among the surrounding rocks, it seems not unlikely to have been the chosen scene of the high-priest's death. To this may be added that Josephus affirms Mount Hor to have been near Petra; and near that place there is certainly no mountain which can contest the distinction with the one now in view. The base of the highest pinnacle of this mountain is in fact but a little removed from the skirts of the city to the westward. The account of it given twenty years since by Captains Irby and Mangles, in

their then unpublished volume of Travels, is the best we yet possess, and we therefore present the substance of their description slightly abridged.

'The ascent of the mountain is extremely steep and toilsome. Much juniper grows on it, almost to the very summit, and many flowering plants which we had not observed elsewhere; some of these are very beautiful; most of them are thorny. On the top there is an overhanging shelf in the rock which forms a sort of cavern. The tomb itself is enclosed in a small building, differing not at all in external form and appearance from those of Mahomedan saints common throughout every province of Turkey. It has probably been rebuilt at no remote period: some small columns are bedded in the walls, and some fragments of granite and slabs of white marble are lying about. The door is near the south-west angle, within which a constructed tomb, with a pall thrown over it, presents itself immediately

upon entering: it is patched together out of fragments of stone and marble that have made part of other fabrics.

'Not far from the north-west angle is a passage, descending by steps to a vault or grotto beneath. The roof is covered, but the whole is rude, ill-fashioned, and quite dark. Towards the further end of this dark vault lie the two corresponding leaves of an iron grating, which formerly prevented all nearer approach to the tomb; they have, however, been thrown down, and we advanced so as to touch it; it was covered by a ragged pall.'

It is highly interesting to know what view it was which last greeted the eyes of the dying high-priest from this lofty eminence; and it is the more so from the fact that the region over which the view extends is that in which the Israelites wandered for forty years. Our travellers supply this information:—

'The view from the summit of the edifice is extremely extensive in every direction, and the eye rests on few objects which it can clearly distinguish to give a name to, although an excellent idea is obtained of the general face and features of the country. The chain of Idumean mountains, which form the western shore of the Dead Sea, seem to run on to the southward, though losing considerably in their height. They appear in this point of view barren and desolate. Below them is spread out a white sandy plain, seamed with the beds of occasional torrents, and presenting much the same features as the most desert parts of the Ghor. Where this desert expanse approaches the foot of Mount Hor, there arise out of it, like islands, several lower peaks and ridges, of a purple colour, probably composed of the same kind of sandstone as that of Mount Hor itself, which, variegated as it is in its hues, presents in the distance one uniform mass of dark purple. Towards the Egyptian side there is an expanse of country without features or limit, and lost in the distance. The lofty district which we had quitted in our descent to Wady Mousa shuts up the prospect on the south-east side; but there is no part of the landscape which the eye wanders over with more curiosity and delight than the crags of Mount Hor itself, which stand up on every side in the most rugged and fantastic forms, sometimes strangely piled one on the other, and sometimes as strangely yawning in cliffs of a frightful depth. An artist who would study rock-scenery in all its wildest and most extravagant forms would find himself rewarded should he resort to Mount Hor for that sole purpose.'

HO'REB. [SINAI.]

HOR-HAGIDGAD, an encampment of the Israelites during their wandering (Num. xxxiii. 32, 33) [WANDERING].

HORITES, or HORIM, the people who inhabited Mount Seir before the Edomites [ИДУМЭА].

HORN, from its primary use for defence in the case of horned animals, came to acquire several derivative meanings, some of which are connected with the illustration and right understanding of holy writ. As horns are hollow and easily polished, they have in ancient and modern times been used for drinking-vessels and for military purposes; and as they are the chief source of strength for attack and defence with the animals

to which God has given them, they serve in Scripture as emblems of power, dominion, glory, and fierceness (Dan. viii. 5, 9; 1 Sam. xvi. 1, 13; 1 Kings i. 39; Josh. vi. 4, 5; 1 Sam. ii. 1; Ps. lxxv. 5, 10; Jer. xlviii. 25; Ezek. xxix. 21; Amos vi. 13). Hence to defile the horn in the dust (Job xvi. 2), is to lower and degrade oneself, and, on the contrary, to lift up, to exalt the horn (Ps. lxxv. 4; lxxix. 17; cxlviii. 14), is poetically to raise oneself to eminent honour or prosperity, to bear oneself proudly. In the East, at present, horns are used as an ornament for the head, and as a token of eminent rank. The women among the Druses on Mount Lebanon wear on their heads silver horns of native make, 'which are the distinguishing badge of wifehood.'

209.

By an easy transition, horn came to denote an elevation or hill (Isa. v. 1); in Switzerland mountains still bear this name, thus, Schreckhorn, Buchhorn. The altar of burnt-offerings (Exod. xxvii. 2) and the altar of incense (Exod. xxx. 2), had each at the four corners four horns of shittim-wood, the first being overlaid with brass, the second with gold (Exod. xxxvii. 25; xxxviii. 2; Jer. xvii. 1; Amos iii. 14). Upon the horns of the altar of burnt-offerings was to be smeared with the finger the blood of the slain bullock (Exod. xxix. 12; Lev. iv. 7-18; viii. 15; ix. 9; xvi. 18; Ezek. xliii. 20). By laying hold of these horns of the altar of burnt-offering the criminal found an asylum and safety (1 Kings i. 50; ii. 28). These horns are said to have served as a means for binding the animal destined for sacrifice (Ps. cxviii. 27); but this use Winer denies, asserting that they did not and could not answer for such a purpose.

HORNET, WASP (Exod. xxiii. 28; Deut. vii. 20; Josh. xxiv. 12; Wisd. Sol. xii. 8, 'wasps'). The question has been raised whether in these passages of Scripture the word is to be taken as literally meaning this well-known and terrific insect, or whether it is to be understood in a metaphorical and figurative sense for diseases, supernatural terror, &c., by which Jehovah 'drove out the Hivites, Canaanites, and Hittites, from before Israel.' Among the moderns, Michaelis has defended the figurative sense. In addition to other reasons for it, he doubts whether the expulsion of the Canaanites could be effected by swarms of hornets, and proposes to derive the Hebrew from a root signifying 'scourges.'

'plagues;' but his reasons are ably refuted by Rosenmüller. In favour of the possibility of such an event, it is observed that Elian relates that the Phaseltæ were actually driven from their locality by such means; and Bochart has shown that these Phaseltæ were a *Phœnician* people. Michaelis's doubt of the abstract possibility seems very unreasonable, when the irresistible power of bees and wasps, &c., attested by numerous modern occurrences, and the thin and partial clothing of the Canaanites, are considered. It is observable that the event is represented by the author of the book of Wisdom as a merciful dispensation, by which the Almighty, he says, 'spared as men the old inhabitants of his holy land,' and 'gave them place for repentance.' If the hornet, considered as a *fly*, was in any way connected with their idolatry, the visitation would convey a practical refutation of their error (see Baalzebub, under BAAL). It may be remarked that the hornet, no less than the whole species of wasps, renders an essential service in checking the multiplication of flies and other insects, which would otherwise become intolerable to man; and that in regard to their architecture, and especially their *instincts* and *habits*, they do not yield to their more popular congener, the bee, but even in several respects greatly excel it.

HORSE (Gen. xlvii. 17; xlix. 17; Exod. xiv. 9, 23, and in many other places; James iii. 3; Rev. vi. 2, &c.). It appears to be substantiated that the horse was derived from High Asia, and was not indigenous in Arabia, Syria, or Egypt. They are not mentioned among the presents which Pharaoh bestowed upon Abraham, and occur in Scripture for the first time when the patriarch Joseph receives them from the Egyptians in exchange for bread (Gen. xlvii. 17), evidently as valuable animals, disposed of singly, and not in droves or flocks, like cattle and asses. They were still sufficiently important to be expressly mentioned in the funeral procession which accompanied the body of Jacob to his sepulchre in Canaan (Gen. i. 9); and for centuries after it does not appear that, under the domestic management of the Egyptians, unless the murrain had greatly reduced them, horses had multiplied as they would have done in a land more congenial to their habits, since only six hundred chariots appear to have pursued Israel (Exod. xiv. 7); even admitting that there were other chariots and horsemen not included in that number. In the sculptured battle-scenes, which are believed to represent victories of Sesostris, or of Thothmes II. and III., over nations of Central Asia, it is evident that the enemy's armies, as well as the foreign allies of Egypt, are abundantly supplied with horses, both for chariots and for riders; and in triumphal processions they are shown as presents or tribute, proving that they were portions of the national wealth of conquered states sufficiently valuable to be prized in Egypt. At a later period the books of Deuteronomy (xvii. 16, for the future kings of Israel are forbidden to possess many) and Joshua (xi. 4) furnish similar evidence of abundance of horses in the plains of Syria; and in Job occurs a description of a perfect war-horse couched in the bold figurative language of inspiration, such as remains unequalled by any other poet, ancient or modern. Though the Israelites had chariots and horsemen

opposed to them in the plain country from their first entrance into the land of promise—as in Judg. iv. 15, where we find Sisera with his chariots of war defeated at the foot of Mount Tabor—yet not being intended to make military conquests beyond the mountain basin and the adjacent territory assigned them, they long remained without cavalry or chariots themselves (Deut. xvii. 16; 2 Sam. viii. 4): they obeyed the divine injunction to abstain from possessing horses, and, to the time of David, hamstringing such as they captured from their enemies. It appears, however, that a small cavalry force was raised by him; and as in all the military operations of Western Asia, there was a tendency to increase the mounted force and neglect the infantry, on the full establishment of royalty, when the Hebrew government acquired a more political structure, the reign of Solomon displayed a military system which embraced a regular body of horse and of chariots, evidently become the more necessary, since the limits of his sway were extended to the shores of the Arabian Gulf, and far into the Syrian desert (1 Kings x. 26). Solomon likewise acted with commercial views in the monopolizing spirit which Eastern sovereigns have been prone to exercise in all ages. He bought chariots and teams of horses in Egypt, and probably in Armenia, 'in all lands,' and had them brought into his dominions in strings, in the same manner as horses are still conducted to and from fairs: for this interpretation, as offered by Mr. Charles Taylor, appears to convey the natural and true meaning of the text, and not 'strings of linen yarn,' which here seem to be out of place (2 Chron. i. 16, 17; ix. 25, 28).

The Tyrians purchased these objects from Solomon; but in the time of Ezekiel they imported horses themselves from Togarmah or Armenia. On returning from the Babylonish captivity, the common possession of horses in Palestine was no longer opposed; for Nehemiah numbers seven hundred and thirty-six belonging to the liberated Hebrews (Neh. vii. 68).

All the great original varieties or races of horses were then known in Western Asia, and the Hebrew prophets themselves have not unfrequently distinguished the nations they had in view, by means of the predominant colours of their horses, and that more correctly than commentators have surmised. Taking Bochart's application of the Hebrew names, the bay race emphatically belonged to Egypt and Arabia Felix; the white to the regions above the Euxine Sea, Asia Minor, and northern High Asia; the dun, or cream-coloured, to the Medes; the spotted piebald, or skewbald, to the Macedonians, the Parthians, and later Tahtars; and the black to the Romans; but the chestnuts do not belong to any known historical race (Zech. i. 8; vi. 2).

Bay or red horses occur most frequently on Egyptian painted monuments, this being the primitive colour of the Arabian stock; but white horses are also common, and in a few instances black, the last probably only to relieve the paler colour of the one beside it in the picture. There is also, we understand, an instance of a spotted pair, tending to show that the valley of the Nile was originally supplied with horses from foreign sources and distinct regions, as indeed the tribute pictures further attest. The spotted, if not real,

but painted horses, indicate the antiquity of a practice still in vogue; for staining the hair of riding animals with spots of various colours, and dyeing their limbs and tails crimson, is a practice of common occurrence in the East [Ass].

On the natural history of the horse there is no occasion to enter in this place; but it may be proper to notice that the riding bridle was long a mere slip-knot, passed round the under jaw into the mouth, thus furnishing only one rein; and that a rod was commonly added to guide the animal with more facility. The bridle, however, and the reins of chariot-horses were, at a very early age, exceedingly perfect; as the monuments of Egypt, Etruria, and Greece, amply prove. Saddles were not used, the rider sitting on the bare back, or using a cloth or mat girded on the animal. The Romans, no doubt copying the Persian Cataphractæ, first used pad-saddles, and from the northern nations adopted stimuli or spurs. Stirrups were unknown. Avicenna first mentions the *rikhab*, or Arabian stirrup, perhaps the most ancient; although in the tumuli of Central Asia, Tahtar horse skeletons, bridles, and stirrup-saddles, have been found along with idols; which proves the tombs to be more ancient than the introduction of Islam. With regard to horse-shoeing, Bishop Lowth and Bracy Clark were mistaken in believing that the Roman horse or mule shoe was fastened on without nails driven through the horny part of the hoof, as at present.

A contrary conclusion may be inferred from several passages in the poets: and the figure of a horse in the Pompeii battle mosaic, shod in the same manner as is now the practice, leaves little doubt on the question.

HORSE-LEECH occurs only in Prov. xxx. 15. The horse-leech is properly a species of leech, discarded for medical purposes on account of the coarseness of its bite.

Although the Hebrew word is translated 'leech' in all the versions, there has been much dispute whether that is its proper meaning. Against the received translation it has been urged that upon an examination of the context in which it occurs, the introduction of the leech seems strange; that it is impossible to understand what is meant by its 'two daughters'; and that instead of the incessant craving apparently attributed to it, the leech drops off when filled: hence it has been attempted to give a different sense to the Hebrew word, and to render it 'destiny.' But there seems no good reason for altering the received translation. In the preceding verse the writer speaks of 'a generation whose teeth are as swords, and their jaw-teeth as knives to devour the poor from off the earth, and the needy from among men'; and then, after the abrupt and picturesque style of the East, the leech is introduced as an illustration of the covetousness of such persons, and of the two distinguishing vices of which it is the parent, avarice and cruelty. May not also the 'two daughters' of the leech 'crying, Give, give be a figurative description of the two lips of the creature (for these it has, and perfectly formed) which are a part of its very complicated mouth? It certainly is agreeable to the Hebrew style to call the offspring of inanimate things *daughters*, for so branches are called daughters of trees (Gen. xlix. 22, margin). A similar use of the word is given in Eccles. xii. 4, — 'All the daughters of

musick shall be brought low,' meaning the lips, front teeth, and other parts of the mouth. It is well remarked by Professor Paxton that 'this figurative application of the entire genus is sufficient to justify the interpretation. The leech, as a symbol in use among rulers of every class and in all ages for avarice, rapine, plunder, rapacity, and even audacity, is too well known to need illustration.

HOSANNA, a form of acclamatory blessing or wishing well, which signifies, Save now! Succour now! Be now propitious! It occurs in Matt. xxi. 9 (also Mark xi. 9, 10; John xii. 13) — 'Hosanna to the Son of David; Blessed is he that cometh in the name of the Lord; Hosanna in the highest!' This was on the occasion of our Saviour's public entry into Jerusalem, and, fairly construed, would mean, 'Lord, preserve this Son of David; heap favours and blessings on him!' It is further to be observed that Hosanna was a customary form of acclamation at the Feast of Tabernacles. This feast was celebrated in September, just before the commencement of the civil year; on which occasion the people carried in their hands bundles of boughs of palms, myrtles, &c. They then repeated the 25th and 26th verses of Ps. cxviii., which commence with the word Hosanna; and from this circumstance they gave the boughs, and the prayers, and the feast itself, the name of Hosanna. They observed the same forms also at the Eucenia (1 Macc. x. 6, 7; 2 Macc. xiii. 51; Rev. vii. 9) and the Passover. And as they celebrated the Feast of Tabernacles with great joy and gladness, in like manner, on this occasion, did they hail the coming of the Messiah, whose advent they believed to be represented in all the feasts.

HOSE'A (*deliverance*), the first in order of the minor prophets in the common editions of the Hebrew Scriptures, as well as of the Alexandrian and Vulgate translations. We are not, however, to suppose from this that he flourished earlier than all the other minor prophets: by the best computation he seems to have been preceded by Joel, Amos, and Jonah.

The figures of Jewish writers regarding Hosea's parentage need scarcely be mentioned. His father, Beeri, has been confounded with Beerah, a prince of the Reubenites, 1 Chron. v. 6. So, too, Beeri has been reckoned a prophet himself, according to the rabbinical notion that the mention of a prophet's father in the introduction to his prophecies, is a proof that sire as well as son was endowed with the oracular spirit.

Whether Hosea was a citizen of Israel or Judah has been disputed. Various arguments have been adduced to show that he belonged to the kingdom of Judah; but we accede to the opinion that he was an Israelite, a native of that kingdom with whose sins and fates his book is specially and primarily occupied.

The superscription of the book determines the length of time during which Hosea prophesied. That period was both long and eventful, commencing in the days of Jeroboam, the son of Joash, extending through the lives of Uzziah, Jotham, Ahaz, and concluding in the reign of Hezekiah. Uzziah and Jeroboam were contemporary sovereigns for a certain length of time. If we compute from the first year of Uzziah to the last of Hezekiah, we find a period of 113

years. Such a period appears evidently to be too long; and the most probable calculation is to reckon from the last years of Jeroboam to the first of Hezekiah.

We have thee at least of Uzziah's reign	26 years.
" " Jotham	16 "
" " Ahaz	16 "
" " Hezekiah	2 "

60*

This long duration of office is not improbable, and the book itself furnishes strong presumptive evidence in support of this chronology. The first prophecy of Hosea foretells the overthrow of Jehu's house; and the menace was fulfilled on the death of Jeroboam, his great-grandson. 'This was the word of the Lord which he spake unto Jehu, saying, Thy sons shall sit on the throne of Israel unto the fourth generation; and so it came to pass' (2 Kings xv. 12). A prediction of the ruin which was to overthrow Jehu's house at Jeroboam's death, must have been uttered during Jeroboam's life. This fact defines the period of Hosea's commencement of his labours, and verifies the inscription, which states that the word of the Lord came to him in the reign of Jeroboam, the son of Joash, king of Israel. Again, in ch. x. 14, allusion is made to an expedition of Shalmanezar against Israel; and if it was the first inroad against king Hosea, who began to reign in the twelfth year of Ahaz, the event referred to by the prophet as past must have happened close upon the beginning of the government of Hezekiah (2 Kings xvii. 5). Data are thus in like manner afforded to corroborate the statement that Hezekiah had ascended the throne ere the long-lived servant of Jehovah was released from his toils. The extended duration indicated in the superscription is thus borne out by the contents of the prophecy.

The years of Hosea's life were melancholy and tragic. The vials of the wrath of heaven were poured out on his apostate people. The nation suffered under the evils of that schism which was effected by the craft of him who has been branded with the indelible stigma—Jeroboam, who made Israel to sin. The obligations of law had been relaxed, and the claims of religion disregarded; Baal became the rival of Jehovah, and in the dark recesses of the groves were practised the impure and murderous rites of heathen deities; peace and prosperity fled the land, which was harassed by foreign invasion and domestic broils; might and murder became the twin sentinels of the throne; alliances were formed with other nations, which brought with them seductions to paganism; captivity and insult were heaped upon Israel by the uncircumcised; the nation was thoroughly debased, and but a fraction of its population maintained its spiritual allegiance (2 Kings xix. 18). The death of Jeroboam II. was followed by an interregnum of ten years. At the expiry of this period, his son Zechariah assumed the sovereignty, and was slain by Shallum, after the short space of six months (2 Kings xv. 10). In four weeks Shallum was assassinated by Men-

hem. The assassin, during a disturbed reign of ten years, became tributary to the Assyrian Pul. His successor, Pekahiah, wore the crown but two years, when he was murdered by Pekah. Pekah, after swaying his bloody sceptre for twenty years, met a similar fate in the conspiracy of Hoshea; Hoshea, the last of the usurpers, after another interregnum of eight years, ascended the throne, and his administration of nine years ended in the overthrow of his kingdom and the expatriation of his people. 'The Lord was very angry with Israel, and removed them out of his sight. So was Israel carried out of their own land to Assyria unto this day' (2 Kings xvii. 18, 23).

The prophecies of Hosea were directed especially against the country whose sin had brought upon it such disasters—prolonged anarchy and final captivity. Israel, or Ephraim, is the people especially addressed. Their homicides and fornications, their perjury and theft, their idolatry and impiety, are censured and satirised with a faithful severity. Judah is sometimes, indeed, introduced, warned, and admonished; but the oracles having relation to Israel are primary, while the references to Judah are only incidental. The prophet's mind was intensely interested in the destinies of his own people. The nations around him are unheeded; his prophetic eye beholds the crisis approaching his country, and sees its cantons ravaged, its tribes murdered or enslaved. No wonder that his rebukes were so terrible, his menaces so alarming, that his soul poured forth its strength in an ecstasy of grief and affection. Invitations, replete with tenderness and pathos, are interspersed with his warnings and expostulations. Now we are startled with a vision of the throne, at first shrouded in darkness, and sending forth lightnings, thunders, and voices; but while we gaze, it becomes encircled with a rainbow, which gradually expands till it is lost in that universal brilliancy which itself had originated (ch. xi. and xiv.).

The peculiar mode of instruction which the prophet details in the first and third chapters of his oracles has given rise to many disputed theories. We refer to the command expressed in ch. i. 2—'And the Lord said unto Hosea, Go, take unto thee a wife of whoredoms and children of whoredoms,' &c.; ch. iii. 1, 'Then said the Lord unto me, Go yet, love a woman beloved of her friend, yet an adulteress,' &c. What was the precise nature of the transactions here recorded? Were they real events, the result of divine injunctions literally understood, and as literally fulfilled? or were these intimations to the prophet only intended to be pictorial illustrations of the apostacy and spiritual folly and unfaithfulness of Israel? The former view, viz. that the prophet actually and literally entered into this impure connubial alliance, has found advocates both in ancient and modern times. Fanciful theories are also rife on this subject. Luther supposed the prophet to perform a kind of drama in view of the people, giving his lawful wife and children these mystical appellations. Newcome thinks that a wife of fornication means merely an Israelite, a woman of apostate and adulterous Israel. Hengstenberg supposes the prophet to relate actions which happened, indeed, actually, but not outwardly. Some, with Maimonides, imagine it to be a nocturnal vision; while others make it

* Maurer, in the *Comment. Theol.* p. 284, and more lately in his *Comment. Gram. Hist. Crit. in Proph. Min.* Lipsiæ, 1840.

wholly an allegory. The first opinion has been refuted by Hengstenberg at great length and with much force. Besides other arguments resting on the impurity and loathsomeness of the supposed nuptial contract, it may be argued against the external reality of the event, that it must have required several years for its completion, and that the impressiveness of the symbol would therefore be weakened and obliterated. Whichever way this question may be solved; whether these occurrences be regarded as a real and external transaction, or as a piece of spiritual scenery, or only, as is most probable, an allegorical description; it is agreed on all hands that the actions are typical.

Expositors are not at all agreed as to the meaning of the phrase rendered 'wife of whoredoms'; whether the phrase refers to harlotry before marriage, or to unfaithfulness after it. It may afford an easy solution of the difficulty, if we look at the antitype in its history and character. Adultery is the appellation of idolatrous apostasy. The Jewish nation were espoused to God. The contract was formed on Sinai; but the Jewish people had prior to this period gone a-whoring. Josh. xxiv. 2-14, 'Your fathers dwelt on the other side of the flood in old time, and they served other gods.' Comp. Lev. xvii. 7, in which it is implied that idolatrous propensities had also developed themselves during the abode in Egypt: so that the phrase may signify one devoted to lasciviousness prior to her marriage. The marriage must be supposed a real contract, or its significance would be lost. Jer. ii. 2, 'I remember thee, the kindness of thy youth, the love of thine espousals, when thou wentest after me in the wilderness, in a land that was not sown.' *Children of whoredoms* refers most naturally to the two sons and daughters afterwards to be born. They were not the prophet's own, as is intimated in the allegory, and they followed the pernicious example of the mother.

The names of the children being symbolical, the name of the mother has probably a similar signification, and may have the symbolic sense of 'one thoroughly abandoned to sensual delights.' The names of the children are Jezreel, Lo-ruhamah, and Lo-ammi. The prophet explains the meaning of the appellations. It is generally supposed that the names refer to three successive generations of the Israelitish people. Hengstenberg, on the other hand, argues that 'wife and children both are the people of Israel: the three names must not be considered separately, but taken together.' But as the marriage is first mentioned, and the births of the children are detailed in order, some time elapsing between the events, we rather adhere to the ordinary exposition. Nor is it without reason that the second child is described as a female.

The first child, Jezreel, may refer to the first dynasty of Jeroboam I. and his successors, which was terminated in the blood of Ahab's house which Jehu shed at Jezreel. The name suggests also the cruel and fraudulent possession of the vineyard of Naboth, 'which was in Jezreel,' where, too, the woman Jezebel was slain so ignominiously (1 Kings xvi. 1; 2 Kings ix. 21). But as Jehu and his family had become as corrupt as their predecessors, the scenes of Jezreel were again to be enacted, and Jehu's race must perish. Jezreel,

the spot referred to by the prophet, is also, according to Jerome, the place where the Assyrian army routed the Israelites. The name of this child associates the past and future, symbolizes past sins, intermediate punishments, and final overthrow. The name of the second child, Lo-ruhamah, 'not-pitied,' the appellation of a degraded daughter, may refer to the feeble, effeminate period which followed the overthrow of the first dynasty, when Israel became weak and helpless as well as sunk and abandoned. The favour of God was not exhibited to the nation: they were as abject as impious. But the reign of Jeroboam II. was prosperous; new energy was infused into the kingdom; gleams of its former prosperity shone upon it. This revival of strength in that generation may be typified by the birth of a third child, a son, Lo-ammi, 'not-my-people' (2 Kings xiv. 25). Yet prosperity did not bring with it a revival of piety; still, although their vigour was recruited, they were not God's people.

The peculiarities of Hosea's style have been often remarked. His style, says De Wette, 'is abrupt, unrounded, and ebullient; his rhythm hard, leaping, and violent. The language is peculiar and difficult.' Lowth speaks of him as the most difficult and perplexed of the prophets. Eichhorn's description of his style was probably at the same time meant as an imitation of it:—'His discourse is like a garland woven of a multiplicity of flowers: images are woven upon images, comparison wound upon comparison, metaphor strung upon metaphor. He plucks one flower, and throws it down that he may directly break off another. Like a bee, he flies from one flower-bed to another, that he may suck his honey from the most varied pieces. It is a natural consequence that his figures sometimes form strings of pearls. Often is he prone to approach to allegory—often he sinks down in obscurity' (comp. ch. v. 9; vi. 3; vii. 8; xiii. 3, 7, 8, 16).

Hosea, as a prophet, is expressly quoted by Matthew (ii. 15). The citation is from the first verse of ch. xi. Hosea vi. 6 is quoted twice by the same evangelist (ix. 13; xii. 7). Quotations from his prophecies are also to be found in Rom. ix. 25, 26. References to them occur in 1 Cor. xv. 55, and in 1 Pet. ii. 10. Messianic references are not clearly and prominently developed. This book, however, is not without them; but they lie more in the spirit of its allusions than in the letter. Hosea's Christology appears written not with ink, but with the spirit of the living God, on the fleshy tables of his heart. The future conversion of his people to the Lord their God, and David their king, their glorious privilege in becoming sons of the living God, the faithfulness of the original promise to Abraham, that the number of his spiritual seed should be as the sand of the sea, are among the oracles whose fulfilment will take place only under the new dispensation.

HOSEA, son of Elah, and last king of Israel. He conspired against and slew his predecessor Pekah, and seized his dominions. 'He did evil in the sight of the Lord,' but not in the same degree as his predecessors; and this, by the Jewish commentators, is understood to mean that he did not, like former kings of Israel (2 Kings xv. 30), restrain his subjects from going up to Jerusalem to worship. The intelligence that Hosea had entered into a confederacy with So, king of Egypt,

with the view of shaking off the Assyrian yoke, caused Shalmaneser, the king of Assyria, to march an army into the land of Israel; and after a three years' siege Samaria was taken and destroyed, and the ten tribes were sent into the countries beyond the Euphrates, B.C. 720 (2 Kings xv. 30; xvii. 1-6; xviii. 9-12). The chronology of this reign is much perplexed [see CHRONOLOGICAL TABLE].

HOSPITALITY. The practice of receiving strangers into one's house and giving them suitable entertainment, may be traced back to the early origin of human society. It is not, however, confined to any age or to any country, but has been observed in all parts of the globe wherever circumstances have been such as to render it desirable—thus affording one among many instances of the readiness with which human nature, in its moral as well as in its physical properties, adapts itself to every varying condition. Hospitality is therefore not a peculiarly Oriental virtue. It was practised, as it still is, among the least cultivated nations. It was not less observed, in the early periods of their history, among the Greeks and Romans. With the Greeks, hospitality was under the immediate protection of religion. Jupiter bore a name signifying that its rights were under his guardianship. In the *Odyssey* we are told expressly that all guests and poor people are special objects of care to the gods. There were both in Greece and Italy two kinds of hospitality, the one private, the other public. The first existed between individuals, the second was cultivated by one state towards another. Hence arose a new kind of social relation: between those who had exercised and partaken of the rites of hospitality an intimate friendship ensued,—a species of freemasonry, which was called into play wherever the individuals might afterwards chance to meet, and the right, duties, and advantages of which passed from father to son, and were deservedly held in the highest estimation.

But though not peculiarly Oriental, hospitality has nowhere been more early or more fully practised than in the East. It is still honourably observed among the Arabs, especially at the present day. An Arab, on arriving at a village, dismounts at the house of some one who is known to him, saying to the master, 'I am your guest.' On this the host receives the traveller, and performs his duties, that is, he sets before his guest his supper, consisting of bread, milk, and borgeul, and, if he is rich and generous, he also takes the necessary care of his horse or beast of burden. Should the traveller be unacquainted with any person, he alights at any house, as it may happen, fastens his horse to the same, and proceeds to smoke his pipe until the master bids him welcome, and offers him his evening meal. In the morning the traveller pursues his journey, making no other return than 'God be with you' (good bye).

We find hospitality practised and held in the highest estimation at the earliest periods in which the Bible speaks of human society (Gen. xviii. 3; xix. 2; xxiv. 25; Exod. ii. 20; Judg. xix. 16). Express provision for its exercise is made in the Mosaic law (Lev. xix. 33; Deut. xiv. 29). In the New Testament also its observance is enjoined, though in the period to which its books refer the nature and extent of hospitality would be changed with the change that society had undergone

(1 Pet. iv. 9; 1 Tim. iii. 2; Tit. i. 8; 1 Tim. v. 10; Rom. xii. 13, Heb. xiii. 2). The disposition which generally prevailed in favour of the practice was enhanced by the fear lest those who neglected its rites should, after the example of impious men, be subjected by the divine wrath to frightful punishments. Even the Jews, in 'the latter days,' laid very great stress on the obligation: the rewards of Paradise, their doctors declared, were his who spontaneously exercised hospitality.

The guest, whoever he might be, was on his appearing invited into the house or tent (Gen. xix. 2; Exod. ii. 20; Judg. xiii. 15; xix. 21). Courtesy dictated that no improper questions should be put to him, and some days elapsed before the name of the stranger was asked, or what object he had in view in his journey (Gen. xxiv. 33). As soon as he arrived he was furnished with water to wash his feet (Gen. xviii. 4; xix. 2; 1 Tim. v. 10); received a supply of needful food for himself and beast (Gen. xviii. 5; xix. 3; xxiv. 25; Exod. ii. 20; Judg. xix. 20); and enjoyed courtesy and protection from his host (Gen. xix. 5; Josh. ii. 2; Judg. xix. 23). The case of Sisera, decoyed and slain by Jael (Judg. iv. 18, sq.), was a gross infraction of the rights and duties of hospitality. On his departure the traveller was not allowed to go alone or empty-handed (Judg. xix. 5). As the free practice of hospitality was held right and honourable, so the neglect of it was considered discreditable (Job xxxi. 32; *Odys.* xiv. 56); and any interference with the comfort and protection which the host afforded, was treated as a wicked outrage (Gen. xix. 4, sq.). Though the practice of hospitality was general, and its rites rarely violated, yet national or local enmities did not fail sometimes to interfere; and accordingly travellers avoided those places in which they had reason to expect an unfriendly reception. So in Judg. xix. 12, the 'certain Levite' spoken of said, 'We will not turn aside hither into the city of a stranger, that is not of the children of Israel.' The quarrel which arose between the Jews and Samaritans after the Babylonish captivity destroyed the relations of hospitality between them. Regarding each other as heretics, they sacrificed every better feeling. It was only in the greatest extremity that the Jews would partake of Samaritan food, and they were accustomed, in consequence of their religious and political hatred, to avoid passing through Samaria in journeying from one extremity of the land to the other. The animosity of the Samaritans towards the Jews appears to have been somewhat less bitter; but they showed an adverse feeling towards those persons who, in going up to the annual feast at Jerusalem, had to pass through their country (Luke ix. 53). At the great national festivals hospitality was liberally practised so long as the state retained its identity. On these festive occasions no inhabitant of Jerusalem considered his house his own; every home swarmed with strangers; yet this unbounded hospitality could not find accommodation in the houses for all who stood in need of it, and a large proportion of visitors had to be content with such shelter as tents could afford.

HOURS. The ancient Hebrews, like the Greeks, were unacquainted with any other means of distinguishing the times of day than the natural

divisions of morning, midday or noon, twilight, and night (Gen. xv. 12; xviii. 1; xix. 1, 15, 23). The earliest mention of hours occurs in Daniel (iii. 15; iv. 19; v. 5); and, as the Chaldeans claimed the honour of inventing this system of notation, it is most probable that it was during their residence in Babylon that the Jews became familiar with their artificial distribution of the day. At all events no trace of it occurs before the captivity of that people; while, subsequently to their return to their own land, we find the practice adopted, and, in the time of Christ, universally established, of dividing the day and night respectively into twelve equal portions (Matt. xx. 3-5; John xi. 9; Acts v. 7; xix. 34). The Jewish horology, however, in common with that of other Eastern nations, had this inherent defect, that the hours, though always equal to one another, were unequal in regard to the seasons, and that as their day was reckoned from sunrise to sunset, and not from the fixed period of noon, as with us, the twelve hours into which it was divided varied, of course, in duration according to the fluctuations of summer and winter. The mid-day, which with us is the twelfth hour, the Jews counted their sixth, while their twelfth hour did not arrive till sunset. At the equinoxes, their hours were exactly of the same length with ours, and the time from which they began to reckon their day at those seasons corresponded precisely with our six o'clock A.M.; their first hour being our seven o'clock, their third (Acts ii. 15), our nine, their ninth (Acts iii. 1), our three o'clock P.M., and their eleventh (Matt. xx. 6), our five. This equality, however, in the duration of their hours, as well as in their correspondence to ours, was disturbed as the season approached towards the summer or winter solstice. In midsummer, when sunrise in Judæa takes place at five o'clock A.M., and sunset at seven P.M., the Jewish hours were a little longer than ours; and the only one of their hours which answered exactly to ours was the sixth, or twelve o'clock, while in all the rest there was a considerable difference. Their third hour was shortly *before* our nine, and their ninth a little *after* our three. In like manner, in winter, when the sun rises at seven and sets at five, the Jewish hour was proportionally shorter than ours, their third hour not occurring till a little *after* our nine, and their ninth a little *before* our three. Hence it is evident that in order to determine exactly the duration of Daniel's silence, for instance ('he was astonished one hour,' Dan. iv. 19), or the exact time when the darkness at Christ's crucifixion ended, it is necessary to ascertain the particular seasons when these incidents occurred.

In ancient times the only way of reckoning the progress of the day was by the length of the shadow—a mode of reckoning which was both contingent on the sunshine, and served only for the guidance of individuals. By what means the Jews calculated the length of their hours—whether by dialling, by the eclepsydra or water-clock, or by some horological contrivance, like what was used anciently in Persia by the Romans, and which is still used in India, a servant notifying the intervals, it is now impossible to discover.

Besides these smaller hours, there was another division of the day into larger hours, with re-

ference to the stated periods of prayer, viz. the third, sixth, and ninth hours of the day (Ps. xiv. 17).

The night was divided into twelve equal portions or hours, in precisely the same manner as the day. The most ancient division, however, was into three watches; the first, or beginning of the watches, as it is called (Lament. ii. 19); the middle-watch (Judg. vii. 19); and the morning-watch (Exod. xiv. 24). When Judæa became a province of Rome, the Roman distribution of the night into four watches was introduced [see COCK-CROWING and DAY]; to which division frequent allusions occur in the New Testament (Luke xii. 38; Matt. xiv. 25; xiii. 35), as well as to that of hours (Matt. xxv. 13; xxvi. 40; Mark xiv. 37; Luke xvii. 59; Acts xiii. 23; Rev. iii. 3).

It remains only to notice that the word *hour* is sometimes used in Scripture to denote some determinate season, as 'mine hour is not yet come,' 'this is your hour, and the power of darkness,' 'the hour is coming,' &c.

HOUSE. Houses are often mentioned in Scripture, several important passages of which cannot be well understood without a clearer notion of the houses in which the Hebrews dwelt, than can be realized by such comparisons as we naturally make with those in which we ourselves live. But things so different afford no grounds for instructive comparison. We must therefore bring together such facts as can be collected from the Scripture and from ancient writers, with such details from modern travellers and our own observations, as may tend to illustrate these statements; for there is every reason to conclude that little substantial difference exists between the ancient houses and those which are at this day found in south-western Asia.

H.O.

Our information respecting the abodes of men in the ages before the Deluge is, however, too scanty to afford much ground for notice.

We may, therefore, pass over this early period, and proceed at once to the later times in which the Hebrews flourished.

The observations offered under ARCHITECTURE will preclude the expectation of finding among this Eastern people an accomplished style of building. The reason of this is plain. Their ancestors had roved through the country as nomade shepherds, dwelling in tents; and if ever they built huts they were of so light a fabric as easily to be taken down when a change of station became necessary. In this mode of life solidity in the structure of any dwelling was by no means required; much less were regular arrangement and the other requisites of a well-ordered dwelling matters of consideration. Under such cir-

circumstances as these, no improvement in the habitation takes place. The tents in which the Arabs now dwell are in all probability the same as those in which the Hebrew patriarchs spent their lives.

On entering Palestine, the Israelites occupied the dwellings of the dispossessed inhabitants; and for a long time no new buildings would be needed. The generation which began to build new houses must have been born and bred in the country, and would naturally erect buildings like those which already existed in the land. Their mode of building was therefore that of the Canaanites whom they had dispossessed. Of their style of building we are not required to form any exalted notions. In all the history of the conquest of the country by the Israelites, there is no account of any large or conspicuous building being taken or destroyed by them. It would seem also as if there had been no temples; for we read not that any were destroyed by the conquerors; and the command that the monuments of idolatry should be overthrown, specifies only altars, groves, and high places—which seems to lead to the same conclusion; since, if there had been temples existing in the land of Canaan, they would doubtless have been included. It is also manifest from the history that the towns which the Hebrews found in Palestine were mostly small, and that the largest were distinguished rather by their number than by the size or magnificence of their buildings.

It is impossible to say to what extent Solomon's improvements in state architecture operated to the advancement of domestic architecture. He built different palaces, and it is reasonable to conclude that his nobles and great officers followed more or less the models which these palaces presented. In the East, however, the domestic architecture of the bulk of the people is little affected by the improvements in state buildings. Men go on building from age to age as their forefathers built; and in all probability the houses which we now see in Palestine are such as those in which the Jews, and the Canaanites before them, dwelt—the mosques, the Christian churches, and the monasteries being the only new features in the scene.

There is no reason to suppose that many houses in Palestine were constructed with wood. A great part of that country was always very poor in timber, and the middle part of it had scarcely any wood at all. But of stone there was no want; and it was consequently much used in the building of houses. Having premised this, the principal building materials mentioned in Scripture may be enumerated with reference to their place in the three kingdoms of nature.

I. VEGETABLE SUBSTANCES:—

1. *Shittim*, or the timber of the acacia tree, which grows abundantly in the valleys of Arabia Petraea, and was therefore employed in the construction of the tabernacle. Not being, however, a tree of Palestine, the wood was not subsequently used in building.

2. The wood of the *sycomore fig-tree*, mentioned in Isa. ix. 10, as a building timber in more common use than cedar, or perhaps than any other wood known in Palestine.

3. *Cedar*. As this was a wood imported from Lebanon, it would only be used in the higher class of buildings.

4. *Algum-wood*, which, being imported from the Eastern seas, must have been valued at a high price. It was used by Solomon for pillars for his own palace, and for the temple (1 Kings x. 11, 12).

5. *Cypress-wood*. Boards of this were used for the floor of the Temple, which may suggest the use to which it was ordinarily applied (1 Kings vi. 15; 2 Chron. iii. 5).

Particular accounts of all these woods, and of the trees which afforded them, may be seen under the respective words.

II. MINERAL SUBSTANCES:—

1. *Marble*. We find the court of the king of Persia's palace covered with marble of various colours (Esth. i. 6). David is recorded to have possessed abundance of marble (1 Chron. xxx. [xxix.] 2; comp. Cant. v. 13), and it was used by Solomon for his palace, as well as for the Temple.

2. *Porphyry and Granite* are supposed to be 'the glistering stones, and stones of divers colours' named in 1 Chron. xxix. 2. If so, the mountains of Arabia Petraea furnished the nearest source of supply, as these stones do not exist in Palestine or Lebanon.

3. *Bricks*. Bricks hardened by fire were employed in the construction of the tower of Babel (Gen. xi. 3), and the hard bondage of the Israelites in Egypt consisted in the manufacture of sun-dried bricks (Exod. v. 7, 10-13). This important building-material has been noticed under another head [BRICKS]; and it only remains to remark that no subsequent notice of bricks as being used by the Hebrews occurs after they had entered Palestine. Yet, judging from existing analogies, it is more than probable that bricks were to a considerable extent employed in their buildings.

3. *Chalk and Gypsum*. That the Hebrews were acquainted with these materials appears from Deut. xxvii. 2; and from Dan. v. 5; Acts xxiii. 3; farther appears that walls were covered with them.

4. *Mortar*, a cement made of lime, ashes, and chopped straw, or of gypsum and chopped straw. This is probably meant in Jer. xliii. 9; Ezek. xiii. 10, 11, 20.

5. *Asphaltum, or Bitumen*, which is mentioned as being used for a cement by the builders of Babel. This must have been in the want of lime-mortar, the country being a stoneless plain. But the Israelites, who had no lack of the usual cements, did not employ asphaltum [BITUMEN].

6. The metals also must be, to a certain extent, regarded as building materials: lead, iron, and copper are mentioned; and even silver and gold were used in combination with wood, for various kinds of solid, plated, and inlaid work (Exod. xxxvi. 34, 38).

III. ANIMAL SUBSTANCES:—

Such substances can be but in a small degree applicable to building. *Ivory* houses are mentioned in 1 Kings xxii. 39; Amos iii. 14; most likely from certain parts of the wood-work, probably about the doors and windows, being inlaid with this valuable substance. Solomon obtained ivory in great quantities from Tyre (1 Kings x. 22; 2 Chron. ix. 21). [IVORY.]

In describing the houses of ancient Palestine, there is no way of arriving at distinct notions but

by taking the texts of Scripture and illustrating them by the existing houses of those parts of Western Asia which have been the least exposed to the changes of time, and in which the manners of ancient days have been the best preserved. Writers on the subject have seen this, and have brought together the descriptions of travellers bearing on the subject; but these descriptions have generally been applied with very little judgment, from the want of that distinct knowledge of the matter which only actual observation can give. Travellers have seldom been students of Scripture, and students of Scripture have seldom been travellers. The present writer, having resided for a considerable time in Turkish Arabia, where the type of Scriptural usages has been better preserved than in Egypt, or even in Palestine itself, is enabled to speak on this matter with somewhat more precision. Of four houses in which he there resided, two were first-rate, and two were second-rate. One of the latter has always seemed to him to suggest a more satisfactory idea of a Scriptural house than any of the others, or than any that he ever saw in other Eastern countries. That one has therefore formed the basis of all his ideas on this subject; and where it seemed to fail, the others have usually supplied the illustration he required. This course he has found so beneficial that he will endeavour to impart a clear view of the subject to the reader by giving a general notion of the house referred to, explaining any points in which the others differed from it, and producing the passages of Scripture which seem to be illustrated in the process.

211.

We may premise that the houses present little more than a dead wall to the street. The privacy of Oriental domestic habits would render our plan of throwing the front of the houses towards the street most repulsive. On coming to a house, one finds a lofty wall, which would be blank but for the low door of entrance [GATE]; over which is usually the kiosk, or latticed window (sometimes projecting like the huge bay windows of Elizabethan houses), or screened balcony of the 'summer parlour.' Besides this, there may be a small latticed window or two high up the wall, giving light and air to upper chambers. This seems,

from the above engraving (No. 211), to have been the character of the fronts of ancient Egyptian houses.

The buildings which form the house from towards an inner square or court. Small houses have one of these courts, but superior houses have two, and first-rate houses three, communicating with each other; for the Orientals dislike ascending stairs or steps, and prefer to gain room rather by the extent than height of their habitations. It is only when the building-ground is confined by nature or by fortifications, that they build high houses. Not one out of four houses we ourselves inhabited had more than one story; but, from the loftiness of the rooms, they were as high as houses of three stories among ourselves. If there are three or more courts, all except the outer one are much alike in size and appearance; but the outer one, being devoted to the more public life of the occupant, and to his intercourse with society, is materially different from all the others. If there are more than two, the second is devoted chiefly to the use of the master, who is there attended only by his eunuchs, children, and females, and sees only such persons as he calls from the third or interior court in which they reside. In the history of Esther, she incurs danger by going from her interior court to that of the king, to invite him to visit her part of the palace; but she would not on any account have gone to the outermost court, in which the king held his public audiences. When there are only two courts, the innermost is the harem, in which the women and children live, and which is the true domicile of the master, to which he withdraws when the claims of business, of society, and of friends have been satisfied, and where no man but himself ever enters, or could be induced to enter, even by strong persuasions.

Entering at the street-door, a passage, usually sloping downward, conducts to the outer court; the opening from the passage to this is not opposite the gate of entrance, but by a side turn, to preclude any view from the street into the court when the gate is opened. On entering the outer court through this passage, we find opposite to us the public room, in which the master receives and gives audience to his friends and clients. This is entirely open in front, and, being richly fitted up, has a splendid appearance when the first view of it is obtained. A refreshing coolness is sometimes given to this apartment by a fountain throwing up a jet of water in front of it. Some idea of the apartment may be formed from the annexed cut (No. 212). This is the 'guest-chamber' of Luke xxii. 11. A large portion of the other side of the court is occupied with a frontage of lattice-work filled with coloured glass, belonging to a room as large as the guest-chamber, and which in winter is used for the same purpose, or serves as the apartment of any visitor of distinction, who cannot of course be admitted into the interior parts of the house. The other apartments in this outer court are comparatively small, and are used for the accommodation of visitors, retainers, and servants. These various apartments are usually upon what we should call the first floor, or at least upon an elevated terrace. The ground-floor is in that case occupied by various store-rooms and servants' offices. In all cases the upper floor, containing the principal rooms, is fronted by a gallery or

terrace, protected from the sun by a sort of pent-house roof supported by pillars of wood.

212.

In houses having but one court, the reception-room is on the ground-floor, and the domestic establishment in the upper part of the house. This arrangement is shown in the annexed engraving (No. 213), which is also interesting from its showing the use of the 'pillars' so often men-

213.

tioned in Scripture, particularly 'the pillars on which the house stood, and by which it was borne up' (Judg. xvi. 29).

The kiosk, which has been mentioned above as

fronting the street, over the gateway, is connected with one of the larger rooms already described, or forms a separate apartment, which is the summer parlour of Scripture. Here, in the heat of the afternoon, the master lounges or dozes listlessly, refreshed by the air which circulates between the openings of the lattice-work; and here he can, if he pleases, notice unobserved what passes in the street. In this we are to seek the summer parlour in which Ehud smote the king of Moab (Judg. iii. 20), and the 'chamber on the wall,' which the Shunamite prepared for the prophet (2 Kings iv. 10). The projecting construction over the reception chamber in No. 213 is, like the kiosk, towards the street as a summer parlour; but there it belongs to the women's apartments, and looks into the court, and not the street.

It is now time to proceed to the inner court, which we enter by a passage and door similar to those by which we entered from the street. This passage and door are usually at one of the innermost corners of the outer court. Here a much more extended prospect opens to us, the inner court being generally much larger than the former. The annexed cut (No. 214) will convey some notion of it; but being a Persian house, it somewhat differs from that which we have more particularly in view. It is lower, the principal apartments standing upon a terrace or bank of earth, and not upon a basement story of offices; and it also wants the veranda or covered gallery in front, which we find in Syro-Arabian houses. The court is for the most part paved, excepting a portion in the middle, which is planted with trees (usually two) and shrubs, with a basin of water in the midst. In our Arabian house the two trees were palm-trees, in which a number of wild doves built their nests. In the second cut (No. 347), showing an ancient Egyptian house, we see the same arrangement: two palm-trees growing in the court extend their tops above, and, as it were, out of the house—a curious effect frequently noticed in the towns of South-western Asia. That the Jews had the like arrangement of trees in the courts of their houses, and that the birds nested

214.

in them, appears from *Psa. lxxxiv. 2, 3*. They had also the basin of water in the inner court, or haram; and among them it was used for bathing, as is shown by David's discovering Bathsheba bathing as he walked on the roof of his palace. This use of the reservoir has now been superseded by the establishment of public warm baths in every town, and in private mansions. Cold bathing has all but ceased in Western Asia.

The arrangement of the inner court is very similar to that of the outer; but the whole is more open and airy. The buildings usually occupy two sides of the square, of which the one opposite the entrance contains the principal apartments. They are upon what we should call the first floor, and open into a wide gallery or veranda, which in good houses is nine or ten feet deep, and covered by a wooden penthouse supported by a row of wooden columns. This terrace, or gallery, is furnished with a strong wooden balustrade, and is usually paved with squared stones, or else floored with boards. In the centre of the principal front is the usual open drawing-room, on which the best art of the Eastern decorator is expended. Much of one of the sides of the court front is usually occupied by the large sitting-room, with the latticed front covered with coloured glass, similar to that in the outer court. The other rooms, of smaller size, are the more private apartments of the mansion. There are usually no doors to the sitting or drawing-rooms of Eastern houses: they are closed by curtains, at least in summer, the opening and shutting of doors being odious to most Orientals. The same seems to have been the case among the Hebrews, as far as we may judge from the curtains which served instead of doors to the tabernacle, and which separated the inner and outer chambers of the temple. The curtained entrances to our Westminster courts of law supply a familiar example of the same practice.

These observations apply to the principal story. The basement is occupied by various offices, stores of corn and fuel, places for the water-jars to stand in, places for grinding corn, baths, kitchens, &c. The kitchens are always in this inner court, as the cooking is performed by women, and the ladies of the family superintend or actually assist in the process. The kitchen, open in front, is on the same side as the entrance from the outer court; and the top of it forms a terrace, which affords a communication between the first floor of both courts by a private door, seldom used but by the master of the house and attendant eunuchs.

The kitchen is surrounded by a bank of brick-work, on the top of which are the fireplaces formed in compartments, and separated by little walls of fire-brick or tile. In these different compartments the various dishes of an Eastern feast may be at once prepared at charcoal fires. This place being wholly open in front, the half-tame doves, which have their nests in the trees of the court, often visit it, in the absence of the servants, in search of crumbs, &c. As they sometimes blacken themselves, this perhaps explains the obscure passage in Ps. lxxviii. 13, 'Though ye have lien among the pots, ye shall be as the wings of a dove covered with silver,' &c. In Turkish Arabia most of the houses have underground cellars or vaults, to which the inhabitants retreat during the mid-day heat of summer, and there enjoy a refreshing coolness. In the rest of the year these cellars, or *serdaubs*, as they are called, are abandoned to the bats, which swarm in them in scarcely credible numbers (Isa. ii. 20).

From the court a flight of stone steps, usually at the corner, conducts to the gallery, from which a plainer stair leads to the house-top. If the house be large, there are two or three sets of steps

to the different sides of the quadrangle, but seldom more than one flight from the terrace to the house-top of any one court. There is, however, a separate stair from the outer court to the roof, and it is usually near the entrance. This will bring to mind the case of the paralytic, whose friends, finding they could not get access to Jesus through the people who crowded the court of the house in which he was preaching, took him up to the roof, and let him down in his bed through the tiling, to the place where Jesus stood (Luke v. 17-26). If the house in which our Lord then was had more than one court, he and the auditors were certainly in the outer one; and it is reasonable to conclude that he stood in the veranda addressing the crowd below. The men bearing the paralytic therefore perhaps went up the steps near the door; and finding they could not even then get near the person of Jesus, the gallery being also crowded, continued their course to the roof of the house, and removing the boards over the covering of the gallery, at the place where Jesus stood, lowered the sick man to his feet. But if they could not get access to the steps near the door, as is likely, from the door being much crowded, their alternative was to take him to the roof of the next house, and there hoist him over the parapet to the roof of the house which they desired to enter.

The roof of the house is, of course, flat. It is formed by layers of branches, twigs, matting, and earth, laid over the rafters and trodden down; after which it is covered with a compost which acquires considerable hardness when dry. Such roofs would not, however, endure the heavy and continuous rains of our climate; and in those parts of Asia where the climate is more than usually moist, a stone roller is usually kept on every roof, and after a shower a great part of the population is engaged in drawing these rollers over the roofs. It is now very common, in countries where timber is scarce, to have domed roofs; but in that case the flat roof, which is indispensable to Eastern habits, is obtained by filling up the hollow intervals between the several domes, so as to form a flat surface at the top. These flat roofs are often alluded to in Scripture; and the allusions show that they were made to serve the same uses as at present. In fine weather the inhabitants resorted much to them to breathe the fresh air, to enjoy a fine prospect, or to witness any event that occurred in the neighbourhood (2 Sam. xi. 2; Isa. xxii. 1; Matt. xxiv. 17; Mark xiii. 15). The dryness of the summer atmosphere enabled them, without injury to health, to enjoy the bracing coolness of the night-air by sleeping on the house-tops; and in order to have the benefit of the air and prospect in the daytime, without inconvenience from the sun, sheds, booths, and tents, were sometimes erected on the house-tops (2 Sam. xvi. 22).

The roofs of the houses are well protected by walls and parapets. Towards the street and neighbouring houses is a high wall; and towards the interior court-yard usually a parapet or wooden rail. 'Battlements' of this kind, for the prevention of accidents, are strictly enjoined in the Law (Deut. xxii. 8); and the form of the battlements of the Egyptian houses, as shown in the annexed engravings, suggest some interesting analogies, when we consider how recently the

Israelites had quitted Egypt when that law was delivered.

215.

216.

Of the inferior kinds of Oriental dwellings, such as are met with in villages and very small towns, the subjoined is not an unfavourable specimen. In these there is no central court, but there is generally a yard attached, either on one side or at the rear. The shaded platform in front is such as is usually seen attached to coffee-houses, which is, in fact, the character of the house represented in No. 217. Here the customers sit and smoke their pipes, and sip their coffee. The village cabins and abodes of the peasantry are, of course, of a still inferior description; and, being the abodes of people who live much in the open air, will not bear comparison with the houses of the same class in Northern Europe, where the cottage is the *home* of the owner.

No ancient houses had chimneys. The word so translated in Hos. xiii. 3, means a hole through which the smoke escaped; and this existed only in the lower class of dwellings, where raw wood was employed for fuel or cooking, and where there was an opening immediately over the hearth to let out the smoke. In the better sort of houses the rooms were warmed in winter by charcoal in braziers, as is still the practice (Jer. xxxvi. 22; Mark xiv. 54; John xviii. 18).

The windows had no glass. They were only latticed, and thus gave free passage to the air and admitted light, while birds and bats were excluded. In winter the cold air was kept out by

veils over the windows, or by shutters with holes in them sufficient to admit light (1 Kings vii. 17; Cant. ii. 9).

In the East, where the climate allows the people to spend so much of their time out of doors, the articles of furniture and the domestic

217.

utensils have always been few and simple. They are in this work noticed under separate heads (BED; LAMPS; POTTERY; SEATS; TABLES). The rooms, however, although comparatively vacant of moveables, are far from having a naked or unfurnished appearance. This is owing to the high ornament given to the walls and ceilings. The walls are broken up into various recesses, and the ceiling into compartments. The ceiling, if of wood and flat, is of curious and complicated joinery; or, if vaulted, is wrought into numerous coives, and enriched with fret-work in stucco; and the walls are adorned with arabesques, mosaics, mirrors, painting, and gold; which, as set off by the marble-like whiteness of the stucco, has a truly brilliant and rich effect. There is much in this to remind one of such descriptions of splendid interiors as that in Isa. liv. 11, 12.

HULDAH, or rather CHULDAH, wife of Shallum, a prophetess, who, in the reign of Josiah abode in that part of Jerusalem called the Mishneh, where the book of the Law was discovered by the high-priest Hilkiah. This prophetess was consulted respecting the denunciations which it contained. She then delivered an oracular response of mingled judgment and mercy; declaring the not remote destruction of Jerusalem, but promising Josiah that he should be taken from the world before these evil days came; *a.c.* 623 (2 Kings xxii. 14-20; 2 Chron. xxxiv. 22-28). Huldah is only known for this circumstance. She was probably at this time the widow of Shallum, a name too common to suggest any information; but he is said to have been grandson of one Harhas, 'keeper of the wardrobe,' but whether the priestly or the royal wardrobe is uncertain. If the former, he must have been a Levite, if not a priest. As to her residence, it is said to have been 'in the Mishneh,' which the Auth. Vers. renders 'in the college.' But there is no ground to conclude that any school or college of the prophets is to be understood. The name means 'second' or 'double;' and many of the Jews themselves (as Jarchi states) understood it as the name of the suburb lying between the inner and outer wall of Jerusalem. It is safest to regard it as a proper name denoting some quarter of Jerusalem about which we are

not certain, and, accordingly, to translate 'in the Mishneh.'

HUNTING. The pursuit and capture of beasts of the field was the first means of subsistence which the human race had recourse to, this mode of gaining a livelihood having naturally preceded the engagements of agriculture, as it presented food already provided, requiring only to be taken and slaughtered; whereas tillage must have been an afterthought, and a later resource, since it implies accumulated knowledge, skill, and such provision beforehand of subsistence as would enable a clan or a family to wait till the fruits of the earth were matured. Hunting was, therefore, a business long ere it was a sport. And originally, before man had established his empire on the earth, it must have been not only a serious but a dangerous pursuit. In process of time, however, when civilization had made some progress, when cities were built and lands cultivated, hunting was carried on not so much for the food which it brought as for the recreation it gave and its conduciveness to health.

The East—the cradle of civilization—presepts us with hunting in both the characters now spoken of, originally as a means of support, then as a manly amusement. In the early records of history we find hunting held in high repute, partly, no doubt, from its costliness, its dangers, its similitude to war, its capability of combining the energies of many, and also from the relief which it afforded to the stagnant monotony of a court, in the high and bounding spirits that it called forth. Hunting has always borne somewhat of a regal character, and down to the present hour has worn an aristocratic air. In Babylon and Persia this attribute is presented in bold relief. Immense parks were enclosed for nurturing and preserving beasts of the chase. The monarch himself led the way to the sport, not only in these preserves, but also over the wide surface of the country, being attended by his nobles, especially by the younger aspirants to fame and warlike renown.

In the Bible we find hunting connected with royalty so early as in Gen. x. The great founder of Babel was in general repute as 'a mighty hunter before the Lord.' The patriarchs, however, are to be regarded rather as herdsman than hunters, if respect is had to their habitual mode of life. The condition of the herdsman ensues next to that of the hunter in the early stages of civilization; and so we find that even Cain was a keeper of sheep. This, and the fact that Abel is designated 'a tiller of the ground,' would seem to indicate a very rapid progress in the arts and pursuits of social life. The same contrast and similar hostility we find somewhat later, in the case of Jacob and Esau; the first, 'a plain man dwelling in tents'; the second, 'a cunning hunter, a man of the field' (Gen. xxv. sq.). The account given of Esau in connection with his father seems to show that hunting was, conjointly with tillage, pursued at that time as a means of subsistence, and that hunting had not then passed into its secondary state, and become an amusement.

In Egypt the children of Israel would be spectators of hunting carried on extensively and pursued in different manners, but chiefly, as appears probable, with a view rather to recreation than subsistence. That the land of promise into which

the Hebrews were conducted on leaving Egypt was plentifully supplied with beasts of the chase appears clear from Exod. xxii. 29, 'I will not drive them out in one year, lest the land become desolate and the beast of the field multiply against thee' (comp. Deut. iii. 22). And from the regulation given in Lev. xvii. 15, it is manifest that hunting was practised after the settlement in Canaan, and was pursued with the view of obtaining food. Prov. xii. 27 proves that hunting animals for their flesh was an established custom among the Hebrews, though the turn of the passage may serve to show that, at the time it was penned, sport was the chief aim. If hunting was not forbidden in the 'year of rest,' special provision was made that not only the cattle, but 'the beast of the field' should be allowed to enjoy and flourish on the uncropped spontaneous produce of the land (Exod. xxiii. 11; Lev. xxv. 7). That the lion and other ravenous beasts of prey were not wanting in Palestine, many passages of the Bible make obvious (1 Sam. xvii. 34; 2 Sam. xxiii. 20; 1 Kings xii. 24). The lion was even made use of to catch other animals (Ezek. xix. 3), and Harmer long ago remarked, that as in the vicinity of Gaza, so also in Judæa, leopards were trained and used for the same purpose (Harmer, iv. 358; Hab. i. 8). That lions were taken by pitfalls as well as by nets appears from Ezek. xix. 4, 8 (Shaw, p. 172). In the latter verse the words of the prophet, 'and spread their net over him,' allude to the custom of enclosing a wide extent of country with nets, into which the animals were driven by hunters. The spots thus enclosed were usually in a hilly country and in the vicinity of water-brooks; whence the propriety and force of the language of Ps. xli. 1, 'As the (hunted) hart panteth after the water-brooks.' These places were selected because they were those to which the animals were in the habit of repairing in the morning and evening. Scenes like the one now supposed are found portrayed in the Egyptian paintings. Hounds were used for hunting in Egypt, and, if the passage in Josephus (*Antiq.* iv. 8, 9) may be considered decisive, in Palestine as well. From Gen. xxvii. 3, 'Now take thy weapons, thy quiver and thy bow,' we learn what arms were employed at least in capturing game. Bulls, after being taken, were kept at least for a time in a net (Is. li. 20). Various missiles, pitfalls, snares, and Gins were made use of in hunting (Ps. xci. 3; Amos iii. 5; 2 Sam. xxiii. 20). That hunting continued to be followed till towards the end of the Jewish state appears from Josephus, who speaks of Herod as 'ever a most excellent hunter, for in one day he caught forty wild beasts.' The same passage makes it clear that horses were employed in the pursuits of the chase.

HUSKS. The word which is thus rendered in the Authorized Version (Luke xv. 10) is really the name of a tree called in English Carob-tree. It is extremely common in the south of Europe, in Syria, and in Egypt. Celsius states that no tree is more frequently mentioned in the Talmud, where its fruit is stated to be given as food to cattle and swine: it is now given to horses, asses, and mules. During the Peninsular war the horses of the British cavalry were often fed on the beans of the Carob-tree. Both Pliny and Columella mention that it was given as food to

swine. By some it has been thought, but apparently without reason, that it was upon the husks of this tree that John the Baptist fed in the wilderness: from this idea, however, it is often called *St. John's Bread* and *Locust-tree*.

218. [*Ceratonia Siliqua*.]

The Carob-tree grows in the south of Europe and north of Africa, usually to a moderate size, but it sometimes becomes very large, with a trunk of great thickness, and affords an agreeable shade. The quantity of pods borne by each tree is very considerable, being often as much as 800 or 900 pounds weight: they are flat, brownish-coloured, from six to eight inches in length, of a sub-astringent taste when unripe, but when come to maturity they secrete, within the husks and round the seeds, a sweetish-tasted pulp. When on the tree, the pods have an unpleasant odour; but when dried upon hurdles they become eatable, and are valued by poor people, and during famine in the countries where the tree is grown, especially in Spain and Egypt, and by the Arabs. They are given as food to cattle in modern, as we read they were in ancient, times; but at the best can only be considered very poor fare.

HYÆNA (*Tzeboa*, (Eccles. xiii. 18). Excepting in Ecclesiasticus just noted, the word does not occur in the English Bible, although there are several passages in the Hebrew canonical books, where *Tzeboa*, 'streaked' or 'variegated,' is assumed to designate the hyæna. The most noted of these is Jer. xii. 9, where the words which the Septuagint render 'the cave of the hyæna,' are rendered in our version 'a speckled bird.' But Bochart and the continuator of Calmet vindicate what we take to be the true reading, 'the striped rusber,' i. e. the hyæna, turning round upon his lair, introduced after an allusion in the previous verse to the lion calling to the beasts of the field (other hyænas and jackals) to come and devour. This allusion, followed up as it is by a natural association of ideas, with a de-

scription of the pastor, feeder, or rather consumer or devourer of the vineyard, treading down and destroying the vines, renders the natural and poetical picture complete; for the hyæna seeks burrows and caverns for a lair; like the dog it turns round to lie down; howls, and occasionally acts, in concert; is loathsome, savage, insatiable in appetite, offensive in smell; and will in the season, like canines, devour grapes, as the writer has himself ascertained by actual experiment.

Tzeboa, therefore, we consider proved to be, generically, the hyæna. The striped species is one of three or four—all, it seems, originally African; and, by following armies and caravans, gradually spread over Southern Asia to beyond the Ganges, though not as yet to the east of the Bramapootra. It is now not uncommon in Asia Minor, and has extended into Southern Tartary; but this progress is comparatively so recent, that no other than Semitic names are well known to belong to it. The head and jaws of all the species are broad and strong; the muzzle truncated; the tongue like a rasp; the teeth 34 instead of 42, as in the *canida*, but robust, large, and eminently formed for biting, lacerating, and reducing the very bone; the neck stiff; the body short and compact; the limbs tall, with only four toes on each foot; the fur coarse, forming a kind of semi-erectile mane along the back; the tail rather short, with an imperfect brush, and with a fetid pouch beneath it. In stature the species varies from that of a large wolf to much less. Hyænas are not bold in comparison with wolves, or in proportion to their powers. They do not in general act collectively; they prowling chiefly in the night; attack asses, dogs, and weaker animals; feed most willingly on corrupt animal offal, dead camels, &c.; and dig into human

219.

graves that are not well protected with stakes and brambles. The striped species is of a dirty ashy buff, with some oblique black streaks across the shoulders and body, and numerous cross-bars on the legs; the muzzle and throat are black, and the tip of the tail white.

There is reason to believe that the *deeb*, or Scriptural wolf, when represented as carrying off a lamb, is no other than the hyæna, unless the real wolf has been extirpated; for zoologists have not found the wolf in Syria.

HYMENEUS, a professor of Christianity at Ephesus, who, with Alexander (1 Tim. i. 20) and Philetus (2 Tim. ii. 18), had departed from the truth both in principle and practice, and led others into apostasy. The chief doctrinal error

of these persons consisted in maintaining that 'the resurrection was past already.' The precise meaning of this expression is by no means clearly ascertained: the most general and perhaps best founded opinion is, that they understood the resurrection in a figurative sense of the great change produced by the Gospel dispensation. Most critics suppose that the same person is referred to in both the Epistles to Timothy by the name of Hymenæus. Dr. Mosheim, however, contends that there were two. But his reasoning on the subject is far from satisfactory.

HYMN. In the only places of the New Testament where this word occurs, it is connected with two others of very similar import. 'Speaking to yourselves in psalms, and hymns, and spiritual songs, singing and making melody in your heart to the Lord' (Eph. v. 19; Col. iii. 16). It has been conjectured that by 'psalms and hymns' the poetical compositions of the Old Testament are chiefly to be understood, and that the epithet 'spiritual,' here applied to 'songs,' is intended to mark those devout effusions which resulted from the spiritual gifts granted to the primitive church; yet in 1 Cor. xiv. 26 a production of the latter class is called 'a psalm.' Josephus, it may be remarked, uses the terms 'hymns' and 'songs,' in reference to the Psalms of David (*Antiq.* vii. 12. 3). Our information respecting the hymnology of the first Christians is extremely scanty; the most distinct notice we possess of it is that contained in Pliny's celebrated Epistle (*Ep.* x. 97): 'They sing a hymn to Christ as God.'

The hymn which our Lord sung with his disciples at the Last Supper is generally supposed to have been the latter part of the *Hallel*, or series of psalms which were sung by the Jews on the night of the Passover, comprehending Ps. cxiii.-cxviii.; Ps. cxiii. and cxiv. being sung before, and the rest after the Passover.

HYSSOP. A great variety of opinions have been entertained respecting the plant called *eschol*, translated 'hyssop' in the Authorized Version both of the Old and the New Testament; but it is difficult to fix with certainty on the plant intended. The first notice of it occurs in Exod. xii. 22, where a bunch of hyssop is directed to be dipped in blood and struck on the lintels and the two side-posts of the doors of the houses in which the Israelites resided. It is next mentioned in Lev. xiv. 4, 6, 52, in the ceremony for declaring lepers to be cleansed; and again, in Num. xix. 6, 18, in preparing the water of separation. To these passages the apostle alludes in Heb. ix. 19: 'For when Moses had spoken every precept to all the people, according to the law, he took the blood of calves, and of goats, with water, and scarlet wool, and hyssop, and sprinkled both the book and all the people.' From these texts we find that the plant must have been leafy, and large enough to serve for the purposes of sprinkling, and that it must have been found in Lower Egypt, as well as in the country towards Mount Sinai, and onwards to Palestine. From the following passages we get some information respecting the habits and the supposed properties of the plant. Thus, in 1 Kings iv. 33, it is said, 'Solomon spoke of trees, from the cedar-tree that is in Lebanon, even unto the hyssop that springeth out of the wall; and in the penitential psalm of David (li. 7), 'Purge me with hyssop, and I

shall be clean: wash me, and I shall be whiter than snow.' In this passage it is, no doubt, considered by some commentators that hyssop is used in a figurative sense; but still it is possible that the plant may have possessed some general cleansing properties, and thus come to be employed in preference to other plants in the ceremonies of purification. It ought, at all events, to be found growing upon walls, and in Palestine. In the account of the crucifixion of our Saviour, the Apostle John says (John xix. 29), 'Now there was set a vessel full of vinegar, and they filled a sponge with vinegar, and put it upon hyssop, and put it to his mouth.' In the parallel passages of Matthew (xxvii. 48) and Mark (xv. 36), it is stated that the sponge filled with vinegar was put upon a reed or stick. To reconcile these statements, some commentators have supposed that both the sponge and the hyssop were tied to a stick, and that one apostle mentions only the hyssop, because he considered it as the most important; while, for the same reason, the other two mention only the stick; but the simplest mode of explaining the apparent discrepancy is to consider the hyssop and the stick to be the same thing—in other words, that the sponge was affixed to a stick of hyssop.

A great variety of plants have been adduced by different authors as that alluded to in the above passages. Some contend for several plants belonging to the class of ferns, such as maiden-hair, wall-rue, pearl-weed, and hair-moss: others for a species of wormwood, that it might be more distasteful to our Saviour. The majority, however, have selected different kinds of fragrant plants belonging to the natural family of *Labiata*, several of which are found in dry and barren situations in Palestine, and also in some parts of the Desert. Of these may be mentioned the rosemary, species of lavender, of mint, of marjoram, of thyme, of savory, of thymbra, and others of the same tribe, resembling each other much in characters as well as in properties: but it does not appear that any of them grow on walls, or are possessed of cleansing properties; and, with the exception of the rosemary, they are not capable of yielding a stick, nor are they found in all the required situations. Dr. Royle, who has recently investigated the subject, is of opinion that as the *caper plant* has an Arabic name, *asaf*, similar to the Hebrew *eschol* or *eschf*; as it is found in Lower Egypt, in the deserts of Sinai, and in New Jerusalem; as it grows upon rocks and walls, was always supposed to be possessed of cleansing qualities, is large enough to yield a stick; and as its different parts used to be preserved in vinegar, as its buds now are, he is warranted, from the union of all these properties in this plant, corresponding so closely to those of the original *eschf*, in considering it as proved that the *caper plant* is the *hyssop* of Scripture.

I.

IBZAN (*illustrious*), the tenth 'judge of Israel.' He was of Bethlehem, probably the Bethlehem of Zebulun and not of Judah. He governed seven years. The prosperity of Ibban is marked by the great number of his children (thirty sons

and thirty daughters), and his wealth by their marriages—for they were all married.

ICH'ABOD (*where is the glory*), son of Phinehas and grandson of Eli. He is only known from the unhappy circumstances of his birth, which occasioned this name to be given to him. The pains of labour came upon his mother when she heard that the ark of God was taken, that her husband was slain in battle, and that these tidings had proved fatal to his father Eli. They were death-pains to her; and when those around sought to cheer her, saying, 'Fear not, for thou hast borne a son,' she only answered by giving him the name of Ichabod, saying, 'The glory is departed from Israel' (1 Sam. iv. 19-22); n.c. 1141. The name again occurs in 1 Sam. xiv. 3 [E.L.].

ICONIUM, a town, formerly the capital of Lycania, as it is now, by the name of Koniach, of Karamania, in Asia Minor. It is situated in N. lat. 37° 51', E. long. 32° 40', about one hundred and twenty miles inland from the Mediterranean. It was visited by St. Paul in A.D. 45, when many Gentiles were converted; but some unbelieving Jews excited against him and Barnabas a persecution, which they escaped with difficulty (Acts xiii. 51; xiv. 1, &c.). He undertook a second journey to Iconium in A.D. 51. The church planted at this place by the apostle continued to flourish, until, by the persecutions of the Saracens, and afterwards of the Seljukians, who made it one of their sultanies, it was nearly extinguished. But some Christians of the Greek and Armenian churches, with a Greek metropolitan bishop, are still found in the suburbs of the city, not being permitted to reside within the walls.

Koniach is situated at the foot of Mount Taurus, upon the border of the lake Trogolis, in a fertile plain, rich in valuable productions, particularly apricots, wine, cotton, flax, and grain. The circumference of the town is between two and three miles, beyond which are suburbs not much less populous than the town itself. The town, suburbs, and gardens are plentifully supplied with water from streams which flow from some hills to the westward, and which, in the north-east, join the lake, which varies in size with the season of the year. In the town carpets are manufactured, and blue and yellow leathers are tanned and dried. Cotton, wool, hides, and a few of the other raw productions which enrich the superior industry and skill of the manufacturers of Europe, are sent to Smyrna by caravans.

The city, like all those renowned for superior sanctity, abounds with dervishes, who meet the passenger at every turning of the streets, and demand paras with the greatest clamour and insolence. The bazaars and houses have little to recommend them to notice.

1. IDDO (*seasonable*), a prophet of Judah, who wrote the history of Rehoboam and Abijah; or rather perhaps who, in conjunction with Seraiah, kept the public rolls during their reigns. It seems by 2 Chron. xiii. 22, that he named his book *Midrash*, or 'Exposition.' Josephus states that this Iddo was the prophet who was sent to Jeroboam at Bethel, and consequently the same who was slain by a lion for disobedience to his instructions (1 Kings xiii.); and many commentators have followed this statement.

2. IDDO, grandfather of the prophet Zeehariah Zech. i. 1; Ezra. v. 1; vi. 14).

3. IDDO, chief of the Jews of the Captivity established at Casiphia, a place of which it is difficult to determine the position. It was to him that Ezra sent a requisition for Levites and Nethinim, none of whom had yet joined his caravan. Thirty-eight Levites and two hundred and fifty Nethinim responded to his call (Ezra vii. 17-20), n.c. 457. It would seem from this that Iddo was a chief person of the Nethinim, descended from those Gibeonites who were charged with the servile labours of the tabernacle and temple. This is one of several circumstances which indicate that the Jews in their several colonies under the Exile were still ruled by the heads of their nation, and allowed the free exercise of their worship.

4. IDDO (*lovely*), a chief of the half tribe of Manasseh beyond the Jordan (1 Chron. xxvii. 21).

IDLE. The ordinary uses of this word require no illustration. But the very serious passage in Matt. xii. 36 may suitably be noticed in this place. In the Authorized Version it is translated, 'I say unto you, that every idle word that men shall speak, they shall give an account thereof in the day of judgment.' The whole question depends upon the meaning, or rather the force, of the term rendered 'idle word,' concerning which there has been no little difference of opinion. Many understand it to mean 'wicked and injurious words'; but this interpretation has been examined with much nicety by Dr. Tittmann, and shown to be untenable. He contends that we must necessarily understand by the phrase a certain kind of words or discourse, which, under the appearance of sincerity or candour, is often the worst possible, and 'condemns a man,' because it is uttered with an evil purpose. The meaning of the expression, then, seems to be *void of effect, without result, followed by no corresponding event*. Therefore 'idle words' are empty or vain words or discourse, i. e. void of truth, and to which the event does not correspond. In short, it is the empty, inconsiderate, insincere language of one who says one thing and means another. This Tittmann confirms by a number of citations; and then deduces from the whole that the sense of the passage under review is: 'Believe me, he who uses false and insincere language shall suffer grievous punishment: your words, if uttered with sincerity and ingenuousness, shall be approved; but if they are dissembled, although they bear the strongest appearance of sincerity, they shall be condemned.'

IDOLATRY. In giving a summary view of the forms of idolatry which are mentioned in the Bible, it is expedient to exclude all notice of those illegal images which were indeed designed to bear some symbolical reference to the worship of the true God, but which partook of the nature of idolatry; such, for example, as the golden calf of Aaron (cf. Neh. ix. 18); those of Jeroboam; the singular ephebs of Gideon and Micah (Judg. viii. 27; xvii. 5); and the Teraphim.

Idolatry was the most heinous offence against the Mosaic law, which is most particular in defining the acts that constitute the crime, and severe in apportioning the punishment. Thus, it is forbidden to make any image of a strange god; to prostrate oneself before such an image, or before those natural objects which were also wor-

shipped without images, as the sun and moon (Deut. iv. 19); to suffer the altars, images, or groves of idols to stand (Exod. xxxiv. 13); or to keep the gold and silver of which their images were made, and to suffer it to enter the house (Deut. vii. 25, 26); to sacrifice to idols, most especially to offer human sacrifices; to eat of the victims offered to idols by others; to prophesy in the name of a strange god; and to adopt any of the rites used in idolatrous worship, and to transfer them to the worship of the Lord (Deut. xii. 30, 31). As for punishment, the law orders that if an individual committed idolatry he should be stoned to death (Deut. xvii. 2-5); that if a town was guilty of this sin, its inhabitants and cattle should be slain, and its spoils burnt together with the town itself (Deut. xiii. 12-18). To what degree also the whole spirit of the Old Testament is abhorrent from idolatry, is evident (besides legal prohibitions, prophetic denunciations, and energetic appeals like that in Isa. xlv. 9-20) from the literal sense of the terms which are used as synonyms for idols and their worship. Thus idols are called the *image* (Lev. xix. 4); *vanities* (Acts xiv. 15; Jer. ii. 5); *nothing* (Isa. lxvi. 3); *abominations* (1 Kings xi. 5); and their worship is called *whoredom*.

The early existence of idolatry is evinced by Josh. xxiv. 2, where it is stated that Abram and his immediate ancestors dwelling in Mesopotamia 'served other gods.' The terms in Gen. xxxi. 53, and particularly the plural form of the verb, seem to show that some members of Terah's family had each different gods. From Josh. xxiv. 14, and Ezek. xx. 8, we learn that the Israelites, during their sojourn in Egypt, were seduced to worship the idols of that country; although we possess no particular account of their transgression. In Amos v. 25, and Acts vii. 42, it is stated that they committed idolatry in their journey through the wilderness; and in Num. xxv. 1, eq., that they worshipped the Moabite idol Baal-peor at Shittim. After the Israelites had obtained possession of the promised land, we find that they were continually tempted to adopt the idolatries of the Canaanite nations with which they came in contact. The book of Judges enumerates several successive relapses into this sin. The gods which they served during this period were Baal and Ashtoreth, and their modifications; and Syria, Sidon, Moab, Ammon, and Philistia, are named in Judg. x. 6, as the sources from which they derived their idolatries. Then Samuel appears to have exercised a beneficial influence in weaning the people from this folly (1 Sam. vii.); and the worship of the Lord acquired a gradually increasing hold on the nation until the time of Solomon, who was induced in his old age to permit the establishment of idolatry at Jerusalem. On the division of the nation, the kingdom of Israel (besides adhering to the sin of Jeroboam to the last) was specially devoted to the worship of Baal, which Ahab had renewed and carried to an unprecedented height; and although the energetic measures adopted by Jehu, and afterwards by the priest Jehoiada, to suppress this idolatry, may have been the cause why there is no later express mention of Baal, yet it is evident from 2 Kings xiii. 6, and xvii. 10, that the worship of Aserah continued until the deportation of the ten tribes. This event

also introduced the peculiar idolatries of the Assyrian colonists into Samaria. In the kingdom of Judah, on the other hand, idolatry continued during the two succeeding reigns; was suppressed for a time by Asa (1 Kings xv. 12); was revived in consequence of Joram marrying into the family of Ahab; was continued by Ahaz; received a check from Hezekiah; broke out again more violently under Manasseh; until Josiah made the most vigorous attempt to suppress it. But even Josiah's efforts to restore the worship of the Lord were ineffectual; for the later prophets, Zephaniah, Jeremiah, and Ezekiel, still continue to utter reproofs against idolatry. Nor did the capture of Jerusalem under Jehoiahim awaken this peculiarly sensual people; for Ezekiel (viii.) shows that those who were left in Jerusalem under the government of Zedekiah had given themselves up to many kinds of idolatry; and Jeremiah (xlv. 8) charges those inhabitants of Judah who had found an asylum in Egypt, with having turned to serve the gods of that country. On the restoration of the Jews after the Babylonian captivity, they appear, for the first time in their history, to have been permanently impressed with a sense of the degree to which their former idolatries had been an insult to God, and a degradation of their own understanding—an advance in the culture of the nation which may in part be ascribed to the influence of the Persian abhorrence of images, as well as to the effects of the exile as a chastisement. In this state they continued until Antiochus Epiphanes made the last and fruitless attempt to establish the Greek idolatry in Palestine (1 Macc. i.).

The particular forms of idolatry into which the Israelites fell are described under the names of the different gods which they worshipped [ASHTORETH, BAAL, &c.]; the general features of their idolatry require a brief notice here. According to Movers, the religion of all the idolatrous Syro-Arabian nations was a deification of the powers and laws of nature, an adoration of those objects in which these powers are considered to abide, and by which they act. The deity is thus the invisible power in nature itself, that power which manifests itself as the generator, sustainer, and destroyer of its works. This view admits of two modifications: either the separate powers of nature are regarded as so many different gods, and the objects by which these powers are manifested—as the sun, moon, &c.—are regarded as their images and supporters; or the power of nature is considered to be one and indivisible, and only to differ as to the forms under which it manifests itself. Both views co-exist in almost all religions. The most simple and ancient notion, however, is that which conceives the deity to be in a human form, as male and female, and which considers the male sex to be the type of its active, generative, and destructive power; while that passive power of nature whose function is to conceive and bring forth, is embodied under the female form. The human form and the diversity of sex lead naturally to the different ages of life—to the old man and the youth, the matron and the virgin—according to the modifications of the conception; and the myths which represent the influences, the charges, the laws, and the relations of these natural powers under the sacred histories of such gods, constitute

a harmonious development of such a religious system.

Those who saw the deity manifested by, or conceived him as resident in, any natural objects, could not fail to regard the sun and moon as the potent rulers of day and night, and the sources of those influences on which all animated nature depends. Hence star-worship forms a prominent feature in all the false religions mentioned in the Bible. Of this character chiefly were the Egyptian, the Canaanite, the Chaldean, and the Persian religions. The Persian form of astrology, however, deserves to be distinguished from the others; for it allowed no images nor temples of the god, but worshipped him in his purest symbol, fire. It is understood that this form is alluded to in most of those passages which mention the worship of the sun, moon, and heavenly host, by incense, on heights (2 Kings xxiii. 5, 12; Jer. xix. 13). The other form of astrology, in which the idea of the sun, moon, and planets is blended with the worship of the god in the form of an idol, and with the addition of a mythology (as may be seen in the relations of Baal and his cognates to the sun), easily degenerates into lasciviousness and cruel rites.

The images of the gods were, as to material, of stone, wood, silver, and gold. Those of metal had a trunk or stock of wood, and were covered with plates of silver or gold (Jer. x. 4); or were cast. The general rites of idolatrous worship consist in burning incense; in offering bloodless sacrifices, as the dough-cakes and libations in Jer. vii. 18, and the raisin-cakes in Hos. iii. 1; in sacrificing victims (1 Kings xviii. 26), and especially in human sacrifices (MOLOCH). These offerings were made on high places, hills, and roofs of houses, or in shady groves and valleys. Some forms of idolatrous worship had libidinous orgies (ΑΝΤΟΡΕΙΑ). Divinations, oracles (2 Kings i. 2), and riddancy (Hos. iv. 12) form a part of many of these false religions. The priesthood was generally a numerous body; and where persons of both sexes were attached to the service of any god, that service was infamously immoral. It is remarkable that the Pentateuch makes no mention of any temple of idols; afterwards we read often of such.

IDUMÆA is the Greek form of the Hebrew name ΕΔΩΜ. It was derived from Isaac's son Edom, otherwise called Esau, the elder twin-brother of Jacob (Esau). It signifies red, and seems first to have been suggested by his appearance at his birth, when 'he came out all red' (i.e. covered with red hair, Gen. xxv. 25), and was afterwards more formally and permanently imposed on him on account of his unworthy disposal of his birthright for a mess of red lentils (Gen. xxv. 30). The region which came to bear his name is the mountainous tract on the east side of the great valleys el-Ghor and el-Arabah, extending between the Dead Sea and the Eilatitic Gulf of the Red Sea. Into this district Esau removed during his father's lifetime, and his posterity gradually obtained possession of it as the country which God had assigned for their inheritance in the prophetic blessing pronounced by his father Isaac (Gen. xxvii. 39, 40; xxxiii. 3; Deut. ii. 5-12, 22). Previously to their occupation of the country, it was called *Mount Seir*, a designation indeed which it never entirely lost. The word

seir means hairy (being thus synonymous with Esau), and, when applied to a country, may signify rugged, mountainous, and so says Josephus (*Antiq.* i. 20. 3): 'Esau named the country "Roughness" from his own hairy roughness.' But in Gen. xxxvi. 20, we read of an individual of the name of Seir, who had before this inhabited the land, and from whom it may have received its first appellation.

The first mention made of Mount Seir in Scripture is in Gen. xiv. 6, where Chedorlaomer and his confederates are said to have smitten 'the Horim in their Mount Seir.' Among the earliest human habitations were caves, either formed by nature or easily excavated, and for the construction of these the mountains of Edom afforded peculiar facilities. Hence the designation given to the Aboriginal inhabitants—*Horim*, i.e. cave-dwellers, an epithet of similar import with the Greek *Troglodytes*. Even in the days of Jerome 'the whole of the southern part of Idumæa, from Eleutheropolis to Petra and Aila, was full of caverns used as dwellings on account of the sun's excessive heat; and there is reason to believe that the possessors of the country in every age occupied similar habitations, many traces of which are yet seen in and near Petra, the renowned metropolis.

We are informed in Deut. ii. 12, that 'the children of Esau succeeded [margin, inherited] the Horim when they had destroyed them from before them, and dwelt in their stead, as Israel did unto the land of his possession, which Jehovah gave unto them.' From this it may be inferred, that the extirpation of the Horim by the Esanites was, like that of the Canaanites by Israel, very gradual and slow. From Genesis xxxvi. (compare 1 Chron. i.) we learn this much of the political constitution of the Seirite Aborigines, that, like the Esanites and Israelites, they were divided into tribes, and these tribes were subdivided into families—the very polity which still obtains among the Arabs by whom Idumæa is now peopled. Each tribe had its own *alluf*—a term which is unhappily rendered in the English Version by 'Duke'—for though that has, no doubt, the radical meaning of the Latin *dux*, a 'leader,' it now only suggests the idea of a feudal title of nobility. Of these chiefs of the Horites seven are enumerated, viz., Lotan, Shobal, Zibeon, Anah, Dishon, Ezer, and Dishan. The only one of these who is spoken of as related to the other is Anah, the son of Zibeon. The primitive and pastoral character of the people is incidentally brought out by the circumstance that this Anah, though a chieftain's son, was in the habit of tending his father's asses. It was when thus employed that he found in the wilderness *eth-ha-yemim*, rendered in the English Version by 'the mules,' but meaning more probably 'the hot springs,' and thus interpreted, the passage seems to be an intimation that he was the first to discover the faculty with which asses and other animals are endowed, of snuffing the moisture of the air, and thus sometimes leading to the opportune discovery of hidden waters in the desert. There is in the country to the south-east of the Dead Sea (which formed part of the Seirite possessions), a place, *Kallirhoe*, celebrated among the Greeks and Romans for its warm baths, and which has been visited by modern travellers.

Esau first married into two Canaanitish families of the Hittite and Hivite tribes (Gen. xxvi. 34; xxxvi. 2; in one or other of which places, however, the text seems corrupt); but anxious to propitiate his offended parents, he next formed a matrimonial alliance with one of the race of Abraham, viz., Mahalath, otherwise called Bashemath, daughter of Ishmael, and sister of Nebaioth, whose descendants, the Nabatheans, by a singular coincidence, obtained in after-times possession of the land of Edom (Gen. xxviii. 9). Esau's first-born (by Adah or Bashemath, of the daughters of Heth) was Eliphaz, whose son *Teman* gave name to a district of the country (Gen. xxxvi. 11, 34; 1 Chron. i. 45; Ezek. xxv. 13; Obad. verse 9). The Temanites were renowned for their wisdom (Jer. xlix. 7, 20; Baruch iii. 22, 23). The chief speaker in the book of Job is another Eliphaz, a Temanite,—which is one of the circumstances that have led many to place the scene of that story in the land of Edom (Job). The name of Teman was preserved to the days of Eusebius in that of Thaiman, a small town five Roman miles from Petra. Another son of the first-mentioned Eliphaz was *Amalek*, who is not to be confounded, however, with the father of the Amalekites, one of the doomed nations of Canaan, of whom we hear so early as the age of Abraham (Gen. xiv. 7).

As a modern Arab *sheikh* is often found to exercise influence far beyond the sphere of his hereditary domain, so in the list of the Edomite *emirs* preserved by Moses we have perhaps only the names of the more distinguished individuals who acquired more or less authority over all the tribes. This oligarchy appears gradually to have changed into a monarchy, as happened too among the Israelites; for in addition to the above mentioned lists, both of Horite and Esauite leaders, we have, at Gen. xxxvi. 31, a catalogue of eight kings (Bela, Jobab, Husham, Hadad, Samlah, Saul, Basai-hanan, Hadar or Hadad) who 'reigned in the land of Edom before there reigned any king over the children of Israel.' It is not necessary to suppose that this was said by Moses prophetically: it is one of those passages which may have been inserted by Ezra when finally arranging the canon, inasmuch as it occurs also in the first book of Chronicles, of which he is the reputed compiler. The period when this change to regal government took place in Idumæa can only be matter of conjecture. In the Song of Moses (Exod. xv. 15) it is said that at the tidings of Israel's triumphant passage of the Red Sea the rulers or princes (*Alluf*) of Edom trembled with affright, but when, some forty years afterwards, application had to be made by the Israelites for leave to traverse the land of Edom, it was to the king (*Melek*) that the request was addressed (Num. xx. 14). The road by which it was sought to penetrate the country was termed 'the king's highway' (ver. 17), supposed by Robinson to be the Wady el-Ghuweir, for it is almost the only valley that affords a direct and easy passage through those mountains. From a comparison of these incidents it may be inferred that the change in the form of government took place during the wanderings of the Israelites in the desert, unless we suppose, with Rosenmüller, that it was only this north-eastern part of Edom which was now subject to a monarch, the rest of the country re-

maining under the sway of its former chieftains. But whether the regal power at this period embraced the whole territory or not, perhaps it did not supplant the ancient constitution, but was rather grafted on it, like the authority of the Judges in Israel, and of Saul, the first king, which did not materially interfere with the government that previously existed. It further appears, from the list of Idumæan kings, that the monarchy was not hereditary, but elective (for no one is spoken of as the son or relative of his predecessor); or probably that chieftain was acknowledged as sovereign who was best able to vindicate his claim by force of arms. Every successive king appears to have selected his own seat of government: the places mentioned as having enjoyed that distinction are Dinhabah, Avith, Pagu or Pai. Even foreigners were not excluded from the throne, for the successor of Samlah of Masrekah was Saul, or Shaul, 'of Rechoboth, on the river.' The word 'Rechoboth' means, literally, *streets*, and was a not uncommon name given to towns; but the emphatic addition of 'the river,' points evidently to the Euphrates, and between Rakkah and Anak, on that river, there are still the remains of a place called by the Arabs Rachabath-Malik-Ibn Tawk. In the age of Solomon we read of one Hadad, who 'was of the king's seed in Edom' (1 Kings xi. 14); from which some have conjectured that by that period there was a royal dynasty of one particular family; but all that the expression may imply is, that he was a blood-relation of the last king of the country. Hadad was the name of one of the early sovereigns 'who smote Midian in the field of Moab' (Gen. xxxvi. 35).

The unbrotherly feud which arose between Esau and Jacob was prolonged for ages between their posterity. The Israelites, indeed, were commanded 'not to abhor an Edomite, for he was their brother' (Deut. xxiii. 7); but a variety of circumstances occurred to provoke and perpetuate the hostility. The first time they were brought into direct collision was when the Edomites, though entreated by their 'brother Israel,' refused the latter a passage through their territories; and they had consequently to make a retrograde and toilsome march to the Gulf of Elath, whence they had to 'compass the land of Edom' by the mountain desert on the east. We do not again hear of the Edomites till the days of Saul, who warred against them with partial success (1 Sam. xiv. 47); but their entire subjugation was reserved for David, who first signally vanquished them in the Valley of Salt (supposed to be in the Ghor, beside *Udum*, the Mountain of Salt); and finally placed garrisons in all their country (2 Sam. viii. 14; 1 Chron. xviii. 11-13; 1 Kings xi. 15. Comp. the inscription of Ps. lx. and v. 8, 9; cviii. 9, 10, where 'the strong city' may denote Selah or Petra). Then were fulfilled the prophecies in Gen. xxv. 23 and xxvii. 40, that the 'elder should serve the younger'; and also the prediction of Balaam (Num. xxiv. 18), that Edom and Seir should be for possessions to Israel. Solomon created a naval station at Ezion-geber, at the head of the Gulf of Elath, the modern Akaba (1 Kings ix. 26; 2 Chron. viii. 18). Towards the close of his reign an attempt was made to restore the independence of the country by one Hadad, an Idumæan prince, who, when a child,

had been carried into Egypt at the time of David's invasion, and had there married the sister of Tahpanes the queen (1 Kings xi. 14-23) [HADAD]. If Edom then succeeded in shaking off the yoke, it was only for a season, since in the days of Jehoshaphat, the fourth Jewish monarch from Solomon, it is said, 'there was no king in Edom; a deputy was king': i.e. he acted as viceroy for the king of Judah. For that the latter was still master of the country is evident from the fact of his having fitted out, like Solomon, a fleet at Ezion-geber (1 Kings xxii. 47, 48; 2 Chron. xx. 36, 37). It was, no doubt, his deputy (called *king*) who joined the confederates of Judah and Israel in their attack upon Moab (2 Kings iii. 9, 12, 26). Yet there seems to have been a partial revolt of the Edomites, or at least of the mountaineers of Seir, even in the reign of Jehoshaphat (2 Chron. xx. 22); and under his successor, Jehoram, they wholly rebelled, and 'made a king over themselves' (2 Kings viii. 20, 22; 2 Chron. xxi. 8, 10). From its being added that, notwithstanding the temporary suppression of the rebellion, 'Edom revolted from under the hand of Judah unto this day,' it is probable that the Jewish dominion was never completely restored. Amaziah, indeed, invaded the country, and having taken the chief city, Selah or Petra, he, in memorial of the conquest, changed its name to Joktheel (*q. d.* subdued of God); and his successor, Uzziah, retained possession of Elath (2 Kings xiv. 7; 2 Chron. xxv. 11-14; xxvi. 3). But in the reign of Ahaz, hordes of Edomites made incursions into Judah and carried away captives (2 Chron. xxvii. 17). About the same period Rezin, king of Syria, expelled the Jews from Elath, which (according to the correct reading of 2 Kings xvi. 6) was thenceforth occupied by the Edomites. Now was fulfilled the other part of Isaac's prediction, viz. that, in course of time, Esau 'should take his brother's yoke from off his neck' (Gen. xxvii. 40). It appears from various incidental expressions in the later prophets, that the Edomites employed their recovered power in the enlargement of their territory in all directions. They spread as far south as Dedan in Arabia, and northward to Bozrah in the Hauran; though it is doubtful if the Bozrah of Scripture may not have been a place in Idumæa Proper (Isa. xxxiv. 6; lxiii. 1; Jer. xlix. 7, 8-20; Ezek. xxv. 13; Amos i. 12). When the Chaldeans invaded Judah, under Nebuchadnezzar, the Edomites became their willing auxiliaries, and triumphed with fiendish malignity over the ruin of their kinsmen the Jews, of whose desolated land they hoped to obtain a large portion to themselves (Obad. verses 10-16; Ezek. xxv. 12-14; xxxv. 3-10; xxxvi. 5; Lament. iv. 21). By this circumstance the hereditary hatred of the Jews was rekindled in greater fury than ever, and hence the many dire denunciations of the 'daughter of Edom,' to be met with in the Hebrew prophets (Ps. cxxxvii. 7-9; Obad. *passim*; Jer. xlix. 7; Ezek. xxv. and xxxv.). From the language of Malachi (i. 2, 3), and also from the accounts preserved by Josephus (*Antiq.* x. 9. 7), it would seem that the Edomites did not wholly escape the Chaldean scourge; but instead of being carried captive, like the Jews, they not only retained possession of their own territory, but became masters of the south of Judah, as far as Hebron '1 Macc. v. 65, comp. with Ezek.

xxxv. 10; xxxvi. 5). Here, however, they were, in course of time, successfully attacked by the Maccabees, and about B.C. 125, were finally subdued by John Hyrcanus, who compelled them to submit to circumcision and other Jewish rites, with a view to incorporate them with the nation (1 Macc. v. 3, 65; 2 Macc. x. 16; xii. 32; Joseph. *Antiq.* xiii. 9. 1; 15. 4). The amalgamation, however, of the two races seems never to have been effected, for we afterwards hear of Antipater, an Idumæan by birth, being made by Cæsar procurator of all Judea; and his son, commonly called Herod the Great, was, at the time of Christ's birth, king of Judæa, including Idumæa; and hence Roman writers often speak of all Palestine under that name. Not long before the siege of Jerusalem by Titus, 20,000 Idumæans were called in to the defence of the city by the Zealots; but both parties gave themselves up to rapine and murder. This is the last mention made of the Edomites in history. The author of a work on Job, once ascribed to Origen, says that their name and language had perished, and that, like the Ammonites and Moabites, they had all become Arabs. In the second century Ptolemy limits the name Idumæa to the country west of the Jordan.

But while, during the captivity of the Jews in Babylon, the Edomites had thus been extending their territory to the north-west, they were themselves supplanted in the southern part of their native region by the Nabathæans, the descendants of Ishmael's eldest son; and to the article NABATHOON we must refer the reader for the subsequent history of the land of Edom.

From the era of the Crusades down to the present century the land of Esau was, to Europeans, a *terra incognita*. Its situation was laid down on the best maps more than a hundred miles from the true position, and as if lying in a direction where it is now known there is nothing but a vast expanse of desert. Volney had his attention drawn towards it, when at Gaza, by the vague reports of the Arabs; and in 1807 the unfortunate Seetzen penetrated a certain way into the country and heard of the wonders of the Wady Mûsa; but the first modern traveller who 'passed through the land of Edom' was Burckhardt, in the year 1812. And it has been well remarked by Dr. Robinson that 'had he accomplished nothing but his researches in these regions, his journey would have been worth all the labour and cost expended on it, although his discoveries thus shed their strongest light upon subjects which were not comprehended in the plan or purpose either of himself or his employers.' Burckhardt entered Idumæa from the north, and in the year 1818 he was followed in the same direction by Messrs. Legh, Banks, Irby and Mangles. In 1828 Laborde and Linant found access from the south; and since then it has been visited and described by so many that the names of its localities have become familiar as household words.

The limit of the wanderings of the Israelites in the desert was the brook Zered, after crossing which they found themselves in the territory of Moab (Deut. ii. 13-18). This brook is supposed to be identical with the *Wady el-Ahy*, which, rising near the Castle el-Ahly, on the route to Mecca of the Syrian caravan upon the high

eastern desert, penetrates through the whole chain of mountains to near the south-east corner of the Dead Sea. It was thus the southern border of Moab and the northern of Edom whence the latter region extended southwards as far as to Elath on the Red Sea. The valley which runs between the two seas consists first of El-Ghor, which is comparatively low, but gradually rises into the more elevated plain of El-Arabah to the south. The country lying east of this great valley is the land of Idumæa. It is a mountain tract, consisting at the base of low hills of limestone or argillaceous rock, then lofty mountains of porphyry forming the body of the mountain; above these, sandstone broken up into irregular ridges and grotesque groups of cliffs; and again farther back, and higher than all, long elevated ridges of limestone without precipices. East of all these stretches off indefinitely the high plateau of the great eastern desert. The whole breadth of the mountainous tract between the Arabah and the eastern desert does not exceed fifteen or twenty geographical miles. Of these mountains the most remarkable is *Mount Hor*, near the Wady Mûsa (Horeb, Mount). While the mountains on the west of the Arabah, though less elevated, are wholly barren, those of Idumæa seem to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees. The wadis, too, are full of trees and shrubs and flowers, while the eastern and higher parts are extensively cultivated, and yield good crops. This mountainous region is at present divided into two districts. The northern bears the name of *Jebâl*, i. e. 'The Mountain,' the Gebel of the Hebrews (Ps. lxxxiii. 8), and the Gebelene of the Greeks and Romans. The southern district is *esh-Sherah*, extending as far as Akabah, and including Shôbak, Wady Mûsa, Maan, &c. Burckhardt mentions a third district, *Jebâl Heama*; but Robinson says that though there is a sandy tract, el-Hismah, with mountains around it, on the east of Akabah, it does not constitute a separate division.

The whole of this region is at present occupied by various tribes of Bedouin Arabs. The chief tribe in the *Jebâl* is the Hejaya, with a branch of the Kaabineh, while in *esh-Sherah* they are all of the numerous and powerful tribe of the Hawcitat, with a few independent allies. The Bedouins in Idumæa have of late years been partially subject to the Pasha of Egypt, paying an annual tribute, which, in the case of the Beni Sukhr, is one camel for two tents. The fellahin, or peasants, are half Bedouin, inhabiting the few villages, but dwelling also in tents; they, too, pay tribute to the Egyptian government, and furnish supplies of grain.

Among the localities connected with Edom which are mentioned in Scripture may be noticed Dûlabah, Bozrah, Theman, Maon (now Maan), Kadesh-barnea (which Robinson identifies with el-Weibeh in the Wady el-Jeib), Zephath (which he supposes to be the pass of Es-Sufah), Elath, and Ezion-geber, &c.; but the most celebrated place in all the region was the chief city, Selah or Petra, for a description of which the reader is referred to the latter head [PETRA].

Could the scene of the book of Job be with certainty fixed in Idumæa, we should then possess much curious and valuable information respecting both the country and people soon after it had

been colonized by the descendants of Esau (See Mason Good, Wemyss, and others upon Job). But all that we learn directly of the ancient Edomites from the historical books of Scripture represents them as not, indeed, neglecting agriculture or trade (Num. xx. 17), yet, on the whole, a warlike and predatory race, who, according to the prediction of their progenitor Isaac, 'lived by their sword.' The situation of the country afforded peculiar facilities for commerce, which seems to have been prosecuted from a very early period. 'Bordering,' says Volney, 'upon Arabia on the east and south, and Egypt on the south-west, and forming, from north to south, the most commodious channel of communication between Jerusalem and her dependencies on the Red Sea, through the continuous valleys of el-Ghor and el-Arabah, Idumæa may be said to have long formed the emporium of the commerce of the East.' The era of its greatest prosperity was after the Nabatheans had become masters of the country and founded the kingdom of Arabia Petraea, of which the renowned metropolis was Petra. The religion of the early Edomites was, perhaps, comparatively pure; but in process of time they embraced idolatry: in 2 Chron. xxv. 20, we read of the 'gods of Edom,' one of whom, according to Josephus (*Antiq.* xv. 7. 9), was called *Kotze*. With respect to the striking fulfilment of the prophetic denunciations upon Edom, we need only refer the reader to the well-known work of Keith, who frequently errs, however, in straining the sense of prophecy beyond its legitimate import, as well as in seeking out too literally minute an accomplishment.

ILLYRICUM, a country lying to the north-west of Macedonia, and answering nearly to that which is at present called Dalmatia; by which name indeed the southern part of Illyricum itself was known, and whither St. Paul informs Timothy that Titus had gone (2 Tim. iv. 10). Paul himself preached the Gospel in Illyricum, which was at that time a province of the Roman Empire (Rom. xv. 19).

IMMANUEL, or EMMANUEL. This word, meaning 'God with us,' occurs in the celebrated verse of Isaiah (vii. 14), 'Behold, a virgin shall conceive and bear a son, and shall call his name IMMANUEL.' In the name itself there is no difficulty; but the verse, as a whole, has been variously interpreted. From the manner in which the word God, and even Jehovah, is used in the composition of Hebrew names, there is no such peculiarity in that of Immanuel as in itself requires us to understand that he who bore it should be in fact God. Indeed, it is used as a proper name among the Jews at this day. This high sense has, however, been assigned to it in consequence of the application of the whole verse by the Evangelist Matthew (i. 23) to our Divine Saviour. Even if this reference did not exist, the history of the Nativity would irresistibly lead us to the conclusion that the verse—whatever may have been its intermediate signification—had an ultimate reference to Christ.

The state of opinion on this point has been thus neatly summed up by Dr. Henderson, in his note on the text:—'This verse has long been a subject of dispute between Jews and professedly Christian writers, and among the latter mutually. While the former reject its application to the

Messiah altogether,—the earlier rabbins explaining it of the queen of Ahaz and the birth of his son Hezekiah; and the later, as Kimchi and Abarbanel, of the prophet's own wife,—the great body of Christian interpreters have held it to be directly and exclusively in prophecy of our Saviour, and have considered themselves fully borne out by the inspired testimony of the Evangelist Matthew. Others, however, have departed from this construction of the passage, and have invented or adopted various hypotheses in support of such dissent. Grotius and others suppose either the then present or a future wife of Isaiah to be the 'virgin' referred to. A second class are of opinion that the prophet had nothing more in view than an ideal virgin, and that both she and her son are merely imaginary personages, introduced for the purpose of prophetic illustration. A third think that the prophet pointed to a young woman in the presence of the king and his courtiers. A fourth class admit the hypothesis of a double sense: one in which the words apply primarily to some female living in the time of the prophet, and her giving birth to a son according to the ordinary laws of nature; or, as Dathe holds, to some virgin, who at that time should miraculously conceive; and the other, in which they received a secondary and plenary fulfilment in the miraculous conception and birth of Jesus Christ.

INCENSE, a perfume which gives forth its fragrance by burning, and, in particular, that perfume which was burnt upon the altar of incense [ALTAR; CENSER]. Indeed, the burning of incense seems to have been considered among the Hebrews so much of an act of worship or sacred offering, that we read not of any other use of incense than this among them. Nor among the Egyptians do we discover any trace of burnt perfume except in sacerdotal use; but in the Persian sculptures we see incense burnt before the king. The prohibition of the Hebrews to make any perfume for private use—'to smell to'—like that prepared for the altar, merely implies, we apprehend, that the sacred incense had a peculiarly rich fragrance before being burnt, which was forbidden to be imitated in common perfumes.

The ingredients of the sacred incense are enumerated with great precision in Exod. xxx. 34, 35: 'Take unto thee sweet spices, stacte and galbanum; these sweet spices with pure frankincense; of each shall there be a like weight. And thou shalt make of it a perfume, a confection after the art of the apothecary, tempered together, pure and holy.' For an explanation of these various ingredients, we must refer to their several names in the present work. The further directions are, that this precious compound should be made or broken up into minute particles, and that it should be deposited, as a very holy thing, in the tabernacle 'before the testimony' (or ark). As the ingredients are so minutely specified, there was nothing to prevent wealthy persons from having a similar perfume for private use; and this, therefore, was forbidden under pain of excommunication: 'Ye shall not make to yourselves according to the composition thereof: it shall be unto thee holy for the Lord. Whosoever shall make like unto that, to smell thereto, shall even be cut off from his people' (ver. 37, 38).

According to Maimonides, the reason for the use of incense was to prevent the stench which would otherwise have been occasioned by the number of beasts every day slaughtered in the sanctuary, and to render the odour of the sanctuary, and of the vestments of those that ministered, exceedingly grateful.

This is very well; and no doubt the use of incense, which we always find in religions where worship is rendered by sacrifice, had its origin in some such considerations. But we are not to lose sight of the symbolical meaning of this grateful offering. It was a symbol of prayer. It was offered at the time when the people were in the posture and act of prayer; and their orisons were supposed to be presented to God by the priest, and to ascend to Him in the smoke and odour of that fragrant offering. This beautiful idea of the incense frequently occurs in Scripture (comp. Ps. cxli. 2; Mal. i. 11; Zech. xiv. 16; Acts x. 4; Rev. v. 8; viii. 4).

INCHAMENTS. [WITCHCRAFT.]

INDIA. This name occurs only in Esther i. 1; viii. 9, where the Persian king is described as reigning 'from India unto Ethiopia, over a hundred and seven and twenty provinces.' It is found again, however, in the Apocrypha, where India is mentioned among the countries which the Romans took from Antiochus and gave to Eumenes (1 Macc. viii. 8).

It is evident from all ancient history, that the country known as India in ancient times extended more to the west, and did not reach so far to the east—that is, was not known so far to the east—as the India of the moderns. When we read of ancient India, we must clearly not understand the whole of Hindostan, but chiefly the northern parts of it, or the countries between the Indus and the Ganges; although it is not necessary to assert that the rest of that peninsula, particularly its western coast, was then altogether unknown. It was from this quarter that the Persians and Greeks (to whom we are indebted for the earliest accounts of India) invaded the country; and this was consequently the region which first became generally known. The countries bordering on the Ganges continued to be involved in obscurity, the great kingdom of the Prasians excepted, which, situated nearly above the modern Bengal, was dimly discernible. Besides, the western and northern boundaries were not the same as at present. To the west, India was not then bounded by the river Indus, but by a chain of mountains which, under the name of Koh (whence the Grecian appellation of the Indian Caucasus), extended from Bactria to Makran, or Gedrosia, enclosing the kingdoms of Candahar and Cabul, the modern kingdom of Eastern Persia or Afghanistan. These districts anciently formed part of India, as well as, further to the south, the less perfectly known countries of the Arabi and Haurs, bordering on Gedrosia. This western boundary continued at all times the same, and was removed to the Indus only in consequence of the victories of Nadir Shah.

Towards the north, ancient India overpassed not less its present limit. It comprehended the whole of the mountainous region above Cashmir, Badakshan, Belur Land, the western boundary mountains of Little Bucharia, or Little Thibet, and even the desert of Cobi, so far as it was

known. The discovery of a passage by sea to the coasts of India has contributed to withdraw from these regions the attention of Europeans, and left them in an obscurity which hitherto has been little disturbed, although the current of events seems likely ere long to lead to our better knowledge.

From this it appears that the India of Scripture included no part of the present India, seeing that it was confined to the territories possessed by the Persians and the Syrian Greeks, that never extended beyond the Indus, which, since the time of Nadir Shah, has been regarded as the western boundary of India. Something of India beyond the Indus became known through the conquering march of Alexander, and still more through that of Seleucus Nicator, who penetrated to the banks of the Ganges; but the notions thus obtained are not embraced in the Scriptural notices, which, both in the canonical and the apocryphal text, are confined to Persian India.

INHERITANCE. The laws and observances which determine the acquisition and regulate the devolution of property, are among the influences which affect the vital interests of states; and it is therefore of high consequence to ascertain the nature and bearing of the laws and observances relating to this subject which come to us with the sanction of the Bible. We may also premise that, in a condition of society such as that in which we now live, wherein the two diverging tendencies which favour immense accumulations on the one hand, and lead to poverty and pauperism on the other, are daily becoming more and more decided, disturbing, and baneful, there seems to be required on the part of those who take Scripture as their guide, a careful study of the foundations of human society, and of the laws of property, as they are developed in the divine records which contain the revealed will of God.

That will, in truth, as it is the source of all created things, and specially of the earth and its intelligent denizen, man, so is it the original foundation of property, and of the laws by which its inheritance should be regulated. God, as the Creator of the earth, gave it to man to be held, cultivated, and enjoyed (Gen. i. 28, sq.; Ps. cxv. 16; Eccles. v. 9). The primitive records are too brief and fragmentary to supply us with any details respecting the earliest distribution or transmission of landed property; but from the passages to which reference has been made, the important fact appears to be established beyond a question, that the origin of property is to be found, not in the achievements of violence, the success of the sword, or any imaginary implied contract, but in the will and the gift of the common Creator and bountiful Father of the human race. It is equally clear that the gift was made, not to any favoured portion of our race, but to the race itself—to man as represented by our great primogenitor, to whom the use of the divine gift was first graciously vouchsafed.

The impression which the original gift of the earth was calculated to make on men, the Great Donor was pleased, in the case of Palestine, to render, for his own wise purposes, more decided and emphatic by an express re-donation to the patriarch Abraham (Gen. xiii. 14, sq.). Many years, however, elapsed before the promise was

fulfilled. Meanwhile the notices which we have regarding the state of property in the patriarchal ages, are few and not very definite. The products of the earth, however, were at an early period accumulated and held as property. Violence invaded the possession; opposing violence recovered the goods. War soon sprang out of the passions of the human heart. The necessity of civil government was felt. Customary laws accordingly developed themselves. The head of the family was supreme. His will was law. The physical superiority which he possessed gave him this dominion. The same influence would secure its transmission in the male rather than the female line. Hence too the rise of the rights of primogeniture. In the early condition of society which is called patriarchal, landed property had its origin, indeed, but could not be held of first importance by those who led a wandering life, shifting continually, as convenience suggested, from one spot to another. Cattle were then the chief property (Gen. xxiv. 35). But land, if held, was held on a freehold tenure; nor could any other tenure have come into existence till more complex and artificial relations arose, resulting, in all probability, from the increase of population and the relative insufficiency of food. When Joseph went down into Egypt, he appears to have found the freehold tenure prevailing, which, however, he converted into a tenancy at will, or, at any rate, into a conditional tenancy. Other intimations are found in Genesis which confirm the general statements which have just been made. Daughters do not appear to have had any inheritance. If there are any exceptions to this rule, they only serve to prove it. Thus Job (the book so called is undoubtedly very old, so that there is no impropriety in citing it in this connection) is recorded (xlii. 15) to have given his daughters an inheritance conjointly with their brothers—a record which of itself proves the singularity of the proceeding, and establishes our position that inheritance generally followed the male line. How highly the privileges conferred by primogeniture were valued, may be learnt from the history of Jacob and Esau. In the patriarchal age doubtless these rights were very great. The eldest son, as being by nature the first fitted for command, assumed influence and control, under his father, over the family and its dependents; and when the father was removed by death, he readily, and as if by an act of Providence, took his father's place. Thus he succeeded to the property in succeeding to the headship of the family, the clan, or the tribe. At first the eldest son most probably took exclusive possession of his father's property and power; and when, subsequently, a division became customary, he would still retain the largest share—a double portion, if not more (Gen. xxvii. 25, 29, 40). That in the days of Abraham other sons partook with the eldest, and that too though they were sons of concubines, is clear from the story of Hagar's expulsion:—'Cast out (said Sarah) this bondwoman and her son; for the son of this bondwoman shall not be heir with my son, even with Isaac' (Gen. xxi. 10). The few notices left us in Genesis of the transfer of property from hand to hand are interesting, and bear a remarkable similarity to what takes place in Eastern countries even at this day (Gen. xxi. 22, sq.; xxiii. 9, sq.). The purchase of the Cave of

Machpelah as a family burying-place for Abraham, detailed in the last passage, serves to show the safety of property at that early period, and the facility with which an inheritance was transmitted even to sons' sons (comp. Gen. xlix. 29). That it was customary, during the father's lifetime, to make a disposition of property, is evident from Gen. xxiv. 35, where it is said that Abraham had given all he had to Isaac. This statement is further confirmed by ch. xxv. 5, 6, where it is added that Abraham gave to the sons of his concubines 'gifts, sending them away from Isaac his son, while he yet lived, eastward unto the east country.' Sometimes, however, so far were the children of unmarried females from being dismissed with a gift, that they shared with what we should term the legitimate children, in the father's property and rights. Thus Dan and Naphtali were sons of Bilhah, Rachel's maid, whom she gave to her husband, failing to bear children herself. So Gad and Asher were, under similar circumstances, sons of Zilpah, Leah's maid (Gen. xxx. 2-14). In the event of the eldest son's dying in the father's lifetime, the next son took his place; and if the eldest son left a widow, the next son made her his wife (Gen. xxxvii. 7, sq.), the offspring of which union was reckoned to the first-born and deceased son. Should the second likewise die, the third son took his place (Gen. xxxviii. 11). While the rights of the first-born were generally established and recognised, yet were they sometimes set aside in favour of a younger child. The blessing of the father or the grandsire seems to have been an act essential in the devolution of power and property—in its effects not unlike wills and testaments with us; and instances are not wanting in which this (so to term it) testamentary bequest set aside consuetudinary laws, and gave precedence to a younger son (Gen. xlviii. 15, sq.). Special claims on the parental regards were acknowledged and rewarded by special gifts, as in the case of Jacob's donation to Joseph (Gen. xlviii. 22). In a similar manner, bad conduct on the part of the eldest son (as well as of others) subjected him, if not to the loss of his rights of property, yet to the evil influence of his father's dying malediction (Gen. xlix. 3); while the good and favoured, though younger, son was led by the paternal blessing to anticipate, and probably also to reap, the richest inheritance of individual and social happiness (Gen. xlix. 8-22).

The original promise made to Abraham of the land of Palestine was solemnly repeated to Isaac (Gen. xxvi. 3), the reason assigned being, because 'Abraham obeyed my voice and kept my charge, my commandments, my statutes, and my laws,' while it is expressly declared that the earlier inhabitants of the country were dispossessed and destined to extermination for the greatness of their iniquity. The possession of the promised land was embraced by Isaac in his dying benediction to Jacob (Gen. xxviii. 3, 4), to whom God vouchsafed (Gen. xxviii. 15; see also xxxv. 10, 11) to give a renewed assurance of the destined inheritance. That this donation, however, was held to be dependent for the time and manner of its fulfilment on the divine will, appears from Gen. xxxiii. 18, where Jacob, on coming into the land of Canaan, bought for an hundred pieces of money 'a parcel of a field, at

the hand of the children of Hamor.' Delayed though the execution of the promise was, confidence never deserted the family of Abraham, so that Joseph, dying in the land of Egypt, assured his brothers that they would be visited of God and placed in possession of Canaan, enjoining on them, in this conviction, that when conducted to their possession, they should carry his bones with them out of Egypt (Gen. i. 25).

A promise thus given, thus repeated, and thus believed, easily, and indeed unavoidably, became the fundamental principle of that settlement of property which Moses made when at length he had effected the divine will in the redemption of the children of Israel. The observances and practices, too, which we have noticed as prevailing among the patriarchs would, no doubt, have great influence on the laws which the Jewish legislator originated or sanctioned. The land of Canaan was divided among the twelve tribes descended through Isaac and Jacob from Abraham. The division was made by lot for an inheritance among the families of the sons of Israel, according to the tribes, and to the number and size of families in each tribe. The tribe of Levi, however, had no inheritance, but forty-eight cities with their suburbs were assigned to the Levites, each tribe giving according to the number of cities that fell to its share (Num. xxxiii. 50; xxxiv. 1; xxxv. 1). The inheritance thus acquired was never to leave the tribe to which it belonged; every tribe was to keep strictly to its own inheritance. An heiress, in consequence, was not allowed to marry out of her own tribe, lest property should pass by her marriage into another tribe (Num. xxxvi. 6-9). This restriction led to the marriage of heiresses with their near relations: thus the daughters of Zelophehad 'were married unto their father's brother's sons,' and their inheritance remained in the tribe of the family of their father' (ver. 11, 12). In general cases the inheritance went to sons, the first-born receiving a double portion, 'for he is the beginning of his father's strength.' If a man had two wives, one beloved, the other hated, and if the first-born were the son of her who was hated, he nevertheless was to enjoy 'the right of the first-born' (Deut. xxi. 15). If a man left no sons, the inheritance passed to his daughters; if there was no daughter, it went to his brothers; in case there were no brothers, it was given to his father's brothers; if his father had no brothers, it came into possession of the nearest kinsman (Num. xxvii. 8). The land was Jehovah's, and could not therefore be permanently alienated. Every fiftieth year, whatever land had been sold returned to its former owner. The value and price of land naturally rose or fell in proportion to the number of years there were to elapse prior to the ensuing fiftieth or jubilee-year. If he who sold the land, or a kinsman, could redeem the land before the year of jubilee, it was to be restored to him on his paying to the purchaser the value of the produce of the years remaining till the jubilee. Houses in villages or unwall'd towns might not be sold for ever; they were restored at the jubilee, and might at any time be redeemed. If a man sold a dwelling-house situated in a walled city, he had the option of redeeming it within the space of a full year after it had been sold; but if it remained unredeemed, it belonged to the pur-

chaser, and did not return to him who sold it even at the jubilee (Lev. xxv. 8, 23). The Levites were not allowed to sell the land in the suburbs of their cities, though they might dispose of the cities themselves, which, however, were redeemable at any time, and must return at the jubilee to their original possessors (Lev. xxvii. 16).

The regulations which the laws of Moses established rendered wills, or a testamentary disposition of (at least) landed property, almost, if not quite, unnecessary; we accordingly find no provision for anything of the kind. Some difficulty may have been now and then occasioned, when near relations failed; but this was met by the traditional law, which furnished minute directions on the point. Personal property would naturally follow the land, or might be bequeathed by word of mouth. At a later period of the Jewish polity the mention of wills is found, but the idea seems to have been taken from foreign nations. In princely families they appear to have been used, as we learn from Josephus; but such a practice can hardly suffice to establish the general use of wills among the people. In the New Testament, however, wills are expressly mentioned (Gal. iii. 15; Heb. ix. 17).

INN, INKHORN. [WRITING.]

INN. In the days of the elder patriarchs there seem to have been no places specially devoted to the reception of travellers, at least in the pastoral districts frequented by those venerable nomads; for we find Abraham, like the Oriental shepherds of the present day, under a strong sense of the difficulties and privations with which journeying in those regions was attended, deeming it a sacred duty to keep on the outlook, and offer the wayfarer man the rites of hospitality in his own tent. Nor could the towns of Pales-

220.

tine, as it would seem, at that remote period, boast of any greater advance with respect to establishments of this sort (see Gen. xix. 2); from which it is evident that the custom, which is still frequently witnessed in the cities of the East, was then not uncommon, for travellers who were late in arriving, and who had no introductions to a private family, to bivouac in the streets, or wrapping themselves up in the ample folds of their hykes, to pass the night as they best could in the open air (see also Judges xix. 15). In the Arab towns and villages, however, when a traveller arrives in the daytime, the sheikh, or some principal person of the place, goes out to welcome him, and treats him with great civility in his own house; or else he conducts him to the *menzil*, which, though a place of rather a nondescript character, is understood to be the house occupied by those who entertain strangers, when there are no other lodgings, and to which the women in the sheikh's house, having surveyed the number of the guests, send provisions of every kind, according to the season, and provide every accommodation the place can afford.

The first mention of an inn, or house set apart

for the accommodation of travellers, occurs in the account of the return of Jacob's sons from Egypt (Gen. xlii. 27); and as it was situated within the confines of that country, and at the first stage from the metropolis, it is probable that the erection of such places of entertainment originated with the Egyptians, who were far superior to all their contemporaries in the habits and the arts of civilized life. The Egyptian inn, where the sons of Israel halted to bait their asses, was probably, from the remote period to which it belonged, of a rude and humble description, in point both of appearance and accommodation; and such is the low state of art, or the tyrannical force of custom in the East, that establishments of this kind in the present day can, with few exceptions, boast of improvements, that render them superior to the mean and naked poverty of those which received the pilgrims of the patriarchal age.

Khan, or *karavanserai*, is the name which this kind of building bears; and though the terms are often applied indiscriminately, there is an acknowledged distinction, which seems to be, that *khan* is applied to those which are situated in or near towns, whereas *karavanserais* (a lodge for caravans, as the compound word imports) is the more appropriate designation of such as are erected in desert and sequestered places. Some of these buildings are provided at the public expense, or owe their existence to devoted Mussulmans, who bestow a portion of their wealth, as a meritorious act of charity, in promoting the comfort and refreshment of pilgrims; while others are erected by the contributions of private merchants for their own accommodation. The latter, of course, are the most spacious, the most elegant, and best appointed; but though varying in character and size, this class of establishments preserves so generally the same uniform plan of construction, that a description of one may serve to convey an idea of all. The *karavanserai* then is a large edifice presenting the form of a square, the sides of which, about 100 yards in length each, are surrounded by an external wall of fine brickwork, based on stone, rising generally to the height of twenty feet. In the middle of the front wall there is a wide and lofty archway, having on one or both sides a lodge for the porter and other attendants; while the upper part of it, being faced with carving or ornamental masonry, and containing several rooms, surmounted by elegant domes, is considered the most honourable place of the building, and is therefore appropriated to the use of the better sort. This archway leads into a spacious rectangle, the area forming a courtyard for cattle, in the midst of which is a well or fountain. Along the sides of the rectangle are piazzas extending the whole length, and opening at every few steps into arched and open recesses, which are the entrances into the travellers' apartments. An inner door behind each of these conducts to a small oblong chamber, deriving all its light from the door, or from a small open window in the back wall entirely destitute of furniture, and affording no kind of accommodation in the way of presses or shelves, except some rude niches excavated in the thick walls. This cell is intended for the dormitory of the traveller, who generally prefers, however, the recess in front for sitting in under shade during the daytime, as well as for sleeping in during the

night, when the season allows. There being no other door but the entrance arch, each occupant remains isolated in his own quarters, and is cut off from all communication with the other inmates of the caravanserais. But in the middle of one of the three sides, or in large caravanserais of each of the sides, there is a large hall, which serves as a travellers' room, where all may indiscriminately assemble: while at the end of each side there is a staircase leading to the flat roof of the house, where the cool breeze and a view of the surrounding country may be enjoyed. These chambers generally stand on the ground-floor, which is a few feet above the level of the court-yard; but in the few buildings of this sort which have two stories, the travellers are accommodated above, while the under flat is reserved for the use of their servants, or appropriated as warehouses for goods. And in such establishments there is found one other additional advantage in having a supply of servants and cooks, as well as a shop in the porter's house, where all commodities may be procured. Caravanserais of this superior class, however, are rarely to be met with. The most part are but wretched lodging-places—filled, it may be, with dirt and vermin—consisting only of bare walls, in which not an article of furniture is to be seen, nor a cooking utensil to be found, nor provisions of any sort to be obtained for love or money. The traveller must carry along with him, as well as provide with his own hands, whatever is necessary for his use and comfort. He must also subsist on the supply of food and articles of luxury he may have had the foresight to provide, as no addition to his stores can be made till he reaches the next town. In short, in many of the khans or caravanserais to which he may come, he can look for nothing from the keeper except to show him the way to his chamber, and give him the key if it is furnished with a door. One assistance only he may depend upon, and it is no inconsiderable one—that of receiving some attendance and aid if overtaken by sickness; for one of the requisite qualifications for the office is, that the functionary possess a knowledge of simples, and the most approved practice in case of fracture or common ailments. And hence the good Samaritan in the parable (Luke x. 30), although he was obliged, in the urgency of the case, himself to apply from his own store a few simple remedies for the relief of the distressed man, left him with full confidence to be treated and nursed by the keeper of the khan, whose assiduities in dressing the wounds and bruises of his patient might be quickened, perhaps, by the liberal remuneration he was promised, as well as by the example of the humane traveller.

Among the Egyptians, and indeed among the ancients generally, the keepers of houses of public entertainment were always women; and hence we can easily account for the ready admission which the spies obtained into the house of Rahab, 'on the wall of Jericho,' situated, as such houses were, for the reception of strangers, for the most part at the gate or entrance into the town (Josh. ii. 1). This woman is called a harlot in our translation, but the original Hebrew admits of being translated by another word, to which no degrading or infamous associations are attached.

Although it is probable that the state of Judæa in the time of Christ and the Apostles was, in respect to means of communication, much superior to that of any Oriental country in the present day, yet the warm commendations of hospitality so frequently met with in the works of contemporary classical writers, as well as the pressing exhortations of the inspired Apostle to the practice of that virtue, too plainly prove that travellers were then chiefly dependent on the kindness of private individuals. The strong probability is, that the 'inns' mentioned in the New Testament find their true and correct representations in the Eastern khans and caravanserais of the present day; and that the Jews of that period had experience of nothing better than the bare walls and cell-like apartments of such edifices as we have described above.

This subject acquires additional interest from its connection with the birth of our Lord; and there has been a good deal of controversy both respecting the character of the building from which Mary was excluded by the influx of company, and also the nature of the place where she 'brought forth her first-born son.' No explanation, however, that we have met with, appears so satisfactory, and conveys such an intelligible picture to the eye, as that given by the editor of the *Pictorial Bible* (Luke ii. 7); with whose words we shall conclude this article. 'The most complete establishments have very excellent stables in covered avenues, which extend behind the ranges of apartments—that is, between the back wall of these ranges of building and the external wall of the khan; and the entrance to it is by a covered passage at one of the corners of the quadrangle. The stable is on a level with the court, and consequently below the level of the buildings, by the height of the platform on which they stand. Nevertheless, this platform is allowed to project behind into the stable, so as to form a bench, to which the horses' heads are turned, and on which they can, if they like, rest the nose-bag of hair-cloth, from which they eat, to enable them to reach the bottom when its contents get low. It also often happens that not only this bench exists in the stable, but also recesses corresponding to those in front of the apartments, and formed by the side walls which divide the rooms, being allowed to project behind into the stable, just as the projection of the same walls into the great area forms the recesses in front. These recesses in the stable, or the bench if there are no recesses, furnish accommodation to the servants and others who have charge of the beasts; and when persons find on their arrival that the apartments usually appropriated to travellers are already occupied, they are glad to find accommodation in the stable, particularly when the nights are cold or the season inclement. It is evident, then, from this description, that the part of the stable called 'the manger,' could not reasonably have been other than one of those recesses, or at least a portion of the bench which we have mentioned, as affording accommodation to travellers under certain circumstances.'

INSPIRATION. This word is sometimes used to denote the excitement and action of a fervent imagination in the poet or orator. But even in this case there is generally a reference to

some supposed divine influence, to which the excited action is owing. It is once used in Scripture to denote that Divine agency by which man is endued with the faculties of an intelligent being, when it is said, 'the inspiration of the Almighty giveth him understanding.' But the inspiration now to be considered is that which belonged to those who wrote the Scriptures, and which is particularly spoken of in 2 Tim. iii. 16, and in 2 Pet. i. 21: 'All Scripture is given by inspiration of God; Holy men of God spake as they were moved by the Holy Ghost.' These passages relate specially to the Old Testament; but there is at least equal reason to predicate Divine inspiration of the New Testament.

The definition which Dr. Knapp gives of inspiration is the one we shall adopt. He says, 'It may be best defined, according to the representations of the Scriptures themselves, as an extraordinary Divine agency upon teachers while giving instruction, whether oral or written, by which they were taught what and how they should write or speak.' Or we may say more briefly that the sacred penmen were completely under the direction of the Holy Spirit, or that they wrote under a plenary inspiration. Dr. Calamy's definition agrees substantially with that of Dr. Knapp.

To prove that the Scriptures are divinely inspired we might with propriety refer to the excellence of the doctrines, precepts, and promises, and other instructions, which they contain; to the simplicity and majesty of their style; to the agreement of the different parts, and the scope of the whole; especially to the full discovery they make of man's fallen and ruined state, and the way of salvation through a Redeemer; together with their power to enlighten and sanctify the heart, and the accompanying witness of the Spirit in believers. These are circumstances of real importance, and the discerning advocates of inspiration have not overlooked them. But the more direct and conclusive evidence that the Scriptures were Divinely inspired is found in the testimony of the writers themselves. And as the writers did, by working miracles, and in other ways, sufficiently authenticate their Divine commission, and establish their authority and infallibility as teachers of Divine truth, their testimony, in regard to their own inspiration, is entitled to our full confidence. For who can doubt that they were as competent to judge of, and as much disposed to speak the truth on this subject as on any other? If then we admit their Divine commission and authority, why should we not rely upon the plain testimony which they give concerning the Divine assistance afforded them in their work? To reject their testimony in this case would be to impeach their veracity, and thus to take away the foundation of the Christian religion. And it is well known that those who deny the justice of the claim which they set up to Divine inspiration do in fact give up the infallible truth and authority of the Scriptures, and adopt the principles of deism.

It is, then, of the first importance to inquire what representations are made by the prophets, and by Christ and his Apostles, respecting the inspiration, and the consequent authority, of the sacred Scriptures.

The prophets generally professed to speak the

word of God. What they taught was introduced and confirmed by a 'Thus saith the Lord;' or 'The Lord spake to me, saying.' And, in one way or another, they gave clear proof that they were Divinely commissioned, and spoke in the name of God, or as it is expressed in the New Testament, *that God spake by them*.

But the strongest and most satisfactory proof of the inspiration and Divine authority of the Old Testament writings, is found in the testimony of Christ and the Apostles.

The Lord Jesus Christ possessed the spirit of wisdom without measure, and came to bear witness to the truth. His works proved that he was what he declared himself to be—the Messiah, the great Prophet, the infallible Teacher. The faith which rests on him rests on a rock. As soon then as we learn how he regarded the Scriptures, we have reached the end of our inquiries. His word is truth. Now every one who carefully attends to the four Gospels will find that Christ everywhere spoke of that collection of writings called the Scripture as the word of God; that he regarded the whole in this light; that he treated the Scripture, and every part of it, as infallibly true, and as clothed with divine authority, thus distinguishing it from every mere human production. Nothing written by man can be entitled to the respect which Christ showed to the Scriptures. This, to all Christians, is direct and incontrovertible evidence of the Divine origin of the Scriptures, and is by itself perfectly conclusive.

But there is clear concurrent evidence, and evidence still more specific, in the writings of the Apostles. In two texts in particular Divine inspiration is positively asserted. In the first (2 Tim. iii. 16), Paul lays it down as the characteristic of 'all Scripture,' that it 'is given by inspiration of God,' and from this results its profitability.

The other text (2 Pet. i. 21) teaches that 'Prophecy came not by the will of man, but holy men of God spake as they were moved by the Holy Ghost.' This passage, which the Apostle Peter applied particularly to the subject of which he was speaking, may be considered as explanatory of what is intended by inspiration. For to say that all Scripture is Divinely inspired, and that men of God wrote it as they were moved by the Holy Ghost, is one and the same thing.

The various texts in which Christ and the Apostles speak of Scripture as the word of God, and as invested with authority to decide all questions of truth and duty, fully correspond with the texts above considered.

From this view of the subject it follows that the attempt which has been made by a certain class of writers to account for the production of the whole or any part of the Scriptures by the will or agency, the ingenuity, diligence, or fidelity of men, in the use of the means within their reach, without the supernatural influence of the Spirit, is utterly at variance with the teachings of Christ and the Apostles as to the origin of the Sacred Writings.

As the Christian dispensation surpasses the former in all spiritual privileges and gifts, it is reasonable to presume that the New Testament was written under at least an equal degree of Divine influence with the Old, and that it comes

recommended to us by equal characteristics of infallible truth. But of this there is clear positive evidence from the New Testament itself.

In the first place, *Jesus Christ*, whose works proved him to be the great unerring Teacher, and to be possessed of all power in Heaven and earth, gave commission to his Apostles to act in his stead, and to carry out the work of instruction which he had begun, confirming their authority by investing them with power to perform miracles. But how could such a commission have answered the end proposed, had not the Divine Spirit so guided the Apostles as to render them infallible and perfect teachers of Divine truth?

But, secondly, in addition to this, *Jesus expressly promised to give them the Holy Spirit, to abide with them continually, and to guide them into all the truth.* He said to them, 'When they shall deliver you up, take no thought how or what ye shall speak for it shall be given you in the same hour what ye shall speak. For it is not ye that speak, but the Spirit of your Father that speaketh in you.' Storr and Platt think this is the idea intended; 'The instructions which ye in general give are derived not so much from yourselves as from the Holy Spirit. Hence, when ye are called on to defend your doctrines, ye need feel no anxiety, but may confidently rely on the Holy Spirit to vindicate his own doctrines, by suggesting to you the very words of your defence.' If these promises were not fulfilled, then Jesus was not a true prophet. If they were fulfilled, as they certainly were, then the Apostles had the constant assistance of the Holy Spirit, and, whether engaged in speaking or writing, were under Divine guidance, and, of course, were liable to no mistakes either as to the matter or manner of their instructions.

In the third place, *the writers of the New Testament manifestly considered themselves to be under the guidance of the Holy Spirit, and their instructions, whether oral or written, to be clothed with Divine authority, as the word of God.*

'We speak,' they say, 'as of God.' Again, 'Which things we speak, not in the words which man's wisdom teacheth, but in words which the Holy Ghost teacheth.' They declared what they taught to be the word of God, and the things they wrote to be the commandments of God. Now the Apostles, being honest, unassuming, humble men, would never have spoken of themselves and their writings in such a manner, had they not known themselves to be under the overriding guidance of the Holy Spirit, and their instructions perfectly in accordance with the mind of God.

It is perfectly consistent with the plenary inspiration here maintained, that God operated on the minds of inspired men in a variety of ways, sometimes by audible words, sometimes by direct inward suggestions, sometimes by outward visible signs, sometimes by the Urim and Thummim, and sometimes by dreams and visions. This variety in the mode of Divine influence detracted nothing from its certainty. God made known his will equally in different ways; and, whatever the mode of his operation, he made it manifest to his servants that the things revealed were from him.

But inspiration was concerned not only in making known the will of God to prophets and Apostles, but also in giving them direction in

writing the Sacred Books. They wrote as they were moved by the Holy Ghost. And in this, also, there was a diversity in the mode of Divine influence. Sometimes the Spirit of God moved and guided his servants to write things which they could not know by natural means, such as, new doctrines or precepts, or predictions of future events. Sometimes he moved and guided them to write the history of events which were wholly or partly known to them by tradition, or by the testimony of their contemporaries, or by their own observation or experience. In all these cases the Divine Spirit effectually preserved them from all error, and influenced them to write just so much and in such a manner as God saw to be best. Sometimes he moved and guided them to write a summary record of larger histories, containing what his infinite wisdom saw to be adapted to the end in view, that is, the benefit of his people in all ages. Sometimes he influenced them to make a record of important maxims in common use, or to write new ones, derived either from their own reason or experience, or from special Divine teaching. Sometimes he influenced them to write parables or allegories, particularly suited to make a salutary impression of Divine things on the minds of men; and sometimes to record supernatural visions. In these and all other kinds of writing the sacred penmen manifestly needed special Divine guidance, as no man could of himself attain to infallibility, and no wisdom, except that of God, was sufficient to determine what things ought to be written for permanent use in the church, and what manner of writing would be best fitted to promote the great ends of revelation.

Some writers speak of different modes and different kinds, and even different degrees of inspiration. And if their meaning is that God influenced the minds of inspired men in different ways; that he adopted a variety of modes in revealing Divine things to their minds; that he guided them to give instruction in prose and in poetry, and in all the different forms of composition; that he moved and guided them to write history, prophecy, doctrines, commands, promises, reproofs, and exhortations, and that he adapted his mode of operation to each of these cases—against this no objection can be made. It is a fact, that the Scriptures exhibit specimens of all these different kinds of writing and these different modes of Divine instruction. Still each and every part of what was written was Divinely inspired, and equally so. It is all the word of God, and clothed with Divine authority, as much as if it had all been made known and written in one way.

Dr. Henderson, who labours perhaps with too much zeal against carrying inspiration to extreme lengths, still says that if those who hold to different modifications of inspiration intend that there are different modifications and degrees of authority given to Scripture, their opinion must meet with unqualified reprobation from every sincere believer. He insists that a diversity in the modes and degrees of Divine operation did exist in the work of inspiration, and that this diversity was the result of infinite wisdom adapting itself to different circumstances. He thinks that, unless we admit such a diversity, we cannot form correct ideas of the subject. But he is confident that the distinction which he endeavours

to establish is not in the slightest degree hostile to the Divine authority of Scripture. He affirms that *no part of that holy book was written without miraculous influence; that all parts were equally inspired*; that in regard to the whole volume the great end was infallibly attained, namely, the commitment to writing of precisely such matters as God designed for the religious instruction of mankind; that the sacred penmen wrote what had for its object not merely the immediate benefit of individual persons or churches, but what would be useful to Christians in all future times; and that in regard to the most minute and inconsiderable things which the Scripture contains we are compelled to say, *This also cometh from the Lord*.

The controversy among orthodox divines respecting what is called *verbal inspiration*, appears to arise, in a great measure, from the different senses affixed to the phrase.

The real question, and the whole question at issue, may be stated thus: *did the work of the Divine Spirit in the sacred penmen relate to the language they used, or their manner of expressing their ideas; and if so, how far, and in what way?*

All those with whom we are concerned in the discussion of this question, hold that Divine inspiration had some respect to the language employed by the inspired writers, at least in the way of general supervision. And Dr. Henderson shows, in various passages of his excellent lectures, that there is no material difference between him and those who profess to maintain higher ground. He allows that, to a certain extent, what is called *verbal inspiration*, or the *inspiration of words*, took place. 'In recording what was immediately spoken with an audible voice by Jehovah, or by an angel interpreter; in giving expression to points of revelation which entirely surpassed the comprehension of the writers; in recording prophecies, the minute bearings of which they did not perceive; in short, in committing to writing any of the dictates of the Spirit, which they could not have otherwise accurately expressed, the writers,' he alleges, 'were supplied with the words as well as the matter.' He says, that even when Biblical writers made use of their own faculties, and wrote each one in his own manner, without having their mental constitution at all disturbed, they were yet 'always secured by celestial influence against the adoption of any forms of speech, or collocation of words, that would have injured the exhibition of Divine truth, or that did not adequately give it expression; that the characteristic differences of style, so apparent among the sacred writers, were employed by the Holy Spirit for the purposes of inspiration, and 'were called forth in a rational way; that the writers, 'being acted upon by the Divine Spirit, expressed themselves naturally; that while the Divine influence adapted itself to whatever was peculiar in the minds of inspired men, it constantly guided them in writing the Sacred Volume.' He declares his belief that the Scriptures were written not under a partial or imperfect, but under a plenary and infallible, inspiration; that they were entirely the result of Divine intervention, and are to be regarded as the oracles of Jehovah.

The doctrine of a plenary inspiration of all Scripture in regard to the language employed, as

well as the thoughts communicated, ought not to be rejected without valid reasons. The doctrine is so obviously important, and so consonant to the feelings of sincere piety, that those evangelical Christians who are pressed with speculative objections against it, frequently, in the honesty of their hearts, advance opinions which fairly imply it. This is the case, as we have seen, with Dr. Henderson, who says that the Divine Spirit guided the sacred penmen in *writing* the Scriptures; that their *mode of expression* was such as they were instructed by the Spirit to employ; that Paul ascribes not only the doctrines which the Apostles taught, but the *entire character of their style*, to the influence of the Spirit. He indeed says that this does not always imply the *immediate communication of the words of Scripture*; and he says it with good reason. For *immediate* properly signifies *acting without a medium, or without the intervention of another cause or means, not acting by second causes*. Now those who hold the highest views of inspiration do not suppose that the Divine Spirit, except in a few instances, so influenced the writers of Scripture as to interfere with the use of their rational faculties or their peculiar mental habits and tastes, or in any way to supersede secondary causes as the medium through which his agency produced the desired effect.

In regard to this point, therefore, there appears to be little or no ground for controversy. For, if God so influenced the sacred writers that, either with or without the use of secondary causes, they wrote just *what* he intended, and in the *manner* he intended, the end is secured; and what they wrote is as truly *his word*, as though he had written it with his own hand on tables of stone, without any human instrumentality. The very words of the decalogue were all such as God chose. And they would have been equally so if Moses had been moved by the Divine Spirit to write them with his hand. The expression, that God *immediately imparted or communicated* to the writers the very words which they wrote, is evidently not well chosen. The exact truth is that *the writers themselves* were the subjects of the Divine influence. The Spirit employed them as active instruments, and directed them in writing, both as to matter and manner. They wrote 'as they were moved by the Holy Ghost.' The matter, in many cases, was what they before knew, and the manner was entirely conformed to their habits; it was *their own*. But what was written was none the less inspired on that account. God may have influenced and guided an Apostle as infallibly in writing what he had before known, and that guidance may have been as really necessary, as in writing a new revelation. And God may have influenced Paul or John to write a book in *his own peculiar style*, and that influence may have been as real and as necessary as if the style had been what some would call a *Divine style*. It was a Divine style, if the writer used it under Divine direction. It was a *Divine* style, and it was, at the same time, a *human* style, and the *writer's own* style, all in one. Just as the believer's exercises, faith and love, are his own acts, and at the same time are the effects of Divine influence. The mental exercises of Paul and of John had their own characteristic peculiarities, as much as their style. God was the author of John's mind and all that was peculiar to his

mental faculties and habits, as really as of Paul's mind and what was peculiar to him. And in the work of inspiration he used and directed, for his own purposes, what was peculiar to each. When God inspired different men he did not make their minds and tastes all alike, nor did he make their language alike. Nor had he any occasion for this; for while they had different mental faculties and habits, they were as capable of being infallibly directed by the Divine Spirit, and infallibly speaking and writing Divine truth, as though their mental faculties and habits had been all exactly alike. And it is manifest that the Scriptures, written by such a variety of inspired men, and each part agreeably to the peculiar talents and style of the writer, are not only equally from God, but, taken together, are far better adapted to the purposes of general instruction, and all the objects to be accomplished by revelation, than if they had been written by one man, and in one and the same manner.

This view of plenary inspiration is fitted to relieve the difficulties and objections which have arisen in the minds of men from the variety of talent and taste which the writers exhibited, and the variety of style which they used. See, it is said, how each writer expresses himself naturally, in his own way, just as he was accustomed to do when not inspired. And see too, we might say in reply, how each Apostle, Peter, Paul, or John, when speaking before rulers, with the promised aid of the Holy Spirit, spoke naturally, *with his own voice*, and in his own way, as he had been accustomed to do on other occasions when not inspired. There is no more objection to plenary inspiration in the one case than in the other. The mental faculties and habits of the Apostles, their style, their voice, their mode of speech, all remained as they were. What, then, had the divine Spirit to do? What was the work which appertained to Him? We reply, His work was so to direct the Apostles in the use of their own talents and habits, their style, their voice, and all their peculiar endowments, that they should speak or write, each in his own way, just what God would have them speak or write, for the good of the Church in all ages.

The fact that the individual peculiarities of the sacred penmen are everywhere so plainly impressed on their writings, is often mentioned as an objection to the doctrine, that inspiration extended to their *language* as well as their thoughts. This is, indeed, one of the most common objections, and one which has obtained a very deep lodgment in the minds of some intelligent Christians. It may, therefore, be necessary to take some further pains completely to remove it. And in our additional remarks relative to this and other objections, it will come in our way to show that such a writer as Gausson, who contends with great earnestness and ability for the highest views of inspiration, does still, on all important points, agree with those who advocate lower views of the subject.

Gausson says, 'Although the title of each book should not indicate to us that we are passing from one author to another; yet we could quickly discover, by the change of their characters, that a new hand has taken the pen. It is perfectly easy to recognise each one of them, although they speak of the same master, teach the same doc-

trines, and relate the same incidents.' But how does this prove that Scripture is not, in all respects, inspired? 'So far are we,' says this author, 'from overlooking human individuality everywhere impressed on our Sacred Books, that, on the contrary, it is with profound gratitude, and with an ever-increasing admiration, that we regard this living, real, human character infused so charmingly into every part of the Word of God. We admit the fact, and we see in it clear proof of the Divine wisdom which dictated the Scriptures.'

Those who urge the objection above mentioned are plainly inconsistent with themselves. For while they deny the plenary inspiration of some parts of Scripture, *because they have these marks of individuality*, they acknowledge inspiration in the fullest sense in other parts, particularly in the prophecies, where this individuality of the writers is equally apparent.

In truth, what can be more consonant with our best views of the wisdom of God, or with the general analogy of his works, than that he should make use of the thoughts, the memories, the peculiar talents, tastes, and feelings of his servants in recording his Word for the instruction of men? Why should he not associate the peculiarities of their personal character with what they write under his personal guidance? But, independently of our reasoning, this matter is decided by the Bible itself. 'All Scripture is Divinely inspired,' and it is all the Word of God. And it is none the less the Word of God, and none the less inspired, because it comes to us in the language of Moses, and David, and Paul, and the other sacred writers. 'It is God who speaks to us, but it is also man; it is man, but it is also God.' The word of God, in order to be intelligible and profitable to us, 'must be uttered by mortal tongues, and be written by mortal hands, and must put on the features of human thoughts. This blending of humanity and Divinity in the Scriptures reminds us of the majesty and the condescension of God. Viewed in this light, the Word of God has unequalled beauties, and exerts an unequalled power over our hearts.'

There are some who maintain that all which was necessary to secure the desired results was an infallible guidance of the *thoughts* of the sacred writers; that with such a guidance they might be safely left to express their thoughts in their own way, without any special influence from above.

Now, if those who take this view of the subject mean that God not only gives the sacred penmen the very ideas which they are to write, but, in some way, secures an infallible connection between those ideas and a just expression of them in words; then, indeed, we have the desired result—an infallible revelation from God, made in the proper language of the writers. But if any one supposes that there is naturally such an infallible connection between right thoughts and a just expression of them in language, without an effective Divine superintendence, he contradicts the lessons of daily experience. But those to whom we refer evidently do not themselves believe in such an infallible connection. For when they assign their reason for denying that inspiration related to the language of the Scriptures, they speak of the different, and, as they regard

them, the contradictory statements of facts by different writers. But it is easy to see that the difficulty presses with all its force upon those who assert the inspiration of the *thoughts*. For surely they will not say that the sacred writers had *true thoughts* in their minds, and yet uttered them in the language of falsehood. This would contradict their own idea of a sure connection between the conceptions of the mind and the utterance of them in suitable words, and would clearly show that they themselves feel it to be necessary that the Divine guidance should extend to the *words* of inspired men as well as their thoughts. But if the inspired writer through inadvertence committed a real mistake as to a matter of fact, it must have been a mistake in his *thoughts* as well as in his words. If, then, there was a mistake, it lay in his *thoughts*. But if there was no mistake, then there is nothing to prove that inspiration did not extend to the language. If, however, there was a real mistake, then the question is not, what becomes of *verbal* inspiration, but what becomes of inspiration in *any sense*.

It is sometimes said that the sacred writers were of themselves generally competent to express their ideas in *proper language*, and in this respect had *no need* of supernatural assistance. But there is just as much reason for saying that they were of themselves generally competent to form their own *conceptions*, and so had no need of supernatural aid in this respect. It is just as reasonable to say that Moses could recollect what took place at the Red Sea, and that Paul could recollect that he was once a persecutor, and Peter what took place on the mount of transfiguration, without supernatural aid, as to say that they could, without such aid, make a proper record of these recollections. We believe a real and infallible guidance of the Spirit in both respects, because this is taught in the Scriptures. And it is obvious that the Bible could not be what Christ and the Apostles considered it to be, unless they were Divinely inspired.

The diversity in the narratives of the Evangelists is sometimes urged as an objection against the position we maintain in regard to inspiration, but evidently without reason, and contrary to reason. For what is more reasonable than to expect that a work of Divine origin will have marks of consummate wisdom, and will be suited to accomplish the end in view. Now it will not be denied that God determined that there should be four narratives of the life and death of Jesus from four historians. If the narratives were all alike, three of them would be useless. Indeed such a circumstance would create suspicion, and would bring discredit upon the whole concern. The narratives must then be different. And if, besides this useful diversity, it is found that the seeming contradictions can be satisfactorily reconciled, and if each of the narratives is given in the peculiar style and manner of the writers, then all is natural and unexceptionable, and we have the highest evidence of the credibility and truth of the narratives.

We shall advert to one more objection. It is alleged that writers who were constantly under a plenary Divine inspiration would not descend to the unimportant details, the trifling incidents, which are found in the Scriptures. To this it may be replied that the details alluded to must

be admitted to be according to truth, and that those things which, at first view, seem to be trifles may, when taken in their connections, prove to be of serious moment. And it is moreover manifest that, considering what human beings and human affairs really are, if all those things which are called trifling and unimportant were excluded, the Scriptures would fail of being conformed to fact; they would not be faithful histories of human life: so that the very circumstance which is demanded as proof of inspiration would become an argument against it. And herein we cannot but admire the perfect wisdom which guided the sacred writers, while we mark the weakness and shallowness of the objections which are urged against their inspiration.

On the whole, after carefully investigating the subject of inspiration, we are conducted to the important conclusion that 'all Scripture is Divinely inspired'; that the sacred penmen wrote 'as they were moved by the Holy Ghost'; and that these representations are to be understood as implying that the writers had, in all respects, the effectual guidance of the Divine Spirit. And we are still more confirmed in this conclusion because we find that it begets in those who seriously adopt it an acknowledgment of the Divine origin of Scripture, a reverence for its teachings, and a practical regard to its requirements, like what appeared in Christ and his Apostles. Being convinced that the Bible has, in all parts and in all respects, the seal of the Almighty, and that it is truly and entirely from God, we are led by reason, conscience, and piety to bow submissively to its high authority, implicitly to believe its doctrines, however incomprehensible, and cordially to obey its precepts, however contrary to our natural inclinations. We come to it from day to day, not as judges, but as learners, never questioning the propriety or utility of any of its contents. This precious Word of God is the perfect standard of our faith, and the rule of our life, our comfort in affliction, and our sure guide to heaven.

IRON. Tubal-Cain is the *first-mentioned* smith, 'a forger of every instrument of iron' (Gen. iv. 22). From that time we meet with manufactures in iron of the utmost variety (*some* articles of which seem to be anticipations of what are commonly supposed to be modern inventions); as iron weapons or instruments (Num. xxv. 7; Job xx. 24); barbed irons, used in hunting (Job xli. 7); *an iron bedstead* (Deut. iii. 11); chariots of iron (Josh. xvii. 16, and elsewhere); iron weights (*shekels*) (1 Sam. xvii. 7); harrows of iron (2 Sam. xii. 31); iron armour (2 Sam. xxiii. 7); tools (1 Kings vi. 7; 2 Kings vi. 5); horns (1 Kings xxii. 11); nails, hinges (1 Chron. xxii. 3); fetters (Ps. cv. 18); bars (Ps. cvii. 16); iron bars used in fortifying the gates of towns (Ps. cvii. 16; Isa. xlv. 2); *a pen of iron* (Job xix. 24; Jer. xvii. 1); *a pillar* (Jer. i. 18); yokes (Jer. xxviii. 13); *pan* (Ezek. iv. 3); trees bound with iron (Dan. iv. 15); gods of iron (Dan. v. 4); threshing-instruments (Amos i. 3); and in later times, an iron gate (Acts xii. 10); the actual cautery (1 Tim. iv. 2); breastplates (Rev. ix. 9).

The mineral origin of iron seems clearly alluded to in Job xxvii. 2. It would seem that in ancient times it was a plentiful production of Palestine (Deut. viii. 9). There appear to have

been furnaces for smelting at an early period in Egypt (Deut. iv. 20). The requirement that the altar should be made of 'whole stones over which no man had lift up any iron,' recorded in Josh. viii. 31, does not imply any objection to iron as such, but seems to be merely a mode of directing that, in order to prevent idolatry, the stones must not undergo any preparation by art. Iron was prepared in abundance by David for the building of the temple (1 Chron. xxii. 3), to the amount of one hundred thousand talents (1 Chron. xxix. 7), or rather 'without weight' (1 Chron. xxii. 14). Working in iron was considered a calling (2 Chron. ii. 7) [SMITH]. Iron seems to have been better from some countries, or to have undergone some hardening preparation by the inhabitants of them, such as were the people called Chalybes, living near the Euxine Sea (Jer. xv. 12); to have been imported from Tarshish to Tyre (Ezek. xxvii. 12), and 'bright iron' from Dan and Javan (ver. 19). The superior hardness of iron above all other substances is alluded to in Dan. ii. 40. It was found among the Midianites (Num. xxxi. 22), and was part of the wealth distributed among the tribes at their location in the land (Josh. xxii. 8).

Iron is *metaphorically* alluded to in the following instances:—affliction is signified by the furnace for smelting it (Deut. iv. 20); under the same figure, chastisement (Ezek. xxii. 18, 20, 22); reducing the earth to total barrenness by turning it into iron (Deut. xxviii. 23); slavery, by a yoke of iron (Deut. xxviii. 48); strength, by a bar of it (Job xl. 18); the extreme of hardness (Job xli. 27); severity of government, by a rod of iron (Ps. ii. 9); affliction, by iron fetters (Ps. cvii. 10); prosperity, by giving silver for iron (Isa. lx. 17); political strength (Dan. ii. 33); obstinacy, by an iron sinew in the neck (Isa. xlviii. 4); giving supernatural fortitude to a prophet, making him an iron pillar (Jer. i. 18); destructive power of empires, by iron teeth (Dan. vii. 7); deterioration of character, by becoming iron (Jer. vi. 28; Ezek. xxii. 18), which resembles the idea of the iron age; a tiresome burden, by a mass of iron (Ecclus. xxii. 15); the greatest obstacles, by walls of iron (2 Mac. xi. 9); the certainty with which a real enemy will ever show his hatred, by the rust returning upon iron (Ecclus. xii. 10). Iron seems used, as by the Greek poets, metonymically for the sword (Isa. x. 34). The following is selected as a *beautiful comparison* made to iron (Prov. xxvii. 17): 'Iron (literally) unitheth iron; so a man unitheth the countenance of his friend,' gives stability to his appearance by his presence. A most graphic *description of a smith at work* is found in Ecclus. xxxviii. 28.

ISAAC, son of Abraham and Sarah, born in his parents' old age. The promise of a son had been made to them when Abraham was visited by the Lord in the plains of Mamre, and appeared so unlikely to be fulfilled, seeing that both Abraham and Sarah were 'well-stricken in years,' that its utterance caused the latter to laugh incredulously. Being reproved for her unbelief, she denied that she had laughed. The reason assigned for the special visitation thus promised was, in effect, that Abraham was pious, and would train his offspring in piety, so that he would become the founder of a great nation, and

all the nations of the earth should be blessed in him.

In due time Sarah gave birth to a son, who received the name of Isaac, in reference to the laughter occasioned by the announcement of the Divine intention (comp. Gen. xxi. 6; xviii. 12; xvii. 17).

The first fact that we read of in the history of Isaac, is the command given to his father to offer the youth—'thy son, thine only son Isaac, whom thou lovest'—for a burnt-offering on a mountain in the land of Moriah. Abraham proceeded to obey the Divine direction, and was on the point of slaying Isaac, when his hand was withheld by the interposition of God, a ram for sacrifice being provided instead.

This event has found no few detractors, and various attempts have been made to explain it away. But the only proper way is to consider it as it is represented in the sacred page. The command, then, was expressly designed to try Abraham's faith. Destined as the patriarch was to be the father of the faithful, was he worthy of his high and dignified position? If his own obedience was weak, he could not train others in faith, trust, and love: hence a trial was necessary. That he was not without holy dispositions was already known, and indeed recognised in the Divine favours of which he had been the object; but was he prepared to do and to suffer all God's will? Religious perfection and his position alike demanded a perfect heart: hence the kind of trial. If he were willing to surrender even his only child, and act himself both as offerer and priest in the sacrifice of the required victim, if he could so far conquer his natural affections, so subdue the father in his heart, then there could be no doubt that his will was wholly reconciled to God's, and that he was worthy of every trust, confidence, and honour. The trial was made, the fact was ascertained, the victim was not slain. What is there in this to which either religion or morality can take exception? This view is both confirmed and justified by the words of God (Gen. xxii. 16, sq.), '*because thou hast not withheld thy only son, in blessing I will bless thee, and in multiplying I will multiply thy seed as the stars of the heaven, and in thy seed shall all the nations of the earth be blessed.*'

Isaac passed his youthful days under the eye of his father, engaged in the care of flocks and herds up and down the plains of Canaan. At length his father wished to see him married. Abraham therefore gave a commission to his oldest and most trustworthy servant to the effect that, in order to prevent Isaac from taking a wife from among the daughters of the Canaanites, he should proceed into Mesopotamia, and, under the divine direction, choose a partner among his own relatives for his beloved son. Rebekah, in consequence, becomes Isaac's wife, when he was now forty years of age.

Isaac having, in conjunction with his half-brother Ishmael, buried Abraham his father, 'in a good old age, in the cave of Machpelah,' took up a somewhat permanent residence 'by the well Lahai-roi,' where, being blessed of God, he lived in prosperity and at ease. One source of regret, however, he deeply felt. Rebekah was barren. In time, two sons, Jacob and Esau, are granted to his prayers. As the boys grow, Isaac gave a

preference to Esau, who seems to have possessed those robust qualities of character in which his father was defective, and therefore gratified him by such dainties as the pursuits of the chase enabled the youth to offer; while Jacob, 'a plain man dwelling in tents,' was an object of special regard to Rebekah—a division of feeling and a kind of partiality which became the source of much domestic unhappiness, as well as of jealousy and hatred between the two sons.

A famine compels Isaac to seek food in some foreign land. Divinely warned not to go down to Egypt, the patriarch applies to a petty prince of Philistia, by name Abimelech, who permits him to dwell at Gerar. Here an event took place which has a parallel in the life of his father Abraham. Rebekah was his cousin; afraid lest she should be violently taken from him, and his own life sacrificed to the lust of Abimelech, he represented her as his sister, employing a latitude of meaning which the word 'sister' admits in Oriental usage. The subterfuge was discovered, and is justified by Isaac on the grounds which prompted him to resort to it.

Another parallel event in the lives of Abraham and Isaac may be found by comparing together Gen. xxvi. 26, sq., and xxi. 22, sq. If these parallels should excite a doubt in the mind of any one as to the credibility of the narratives, let him carefully peruse them, and we think that the simplicity and naturalness which pervade and characterize them will effectually substantiate the reality of the recorded events, and explode the notion that fiction has had anything to do in bringing the narrative into its present shape.

Isaac, in his old age, was, by the practices of Rebekah and the art of Jacob, so imposed upon as to give his blessing to the younger son Jacob, instead of to the first-born Esau, and with that blessing to convey, as was usual, the right of headship in the family, together with his chief possessions. In the blessing which the aged patriarch pronounced on Jacob, it deserves notice how entirely the wished-for good is of an earthly and temporal nature, while the imagery which is employed serves to show the extent to which the poetical element prevailed as a constituent part of the Hebrew character (Gen. xxvii. 27, sq.). Most natural, too, is the extreme agitation of the poor blind old man, on discovering the cheat which had been put upon him:—'And Isaac trembled very exceedingly, and said (to Esau), Who? where is he that hath taken venison and brought it me, and I have eaten, and have blessed him? Yea, and he shall be blessed.' Equally natural is the reply of Esau. The entire passage is of itself enough to vindicate the historical character and entire credibility of those sketches of the lives of the patriarchs which Genesis presents.

The stealing, on the part of Jacob, of his father's blessing having angered Esau, who seems to have looked forward to Isaac's death as affording an opportunity for taking vengeance on his unjust brother, the aged patriarch is induced, at his wife's entreaty, to send Jacob into Mesopotamia, that, after his own example, his son might take a wife from amongst his kindred and people, 'of the daughters of Laban, thy mother's brother.'

This is the last important act recorded of

Isaac. Jacob having, agreeably to his father's command, married into Laban's family, returned, after some time, and found the old man at Mamre, in the city of Arbah, which is Hebron, where Abraham and Isaac sojourned. Here, 'being old and full of days' (180), Isaac 'gave up the ghost, and died, and was gathered unto his people, and his sons Esau and Jacob buried him' (Gen. xxxv. 27, sq.).

ISAIAH (*help of Jehovah*). The heading of this book places the prophet under the reigns of Uzziah, Jotham, Ahaz, and Hezekiah, kings of Judah; and an examination of the prophecies themselves, independently of the heading, leads us to the same chronological results. Chapter vi., in which is related the call of Isaiah, not to his prophetic office, but to a higher degree of it, is thus headed: 'In the year in which king Uzziah died I saw the Lord,' &c. The collection of prophecies is chronologically arranged, and the utterances in the preceding chapters (i. to vi.) belong to an earlier period, preceding the last year of the reign of Uzziah. These two prophecies contain the sum and substance of what Isaiah taught during twenty years of his life.

The continuation of prophetic authorship, or the writing down of uttered prophecies, depended upon the commencement of new historical developments, such as took place under the reigns of Ahaz and Hezekiah. Several prophecies in the seventh and following chapters belong to the reign of Ahaz; and most of the subsequent prophecies to the reign of Hezekiah. The prophetic ministry of Isaiah under Hezekiah is also described in an historical section contained in chapters xxxvi.-xxxix. The data which are contained in this section come down to the fifteenth year of the reign of Hezekiah; consequently we are in the possession of historical documents proving that the prophetic ministry of Isaiah was in operation during about forty-seven or fifty years, commencing in the year B.C. 763 or 759, and extending to the year A.C. 713. Of this period, from one to four years belong to the reign of Uzziah, sixteen to the reign of Jotham, sixteen to the reign of Ahaz, and fourteen to the reign of Hezekiah.

Some writers have advanced the opinion that Isaiah lived to a much later period, and that his life extended to the reign of Manasseh, the successor of Hezekiah. But their arguments will not stand a strict scrutiny. While, on the other hand, the inscription of the book itself shows that all the prophecies of Isaiah in our collection are included within the period from Uzziah to Hezekiah. Not one of the prophecies which are headed by an inscription of their own is placed after the fifteenth year of Hezekiah; and the internal evidence leads us in none beyond this period. Hence we infer that the prophetic ministry of Isaiah terminated soon after its fullest development, to which it attained during the period of the Assyrian invasion, in the reign of Hezekiah.

According to these statements, Isaiah belongs to the cycle of the most ancient prophets whose predictions have been preserved in writing. He was a contemporary of Hosea, Amos, and Jonah, although younger than those prophets, who belonged to the kingdom of Israel. He was likewise a contemporary and co-worker of the prophet

Micah in the kingdom of Judah. We infer also from the circumstance that the prophecies of Joel are inserted among the books of the minor prophets before those of Micah, that Isaiah must have been a contemporary of Joel, since the minor prophets are chronologically arranged.

Little is known respecting the circumstances of Isaiah's life. His father's name was Amoz. The fathers of the church confound him with the prophet Amos, because they were unacquainted with Hebrew, and in Greek the two names are spelled alike. The opinion of the Rabbins, that Isaiah was a brother of King Amaziah, rests also on a mere etymological combination. Isaiah resided at Jerusalem, not far from the temple. We learn from chapters vii. and viii. that he was married. Two of his sons are mentioned, Shear-jashub and Maher-shalal-hash-baz. (See the words). Isaiah calls his wife a *prophetess*. This indicates that his marriage-life was not in opposition to his vocation, and also that it not only went along with his vocation, but that it was intimately interwoven with it. This name cannot mean the wife of a prophet, but indicates that the prophetess of Isaiah had a prophetic gift, like Miriam, Deborah, and Huldah. The appellation here given denotes the genuineness of their conjugal relation.

Even the dress of the prophet was subservient to his vocation. According to chap. xx. 2, he wore a garment of hair-cloth or sackcloth. This seems also to have been the costume of Elijah, according to 2 Kings i. 8; and it was the dress of John the Baptist. Hairy sackcloth is in the Bible the symbol of repentance (compare Isa. xxii. 12, and 1 Kings xxi. 27). This costume of the prophets was a prophetic preaching by fact. The prophetic preacher comes forward in the form of personified repentance. What he does exhibits to the people what they should do. Before he has opened his lips his external appearance proclaims, *Repent*.

Besides the collection of prophecies which has been preserved to us, Isaiah also wrote two historical works, which did not originate from prophets.

The first of these was a biography of King Uzziah (comp. 2 Chron. xxvi. 22): 'Now the rest of the acts of Uzziah, first and last, did Isaiah the prophet, the son of Amoz, write.' The second historical work of Isaiah, was a biography of King Hezekiah, which was subsequently inserted in the annals of Judah and Israel. These annals consisted of a series of prophetic monographs, which were received partly entire, partly in abstracts, and are the chief source from which the information contained in the Chronicles is derived. In this work of Isaiah, although its contents were chiefly historical, numerous prophecies were inserted. Hence it is called in 2 Chron. xxxii. 32, *The Vision of Isaiah*. In a similar manner the biography of Solomon by Ahijah is called, in 2 Chron. ix. 29, 'the prophecy of Ahijah.' The two historical works of Isaiah were lost, together with the annals of Judah and Israel, into which they were embodied. Whatever these annals contained that was of importance for all ages, has been preserved to us by being received into the historical books of the Old Testament, and the predictions of the most distinguished prophets have been

formed into separate collections. After this was effected, less care was taken to preserve the more diffuse annals, which also comprehended many statements, of value only for particular times and places.

The Jewish synagogue, and the Christian church during all ages, have considered it as an undoubted fact that the prophecies which bear the name of Isaiah really originated from that prophet. But in the last quarter of the eighteenth century this prevailing conviction appeared to some divines to be inconvenient. In the theology of the natural man it passed as certain, that nature was complete in itself, and that prophecies, as well as miracles, never had occurred, and were even impossible. The assumption of the impossibility of miracles necessarily demanded that the genuineness of the Pentateuch should be rejected; and, in a similar manner, the assumption of the impossibility of prophecy demanded that a great portion of the prophecies of Isaiah should be rejected likewise. Here also the wish was father to the thought, and interest led to the decision of critical questions, the arguments for which were subsequently discovered. All those who attack the integral authenticity of Isaiah agree in considering the book to be an anthology, or gleanings of prophecies, collected after the Babylonian exile, although they differ in their opinions respecting the origin of this collection. Koppe gave gentle hints of this view, which was first explicitly supported by Eichhorn in his *Introduction*. Eichhorn advances the hypothesis that a collection of Isaian prophecies (which might have been augmented, even before the Babylonian exile, by several not genuine additions) formed the basis of the present anthology, and that the collectors, after the Babylonian Exile, considering that the scroll on which they were written did not form a volume proportionate to the size of the three other prophetic scrolls, containing Ezekiel, Jeremiah, and the minor prophets, annexed to the Isaian collection all other oracles at hand whose authors were not known to the editors. Gesenius, on the contrary, maintained, in his introduction to Isaiah, that all the non-Isaian prophecies extant in that book originated from one author and were of the same date. Umbreit and Küster on the main point follow Gesenius, considering chapters xl. to lxxvi. to be a continuous whole, written by a pseudo-Isaiah who lived about the termination of the Babylonian exile. In reference to other portions of the book of Isaiah, the authenticity of which has been questioned, Umbreit expresses himself doubtfully, and Küster assigns them to Isaiah. Gesenius declines to answer the question, how it happened that these portions were ascribed to Isaiah, but Hitzig felt that an answer to it might be expected. He accordingly attempts to explain why such additions were made to Isaiah and not to any of the other prophetic books, by the extraordinary veneration in which Isaiah was held. He says that the great authority of Isaiah occasioned important and distinguished prophecies to be placed in connection with his name. But he himself soon after destroys the force of this assertion by observing, that the great authority of Isaiah was especially owing to those prophecies which were falsely ascribed to him. A considerable degree of suspicion must, how-

ever, attach to the boasted certainty of such critical investigations, if we notice how widely these learned men differ in defining what is of Isaian origin and what is not, although they are all linked together by the same fundamental tendency and interest. There are very few portions in the whole collection whose authenticity has not been called in question by some one or other of the various impugnors. The only portions left to Isaiah are chaps. i. 3-9, xvii., xx., xxviii., xxxi., and xxxiii. All the other chapters are defended by some and rejected by others; they are also referred to widely different dates. In the most modern criticism, however, we observe an inclination again to extend the sphere of Isaian authenticity as much as the dogmatic principle and system of the critics will allow. Modern criticism is inclined to admit the genuineness of chaps. i. to xxiii., with the only exception of the two prophecies against Babylon in chaps. xiii. and xiv., and in chap. xxi. 1-10. Chaps. xxviii.-xxxiii. are allowed to be Isaian by Ewald, Umbreit, and others.

After this survey of the present state of the inquiry, we proceed to furnish, first, the external arguments for the integral authenticity of Isaiah.

1. The most ancient testimony in favour of Isaiah's being the author of all the portions of the collection which bears his name, is contained in the heading of the whole (i. 1), 'The vision of Isaiah the son of Amoz, which he saw concerning Judah and Jerusalem, in the days of Uzziah, Jotham, Ahaz, Hezekiah, kings of Judah.' It is here clearly stated that Isaiah was the author of the following prophecies, uttered during the reign of four successive kings. This inscription is of great importance, even if it originated not from Isaiah, but from a later compiler. If we adopt the latest date at which this compilation could have been made, we must fix it at the time of its reception into the canon in the days of Ezra and Nehemiah. Consequently the compiler could not be separated by many years from the pseudo-Isaiah who is said to have prophesied just before Babylon was conquered, or who, according to most critics, wrote even after the fall of Babylon. It is not credible that a compiler living so near the times of the author, should have erroneously ascribed these prophecies to Isaiah, who lived so much earlier, especially if we bear in mind that this so-called pseudo-Isaiah must have been a very remarkable person in an age so devoid of the prophetic spirit as that in which he is said to have lived.

It is still less credible that a pseudo-Isaiah should himself have fraudulently ascribed his prophecies to Isaiah. None of the adversaries of the authenticity of the book make such an assertion.

If the compiler lived before the Exile, the inscription appears to be of still greater importance. That the collection was made so early is very likely, from the circumstance that Jeremiah and other prophets apparently made use of the prophecies of Isaiah. This fact indicates that the prophecies of Isaiah early excited a lively interest, and that the compiler must have lived at a period earlier than that which is ascribed to the pseudo-Isaiah himself. From all this we infer that the compiler lived before the Exile. The adversaries themselves felt the weight of this

argument. They, therefore, attempted to remove it by various hypotheses, which received a semblance of probability from the circumstance that even the considerate Vitringa had called in question the authenticity of the heading. Vitringa conjectured that this heading belonged originally to the first chapter alone. He further conjectured that it originally contained only the words, *prophecy of Isaiah, the son of Amoz, which he saw concerning Judah and Jerusalem*. The following words, he says, were added by the compiler, who enlarged the particular inscription of the first chapter to a general one of the whole collection. According to Vitringa the inscription does not suit the whole book, the contents of which are not confined to Judah and Jerusalem alone. But Judah and Jerusalem are always the chief subject, and, in a certain sense, the only subject of these prophecies; and there is no prophecy concerning other nations without a bearing upon the covenant-people. No prophet against foreign nations prophesied concerning them with the view to spread his predictions among them, because the mission of all prophets was to Israel. The predictions against foreign nations are intended to preserve the covenant-people from despair, and to strengthen their faith in the omnipotence and justice of their God. It is their object to annihilate all reliance upon political combinations and human confederacies. They are intended to lead Israel to the question, 'If they do these things in the green tree, what shall be done in the dry?' But they are also designed to indicate the future conversion of the heathen, and to open to the view of the faithful the future glory of the kingdom of God, and its final victory over the kingdoms of this world; and thus to extirpate all narrow-minded nationality. God shall be revealed not only as Jehovah, but also as Elohim. His relation to Israel is misunderstood, if that relation is exclusively kept in view without any regard to the universe. Therefore the whole collection is justly entitled Prophecies concerning Judah and Jerusalem. No matter whether this inscription originated from Isaiah himself or from an ancient compiler.

The inscription in ch. i. has a general bearing upon the whole collection. Then follows the first portion, which contains, as it were, the general prophetic programme. Thereupon follows a series of prophecies directly bearing upon Judah and Jerusalem, commencing again with a particular heading (ii. 1). To this succeeds a series of prophecies indirectly bearing upon Judah and Jerusalem, but directly upon foreign nations. The first of this series has again its own heading (xiii. 1).

Gesenius, advancing in the direction to which Vitringa had pointed, although he grants the integral authenticity of ch. i. 1, nevertheless maintains that this heading belonged originally only to chs. i.-xii., in which were contained genuine prophecies of Isaiah. To this collection, he asserts, were afterwards subjoined the anthologies contained in the following chapters, and the heading was then misunderstood as applying to the whole volume. This opinion is more inconsistent than that of Vitringa, since there occur in the first twelve chapters two prophecies against foreign nations; one against the Assyrians, in ch. x., and another against Ephraim, in ch. ix.

Vitringa, Gesenius, and their followers, are also refuted by the parallel passage in the heading of Amos, 'The words of Amos, which he saw concerning Israel.' The prophecies of Amos in general are here said to be concerning Israel, although there are, as in Isaiah, several against foreign nations, a series of which stands even at the commencement of the book. To this we may add the similarity of the headings of other prophetic books. For instance, the commencement of Jeremiah, Hosea, Micah, and Zephaniah.

2. It cannot be proved that there ever existed any so-called prophetic anthology as has been supposed to exist in the book of Isaiah. We find nothing analogous in the whole range of prophetic literature. It is generally granted that the collections bearing the names of Jeremiah and Ezekiel contain only productions of those authors whose name they bear. In the book of the minor prophets, the property of each is strictly distinguished from the rest by headings. The authenticity of only the second portion of Zechariah has been attacked; and this with very feeble arguments, which have been refuted.

But even if it could be proved that the prophecies of Zechariah belonged to two different authors, namely, as Bertholdt and Gesenius suppose, to the two Zechariahs, each of whom happened to be the son of a Berechiah, this identity of names might be considered an inducement for uniting the productions of the two authors in one collection: still this case would not be analogous to what is asserted to be the fact in Isaiah. In Isaiah it is alleged not only that a series of chapters belonging to a different author were subjoined, commencing about chap. xxxiv.; but it is affirmed that, even in the first thirty-three chapters, the genuine and spurious portions are intermixed. Before we admit that the compilers proceeded here in a manner so unreasonable and so contrary to their usual custom, we must expect some cogent proof to be adduced; but instead of this, nothing but bald conjecture and feeble illustrations have been offered.

3. According to the opinion of several critics, all the spurious portions of Isaiah belong to one and the same author. But it so happens that the portion which is most emphatically declared to be spurious, namely, chaps. xiii. and xiv., bear an inscription which expressly ascribes them to Isaiah. Now, as the internal arguments against the authenticity of all the portions which are said to be spurious are nearly identical, if the opposition to chaps. xiii. and xiv. is given up, it cannot with consistency be maintained against the other portions. This argument serves also as an answer to those who ascribe the portions which they consider spurious to several authors. The contents of these portions are similar. They contain predictions of the fall of Babylon, and of the redemption of Israel from captivity. Whatever proves the genuineness of one of these portions, indirectly proves the others also to be genuine.

4. According to Josephus (*Antiq.* xi. c. 1, § 1, 2), Cyrus was induced by the prophecies of Isaiah respecting him to allow the return of the Jews, and to aid them in rebuilding the temple. The credibility of Josephus, who in regard to facts of ancient history is not always to be relied upon, is here supported by two circumstances. First, the favour shown by Cyrus to the Jews,

which remains inexplicable except by the fact mentioned, in combination with the influence of Daniel. In modern times, the favour of Cyrus to the Jews has been called a prudential measure; but it does not appear what he could either hope or fear from a people so enfeebled as the Jews were at that period. It has been added that Cyrus was favourable to the Jews on account of the similarity between the Persian and the Jewish religion; but there is no historical proof that the Persians, on any other occasion, favoured the Jews on account of their religion. The favours shown to Nehemiah on behalf of Israel were only personal favours, owing to his position at the Persian court. We allow that all this would be insufficient to prove the correctness of the above statement in Josephus, but it must render us inclined to admit its truth.

The second argument is much stronger: it is, that the statement of Josephus is supported by the edict of Cyrus (*Ezra* i.). This edict presupposes the fact related by Josephus, so that Jahn calls the passage in Josephus a commentary on the first chapter of *Ezra*, in which we read that Cyrus announces in his edict that he was commanded by Jehovah to build him a temple in Jerusalem, and that he received all the conquered kingdoms of the earth as a gift from Jehovah. This cannot refer to any other predictions of the prophet, but only to what are called the spurious portions of Isaiah, in which the Lord grants to Cyrus all his future conquests, and appoints him to be the restorer of his temple (*comp.* xli. 2-4; xlv. 24-28; xlv. 1-13; xlv. 11; xlviii. 13-15). The edict adopts almost the words of these passages. In reply to this, our adversaries assert that Cyrus was deceived by pseudo-prophecies forged in the name of Isaiah; but if Cyrus could be deceived in so clumsy a manner, he was not the man that history represents him; and to have committed forgery is so contrary to what was to be expected from the author of chaps. xl-lxvi., that even the feelings of our opponents revolt at the supposition that the pseudo-Isaiah should have forged prophecies after the event in the name of the prophets.

5. Again, the most ancient production of Jewish literature after the completion of the canon, furnishes proof of the integral authenticity of Isaiah. The book of Jesus Sirach, commonly called *Ecclesiasticus*, was written as early as the third century before Christ, as Ilug has clearly demonstrated, in opposition to those who place it in the second century before Christ. In *Ecclesiasticus* xlviii. 22-25, Isaiah is thus praised: 'For Hezekiah had done the thing that pleased the Lord, and was strong in the ways of David his father, as Isaiah the prophet, who was great and faithful in his vision, had commanded him. In his time the sun went backward, and he lengthened the king's life. He saw by an excellent spirit what should come to pass at the last, and he comforted them that mourned in Sion. He showed what should come to pass for ever, and secret things or ever they came.'

This commendation especially refers, as even Gesenius grants, to the disputed portions of the prophet, in which we find predictions of the most distant futurity. The comfort for Zion is found more particularly in the second part of Isaiah, which begins with the words 'Comfort

ye, comfort ye my people.' The author of this second part himself says (xlviii. 3), 'I have declared the former things from the beginning; and they went forth out of my mouth, and I showed them.' Thus we perceive that Jesus Sirach, the learned scribe, confidently attributes the debated passages to Isaiah in such a manner as plainly indicates that there was no doubt in his days respecting the integral authenticity of that book, which has the testimony of historical tradition in its favour. Jesus Sirach declares his intention (Ecclus. xlv. 1.) to praise the most celebrated men of his nation. The whole tenor of these chapters shows that he does not confine himself to celebrated authors. We therefore say that the praise which he bestows upon Isaiah is not intended for the book personified, but for the person of the prophet. If Jesus Sirach had entertained doubts respecting the genuineness of those prophecies on which, in particular, he bases his praise, he could not have so lauded the prophet.

In the Jewish synagogue the integral authenticity of Isaiah has always been recognised. This general recognition cannot be accounted for except by the power of tradition based upon truth; and it is supported as well by the New Testament, in which Isaiah is quoted as the author of the whole collection which bears his name, as also by the express testimony of Josephus, especially in his *Antiquities* (x. 2. 2, and xi. 1. 1). After such confirmation it would be superfluous to mention the Talmudists.

Thus we have seen that we possess a series of external arguments in favour of the integral authenticity of Isaiah. Each of these arguments is of importance, and, in their combination, they have a weight which could only be counterbalanced by insurmountable difficulties in the contents of these prophecies; and it has been clearly shown that there are no such difficulties, and that the internal arguments unite with the external in demonstrating the authenticity of Isaiah as a whole.

No definite account respecting the method pursued in collecting into books the utterances of the Prophets has been handed down to us. Concerning Isaiah, as well as the rest, these accounts are wanting. We do not even know whether he collected his prophecies himself. But we have no decisive argument against this opinion. The argument of Kleinert, in his above-mentioned work (p. 112), is of slight importance. He says, If Isaiah himself had collected his prophecies, there would not be wanting some which are not to be found in the existing book. To this we reply that it can by no means be proved, with any degree of probability, that a single prophecy of Isaiah has been lost, the preservation of which would have been of importance to posterity, and which Isaiah himself would have deemed it necessary to preserve. Kleinert appeals to the fact that there is no prophecy in our collection which can with certainty be ascribed to the days of Jotham; and he thinks it incredible that the prophet, soon after having been consecrated to his office, should have passed full sixteen years without any revelation from God. This, certainly, is unlikely; but it is by no means unlikely that during this time he uttered no prophecy which he thought proper to pre-

serve. Nay, it appears very probable, if we compare the rather general character of chapters i.-v., the contents of which would apply to the days of Jotham also, since during his reign no considerable changes took place; consequently the prophetic utterances moved in the same sphere with those preserved to us from the reign of Uzziah. Hence it was natural that Isaiah should confine himself to the communication of some important prophetic addresses, which might as well represent the days of Jotham as those of the preceding reign. We must not too closely identify the utterances of the prophets with their writings. Many prophets have spoken much and written nothing. The minor prophets were generally content to write down the quintessence alone of their numerous utterances. Jeremiah likewise, of his numerous addresses under Josiah, gives us only what was most essential.

To us it seems impossible that Isaiah left it to others to collect his prophecies into a volume, because we know that he was the author of historical works; and it is not likely that a man accustomed to literary occupation would have left to others to do what he could do much better himself.

Hitzig has of late recognised Isaiah as the collector and arranger of his own prophecies. But he supposes that a number of pieces were inserted at a later period. The chronological arrangement of these prophecies is a strong argument in favour of the opinion that Isaiah himself formed them into a volume. There is no deviation from this arrangement, except in a few instances where prophecies of similar contents are placed together; but there is no interruption which might appear attributable to either accident or ignorance. There is not a single piece in this collection which can satisfactorily be shown to belong to another place. All the portions, the date of which can be ascertained either by external or internal reasons, stand in the right place. This is generally granted with respect to the first twelve chapters, although many persons erroneously maintain that ch. vi. should stand at the beginning.

Chaps. i.-v. belong to the later years of Uzziah; chap. vi. to the year of his death. What follows next, up to chap. x. 4, belongs to the reign of Ahaz. Chaps. x.-xii. is the first portion appertaining to the reign of Hezekiah. Then follows a series of prophecies against foreign nations, in which, according to the opinions of many, the chronological arrangement has been departed from, and, instead of it, an arrangement according to contents has been adopted. But this is not the case. The predictions against foreign nations are also in their right chronological place. They all belong to the reign of Hezekiah, and are placed together because, according to their dates, they belong to the same period. In the days of Hezekiah the nations of Western Asia, dwelling on the banks of the Euphrates and Tigris, more and more resembled a threatening tempest. That the prophecies against foreign nations belong to this period is indicated by the home-prophecy in ch. xxii., which stands among the foreign prophecies. The assertion that the first twelve chapters are a collection of home-prophecies is likewise refuted by the fact that there occur in these chapters two foreign prophecies. The prophetic gift of Isaiah

was more fully unfolded in sight of the Assyrian invasion under the reign of Hezekiah. Isaiah, in a series of visions, describes what Assyria would do, as a chastising rod in the hand of the Lord, and what the successors of the Assyrians, the Chaldees, would perform, according to the decree of God, in order to realise divine justice on earth, as well among Israel as among the heathen. The prophet shows that mercy is hidden behind the clouds of wrath. There is no argument to prove that the great prophetic picture in chaps. xxiv.-xxvii. was not depicted under Hezekiah. Chaps. xxviii.-xxxiii. manifestly belong to the same reign, but somewhat later than the time in which chaps. x., xi., xii. were written. They were composed about the time when the result of the war against the Assyrians was decided. With the termination of this war terminated also the public life of Isaiah, who added an historical section in chaps. xxxvi.-xxxix., in order to facilitate the right understanding of the prophecies uttered by him during the most fertile period of his prophetic ministry. Then follows the conclusion of his work on earth. The second part, which contains his prophetic legacy, is addressed to the small congregation of the faithful, strictly so called. This part is analogous to the last speeches of Moses in the fields of Moab, and to the last speeches of Christ in the circle of his disciples, related by John. Thus we have everywhere order, and such an order as could scarcely have proceeded from any one but the author.

It was not the vocation of the prophets to change anything in the religious constitution of Moses, which had been introduced by divine authority; and they were not called upon to substitute anything new in its place. They had only to point out the new covenant to be introduced by the Redeemer, and to prepare the minds of men for the reception of it. They themselves in all their doings were subject to the law of Moses. They were destined to be extraordinary ambassadors of God, whose reign in Israel was not a mere name, not a mere shadow of earthly royalty, but rather its substance and essence. They were to maintain the government of God, by punishing all, both high and low, who manifested contempt of the Lawgiver by offending against his laws. It was especially their vocation to counteract the very ancient delusion, according to which an external observance of rites was deemed sufficient to satisfy God. This opinion is contrary to many passages of the law itself, which admonish men to circumcise the heart, and represent the sum of the entire law as consisting in loving God with the whole heart; which make salvation to depend upon being internally turned towards God, and which condemn not only the evil deed, but also the wicked desire. The law had, however, at the first assumed a form corresponding to the wants of the Israelites, and in accordance with the symbolical spirit of antiquity. But when this form, which was destined to be the living organ of the Spirit, was changed into a corpse by those who were themselves spiritually dead, it offered a point of coalescence for the error of those who contented themselves with external observances.

The prophets had also to oppose the delusion of those who looked upon the election of the people of God as a preservative against the divine judgments; who supposed that their descent from the

patriarchs, with whom God had made a covenant, was an equivalent for the sanctification which they wanted. Even Moses had strongly opposed this delusion; for instance, in Lev. xxvi. and Deut. xxxii. David also, in the Psalms, as in xv. and xxiv., endeavours to counteract this error, which again and again sprang up. It was the vocation of the prophets to insist upon genuine piety, and to show that a true attachment to the Lord necessarily manifests itself by obedience to his precepts; that this obedience would lead to happiness, and disobedience to misfortune and distress. The prophets were appointed to comfort the faint-hearted, by announcing to them the succour of God, and to bring glad tidings to the faithful, in order to strengthen their fidelity. They were commissioned to invite the rebellious to return, by pointing out to them future salvation, and by teaching them that without conversion they could not be partakers of salvation; and in order that their admonitions and rebukes, their consolations and awakenings, might gain more attention, it was granted to them to behold futurity, and to foresee the blessings and judgments which would ultimately find their full accomplishment in the days of Messiah. In Deut. xviii. 18, where the Lord says, 'I will raise them up a prophet from among their brethren like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him,' we have a description of the prophetic calling, and also a statement of the contents of the prophecies of Isaiah. He refers expressly in many places to the basis of the ancient covenant, that is, to the law of Moses; for instance, in viii. 16, 20, and xxx. 9, 10. In many other passages his utterance rests on the same basis, although he does not expressly state it. All his utterances are interwoven with references to the law. It is of importance to examine at least one chapter closely, in order to understand how prophecies are related to the law. Let us take as an example the first. The beginning, 'Hear, O heavens, and give ear, O earth,' is taken from Deut. xxxii. Thus the prophet points out that his prophecies are a commentary upon the Magna Charta of prophetism contained in the books of Moses. During the prosperous condition of the state under Uzziah and Jotham, luxury and immorality had sprung up. The impiety of Ahaz had exercised the worst influence upon the whole people. Great part of the nation had forsaken the religion of their fathers and embraced gross idolatry; and a great number of those who worshipped God externally had forsaken Him in their hearts. The divine judgments were approaching. The rising power of Assyria was appointed to be the instrument of divine justice. Among the people of God internal demoralisation was always the forerunner of outward calamity. This position of affairs demanded an energetic intervention of prophetism. Without prophetism the number of the elect would have been constantly decreasing, and even the judgments of the Lord, if prophetism had not furnished their interpretation, would have been mere facts, which would have missed their aim, and, in many instances, might have had as effect opposite to that which was intended, because punishment which is not recognised to be punishment, necessarily leads away from God.

The prophet attacks the distress of his nation, not at the surface, but at the root, by rebuking the prevailing corruption. Pride and arrogance appear to him to be the chief roots of all sins.

He inculcates again and again not to rely upon the creature, but upon the Creator, from whom all temporal and spiritual help proceeds; that in order to attain salvation, we should despair of our own and all human power, and rely upon God. He opposes those who expected help through foreign alliances with powerful neighbouring nations against foreign enemies of the state.

The people of God have only one enemy, and one ally, that is, God. It is foolish to seek for aid on earth against the power of heaven, and to fear man if God is our friend. The panacea against all distress and danger is true conversion. The politics of the prophets consist only in pointing out this remedy. The prophet connects with his rebuke and with his admonition, his threatenings of divine judgment upon the stiff-necked. These judgments are to be executed by the invasion of the Syrians, the oppression of the Assyrians, the Babylonian exile, and by the great final separation in the times of the Messiah. The idea which is the basis of all these threatenings, is pronounced even in the Pentateuch (Lev. x. 3), 'I will be sanctified in them that come nigh me, and before all the people I will be glorified'; and also in the words of Amos (iii. 2), 'You only have I known of all the families of the earth; therefore I will punish you for all your iniquities.' That is, if the people do not voluntarily glorify God, He glorifies Himself against them. Partly in order to recall the rebellions to obedience, partly to comfort the faithful, the prophet opens a prospect of those blessings which the faithful portion of the covenant people shall inherit. In almost all prophetic utterances, we find in regular succession three elements—rebuke, threatening, and promise. The prophecies concerning the destruction of powerful neighbouring states, partly belong, as we have shown, to the promises, because they are intended to prevent despair, which, as well as false security, is a most dangerous hindrance to conversion.

In the direct promises of deliverance the purpose to comfort is still more evident. This deliverance refers either to burdens which pressed upon the people in the days of the prophet, or to burdens to come, which were already announced by the prophet; such, for instance, were the oppressions of the Syrians, the Assyrians, and finally, of the Chaldeans.

The proclamation of the Messiah is the inexhaustible source of consolation among the prophets. In Isaiah this consolation is so clear that some fathers of the church were inclined to style him rather *evangelist* than prophet.

Isaiah, however, was not the first who attained to a knowledge of the personality of Messiah. Isaiah's vocation was to render the knowledge of this personality clearer and more definite, and to render it more efficacious upon the souls of the elect by giving it a greater individuality. The person of the Redeemer is mentioned even in Gen. xlix. 10, 'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh (*the tranquilliser*) come; and unto Him shall the gathering of the people be' (i. e. *Him shall the nations obey*). The personality of

Messiah occurs also in several psalms which were written before the times of Isaiah; for instance, in the 2nd and 110th, by David; in the 45th, by the sons of Korah; in the 72nd, by Solomon. Isaiah has especially developed the perception of the prophetic and the priestly office of the Redeemer, while in the earlier annunciations of the Messiah the royal office is more prominent; although in Psalm cx. the priestly office also is pointed out. Of the two states of Christ, Isaiah has expressly described that of the exanimation of the suffering Christ, while, before him, his state of glory was made more prominent. In the Psalms the inseparable connection between justice and suffering, from which the doctrine of a suffering Messiah necessarily results, is not expressly applied to the Messiah. We must not say that Isaiah first perceived that the Messiah was to suffer, but we must grant that this knowledge was in him more vivid than in any earlier writer; and that this knowledge was first shown by Isaiah to be an integral portion of Old Testament doctrine.

The following are the outlines of Messianic prophecies in the book of Isaiah:—A scion of David, springing from his family, after it has fallen into a very low estate, but being also of divine nature, shall, at first in lowliness, but as a prophet filled with the Spirit of God, proclaim the divine doctrine, develop the law in truth, and render it the animating principle of national life; he shall, as high-priest, by his vicarious suffering and his death, remove the guilt of his nation, and that of other nations, and finally rule as a mighty king, not only over the covenant-people, but over all nations of the earth who will subject themselves to his peaceful sceptre, not by violent compulsion, but induced by love and gratitude. He will make both the moral and the physical consequences of sin to cease; the whole earth shall be filled with the knowledge of the Lord, and all enmity, hatred, and destruction shall be removed even from the brute creation. This is the survey of the Messianic preaching by Isaiah, of which he constantly renders prominent those portions which were most calculated to impress the people under the then existing circumstances. The first part of Isaiah is directed to the whole people, consequently the glory of the Messiah is here dwelt upon. The fear lest the kingdom of God should be overwhelmed by the power of heathen nations, is removed by pointing out the glorious king to come, who would elevate the now despised and apparently mean kingdom of God above all the kingdoms of this world. In the second part, which is more particularly addressed to the elect, than to the whole nation, the prophet exhibits the Messiah more as a divine teacher and high-priest. The prophet here preaches righteousness through the blood of the servant of God, who will support the weakness of sinners and take upon Himself their sorrows.

We may show, by an example, in chap. xix. 18-25, that the views of futurity which were granted to Isaiah were great and comprehensive, and that the Spirit of God raised him above all narrow-minded nationality. It is there stated that a time should come when all the heathen, subdued by the judgments of the Lord, should be converted to him, and being placed on an

equality with Israel, with equal laws, would equally partake of the kingdom of God, and form a brotherly alliance for his worship. Not the whole mass of Israel is destined, according to Isaiah, to future salvation, but only the small number of the converted. This truth he announces most definitely in the sketch of his prophecies contained in chapter vi.

Isaiah describes with equal vivacity the divine justice which punishes the sins of the nation with inexorable severity. Holy, holy, holy, is the Lord of Sataoth, is the key-note of his prophecies. He describes also the divine mercy and covenant-fidelity, by which there is always preserved a remnant among the people: to them punishment itself is a means of salvation, so that life everywhere proceeds from death, and the conflagration itself is led to full victory and glory.

Isaiah saw the moral and religious degradation of his people, and also its external distress, both then present and to come (chap. vi.). But this did not break his courage; he confidently expected a better futurity, and raised himself in God above all that is visible. Isaiah is not afraid when the whole nation and its king tremble. Of this we see a remarkable instance in chapter vii., and another in the time of the Assyrian invasion under Hezekiah, during which the courage of his faith rendered him the saviour of the commonwealth, and the originator of that great religious revival which followed the preservation of the state. The faith of the king and of the people was roused by that of Isaiah.

Isaiah stands pre-eminent above all other prophets, as well in the contents and spirit of his predictions, as also in their form and style. Simplicity, clearness, sublimity, and freshness, are the never-failing characters of his prophecies. Even Eichhorn mentions, among the first merits of Isaiah, the concinnity of his expressions, the beautiful outline of his images, and the fine execution of his speeches. In reference to richness of imagery he stands between Jeremiah and Ezekiel. Symbolic actions, which frequently occur in Jeremiah and Ezekiel, seldom occur in Isaiah. The same is the case with visions, strictly so called, of which there is only one, namely, that in chapter vi.; and even it is distinguished by its simplicity and clearness above that of the later prophets. But one characteristic of Isaiah is, that he likes to give signs—that is, a fact then present, or near at hand—as a pledge for the more distant futurity; and that he thus supports the feebleness of man (comp. vii. 20; xxxvii. 30; xxxviii. 7, seq.). The instances in chapters vii. and xxxviii. show how much he was convinced of his vocation, and in what intimacy he lived with the Lord, by whose assistance alone he could effect what he offers to do in the one passage, and what he grants in the other. The spiritual riches of the prophet are seen in the variety of his style, which always befits the subject. When he rebukes and threatens, it is like a storm, and when he comforts, his language is as tender and mild as (to use his own words) that of a mother comforting her son. With regard to style, Isaiah is comprehensive, and the other prophets divide his riches.

Isaiah enjoyed an authority proportionate to his gifts. We learn from history how great this

authority was during his life, especially under the reign of Hezekiah. Several of his most definite prophecies were fulfilled while he was yet alive; for instance, the overthrow of the kingdoms of Syria and Israel; the invasion of the Assyrians, and the divine deliverance from it; the prolongation of life granted to Hezekiah; and several predictions against foreign nations. Isaiah is honourably mentioned in the historical books. The later prophets, especially Nahum, Habakkuk, Zephaniah, Jeremiah, Haggai, Zechariah, and Malachi, clearly prove that his book was diligently read, and that his prophecies were attentively studied.

The authority of the prophet greatly increased after the fulfilment of his prophecies by the Babylonian exile, the victories of Cyrus, and the deliverance of the covenant-people. Even Cyrus (according to the above-mentioned account in Josephus, *Antiq.* xi. 1. § 1, 2) was induced to set the Jews at liberty by the prophecies of Isaiah concerning himself. This prediction of Isaiah made so deep an impression upon him that he probably took from it the name by which he is generally known in history. Jesus Sirach (xlviii. 22-25) bestows splendid praise upon Isaiah, and both Philo and Josephus speak of him with great veneration. He attained the highest degree of authority after the times of the New Testament had proved the most important part of his prophecies, namely, the Messianic, to be divine. Christ and the Apostles quote no prophecies so frequently as those of Isaiah, in order to prove that He who had appeared was one and the same with Him who had been promised. The fathers of the church abound in praises of Isaiah.

ISH'BI, or ISHBI-BENOB. [GIANTS.]

ISH-BOSHETH (*man of shame*), a son of king Saul, and the only one who survived him. In 1 Chron. viii. 33, and ix. 39, this name is given as *Eshbaal*. Baal was the name of an idol, accounted abominable by the Hebrews, and which scrupulous persons avoided pronouncing, using the word *bosheth*, 'shame' or 'vanity,' instead. This explains why the name Eshbaal is substituted for Ish-bosheth, Jerubbaal for Jerubesheth (comp. Judg. viii. 35 with 2 Sam. xi. 21), and Merib-baal for Mephibosheth (comp. 2 Sam. iv. 4 with 1 Chron. viii. 34 and ix. 40). Ish-bosheth was not present in the disastrous battle at Gilboa, in which his father and brothers perished; and, too feeble of himself to seize the sceptre which had fallen from the hands of Saul, he owed the crown entirely to his uncle Abner, who conducted him to Mahanaim, beyond the Jordan, where he was recognised as king by ten of the twelve tribes. He reigned seven, or, as some will have it, two years—if a power so uncertain as his can be called a reign. Even the semblance of authority which he possessed he owed to the will and influence of Abner, who himself kept the real substance in his own hands. A sharp quarrel between them led at last to the ruin of Ish-bosheth. Although accustomed to tremble before Abner, even his meek temper was roused to resentment by the discovery that Abner had invaded the harem of his late father Saul, which was in a peculiar manner sacred under his care as a son and a king. By this act Abner exposed the king to public contempt; if it did not indeed leave himself open to the suspicion of

intending to advance a claim to the crown on his own behalf. Abner highly resented the rebuke of Ish-bosheth, and from that time contemplated uniting all the tribes under the sceptre of David. Ish-bosheth, however, reverted to his ordinary timidity of character. At the first demand of David, he restored to him his sister Michal, who had been given in marriage to the son of Jesse by Saul, and had afterwards been taken from him and bestowed upon another. It is, perhaps, right to attribute this act to his weakness; although, as David allows that he was a righteous man, it may have been owing to his sense of justice. On the death of Abner Ish-bosheth lost all heart and hope, and perished miserably, being murdered in his own palace, while he took his mid-day sleep, by two of his officers, Baanah and Rechab. They sped with his head to David, expecting a great reward for their deed; but the monarch—as both right feeling and good policy required—testified the utmost horror and concern. He slew the murderers, and placed the head of Ish-bosheth with due respect in the sepulchre of Abner, B.C. 1048 (2 Sam. ii. 8-11; iii. 6-39; iv.).

1. *ISHMAEL (heard of God)*, Abraham's eldest son, born to him by Hagar; the circumstances of whose birth, early history, and final expulsion from his father's tents, are related in the articles *ABRAHAM*, *HAGAR* [see also *ISAAC*, *INHERITANCE*]. He afterwards made the desert into which he had been cast his abode, and by attaching himself to, and acquiring influence over, the native tribes, rose to great authority and influence. It would seem to have been the original intention of his mother to have returned to Egypt, to which country she belonged; but this being prevented, she was content to obtain for her son wives from thence. Although their lots were cast apart, it does not appear that any serious alienation existed between Ishmael and Isaac; for we read that they both joined in the sepulchral rites of their father Abraham (Gen. xxv. 9). This fact has not been noticed as it deserves. It is full of suggestive matter. As funerals in the East take place almost immediately after death, it is evident that Ishmael must have been called from the desert to the death-bed of his father; which implies that relations of kindness and respect had been kept up, although the brevity of the sacred narrative prevents any special notice of this circumstance. Ishmael had probably long before received an endowment from his father's property, similar to that which had been bestowed upon the sons of Keturah (Gen. xxv. 6). Nothing more is recorded of him than that he died at the age of 137 years, and was the father of twelve sons, who gave their names to as many tribes (Gen. xvii. 20; xxv. 13). He had also two daughters, one of whom became the wife of Esau.

It has been shown, in the article *ARABIA*, that Ishmael has no claim to the honour, which is usually assigned to him, of being the founder of the Arabian nation. That nation existed before he was born. He merely joined it, and adopted its habits of life and character; and the tribes which sprung from him formed eventually an important section of the tribes of which it was composed. The celebrated prophecy which describes the habits of life which he, and in him

his descendants, would follow, is therefore to be regarded not as describing habits which he would first establish, but such as he would adopt. The description is contained in the address of the angel to Hagar, when, before the birth of Ishmael, she fled from the tents of Abraham:—'Behold, thou art with child, and shalt bear a son, and shalt call his name Ishmael (*God hears*), because the Lord hath heard thine affliction. And he shall be a wild man; his hand shall be against every man, and every man's hand against him, and he shall dwell in the presence of all his brethren' (Gen. xvi. 11, 12). This means, in short, that he and his descendants should lead the life of the Bedouins of the Arabian deserts; and how graphically this description portrays their habits, may be seen in the article *ARABIA*, in the notes on these verses in the 'Pictorial Bible,' and in the works of Niebuhr, Barckhardt, Lane, &c.; and, more particularly, in the Arabian romance of Antur, which presents the most perfect picture of real Bedouin manners now in existence. The last clause, 'He shall dwell in the presence of all his brethren,' is pointedly alluded to in the brief notice of his death, which states that 'he died in the presence of all his brethren' (Gen. xxxv. 18). Of this expression various explanations have been given, but the plainest is the most probable: which is, that Ishmael and the tribes springing from him should always be located near the kindred tribes descended from Abraham.

2. *ISHMAEL*, a prince of the royal line of Judah, who found refuge among the Ammonites from the ruin which involved his family and nation. After the Chaldeans had departed he returned, and treacherously slew the too-confiding Gedaliah, who had been made governor of the miserable remnant left in the land (*GEDALIAH*). Much more slaughter followed this, and Ishmael, with many people of consideration as captives, hastened to return to the Ammonites. But he was overtaken near the pool of Gibeon, by Johanan, a friend of Gedaliah, and was compelled to abandon his prey and escape for his life, with only eight attendants, to Baalis, king of the Ammonites, with whom he appears to have had a secret understanding in these transactions: B.C. 588 (Jer. xli.).

ISLE, ISLAND. These words occur in the Scriptures in the three following senses. First, that of dry land in opposition to water; as 'I will make the rivers islands' (Isa. xlii. 15). In Isa. xx. 6, the Isle of Ashdod means the country, and is so rendered in the margin. In Isa. xxiii. 2, 6, 'the isle' means the country of Tyre, and in Ezek. xxvii. 6, 7, that of Chittim and Elisha. (See also Job xxii. 30.) Secondly, it is used both in Hebrew and English, according to its geographical meaning, for a country surrounded by water, as in Jer. xlvii. 4, 'the isle (margin) of Caphtor,' which is probably that of Cyprus. 'The isles of the sea' (Ezek. x. 1) are evidently put in opposition to 'the land,' or continent. In Ps. xcvi. 1, 'the multitude of the isles' seem distinguished from the earth or continents, and are evidently added to complete the description of the whole world. Thirdly: the word is used by the Hebrews to designate all those countries divided from them by the sea. In Isa. xi. 11, after an enumeration of countries lying on their own

continent, the words 'and the islands of the sea' are added in order to comprehend those situate beyond the ocean. The following are additional instances of this usage of the word, which is of very frequent occurrence (Isa. xlii. 10; lix. 18; lxvi. 19; Jer. xxv. 22; Ezek. xxvii. 3, 15; Zeph. ii. 11). It is observed by Sir I. Newton (*On Daniel*, p. 276), 'By the earth the Jews understood the great continent of all Asia and Africa, to which they had access by land; and by the isles of the sea they understood the places to which they sailed by sea, particularly all Europe.'

ISRAEL is the sacred and divinely bestowed name of the patriarch Jacob, and is explained to mean, 'A prince with God.' Although, as applied to Jacob personally, it is an honourable or poetical appellation, it is the common prose name of his descendants; while, on the contrary, the title Jacob is given to them only in poetry.

The separation of the Hebrew nation into two parts, of which one was to embrace ten of the tribes, and be distinctively named Israel, had its origin in the early power and ambition of the tribe of Ephraim. The rivalry of Ephraim and Judah began almost from the first conquest of the land; nor is it insignificant, that as Caleb belonged to the tribe of Judah, so did Joshua to that of Ephraim. From the very beginning Judah learned to act by itself; but the central position of Ephraim, with its fruitful and ample soil, and the long-continued authority of Joshua, must have taught most of the tribes west of the Jordan to look up to Ephraim as their head; and a still more important superiority was conferred on the same tribe by the fixed dwelling of the ark at Shiloh for so many generations (Josh. xviii. &c.). Judah could boast of Hebron, Machpelah, Bethlehem, names of traditional sanctity; yet so could Ephraim point to Shechem, the ancient abode of Jacob; and while Judah, being on the frontier, was more exposed to the attack of the powerful Philistines, Ephraim had to fear only those Canaanites from within who were not subdued or conciliated. The haughty behaviour of the Ephraimites towards Gideon, a man of Manasseh (Judg. viii. 1), sufficiently indicates the pretensions they made. Still fiercer language towards Jephthah the Gileadite (Jud. xii. 1) was retorted by less gentleness than Gideon had shown; and a bloody civil war was the result, in which their pride met with a severe punishment. This may in part explain their quiet submission, not only to the priestly rule of Eli and his sons, who had their centre of authority at Shiloh, but to Samuel, whose administration issued from three towns of Benjamin. Of course his prophetic character and personal excellence eminently contributed to this result; and it may seem that Ephraim, as well as all Israel besides, became habituated to the predominance of Benjamin, so that no serious resistance was made to the supremacy of Saul. At his death a new schism took place through their jealousy of Judah; yet in a few years' time, by the splendour of David's victories, and afterwards by Solomon's peaceful power, a permanent national union might seem to have been effected. But the laws of inheritance in Israel, excellent as they were for preventing permanent alienation of landed property, and the degrada-

tion of the Hebrew poor into predial slaves, necessarily impeded the perfect fusion of the tribes, by discouraging intermarriage, and hindering the union of distant estates in the same hands. Hence, when the sway of Solomon began to be felt as a tyranny, the old jealousies of the tribes revived, and Jeroboam, an Ephraimite (1 Kings xi. 26), being suspected of treason, fled to Shishak, king of Egypt. The death of Solomon was followed by a defection of ten of the tribes, which established the separation of *Israel* from *Judah* (B.C. 975).

This was the most important event which had befallen the Hebrew nation since their conquest of Canaan. The chief territory and population were now with Jeroboam, but the religious sanction, the legitimate descent, lay with the rival monarch. From the political danger of allowing the ten tribes to go up to the sanctuary of Jerusalem, the princes of *Israel*, as it were in self-defence, set up a sanctuary of their own; and the intimacy of Jeroboam with the king of Egypt may have determined his preference for the form of idolatry (the calves) which he established at Dan and Bethel. In whatever else his successors differed, they one and all agreed in upholding this worship, which, once established, appeared essential to their national unity. Nevertheless it is generally understood to have been a worship of Jehovah, though under unlawful and degrading forms. Worse by far was the worship of Baal, which came in under one monarch only, Ahab, and was destroyed after his son was slain, by Jehu. A secondary result of the revolution was the ejection of the tribe of Levi from their lands and cities in Israel; at least, such as remained were spiritually degraded by the compliances required, and could no longer offer any resistance to the kingly power by aid of their sacred character. When the priestly tribe had thus lost independence, it lost also the power to assist the crown. The succession of Jeroboam's family was hallowed by no religious blessing; and when his son was murdered, no Jehoiaada was found to rally his supporters and ultimately avenge his cause. The example of successful usurpation was so often followed by the captains of the armies, that the kings in Israel present to us an irregular series of dynasties, with several short and tumultuous reigns. This was one cause of disorder and weakness to Israel, and hindered it from swallowing up Judah: another was found in the relations of Israel towards foreign powers, which will presently be dwelt upon.

With regard to chronology, the following scheme agrees with Winer in its total range, but has minor changes by a single unit in some of the kings:—

	B.C.	
Rehoboam . . .	975	Jeroboam.
Abijah . . .	957	
Asa . . .	955	
	954	Nadab
	952	Baasha.
	929	Elah.
	928	Zimri, Omri.
	917	Ahab.
Jehoshaphat . . .	914	
	897	Ahaziah.
	896	Jehoram.
Jehoram . . .	889	

Ahaziah . . .	a.c. 885	
Queen Athaliah .	884	Jehu
Jehoash . . .	878	
	855	Jehoahaz.
	840	Jehoash.
Amaziah . . .	838	
	824	Jeroboam II.
Uzziah . . .	809	
	772	Zachariah.
	771	Shallum, Menahem.
	760	Pekahiah.
	758	Pekah.
Jotham . . .	757	
Ahaz . . .	741	
	729	Hosea.
Hezekiah . . .	726	
	721	Samaria captured.

The dynasties in Israel are denoted by brackets.

Jeroboam originally fixed on *Shechem* as the centre of his monarchy, and fortified it; moved perhaps not only by its natural suitability, but by the remembrances of Jacob which clove to it, and by the auspicious fact that here first Israel had decided for him against Rehoboam. But the natural delightfulness of *Tirzah* (Cant. vi. 4) led him, perhaps late in his reign, to erect a palace there (1 Kings xiv. 17). After the murder of Jeroboam's son, Baasha seems to have intended to fix his capital at *Ramah*, as a convenient place for annoying the king of Judah, whom he looked on as his only dangerous enemy; but when forced to renounce this plan (xv. 17, 21), he acquiesced in *Tirzah*, which continued to be the chief city of Israel, until Omri, who, since the palace at *Tirzah* had been burned during the civil war (1 Kings xvi. 18), built *Samaria*, with the ambition not uncommon in the founder of a new dynasty (xvi. 24). *Samaria* continued to the end of the monarchy to be the centre of administration; and its strength appears to have justified Omri's choice. For details, see *SAMARIA*; also *TIRZAH* and *SHECHEM*.

There is reason to believe that Jeroboam carried back with him into Israel the good will, if not the substantial assistance, of Shishak; and this will account for his escaping the storm from Egypt which swept over Rehoboam in his fifth year. During that first period Israel was far from quiet within. Although the ten tribes collectively had decided in favour of Jeroboam, great numbers of individuals remained attached to the family of David and to the worship at Jerusalem, and in the first three years of Rehoboam migrated into Judah (2 Chron. xi. 16, 17). Perhaps it was not until this process commenced, that Jeroboam was worked up to the desperate measure of erecting rival sanctuaries with visible idols (1 Kings xii. 27); a measure which met the usual ill-success of profane state-craft, and aggravated the evil which he feared. It set him at war with the whole order of priests and Levites, whose expulsion or subjugation, we may be certain, was not effected without convulsing his whole kingdom, and so occupying him as to free Rehoboam from any real danger, although no peace was made. The king of Judah improved the time by immense efforts in fortifying his territory (2 Chron. xi. 5-11);

and, although Shishak soon after carried off the most valuable spoil, no great or definite impression could be made by Jeroboam. Israel having so far taken the place of heathen nations, and being already perhaps even in alliance with Egypt, at an early period—we know not how soon—sought and obtained the friendship of the kings of Damascus. A sense of the great advantage derivable from such a union seems to have led Ahab afterwards to behave with mildness and conciliation towards Benhadad, at a time when it could have been least expected (1 Kings xx. 31-34). From that transaction we learn that Benhadad I. had made in Damascus 'streets for Omri,' and Omri for Benhadad in *Samaria*. This, no doubt, implied that 'a quarter' was assigned for Syrian merchants in *Samaria*, which was probably fortified like the 'camp of the Tyrians' in Memphis, or the English factory at Calcutta; and in it, of course, Syrian worship would be tolerated. Against such intercourse the prophets, as might be expected, entered their protest (ver. 35-43); but it was in many ways too profitable to be renounced. In the reign of Baasha, Asa king of Judah, sensible of the dangerous advantage gained by his rival through the friendship of the Syrians, determined to buy them off at any price (see also under *JUDAH*); and by sacrificing 'the treasures of the house of the Lord and the treasures of the king's house' (xv. 18), induced Benhadad I. to break his league with Baasha and to ravage all the northern district of Israel. This drew off the Israelitish monarch, and enabled Asa to destroy the fortifications of *Ramah*, which would have stopped the course of his trade (xv. 17), perhaps that with the sea-coast and with Tyre. Such was the beginning of the war between Israel and Syria, on which the safety of Judah at that time depended. Cordial union was not again restored between the two northern states until the days of Rezin king of Syria, and Pekah the son of Remaliah, when Damascus must have already felt the rising power of Nineveh. The renewed alliance instantly proved so disastrous to Judah, which was reduced to extremest straits (Isa. vii. 2; 2 Kings xv. 37; 2 Chron. xxviii. 5, 6), as may seem to justify at least the policy of Asa's proceeding. Although it was impossible for a prophet to approve of it (2 Chron. xvi. 7), we may only so much the more infer that Judah was already brought into most pressing difficulties, and that the general course of the war, in spite of occasional reverses, was decidedly and increasingly favourable to Israel.

The wars of Syria and Israel were carried on chiefly under three reigns, those of Benhadad II., Hazael, and Benhadad III., the two first monarchs being generally prosperous, especially Hazael, the last being as decidedly unsuccessful. Although these results may have depended in part on personal qualities, there is high probability that the feebleness displayed by the Syrians against Jehoash and his son Jeroboam was occasioned by the pressure of the advancing empire of Nineveh.

Asa adhered, through the whole of his long reign, to the policy of encouraging hostility between the two northern kingdoms; and the first Benhadad had such a career of success that his son found himself in a condition to hope for an entire conquest of Israel. His formidable inva-

done wrought an entire change in the mind of Jehoshaphat (1 Kings xxii. 44), who saw that if Israel was swallowed up by Syria, there would be no safety for Judah. We may conjecture that this consideration determined him to unite the two royal families; for no common cause would have induced so religious a king to select for his son's wife Athaliah the daughter of Jezebel. The age of Ahaziah, who was sprung from this marriage, forces us to place it as early as *a.c.* 912, which is the third year of Jehoshaphat and sixth of Ahab. Late in his reign Jehoshaphat threw himself most cordially (1 Kings xxii. 4) into the defence of Ahab, and by so doing probably saved Israel from a foreign yoke. Another mark of the low state into which both kingdoms were falling, is, that after Ahab's death the Moabites refused their usual tribute to Israel, and (as far as can be made out from the ambiguous words of 2 Kings iii. 27), the united force of the two kingdoms failed of doing more than irritate them. Soon after, in the reign of Jehoram son of Jehoshaphat, the Edomites followed the example, and established their independence. This event possibly engaged the whole force of Judah, and hindered it from succouring Samaria during the cruel siege which it sustained from Benhadad II., in the reign of Jehoram son of Ahab. The declining years and health of the king of Syria gave a short respite to Israel; but, in *a.c.* 885, Hazael, by defeating the united Hebrew armies, commenced the career of conquest and harassing invasion by which he 'made Israel like the dust by threshing.' Even under Jehu he subdued the trans-Jordanic tribes (2 Kings x. 32). Afterwards, since he took the town of Gath (2 Kings xii. 17) and prepared to attack Jerusalem—an attack which Jehoash king of Judah averted only by strictly following Asa's precedent—it is manifest that all the passes and chief forts of the country west of the Jordan must have been in his hand. Indeed, as he is said 'to have left to Jehoahaz only fifty horsemen, ten chariots, and ten thousand footmen,' it would seem that Israel was strictly a conquered province, in which Hazael dictated (as the English to the native rajahs of India) what military force should be kept up. From this thralldom Israel was delivered by some unexplained agency. We are told merely that 'Jehovah gave to Israel a saviour, so that they went out from under the hand of the Syrians; and the children of Israel dwelt in their tents as beforetime,' 2 Kings xiii. 5. It is allowable to conjecture that the (apparently unknown) deliverer was the Assyrian monarchy, which, assailing Hazael towards the end of the reign of Jehoahaz, entirely drew away the Syrian armies. That it was some urgent, powerful, and continued pressure, considering the great strength which the empire of Damascus had attained, seems clear from the sudden weakness of Syria through the reigns of Jehoash and Jeroboam II., the former of whom thrice defeated Benhadad III. and 'recovered the cities of Israel,' the latter not only regained the full territory of the ten tribes, but made himself master (for a time at least) of Damascus and Hamath. How entirely the friendship of Israel and Judah had been caused and cemented by their common fear of Syria, is proved by the fact that no sooner is the power of Damascus broken than new war breaks out between the two kingdoms, which ended in the

plunder of Jerusalem by Jehoash, who also broke down its walls and carried off hostages; after which there is no more alliance between Judah and Israel. The empire of Damascus seems to have been entirely dissolved under the son of Hazael, and no mention is made of its kings for eighty years or more. When Pekah, son of Remaliah, reigned in Samaria, Rezin, an king of Damascus, made a last but ineffectual effort for its independence.

The same Assyrian power which had doubtless so seriously shaken, and perhaps temporarily overturned, the kingdom of Damascus, was soon to be felt by Israel. Menahem was invaded by Pul (the first sovereign of Nineveh whose name we know), and was made tributary. His successor, Tiglath-pileser, in the reign of Pekah, son of Remaliah, carried captive the eastern and northern tribes of Israel (i. e. perhaps all their chief men as hostages?), and soon after slew Rezin, the ally of Pekah, and subdued Damascus. The following emperor, Shalmaneser, besieged and captured Samaria, and terminated the kingdom of Israel, *a.c.* 721.

This branch of the Hebrew monarchy suffered far greater and more rapid reverses than the other. From the accession of Jeroboam to the middle of Baasha's reign it probably increased in power; it then waned with the growth of the Damascene empire; it struggled hard against it under Ahab and Jehoram, but sank lower and lower; it was dismembered under Jehu, and made subject under Jehoahaz. From *a.c.* 940 to *a.c.* 850 is, as nearly as can be ascertained, the period of depression; and from *a.c.* 914 to *a.c.* 850 that of friendship or alliance with Judah. But after (about) *a.c.* 850 Syria began to decline, and Israel soon shot out rapidly; so that Joash and his son Jeroboam appear, of all Hebrew monarchs, to come next to David and Solomon. How long this burst of prosperity lasted does not distinctly appear; but it would seem that entire dominion over the ten tribes was held until Pekah received the first blow from the Assyrian conqueror.

Besides that which was a source of weakness to Israel from the beginning, viz. the schism of the crown with the whole ecclesiastical body, other causes may be discerned which made the ten tribes less powerful, in comparison with the two, than might have been expected. The marriage of Ahab to Jezebel brought with it no political advantages at all commensurate with the direct moral mischief, to say nothing of the spiritual evil; and the reaction against the worship of Baal was a most ruinous atonement for the sin. To suppress the monstrous iniquity, Jehu not only put to death Ahab's wife, grandson, and seventy sons, but murdered first the king of Judah himself, and next forty-two youthful and innocent princes of his house; while, strange to tell, the daughter of Jezebel gained by his deed the throne of Judah, and perpetrated a new massacre. The horror of such crimes must have fallen heavily on Jehu, and have caused a widespread disaffection among his own subjects. Add to this, that the Phenicians must have deeply resented his proceedings; so that we get a very sufficient clue to the prostration of Israel under the foot of Hazael during the reign of Jehu and his son.

Another and more abiding cause of political

debility in the ten tribes was found in the imperfect consolidation of the inhabitants into a single nation. Since those who lived east of the Jordan retained, to a great extent at least, their pastoral habits, their union with the rest could never have been very firm; and when a king was neither strong independently of them, nor had good hereditary pretensions, they were not likely to contribute much to his power. After their conquest of the Hagarenes and the depression of the Moabites and Ammonites by David, they had free room to spread eastward; and many of their chief men may have become wealthy in flocks and herds (like Machir the son of Ammiel, of Lodebar, and Barzillai the Gileadite, 2 Sam. xvii. 27), over whom the authority of the Israelitish crown would naturally be precarious; while west of the Jordan the agrarian law of Moses made it difficult or impossible for a landed nobility to form itself, which could be formidable to the royal authority. That the Arab spirit of freedom was rooted in the eastern tribes, may perhaps be inferred from the case of the Rechabites, who would neither live in houses nor plant vines; undoubtedly like some of the Nabathæans, lest, by becoming settled and agricultural, they should be enslaved. Yet the need of imposing this law on his descendants would not have been felt by Joudab, had not an opposite tendency been rising,—that of agricultural settlement.

Although the priests and Levites nearly disappeared out of Israel, prophets were perhaps even more numerous and active there than in Judah; and Ahijah, whose prediction first endangered Jeroboam (1 Kings xi. 29-40), lived in honour at Shiloh to his dying day (xiv. 2). Obadiah alone saved one hundred prophets of Jehovah from the rage of Jezebel (xviii. 13). Possibly their extra-social character freed them from the restraint imposed on priests and Levites; and while they felt less bound to the formal rites of the Law, the kings of Israel were also less jealous of them.

1. IS'SACHAR (*price-bought*), a son of Jacob and Leah, born B.C. 1749, who gave name to one of the tribes of Israel (Gen. xxx. 18; Num. xxvi. 25).

2. The tribe called after Issachar. Jacob, on his death-bed, speaking metaphorically of the character and destinies of his sons, or rather of the tribes which should spring from them, said, 'Issachar is a strong ass couching down between two burdens' (Gen. xlix. 14, 15). Remembering the character of the ass in Eastern countries, we may be sure that this comparison was not intended in disparagement. The ass is anything but stupid; and the proverbial obstinacy which it sometimes exhibits in our own country, is rather the result of ill-treatment than a natural characteristic of the animal. Its true attributes are patience, gentleness, great capability of endurance, laborious exertion, and a meek submission to authority. Issachar, therefore, the progenitor of a race singularly docile, and distinguished for their patient industry, is exhibited under the similitude of the meekest and most laborious of quadrupeds. The descriptive character goes on:—'And he saw that rest was good, and the land that it was pleasant, and he bowed his shoulder to bear, and became a servant unto tribute' which probably

does not imply that reproach upon Issachar, as addicted to ignominious ease, which some commentators find in it. It seems simply to mean that finding itself in possession of a most fertile portion of Palestine, the tribe devoted itself to the labours of agriculture, taking little interest in the public affairs of the nation. Accordingly Josephus says that the heritage of the tribe 'was fruitful to admiration, abounding in pastures and nurseries of all kinds, so that it would make any man in love with husbandry' (*Antiq. v. 1. 22*). But although a decided preference of agricultural over commercial or military pursuits is here indicated, there seems no reason to conclude, as some gather from the last clause, that the tribe would be willing to purchase exemption from war by the payment of a heavy tribute. The words do not necessarily imply this; and there is no evidence that the tribe ever declined any military service to which it was called. On the contrary, it is specially commended by Deborah for the promptitude with which it presented itself in the war with Jabin (*Judg. v. 15*); and in the days of David honourable testimony is borne to its character (1 Chron. xii. 32). In this passage the 'children of Issachar' are described as 'men that had understanding of the times, to know what Israel ought to do,' which probably means that they were men held in esteem for their prudence and wisdom, and who knew that the time was come when it was no longer safe to delay calling David to the throne of all Israel. On quitting Egypt the tribe of Issachar numbered 54,000 adult males, which gave it the fifth numerical rank among the twelve tribes, Judah, Simeon, Zebulun, and Dan, being alone above it. In the wilderness it increased nearly 10,000, and then ranked as the third of the tribes, Judah and Dan only being more numerous (Num. i. xxvi.). The territory of the tribe comprehended the whole of the plain of Esdraelon and the neighbouring districts—the granary of Palestine. It was bounded on the east by the Jordan, on the west and south by Manasseh, and on the north by Asher and Zebulun. It contained the towns of Megiddo, Taanach, Shunem, Jezreel, and Bethshan, with the villages of Endor, Aphek, and Ibleam, all historical names: the mountains of Tabor and Gilboa, and the valley of Jezreel, were in the territory of this tribe, and the course of the river Kishon lay through it.

ITH'AMAR (*palm-coast*), fourth son of Aaron. He was consecrated to the priesthood along with his brothers (Exod. vi. 23; Num. iii. 2, 3). Nothing is individually recorded of him, except that the property of the tabernacle was placed under his charge (Exod. xxxviii. 21), and that he superintended all matters connected with its removal by the Levitical sections of Gershon and Merari (Num. iv. 28). The sacred utensils and their removal were entrusted to his elder brother Eleazar. Ithamar, with his descendants, occupied the position of common priests till the high-priesthood passed into his family in the person of Eli, under circumstances of which we are ignorant. Abiathar, whom Solomon deposed, was the last high-priest of that line; and the pontificate then reverted to the elder line of Eleazar in the person of Zadok (1 Kings ii. 27).

ITURE'A, a district in the north-east of Palestine, forming the tetrarchy of Philip. The

name is supposed to have originated with *Itur*, or *Jetur*, one of Ishmael's sons (1 Chron. i. 31). In 1 Chron. v. 19 this name is given as that of a tribe or nation with which Reuben (beyond the Jordan) warred; and from its being joined with the names of other of Ishmael's sons it is evident that a tribe descended from his son *Jetur* is intimated.

During the Exile this and other border countries were taken possession of by various tribes, whom, although they are called after the original names, as occupants of the countries which had received those names, we are not bound to regard as descendants of the original possessors. These new Itureans were eventually subdued by King Aristobulus (n.c. 100); by whom they were constrained to embrace the Jewish religion, and were at the same time incorporated with the state. Nevertheless the Itureans were still recognisable as a distinct people in the time of Pliny. As already intimated, Herod the Great, in dividing his dominions among his sons, bequeathed Ituræa to Philip, as part of a tetrarchy composed, according to Luke, of Trachonitis and Ituræa. The name is so loosely applied by ancient writers, that it is difficult to fix its boundaries with precision. Perhaps it may suffice for general purposes to describe it as a district of indeterminate extent, traversed by a line drawn from the Lake of Tiberias to Damascus. The present Jedur probably comprehends the whole or greater part of the proper Ituræa. This is described by Burckhardt as 'lying south of Jebelkessoue, east of Jebel es-Sheik (Mount Hermon), and west of the Hadj road.' He adds, that it now contains only twenty inhabited villages. By the help of these lights we may discover that Ituræa was a plain country, about thirty miles long from north to south, and twenty-four from east to west, having on the north Abilene and the Damascene district; on the south Auranitis and part of Bashan; on the east the stony region of Trachonitis; and on the west the hill country of Bashan.

IVORY (1 Kings x. 22; 2 Chron. ix. 21; Rev. xviii. 12). 'Elephant's tooth,' or simply 'elephant,' is a common name for ivory, not only in the Oriental languages and in Greek, but also in the Western tongues; although in all of them teeth of other species may be included. Elephants' teeth were largely imported as merchandise, and also brought as tribute into Egypt. The processions of human figures bearing presents, &c., still extant on the walls of palaces and tombs, attest by the black crisp-haired bearers of huge teeth, that some of these came from Ethiopia or Central Africa; and by white men similarly laden, who also bring an Asiatic elephant and a white bear, that others came from the East. Phœnician traders had ivory in such abundance, that the chief seats of their galleys were inlaid with it. In the Scriptures, according to the Chaldee Paraphrase, Jacob's bed was made of this substance (Gen. xlix. 33); we find king Solomon importing it from Tarshish (1 Kings x. 22); and if Psalm xlv. 8 was written before his reign, ivory was extensively used in the furniture of royal residences at a still earlier period. The tusks of African elephants are generally much longer than those of the Asiatic; and it may be observed in this place, that the ancients, as well as the moderns, are mistaken when they assert

elephants' tusks to be a kind of horns. They are genuine teeth, combining in themselves, and occupying, in the upper jaw, the whole mass of secretions which in other animals form the upper incisor and laniary teeth. They are useful for defence and offence, and for holding down green branches, or rooting up water-plants; but still they are not absolutely necessary, since there is a variety of elephant in the Indian forests entirely destitute of tusks, and the females in most of the races are either without them or have them very small; not turned downwards, as Bochart states, but rather straight, as correctly described by Pliny.

IYAR is the late name of that month which was the second of the sacred, and the seventh of the civil year of the Jews, and which began with the new moon of May. The few memorable days in it are the 10th, as a fast for the death of Eli; the 14th, as the second or lesser Passover, for those whom uncleanness or absence prevented from celebrating the feast in Nisan (Num. ix. 11); the 23rd, as a feast instituted by Simon the Maccabee in memory of his taking the citadel Acre in Jerusalem (1 Macc. xiii. 51, 52); the 28th, as a fast for the death of Samuel.

The name Iyar does not occur in the Old Testament, this month being always described as the second month, except in four places in which it is called Ziv (1 Kings v. 1, 37; Dan. ii. 31; iv. 33); which is a curtailed form for 'zehiv, bright,' an appropriate epithet of the month of flowers.

J.

JAB'AL (*a stream*), a descendant of Cain, son of Lamech and Adah, who is described in Gen. iv. 20, as 'the father of such as dwell in tents, and have cattle.' This obviously means that Jabal was the first who adopted that nomadic life which is still followed by numerous Arabian and Tartar tribes in Asia. Abel had long before been a keeper of sheep; but Jabal invented such portable habitations (formed, doubtless, of skins) as enabled a pastoral people to remove their dwellings with them from one place to another, when they led their flocks to new pastures.

JAB'BOK, one of the streams which traverse the country east of the Jordan, and which, after a course nearly from east to west, falls into that river about thirty miles below the lake of Tiberias. It seems to rise in the Hauran mountains, and its whole course may be computed at sixty-five miles. It is mentioned in Scripture as the boundary which separated the kingdom of Sihon, king of the Amorites, from that of Og, king of Bashan (Josh. xii. 1-6); and it appears afterwards to have been the boundary between the tribe of Reuben and the half-tribe of Manasseh. The earliest notice of it occurs in Gen. xxxii. 22. The Jabbok now bears the name of Zerkā. In its passage westward across the plains it more than once passes under ground; and in summer the upper portion of its channel becomes dry. But on entering the more hilly country immediately east of the Jordan, it receives tribute from several springs which maintain it as a perennial stream, although very low in sum-

mer. On approaching the Jordan it flows through a deep ravine, the steep banks being overgrown with the *Solanum furiosum*, which attains a considerable size. But the ravine is not so well wooded as the immediate neighbourhood. The water is pleasant, and the bed being rocky the stream runs clear.

JAB'ESH, or JABESH GILEAD, a town beyond the Jordan, in the land of Gilead.

Jabesh belonged to the half-tribe of Manasseh, and was sacked by the Israelites for refusing to join in the war against Benjamin (Judg. xxi. 8).

It is chiefly memorable for the siege it sustained from Nahaash, king of the Ammonites, the raising of which formed the first exploit of the newly-elected king, Saul, and procured his confirmation in the sovereignty. The inhabitants had agreed to surrender, and to have their right eyes put out (to incapacitate them from military service), but were allowed seven days to ratify the treaty. In the meantime Saul collected a large army, and came to their relief (1 Sam. xi.). This service was gratefully remembered by the Jabeshites; and, about forty years after, when the dead bodies of Saul and his sons were gibbeted on the walls of Bethshan, on the other side of the river, they made a forced march by night, took away the bodies, and gave them still honourable burial (1 Sam. xxxi.).

Jabesh still existed as a town in the time of Eusebius, who places it six miles from Pella towards Gerasa; but the knowledge of the site is now lost, unless we accept the conclusion of Mr. Buckingham, who thinks it may be found in a place called Jehaz or Jejaz, marked by ruins upon a hill, in a spot not far from which, according to the above indications, Jabesh must have been situated.

1. JAB'IN (*discerner*), king of Hazor, and one of the most powerful of all the princes who reigned in Canaan when it was invaded by the Israelites. His dominion seems to have extended over all the north part of the country; and after the ruin of the league formed against the Hebrews in the south of Adonizedek, king of Jerusalem, he assembled his tributaries near the waters of Merom (the lake Huleh), and called all the people to arms. This coalition was destroyed, as the one in the south had been, and Jabin himself perished in the sack of Hazor, his capital, B.C. 1450. This prince was the last powerful enemy with whom Joshua combated, and his overthrow seems to have been regarded as the crowning act in the conquest of the Promised Land (Josh. xi. 1-14).

2. JABIN, king of Hazor, and probably descended from the preceding. It appears that during one of the servitudes of the Israelites, probably when they lay under the yoke of Cushan or Eglon, the kingdom of Hazor was reconstructed. The narrative gives to this second Jabin even the title of 'king of Canaan'; and this, with the possession of 900 iron-armed war-chariots, implies unusual power and extent of dominion. The iniquities of the Israelites having lost them the Divine protection, Jabin gained the mastery over them; and, stimulated by the remembrance of ancient wrongs, oppressed them heavily for twenty years. From this thralldom they were relieved by the great victory won by Barak in the plain of Esdraelon over the hosts

of Jabin, commanded by Sisera, one of the most renowned generals of those times, B.C. 1285. The well-compacted power of the king of Hazor was not yet, however, entirely broken. The war was still prolonged for a time, but ended in the entire ruin of Jabin, and the subjugation of his territories by the Israelites (Judg. iv.).

This is the Jabin whose name occurs in Pa. lxxxiii. 10.

JAC'HIN and BO'AZ, the names of two brazen pillars in the porch of Solomon's temple [TEMPLE].

JACINTH. The stone which is called Jacinth in Rev. xxi. 20, is the same which is called in the Old Testament a LIGURE. [See the word.]

JAC'OB was the second son of Isaac by his wife Rebekah. Her conceiving is stated to have been supernatural. Led by peculiar feelings she went to inquire of the Lord, and was informed that she was indeed with child; that her offspring should be the founders of two nations, and that the elder should serve the younger: circumstances which ought to be borne in mind when a judgment is pronounced on her conduct in aiding Jacob to secure the privileges of birth to the exclusion of his elder brother Esau.

As the boys grew, Jacob appeared to partake of the gentle, quiet, and retiring character of his father, and was accordingly led to prefer the tranquil safety and pleasing occupations of a shepherd's life to the bold and daring enterprises of the hunter, for which Esau had an irresistible predilection. Jacob, therefore, passed his days in or near the paternal tent, simple and unpretending in his manner of life, and finding in the flocks and herds which he kept images and emotions which both filled and satisfied his heart. That selfishness and a prudence which approached to cunning had a seat in the heart of the youth Jacob, appears but too plain in his dealing with Esau, when he exacted from a famishing brother so large a price for a mess of pottage as the surrender of his birthright.

The leaning which his mother had in favour of Jacob would naturally be augmented by the conduct of Esau in marrying, doubtless contrary to his parents' wishes, two Hittite women, who are recorded to have been a grief of mind unto Isaac and to Rebekah.

Circumstances thus prepared the way for procuring the transfer of the birthright, when Isaac, being now old, proceeded to take steps to pronounce the irrevocable blessing which acted with all the force of a modern testamentary bequest. This blessing, then, it was essential that Jacob should receive in preference to Esau. Here Rebekah appears the chief agent; Jacob is a mere instrument in her hands. Isaac directs Esau to procure him some venison. This Rebekah hears, and urges her reluctant favourite to personate his elder brother. Jacob suggests difficulties; they are met by Rebekah, who is ready to incur any personal danger so that her object be gained. Her voice is obeyed, the venison is brought, Jacob is equipped for the deceit; he helps out his fraud by direct falsehood, and the old man, whose senses are now failing, is at last with difficulty deceived. It cannot be denied that this is a most reprehensible transaction, and presents a truly painful picture; in which a

mother conspires with one son in order to cheat her aged husband, with a view to deprive another son of his rightful inheritance. Justification is here impossible; but it should not be forgotten in the estimate we form that there was a promise in favour of Jacob, that Jacob's qualities had endeared him to his mother, and that the prospect to her was dark and threatening which arose when she saw the neglected Esau at the head of the house, and his hateful wives assuming command over herself.

Punishment in this world always follows close upon the heels of transgression. Fear seized the guilty Jacob, who is sent by his father, at the suggestion of Rebekah, to the original seat of the family, in order that he might find a wife among his cousins, the daughters of his mother's brother, Laban the Syrian. Before he is dismissed Jacob again receives his father's blessing, the object obviously being to keep alive in the young man's mind the great promise given to Abraham, and thus to transmit that influence which, under the aid of Divine Providence, was to end in placing the family in possession of the land of Palestine, and in so doing to make it 'a multitude of people.' On his journey eastward he tarried all night upon a certain plain, where he was favoured with a vision, and received a promise of divine protection in all the way on which he should go.

Jacob, on coming 'into the land of the people of the East,' providentially met with Rachel, Laban's daughter, to whom, with true Eastern simplicity and politeness, he showed such courtesy as the duties of pastoral life suggest and admit. And here his gentle and affectionate nature displays itself under the influence of the bonds of kindred and the fair form of youth:—'Jacob kissed Rachel, and lifted up his voice and wept.'

After he had been with his uncle the space of a month, Laban inquires of him what reward he expects for his services. He asks for the 'beautiful and well-favoured Rachel.' His request is granted on condition of a seven years' service—a long period truly, but to Jacob 'they seemed but a few days for the love he had to her.' When the time was expired, the crafty Laban availed himself of the customs of the country, in order to substitute his elder and 'tender-eyed' daughter Leah. In the morning Jacob found how he had been beguiled; but Laban excused himself, saying, 'It must not be done in our country, to give the younger before the first-born.' Another seven years' service gains for Jacob the beloved Rachel. Leah, however, has the compensatory privilege of being the mother of the first-born—Reuben; three other sons successively follow, namely, Simeon, Levi, and Judah, sons of Leah. This fruitfulness was a painful subject of reflection to the barren Rachel, who employed language on this occasion that called forth a reply from her husband which shows that, mild as was the character of Jacob, it was by no means wanting in force and energy (Gen. xxx. 2). An arrangement, however, took place, by which Rachel had children by means of her maid Bilhah, of whom Dan and Naphtali were born. Two other sons—Gad and Asher—were born to Jacob of Leah's maid, Zilpah. Leah herself bare two more sons, namely, Issachar and Zebulun; she also bare a daughter, Dinah. At length Rachel herself bare a son, and she called his name Joseph.

Most faithfully, and with great success, had Jacob served his uncle for fourteen years, when he became desirous of returning to his parents. At the urgent request of Laban, however, he is induced to remain. The language employed upon this occasion (Gen. xxx. 25, sq.) shows that Jacob's character had gained considerably during his service both in strength and comprehensiveness; but the means which he employed in order to make his bargain with his uncle work so as to enrich himself, prove too clearly that his moral feelings had not undergone an equal improvement, and that the original taint of prudence, and the sad lessons of his mother in deceit, had produced some of their natural fruit in his bosom.

The prosperity of Jacob displeased and grieved Laban, so that a separation seemed desirable. His wives are ready to accompany him. Accordingly he set out, with his family and his property, 'to go to Isaac his father in the land of Canaan.' It was not till the third day that Laban learned that Jacob had fled, when he immediately set out in pursuit of his nephew, and after seven days' journey overtook him in Mount Gilead. Laban, however, is divinely warned not to hinder Jacob's return. Reproach and recrimination ensued. Even a charge of theft is put forward by Laban—'Wherefore hast thou stolen my gods?' In truth, Rachel had carried off certain images which were the objects of superstitious reverence. Ignorant of this misdeed, Jacob boldly called for a search, adding, 'With whomsoever thou findest thy gods, let him not live.' A crafty woman's cleverness eluded the keen eye of Laban. Rachel by an appeal which one of her sex alone could make, deceived her father.

Laban's conduct on this occasion called forth a reply from Jacob, from which it appears that his service had been most severe, and which also proves that however this severe service might have encouraged a certain servility, it had not prevented the development in Jacob's soul of a high and energetic spirit, which when roused could assert its rights and give utterance to sentiments both just, striking, and forcible.

Peace, however, being restored, Laban, on the ensuing morning, took a friendly, if not an affectionate farewell of his daughters and their sons, and returned home. Meanwhile Jacob, going on his way, had to pass near the land of Seir, in which Esau dwelt. Remembering his own conduct and his brother's threat, he was seized with fear, and sent messengers before in order to propitiate Esau, who, however, had no evil design against him; but, when he 'saw Jacob, ran to meet him and embraced him, and fell on his neck and kissed him, and they wept'—the one tears of joyful recognition, the other of gladness at unexpected escape.

It was immediately preceding this interview that Jacob passed the night in wrestling with 'a man,' who is afterwards recognised as God, and who at length overcame Jacob by touching the hollow of his thigh. His name also was on this event changed by the mysterious antagonist into Israel, 'for as a prince hast thou power with God and with men, and hast prevailed' (Gen. xxxii. 28). It is added that on this account his descendants abstained from eating the thigh of slaughtered animals.

Having, by the misconduct of Hamor the

Hivite and the hardy valour of his sons, been involved in danger from the natives of Shechem in Canaan, Jacob is divinely directed, and under the divine protection proceeds to Bethel, where he is to 'make an altar unto God that appeared unto thee when thou fleddest from the face of Esau thy brother.' Obedient to the divine command, he first purifies his family from 'strange gods,' which he hid under 'the oak which is by Shechem;' after which God appeared to him again with the important declaration, 'I am God Almighty,' and renewed the Abrahamic covenant. While journeying from Beth-el to Ephrath his beloved Rachel lost her life in giving birth to her second son, Benjamin. At length Jacob came to his father Isaac at Mamre, the family residence, in time to pay the last attentions to the aged patriarch. Not long after this bereavement Jacob was robbed of his beloved son Joseph through the jealousy and bad faith of his brothers. This loss is the occasion of showing us how strong were Jacob's paternal feelings; for on seeing what appeared to be proofs that 'some evil beast had devoured Joseph,' the old man 'rent his clothes, and put sackcloth upon his loins, and mourned for his son many days, and refused to be comforted.'—'I will go down into the grave unto my son mourning' (Gen. xxxvii. 33).

A widely extended famine induced Jacob to send his sons down into Egypt, where he had heard there was corn, without knowing by whose instrumentality. The patriarch, however, retained his youngest son Benjamin, 'lest mischief should befall him,' as it had befallen Joseph. The young men returned with the needed supplies of corn. They related, however, that they had been taken for spies, and that there was but one way in which they could disprove the charge, namely, by carrying down Benjamin to 'the lord of the land.' This Jacob vehemently refused:—'Me have ye bereaved; Joseph is not, and Simeon is not, and ye will take Benjamin; my son shall not go down with you; if mischief befall him, then shall ye bring down my grey hairs with sorrow to the grave' (Gen. xlii. 36). The pressure of the famine, however, at length forced Jacob to allow Benjamin to accompany his brothers on a second visit to Egypt; whence in due time they brought back to their father the pleasing intelligence, 'Joseph is yet alive, and he is governor over all the land of Egypt.' How naturally is the effect of this on Jacob told—'and Jacob's heart fainted, for he believed them not.' When, however, they had gone into particulars, he added, 'Enough, Joseph my son is yet alive; I will go and see him before I die.'

Encouraged 'in the visions of the night,' Jacob goes down to Egypt. 'And Joseph made ready his chariot, and went up to meet Israel his father, to Goshen, and presented himself unto him; and he fell on his neck, and wept on his neck a good while. And Israel said unto Joseph, Now let me die, since I have seen thy face, because thou art yet alive' (Gen. xlii. 29). Joseph proceeded to conduct his father into the presence of the Egyptian monarch, when the man of God, with that self-consciousness and dignity which religion gives, instead of offering slavish adulation, 'blessed Pharaoh.' Struck with the patriarch's venerable air, the king asked, 'How old art thou? What composure and elevation is there in the

reply, 'The days of the years of my pilgrimage are an hundred and thirty years; few and evil have the days of the years of my life been, and have not attained unto the days of the years of the life of my fathers in the days of their pilgrimage: and Jacob blessed Pharaoh, and went out from before Pharaoh' (Gen. xlvii. 8-10).

Jacob, with his sons, now entered into possession of some of the best land of Egypt, where they carried on their pastoral occupations, and enjoyed a very large share of earthly prosperity. The aged patriarch, after being strangely tossed about on a very rough ocean, found at last a tranquil harbour, where all the best affections of his nature were gently exercised and largely unfolded. After a lapse of time Joseph, being informed that his father was sick, went to him, when 'Israel strengthened himself, and sat up in his bed.' He acquainted Joseph with the divine promise of the land of Canaan which yet remained to be fulfilled, and took Joseph's sons, Ephraim and Manasseh, in place of Reuben and Simeon, whom he had lost. Then having convened his sons, the venerable patriarch pronounced on them also a blessing, which is full of the loftiest thought, expressed in the most poetical diction, and adorned by the most vividly descriptive and engaging imagery, showing how deeply religious his character had become, how freshly it retained its fervour to the last, and how greatly it had increased in strength, elevation, and dignity:—'And when Jacob had made an end of commanding his sons, he gathered up his feet unto the bed and yielded up the ghost, and was gathered unto his people' (Gen. xlix. 33).

JAEŁ (*wild goat*), wife of Heber, the Kenite. When Sisera, the general of Jabin, had been defeated, he alighted from his chariot, hoping to escape best on foot from the hot pursuit of the victorious Israelites. On reaching the tents of the nomade chief, he remembered that there was peace between his sovereign and the house of Heber; and, therefore, applied for the hospitality and protection to which he was thus entitled. This request was very cordially granted by the wife of the absent chief, who received the vaquished warrior into the inner part of the tent, where he could not be discovered by strangers without such an intrusion as Eastern customs would not warrant. She also brought him milk to drink, when he asked only water; and then covered him from view, that he might enjoy repose the more securely. As he slept, a horrid thought occurred to Jaeł, which she hastened too promptly to execute. She took one of the tent nails, and with a mallet, at one fell blow, drove it through the temples of the sleeping Sisera. Soon after, Barak and his people arrived in pursuit, and were shown the lifeless body of the man they sought.

It does not seem difficult to understand the object of Jaeł in this painful transaction. Her motives seem to have been entirely prudential, and, on prudential grounds, the very circumstance which renders her act the more odious—the peace subsisting between the nomade chief and the king of Hazor—must, to her, have seemed to make it the more expedient. She saw that the Israelites had now the upper hand, and was aware that, as being in alliance with the oppressors of Israel, the camp might expect very rough treat-

ment from the pursuing force; which would be greatly aggravated if Sisera were found sheltered within it. This calamity she sought to avert, and to place the house of Heber in a favourable position with the victorious party. She probably justified the act to herself, by the consideration that, as Sisera would certainly be taken and slain, she might as well make a benefit out of his inevitable doom, as incur utter ruin in the attempt to protect him. We have been grieved to see the act vindicated as authorized by the usages of ancient warfare, of rude times, and of ferocious manners. There was not warfare, but peace between the house of Heber and the prince of Hazor; and, for the rest, we will venture to affirm that there does not now, and never did exist, in any country, a set of usages under which the act of Jael would be deemed right.

1. JA'IR (*enlightener*), son of Segub, of the tribe of Manasseh by his mother, and of Judah by his father. He appears to have distinguished himself in an expedition against the kingdom of Bashan, the time of which is disputed, but may probably be referred to the last year of the life of Moses, *n.c.* 1451. It seems to have formed part of the operations connected with the conquest of the country east of the Jordan. He settled in the part of Argob bordering on Gilead, where we find twenty-three villages named collectively Havoth-jair, or 'Jair's villages' (Num. xxxii. 41; Deut. iii. 14; Josh. xiii. 30; 1 Chron. ii. 22).

2. JAIR, eighth judge of Israel, of Gilead, in Manasseh, beyond the Jordan; and, therefore, probably descended from the preceding, with whom, indeed, he is sometimes confounded. He ruled twenty-two years, and his opulence is indicated in a manner characteristic of the age in which he lived. 'He had thirty sons, that rode on thirty ass-colts, and they had thirty cities, which are called Havoth-jair, in the land of Gilead.' The twenty-three villages of the more ancient Jair were probably among the thirty which this Jair possessed (Judg. x. 3). *n.c.* 1210.

JA'IRUS, a ruler of the synagogue at Capernaum, whose daughter Jesus restored to life (Mark v. 22; Luke viii. 41).

JAMES. Two, if not three persons of this name are mentioned in the New Testament.

1. JAMES, the son of Zebedee, and brother of the Evangelist John. Their occupation was that of fishermen, probably at Bethsaida, in partnership with Simon Peter (Luke v. 10). On comparing the account given in Matt. iv. 21, Mark i. 19, with that in John i., it would appear that James and John had been acquainted with our Lord, and had received him as the Messiah some time before he called them to attend upon him steadily—a call with which they immediately complied. Their mother's name was Salome. We find James, John, and Peter associated on several interesting occasions in the Saviour's life. They alone were present at the Transfiguration (Matt. xvii. 1; Mark ix. 2; Luke ix. 28); at the restoration to life of Jairus's daughter (Mark v. 42; Luke viii. 51); and in the garden of Gethsemane during the agony (Mark xiv. 33; Matt. xxvi. 37; Luke xxi. 37). With Andrew they listened in private to our Lord's discourse on the fall of Jerusalem (Mark xiii. 3). James and his brother appear to have indulged in false notions of the

kingdom of the Messiah, and were led by ambitious views to join in the request made to Jesus by their mother (Matt. xx. 20-23; Mark x. 35). From Luke ix. 52, we may infer that their temperament was warm and impetuous. On account, probably, of their boldness and energy in discharging their Apostleship, they received from their Lord the appellation of *Boanerges*, or *Sons of Thunder*. James was the first martyr among the Apostles. Clement of Alexandria, in a fragment preserved by Eusebius, reports that the officer who conducted James to the tribunal was so influenced by the bold declaration of his faith as to embrace the Gospel and avow himself also a Christian; in consequence of which he was beheaded at the same time.

2. JAMES, the son of Alphaeus, one of the twelve Apostles (Mark iii. 18; Matt. x. 3; Luke vi. 15; Acts i. 13). His mother's name was Mary (Matt. xxvii. 56; Mark xv. 40); in the latter passage he is called *James the Less*, either as being younger than James the son of Alphaeus, or on account of his low stature (Mark xvi. 1; Luke xxiv. 10).

3. JAMES, 'the brother of the Lord' (Gal. i. 19). Whether this James is identical with the son of Alphaeus, is a question which Dr. Neander pronounces to be the most difficult in the Apostolic history, and which cannot yet be considered as decided. It is probable, however, that he was a different person.

JAMES, EPISTLE OF. This is called by Eusebius the first of the Catholic Epistles. As the writer simply styles himself *James, a servant of God and of the Lord Jesus Christ*, doubts have existed, both in ancient and modern times, respecting the true

Author of this Epistle.—It has been ascribed to no less than four different persons, viz. James, the son of Zebedee; James, the son of Alphaeus (who were both of the number of the twelve Apostles); James, our Lord's brother (Gal. i. 19); and to an anonymous author who assumed the name of James in order to procure authority to a supposititious writing.

It is highly improbable that James the son of Zebedee is the author of this epistle, for it is not credible that so great progress as the epistle implies had been made among the dispersed Jews before the martyrdom of James, which took place at Jerusalem about *a.n.* 32; and if the author, as has been commonly supposed, alludes to St. Paul's Epistles to the Romans (*a.d.* 58) and Galatians (*a.d.* 55), it would be a manifest anachronism to ascribe this epistle to the son of Zebedee.

The claim to the authorship of the epistle, therefore, rests between James 'the Lord's brother,' and James the son of Alphaeus. In the preceding article the difficult question, whether these names do not, in fact, describe the same person, has been referred to: it suffices, in this place, to state that no writer who regards James 'the Lord's brother' as distinct from James the son of Alphaeus, has held the latter to be the author of the epistle; and therefore, if no claim be advanced for the son of Zebedee, James 'the brother of the Lord' remains the only person whom the name at the head of this epistle could be intended to designate.

Hegesippus, cited by Eusebius, acquaints us that James, the brother of Jesus, who obtained the surname of the Just, governed the church of

Jerusalem along with, or after the apostles. Eusebius relates that he was the first who held the episcopate of Jerusalem (Jerome says for thirty years); and both he and Josephus give an account of his martyrdom. To him, therefore, is the authorship of an epistle addressed to the Jewish Christians with good reason ascribed.

The other opinion, which considers the epistle as written by an anonymous writer, we shall consider in treating of its author.

Eusebius observes that 'James, the brother of Jesus, who is called Christ,' is said to have written the first of the Catholic Epistles; but it is to be observed that it is considered spurious. Not many of the ancients have mentioned it, nor that called the Epistle of Jude. . . . Nevertheless we know that these, with the rest, are publicly read in most of the churches.' It is, however, cited by Clemens Romanus in his first or genuine *Epistle to the Corinthians*. It seems to be alluded to in the Shepherd of Hermas, 'Resist the devil, and he will be confounded and flee from you.' It is also generally believed to be referred to by Irenæus, 'Abraham believed God, and it was,' &c. Origen cites it in his *Comment. on John*, i. xix. iv. 306, calling it, however, the reputed epistle of James. We have the authority of Cassiodorus for the fact that Clemens Alexandrinus commented on this epistle; and it is not only expressly cited by Ephrem Syrus (51, 'James the brother of our Lord says "weep and howl,"' together with other references), but it forms part of the ancient Syriac version, a work of the second century. But though 'not quoted expressly by any of the Latin fathers before the fourth century,' it was, soon after the time of the Council of Nice, received both in the Eastern and Western churches without any marks of doubt, and was admitted into the canon along with the other Scriptures by the Councils of Hippo and Carthage. Nor (with the above exceptions) does there appear to have been a voice raised against it since that period until the era of the Reformation, when the ancient doubts were revived by Erasmus. The latter objected to it principally on the ground that it 'directly opposes St. Paul and the other Scriptures in ascribing justification to works.' This opinion, however, has been successfully combated by Neander, who maintains that there is no discrepancy whatever between St. Paul and St. James; that it was not even the design of the latter to oppose any misapprehension respecting St. Paul's doctrine, but that they each addressed different classes of people from different standing points, using the same familiar examples. 'Paul,' he says, 'was obliged to point out to those who placed their dependence on the justifying power of the works of the law, the futility of such works in reference to justification, and to demonstrate that justification and sanctification could proceed only from the faith of the Gospel; James, on the other hand, found it necessary to declare to those who imagined that they could be justified in God's sight by faith in the Jewish sense . . . that this was completely valueless if their course of life were not conformed to it.'

By those who consider James the Just, bishop of Jerusalem, to have been the author of this epistle, it is generally believed to have been

written shortly before his martyrdom, which took place A.D. 62, six years before the destruction of Jerusalem, whose impending fate is alluded to in chap. v. Neander fixes its date at a time preceding the separate formation of Gentile Christian churches, before the relation of Gentiles and Jews to one another in the Christian Church had been brought under discussion, in the period of the first spread of Christianity in Syria, Cilicia, and the adjacent regions. It is addressed to Jewish Christians, the descendants of the twelve tribes; but the fact of its being written in Greek exhibits the author's desire to make it generally available to Christians.

Contents and Character of the Epistle.—This epistle commences with consolations addressed to the faithful converts, with exhortations to patience, humility, and practical piety (ch. i. 1-27). Undue respect to persons is then condemned, and love enjoined (ch. ii.). Erroneous ideas on justification are corrected (ii. 13-26), the temerity of new teachers is repressed (iii. 12); an unbridled tongue is inveighed against, and heavenly wisdom contrasted with a spirit of covetousness (13-18). Swearing is prohibited (v. 12). The efficacy of prayer is proved by examples, and the unction of the sick by the Presbyters, together with prayer and mutual confession, are enjoined as instruments of recovery and of forgiveness of sins (v. 14-18). The approaching advent of the Lord is foretold (v. 7).

The style of this epistle is close and sententious. The general manner of the writer, says Jebb, 'combines the plainest and most practical good sense with the most vivid and poetical conception; the imagery various and luxuriant; the sentiments chastened and sober; his images, in truth, are so many analogical arguments, and if, at the first view, we are disposed to recreate ourselves with the poet, we soon feel that we must exert our harder powers to keep pace with the logician.' Sciler designates the style of this epistle as 'sometimes sublime and prophetic, nervous, and full of imagery.'

The eloquence and persuasiveness of St. James's Epistle, as an ethical composition, are such as must command universal admiration.

JAN'NES AND JAMB'RES, two of the Egyptian magicians who attempted by their enchantments to counteract the influence on Pharaoh's mind of the miracles wrought by Moses. Their names occur nowhere in the Hebrew Scriptures, and only once in the New Testament (2 Tim. iii. 8). The Apostle Paul became acquainted with them, most probably, from an ancient Jewish tradition, or, as Theodoret expresses it, 'from the unwritten teaching of the Jews.' They are found frequently in the Talmudical and Rabbinical writings, but with some variations.

JA'PHETH, a son of Noah. In Gen. v. 32 he is mentioned third in order; but some think, from Gen. x. 21 (comp. ix. 24), that he was the eldest of Noah's sons, begotten one hundred years before the flood. In Gen. x. 2, sq. he is called the progenitor of the extensive tribes in the west (of Europe) and north (of Asia), of the Armenians, Medes, Greeks, Thracians, &c. The Arabian traditions rank Japheth among the prophets, and enumerate eleven of his sons, the progenitors of as many Asiatic nations. In these

traditions he is therefore simply called progenitor of the Turks and Barbarians.

JARHA, the Egyptian slave of a Hebrew named Sheshan, who married the daughter of his master, and was, of course, made free. As Sheshan had no sons, his posterity is traced through this connection (1 Chron. ii. 34-41), which is the only one of the kind mentioned in Scripture. Jarha was doubtless a proselyte, and the anecdote seems to belong to the period of the sojourn in Egypt, although it is not easy to see how an Egyptian could there be slave to an Israelite.

JASHER, BOOK OF, a work no longer extant, but cited in Josh. x. 13, and 2 Sam. i. 18. In the former it is thus introduced: 'And the sun stood still, and the moon stayed, until the people had avenged themselves upon their enemies. Is not this written in the book of Jasher? So the sun stood still in the midst of heaven, and hasted not to go down about a whole day,' &c. And in the passage referred to in 2 Sam. i. it stands thus: ver. 17. 'And David lamented with this lamentation over Saul and over Jonathan his son.' ver. 18. '(Also he bade them teach the children of Judah [the use of] the bow: behold it is written in the book of Jasher.)' After which follows the lamentation of David. As the word Jasher signifies *just* or *upright*, by which word it is rendered in the margin of our Bibles, this book has been generally considered to have been so entitled as containing a history of *just men*. Bishop Lowth, however, conceives, from the poetical character of the two passages cited from it, that it was most probably a collection of national songs written at various times, and that it derived its name from *jashar*, 'he sang.' It is, at the same time, by no means an improbable conjecture, that the book was so called from the name of its author. Josephus speaks of the book of Jasher as one of the 'books laid up in the temple.'

The chief interest connected with the Scriptural book of Jasher arises from the circumstance that it is referred to as the authority for the standing still of the sun and moon. There are few passages in Biblical literature the explanation of which has more exercised the skill of commentators than this celebrated one. We shall here give a brief account of the most generally received interpretations.

The first is that which maintains that the account of the miracle is to be *literally* understood. According to this interpretation, which is the most ancient, the sun itself, which was then believed to have revolved round the earth, stayed his course for a day. Those who take this view argue that the theory of the *diurnal motion of the earth*, which has been the generally received one since the time of Galileo and Copernicus, is inconsistent with the Scripture narrative. Notwithstanding the general reception of the Copernican system of the universe, this view continued to be held by many divines, Protestant as well as Roman Catholic, and was strenuously maintained by Budeus and others in the last century.

But in more recent times the miracle has been explained so as to make it accord with the now received opinion respecting the earth's motion, and the Scripture narrative supposed to contain

rather an optical and popular, than a literal account of what took place on this occasion. So that it was in reality the earth, and not the sun, which stood still at the command of Joshua.

Another opinion is that first suggested by Spinosa, and afterwards maintained by Le Clerc, that the miracle was produced by refraction only, causing the sun to appear above the horizon after its setting, or by some other atmospherical phenomena, which produced sufficient light to enable Joshua to pursue and discomfit his enemies.

The last opinion we shall mention is that of the learned Jew Maimonides, viz. that Joshua only asked of the Almighty to grant that he might defeat his enemies before the going down of the sun, and that God heard his prayer, inasmuch as before the close of day the five kings with their armies were cut in pieces. Grotius, while he admitted that there was no difficulty in the Almighty's arresting the course of the sun, or making it reappear by refraction, approved of the explanation of Maimonides, which has been since that period adopted by many divines.

JASHO'BEAM, son of Hachmoni, one of David's worthies, and the first named in the two lists which are given of them (2 Sam. xxxiii. 8; 1 Chron. xi. 11).

The exploit of breaking through the host of the Philistines to procure David a draught of water from the well of Bethlehem, is ascribed to the three chief heroes, and therefore to Jashobeam, who was the first of the three (2 Sam. xxiii. 13-17; 1 Chron. xi. 15-19).

A Jashobeam is named among the Korhites who came to David at Ziklag (1 Chron. xii. 6); but this could scarcely have been the same with the preceding.

We also find a Jashobeam who commanded 24,000, and did duty in David's court in the month Nisan (1 Chron. xxvii. 2). He was the son of Zabdiel; if, therefore, he was the same as the first Jashobeam, his patronymic of 'the Hachmonite' must be referred to his race rather than to his immediate father. This seems likely.

JA'SON, a kinsman of St. Paul, and his host at Thessalonica, where the Jews forced his house in order to seize the Apostle. Not finding the Apostle, they dragged Jason himself and some other converts before the magistrates, who released them with an admonition (A.D. 53). Jason appears to have accompanied the Apostle to Corinth (Acts xvii. 5-9; Rom. xvi. 21).

JASPER. Our word Jasper is plainly from the Greek *jaspis*, which comes from the Hebrew word *yashpeh*. Jasper is a species of the quartz family, and embraces a great many varieties. The brown Egyptian variety was perhaps the one selected for the breastplate of the high-priest (Exod. xxxviii. 19; xxxix. 1). The brown is of various shades, disposed in concentric stripes. It occurs loose in the sands of Egypt, and is cut into ornaments.

JAVAN, the fourth son of Japhet. The interest connected with his name arises from his being the supposed progenitor of the original settlers in Greece and its isles [NATIONS, DISPERSION OF].

JAVELIN. [ARMS.]

JEJUSITES, one of the most powerful of the nations of Canaan, who settled about Mount Moriah, where they built Jerusalem, and called it Jebus, after the name of their founder (1 Chron. xi. 4). Although they were defeated with much slaughter, and Adonizedek, their king, slain by Joshua (Josh. x.), they were not wholly subdued, were able to retain their city till after his death (Judg. i. 8), and were not entirely dispossessed of it till the time of David (2 Sam. v.). By that time the inveteracy of the enmity between the Hebrews and such of the original inhabitants as remained in the land had much abated, and the rights of private property were respected by the conquerors. This we discover from the fact that the site on which the Temple afterwards stood belonged to a Jebusite, named Araunah, from whom it was purchased by King David, who declined to accept it as a free gift from the owner (2 Sam. xxiv.). This is the last we hear of the Jebusites.

JEDUTHUN (*praise-giver*), a Levite of Merari's family, and one of the four great masters of the temple music (1 Chron. xvi. 41, 42). This name is also put for his descendants, who occur later as singers and players on instruments (2 Chron. xxxv. 15; Neh. xi. 17).

1. **JEHOAHAZ** (*God-sustained*), son of Jehu, king of Israel, who succeeded his father in B.C. 856, and reigned seventeen years. As he followed the evil courses of the house of Jeroboam, the Syrians under Hazael and Benhadad were suffered to prevail over him; so that, at length, he had only left of all his forces fifty horsemen, ten chariots, and 10,000 foot. Overwhelmed by his calamities, Jehoahaz at length acknowledged the authority of Jehovah over Israel, and humbled himself before him; in consideration of which a deliverer was raised up for Israel in the person of Joash, this king's son, who was enabled to expel the Syrians and re-establish the affairs of the kingdom (2 Kings xiii. 1-9, 25).

2. **JEHOAHAZ**, otherwise called **SHALLUM**, seventeenth king of Judah, son of Josiah, whose reign began and ended in the year B.C. 608. After his father had been slain in resisting the progress of Pharaoh Necho, Jehoahaz, who was then twenty-three years of age, was raised to the throne by the people, and received at Jerusalem the regal anointing, which seems to have been usually omitted in times of order and of regular succession. He found the land full of trouble, but free from idolatry. Instead, however, of following the excellent example of his father, Jehoahaz fell into the accustomed crimes of his predecessors; and under the encouragements which his example or indifference offered, the idols soon re-appeared. It seems strange that in a time so short, and which must have been much occupied in arranging plans for resisting or pacifying the Egyptian king, he should have been able to deserve the stigma which the sacred record has left upon his name. But there is no limit except in the greatness of the divine power to the activity of evil dispositions. The sway of Jehoahaz was terminated in three months, when Pharaoh Necho, on his victorious return from the Euphrates, thinking it politic to reject a king not nominated by himself, removed him from the throne, and set thereon his brother Jehoiakim. This reign was the shortest in the kingdom of Judah, al-

though in that of Israel there were several shorter. The deposed king was at first taken as a prisoner to Riblah in Syria; but was eventually carried to Egypt, where he died (2 Kings xxiii. 30-35; 2 Chron. xxxvi. 1-4; 1 Chron. iii. 15; Jer. xxii. 10-12).

The anointing of this king has drawn attention to the defect of his title as the reason for the addition of that solemn ceremony. It appears from 1 Chron. iii. 15 that Josiah had four sons, of whom Johanan is expressly said to have been 'the first-born.' But he seems to have died before his father, as we nowhere find his name historically mentioned, while those of the other brothers are familiar to us. If, therefore, he died childless and Jehoahaz were the next son, his claim would have been good. But he was not the next son. His name, as Shallum, occurs last of the four in 1 Chron. iii. 15; and from the historical notices in 2 Kings xxiii. and 1 Chron. xxxvi. we ascertain that when Josiah died the ages of the three surviving sons were, Eliakim (Jehoiakim) twenty-five years, Jehoahaz (Shallum), twenty-three years, Mattaniah (Zedekiah) ten years; consequently Jehoahaz was preferred by the popular favour above his elder brother Jehoiakim, and the anointing, therefore, was doubtless intended to give to his imperfect claim the weight of that solemn ceremony. It was also probably suspected that, as actually took place, the Egyptian king would seek to annul a popular election unanctioned by himself; but as the Egyptians anointed their own kings, and attached much importance to the ceremony, the possibility that he would hesitate more to remove an anointed than an unanointed king might afford a further reason for the anointing of Jehoahaz [ANOIDTING].

Jehoahaz is supposed to be the person who is designated under the emblem of a young lion carried in chains to Egypt (Ezek. xiv. 3, 4).

JEHO'ASIL [JOASH.]

JEHOIACHIN (*God-appointed*), by contraction **JECONIAH** and **CONIAH**, nineteenth king of Judah, and son of Jehoiakim. When his father was slain, B.C. 599, the king of Babylon allowed him, as the rightful heir, to succeed. He was then eighteen years of age, according to 2 Kings xxiv. 8; but only eight according to 2 Chron. xxxvi. 9. Many attempts have been made to reconcile these dates, the most usual solution being that he had reigned ten years in conjunction with his father, so that he was eight when he began his joint reign, but eighteen when he began to reign alone. There are, however, difficulties in this view, which, perhaps, leave it the safest course to conclude that 'eight' in 2 Chron. xxxvi. 9, is a corruption of the text, such as might easily occur from the relation of the numbers eight and eighteen.

Jehoiachin followed the evil courses which had already brought so much disaster upon the royal house of David, and upon the people under its sway. He seems to have very speedily indicated a political bias adverse to the interests of the Chaldean empire; for in three months after his accession we find the generals of Nebuchadnezzar again laying siege to Jerusalem, according to the predictions of Jeremiah (xxii. 18; xxiv. 30). Convinced of the futility of resistance, Jehoiachin went out and surrendered as soon as Nebuchadnezzar arrived in person before the city. He

was sent away as a captive to Babylon, with his mother, his generals, and his troops, together with the artificers and other inhabitants of Jerusalem, to the number of ten thousand. Thus ended an unhappy reign of three months and ten days. If the Chaldean king had then put an end to the show of a monarchy, and annexed the country to his own dominions, the event would probably have been less unhappy for the nation. But still adhering to his former policy, he placed on the throne Mattaniah, the only surviving son of Josiah, whose name he changed to Zedekiah (2 Kings xxiv. 1-16; 2 Chron. xxxvi. 9, 10; Jer. xxix. 2; xxxvii. 1).

Jehoiachin remained in prison at Babylon during the lifetime of Nebuchadnezzar: but when that prince died, his son, Evil-merodach, not only released him, but gave him an honourable seat at his own table, with precedence over all the other dethroned kings who were kept at Babylon, and an allowance for the support of his rank (2 Kings xxv. 27-30; Jer. lii. 31-34). To what he owed this favour we are not told; but the Jewish commentators allege that Evil-merodach had himself been put into prison by his father during the last year of his reign, and had there contracted an intimate friendship with the deposed king of Judah.

The name of Jehoiachin re-appears to fix the epoch of several of the prophecies of Ezekiel (Ezek. i. 2), and of the deportation which terminated his reign (Esth. ii. vi.). In the genealogy of Christ (Matt. i. 11) he is named as the 'son of Josias' his uncle.

JEHOIADA (*God-known*), high-priest in the times of Ahaziah and Athaliah. He is only known from the part which he took in recovering the throne of Judah for the young Joash, who had been saved by his wife Jehoshebah from the massacre by which Athaliah sought to exterminate the royal line of David. The particulars of this transaction are related under other heads [ATHALIAH; JOASH]. Jehoiada manifested much decision and forecast on this occasion; and he used for good the great power which devolved upon him during the minority of the young king, and the influence which he continued to enjoy as long as he lived. The value of this influence is shown by the misconduct and the disorders of the kingdom after his death. He died in B.C. 834, at the age of 130, and his remains were honoured with a place in the sepulchre of the kings at Jerusalem (2 Kings xi. 12; 2 Chron. xxiii. xxiv.).

JEHOIAKIM (*God-established*), originally ELIAKIM, second son of Josiah, and eighteenth king of Judah. On the death of his father the people raised to the throne his younger brother Jehoahaz; but three months after, when the Egyptian king returned from the Euphrates, he removed Jehoahaz, and gave the crown to the rightful heir, Eliakim, whose name he changed to Jehoiakim. This change of name often took place in similar circumstances; and the altered name was in fact the badge of a tributary prince. Jehoiakim began to reign in B.C. 608, and reigned eleven years. He, of course, occupied the position of a vassal of the Egyptian empire, but however heavy may have been the Egyptian yoke, Jehoiakim was destined to pass under one heavier still.

In the third year of his reign, being besieged in Jerusalem, he was forced to submit to Nebuchadnezzar, and was by his order laden with chains, with the intention of sending him captive to Babylon (2 Chron. xxxvi. 6); but eventually the conqueror changed his mind and restored the crown to him. Many persons, however, of high family, and some even of the royal blood, were sent away to Babylon. Among these was Daniel, then a mere youth. A large proportion of the treasures and sacred vessels of the temple were also taken away and deposited in the idol-temple at Babylon (Dan. i. 1, 2). The year following the Egyptians were defeated upon the Euphrates (Jer. xlvi. 2), and Jehoiakim, when he saw the remains of the defeated army pass by his territory, could not but perceive how vain had been that reliance upon Egypt against which he had been constantly cautioned by Jeremiah (Jer. xxxi. 1; xlv. 1). In the same year the prophet caused a collection of his prophecies to be written out by his faithful Baruch, and to be read publicly by him in the court of the temple. This coming to the knowledge of the king, he sent for it and had it read before him. But he heard not much of the bitter denunciations with which it was charged, before he took the roll from the reader, and after cutting it in pieces threw it into the brasier, which, it being winter, was burning before him in the hall. The counsel of God against him, however, stood sure; a fresh roll was written, with the addition of a further and most awful denunciation against the king, occasioned by this foolish and sacrilegious act: 'He shall have none to sit upon the throne of David; and his dead body shall be cast out in the day to the heat and in the night to the frost' (Jer. xxxvi.). All this, however, appears to have made little impression upon Jehoiakim, who still walked in his old paths.

After three years of subjection, Jehoiakim, finding the king of Babylon fully engaged elsewhere, and deluded by the Egyptian party in his court, ventured to withhold his tribute, and thereby to throw off the Chaldean yoke. This step, taken contrary to the earnest remonstrances of Jeremiah, was the ruin of Jehoiakim. The land was ere long invaded by the armies of the Chaldeans, accompanied by a vast number of auxiliaries from the neighbouring countries, the Edonites, Moabites, and others, who were for the most part actuated by a fierce hatred against the Jewish name and nation. The events of the war are not related. Jerusalem was taken, or rather surrendered on terms, which Josephus alleges were little heeded by Nebuchadnezzar. It is certain that Jehoiakim was slain, but whether in one of the actions, or, as Josephus says, after the surrender, we cannot determine. His body remained exposed and unburied without the city, under the circumstances foretold by the prophet:—'He shall be buried with the burial of an ass, drawn and cast forth beyond the gates of Jerusalem' (Jer. xxii. 18, 19; 1 Chron. iii. 15; 2 Kings xxiii. 34-37; xxiv. 1-7; 2 Chron. xxxvi. 4-8).

It was not the object of Nebuchadnezzar to destroy altogether a power which, as tributary to him, formed a serviceable outpost towards Egypt, which seems to have been the great final object of all his designs in this quarter. He

therefore still maintained the throne of Judah, and placed on it Jehoachin, the son of the late king. He, however, sent away another body, a second corps of the nobles and chief persons of the nation, three thousand in number, among whom was Eze-kiel, afterwards called to prophesy in the land of his exile.

JEHONADAB. [JONADAB.]

JEHORAM (*God-exalted*), eldest son and successor of Jehoshaphat, and fifth king of Judah, who began to reign (separately) in B.C. 889, at the age of thirty-five years, and reigned five years. Jehoram was associated with his father in the later years of his reign, but he profited little by this association. He had unhappily been married to Athaliah, the daughter of Ahab and Jezebel; and her influence seems to have neutralized all the good he might have derived from the example of his father. One of the first acts of his reign was to put his brothers to death and seize the valuable appanages which their father had in his lifetime bestowed upon them. After this we are not surprised to find him giving way to the gross idolatries of that new and strange kind—the Phœnician—which had been brought into Israel by Jezebel, and into Judah by her daughter Athaliah. For these atrocities the Lord let forth his anger against Jehoram and his kingdom. The Edomites revolted, and, according to old prophecies (Gen. xxvii. 40), shook off the yoke of Judah. The Philistines on one side, and the Arabians and Cushites on the other, also grew bold against a king forsaken of God, and in repeated invasions spoiled the land of all its substance; they even ravaged the royal palaces, and took away the wives and children of the king, leaving him only one son, Ahaziah. Nor was this all; Jehoram was in his last days afflicted with a frightful disease in his bowels, which, from the terms employed in describing it, appears to have been malignant dysentery in its most shocking and tormenting form. After a disgraceful reign, and a most painful death, public opinion inflicted the posthumous dishonour of refusing him a place in the sepulchre of kings. Jehoram was by far the most impious and cruel tyrant that had as yet occupied the throne of Judah, though he was rivalled or surpassed by some of his successors (2 Kings viii. 16-24; 2 Chron. xxi.).

2. JEHORAM, King of Israel. [JORAM.]

JEHOSHAPHAT (*God-judged*), the fourth king of Judah, and son of Asa, whom he succeeded in B.C. 914, at the age of thirty-five, and reigned twenty-five years. He commenced his reign by fortifying his kingdom against Israel; and having thus secured himself against surprise from the quarter which gave most disturbance to him, he proceeded to purge the land from the idolatries and idolatrous monuments by which it was still tainted. Even the high places and groves, which former well-disposed kings had suffered to remain, were by the zeal of Jehoshaphat in a great measure destroyed. The chiefs, with priests and Levites, proceeded from town to town, with the book of the law in their hands, instructing the people, and calling back their wandering affections to the religion of their fathers. This was a beautiful and interesting circumstance in the operations of the young king.

Jehoshaphat was too well instructed in the

great principles of the theocracy not to know that his faithful conduct had entitled him to expect the divine protection. Of that protection he soon had manifest proofs. At home he enjoyed peace and abundance, and abroad security and honour. His renown extended to the neighbouring nations, and the Philistines, as well as the adjoining Arabian tribes, paid him rich tributes in silver and in cattle. He was thus enabled to put all his towns in good condition, to erect fortresses, to organize a powerful army, and to raise his kingdom to a degree of importance and splendour which it had not enjoyed since the revolt of the ten tribes.

The weak and impious Ahab at that time occupied the throne of Israel; and Jehoshaphat, having nothing to fear from his power, sought, or at least did not repel, an alliance with him. This is alleged to have been the grand mistake of his reign; and that it was such is proved by the consequences.

A few years after we find Jehoshaphat on a visit to Ahab, in Samaria, being the first time any of the kings of Israel and Judah had met in peace. He here experienced a reception worthy of his greatness; but Ahab failed not to take advantage of the occasion, and so worked upon the weak points of his character as to prevail upon him to take arms with him against the Syrians, with whom hitherto the kingdom of Judah never had any war or occasion of quarrel. However, Jehoshaphat was not so far infatuated as to proceed to the war without consulting God. The false prophets of Ahab poured forth ample promises of success, and one of them, named Zedekiah, resorting to material symbols, made him horns of iron, saying, 'Thus saith the Lord, with these shalt thou smite the Syrians till they be consumed.' Still Jehoshaphat was not satisfied; and the answer to his further inquiries extorted from him a rebuke of the reluctance which Ahab manifested to call Micah, 'the prophet of the Lord.' The fearless words of this prophet did not make the impression upon the king of Judah which might have been expected; or probably he then felt himself too deeply bound in honour to recede. He went to the fatal battle of Ramoth-Gilead, and there nearly became the victim of a plan which Ahab had laid for his own safety at the expense of his too confiding ally. He persuaded Jehoshaphat to appear as king, while he himself went disguised to the battle. This brought the heat of the contest around him, as the Syrians took him for Ahab; and if they had not in time discovered their mistake, he would certainly have been slain. Ahab was killed, and the battle lost [AHAB]; but Jehoshaphat escaped, and returned to Jerusalem.

On his return from this imprudent expedition he was met by the just reproaches of the prophet Jehu. The best atonement he could make for this error was by the course he actually took. He resumed his labours in the further extirpation of idolatry, in the instruction of the people, and the improvement of his realm. He now made a tour of his kingdom in person, that he might see the ordinances of God duly established, and witness the due execution of his intentions respecting the instruction of the people in the divine law. This tour enabled him to discern

many defects in the local administration of justice, which he then applied himself to remedy. He appointed magistrates in every city, for the determination of causes civil and ecclesiastical. Then he established a supreme council of justice at Jerusalem, composed of priests, Levites, and 'the chiefs of the fathers;' to which difficult cases were referred, and appeals brought from the provincial tribunals.

The activity of Jehoshaphat's mind was then turned towards the revival of that maritime commerce which had been established by Solomon. The land of Edom and the ports of the Euxine Gulf were still under the power of Judah; and in them the king prepared a fleet for the voyage to Ophir. Unhappily, however, he yielded to the wish of the king of Israel, and allowed him to take part in the enterprise. For this the expedition was doomed of God, and the vessels were wrecked almost as soon as they quitted port. Instructed by Eliezer, the prophet, as to the cause of this disaster, Jehoshaphat equipped a new fleet, and having this time declined the co-operation of the king of Israel, the voyage prospered. The trade was not, however, prosecuted with any zeal, and was soon abandoned [COMMERCE].

In accounting for the disposition of Jehoshaphat to contract alliances with the king of Israel, we are to remember that there existed a powerful tie between the two courts in the marriage of Jehoshaphat's eldest son with Athaliah, the daughter of Ahab; and, when we advert to the part in public affairs which that princess afterwards took, it may well be conceived that even thus early she possessed an influence for evil in the court of Judah.

After the death of Ahaziah, king of Israel, Joram, his successor, persuaded Jehoshaphat to join him in an expedition against Moab. This alliance was, however, on political grounds, more excusable than the two former, as the Moabites, who were under tribute to Israel, might draw into their cause the Edomites, who were tributary to Judah. Besides, Moab could be invaded with most advantage from the south, round by the end of the Dead Sea; and the king of Israel could not gain access to them in that quarter but by marching through the territories of Jehoshaphat. The latter not only joined Joram with his own army, but required his tributary, the king of Edom, to bring his forces into the field. During seven days' march through the wilderness of Edom, the army suffered much from want of water; and by the time the allies came in sight of the army of Moab, they were ready to perish from thirst. In this emergency the pious Jehoshaphat thought, as usual, of consulting the Lord; and hearing that the prophet Elisha was in the camp, the three kings proceeded to his tent. For the sake of Jehoshaphat, and for his sake only, deliverance was promised; and it came during the ensuing night, in the shape of an abundant supply of water, which rolled down the exhausted wadis, and filled the pools and hollow grounds. Afterwards Jehoshaphat took his full part in the operations of the campaign, till the armies were induced to withdraw in horror, by witnessing the dreadful act of Mesha, king of Moab, in offering up his eldest son in sacrifice upon the wall of the town in which he was shut up.

This war kindled another much more dangerous to Jehoshaphat. The Moabites, being highly exasperated at the part he had taken against them, turned all their wrath upon him. They induced their kindred, the Ammonites, to join them, obtained auxiliaries from the Syrians, and even drew over the Edomites; so that the strength of all the neighbouring nations may be said to have been united for this great enterprise. The allied forces entered the land of Judah and encamped at Engedi, near the western border of the Dead Sea. In this extremity Jehoshaphat felt that all his defence lay with God. A solemn fast was held, and the people repaired from the towns to Jerusalem to seek help of the Lord. In the presence of the assembled multitude the king, in the court of the temple, offered up a fervent prayer to God. He ceased; and in the midst of the silence which ensued, a voice was raised pronouncing deliverance in the name of the Lord, and telling them to go out on the morrow to the cliffs overlooking the camp of the enemy, and see them all overthrown without a blow from them. The voice was that of Jahaziel, one of the Levites. His words came to pass. The allies quarrelled among themselves, and destroyed each other; so that when the Judahites came the next day they found their dreaded enemies all dead, and nothing was left for them but to take the rich spoils of the slain. This done, they returned with triumphal songs to Jerusalem. This great event was recognised even by the neighbouring nations as the act of God; and so strong was the impression which it made upon them, that the remainder of the good king's reign was altogether undisturbed. His death, however, took place not very long after this, at the age of sixty, after having reigned twenty-five years, B.C. 896. He left the kingdom in a prosperous condition to his eldest son Jehoram, whom he had in the last years of his life associated with him in the government.

JEHOSHAPHAT, VALLEY OF, the name now given to the valley which bounds Jerusalem on the East, and separates it from the Mount of Olives [JERUSALEM].

In Joel iii. 2, 12, we read, 'the Lord will gather all nations in the valley of Jehoshaphat, and plead with them there.' Many interpreters, Jewish and Christian, conclude from this that the last judgment is to take place in the above-mentioned valley. But there is no reason to suppose that the valley then bore any such name; and more discreet interpreters understand the text to denote a valley in which some great victory was to be won, most probably by Nebuchadnezzar, which should utterly discomfit the ancient enemies of Israel, and resemble the victory which Jehoshaphat obtained over the Ammonites, Moabites, and Edomites (2 Chron. xx. 22-26). Others translate the name Jehoshaphat into *God's judgment*, and thus read, 'the valley of God's judgment,' which is doubtless symbolical, like 'the valley of decision,' i. e. of punishment, in the same chapter.

JEHOSHABA, daughter of Jehoram, sister of Ahaziah, and aunt of Joash, kings of Judah. The last of these owed his life to her, and his crown to her husband, the high-priest Jehoiada [JEHOIADA].

JEHOVAH, or rather perhaps JANVH, the

name by which God was pleased to make himself known, under the covenant, to the ancient Hebrews (Exod. vi. 2, 3). The import of this name has been considered under the head GEN.

JEHU (*God is*), tenth king of Israel, and founder of its fourth dynasty, who began to reign in a.c. 884, and reigned twenty-eight years.

Jehu held a command in the Israelite army posted at Ramoth-Gilead to hold in check the Syrians, who of late years had made strenuous efforts to extend their frontier to the Jordan, and had possessed themselves of much of the territory of the Israelites east of that river. Ahaziah, king of Judah, had taken part with Joram, king of Israel, in this war; and as the latter had been severely wounded in a recent action, and had gone to Jezreel to be healed of his wounds, Ahaziah had also gone thither on a visit of sympathy to him.

In this state of affairs a council of war was held among the military commanders in camp, when very unexpectedly one of the disciples of the prophets, known for such by his garb, appeared at the door of the tent, and called forth Jehu, declaring that he had a message to deliver to him. He had been sent by Elisha the prophet, in discharge of a duty which long before had been confided by the Lord to Elijah (1 Kings xix. 16), and from him had devolved on his successor. When they were alone the young man drew forth a horn of oil and poured it upon Jehu's head, with the words, 'Thus saith the Lord God of Israel, I have anointed thee king over the people of the Lord, even over Israel. And thou shalt smite the house of Ahab thy master, that I may avenge the blood of my servants the prophets, and the blood of all the servants of the Lord, at the hand of Jezebel' (2 Kings ix. 7, 8). Jehu returned to the council, probably with an altered air, for he was asked what had been the communication of the young prophet to him. He told them plainly; and they were obviously ripe for defection from the house of Ahab, for immediately, taking him in triumph to 'the top of the stairs,' they spread their mantles beneath his feet, and proclaimed him king by sound of trumpet in the presence of all the troops.

Jehu was not a man to lose any advantage through remissness. He immediately entered his chariot, in order that his presence at Jezreel should be the first announcement which Joram could receive of this revolution.

As soon as the advance of Jehu and his party was seen in the distance by the watchmen upon the palace-tower in Jezreel, two messengers were successively sent forth to meet him, and were commanded by Jehu to follow in his rear. But when the watchman reported that he could now recognise the furious driving of Jehu, Joram went forth himself to meet him, and was accompanied by the king of Judah. They met in the field of Naboth, so fatal to the house of Ahab. The king saluted him with 'Is it peace, Jehu?' and received the answer, 'What peace, so long as the whoredoms (idolatries) of thy mother Jezebel and her witchcrafts are so many?' This completely opened the eyes of Joram, who exclaimed to the king of Judah, 'There is treachery, O Ahaziah!' and turned to flee. But Jehu immediately drew a bow with his full strength and sent forth an arrow which passed through the

king's heart. He then caused the body to be thrown back into the field of Naboth, out of which he had passed in his attempt at flight. The king of Judah contrived to escape, but not without a wound, of which he afterwards died at Megiddo [AHAZIAH]. Jehu then entered the city, whither the news of this transaction had already preceded him. As he passed under the walls of the palace Jezebel herself, studiously arrayed for effect, appeared at one of the windows, and saluted him with a question such as might have shaken a man of weaker nerves, 'Had Zinri peace, who slew his master?' But Jehu was unmoved, and instead of answering her, called out, 'Who is on my side, who?' when several eunuchs made their appearance at the window, to whom he cried, 'Throw her down!' and immediately this proud and guilty woman lay a blood-stained corpse in the road, and was trodden under foot by the horses [JEZEHEL]. Jehu then went in and took possession of the palace.

He was now master of Jezreel, which was, next to Samaria, the chief town of the kingdom; but he could not feel secure while the capital itself was in the hands of the royal family, and of those who might be supposed to feel strong attachment to the house of Ahab. The force of the blow which he had struck was, however, felt even in Samaria. When therefore he wrote to the persons in authority there the somewhat ironical but designedly intimidating counsel, to set up one of the young princes in Samaria as king and fight out the matter which lay between them, they sent a very submissive answer, giving in their adhesion, and professing their readiness to obey in all things his commands. A second letter from Jehu tested this profession in a truly horrid, and exceedingly Oriental manner, requiring them to appear before him on the morrow, bringing with them the heads of all the royal princes in Samaria. A fallen house meets with little pity in the East; and when the new king left his palace the next morning, he found seventy human heads piled up in two heaps at his gate. There, in the sight of these heaps, Jehu took occasion to explain his conduct, declaring that he must be regarded as the appointed minister of the divine decrees, pronounced long since against the house of Ahab by the prophets, not one of whose words should fall to the ground. He then continued his proscriptions by exterminating in Jezreel not only all in whose veins the blood of the condemned race flowed, but also—by a considerable stretch of his commission—those officers, ministers, and creatures of the late government, who, if suffered to live, would most likely be disturbers of his own reign. He then proceeded to Samaria. So rapid had been these proceedings that he met some of the nephews of the king of Judah, who were going to join their uncle at Jezreel, and had as yet heard nothing of the revolution which had taken place. These also perished under Jehu's now fully-awakened thirst for blood, to the number of forty-two persons.

On the way he took up into his chariot the pious Jehonadab the Rechabite, whose austere virtue and respected character would, as he felt, go far to hallow his proceedings in the eyes of the multitude. At Samaria he continued the extirpation of the persons more intimately connected with the late government. This, far from being in any way singular, is a common circum-

stance in Eastern revolutions. But the great object of Jehu was to exterminate the ministers and more devoted adherents of Baal, who had been much encouraged by Jezebel. There was even a temple to this idol in Samaria; and Jehu, never scrupulous about the means of reaching objects which he believed to be good, laid a snare by which he hoped to cut off the main body of Baal's ministers at one blow. He professed to be a more zealous servant of Baal than Ahab had been, and proclaimed a great festival in his honour, at which none but his true servants were to be present. The prophets, priests, and officers of Baal assembled from all parts for this great sacrifice, and sacerdotal vestments were given to them, that none of Jehovah's worshippers might be taken for them. When the temple was full, soldiers were posted so that none might escape; and so soon as the sacrifice had been offered, the word was given by the king, the soldiers entered the temple, and put all the worshippers to the sword. The temple itself was then demolished, the images overthrown, and the site turned into a common jakes.

Notwithstanding this zeal of Jehu in exterminating the grosser idolatries which had grown up under his immediate predecessors, he was not prepared to subvert the policy which had led Jeroboam and his successors to maintain the schismatic establishment of the golden calves in Dan and Beth-el. Here Jehu fell short: and this very policy, apparently so prudent and farsighted, by which he hoped to secure the stability and independence of his kingdom, was that on account of which the term of rule granted to his dynasty was shortened. For this, it was foretold that his dynasty should extend only to four generations; and for this, the divine aid was withheld from him in his wars with the Syrians under Hazael on the eastern frontier. Hence the war was disastrous to him, and the Syrians were able to maintain themselves in the possession of a great part of his territories beyond the Jordan. He died in B.C. 856, and was buried in Samaria, leaving the throne to his son Jehonahaz.

2. JEHU, son of Hanani, a prophet, who was sent to pronounce upon Baasha, king of Israel, and his house, the same awful doom which had been already executed upon the house of Jeroboam (1 Kings xvi. 1-7). The same prophet was, many years after, commissioned to reprove Jehoshaphat for his dangerous connection with the house of Ahab (2 Chron. xix. 2).

JEPHTHAH (*opener*), ninth judge of Israel, of the tribe of Manasseh. He was the son of a person named Gilead by a concubine. After the death of his father he was expelled from his home by the envy of his brothers, who refused him any share of the heritage, and he withdrew to the land of Tob, beyond the frontier of the Hebrew territories. It is clear that he had before this distinguished himself by his daring character and skill in arms; for no sooner was his withdrawal known than a great number of men of desperate fortunes repaired to him, and he became their chief. His position was now very similar to that of David when he withdrew from the court of Saul. To maintain the people who had thus linked their fortunes with his, there was no other resource than that sort of brigandage which is accounted honourable in the East, so

long as it is exercised against public or private enemies, and is not marked by needless cruelty or outrage.

Jephthah led this kind of life for some years, during which his dashing exploits and successful enterprises procured him a higher military reputation than any other man of his time enjoyed.

After the death of Jair the Israelites gradually fell into their favourite idolatries, and were punished by subjection to the Philistines on the west of the Jordan, and to the Ammonites on the east of that river. The oppression which they sustained for eighteen years became at length so heavy that they recovered their senses and returned to the God of their fathers with humiliation and tears; and he was appeased, and promised them deliverance from their affliction (B.C. 1143).

The tribes beyond the Jordan having resolved to oppose the Ammonites, Jephthah seems to occur to every one as the most fitting leader. A deputation was accordingly sent to invite him to take the command. After some demur, on account of the treatment he had formerly received, he consented. The rude hero commenced his operations with a degree of diplomatic consideration and dignity for which we are not prepared. The Ammonites being assembled in force for one of those ravaging incursions by which they had repeatedly desolated the land, he sent to their camp a formal complaint of the invasion, and a demand of the ground of their proceeding. Their answer was, that the land of the Israelites beyond the Jordan was theirs. It had originally belonged to them, from whom it had been taken by the Amorites, who had been dispossessed by the Israelites; and on this ground they claimed the restitution of these lands. Jephthah's reply laid down the just principle which has been followed out in the practice of civilized nations, and is maintained by all the great writers on the law of nations. The land belonged to the Israelites by right of conquest from the *actual* possessors; and they could not be expected to recognise any antecedent claim of former possessors, for whom they had not acted, who had rendered them no assistance, and who had themselves displayed hostility against the Israelites. But the Ammonites re-asserted their former views, and on this issue they took the field.

When Jephthah set forth against the Ammonites he solemnly vowed to the Lord, 'If thou shalt without fail deliver the children of Ammon into my hands, then it shall be, that whatsoever cometh forth of the doors of my house to meet me, when I return in peace from the children of Ammon, shall surely be the Lord's, and I will offer it up for a burnt offering.' He was victorious. The Ammonites sustained a terrible overthrow. He did return in peace to his house in Mizpeh. As he drew nigh his house, the one that came forth to meet him was his own daughter, his only child, in whom his heart was bound up. She, with her fair companions, came to greet the triumphant hero 'with timbrels and with dances.' But he no sooner saw her than he rent his robes, and cried, 'Alas, my daughter! thou hast brought me very low; . . . for I have opened my mouth unto the Lord, and cannot go back.' Nor did she ask it. She replied, 'My father, if thou hast opened thy mouth unto the Lord, do to me as

ording to that which has proceeded out of thy mouth; forasmuch as the Lord hath taken vengeance for thee of thine enemies, the children of Ammon.' But after a pause she added, 'Let this thing be done for me: let me alone two months, that I may go up and down upon the mountains, and bewail my virginity, I and my fellows.' Her father of course assented; and when the time expired she returned, and, we are told, 'he did with her according to his vow.' It is then added that it became 'a custom in Israel, that the daughters of Israel went yearly to lament the daughter of Jephthah the Gileadite three days in the year.'

The victory over the Ammonites was followed by a quarrel with the proud and powerful Ephraimites on the west of the Jordan. This tribe was displeased at having had no share in the glory of the recent victory, and a large body of men belonging to it, who had crossed the river to share in the action, used very high and threatening language when they found their services were not required. Jephthah, finding his remonstrances had no effect, re-assembled some of his disbanded troops and gave the Ephraimites battle, when they were defeated with much loss. The victors seized the fords of the Jordan, and when any one came to pass over, they made him pronounce the word *Shibboleth* [an ear of corn], but if he could not give the aspiration, and pronounced the word as *Sibboleth*, they knew him for an Ephraimite, and slew him on the spot.

Jephthah judged Israel six years, during which we have reason to conclude that the exercise of his authority was almost if not altogether confined to the country east of the Jordan.

Volumes have been written on the subject of 'Jephthah's rash vow'; the question being whether, in doing to his daughter 'according to his vow,' he really did offer her in sacrifice or not. The negative has been stoutly maintained by many able pens, from a natural anxiety to clear the character of one of the heroes in Israel from so dark a stain. But the more the plain rules of common sense have been exercised in our view of biblical transactions, and the better we have succeeded in realizing a distinct idea of the times in which Jephthah lived and of the position which he occupied, the less reluctance there has been to admit the interpretation which the first view of the passage suggests to every reader, which is, that he really did offer her in sacrifice. The explanation which denies this maintains that she was rather doomed to perpetual celibacy; but to live unmarried was required by no law, custom, or devotion among the Jews: no one had a right to impose so odious a condition on another, nor is any such condition implied or expressed in the vow which Jephthah uttered. The Jewish commentators themselves generally admit that Jephthah really sacrificed his daughter; and even go so far as to allege that the change in the political dynasty from the house of Eleazar to that of Ithamar was caused by the high-priest of the time having suffered this transaction to take place.

It is very true that human sacrifices were forbidden by the law. But in the rude and unsettled age in which the judges lived, when the Israelites had adopted a vast number of erroneous notions and practices from their heathen neighbours, many

things were done, even by good men, which the law forbade quite as positively as human sacrifice.

Again, Jephthah vows that whatsoever came forth from the door of his house to meet him 'shall surely be the Lord's, and I will offer it up for a burnt-offering,' which, in fact, was the regular way of making a thing wholly the Lord's. Afterwards we are told that 'he did with her according to his vow,' that is, according to the plain meaning of plain words, offered her for a burnt-offering. Then follows the intimation that the daughters of Israel lamented her four days every year. People lament the dead, not the living. The whole story is consistent and intelligible, while the sacrifice is understood to have actually taken place; but becomes perplexed and difficult as soon as we begin to turn aside from this obvious meaning in search of recondite explanations.

Professor Bush, in his elaborate note on the text, maintains with us that a human sacrifice was all along contemplated. But he suggests that during the two months Jephthah might have obtained better information respecting the nature of vows, by which he would have learned that his daughter could not be legally offered, but might be redeemed at a valuation (Lev. xxvii. 2-12). This is possible, and is much more likely than the popular alternative of perpetual celibacy; but we have serious doubts whether even this meets the conclusion that 'he did with her according to his vow.' Besides, in this case, where was the ground for the annual 'lamentations' of the daughters of Israel, or even for the 'celebrations' which some understand the word to mean?

JEREMIAH (*raised up or appointed by God*), was the son of Hilkiah, a priest of Anathoth, in the land of Benjamin [ANATHOTH]. Jeremiah was very young when the word of the Lord first came to him (ch. i. 6). This event took place in the thirteenth year of Josiah (B.C. 629), whilst the youthful prophet still lived at Anathoth. It would seem that he remained in his native city several years, but at length, in order to escape the persecution of his fellow townsmen (ch. xi. 21), and even of his own family (ch. xii. 6), as well as to have a wider field for his exertions, he left Anathoth and took up his residence at Jerusalem. The finding of the book of the law five years after the commencement of his predictions, must have produced a powerful influence on the mind of Jeremiah, and king Josiah no doubt found him a powerful ally in carrying into effect the reformation of religious worship (2 Kings xxiii. 1-25). During the reign of this monarch we may readily believe that Jeremiah would be in no way molested in his work; and that from the time of his quitting Anathoth to the eighteenth year of his ministry, he probably uttered his warnings without interruption, though with little success (see ch. xi.). Indeed, the reformation itself was nothing more than the forcible repression of idolatrous and heathen rites, and the re-establishment of the external service of God, by the command of the king. No sooner, therefore, was the influence of the court on behalf of the true religion withdrawn, than it was evident that no real improvement had taken place in the minds of the people. Jeremiah, who hitherto was at least protected by the influence of the pious king Josiah, soon became the object of attack, as

he must doubtless have long been the object of dislike to those whose interests were identified with the corruptions of religion. We hear nothing of the prophet during the three months which constituted the short reign of Jehoiachaz; but 'in the beginning of the reign of Jehoiakim' the prophet was interrupted in his ministry by 'the priests and the prophets,' who with the populace brought him before the civil authorities, urging that capital punishment should be inflicted on him for his threatenings of evil on the city unless the people amended their ways (ch. xxvi.). The princes seem to have been in some degree aware of the results which the general corruption was bringing on the state, and if they did not themselves yield to the exhortations of the prophet, they acknowledged that he spoke in the name of the Lord, and were quite averse from so openly renouncing His authority as to put His messenger to death. It appears, however, that it was rather owing to the personal influence of one or two, especially Ahikam, than to any general feeling favourable to Jeremiah, that his life was preserved. In the fourth year of Jehoiakim (B.C. 606) he was commanded to write the predictions which had been given through him, and to read them to the people. As he was at that time 'shut up,' and could not himself go into the house of the Lord (ch. xxxvi. 5), he deputed Baruch to write the predictions after him, and to read them publicly on the fast-day. These threatenings being thus anew made public, Baruch was summoned before the princes to give an account of the manner in which the roll containing them had come into his possession. The princes, who, without strength of principle to oppose the wickedness of the king, had sufficient respect for religion, as well as sagacity enough to discern the importance of listening to the voice of God's prophet, advised both Baruch and Jeremiah to conceal themselves, whilst they endeavoured to influence the mind of the king by reading the roll to him. The result showed that their precautions were not needless. The bold self-will and reckless daring of the monarch refused to listen to any advice, even though coming with the professed sanction of the Most High. Having read three or four leaves, 'he cut the roll with the penknife and cast it into the fire that was on the hearth, until all the roll was consumed,' and gave immediate orders for the apprehension of Jeremiah and Baruch, who, however, were both preserved from the vindictive monarch. Of the history of Jeremiah during the eight or nine remaining years of the reign of Jehoiakim we have no certain account. At the command of God he procured another roll, in which he wrote all that was in the roll destroyed by the king, 'and added besides unto them many like words' (ch. xxxvi. 32). In the short reign of his successor Jehoiachin or Jeconiah, we find him still uttering his voice of warning (see ch. xlii. 18; comp. 2 Kings xxiv. 12, and ch. xxiii. 24-30), though without effect. It was probably either during this reign, or at the commencement of the reign of Zedekiah, that he was put in confinement by Pashur, the 'chief governor of the house of the Lord.' He seems, however, soon to have been liberated, as we find that 'they had not put him into prison' when the army of Nebuchadnezzar commenced the siege

of Jerusalem. The Chaldeans drew off their army for a time, on the report of help coming from Egypt to the besieged city; and now feeling the danger to be imminent, and yet a ray of hope brightening their prospects, the king entreated Jeremiah to pray to the Lord for them. The hopes of the king were not responded to in the message which Jeremiah received from God. He was assured that the Egyptian army should return to their own land, that the Chaldeans should come again, and that they should take the city and burn it with fire (ch. xxxvi. 7, 8). The princes, apparently irritated by a message so contrary to their wishes, made the departure of Jeremiah from the city, during the short respite, the pretext for accusing him of deserting to the Chaldeans, and he was forthwith cast into prison. The king seems to have been throughout inclined to favour the prophet, and sought to know from him the word of the Lord; but he was wholly under the influence of the princes, and dared not communicate with him except in secret (ch. xxxviii. 14, 28); much less could he follow advice so obnoxious to their views as that which the prophet gave. Jeremiah, therefore, more from the hostility of the princes than the inclination of the king, was still in confinement when the city was taken. Nebuchadnezzar formed a more just estimate of his character and of the value of his counsels, and gave a special charge to his captain Nebuzar-adan, not only to provide for him but to follow his advice (ch. xxxix. 12). He was accordingly taken from the prison and allowed free choice either to go to Babylon, where doubtless he would have been held in honour in the royal court, or to remain with his own people. We need scarcely be told that he who had devoted more than forty years of unrequited service to the welfare of his falling country should choose to remain with the remnant of his people rather than seek the precarious fame which might await him at the court of the king of Babylon. Accordingly he went to Mizpah with Gedaliah, whom the Babylonian monarch had appointed governor of Judaea; and after his murder sought to persuade Johanan, who was then the recognised leader of the people, to remain in the land, assuring him and the people, by a message from God in answer to their inquiries, that if they did so the Lord would build them up, but if they went to Egypt the evils which they sought to escape should come upon them there (ch. xlii.). The people refused to attend to the divine message, and under the command of Johanan went into Egypt, taking Jeremiah and Baruch along with them (ch. xliii. 6). In Egypt the prophet still sought to turn the people to the Lord, from whom they had so long and so deeply revolted (ch. xliiv.); but his writings give us no subsequent information respecting his personal history. Ancient traditions assert that he spent the remainder of his life in Egypt. According to the pseudo-Epiphanius he was stoned by the people at Taphne, the same as Taphneph, where the Jews were settled. It is said that his bones were removed by Alexander the Great to Alexandria.

Jeremiah was contemporary with Zephaniah, Habakkuk, Ezekiel, and Daniel. None of these, however, are in any remarkable way connected with him, except Ezekiel. The writings and

character of these two eminent prophets furnish many very interesting points both of comparison and contrast. Both, during a long series of years, were labouring at the same time and for the same object. The representations of both, far separated as they were from each other, are in substance singularly accordant; yet there is at the same time a marked difference in their modes of statement, and a still more striking diversity in the character and natural disposition of the two. No one who compares them can fail to perceive that the mind of Jeremiah was of a softer and more delicate texture than that of his illustrious contemporary. His whole history convinces us that he was by nature mild and retiring, highly susceptible and sensitive, especially to sorrowful emotions, and rather inclined, as we should imagine, to shrink from danger than to brave it. Yet, with this acute perception of injury, and natural repugnance from being 'a man of strife,' he never in the least degree shrinks from publicity; nor is he at all intimidated by reproach or insult, or even by actual punishment and threatened death, when he has the message of God to deliver. He is, in truth, as remarkable an instance, though in a different way, of the overpowering influence of the divine energy, as Ezekiel. The one presents the spectacle of the power of divine inspiration acting on a mind naturally of the firmest texture, and at once subduing to itself every element of the soul; whilst the other furnishes an example, not less memorable, of moral courage sustained by the same divine inspiration against the constantly opposing influence of a love of retirement and strong susceptibility to impressions of outward evil.

The style of Jeremiah corresponds with this view of the character of his mind; though not deficient in power, it is peculiarly marked by pathos. He delights in the expression of the tender emotions, and employs all the resources of his imagination to excite corresponding feelings in his readers. He has an irresistible sympathy with the miserable, which finds utterance in the most touching descriptions of their condition. He seizes with wonderful tact those circumstances which point out the objects of his pity as the objects of sympathy, and founds his expostulations on the miseries which are thus exhibited. His book of Lamentations is an astonishing exhibition of his power to accumulate images of sorrow. The whole series of elegies has but one object—the expression of sorrow for the forlorn condition of his country; and yet he presents this to us in so many lights, alludes to it by so many figures, that not only are his mournful strains not felt to be tedious repetitions, but the reader is captivated by the plaintive melancholy which pervades the whole.

The genuineness and canonicity of the writings of Jeremiah in general are established both by the testimony of ancient writers, and by quotations and references which occur in the New Testament.

The principal predictions relating to the Messiah are found in ch. xxiii. 1-8; xxx. 31-40; xxxiii. 14-26.

JERICHO, a town in the plain of the same name, not far from the river Jordan, at the point where it enters the Dead Sea. It lay before the Israelites when they crossed the river, on first

entering the Promised Land; and the account which the spies who were sent by them into the city received from their hostess Rahab, tended much to encourage their subsequent operations, as it showed that the inhabitants of the country were greatly alarmed at their advance, and in signal miracles which had marked their course from the Nile to the Jordan. The strange manner in which Jericho itself was taken must have strengthened this impression in the country, and appears, indeed, to have been designed for that effect. The town was utterly destroyed by the Israelites, who pronounced an awful curse upon whoever should rebuild it; and all the inhabitants were put to the sword, except Rahab and her family (Josh. ii. 6). In these accounts Jericho is repeatedly called 'the city of palm-trees,' which shows that the hot and dry plain, so similar to the land of Egypt, was noted beyond other parts of Palestine for the tree which abounds in that country, but which was and is less common in the land of Canaan than general readers and painters suppose. It has now almost disappeared even from the plain of Jericho, although specimens remain in the plain of the Mediterranean coast.

Notwithstanding the curse, Jericho was soon rebuilt (Hiel), and became a school of the prophets (Judg. iii. 13; 1 Kings xvi. 34; 2 Kings ii. 4, 5). Its inhabitants returned after the exile, and it was eventually fortified by the Syrian general Bacchides (Ezra ii. 34; Neh. iii. 2; 1 Macc. ix. 50). Pompey marched from Scythopolis, along the valley of the Jordan, to Jericho, and thence to Jerusalem; and Strabo speaks of the castles Thrax and Taurus, in or near Jericho, as having been destroyed by him. Herod the Great, in the beginning of his career, captured and sacked Jericho, but afterwards strengthened and adorned it, when he had redeemed its revenues from Cleopatra, on whom the plain had been bestowed by Antony. He appears to have often resided here, probably in winter: he built over the city a fortress called Cypros, between which and the former palace he erected other palaces, and called them by the names of his friends. Here also was a hippodrome or circus, in which the same tyrant, when lying at Jericho on his death-bed, caused the nobles of the land to be shut up, for massacre after his death. He died here; but his bloody intention was not executed. The palace at this place was afterwards rebuilt more magnificently by Archelaus. By this it will be seen that the Jericho which existed in the time of our Saviour was a great and important city—probably more so than it had ever been since its foundation. It was once visited by him, when he lodged with Zaccheus, and healed the blind man (Luke xviii. 35-43; xix. 1-7; Matt. xx. 29-34; Mark x. 46-52). Jericho was afterwards made the head of one of the toparchies, and was visited by Vespasian before he left the country, who stationed there the tenth legion in garrison. Eusebius and Jerome describe Jericho as having been destroyed during the siege of Jerusalem, on account of the perfidy of the inhabitants, but add that it was afterwards rebuilt. The town, however, appears to have been overthrown during the Mohammedan conquest; for Adamnanus, at the close of the seventh century, describes the site as without human habitations, and covered with corn and vines. The celebrated palm-groves

still existed. In the next century a church is mentioned; and in the ninth century several monasteries appear. About the same time the plain of Jericho is again noticed for its fertility and peculiar products; and it appears to have been brought under cultivation by the Saracens, for the sake of the sugar and other products for which the soil and climate were more suitable than any other in Palestine. Ruins of extensive aqueducts, with pointed Saracenic arches, remain in evidence of the elaborate irrigation and culture of this fine plain—which is nothing without water, and everything with it—at a period long subsequent to the occupation of the country by the Jews. It is to this age that we may probably refer the origin of the castle and village, which have since been regarded as representing Jericho. The place has been mentioned by travellers and

pilgrims down to the present time as a poor hamlet consisting of a few houses. In the fifteenth century the square castle or tower began to pass among pilgrims as the house of Zaccheus, a title which it bears to the present day.

The village now regarded as representing Jericho is supposed to date its origin from the ninth century. It bears the name of Rihah, and is situated about the middle of the plain, six miles west from the Jordan, in N. lat. $31^{\circ} 57'$, and E. long. $35^{\circ} 33'$. Dr. Olin describes the present village as 'the meanest and fondest of Palestine.' It may perhaps contain forty dwellings, formed of small loose stones. The most important object is a square castle or tower, which Dr. Robinson supposes to have been constructed to protect the cultivation of the plain under the Saracens. It is thirty or forty feet square, and about the

221. [Jericho.]

same height, and is now in a dilapidated condition.

Rihah may contain about two hundred inhabitants, who have a sickly aspect, and are reckoned vicious and indolent. They keep a few cattle and sheep, and till a little land for grain as well as for gardens. A small degree of industry and skill bestowed on this prolific soil, favoured as it is with abundant water for irrigation, would amply reward the labour. But this is wanting; and everything bears the mark of abject, and, which is unusual in the East, of squalid poverty. There are some fine fig-trees near the village, and some vines in the gardens. But the most distinguishing feature of the whole plain is a noble grove of trees which borders the village on the west, and stretches away northward to the distance of two miles or more.

This grove owes its existence to the waters of one of the fountains, the careful distribution of

which over the plain by canals and aqueducts did once, and might still, cover it with abundance. One of these fountains is called by the natives Ain es-Sultan, but by pilgrims the Fountain of Elias, being supposed to be the same whose bitter waters were cured by that prophet. Dr. Robinson thinks there is reason for this conclusion. It lies almost two miles N.W. from the village, and is a large and beautiful fountain of sweet and pleasant waters. Beyond the fountain rises up the bold perpendicular face of the mountain Quarantana (Kuruntul), from the foot of which a line of low hills runs out N.N.E. in front of the mountains, and forms the ascent to a narrow tract of table-land along their base. On this tract, at the foot of the mountains, about two and a half miles N.N.W. from the Ain es-Sultan, is the still larger fountain of Duk, the waters of which are brought along the base of Quarantana in a canal to the top of

the declivity at the back of Ain es-Sultan, whence they were formerly distributed to several mills, and scattered over the upper part of the plain.

Under the mountains on the western confine of the plain, about two miles west of Rihah, and just where the road from Jerusalem comes down into the plain, are considerable ruins, extending both on the north and south side of the road. Mr. Buckingham was the first to suspect that these were the ruins of the ancient Jericho. He shows that the situation agrees better with the ancient intimations than does that of the modern village, near which no trace of ancient ruins can be found. Since this idea was started the matter has been examined by other travellers; and the conclusion seems to be that Rihah is certainly not the ancient Jericho, and that there is no site of ancient ruins on the plain which so well answers to the intimations as that now described; although even here some drawback to a satisfactory conclusion is felt, in the absence of any traces of those great buildings which belonged to the Jericho of king Herod.

JEROBOAM, son of Nebat, and first king of Israel, who became king B.C. 975, and reigned 22 years.

He was of the tribe of Ephraim, the son of a widow named Zeruiah, when he was noticed by Solomon as a clever and active young man, and was appointed one of the superintendents of the works which that magnificent king was carrying on at Jerusalem. This appointment, the reward of his merits, might have satisfied his ambition had not the declaration of the prophet Ahijah given him higher hopes. When informed that, by the divine appointment, he was to become king over the ten tribes about to be rent from the house of David, he was not content to wait patiently for the death of Solomon, but began to form plots and conspiracies, the discovery of which constrained him to flee to Egypt to escape condign punishment. The king of that country was but too ready to encourage one whose success must necessarily weaken the kingdom which had become great and formidable under David and Solomon, and which had already pushed its frontier to the Red Sea (1 Kings xii. 26-40).

When Solomon died, the ten tribes sent to call Jeroboam from Egypt; and he appears to have headed the deputation which came before the son of Solomon with a demand of new securities for the rights which the measures of the late king had compromised. It may somewhat excuse the harsh answer of Rehoboam, that the demand was urged by a body of men headed by one whose pretensions were so well known and so odious to the house of David. The imprudent answer of Rehoboam rendered a revolution inevitable, and Jeroboam was then called to reign over the ten tribes, by the style of 'king of Israel' (1 Kings xii. 1-20).

The general course of his conduct on the throne has already been indicated in the article ISRAEL, and need not be repeated in this place. The leading object of his policy was to widen the breach between the two kingdoms, and to rend asunder those common interests among all the descendants of Jacob, which it was one great object of the law to combine and interlace. To this end he scrupled not to sacrifice the most

sacred and inviolable interests and obligations of the covenant people, by forbidding his subjects to resort to the one temple and altar of Jehovah at Jerusalem, and by establishing shrines at Dan and Beth-el—the extremities of his kingdom—where 'golden calves' were set up as the symbols of Jehovah, to which the people were enjoined to resort and bring their offerings. The pontificate of the new establishment he united to his crown, in imitation of the Egyptian kings. He was officiating in that capacity at Beth-el, offering incense, when a prophet appeared, and in the name of the Lord announced a coming time, as yet far off, in which a king of the house of David, Josiah by name, should burn upon that unholy altar the bones of its ministers. He was then preparing to verify, by a commissioned prodigy, the truth of the oracle he had delivered, when the king attempted to arrest him, but was smitten with palsy in the arm he stretched forth. At the same moment the threatened prodigy took place, the altar was rent asunder, and the ashes strewn far around. This measure had, however, no abiding effect. The policy on which he acted lay too deep in what he deemed the vital interests of his separate kingdom, to be even thus abandoned: and the force of the considerations which determined his conduct may in part be appreciated from the fact that no subsequent king of Israel, however well disposed in other respects, ever ventured to lay a finger on this schismatical establishment. Hence 'the sin of Jeroboam the son of Nebat, wherewith he sinned and made Israel to sin,' became a standing phrase in describing that iniquity from which no king of Israel departed (1 Kings xii. 25-33; xiii.).

The contumacy of Jeroboam eventually brought upon him the doom which he probably dreaded beyond all others—the speedy extinction of the dynasty which he had taken so much pains and incurred so much guilt to establish on firm foundations. His son Abijah being sick, he sent his wife disguised to consult the prophet Ahijah, who had predicted that he should be king of Israel. The prophet, although he had become blind with age, knew the queen, and saluted her with—'Come in, thou wife of Jeroboam, for I am sent to thee with heavy tidings.' These were not merely that the son should die—for that was intended in mercy to one who alone, of all the house of Jeroboam, had remained faithful to his God, and was the only one who should obtain an honoured grave—but that his race should be violently and utterly extinguished: 'I will take away the remnant of the house of Jeroboam as a man taketh away dung, till it be all gone' (1 Kings xiv. 1-18).

The son died so soon as the mother crossed the threshold on her return; and as the death of Jeroboam himself is the next event recorded, it would seem that he did not long survive his son. He died in B.C. 954 (1 Kings xiv. 20).

Jeroboam was perhaps a less remarkable man than the circumstance of his being the founder of a new kingdom might lead us to expect. The tribes would have revolted without him; and he was chosen king merely because he had been pointed out by previous circumstances. His government exhibits but one idea—that of raising a barrier against the re-union of the tribes. Of this idea he was the slave and victim; and

although the barrier which he raised was effectual for its purpose, it only served to show the weakness of the man who could deem needful the protection for his separate interests which such a barrier offered.

2. JEROBOAM, thirteenth king of Israel, son of Joash, whom, in B.C. 824, he succeeded on the throne, and reigned forty-one years. He followed the example of the first Jeroboam in keeping up the idolatry of the golden calves. Nevertheless the Lord had pity upon Israel, the time of its ruin was not yet come, and this reign was long and flourishing. Jeroboam brought to a successful result the wars which his father had undertaken, and was always victorious over the Syrians. He even took their chief cities of Damascus and Hamath, which had formerly been subject to the sceptre of David, and restored to the realm of Israel the ancient eastern limits from Lebanon to

the Dead Sea. He died in B.C. 783 (2 Kings xlii 13; xiv. 16, 23-29).

The Scriptural account of this reign is too short to enable us to judge of the character of a prince under whom the kingdom of Israel seems to have reached a degree of prosperity which it had never before enjoyed, and was not able long to preserve.

JERUB'BAAL. [GIDEON.]

JERU'SALEM (*habitation of peace*), the Jewish capital of Palestine. It is mentioned very early in Scripture, being usually supposed to be the Salem of which Melchizedek was king. The Psalmist says (lxxvi. 2): 'In Salem is his tabernacle, and his dwelling-place in Zion.'

The mountain of the land of Moriah, which Abraham (Gen. xxii. 2) reached on the third day from Beersheba, there to offer Isaac, is, according to Josephus, the mountain on which

222. [Jerusalem.]

Solomon afterwards built the temple (2 Chron. iii. 1).

The name Jerusalem first occurs in Josh. x. 1, where Adoni-zedek, king of Jerusalem, is mentioned as having entered into an alliance with other kings against Joshua, by whom they were all overcome (comp. Josh. xii. 10).

In drawing the northern border of Judah, we find Jerusalem again mentioned (Josh. xv. 8; comp. Josh. xviii. 16). This border ran through the valley of Ben Hinom; the country on the south of it, as Bethlehem, belonged to Judah; but the mountain of Zion, forming the northern wall of the valley, and occupied by the Jebusites, appertained to Benjamin. Among the cities of Benjamin, therefore, is also mentioned (Josh. xviii. 28) 'Jebus, which is Jerusalem' (comp. Judg. xix. 10; 1 Chron. xi. 4).

After the death of Joshua, when there remained

for the children of Israel much to conquer in Canaan, the Lord directed Judah to fight against the Canaanites; and they took Jerusalem, smote it with the edge of the sword, and set it on fire (Judg. i. 1-8). After that, the Judahites and the Benjamites dwelt with the Jebusites at Jerusalem; for it is recorded (Josh. xv. 63) that the children of Judah could not drive out the Jebusites inhabiting Jerusalem; and we are further informed (Judg. i. 21) that the children of Benjamin did not expel them from Jerusalem. Probably the Jebusites were removed by Judah only from the lower city, but kept possession of the mountain of Zion, which David conquered at a later period. Jerusalem is not again mentioned till the time of Saul, when it is stated (1 Sam. xvii. 54) that David took the head of Goliath and brought it to Jerusalem. After David, who had previously reigned over Judah alone in Hebron,

was called to rule over all Israel, he led his forces against the Jebusites, and conquered the castle of Zion, which Joab first scaled (2 Sam. v. 5-9; 1 Chron. xii. 4-8). He then fixed his abode on this mountain, and called it 'the city of David.' Thither he carried the ark of the covenant and there he built unto the Lord an altar in the threshing-floor of Araunah the Jebusite, on the place where the angel stood who threatened Jerusalem with pestilence (2 Sam. xxiv. 15-25).

The reasons which led David to fix upon Jerusalem as the metropolis of his kingdom have been alluded to elsewhere [ISRAEL; JUDAH]; being chiefly, that it was in his own tribe of Judah, in which his influence was the strongest, while it was the nearest to the other tribes of any site he could have chosen in Judah. The peculiar strength also of the situation, enclosed on three sides by a natural trench of valleys, could not be without weight.

The promise made to David received its accomplishment when Solomon built his temple upon Mount Moriah. By him and his father Jerusalem had been made the imperial residence of the king of all Israel: and the temple, often called 'the house of Jehovah,' constituted it at the same time the residence of the King of kings, the supreme head of the theocratical state, whose vicerents the human kings were taught to regard themselves. It now belouged, even less than a town of the Levites, to a particular tribe: it was the centre of all civil and religious affairs, the very place of which Moses spoke, Deut. xii. 5: 'The place which the Lord your God shall choose out of all your tribes to put his name there, even unto his habitation shall ye seek, and thither thou shalt come' (comp. ix. 6; xlii. 14; xiv. 23; xvi. 11-16; Ps. cxxii.).

The importance and splendour of Jerusalem were considerably lessened after the death of Solomon; under whose son, Rehoboam, ten of the tribes rebelled, Judah and Benjamin only remaining in their allegiance. Jerusalem was then only the capital of the very small state of Judah. And when Jeroboam instituted the worship of golden calves in Beth-el and Dan, the ten tribes went no longer up to Jerusalem to worship and sacrifice in the house of the Lord (1 Kings xii. 26-30).

After this time the history of Jerusalem is continued in the history of Judah, for which the second book of the Kings and of the Chronicles are the principal sources of information.

After the time of Solomon, the kingdom of Judah was almost alternately ruled by good kings, who did that which was right in the sight of the Lord, and by such as were idolatrous and evil disposed; and the reign of the same king often varied and was by turns good or evil. The condition of the kingdom, and of Jerusalem in particular as its metropolis, was very much affected by these mutations. Under good kings the city flourished, and under bad kings it suffered greatly. Under Rehoboam (n.c. 973) it was conquered by Shishak, king of Egypt, who pillaged the treasures of the temple (2 Chron. xii. 9). Under Amaziah it was taken by Jehoshaphat, king of Israel, who broke down 400 cubits of the wall of the city, and took all the gold and silver,

and all the vessels that were found in the temple (2 Kings xiv. 13, 14). Uzziah, son of Amaziah, who at first reigned well, built towers in Jerusalem at the corner-gate, at the valley-gate, and at the turning of the wall, and fortified them (2 Chron. xxvi. 9). His son, Jotham, built the high gate of the temple, and reared up many other structures (2 Chron. xxvii. 3, 4). Hezekiah (n.c. 728) added to the other honours of his reign that of an improver of Jerusalem. His most eminent work in that character was the stopping of the upper course of Gihon, and bringing its waters by a subterraneous aqueduct to the west side of the city (2 Chron. xxxii. 30). This work is inferred, from 2 Kings xx., to have been of great importance to Jerusalem, as it cut off a supply of water from any besieging enemy, and bestowed it upon the inhabitants of the city. Hezekiah's son, Manasseh, in his later and best years, built a strong and very high wall on the west side of Jerusalem (2 Chron. xxxiii. 14). The works in the city connected with the names of the succeeding kings of Judah were, so far as recorded, confined to the defilement of the house of the Lord by bad kings, and its purgation by good kings, till about 100 years after Manasseh, when, for the abounding iniquities of the nation, the city and temple were abandoned to destruction. After a siege of three years, Jerusalem was taken by Nebuchadnezzar, who razed its walls, and destroyed its temple and palaces with fire (2 Kings xxv.; 2 Chron. xxxvi.; Jer. xxxix.). Thus was Jerusalem smitten with the calamity which Moses had prophesied would befall it, if the people would not keep the commandments of the Lord, but broke his covenant (Lev. xxvi. 14; Deut. xxviii.).

But God, before whom a thousand years are as one day, gave to the afflicted people a glimpse beyond the present calamity and retributive judgment, into a distant futurity. The same prophets who foretold the destruction of Jerusalem, also announced the consolations of a coming time.

Moses had long before predicted that if in the land of their captivity they repented of their evil, they should be brought back again to the land out of which they had been cast (Deut. xxx. 1-5; comp. 1 Kings viii. 46-53; Neh. i. 8, 9). The Lord also, through Isaiah, condescended to point out the agency through which the restoration of the holy city was to be accomplished, and even named long before his birth the very person. Cyrus, under whose orders this was to be effected (Isa. xlv. 28; comp. Jer. iii. 2, 7, 8; xliii. 3; xxxi. 10; xxxii. 36, 37).

Among the remarkably precise indications should be mentioned that in which Jeremiah (xxv. 9, 12) limits the duration of Judah's captivity to 70 years.

These encouragements were continued through the prophets, who themselves shared the captivity. Of this number was Daniel (ix. 16, 19), who lived to see the reign of Cyrus, king of Persia (Dan. x. 1), and the fulfilment of his prayer. It was in the year n.c. 536, 'in the first year of Cyrus,' that in accomplishment of the prophecy of Jeremiah, the Lord stirred up the spirit of this prince, who made a proclamation throughout all his kingdom, expressed in these remarkable words: 'The Lord God of heaven

hath given me all the kingdoms of the earth, and he has charged me to build him a house at Jerusalem, which is in Judah. Who is there among you of all his people? his God be with him, and let him go up to Jerusalem, and build the house of the Lord God of Israel' (Ezra i. 2, 3). This important call was answered by a considerable number of persons, particularly priests and Levites; and the many who declined to quit their houses and possessions in Babylonia, committed valuable gifts to the hands of their more zealous brethren. Cyrus also caused the sacred vessels of gold and silver which Nebuchadnezzar had taken from the temple to be restored to Sheshbazzar, the prince of Judah, who took them to Jerusalem, followed by 42,360 people, beside their servants, of whom there were 7337 (Ezra i. 5-11).

On their arrival at Jerusalem they contributed according to their ability to rebuild the temple; Jeshua, the priest, and Zerubbabel, reared up an altar to offer burnt-offerings thereon; and when in the following year the foundation was laid of the new house of God, 'the people shouted for joy, but many of the Levites who had seen the first temple wept with a loud voice' (Ezra iii. 2, 12). When the Samaritans expressed a wish to share in the pious labour, Zerubbabel declined the offer; and in revenge the Samaritans sent a deputation to king Artaxerxes of Persia, carrying a presentment in which Jerusalem was described as a rebellious city of old time, which, if rebuilt, and its walls set up again, would not pay toll, tribute, and custom, and would thus endanger the public revenue. The deputation succeeded, and Artaxerxes ordered that the building of the temple should cease. The interruption thus caused lasted to the second year of the reign of Darius (Ezra iv. 24), when Zerubbabel and Jeshua, supported by the prophets Haggai and Zechariah, again resumed the work, and would not cease, though cautioned by the Persian governor of Judæa. On the matter coming before Darius Hystaspis, and the Jews reminding him of the permission given by Cyrus, he decided in their favour, and also ordered that the expenses of the work should be defrayed out of the public revenue (Ezra vi. 8). In the sixth year of the reign of Darius the temple was finished, when they kept the Feast of Dedication with great joy, and next celebrated the Passover (Ezra vi. 15, 16, 19). Afterwards, in the seventh year of the second Artaxerxes, Ezra, a descendant of Aaron, came up to Jerusalem, accompanied by a large number of Jews who had remained in Babylon. He was highly patronised by the king, who not only made him a large present in gold and silver, but published a decree enjoining all treasurers of Judæa speedily to do whatever Ezra should require of them; allowing him to collect money throughout the whole province of Babylon for the wants of the temple at Jerusalem; and also giving him full power to appoint magistrates in his country to judge the people (Ezra vii. viii.). At a later period, in the twentieth year of king Artaxerxes, Nehemiah, who was his cupbearer, obtained permission to proceed to Jerusalem, and to complete the rebuilding of the city and its wall, which he happily accomplished, despite of all the opposition which he received from the enemies of Israel (Neh. i. ii. iv. vi.). The city

was then capacious and large, but the people in it were few, and many houses lay still in ruins (Neh. vii. 4). At Jerusalem dwelt the rulers of the people and 'certain of the children of Judah and of the children of Benjamin'; but it was now determined that the rest of the people should cast lots to bring one of ten to the capital (Neh. xi. 1-4). All strangers, Samaritans, Ammonites, Moabites, &c., were removed, to keep the chosen people from pollution; ministers were appointed to the temple, and the service was performed according to the law of Moses (Ezra x.; Neh. viii. x. xii. xiii.). Of the Jerusalem thus by such great and long-continued exertions restored, very splendid prophecies were uttered by those prophets who flourished after the exile: the general purport of which was to describe the temple and city as destined to be glorified far beyond the former, by the advent of the long and eagerly expected Messiah, 'the desire of all nations' (Zech. ix. 9; xii. 10; xiii. 3; Hagg. ii. 6, 7; Mal. iii. 11).

Thus far the Old Testament has been our guide in the notices of Jerusalem. For what follows, down to its destruction by the Romans, we must draw chiefly upon Josephus, and the books of the Maccabees. The difficulty here, as before, is to separate what properly belongs to Jerusalem from that which belongs to the country at large. For as Jerusalem was invariably affected by whatever movement took place in the country of which it was the capital, its history might be made, and often has been made, the history of Palestine.

It is said by Josephus, that, when the dominion of this part of the world passed from the Persians to the Greeks, Alexander the Great advanced against Jerusalem to punish it for the fidelity to the Persians which it had manifested while he was engaged in the siege of Tyre. His hostile purposes, however, were averted by the appearance of the high-priest Jaddua at the head of a train of priests in their sacred vestments. Alexander recognised in him the figure which in a dream had encouraged him to undertake the conquest of Asia. He therefore treated him with respect and reverence, spared the city against which his wrath had been kindled, and granted to the Jews high and important privileges. The historian adds that the high-priest failed not to apprise the conqueror of those prophecies in Daniel by which his successes had been predicted. The whole of this story is, however, liable to suspicion, from the absence of any notice of the circumstance in the histories of this campaign which we possess.

After the death of Alexander at Babylon (n.c. 324), Ptolemy surprised Jerusalem on the Sabbath-day, when the Jews would not fight, plundered the city, and carried away a great number of the inhabitants to Egypt, where, however, from the estimation in which the Jews of this period were held as citizens, important privileges were bestowed upon them. In the contests which afterwards followed for the possession of Syria (including Palestine), Jerusalem does not appear to have been directly injured, and was even spared when Ptolemy gave up Samaria, Acco, Joppa, and Gaza to pillage. The contest was ended by the treaty in n.c. 302, which annexed the whole of Palestine, together

with Arabia Petraea and Coele-Syria, to Egypt. Under easy subjection to the Ptolemies the Jews remained in much tranquillity for more than a hundred years, in which the principal incident, as regards Jerusalem itself, was the visit which was paid to it, in B.C. 245, by Ptolemy Euergetes, on his return from his victories in the East. He offered many sacrifices, and made magnificent presents to the temple. In the wars between Antiochus the Great and the kings of Egypt, from B.C. 221 to 197, Judæa could not fail to suffer severely; but we are not acquainted with any incident in which Jerusalem was principally concerned till the alleged visit of Ptolemy Philopator in B.C. 211. He offered sacrifices, and gave rich gifts to the temple, but, venturing to enter the sanctuary, in spite of the remonstrances of the high-priest, he was seized with a supernatural dread, and fled in terror from the place. It is said that on his return to Egypt he vented his rage on the Jews of Alexandria in a very barbarous manner [ALEXANDRIA]. But the whole story of his visit and its results rests upon the sole authority of the third book of Maccabees (chaps. i. and ii.), and is therefore not entitled to implicit credit. Towards the end of this war the Jews seemed to favour the cause of Antiochus; and after he had subdued the neighbouring country, they voluntarily tendered their submission, and rendered their assistance in expelling the Egyptian garrison from Mount Zion. For this conduct they were rewarded by many important privileges by Antiochus.

Under their new masters the Jews enjoyed for a time nearly as much tranquillity as under the generally benign and liberal government of the Ptolemies. But in B.C. 176, Seleucus Philopator, hearing that great treasures were hoarded up in the temple, and being distressed for money to carry on his wars, sent his treasurer, Heliodorus, to bring away these treasures. But this personage is reported to have been so frightened and stricken by an apparition that he relinquished the attempt; and Seleucus left the Jews in the undisturbed enjoyment of their rights. His brother and successor, Antiochus Epiphanes, however, was of another mind. He took up the design of reducing them to a conformity of manners and religion with other nations; or, in other words, of abolishing those distinctive features which made the Jews a peculiar people, socially separated from all others. This design was odious to the great body of the people, although there were many among the higher classes who regarded it with favour. Of this way of thinking was Menelaus, whom Antiochus had made a high-priest, and who was expelled by the orthodox Jews with ignominy, in B.C. 169, when they heard the joyful news that Antiochus had been slain in Egypt. The rumour proved untrue, and Antiochus on his return punished them by plundering and profaning the temple. Worse evils befell them two years after: for Antiochus, out of humour at being compelled by the Romans to abandon his designs upon Egypt, sent his chief collector of tribute, Apollonius, with a detachment of 22,000 men, to vent his rage on Jerusalem. This person plundered the city, and razed its walls, with the stones of which he built a citadel that commanded the temple mount. A statue of Jupiter was set up

in the temple; the peculiar observances of the Jewish law were abolished; and a persecution was commenced against all who adhered to these observances, and refused to sacrifice to idols. Jerusalem was deserted by priests and people, and the daily sacrifice at the altar was entirely discontinued.

This led to the celebrated revolt of the Maccabees, who, after an arduous and sanguinary struggle, obtained possession of Jerusalem (B.C. 163), and repaired and purified the temple, which was then dilapidated and deserted. The sacrifices were then recommenced, exactly three years after the temple had been dedicated to Jupiter Olympius. The castle, however, remained in the hands of the Syrians, and long proved a sore annoyance to the Jews; but at length, in B.C. 142, it was taken by Simon Maccabæus, who demolished it altogether, that it might not again be used against the Jews by their enemies. Simon then strengthened the fortifications of the mountain on which the temple stood, and built there a palace for himself, which was strengthened and enlarged by Herod the Great, who called it the castle of Antonia, under which name it makes a conspicuous figure in the Jewish wars with the Romans.

Of Jerusalem itself we find nothing of consequence till it was taken by Pompey in the summer of B.C. 63, and on the very day observed by the Jews as one of lamentation and fasting, in commemoration of the conquest of Jerusalem by Nebuchadnezzar. Twelve thousand Jews were massacred in the temple courts, including many priests, who died at the very altar rather than suspect the sacred rites. On this occasion Pompey, attended by his generals, went into the temple and viewed the sanctuary; but he left untouched all its treasures and sacred things, while the walls of the city itself were demolished. From this time the Jews are to be considered as under the dominion of the Romans. The treasures which Pompey had spared were seized a few years after (B.C. 51) by Crassus. In the year B.C. 43, the walls of the city, which Pompey had demolished, were rebuilt by Antipater, the father of that Herod the Great under whom Jerusalem was destined to assume the new and more magnificent aspect which it bore in the time of Christ, and which constituted the Jerusalem which Josephus describes. The temple itself was taken down and rebuilt by Herod the Great, with a magnificence exceeding that of Solomon's (Mark xiii. 1; John ii. 20; see TEMPLE). It was in the courts of the temple as thus rebuilt, and in the streets of the city as thus improved, that the Saviour of men walked up and down. Here he taught, here he wrought miracles, here he suffered; and this was the temple whose 'goodly stones' the apostle admired (Mark xiii. 1), and of which he foretold that ere the existing generation had passed away not one stone should be left upon another.

Jerusalem seems to have been raised to this greatness, as if to enhance the misery of its overthrow. So soon as the Jews had set the seal to their formal rejection of Christ, by putting him to death, and invoking the responsibility of his blood upon the heads of themselves and of their children (Matt. xxvii. 25), its doom went forth. After having been the scene of horrors without

example, it was, in A.D. 70, abandoned to the Romans, who razed the city and temple to the ground, leaving only three of the towers and a part of the western wall to show how strong a place the Roman arms had overthrown. Since then the holy city has lain at the mercy of the Gentiles, and will so remain 'until the times of the Gentiles are fulfilled.'

MODERN HISTORY.—The destruction of Jerusalem by the Romans did not cause the site to be utterly forsaken; but for a considerable period there is no mention of it in history. Up to A.D. 131 the Jews remained tolerably quiet. The then emperor, Adrian, among other measures of precaution, ordered Jerusalem to be rebuilt as a fortified place wherewith to keep in check the whole Jewish population. The works had made some progress, when the Jews, unable to endure the idea that their holy city should be occupied by foreigners, and that strange gods should be set up within it, broke out into open rebellion under the notorious Barchochebas, who claimed to be the Messiah. His success was at first very great; but he was crushed before the tremendous power of the Romans, so soon as it could be brought to bear upon him; and a war scarcely inferior in horror to that under Vespasian and Titus was, like it, brought to a close by the capture of Jerusalem, of which the Jews had obtained possession. This was in A.D. 135, from which period the final dispersion of the Jews has been often dated. The Romans then finished the city according to their first intention. It was made a Roman colony, inhabited wholly by foreigners, the Jews being forbidden to approach it on pain of death: a temple to Jupiter Capitolinus was erected on Mount Moriah, and the old name of Jerusalem was sought to be supplanted by that of *Ælia Capitolina*, conferred upon it in honour of the emperor, *Ælius Adrianus*, and *Jupiter Capitolinus*. This name was retained for some time by the Mohammedans; and it was not till after they recovered the city from the Crusaders that it became generally known among them by the name of *El-Khuds*—the holy—which it still bears.

From the rebuilding by Adrian the history of Jerusalem is almost a blank till the time of Constantine, when its history, as a place of extreme solicitude and interest to the Christian church, properly begins. Pilgrimages to the Holy City now became common and popular. Such a pilgrimage was undertaken in A.D. 326 by the emperor's mother *Helenæ*, then in the 8th year of her age, who built churches on the alleged site of the nativity at *Bethlehem*, and of the resurrection on the Mount of Olives. This example may probably have excited her son to the discovery of the site of the holy sepulchre, and to the erection of a church thereon. He removed the temple of *Venus*, with which, in studied insult, the site had been encumbered. The holy sepulchre was then purified, and a magnificent church was, by his order, built over and around the sacred spot. This temple was completed and dedicated with great solemnity in A.D. 335. There is no doubt that the spot thus singled out is the same which has ever since been regarded as the place in which Christ was entombed; but the correctness of the identification then made has been of late years much disputed.

By Constantine the edict, excluding the Jews from the city of their fathers' sepulchres, was so far repealed that they were allowed to enter it once a-year to wail over the desolation of 'the holy and beautiful house' in which their fathers worshipped God. When the nephew of Constantine, the Emperor *Julian*, abandoned Christianity for the old Paganism, he endeavoured, as a matter of policy, to conciliate the Jews. He allowed them free access to the city, and permitted them to rebuild their temple. They accordingly began to lay the foundations in A.D. 362; but the speedy death of the emperor probably occasioned that abandonment of the attempt which contemporary writers ascribe to supernatural hinderances. The edicts seem then to have been renewed which excluded the Jews from the city, except on the day of annual wailing.

In the following centuries the roads to Zion were thronged with pilgrims from all parts of Christendom. After much struggle of conflicting dignities, the 'holy city' was, in A.D. 451, declared a patriarchate by the council of *Chalcedon*. In the next century it found a second Constantine in *Justinian*, who ascended the throne A.D. 527. He repaired and enriched the former structures, and built upon Mount Moriah a magnificent church to the Virgin, as a memorial of the persecution of Jesus in the temple.

In A.D. 614 the Persians took it by storm, and slew thousands of the inhabitants, and inflicted much injury on the buildings.

Their inroad was speedily repaired. But in A.D. 636 it fell into the hands of a more formidable enemy, the *Khalif Omar*. By his orders the magnificent mosque which still bears his name was built upon Mount Moriah, upon the site of the Jewish temple.

Jerusalem remained in possession of the Arabians, and was occasionally visited by Christian pilgrims from Europe, till towards the year 1000, when a general belief that the second coming of the Saviour was near at hand drew pilgrims in unwonted crowds to the Holy Land. The sight, by such large numbers, of the holy place in the hands of infidels, the exaction of tribute by the Moslem government, and the insults to which the pilgrims, often of the highest rank, were exposed from the Moslem rabble, excited an extraordinary ferment in Europe, and led to those remarkable expeditions for recovering the Holy Sepulchre from the Mohammedans, which, under the name of the Crusades, will always fill a most important and curious chapter in the history of the world.

On the 17th of June, 1099, the Crusaders, under *Godfrey of Bouillon*, appeared before Jerusalem, which was at that time in possession of the *Fatemite* khalfis of Egypt.

After a siege of forty days the holy city was taken by storm on the 15th day of July: and a dreadful massacre of the Moslem inhabitants followed, without distinction of age or sex. As soon as order was restored, and the city cleared of the dead, a regular government was established by the election of *Godfrey* as king of Jerusalem. The Christians kept possession of Jerusalem eighty-eight years. During this long period they appear to have erected several churches and many convents. Of the latter few, if any, traces remain; and of the former, save one or two ruins,

the church of the holy sepulchre, which they rebuilt, is the only memorial which attests the existence of the Christian kingdom of Jerusalem. In A.D. 1187 the holy city was wrested from the hands of the Christians by the Sultan Saladin. From that time to the present day Jerusalem has remained, with slight interruption, in the hands of the Moslems. On the threatened siege by Richard of England in 1192, Saladin took great pains in strengthening its defences. New walls and bulwarks were erected, and deep trenches cut, and in six months the town was stronger than it ever had been, and the works had the firmness and solidity of a rock. But in A.D. 1219 the Sultan Melek el-Moaddin of Damascus, who then had possession of Jerusalem, ordered all the walls and towers to be demolished, except the citadel and the enclosure of the mosque, lest the Franks should again become masters of the city and find it a place of strength. In this defenceless state Jerusalem continued till it was delivered over to the Christians in consequence of a treaty with the emperor Frederick II., in A.D. 1229, with the understanding that the walls should not be rebuilt. Yet ten years later (A.D. 1239) the barons and knights of Jerusalem began to build the walls anew, and to erect a strong fortress on the west of the city. But the works were interrupted by the emir David of Kerek, who seized the city, strangled the Christian inhabitants, and cast down the newly erected walls and fortress. Four years after, however (A.D. 1243), Jerusalem was again made over to the Christians without any restriction, and the works appear to have been restored and completed; for they are mentioned as existing when the city was stormed by the wild Kharismanian hordes in the following year; shortly after which the city reverted for the last time into the hands of its Mohammedan masters, who have kept it to the present day.

From this time Jerusalem appears to have sunk very much in political and military importance; and it is scarcely named in the history of the Memluk sultans who reigned over Egypt and the greater part of Syria in the fourteenth and fifteenth centuries. At length, with the rest of Syria and Egypt, it passed under the sway of the Turkish sultan Selim I., who paid a hasty visit to the holy land from Damascus after his return from Egypt. From that time Jerusalem has formed a part of the Ottoman empire, and during this period has been subject to few vicissitudes; its history is accordingly barren of incident. The present walls of the city were erected by Suleiman the Magnificent, the successor of Selim, in A.D. 1542, as is attested by an inscription over the Jaffa gate. So lately as A.D. 1808, the church of the holy sepulchre was partially consumed by fire; but the damage was repaired with great labour and expense by September, 1810, and the traveller now finds in this imposing fabric no traces of the recent calamity.

In A.D. 1832 Jerusalem became subject to Mohammed Ali, the pasha of Egypt, the holy city opening its gates to him without a siege. During the great insurrection in the districts of Jerusalem and Nablus, in 1834, the insurgents seized upon Jerusalem, and held possession of it for a time; but by the vigorous operations of the government, order was soon restored, and the city

reverted quietly to its allegiance on the approach of Ibrahim Pasha with his troops. In 1841 Mohammed Ali was deprived of all his Syrian possessions by European interference, and Jerusalem was again subjected to the Turkish government, under which it now remains. It is not, perhaps, the happier for the change. The only subsequent event of interest has been the establishment of a Protestant bishopric at Jerusalem by the English and Prussian governments, and the erection upon Mount Zion of a church, calculated to hold 500 persons, for the celebration of divine worship according to the ritual of the English church.

GENERAL TOPOGRAPHY.—Jerusalem lies near the summit of a broad mountain-ridge, extending, without interruption, from the plain of Esdraelon to a line drawn between the south end of the Dead Sea and the south-east corner of the Mediterranean; or, more properly, perhaps, it may be regarded as extending as far south as to Jebel Arâif in the Desert, where it sinks down at once to the level of the great western plateau. This tract, which is everywhere not less than from 20 to 25 geographical miles in breadth, forms the precipitous western wall of the great valley of the Jordan and the Dead Sea, and is everywhere rocky, uneven, and mountainous; and is, moreover, cut up by deep valleys which run east or west on either side towards the Jordan or the Mediterranean. The line of division, or watershed, between the waters of these valleys, follows for the most part the height of land along the ridge; yet not so but that the heads of the valleys, which run off in different directions, often interlap for a considerable distance. Thus, for example, a valley which descends to the Jordan often has its head a mile or two westward of the commencement of other valleys which run to the western sea.

From the great plain of Esdraelon onwards toward the south, the mountainous country rises gradually, forming the tract anciently known as the mountains of Ephraim and Judah; until, in the vicinity of Hebron, it attains an elevation of nearly 3000 Paris feet above the level of the Mediterranean Sea. Further north, on a line drawn from the north end of the Dead Sea towards the true west, the ridge has an elevation of only about 2500 Paris feet; and here, close upon the watershed, lies the city of Jerusalem. Its mean geographical position is in lat. $31^{\circ} 46' 43''$ N., and long. $35^{\circ} 13'$ E. from Greenwich.

The surface of the elevated promontory, on which the city stands, slopes somewhat steeply towards the east, terminating on the brink of the valley of Jehoshaphat. From the northern part, near the present Damascus gate, a depression or shallow wady runs in a southern direction, having on the west the ancient hills of Akra and Zion, and on the east the lower ones of Bezetha and Moriah. Between the hills of Akra and Zion another depression or shallow wady (still easy to be traced) comes down from near the Jaffa gate, and joins the former. It then continues obliquely down the slope, but with a deeper bed, in a southern direction, quite to the pool of Siloam and the valley of Jehoshaphat. This is the ancient Tyropœon. West of its lower part Zion rises loftily, lying mostly without the modern city; while on the east of the

Tyropœon and the valley first mentioned lie Bezetha, Moriah, and Ophel, the last a long and comparatively narrow ridge, also outside of the modern city, and terminating in a rocky point over the pool of Siloam. These three last hills may strictly be taken as only parts of one and the same ridge. The breadth of the whole site of Jerusalem, from the brow of the valley of Hinnom, near the Jaffa gate, to the brink of the valley of Jehoshaphat, is about 1020 yards, or nearly half a geographical mile.

The country around Jerusalem is all of limestone formation, and not particularly fertile. The rocks everywhere come out above the surface, which in many parts is also thickly strewn with loose stones; and the aspect of the whole region is barren and dreary; yet the olive thrives here abundantly, and fields of grain are seen in the valleys and level places, but they are less productive than in the region of Hebron and Nabulus. Neither vineyards nor fig-trees flourish on the high ground around the city, though the latter are found in the gardens below Siloam, and very frequently in the vicinity of Bethlehem.

ANCIENT JERUSALEM.—Every reader of Scripture feels a natural anxiety to form some notion of the appearance and condition of Jerusalem, as it existed in the time of Jesus, or rather as it stood before its destruction by the Romans. There are unusual difficulties in the way of satisfying this desire, although it need not be left altogether ungratified. The principal sources of these difficulties have been indicated by different travellers, and by none more forcibly than by Richardson (*Travels*, ii. 251). 'It is a tantalizing circumstance, however, for the traveller who wishes to recognise in his walks the site of particular buildings, or the scenes of memorable events, that the greater part of the objects mentioned in the description, both of the inspired and of the Jewish historian, are entirely razed from their foundation, without leaving a single trace or name behind to point out where they stood. Not an ancient tower, or gate, or wall, or hardly even a stone, remains. The foundations are not only broken up, but every fragment of which they were composed is swept away, and the spectator looks upon the bare rock with hardly a sprinkling of earth to point out her gardens of pleasure, or groves of idolatrous devotion.'

To the difficulties originating in these causes may be added those which arise from the many ambiguities in the description left by Josephus, the only one which we possess, and which must form the ground-work of most of our notices respecting the ancient city. There are indeed some manifest errors in his account, which the critical reader is able to detect without having the means to rectify.

In describing Jerusalem as it stood just before its destruction by the Romans, Josephus states that the city was built upon two hills, between which lay the valley Tyropœon (Cheesemonger's Valley), to which the buildings on both hills came down. This valley extended to the fountain of Siloam. The hill on which the upper town stood was much higher than the other, and straighter in its extent. On account of its fortifications, David called it the Fortress or Castle; but in the time of Josephus it was known by the name of the Upper Market. The other hill, on

which was situated the lower town, was called Akra. It was in the form of a horseshoe or crescent. Opposite to Akra was a third, and naturally lower hill (Moriah), on which the temple was built; and between this and Akra was originally a broad valley, which the inhabitants of Jerusalem filled up in the time of Simon Maccabæus for the purpose of connecting the town with the temple. At the same time they lowered the hill Akra, so as to make the temple rise above it. Both the hills on which the upper and lower towns stood were externally surrounded by deep valleys, and here there was no approach because of the precipices on every side.

The single wall which enclosed that part of the city skirted by precipitous valleys began at the tower of Hippicus. On the west it extended (southward) to a place called Bethso, and the gate of the Essenes; thence it kept along on the south to a point over against Siloam; and thence on the east was carried along by Solomon's Pool and Ophla (Ophel), till it terminated at the eastern portico of the temple. Of the triple walls, we are told that the first and oldest of these began at the tower of Hippicus, on the northern part, and, extending (along the northern brow of Zion) to the Xystus, afterwards terminated at the western portico of the temple. The second wall began at the gate of Gennath (apparently near Hippicus), and, encircling only the northern part of the city, extended to the castle of Autonia at the north-west corner of the area of the temple. The third wall was built by Agrippa at a later period; it also had its beginning at the tower of Hippicus, ran northward as far as the tower Psephius; and thence sweeping round towards the north-east by east, it turned afterwards towards the south, and was joined to the ancient wall at or in the valley of the Kidron. This wall enclosed the hill Bezetha. From other passages we learn that the Xystus, named in the above descriptions, was an open place in the extreme part of the upper city, where the people sometimes assembled, and that a bridge connected it with the temple.

Dr. Robinson, in comparing the information derived from Josephus with his own more detailed account, declares that the main features depicted by the Jewish historian may still be recognised. 'True,' he says, 'the valley of the Tyropœon, and that between Akra and Moriah, have been greatly filled up with the rubbish accumulated from the repeated desolations of nearly eighteen centuries. Yet they are still distinctly to be traced: the hills of Zion, Akra, Moriah, and Bezetha, are not to be mistaken; while the deep valleys of the Kidron, and of Hinnom, and the Mount of Olives, are permanent natural features, too prominent and gigantic indeed to be forgotten, or to undergo any perceptible change.'

The details embraced in this general notice must be more particularly examined in connection with modern observations; for it is to be remembered that the chief or only value of these observations consists in the light which they throw on the ancient condition and history of the site.

The first or most ancient wall appears to have enclosed the whole of Mount Zion. The greater part of it, therefore, must have formed the ex-

terior and sole wall on the south, overlooking the deep valleys below Mount Zion; and the northern part evidently passed from the tower of Hippicus on the west side, along the northern brow of Zion, and across the valley, to the western side of the temple area. It probably nearly coincided with the ancient wall which existed before the time of David, and which enabled the Jebusites to maintain themselves in possession of the upper city, long after the lower city had been in the hands of the Israelites. Mount Zion is now unwall'd, and is excluded from the modern city. No trace of this wall can now be perceived, but by digging through the rubbish the foundations might perhaps be discovered.

The account given by Josephus, of the second wall, is very short and unsatisfactory. It seems to have enclosed the whole of the lower city, or Akra, excepting that part of the eastern side of it which fronted the Temple area on Mount Moriah, and the southern side, towards the valley which separated the lower from the upper city. In short, it was a continuation of the external wall, so far as necessary, on the west and north, and on so much of the east as was not already protected by the strong wall of the Temple area.

Although these were the only walls that existed in the time of our Saviour, we are not to infer that the habitable city was confined within their limits. On the contrary, it was because the city had extended northward far beyond the second wall that a third was built to cover the defenceless suburb: and there is no reason to doubt that this unprotected suburb, called Bezetha, existed in the time of Christ. This wall is described as having also begun at the tower of Hippicus: it ran northward as far as to the tower Psephinos, then passed down opposite the sepulchre of Helena (queen of Adiabene), and, being carried along through the royal sepulchres, turned at the corner tower by the Fullers' monument, and ended by making a junction with the ancient wall at the valley of the Kidron. It was begun ten or twelve years after our Lord's crucifixion by the elder Herod Agrippa, who desisted from completing it for fear of offending the Emperor Claudius. But the design was afterwards taken up and completed by the Jews themselves, although on a scale of less strength and magnificence. Dr. Robinson thinks that he discovered some traces of this wall, which are described in his great work.

The same writer thinks that the wall of the new city, the *Elia* of Adrian, nearly coincided with that of the present Jerusalem.

We know from Josephus that the circumference of the ancient city was 33 stadia, equivalent to nearly three and a half geographical miles. The circumference of the present walls does not exceed two and a half geographical miles; but the extent of Mount Zion, now without the walls, and the tract on the north formerly enclosed, or partly so, by the third wall, sufficiently account for the difference.

The history of the modern walls has already been given in the sketch of the modern history of the city. The present walls have a solid and formidable appearance, especially when cursorily observed from without; and they are strength-

ened, or rather ornamented, with towers and battlements after the Saracenic style. They are built of limestone, the stones being not commonly more than a foot or 15 inches square. The height varies with the various elevations of the ground. The lower parts are probably about 25 feet high, while in more exposed localities, where the ravines contribute less to the security of the city, they have an elevation of 60 or 70 feet.

Much uncertainty exists respecting the ancient gates of Jerusalem. Many gates are named in Scripture; and it has been objected that they are more in number than a town of the size of Jerusalem could require—especially as they all occur within the extent embraced by the first and second walls, the third not then existing. It has, therefore, been suggested as more than probable that some of these gates were within the city, in the walls which separated the town from the temple, and the upper town from the lower, in which gates certainly existed. On the other hand, considering the circumstances under which the wall was rebuilt in the time of Nehemiah, it is difficult to suppose that more than the outer wall was then constructed, and certainly it was in the wall then built that the ten or twelve gates mentioned by Nehemiah occur. But these may be considerably reduced by supposing that two or more of the names mentioned were applied to the same gate. If this view of the matter be taken, no better distribution of these gates can be given than that suggested by Raumer.

A. On the north side.

1. The *Old Gate*, probably at the north-east corner (Neh. iii. 6; xii. 39).

2. The *Gate of Ephraim or Benjamin* (Jer. xxxviii. 7; xxxvii. 13; Neh. xii. 9; 2 Chron. xxv. 23). This gate doubtless derived its names from its leading to the territory of Ephraim and Benjamin; and Dr. Robinson supposes it may possibly be represented by some traces of ruins which he found on the site of the present gate of Damascus.

3. The *Corner-gate*, 300 cubits from the former, and apparently at the north-west corner (2 Chron. xxv. 9; 2 Kings xiv. 13; Zech. xiv. 10). Probably the *Gate of the Furnaces* is the same (Neh. iii. 2; xii. 38).

n. On the west side.

4. The *Valley-gate*, over against the Dragon-fountain of Gihon (Neh. ii. 13; iii. 13; 2 Chron. xxxvi. 9). It was probably about the north-west corner of Zion, where there appears to have been always a gate, and Dr. Robinson supposes it to be the same with the Gennath of Josephus.

c. On the south side.

5. The *Dung-gate*, perhaps the same as Josephus's Gate of the Essenes (Neh. ii. 13; xii. 31). It was 1000 cubits from the valley-gate (Neh. iii. 14), and the dragon-well was between them (Neh. ii. 13). This gate is probably also identical with 'the gate between two walls' (2 Kings xxv. 4; Jer. xxxix. 4; Lam. ii. 7).

6. The *Gate of the Fountain*, to the south-east (Neh. ii. 14; iii. 15); the gate of the fountain near the king's pool (Neh. ii. 14); the gate of the fountain near 'the pool of Siloh by the king's garden' (Neh. iii. 15). The same gate is probably denoted in all these instances, and the pools seem to have been also the same. It is also

possible that this fountain-gate was the same otherwise distinguished as the brick-gate (or potter's gate), leading to the valley of Hinnom (Jer. xix. 2, where the Auth. Ver. has 'east-gate').

6. On the east side.

7. The *Water-gate* (Neh. iii. 26).

8. The *Prison-gate*, otherwise the *Horse-gate*, ear the temple (Neh. iii. 28; xii. 39, 40).

9. The *Sheep-gate*, probably near the sheep-pool (Neh. iii. 1-32; xii. 29).

10. The *Fish-gate* was quite at the north-east (Neh. iii. 3; xii. 39; Zeph. i. 10; 2 Chron. xxxiii. 14).

In the middle ages there appear to have been two gates on each side of the city, making eight in all; and this number, being only two short of those assigned in the above estimate to the ancient Jerusalem, seems to vindicate that estimate from the objections which have been urged against it.

On the west side were two gates, of which the principal was the Gate of David, often mentioned by the writers on the Crusades. It corresponds to the present Jaffa gate. The other was the gate of the Pullers' Field, so called from Isa. vii. 3. There is no trace of it in the present wall.

On the north there were also two gates; and all the middle-age writers speak of the principal of them as the gate of St. Stephen, from the notion that the death of the protomartyr took place near it. This was also called the gate of Ephraim, in reference to its probable ancient name. The present gate of St. Stephen is on the east of the city, and the scene of the martyrdom is now placed near it; but there is no account of the change. Farther east was the gate of Benjamin, corresponding apparently to what is now called the gate of Herod.

On the east there seem to have been at least two gates. The northernmost is described by Adamantius as a small portal leading down to the valley of Jehoshaphat. It was called the gate of Jehoshaphat, from the valley to which it led. It seems to be represented by the present gate of St. Stephen. The present gate of St. Stephen has four lions sculptured over it on the outside, which, as well as the architecture, show that it existed before the present walls. The other gate is the famous Golden Gate in the eastern wall of the temple area. This gate is, from its architecture, obviously of Roman origin, and is conjectured to have belonged to the enclosure of the temple of Jupiter which was built by Adrian upon Mount Moriah. The exterior is now walled up; but being double, the interior forms within the area a recess, which is used for prayer by the Moslem worshipper.

On the south side were also two gates. The easternmost is now called by the Franks the Dung-gate. The earliest mention of this gate is by Brocard, about A.D. 1283, who regards it as the ancient Water-gate. Farther west, between the eastern brow of Zion and the gate of David, the Crusaders found a gate which they call the Gate of Zion, corresponding to one which now bears the same name.

Of the seven gates mentioned as still existing, three, the Dung Gate, the Golden Gate, and Herod's Gate, are closed. Thus there are only four gates now in use, one on each side of the town,

all of which have been enumerated. St. Stephen's, on the east, leads to the Mount of Olives, Bethany, and Jericho. Zion Gate, on the south side of the city, connects the populous quarter around the Armenian convent with that part of Mount Zion which is outside the walls, and which is much resorted to as being the great field of Christian burial, as well as for its traditional sanctity as the site of David's tomb, the house of Caiaphas, house of Mary, &c. The Jaffa Gate, on the west, is the termination of the important routes from Jaffa, Bethlehem, and Hebron. The Damascus Gate, on the north, is also planted in a vale, which in every age of Jerusalem must have been a great public way, and the easiest approach from Samaria and Galilee.

The towers of Jerusalem are often mentioned in Scripture and in Josephus. Most of the towers mentioned by Josephus were erected by Herod the Great, and were, consequently, standing in the time of Christ. It was on these, therefore, that his eyes often rested when he approached Jerusalem, or viewed its walls and towers from the Mount of Olives. Of all these towers, the most important is that of Hippicus, which Josephus, as we have already seen, assumed as the starting point in his description of all the walls of the city. Herod gave to it the name of a friend who was slain in battle. It was a quadrangular structure, 25 cubits on each side, and built up entirely solid to the height of 30 cubits. The altitude of the whole tower was 80 cubits. Dr. Robinson has shown that this tower should be sought at the north-west corner of the upper city, or Mount Zion. This part, a little to the south of the Jaffa Gate, is now occupied by the citadel. It is an irregular assemblage of square towers, surrounded on the inner side towards the city by a low wall, and having on the outer or west side a deep fosse. The towers which rise from the brink of the fosse are protected on that side by a low sloping bulwark or buttress, which rises from the bottom of the trench at an angle of forty-five degrees. This part bears evident marks of antiquity, and Dr. Robinson is inclined to ascribe these massive outworks to the time of the rebuilding and fortifying of the city by Adrian. The north-eastern tower bears among the Franks the name of the Tower of David, while they sometimes give to the whole fortress the name of the Castle of David. Taking all the circumstances into account, Dr. Robinson thinks that the antique lower portion of this tower is in all probability a remnant of the tower of Hippicus, which, as Josephus states, was left standing by Titus when he destroyed the city.

Josephus describes two other towers—those of Phasaelus and Mariamme, both built by Herod, one of them being named after a friend, and the other after his favourite wife. They stood not far from Hippicus, upon the first or most ancient wall, which ran from the latter tower eastward, along the northern brow of Zion. Connected with these towers and Hippicus was the royal castle or palace of the first Herod, which was enclosed by this wall on the north, and on the other sides by a wall 30 cubits high. These were the three mighty towers which Titus left standing as monuments of the strength of the place which had yielded to his arms. But nothing now remains

save the above-mentioned supposed remnant of the tower of Hippicus.

A fourth tower, called Psephinus, is mentioned by Josephus. It stood at the north-west corner of the third or exterior wall of the city. It did not, consequently, exist in the time of Christ, seeing that the wall itself was built by Herod Agrippa, to whom also the tower may be ascribed.

The above are the only towers which the historian particularly mentions. But in describing the outer or third wall of Agrippa, he states that it had battlements of two cubits, and turrets of three cubits more: and as the wall was 20 cubits high, this would make the turrets of the height of 25 cubits, or nearly 38 feet. Many loftier and more substantial towers than these were erected on each of the walls at regulated distances, and furnished with every requisite for convenience or defence. Of those on the third or outer wall are enumerated ninety; on the middle or second wall, forty; and on the inner or ancient wall, sixty.

The temple was in all ages the great glory and principal public building of Jerusalem, as the heathen temple, church, or mosque, successively occupying the same site, has been ever since the Jewish temple was destroyed. That temple is reserved for a separate article [TEMPLE], and there are few other public edifices which require a particular description. Those most connected with Scripture history are the palace of Herod and the tower of Antonia. The former has already been noticed. In the time of Christ it was the residence of the Roman procurators while in Jerusalem; and as such provincial residences were called by the Romans *Prætoria*, this was the prætorium or judgment-hall of Pilate (Matt. xxvii. 27; Mark xv. 16; John xviii. 28). In front of the palace was the tribunal or 'judgment-seat,' where the procurator sat to hear and determine the causes; and where Pilate was seated when our Lord was brought before him. It was a raised pavement of mosaic work, called in the Hebrew *Gabbatha*, or 'an elevated place' [JUDGMENT-HALL].

The tower or castle of Antonia stood on a steep rock adjoining the north-west corner of the temple. It has already been mentioned that it originated under the Maccabees, who resided in it. As improved by Herod, who gave it the name of Antonia, after his patron Mark Antony, this fortress had all the extent and appearance of a palace, being divided into apartments of every kind, with galleries and baths, and also broad halls or barracks for soldiers; so that, as having everything necessary within itself, it seemed a city, while in its magnificence it was a palace. At each of the four corners was a tower, one of which was 70 cubits high, and overlooked the whole temple with its courts. The fortress communicated with the cloisters of the temple by secret passages, through which the soldiers could enter and quell any tumults, which were always apprehended at the time of the great festivals. It was to a guard of these soldiers that Pilate referred the Jews as a 'watch' for the sepulchre of Christ. This tower was also 'the castle' into which St. Paul was carried when the Jews rose against him in the temple, and were about to kill him; and where he gave his able and manly ac-

count of his conversion and conduct (Act xxi. 27-40: xxii.). This tower was, in fact, the citadel of Jerusalem.

In the narratives of all the sieges which Jerusalem has suffered, we never read of the besieged suffering from thirst, although driven to the most dreadful extremities and resources by hunger, while the besiegers are frequently described as suffering greatly from want of water, and as being obliged to fetch it from a great distance. This is a very singular circumstance, and is perhaps only in part explained by reference to the system of preserving water in cisterns, as at this day in Jerusalem. There is, however, good ground to conclude that from very ancient times there has been under the temple an unfailing source of water, derived by secret and subterraneous channels from springs to the west of the town, and communicating by other subterraneous passages with the pool of Siloam and the fountain of the Virgin in the east of the town, whether they were within or without the walls of the town. The ordinary means taken by the inhabitants to secure a supply of water have been described under the article CISTERN.

MODERN JERUSALEM.—In proceeding to furnish a description of the present Jerusalem, we shall, for the most part, place ourselves under the guidance of Dr. Olin, whose account is not only the most recent, but is by far the most complete and satisfactory which has of late years been produced.

The general view of the city from the Mount of Olives is mentioned more or less by all travellers as that from which they derive their most distinct and abiding impression of Jerusalem.

The summit of the Mount of Olives is about half a mile east from the city, which it completely overlooks, every considerable edifice and almost every house being visible. The city seen from this point appears to be a regular inclined plain, sloping gently and uniformly from west to east, or towards the observer, and indented by a slight depression or shallow vale, running nearly through the centre in the same direction. The south-east corner of the quadrangle—for that may be assumed as the figure formed by the rocks—that which is nearest to the observer, is occupied by the mosque of Omar and its extensive and beautiful grounds. This is Mount Moriah, the site of Solomon's temple; and the ground embraced in the sacred enclosure, which conforms to that of the ancient temple, occupies about an eighth of the whole modern city. It is covered with green sward and planted sparingly with olive, cypress, and other trees, and it is certainly the most lovely feature of the town, whether we have reference to the splendid structures or the beautiful lawn spread out around them.

The south-west quarter, embracing that part of Mount Zion which is within the modern town, is to a great extent occupied by the Armenian convent, an enormous edifice, which is the only conspicuous object in this neighbourhood. The north-west is largely occupied by the Latin convent, another very extensive establishment. About midway between these two convents is the castle or citadel, close to the Bethlehem gate, already mentioned. The north-east quarter of Jerusalem is but partially built up, and it has more the aspect of a rambling agricultural village than that of a

crowded city. The vacant spots here are green with gardens and olive-trees. There is another large vacant tract along the southern wall, and west of the Haram, also covered with verdure. Near the centre of the city also appear two or three green spots, which are small gardens. The church of the Holy Sepulchre is the only conspicuous edifice in this vicinity, and its domes are striking objects. There are no buildings which, either from their size or beauty, are likely to engage the attention. Eight or ten minarets mark the position of so many mosques in different parts of the town, but they are only noticed because of their elevation above the surrounding edifices. Upon the same principle the eye rests for a moment upon a great number of low domes, which form the roofs of the principal dwellings, and relieve the heavy uniformity of the flat plastered roofs which cover the greater mass of more humble habitations.

From the same commanding point of view a few olive and fig trees are seen in the lower part of the valley of Jehoshaphat, and scattered over the side of Olivet from its base to the summit. They are sprinkled yet more sparingly on the southern side of the city on Mounts Zion and Ophel. North of Jerusalem the olive plantations appear more numerous as well as thriving, and thus offer a grateful contrast to the sun-burnt fields and bare rocks which predominate in this landscape. The region west of the city appears to be destitute of trees. Fields of stunted wheat, yellow with the drought rather than white for the harvest, are seen on all sides of the town.

Jerusalem, as seen from Mount Olivet, is a plain inclining gently and equably to the East. Once enter its gates, however, and it is found to be full of inequalities. The passenger is always ascending or descending. There are no level streets, and little skill or labour has been employed to remove or diminish the inequalities which nature or time has produced. Houses are built upon mountains of rubbish, which are probably twenty, thirty, or fifty feet above the natural level, and the streets are constructed with the same disregard to convenience, with this difference, that some slight attention is paid to the possibility of carrying off surplus water. The latter are, without exception, narrow, seldom exceeding eight or ten feet in breadth. The houses often meet, and in some instances a building occupies both sides of the street, which runs under a succession of arches barely high enough to permit an equestrian to pass under them. A canopy of old mats or of plank is suspended over the principal streets when not arched. This custom had its origin, no doubt, in the heat of the climate, which is very intense in summer, and it gives a gloomy aspect to all the most thronged and lively parts of the city. These covered ways are often pervaded by currents of air when a perfect calm prevails in other places. The principal streets of Jerusalem run nearly at right angles to each other. Very few, if any, of them bear names among the native population. They are badly paved, being merely laid irregularly with raised stones, with a deep square channel, for beasts of burden, in the middle; but the steepness of the ground contributes to keep them cleaner than in most Oriental cities.

The houses of Jerusalem are substantially built

of the limestone of which the whole of this part of Palestine is composed: not usually hewn, but broken into regular forms, and making a solid wall of very respectable appearance. For the most part there are no windows next to the street, and the few which exist for the purposes of light or ventilation are completely masked by casements and lattice-work. The apartments receive their light from the open courts within. The ground plot is usually surrounded by a high enclosure, commonly forming the walls of the house only, but sometimes embracing a small garden and some vacant ground. The rain-water which falls upon the pavement is carefully conducted, by means of gutters, into cisterns, where it is preserved for domestic uses. The people of Jerusalem rely chiefly upon these reservoirs for their supply of this indispensable article. Stone is employed in building for all the purposes to which it can possibly be applied, and Jerusalem is hardly more exposed to accidents by fire than a quarry or subterranean cavern. The floors, stairs, &c., are of stone, and the ceiling is usually formed by a coat of plaster laid upon the stones, which at the same time form the roof and the vaulted top of the room. Doors, sashes, and a few other appurtenances, are all that can usually be afforded of a material so expensive as wood. A large number of houses in Jerusalem are in a dilapidated and ruinous state.

Nothing of this would be suspected from the general appearance of the city as seen from the various commanding points without the walls, nor from anything that meets the eye in the streets. Few towns in the East offer a more imposing spectacle to the view of the approaching stranger. He is struck with the bright and massiveness of the walls, which are kept in perfect repair, and naturally produce a favourable opinion of the wealth and comfort which they are designed to protect. Upon entering the gates, he is apt, after all that has been published about the solitude that reigns in the streets, to be surprised at meeting large numbers of people in the chief thoroughfares, almost without exception decently clad. A longer and more intimate acquaintance with Jerusalem, however, does not fail to correct this too favourable impression, and demonstrate the existence and general prevalence of the poverty and even wretchedness which must result in every country from oppression, from the absence of trade, and the utter stagnation of all branches of industry. Considerable activity is displayed in the bazaars, which are supplied scantily, like those of other Eastern towns, with provisions, tobacco, coarse cottons, and other articles of prime necessity. A considerable business is still done in beads, crosses, and other sacred trinkets, which are purchased to a vast amount by the pilgrims who annually throng the holy city. The support and even the existence of the considerable population of Jerusalem depend upon this transient patronage—a circumstance to which a great part of the prevailing poverty and degradation is justly ascribed. With the exception of some establishments for soap-making, a tannery, and a very few weavers of coarse cottons, there do not appear to be any manufacturers properly belonging to the place. Agriculture is almost equally wretched, and can only give employment to a few hundred people. The niasses really seem to be

without any regular employment. A considerable number, especially of the Jews, professedly live on charity. Many Christian pilgrims annually find their way hither on similar resources, and the approaches to the holy places are thronged with beggars, who in piteous tones demand alms in the name of Christ and the Blessed Virgin. The general condition of the population is that of abject poverty. A few Turkish officials, ecclesiastical, civil, and military; some remains of the old Mohammedan aristocracy—once powerful and rich, but now much impoverished and nearly extinct; together with a few tradesmen in easy circumstances, form almost the only exceptions to the prevailing indigence. There is not a single broker among the whole population, and not the smallest sum can be obtained on the best bills of exchange short of Jaffa or Beirut.

The number of the inhabitants of Jerusalem has been variously estimated by different travellers. The estimate lately given by Dr. Schulz, the Prussian consul at Jerusalem, is as follows:—

I. Mohammedans	5,000
H. Christians:—	
a. Greeks	2,000
b. Roman Catholics	900
c. Armenians	350
d. Copts	100
e. Syrians	20
f. Abyssinians	20
	—3,390
II. Jews:—	
a. Turkish subjects (<i>Sephardim</i>)	6,000
b. Foreign (<i>ashkenazim</i>), namely, Polish, Russian, and German	1,100
c. Karaites	20
	—7,120
	15,510

The language most generally spoken among them is the Arabic. Schools are rare, and consequently facility in reading is not often met with. The general condition of the inhabitants has already been indicated.

The Turkish governor of the town holds the rank of Pasha, but is responsible to the Pasha of Beirut. The government is somewhat milder than before the period of the Egyptian dominion; but it is said that the Jewish and Christian inhabitants at least have ample cause to regret the change of masters, and the American missionaries lament that change without reserve. Formerly there were in Palestine monks of the Benedictine and Augustine orders, and of those of St. Basil and St. Anthony; but since 1304 there have been none but Franciscans, who have charge of the Latin convent and the holy places. They resided on Mount Zion till A.D. 1561, when the Turks allowed them the monastery of St. Salvador, which they now occupy. They had formerly a handsome revenue out of all Roman Catholic countries, but these sources have fallen off since the French revolution, and the establishment is said to be poor and deeply in debt. The expenses arise from the duty imposed upon the convent of entertaining pilgrims; and the cost of maintaining the twenty convents belonging to the establishment of the Terra Santa is estimated at 40,000 Spanish dollars a-year. The convent contains fifty monks, half Italians and half

Spaniards. In it resides the Intendant or the Principal of all the convents, with the rank of abbot, and the title of Guardian of Mount Zion and Custos of the Holy Land. There is also a president or vicar, who takes the place of the guardian in case of absence or death. The procurator, who manages their temporal affairs, is always a Spaniard. A council, called Discretorium, composed of these officials and three other monks, has the general management or both spiritual and temporal matters.

There is a Greek patriarch of Jerusalem, but he usually resides at Constantinople, and is represented in the holy city by one or more vicars, who are bishops residing in the great convent near the Church of the Holy Sepulchre. In addition to thirteen monasteries in Jerusalem, they possess the convent of the Holy Cross, near Jerusalem, that of St. Helena, between Jerusalem and Bethlehem, and that of St. John, between Jerusalem and the Dead Sea. All the monks of the convents are foreigners. The Christians of the Greek rite who are not monks are all native Arabs, with their native priests, who are allowed to perform the church services in their mother tongue—the Arabic.

The Armenians in Jerusalem have a patriarch, with three convents and 100 monks. They have also convents at Bethlehem, Ramleh, and Jaffa. Few of the Armenians are natives: they are mostly merchants, and among the wealthiest inhabitants of the place; and their convent in Jerusalem is deemed the richest in the Levant. Their church of St. James upon Mount Zion is very showy in its decorations, but void of taste. The Coptic Christians at Jerusalem are only some monks residing in the convent of Es-Sultan, on the north side of the pool of Hezekiah. There is also a convent of the Abyssinians, and one belonging to the Jacobite Syrians.

The Jews inhabit a distinct quarter of the town between Mount Zion and Mount Moriah. This is the worst and dirtiest part of the holy city, and that in which the plague never fails to make its first appearance. Few of the Jerusalem Jews are natives; and most of them come from foreign parts to die in the city of their fathers' sepulchres. They are for the most part wretchedly poor, and depend in a great degree for their subsistence upon the contributions of their brethren in different countries. The expectation of support from the annual European contributions leads many of them to live in idleness. Hence there are in Jerusalem 500 acknowledged paupers, and 500 more who receive charity in a quiet way. Many are so poor that, if not relieved, they would not stand out the winter season. A few are shopkeepers, and a few more hawkers, and a very few are operatives. None of them are agriculturists—not a single Jew cultivates the soil of his fathers.

JESHUA, or JOSHUA, son of Jozedech, and high-priest of the Jews when they returned, under Zerubbabel, from the Babylonian exile (n.c. 536). He was, doubtless, born during the exile. His presence and exhortations greatly promoted the rebuilding of the city and temple. The altar of the latter being first erected, enabled him to sanctify their labour by the religious ceremonies and offerings which the law required. Jeshua joined with Zerubbabel in opposing the machi-

nations of the Samaritans (Ezra iv. 3); and he was not found wanting in zeal when the works, after having been interrupted, were resumed in the second year of Darius Hystaspis (Ezra v. 2; Hagg. i. 12). Several of the prophet Haggai's utterances are addressed to Jeshua (Hagg. i. 1; ii. 2), and his name occurs in two of the symbolical prophecies of Zechariah (iii. 1-10; vi. 11-15). In the first of these passages Jeshua, as portiff, represents the Jewish people covered at first with the garb of slaves, and afterwards with the new and glorious vestures of deliverance. In the second he wears for a moment crowns of silver and gold, as symbols of the sacerdotal and regal crowns of Israel, which were to be united on the head of the Messiah.

JESHURUN, a name poetically applied to Israel in Deut. xxxii. 15; xxxiii. 5, 26; Isa. xlv. 2. It has been very variously understood, but it is generally agreed to be a poetical diminutive expressive of affection. It is derived from a word signifying to be straight, right, upright, righteous. In this character, as entirely upright (for the termination is intensive), Jehovah recognises his people in consideration of their covenant relation to him, whereby, while they observed the terms of that covenant, they stood legally righteous before him and clean in his sight. It is in this sense that the ancient kings are said to have done 'that which was right' in the eyes of Jehovah.

JESSE (*Jirm*), a descendant of Obed, the son of Boaz and Ruth. He was the father of eight sons from the youngest of whom, David, is reflected all the distinction which belongs to the name. He seems to have been a person of some note and substance at Bethlehem, his property being chiefly in sheep. It would seem, from 1 Sam. xvi. 10, that he must have been aware of the high destinies which awaited his son; but it is doubtful if he ever lived to see them realized. The last historical mention of Jesse is in relation to the asylum which David procured for him with the king of Moab (1 Sam. xxii. 3).

JESUS CHRIST, the ordinary designation of the incarnate Son of God, and Saviour of mankind. This double designation is not, like Simon Peter, John Mark, Jesus Barnabas, composed of a name and a surname, but, like John the Baptist, Simon Magus, Par-Jesus Elymas, of a proper name, and an official title. Jesus was our Lord's proper name, just as Peter, James, and John were the proper names of three of his disciples. The name seems not to have been an uncommon one among the Jews (Acts xiii. 6; Col. iv. 11). To distinguish our Lord from others bearing the name, he was termed Jesus of Nazareth (John xviii. 7, &c.), and Jesus the son of Joseph (John vi. 42, &c.).

The conferring of this name on our Lord was not the result of accident, or of the ordinary course of things, there being 'none of his kindred,' so far as we can trace from the two genealogies, 'called by that name' (Luke i. 61). It was the consequence of a twofold miraculous interposition. The angel who announced to his virgin mother that she was to be 'the most honoured of women,' in giving birth to the Son of God and the Saviour of men, intimated also to her the name by which the holy child was to be called: 'Thou shalt call his name Jesus' (Luke

i. 31). And it was probably the same heavenly messenger who appeared to Joseph, and, to remove his suspicions and quiet his fears, said to him, 'That which is conceived in thy wife Mary is of the Holy Ghost, and she shall bring forth a son, and thou shalt call his name Jesus' (Matt. i. 20, 21). The pious pair were 'not disobedient to the heavenly vision.' 'When eight days were accomplished for the circumcising of the child, his name was called Jesus, which was so named of the angel before he was conceived in the womb' (Luke ii. 21).

The precise import of the name has been a subject of doubt and debate among interpreters. As to its *general* meaning there is all but an unanimous concurrence. It was intended to denote that he who bore it was to be a Deliverer or Saviour. But while some interpreters hold that it simply signifies 'he shall save,' others hold that it is a compound word equivalent to 'The Salvation of the Lord,' or 'The Lord the Saviour.' It is not a matter of vital importance.

The 'name of Jesus' (Phil. ii. 10) is not the name Jesus, but 'the name above every name' (ver. 9), i. e. the supreme dignity and authority with which the Father has invested Jesus Christ, as the reward of his disinterested exertions in the cause of the divine glory and human happiness; and the bowing 'at the name of Jesus' is obviously not an external mark of homage when the name Jesus is pronounced, but the inward sense of awe and submission to him who is raised to a station so exalted.

CHRIST. This is not, strictly speaking, a proper name, but an official title. Jesus Christ, or rather, as it generally ought to be rendered, Jesus the Christ, is a mode of expression of the same kind as John the Baptist, or Baptist. In consequence of not adverting to this, the force and even the meaning of many passages of Scripture are misapprehended. When it is stated that Paul asserted, 'This Jesus whom I preach unto you is Christ' (Acts xvii. 3), that he 'testified to the Jews that Jesus was Christ' (Acts xviii. 5), the meaning is, that he proclaimed and proved that Jesus was the Christ, or Messiah—the rightful owner of a title descriptive of a high official station which had been the subject of ancient prediction. When Jesus himself says that 'it is life eternal to know the only true God, and Jesus Christ whom he has sent' (John xvii. 3), he represents the knowledge of himself as the Christ, the Messiah, as at once necessary and sufficient to make men truly and permanently happy. When he says, 'What think ye of Christ? whose son is he?' (Matt. xxii. 42), he does not mean, 'What think ye of ME, or of my descent? but, 'What think ye of the Christ—the Messiah—and especially of his paternity. There can be no doubt that the word, though originally an appellative, and intended to bring before the mind a particular official character possessed by him to whom it is applied, came at last, like many other terms of the same kind, to be often used very much as a proper name, to distinguish our Lord from other persons bearing the name Jesus. This is a sense, however, of comparatively rare occurrence in the New Testament.

Proceeding, then, on the principle that Christ is an appellative, let us inquire into its origin and signification as applied to our Lord. CHRIST

is the English form of a Greek word, corresponding in meaning to the Hebrew word *Messiah*, and the English word *Anointed*. 'The Christ' is just equivalent to 'the Anointed One.' The important question, however, remains behind. What is meant when the Saviour is represented as the Anointed One? To reply to this question satisfactorily, it will be necessary to go somewhat into detail.

Unction, from a very early age, seems to have been the emblem of consecration, or setting apart to a particular, and especially to a religious, purpose. Under the Old Testament economy high-priests and kings were regularly set apart to their offices, both of which were, strictly speaking, sacred ones, by the ceremony of anointing, and the prophets were occasionally designated by the same rite. This rite seems to have been intended as a public intimation of a Divine appointment to office. Thus Saul is termed 'the Lord's anointed' (1 Sam. xxiv. 6); David, 'the anointed of the God of Israel' (2 Sam. xxiii. 1); and Zedekiah, 'the anointed of the Lord' (Lam. iv. 20). The high-priest is called 'the anointed priest' (Lev. iv. 3).

From the origin and design of the rite, it is not wonderful that the term should have, in a secondary and analogical sense, been applied to persons set apart by God for important purposes, though not actually anointed. Thus Cyrus, the King of Persia, is termed 'the Lord's anointed' (Isa. xlv. 1); the Hebrew patriarchs, when sojourning in Canaan, are termed 'God's anointed ones' (Ps. cv. 15); and the Israelitish people receive the same appellation from the prophet Habakkuk (Hab. iii. 13).

In the prophetic Scriptures we find this appellation given to an illustrious personage, who, under various designations, is so often spoken of as destined to appear in a distant age as a great deliverer. The royal prophet David seems to have been the first who spoke of the great deliverer under this appellation (Ps. ii. 2; xx. 1; xlv. 7). In all the passages in which the great deliverer is spoken of as 'the anointed one,' by David, he is plainly viewed as sustaining the character of a king.

The prophet Isaiah also uses the appellation, 'the anointed one,' with reference to the promised deliverer, but, when he does so, he speaks of him as a prophet or great teacher. He introduces him as saying, 'The Spirit of the Lord God is upon me, because the Lord God hath anointed me to preach good tidings unto the meek; he hath sent me to bind up the broken-hearted, to proclaim liberty to the captives, and the opening of the prison to them who are bound, to proclaim the acceptable year of the Lord, and the day of vengeance of our God, to comfort all that mourn,' &c. (Isa. lxi. 1, &c.).

Daniel is the only other of the prophets who uses the appellation 'the anointed one' in reference to the great deliverer, and he plainly represents him as not only a prince, but also a high-priest, an expiator of guilt (Dan. ix. 24-26).

During the period which elapsed from the close of the prophetic canon till the birth of Jesus, no appellation of the expected deliverer seems to have been so common as the *Messiah* or *Anointed One*; and this is still the name which the unbelieving Jews ordinarily employ when

speaking of him whom they still look for to avenge their wrongs and restore them to more than their former honours.

Messiah, Christ, Anointed, is, then, a term equivalent to consecrated, sacred, set apart; and as the record of Divine revelation is called, by way of eminence, *The Bible*, or book, so is the Great Deliverer called *The Messiah*, or Anointed One, much in the same way as he is termed *The Man*, *The Son of Man*.

The import of this designation as given to Jesus of Nazareth may now readily be apprehended.—(1.) When he is termed the Christ it is plainly indicated that He is the great deliverer promised under that appellation, and many others in the Old Testament Scriptures, and that all that is said of this deliverer under this or any other appellation is true of Him. No attentive reader of the Old Testament can help noticing that in every part of the prophecies there is ever and anon presented to our view an illustrious personage destined to appear at some future distant period, and, however varied may be the figurative representations given of him, no reasonable doubt can be entertained as to the identity of the individual. It is quite obvious that the Messiah is the same person as the 'seed of the woman' who was to 'bruise the head of the serpent' (Gen. iii. 15); 'the seed of Abraham, in whom all the nations of the earth were to be blessed' (Gen. xxii. 18); the great 'prophet to be raised up like unto Moses,' whom all were to be required to hear and obey (Dent. xviii. 15); the 'priest after the order of Melchizedek'; 'the rod out of the stem of Jesse, which should stand for an ensign of the people to which the Gentiles should seek' (Isa. xi. 1, 10); the virgin's son whose name was to be Immanuel (Isa. vii. 14); 'the branch of Jehovah' (Isa. iv. 2); 'the Angel of the Covenant' (Mal. iii. 1); 'the Lord of the Temple,' &c. &c. (ib.). When we say, then, that Jesus is the Christ, we in effect say, 'This is He of whom Moses, in the law, and the prophets did write' (John i. 45); and all that they say of Him is true of Jesus.

Now what is the sum of the prophetic testimony respecting him? It is this—that he should belong to the very highest order of being, the incommunicable name Jehovah being represented as rightfully belonging to him; that 'his goings forth have been from old, from everlasting' (Mic. v. 2); that his appropriate appellations should be 'Wonderful, Counsellor, the Mighty God' (Isa. ix. 6); that he should assume human nature, and become 'a child born' of the Israelitish nation of the tribe of Judah (Gen. xlix. 10), of the family of David (Isa. xi. 1); that the object of his appearance should be the salvation of mankind, both Jews and Gentiles (Isa. xlix. 6); that he should be 'despised and rejected' of his countrymen; that he should be 'cut off, but not for himself'; that he should be 'wounded for men's transgressions, bruised for their iniquities, and undergo the chastisement of their peace'; that 'by his stripes men should be healed'; that 'the Lord should lay on him the iniquity' of men; that 'exaction should be made and he should answer it'; that he should 'make his soul an offering for sin'; that after these sufferings he should be 'exalted and extolled and made very high'; that he should 'see of the travail of his

soul and be satisfied, and by his knowledge justify many' (Isa. liii. *passim*); that Jehovah should say to him, 'Sit at my right hand until I make thine enemies thy footstool' (Ps. cx. 1); that he should be brought near to the Ancient of Days, and that to him should be given 'dominion, and glory, and a kingdom, that all people, and nations, and languages should serve him—an everlasting dominion which shall not pass away,—a kingdom that shall not be destroyed' (Dan. vii. 13, 14). All this is implied in saying Jesus is the Christ. In the plainer language of the New Testament 'Jesus is the Christ' is equivalent to Jesus is 'God manifest in the flesh' (1 Tim. iii. 16),—the Son of God, who, in human nature, by his obedience, and sufferings, and death in the room of the guilty, has obtained salvation for them, and all power in heaven and earth for himself, that he may give eternal life to all coming to the Father through him.

(2.) While the statement 'Jesus is the Christ' is thus materially equivalent to the statement 'all that is said of the Great Deliverer in the Old Testament Scriptures is true of HIM,' it brings more directly before our mind those truths respecting him which the appellation 'the Anointed One' naturally suggests. He is a prophet, a priest, and a king. He is the great revealer of divine truth; the only expiator of human guilt, and reconciler of man to God; the supreme and sole legitimate ruler over the understandings, consciences, and affections of men. In his person, and work, and word, by his spirit and providence, he unfolds the truth with respect to the divine character and will, and so conveys it into the mind as to make it the effectual means of conforming man's will to God's will, man's character to God's character. He has by his spotless, all-perfect obedience, amid the severest sufferings, 'obedience unto death even the death of the cross,' so illustrated the excellence of the divine law and the wickedness and danger of violating it, as to make it a righteous thing in 'the just God' to 'justify the ungodly,' thus propitiating the offended majesty of heaven; while the manifestation of the divine love in appointing and accepting this atonement, when apprehended by the mind under the influence of the Holy Spirit, becomes the effectual means of reconciling man to God and to his law, 'transforming him by the renewing of his mind.' And now, possessed of 'all power in heaven and earth,' 'all power over all flesh,' 'He is Lord of All.' All external events and all spiritual influences are equally under his control, and as a king he exerts his authority in carrying into full effect the great purposes which his revelations as a prophet, and his great atoning sacrifice as a high-priest, were intended to accomplish.

(3.) But the full import of the appellation the CHRIST is not yet brought out. It indicates that He to whom it belongs is the *anointed* prophet, priest, and king—not that he was anointed by material oil, but that he was divinely *appointed, qualified, commissioned, and accredited* to be the Saviour of men. These are the ideas which the term *anointed* seems specially intended to convey. Jesus was divinely *appointed* to the offices he filled. He did not ultroneously assume them, 'he was called of God as was Aaron' (Heb. v. 4; Isa. xi. 2-4). He was divinely *commissioned*:

'The Father sent him' (Isa. xlix. 6). He is divinely *accredited* (Acts ii. 22; John v. 37). Such is the import of the appellation *Christ*.

If these observations are clearly apprehended there will be little difficulty in giving a satisfactory answer to the question which has sometimes been proposed—when did Jesus become Christ? when was he *anointed* of God? We have seen that the expression is a figurative or analogical one, and therefore we need not wonder that its references are various. The *appointment* of the Saviour, like all the other divine purposes, was, of course, from eternity. 'He was set up from everlasting' (Prov. viii. 23); he 'was fore-ordained before the foundation of the world' (1 Pet. i. 20). His qualifications, such of them as were conferred, were bestowed in or during his incarnation, when 'God anointed him with the Holy Ghost and with power' (Acts x. 38). His commission may be considered as given him when called to enter on the functions of his office. He himself, after quoting, in the synagogue of Nazareth, in the commencement of his ministry, the passage from the prophecies of Isaiah in which his unction to the prophetic office is predicted, declared 'This day is this Scripture fulfilled in your ears.' And in his resurrection and ascension, God, as the reward of his loving righteousness and hating iniquity, 'anointed him with the oil of gladness above his fellows' (Ps. xlv. 7), *i. e.* conferred on him a regal power, fruitful in blessings to himself and others, far superior to that which any king had ever possessed, making him, as the Apostle Peter expresses it, 'both Lord and Christ' (Acts ii. 36). As to his being *accredited*, every miraculous event performed in reference to him or by him may be viewed as included in this species of anointing—especially the visible descent of the Spirit on him in his baptism.

These statements, with regard to the import of the appellation 'the Christ,' show us how we are to understand the statement of the Apostle John, 'Whosoever believeth that Jesus is the Christ is born of God' (1 John v. 1), *i. e.* is 'a child of God,' 'born again,' 'a new creature;' and the similar declaration of the Apostle Paul, 'No man can say that Jesus is the Lord,' *i. e.* the Christ, the Messiah, 'but by the Holy Ghost' (1 Cor. xii. 3). It is plain that the proposition, 'Jesus is the Christ,' when understood in the latitude of meaning which we have shown belongs to it, contains a complete summary of the truth respecting the divine method of salvation. To believe that principle rightly understood is to believe the Gospel—the saving truth, by the faith of which a man is, and by the faith of which only a man can be, brought into the relation or formed to the character of a child of God; and though a man may, without divine influence, be brought to acknowledge that 'Jesus is the Lord,' 'Messiah the Prince,' and even firmly to believe that these words embody a truth, yet no man can be brought really to believe and cordially to acknowledge the truth contained in these words, as we have attempted to unfold it, without a peculiar divine influence.

JESUS, surnamed JUSTUS. [JUSTUS.]

JETHRO. [HOBAB.]

JEW, a name formed from that of the patriarch Judah, and applied in its first use to one belong-

ing to the tribe or country of Judah, or rather perhaps to a subject of the separate kingdom of Judah (2 Kings xvi. 6; xxv. 5). During the Captivity the term seems to have been extended to all the people of the Hebrew language and country, without distinction (Esth. iii. 6, 9; Dan. iii. 8, 12); and this loose application of the name was preserved after the restoration to Palestine, when it came to denote not only every descendant of Abraham in the largest possible sense, but even proselytes who had no blood-relation to the Hebrews (Acts ii. 5; comp. 10). See the articles ISRAEL; JUDAH.

JEZEBEL, (*not inhabited*, comp. *Isabella*), daughter of Ethbaal, king of Tyre and Sidon, and consort of Ahab, king of Israel (b.c. 918). This unsuitable alliance proved most disastrous to the kingdom of Israel; for Jezebel induced her weak husband not only to connive at her introducing the worship of her native idols, but eventually to become himself a worshipper of them, and to use all the means in his power to establish them in the room of the God of Israel. This was a great enormity. The worship of the golden calves which previously existed was, however mistakenly, intended in honour of Jehovah; but this was an open alienation from him, and a turning aside to foreign and strange gods, which, indeed, were no gods. Most of the particulars of this bad but apparently highly-gifted woman's conduct have been related in the notices of AHAH and ELIJAH. From the course of her proceedings it would appear that she grew to hate the Jewish system of law and religion, on account of what must have seemed to her its intolerance and its anti-social tendencies. She hence sought to put it down by all the means she could command; and the imbecility of her husband seems to have made all the powers of the state subservient to her designs. The manner in which she acquired and used her power over Ahab is strikingly shown in the matter of Naboth, which, perhaps, more than all the other affairs in which she was engaged, brings out her true character, and displays the nature of her influence. When she found him pining, like a spoiled child, on account of the refusal of Naboth to gratify him by selling him his patrimonial vineyard for a 'garden of herbs,' she teaches him to look to her, to rely upon her for the accomplishment of his wishes; and for the sake of this impression, more perhaps than from savageness of temper, she scrupled not at murder under the abused forms of law and religion. She had the reward of her unscrupulous decisiveness of character in the triumph of her policy in Israel, where, at last, there were but 7000 people who had not bowed the knee to Baal, nor kissed their hand to his image. Nor was her success confined to Israel, for through Athaliah—a daughter after her own heart—who was married to the son and successor of Jehoshaphat, the same policy prevailed for a time in Judah, after Jezebel herself had perished and the house of Ahab had met its doom. It seems that after the death of her husband Jezebel maintained considerable ascendancy over her son Joram; and her measures and misconduct formed the principal charge which Jehu cast in the teeth of that unhappy monarch before he sent forth the arrow which slew him. The last effort of Jezebel was to inti-

midate Jehu as he passed the palace, by warning him of the eventual rewards of even successful treason. It is eminently characteristic of the woman, that, even in this terrible moment, when she knew that her son was slain, and must have felt that her power had departed, she displayed herself not with rent veil and dishevelled hair, 'but tired her head and painted her eyes' before she looked out at the window. The eunuchs, at a word from Jehu, having cast her down, she met her death beneath the wall [Jehu]; and when afterwards the new monarch bethought him that, as 'a king's daughter,' her corpse should not be treated with disrespect, nothing was found of her but the palms of her hands and the soles of her feet. The dogs had eaten all the rest. b.c. 884 (1 Kings xvi. 31; xviii. 4, 13, 19; xxi. 5-25; 2 Kings ix. 7, 22, 30-37).

JEZREEL, a town in the tribe of Issachar (Josh. xix. 18), where the kings of Israel had a palace, and where the court often resided, although Samaria was the metropolis of the kingdom. It is most frequently mentioned in the history of the house of Ahab. Here was the vineyard of Naboth, which Ahab coveted to enlarge the palace-grounds (1 Kings xviii. 45, 46; xxi.), and here Jehu executed his dreadful commission against the house of Ahab, when Jezebel, Joram, and all who were connected with that wretched dynasty, perished (2 Kings ix. 14-37; x. 1-11). These horrid scenes appear to have given the kings of Israel a distaste to this residence, as it is not again mentioned in their history. It is, however, named by Hosea (i. 4; comp. i. 11; ii. 22); and in Judith (i. 8; iv. 3; vii. 3) it occurs under the name of Esdraelon. In the days of Eusebius and Jerome it was still a large village, called Esdraela. Nothing more is heard of it till the time of the crusades, when it was called by the Franks *Parvum Gerinum*, and by the Arabs *Zerin*; and it is described as commanding a wide prospect—from the east to the mountains of Gilead, and on the west to Mount Carmel. But this line of identification seems to have been afterwards lost sight of, and it is only of late that the identification of *Zerin* and *Jezreel* has been restored.

Zerin is seated on the brow of a rocky and very steep descent into the great and fertile valley of Jezreel, which runs down between the mountains of Gilboa and Hermon. Lying comparatively high, it commands a wide and noble view, extending down the broad valley on the east to Beisan (Bethshean), and on the west quite across the great plain to the mountains of Carmel. It is described by Dr. Robinson (*Researches*, iii. 163) as a most magnificent site for a city, which, being itself a conspicuous object in every part, would naturally give its name to the whole region. In the valley directly under Zerin is a considerable fountain, and another still larger somewhat farther to the east, under the northern side of Gilboa, called *Ain Jalud*. There can, therefore, be little question that, as in Zerin we have Jezreel, so in the valley and the fountain we have the 'valley of Jezreel,' and the fountain of Jezreel, of Scripture.

Zerin has at present little more than twenty humble dwellings, mostly in ruins, and with few inhabitants.

JO'AB (*God-fathered*), one of the three sons

of Zeruiah, the sister of David, and 'captain of the host' (generalissimo) of the army during nearly the whole of David's reign.

He first appears associated with his two brothers, Abishai and Asahel, in the command of David's troops against Abner, who had set up the claims of a son of Saul in opposition to those of David, who then reigned in Hebron. The armies having met at the pool of Gibeon, a general action was brought on, in which Abner was worsted. In his flight he had the misfortune to kill Joab's brother, the swift-footed Asahel, by whom he was pursued (2 Sam. ii. 13-32). The consequences of this deed have been explained elsewhere [ABNER; ASAHEL]. Joab smothered for a time his resentment against the shedder of his brother's blood; but being whetted by the natural rivalry of position between him and Abner, he afterwards made it the instrument of his policy by treacherously, in the act of friendly communication, slaying Abner, at the very time when the services of the latter to David, to whom he had then turned, had rendered him a most dangerous rival to him in power and influence (2 Sam. iii. 22-27). That Abner had at first suspected that Joab would take the position of blood-avenger [BLOOD-REVENGE] is clear, from the apprehension which he expressed (2 Sam. ii. 22); but that he thought that Joab had, under all the circumstances, abandoned this position, is shown by the unsuspecting readiness with which he went aside with him (2 Sam. iii. 26, 27); and that Joab placed his murderous act on the footing of vengeance for his brother's blood, is plainly stated in 2 Sam. iii. 30; by which it also appears that the other brother, Abishai, shared in some way in the deed and its responsibilities. At the same time, as Abner was perfectly justified in slaying Asahel to save his own life, it is very doubtful if Joab would ever have asserted his right of blood-revenge if Abner had not appeared likely to endanger his influence with David. The king, much as he reprobated the act, knew that it had a sort of excuse in the old customs of blood-revenge, and he stood habitually too much in awe of his impetuous and able nephew to bring him to punishment, or even to displace him from his command. 'I am this day weak,' he said, 'though anointed king, and these men, the sons of Zeruiah, be too hard for me' (2 Sam. iii. 39; 1 Chron. xi. 4-9).

Desirous probably of making some atonement before David and the public for this atrocity, in a way which at the same time was most likely to prove effectual—namely, by some daring exploit—he was the first to mount to the assault at the storming of the fortress on Mount Zion, which had remained so long in the hands of the Jebusites. By this service he acquired the chief command of the army of all Israel, of which David was by this time king (2 Sam. v. 6-10).

It is not necessary to trace the subsequent acts of Joab, seeing that they are in fact the public acts of the king he served. And he served him faithfully; for although he knew his power over David, and often treated him with little ceremony, there can be no doubt that he was most truly devoted to his interests, and sometimes rendered him good service even against his own will, as in the affair at Mahanaim (2 Sam. xix. 5-8). But Joab had no principles apart from what he

deemed his duty to the king and the people, and was quite as ready to serve his master's vices as his virtues, so long as they did not interfere with his own interests, or tended to promote them by enabling him to make himself useful to the king. His ready apprehension of the king's meaning in the matter of Uriah, and the facility with which he made himself the instrument of the murder, and of the hypocrisy by which it was covered, are proofs of this, and form as deep a stain upon his character as his own murders (2 Sam. xi. 14-25). As Joab was on good terms with Absalom, and had taken pains to bring about a reconciliation between him and his father, we may set the higher value upon his firm adhesion to David when Absalom revolted, and upon his stern sense of duty to the king—from whom he expected no thanks—displayed in putting an end to the war by the slaughter of his favourite son, when all others shrunk from the responsibility of doing the king a service against his own will (2 Sam. xviii. 1-14). In like manner, when David unhappily resolved to number the people, Joab discerned the evil, and remonstrated against it; and although he did not venture to disobey, he performed the duty tardily and reluctantly, to afford the king an opportunity of reconsidering the matter, and took no pains to conceal how odious the measure was to him (2 Sam. xxiv. 1-4). David was certainly ungrateful for the services of Joab, when, in order to conciliate the powerful party which had supported Absalom, he offered the command of the host to Amasa, who had commanded the army of Absalom (2 Sam. xix. 13). But the inefficiency of the new commander, in the emergency which the revolt of Bichri's son produced, arising perhaps from the reluctance of the troops to follow their new leader, gave Joab an opportunity of displaying his superior resources, and also of removing his rival by a murder very similar to, and in some respects less excusable and more foul than, that of Abner [AMASA]. Besides, Amasa was his own cousin, being the son of his mother's sister (2 Sam. xx. 1-13).

When David lay on his death-bed, and a demonstration was made in favour of the succession of the eldest surviving son, Adonijah, whose interests had been compromised by the preference of the young Solomon, Joab joined the party of the natural heir. It would be unjust to regard this as a defection from David. It was nothing more or less than a demonstration in favour of the natural heir, which, if not then made, could not be made at all. But an act which would have been justifiable, had the preference of Solomon been a mere caprice of the old king, became criminal as an act of contumacy to the Divine king, the real head of the government, who had called the house of David to the throne, and had the sole right of determining which of its members should reign. When the prompt measures taken under the direction of the king rendered this demonstration abortive (1 Kings i. 7), Joab withdrew into private life till some time after the death of David, when the fate of Adonijah, and of Abiathar—whose life was only spared in consequence of his sacerdotal character—warned Joab that he had little mercy to expect from the new king. He fled for refuge to the altar; but when Solomon heard this, he sent Benaiah to put

him to death; and, as he refused to come forth, gave orders that he should be slain even at the altar. Thus died one of the most accomplished warriors and unscrupulous men that Israel ever produced. His corpse was removed to his domain in the wilderness of Judah, and buried there, B.C. 1015 (1 Kings ii. 5, 28-34).

JOAN'NA, wife of Chuza, the steward of Herod Antipas, the tetrarch of Galilee. She was one of those women who followed Christ, and ministered to the wants of him and his disciples out of their abundance. They had all been cured of grievous diseases by the Saviour, or had received material benefits from him; and the customs of the country allowed them to testify in this way their gratitude and devotedness without reproach. It is usually supposed that Joanna was at this time a widow (Luke viii. 3; xxiv. 10).

1. JO'ASH (*God-given*), a contraction of JEHOASH, son of Abaziah and eighth king of Judah, who began to reign in B.C. 878, at the age of seven, and reigned forty-one years.

Joash, when an infant, was secretly saved by his aunt Jehoshebah, who was married to the high-priest Jehoiada, from the general massacre of the family by Athaliah, who had usurped the throne [ATHALIAH; JEHOIADA]. By the high-priest and his wife the child was privily brought up in the chambers connected with the temple till he had attained his eighth year, when Jehoiada deemed that the state of affairs required him to produce the youthful heir of the throne to the people, and claim for him the crown which his grandmother had so unrighteously usurped. Finding the influential persons whom he consulted favourable to the design, everything was secretly, but admirably, arranged for producing Joash, and investing him with the regalia, in such a manner that Athaliah could have no suspicion of the event till it actually occurred. On the day appointed, the sole surviving scion of David's illustrious house appeared in the place of the kings, by a particular pillar in the temple-court, and was crowned and anointed with the usual ceremonies. The high-wrought enthusiasm of the spectators then found vent in clapping of hands and exulting shouts of 'Long live the king!' The joyful uproar was heard even in the palace, and brought Athaliah to the temple, from which, at a word from Jehoiada, she was led to her death.

Joash behaved well during his non-age, and so long after as he remained under the influence of the high-priest. But when he died the king seems to have felt himself relieved from a yoke; and, to manifest his freedom, began to take the contrary course to that which he had followed while under pupilage. Gradually the persons who had possessed influence formerly, when the house of David was contaminated by its alliance with the house of Ahab, insinuated themselves into his councils, and ere long the worship of Jehovah and the observances of the law were neglected, and the land was defiled with idolatries and idolatrous usages. The prophets then uttered their warnings, but were not heard; and the infatuated king had the atrocious ingratitude to put to death Zechariah, the son and successor of his benefactor Jehoiada. For these deeds Joash was made an example of the divine judgments. He saw his realm devastated by the Syrians under

Hazael; his armies were cut in pieces by an enemy of inferior numbers; and he was even besieged in Jerusalem, and only preserved his capital and his crown by giving up the treasures of the temple. Besides this, a painful malady embittered all his latter days, and at length he became so odious that his own servants conspired against him, and slew him on his bed. Joash was buried in the city of David; but a place in the sepulchre of the kings was denied to his remains (2 Kings xi.; xii.; 2 Chron. xxiv.).

2. JOASH, son and successor of Jehoahaz on the throne of Israel, of which he was the twelfth king. He began to reign in B.C. 840, and reigned sixteen incomplete years. He followed the example of his predecessors in the policy of keeping up the worship of the golden calves; but, apart from this, he bears a fair character, and had intervals, at least, of sincere piety and true devotion to the God of his fathers. He held the prophet Elisha in high honour, looking up to him as a father. When he heard of his last illness he repaired to the bed-side of the dying prophet, and was favoured with promises of victories over the Syrians, by whom his dominions were then harassed. These promises were accomplished after the prophet's death. In three signal and successive victories Joash overcame the Syrians, and retook from them the towns which Hazael had rent from Israel.

These advantages rendered the kingdom of Israel more potent than that of Judah. He, however, sought no quarrel with that kingdom: but when he received a defiance from Amaziah, king of Judah, he answered with becoming spirit in a parable, which by its images calls to mind that of Jotham [PARABLES]: the cool disdain of the answer must have been, and in fact was, exceedingly galling to Amaziah. In the war, or rather action, which followed, Joash was victorious. Having defeated Amaziah at Bethshemesh, in Judah, he advanced to Jerusalem, broke down the wall to the extent of 400 cubits, and carried away the treasures both of the temple and the palace, together with hostages for the future good behaviour of the crest-fallen Amaziah. Joash himself did not long survive this victory; he died in peace, and was buried in Samaria (2 Kings xiii. 9-25; xiv. 1-17).

JOB, THE BOOK OF. We shall consider, first, the contents of this book; secondly, its object; thirdly, its composition; and, lastly, the country, descent, and age of its author.

1. CONTENTS. In the land of Uz, belonging to the northern part of Arabia Deserta, lived an honest, pious man, called Job. For his sincere and perfect devotedness, God had amply blessed him with worldly property and children; but on Satan obtaining leave to tempt him, he suddenly lost the fortune of his life. Ultimately he is smitten with a severe and painful disease; but though his wife moves him to forsake God, he still continues true and staunch to the Lord. Three friends, Eliphaz, Bildad, and Zophar, hear of his calamities, and come to console him. His distressed state excites their heartfelt compassion: but the view which they take of its origin prevents them from at once assisting him, and they remain silent, though they are sensible that by so doing they further wound his feelings. Seven days thus pass, until Job, suspecting the cause of

their conduct, becomes discomposed and breaks silence. His first observations are based on the assertion—not, indeed, broadly expressed—that God acts harshly and arbitrarily in inflicting calamity on men. This causes a discussion between him and his friends, which is divided into three main parts, each with subdivisions, and embraces the speeches of the three friends of Job, and his answers: the last part, however, consists of only two subdivisions, the third friend, Zophar, having nothing to rejoin. By this silence the author of the book generally designates the defeat of Job's friends, who are defending a common cause. Taking a general view of the argument which they urge against him, they may be considered as asserting the following positions:—

1. No man being free from sin, we need not wonder that we are liable to calamities, for which we must account by a reference, not to God, but to ourselves. From the misery of the distressed, others are enabled to infer their guilt; and they must take this view in order to vindicate divine justice.

2. The distress of a man proves not only that he has sinned, but shows also the degree and measure of his sin; and thus, from the extent of calamity sustained, may be inferred the extent of sins committed; and from this the measure of impending misfortune.

3. A distressed man may recover his former happiness, and even attain to greater fortune than he ever enjoyed before, if he takes a warning from his afflictions, repents of his sins, reforms his life, and raises himself to a higher degree of moral rectitude. Impatience and irreverent expostulation with God serve but to prolong and increase punishment; for, by accusing God of injustice, a fresh sin is added to former transgressions.

4. Though the wicked man is capable of prosperity, still it is never lasting. The most awful retribution soon overtakes him; and his transient felicity must itself be considered as punishment, since it renders him heedless, and makes him feel misfortune more keenly.

In opposition to them, Job maintains:

1. The most upright man may be highly unfortunate—more so than the inevitable faults and shortcomings of human nature would seem to imply. There is a savage cruelty, deserving the severities of the Divine resentment, in inferring the guilt of a man from his distresses. In distributing good and evil, God regards neither merit nor guilt, but acts according to His sovereign pleasure. His omnipotence is apparent in every part of the creation; but His justice cannot be seen in the government of the world; the afflictions of the righteous, as well as the prosperity of the wicked, are evidence against it. There are innumerable cases, and Job considers his own to be one of them, in which a sufferer has a right to justify himself before God, and to repine at His decrees. Of this supposed right Job freely avails himself, and maintains it against his friends.

2. In a state of composure and calmer reflection, Job retracts, chiefly in his concluding speech, all his former rather extravagant assertions, and says that, although God generally afflicts the wicked and blesses the righteous, still there are exceptions to this rule, single cases in which the pious undergo severe trials; the infe-

rence, therefore, of a man's guilt from his misfortunes is by no means warranted. For the exceptions established by experience prove that God does not always distribute prosperity and adversity after this rule; but that he sometimes acts on a different principle, or as an absolute lord, according to his mere will and pleasure.

3. Humbly to adore God is our duty, even when we are subject to calamities not at all deserved; but we should abstain from harshly judging of those who, when distressed, send forth complaints against God.

The interest of the narrative is kept up with considerable skill, by progressively rising and highly passionate language. At first, Job's friends charge him, and he defends himself, in mild terms; but gradually they are all betrayed into warmth of temper, which goes on increasing until the friends have nothing more to object, and Job remains in possession of the field. The discussion then seems to be at an end, when a fresh disputant, Elihu, appears. Trusting in his just cause, Job had proudly opposed God, with whom he expostulated, and whom he charged with injustice, when the sense of his calamities should have led him to acknowledge the sinfulness of human nature, and humbly to submit to the Divine dispensations. Making every allowance for his painful situation, and putting the mildest construction on his expressions, he is still substantially wrong, and could not therefore be suffered to remain the vanquisher in this high argument. He had silenced his friends, but the general issue remained to be settled. Elihu had waited till Job and his friends had spoken, because they were older than he; but when he saw that the three visitors ceased to answer, he offers himself to reason with Job, and shows that God is just in his ways. He does this,

1. *From the nature of afflictions.*—He begins by urging that Job was very wrong in boasting of his integrity, and making it appear that rewards were due to him from God. How righteous never he was, he still had no claim to reward; on the contrary, all men are sinners in God's eyes; and nobody can complain that he suffers unjustly, for the very greatest sufferings equal not his immense guilt. Then Elihu explains a leading point on which he differs from the friends of Job: he asserts that from greater sufferings inflicted on a person it was not to be inferred that he had sinned more than others afflicted with a less amount of calamity. Calamities were, indeed, under all circumstances, punishments for sins committed, but at the same time they were correctives also; and therefore they might be inflicted on the comparatively most righteous in preference to others. If the object of afflictions was attained, and the distressed acknowledged his sinfulness, he would humble himself before God, who would bless him with greater happiness than he ever before enjoyed. But he who took not this view, and did not amend his ways, would be ruined, and the blame would rest wholly with himself. Consequently, if Job made the best of his misfortune, God would render him most happy; but if he continued refractory, punishment would follow his offences.

2. *From a clear conception of the nature of God.*—The whole creation shows forth His majesty, and evinces His justice. For a man to stand up

against Him and to assert that he suffers innocently, is the greatest anthropomorphism, because it goes to deny the Divine majesty, evident in all the facts of the created world, and including God's justice. His nature being one and indivisible, it cannot on one side exhibit infinite perfection, and on the other imperfection: each example, then, of God's grandeur in the creation of the world is evidence against the rash accusers of God's justice. God *must* be just—this is certain from the outset; and *how* His justice is not impaired by calamities inflicted on the righteous and on thyself, I have already explained.

Job had, in a stirring manner, several times, challenged God to decide the contest. Elihu suspects the approach of the Lord, when, towards the end of his speech, a violent thunder-storm arises, and God answers Job out of the whirlwind, showing how foolishly the latter had acted in offering to reason with Him, when His works proved His infinite majesty, and, consequently, His absolute justice. Job now submits to God, and humbly repents of his offence. Hereupon God addresses Eliphaz, Bildad, and Zophar, declaring unto them His displeasure at their unmerciful dealing with their friend, the consequences of which could only be avoided by Job offering a propitiatory sacrifice. This is done, and the Lord grants unto Job ample compensation for his sufferings.

II. DESIGN OF THE BOOK. All agree that the object of the book is the solution of the question, how the afflictions of the righteous and the prosperity of the wicked can be consistent with God's justice. But it should be observed that the direct problem exclusively refers to the first point, the second being only incidentally discussed on occasion of the leading theme. If this is overlooked, the author would appear to have solved only one half of his problem; the case from which the whole discussion proceeds, has reference merely to the leading problem.

The solution of the problem regarding the sufferings of the righteous rests on two positions.

1. Calamity is the only way that leads to the kingdom of God.

2. Calamity, as the veiled grace of God, is with the pious never alone, but manifest proofs of Divine favour accompany or follow it. Though sunk in misery, they still are happier than the wicked, and when it has attained its object, it is terminated by the Lord.

It is this exclusively correct solution of the problem which occurs in the book of Job. It is not given in Job's speeches or in the speeches of his friends, neither is it exclusively given in the addresses of God which contain only the basis of the solution, not the solution itself. But all interpreters allow that it is set forth in Elihu's speeches which appear to contain the opinion of the author.

The leading principle in Elihu's statement is, that calamity in the shape of trial was inflicted even on the comparatively best men, but that God allowed a favourable turn to take place as soon as it had attained its object. Now this is the key to the events of Job's life. Though a pious and righteous man, he is tried by severe afflictions. He knows not for what purpose he is smitten, and his calamity continues; but when he learns it from the addresses of Elihu and God,

and humbles himself, he is relieved from the burden which oppresses him, and ample prosperity atones for the afflictions he has sustained. Add to this, that the remaining portion of Elihu's speeches, in which he points to God's infinite majesty as including his justice, is continued in the addresses of God; that Elihu foretells God's appearance; that he is not punished by God as are the friends of Job; in fine, that Job by his very silence acknowledges the problem to have been solved by Elihu; and his silence is the more significant because Elihu had urged him to defend himself (xxxiii. 32), and because Job had repeatedly declared he would 'hold his peace,' if it was shown to him wherein he had erred (vi. 24, 25; xix. 4).

In regard to the character of the composition of the book there are three different opinions:—1. Some contend that the book contains an entirely true history. 2. Others assert that it is founded on a true history, which has been recast, modified, and enlarged by the author. 3. The third opinion is, that the book contains a narrative entirely imaginary, and constructed by the author to teach a great moral truth.

The first view, taken by numerous ancient interpreters, is now abandoned by nearly all interpreters. It seems, however, to have been adopted by Josephus, for he places Job in the list of the historical books; and it was prevalent with all the fathers of the church. In its support it is said, 1. That Job is (Ezek. xiv. 14–20) mentioned as a public character, together with Noah and Daniel, and represented as an example of piety. 2. In the epistle of James (v. 11), patience in sufferings is recommended by a reference to Job.

We must confine ourselves to contending for an historical foundation of the book, but must not undertake to determine the exact nature of the groundwork. That its historical framework was poetically enlarged by the author, has been already observed by Luther. As for the rest, the subtlety displayed in explaining opposite views, the carefully drawn characters of the persons introduced, and their animated discourses, lead us to suppose that the question at issue had *previously* been the subject of various discussions in presence of the author, who, perhaps, took part in them. Thus there would be an historical foundation, not only for the facts related in the book, but to a certain extent also for the speeches.

Opinions differed in ancient times as to the nation to which the author belonged; some considering him to have been an Arab, others an Israelite; but the latter supposition is undoubtedly preferable. For, 1st, we find in our book many ideas of genuine Israelite growth: the creation of the world is described, in accordance with the prevailing notions of the Israelites, as the immediate effect of Divine omnipotence; man is formed of clay; the spirit of man is God's breath; God employs the angels for the performance of his orders; Satan, the enemy of the chosen children of God, is his instrument for tempting them; men are weak and sinful; nobody is pure in the sight of God; moral corruption is propagated. There is pronounced to men the law of God, which they must not infringe, and the transgressions of which are visited on

offenders with punishments. Moreover, the nether world is depicted in hues entirely Hebrew. To these particulars might, without much trouble, be added many more; but the deep-searching inquirer will particularly weigh, 2ndly, the fact, that the book displays a strength and fervour of religious faith, such as could only be expected within the domain of revelation.

Proceeding to the inquiry as to the age of the author of this book, we meet with three opinions:—1. That he lived before Moses, or was, at least, his contemporary. 2. That he lived in the time of Solomon, or in the centuries next following. 3. That he lived shortly before, or during, or even after the Babylonian exile. The view of those who assert the book to have been written long after the Babylonian exile, can be supported neither by the nature of its language nor by reasons derived from its historical ground-work, and is therefore now generally rejected.

Against this view, militate, first, the references to it in the Old Testament, which prove that it was before this period a generally known writing. Thus, in Ezek. xiv. 14-20, are mentioned 'three men, Noah, Daniel, and Job,' as examples of righteousness. Further, in Jeremiah xx. 14, we find evidently imitated Job's cursing of the day of his birth (ch. iii.). Not only the sentiments but the words are often the same. There are also in the *Lamentations* of Jeremiah, many passages clearly alluding to our book, which must have eminently suited the taste of this prophet and interested him (comp. xvi. 13 with Lam. ii. 16; and xix. 8, with Lam. iii. 7, 9). Another example of words borrowed from Job occurs in Psalm cvii. 42, where the second part of the verse agrees literally with Job v. 16. 2. A most decisive reason against assigning the composition of Job to the period of the Exile is derived from the language, since it is free from those Chaldaisms which occur in the books written about that time. Eichhorn justly observes, 'Let him who is fit for such researches, only read, first, a writing, tainted with Aramæisms, and next the book of Job: they will be found diverging as east and west.' 3. Equally conclusive is the poetical character of the book. The Exile might produce a soft, moving poem, but could not give birth to such a rich, compact, animated, and warm composition as ours, breathing youthful freshness throughout. Ewald, in acknowledging this, says justly, 'The high skill displayed in this book cannot be well expected from later centuries, when poetry had by degrees generally declined, and particularly in the higher art required by large compositions; and language so concise and expressive as that of our author, is not found in writings of later times.'

To the view which places the age of the book of Job in the time of the Babylonian exile, is most opposed that which assigns the composition of it to a period prior to Moses. In support of this latter view, two arguments have been adduced. It is said, 1. 'There is in the book of Job no direct reference to the Mosaic legislation; and its descriptions and other statements are suited to the period of the patriarchs; as, for instance, the great authority held by old men, the high age of Job, and fathers offering sacrifices for their families—which leads to the supposition that when our book was written no

sacerdotal order yet existed.' These points, however, are quite intelligible, if the design of the book, as stated above, is kept in view. The author intended not to rest the decision of the question at issue on particular passages of Scripture, but on religious consciousness and experience. This at once explains why he places the scene without Palestine, why he places it in the patriarchal age, and why he avoids the use of the name Jehovah; of these three items the first sufficiently accounts for no reference being made to the Mosaic legislation. 2. 'The language of the book of Job seems strongly to support the opinion of its having been written before Moses.' It has been often said, that no writing of the Old Testament may be more frequently illustrated from the Arabic than this book. In answer to this it has been said that this inference would be safe only if the book were written in prose, and that the selection of obsolete and rare words and forms, with the Hebrews, was a peculiar feature of the poetical style, and served to distinguish it from the usual, habitual way of writing; and that this peculiarity belongs to our book more than to any other.

With regard to the reasons in support of the opinion that the book of Job was written after the age of Moses, most of them are either not conclusive at all, or not quite cogent. Thus it is an arbitrary assumption, proved by modern researches to be erroneous, that the art of writing was unknown previous to the age of Moses. The assertion too, that the marks of cultivation and refinement observable in our book belonged to a later age, rests on no historical ground. The evident correspondence also between this book and the Proverbs and Psalms is not a point proving with resistless force that they were all written at the same time. It is, indeed, sometimes of such a kind, that the authors of the Proverbs and Psalms cannot be exactly said to have copied our book; but it may be accounted for by their all belonging to the same class of writings, by the very great uniformity and accordance of religious conceptions and sentiments expressed in the Old Testament, and by the stability of its religious character.

Summing up the whole of our investigations, we take it to be a settled point that the book of Job does not belong to the time of the Babylonian exile: and it cannot have been composed later than the era of Isaiah, who alludes to it. With this result we must rest satisfied. There remains uncertainty, but it does not concern an important point of religion. The significance of our book for the church rests on the evidence of our Lord and his apostles in support of the inspiration of the whole collection of the Old Testament, and on the confirmation which this external evidence has at all times received, and continues to receive, from the internal testimony, among the true believers of all ages.

JOB'S DISEASE. The opinion that the malady under which Job suffered was elephantiasis, or black leprosy, is very ancient, and, in modern times, it is entertained by the best scholars generally. The passages which are considered to indicate this disease are found in the description of his skin burning from head to foot, so that he took a potsherd to scrape himself (ii. 7, 8); in its being covered with putrefaction and crusts of earth, and

being at one time stiff and hard, while at another it cracked and discharged fluid (vii. 5); in the offensive breath which drove away the kindness of attendants (xix. 17); in the restless nights, which were either sleepless or scared with frightful dreams (vii. 13, 14; xxx. 17); in general emaciation (xvi. 8); and in so intense a loathing of the burden of life, that strangling and death were preferred to it (vii. 15).

In this, as in most other Biblical diseases, there is too little distinct description of symptoms to enable us to determine the precise malady intended. But the general character of the complaint under which Job suffered, bears a greater resemblance to elephantiasis than to any other disease [LEPROSY].

JOCHEBED (*God-glorified*), wife of Amram and mother of Miriam, Moses and Aaron. In Exod. vi. 20, Jochebed is expressly declared to have been the sister of Amram's father, and consequently the aunt of her husband. As marriage between persons thus related was afterwards forbidden by the law (Lev. xviii. 12), various attempts have been made to show that the relationship was more distant than the text in its literal meaning indicates. We see no necessity for this. The mere mention of the relationship implies that there was something remarkable in the case; but if we show that nothing is remarkable, we do away the occasion for the relationship being at all noticed. The fact seems to be, that where this marriage was contracted, there was no law forbidding such alliances, but they must in any case have been unusual, although not forbidden; and this, with the writer's knowledge that they were subsequently interdicted, sufficiently accounts for this one being so pointedly mentioned. The candour of the historian in declaring himself to be sprung from a marriage, afterwards forbidden by the law, delivered through himself, deserves especial notice.

JOEL (*worshipper of Jehovah*), one of the twelve minor prophets, the son of Pethuel. Of his birth-place nothing is known with certainty. From the local allusions in his prophecy, we may infer that he discharged his office in the kingdom of Judah. But the references to the temple, its priests and sacrifices, are rather slender grounds for conjecturing that he belonged to the sacerdotal order. Various opinions have been held respecting the period in which he lived. It appears most probable that he was contemporary with Amos and Isaiah, and delivered his predictions in the reign of Uzziah, between 800 and 780 B.C.

This prophet opens his commission by announcing an extraordinary plague of locusts, accompanied with extreme drought, which he depicts in a strain of animated and sublime poetry under the image of an invading army. The fidelity of his highly-wrought description is corroborated and illustrated by the testimonies of Shaw, Volney, Forbes, and other eminent travellers, who have been eye-witnesses of the ravages committed by this most terrible of the insect tribe. In the second chapter, the formidable aspect of the locusts—their rapid progress—their sweeping devastation—the awful murmur of their countless throngs—their instinctive marshalling—the irresistible perseverance with which they make their way over every obstacle and through every aperture—are delineated with the utmost

graphic force. There is considerable diversity of sentiment as to the point whether these descriptions are to be understood literally or figuratively. The figurative interpretation has, it must be allowed, the support of antiquity. It was adopted by the Chaldee paraphrast, Ephrem the Syrian (A.D. 350), and the Jews in the time of Jerome (A.D. 400). Ephrem supposes that by the four different denominations of the locusts were intended Tiglath-pileser, Shalmaneser, Sennacherib, and Nebuchadnezzar. The Jews, in the time of Jerome, understood by the first term the Assyrians and Chaldeans; by the second, the Medes and Persians; by the third, Alexander the Great and his successors; and by the fourth, the Romans. Grotius applies the description to the invasions by Pul and Shalmaneser. Holzhausen attempts to unite both modes of interpretation, and applies the language literally to the locusts, and metaphorically to the Assyrians. It is singular, however, that, if a hostile invasion be intended, not the least hint is given of personal injury sustained by the inhabitants; the immediate effects are confined entirely to the vegetable productions and the cattle.

The prophet, after describing the approaching judgments, calls on his countrymen to repent, assuring them of the divine placability and readiness to forgive (ii. 12-17). He foretells the restoration of the land to its former fertility, and declares that Jehovah would still be their God (ii. 18-26). He then announces the spiritual blessings which would be poured forth in the Messianic age (iii. 1-5, Heb. text; ii. 28-32, Auth. Vers.). This remarkable prediction is applied by the Apostle Peter to the events that transpired on the day of Pentecost (Acts ii. 16-21). In the last chapter the divine vengeance is denounced against the enemies and oppressors of the chosen people, of whom the Phœnicians, Egyptians, and Edomites are especially named.

The style of Joel, it has been remarked, unites the strength of Micah with the tenderness of Jeremiah. In vividness of description he rivals Nahum, and in sublimity and majesty is scarcely inferior to Isaiah and Habakkuk.

The canonicity of this book has never been called in question.

JOHANAN (*God-bestowed*); one of the officers who came and recognised Gedaliah as governor of Judæa after the destruction of Jerusalem, and who appears to have been the chief in authority and influence among them. He penetrated the designs of Ishmael against the governor, whom he endeavoured, without success, to put upon his guard. When Ishmael had accomplished his design by the murder of Gedaliah, and was carrying away the principal persons at the seat of government as captives to the Ammonites, Johanan pursued him, and released them. Being fearful, however, that the Chaldeans might misunderstand the affair, and make him and those who were with him responsible for it, he resolved to withdraw for safety into Egypt, with the principal persons of the remnant left in the land. Jeremiah remonstrated against this decision; but Johanan would not be moved, and even constrained the prophet himself to go with them. They proceeded to Taphanes, but nothing further is recorded of Johanan. N.C. 588 (2 Kings xxv. 23; Jer. xl. 8-16; xli.; xlii.; xliii.).

JOHN THE BAPTIST. The name John denotes *grace* or *favour*. In the church John commonly bears the honourable title of 'forerunner of the Lord.'

His parents were Zacharias and Elisabeth, the latter 'a cousin of Mary,' the mother of Jesus, whose senior John was by a period of six months (Luke i.). According to the account contained in the first chapter of Luke, his father, while engaged in burning incense, was visited by the angel Gabriel, who informed him that in compliance with his prayers his wife should bear a son, whose name he should call John—in allusion to the grace thus accorded. A description of the manner of his son's life is given, which in effect states that he was to be a Nazarene, abstaining from bodily indulgences, was to receive special favour and aid of God, was to prove a great religious and social reformer, and so prepare the way for the long-expected Messiah. Zacharias was slow to believe these tidings and sought some token in evidence of their truth. Accordingly a sign was given which acted also as a punishment of his want of faith—his tongue was sealed till the prediction should be fulfilled by the event. Six months after Elisabeth had conceived she received a visit from Mary, the future mother of Jesus. On being saluted by her relation, Elisabeth felt her babe leap in her womb, and, being filled with the holy spirit, she broke forth into a poetic congratulation to Mary, as the destined mother of her Lord. At length Elisabeth brought forth a son, whom the relatives were disposed to name Zacharias, after his father—but Elisabeth was in some way led to wish that he should be called John. The matter was referred to the father, who signified in writing that his name was to be John. This agreement with Elisabeth caused all to marvel. Zacharias now had his tongue loosed, and he first employed his restored power in praising God. These singular events caused universal surprise, and led people to expect that the child would prove a distinguished man.

The parents of John were not only of a priestly order, but righteous and devout. Their influence, in consequence, in the training of their son, would be not only benign but suitable to the holy office which he was designed to fill. More than this—the special aids of God's Spirit were with him (Luke i. 66). As a consequence of the lofty influences under which he was nurtured, the child waxed strong in spirit. The sacred writer adds that 'he was in the deserts till the day of his showing unto Israel' (Luke i. 80).

In the fifteenth year of the Emperor Tiberius, John made his public appearance, exhibiting the austerity, the costume, and the manner of life of the ancient Jewish prophets (Luke iii.; Matt. iii.). His raiment was camel's hair; he wore a plain leathern girdle about his loins; his food was what the desert spontaneously offered—locusts and wild honey from the rock. The burden of John's preaching bore no slight resemblance to the old prophetic exhortations, whose last echo had now died away for centuries. He called upon the Jewish people to repent, to change their minds, their dispositions and affections, and thus prepared the way for the great doctrine promulgated by his Lord, of the necessity of a spiritual regeneration. That the change which John had in view was by no means of so great or so elevated

a kind as that which Jesus required, is very probable; but the particulars into which he enters when he proceeds to address classes or individuals (Matt. iii. 7, sq.; Luke iii. 7, sq.), serve fully to show that the renovation at which he aimed was not merely of a material or organic, but chiefly of a moral nature. In a very emphatic manner did he warn the ecclesiastical and legal authorities of the land of the necessity under which they lay of an entire change of view, of aim, and of desire; declaring in explicit and awful terms that their pride of nationality would avail them nothing against the coming wrathful visitation, and that they were utterly mistaken in the notion that Divine Providence had any need of them for completing its own wise purposes (Luke iii. 8, 9). The first reason assigned by John for entering on his most weighty and perilous office was announced in these words—'the kingdom of heaven is at hand.' It was his great work to prepare the mind of the nation, so that when Jesus himself came they might be a people made ready for the Lord.

Had we space to develop the moral character of John, we could show that this fine, stern, high-minded teacher possessed many eminent qualities; but his personal and official modesty in keeping, in all circumstances, in the lower rank assigned him by God, must not pass without special mention. The doctrine and manner of life of John appear to have roused the entire of the south of Palestine, and people flocked from all parts to the spot where, on the banks of the Jordan, he baptized thousands unto repentance. Such, indeed, was the fame which he had gained, that 'people were in expectation, and all men mused in their hearts of John, whether he were the Christ or not' (Luke iii. 15). Had he chosen, John might without doubt have assumed to himself the higher office, and risen to great worldly power. But he was faithful to his trust, and never failed to declare, in the fullest and clearest manner, that he was not the Christ, but merely his harbinger, and that the sole work he had to do was to usher in the day-spring from on high.

The more than prophetic fame of the Baptist reached the ears of Jesus in his Nazarene dwelling, far distant from the locality of John (Matt. ii. 22, 23). The nature of the report—namely, that his Divinely-predicted forerunner had appeared in Judæa—showed our Lord that the time was now come for his being made manifest to Israel. Accordingly he comes to the place where John is to be baptized of him, in order that thus he might fulfil all that was required under the dispensation which was about to disappear (Matt. iii. 13). John's sense of inferiority inclines him to ask rather than to give baptism in the case of Jesus, who, however, wills to have it so, and is accordingly baptized of John. Immediately on the termination of this symbolical act, a Divine attestation is given from the opened vault of heaven, declaring Jesus to be in truth the long-looked-for Messiah—'This is my beloved Son, in whom I am well pleased' (Matt. iii. 17).

The relation which subsisted between John and Jesus, after the emphatic testimony above recorded had been borne, we have not the materials to describe with full certainty.

It seems but natural to think, when their hitherto relative position is taken into account

that John would forthwith lay down his office of harbinger, which, now that the Sun of Righteousness himself had appeared, was entirely fulfilled and terminated. Such a step he does not appear to have taken. On the contrary, the language of Scripture seems to imply that the Baptist church continued side by side with the Messianic (Matt. xi. 3; Luke vii. 19; Matt. ix. 14; Luke xi. 1; John iii. 23), and remained long after John's execution (Acts xix. 3). Still, though it has been generally assumed that John did not lay down his office, we are not satisfied that the New Testament establishes this alleged fact. John may have ceased to execute his own peculiar work, as the forerunner, but may justifiably have continued to bear his most important testimony to the Messiahship of Christ; or he may even have altogether given up the duties of active life some time, at least, before his death; and yet his disciples, both before and after that event, may have maintained their individuality as a religious communion. Nor is it impossible that some misconception or some sinister motive may have had weight in preventing the Baptist church from dissolving and passing into that of Christ. It was, not improbably, with a view to remove some error of this kind that John sent the embassy of his disciples to Jesus which is recorded in Matt. xi. 3; Luke vii. 19. No intimation is found in the record that John required evidence to give him satisfaction; and all the language that is used is proper and pertinent if we suppose that the doubt lay only in the minds of his disciples. That the terms employed admit the interpretation that John was not without some misgivings (Luke vii. 23; Matt. xi. 6), we are free to allow. And if any doubt had grown up in the Baptist's mind, it was most probably owing to the defective spirituality of his views; for even of him Jesus has declared, 'he that is least in the kingdom of heaven is greater than he' (Matt. xi. 11). Were this the case, it would of itself account not only for the embassy sent by John to Jesus, but also for the continuance and perpetuation of John's separate influence as the founder of a sect.

The manner of John's death is too well known to require to be detailed here (Matt. iv. 12; xiv. 3; Luke iii. 19; Mark vi. 17; Joseph. *Antiq.* xviii. 5. 2). He reproved a tyrant for a heinous crime, and received his reward in decapitation.

JOHN THE EVANGELIST. This eminent Apostle was the son of Zebedee, a fisherman, and of Salome. It is probable that he was born at Bethsaida, on the lake of Galilee. His parents appear to have been in easy circumstances; at least, we find that Zebedee employed hired servants (Mark i. 20), and that Salome was among the number of those women who contributed to the maintenance of Jesus (Matt. xxvii. 56). We also find that John received Mary into his house after the death of Jesus. Since this house seems to have been situated at Jerusalem, it would appear that he was the owner of two houses. John's acquaintance, also, with the high priest (xviii. 15) seems to indicate that he lived at Jerusalem, and belonged to the wealthier class. We may suppose that from a tender age he nourished religious feelings, since Salome, who evinced so much love for Jesus, probably fostered at an earlier period those hopes of a Messiah which

she expresses in Matt. xx. 20; and we find that he entered into communion with the Baptist from pure motives. On the banks of the Jordan the Baptist directed John to Jesus, and he immediately became the Lord's disciple, and accompanied him on his return to Galilee. Having arrived there, he at first resumed his trade, but was afterwards called to remain permanently with the Redeemer (Luke v. 5-10). Jesus was particularly attached to John (John xiii. 23; xix. 26; xx. 2; xxi. 7), who was one of the three who were distinguished above the other apostles (Matt. xvii. 1; xxvi. 37; Mark v. 37). After the ascension, John abode at Jerusalem, where Paul met him on his third journey, about the year 52 (Gal. ii. 3-9). Since he had undertaken the care of the mother of Jesus, we cannot well suppose that he left Jerusalem before Mary's death; and, indeed, we find that about the year 58, when Paul was at Ephesus, John was not yet living there. If we consider the great importance of Ephesus among the various churches of Asia Minor, and the dangers arising from false teachers, who were prevalent there as early as the days of Paul (Acts xx. 29), it will appear likely that John was sent to Ephesus after Paul had left that scene, about the year 65. During the time of his activity in Asia Minor he was exiled by the Roman emperor to Patmos, one of the Sporadic isles in the *Ægean* Sea, where, according to Revelations i. 9, he wrote the Apocalypse. Irenæus and, following him, Eusebius state that John beheld the visions of the Apocalypse about the close of the reign of Domitian. If this statement can be depended upon, the exile to Patmos also took place under Domitian, who died A.D. 96. Tertullian related that in the reign of Domitian John was forcibly conveyed to Rome, where he was thrown into a cask of oil; that he was miraculously released, and then brought to Patmos. But since none of the ancient writers besides the rather indiscriminating Tertullian, relate this circumstance, and since this mode of capital punishment was unheard of at Rome, we ought not to lay much stress upon it. It is, however, likely that John was called to suffer for his faith, since Polycrates, bishop of Ephesus, writing about A.D. 200, calls him 'martyr.' According to Eusebius, he returned from exile during the reign of Nerva. The three epistles of John, as also the affecting account concerning his fidelity as a spiritual pastor, given by Clemons Alexandrinus, testify that he was the pastor of a large diocese. John's second Epistle, ver. 12, and third Epistle, ver. 14, indicate that he made journeys of pastoral visitation. John died at Ephesus past the age of ninety, in the reign of the Emperor Trajan. According to Jerome, he was a hundred years old, and according to Suidas, a hundred and twenty.*

* Jerome relates that when John had attained a great age he was so feeble that he could not walk to the assemblies of the church; he, therefore, caused himself to be carried in by young men. He was no longer able to say much, but he constantly repeated the words, 'Little children, love one another.' On being asked why he constantly repeated this one saying, he replied, 'Because it is the command of the Lord; and enough is done if this is done.'

JOHN, THE GOSPEL OF. During the eighteenth century and the first ten years of the nineteenth, the Gospel of John was attacked, but with feeble arguments, by some English Deists, and by four German theologians. A similar attack has lately been made by Strauss, who, although in the third edition of *The Life of Jesus* he manifested an inclination to give up his doubts, yet resolutely returned to them in the fourth edition, principally, as he himself confesses, because 'without them one could not escape from believing the miracles of Christ.' It is unnecessary, however, to refute his arguments, as they are quite unimportant, and have met with little sympathy even in Germany. It may suffice to observe, that during the lapse of ages up to the conclusion of the eighteenth century, no one ever expressed a doubt respecting the genuineness of John's Gospel, except one small sect, whose scepticism, however, was not based upon historical, but merely upon dogmatical grounds.

John's Gospel differs very much in substance from the first three Gospels. But the most striking difference is that of the speeches; and even here the difference is, perhaps, still more apparent in the form than in the substance of them. The difference of the **CONTEXTS** may be accounted for by supposing that John intended to relate and complete the history of the Lord according to his own view of it. We are led to this supposition from the following circumstances: that, with the exception of the history of his passion and his resurrection, there are only two sections in which John coincides with the synoptic gospels (vi. 1-21; xii. 1); that he altogether omits such important facts as the baptism of Jesus by John, the history of his temptation and transfiguration, the institution of the Lord's supper, and the internal conflict at Gethsemane; and that chapters i. 32, iii. 24, xi. 2, indicate that he presupposed his readers to be already acquainted with the Gospel history. He confined himself to such communications as were wanting in the others, especially with regard to the speeches of Jesus.

The peculiarities of John's Gospel more especially consist in the four following doctrines:—

1. That of the mystical relation of the Son to the Father.
2. That of the mystical relation of the Redeemer to believers.
3. The announcement of the Holy Ghost as the Comforter.
4. The peculiar importance ascribed to Love.

Although there can be shown in the writings of the other Evangelists some isolated dicta of the Lord, which seem to bear the impress of John, it can also be shown that they contain thoughts not originating with that disciple, but with the Lord himself. Matthew (xi. 27) speaks of the relation of the Son to the Father so entirely in the style of John, that persons not sufficiently versed in Holy Writ are apt to search for this passage in the Gospel of John. The mystical union of the Son with believers is expressed in Matt. xxviii. 20. The promise of the effusion of the Holy Ghost, in order to perfect the disciples, is found in Luke xxiv. 49. The doctrine of Paul with respect to love, in 1 Cor. xiii., entirely resembles what, according to John, Christ taught on the same subject. Paul here deserves our

particular attention. In the writings of Paul are found Christian truths which have their points of coalescence only in John, viz., that Christ is the *image of the invisible God*, by whom all things are created (Col. i. 15, 16). Paul considers the Spirit of God in the church, the *spiritual Christ*, as Jesus himself does (John xiv. 16).

That the speeches of Christ have been faithfully reported may be seen by a comparison of the speeches of the Baptist in the Gospel of John. The Baptist's speeches bear an entirely Old Testament character: they are full of allusions to the Old Testament, and abound in sententious expressions (John iii. 27-30; i. 26-36).

We have already intimated our opinion as to the purport and plan of the Gospel of John. Most of the earlier critics considered the Gospel of John to have had a polemico-dogmatical purport. According to Irenæus, John wrote with the intention of combating the errors of Cerinthus the Gnostic. Others suppose that his writings were directed against the disciples of John the Baptist. It is not improbable that the Evangelist had in view, both in his Introduction and also in ch. xix. 34, 35, some heretical opinions of those times; but it cannot be maintained that this is the case throughout the whole of the Gospel. He himself states (xx. 31) that his work had a more general object.

One of the peculiarities of John is, that in speaking of the adversaries of Jesus, he always calls them the Jews. This observation has, in modern times, given rise to a peculiar opinion concerning the plan of John's Gospel, namely, that the Evangelist has, from the very beginning of the Gospel, the following theme before his eyes:—The eternal combat between Divine light and the corruption of mankind, exemplified by the mutual opposition subsisting between the hostile Jewish party and the manifestation of the Son of God, which combat terminates in the victory of light.

The Introduction of the Gospel of John expresses this theme in speaking of the opposition of the world to the incarnate Logos. This theme is here expressed in the same manner as the leading idea of a musical composition is expressed in the overture. As the leading idea of the whole Epistle to the Romans is contained in ch. i. 17, so the theme of the Gospel of John is contained in ch. i. 11-13. The Gospel is divided into two principal sections. The first extends to ch. xii. It comprehends the public functions of Jesus, and terminates with a brief summary (ver. 44-50). The second section contains the history of the Passion and of the Resurrection. The reader is prepared for this section by ch. xii. 23-32. The leading idea of this speech is, that Destruction is necessary, because without it there can be no Resurrection. With ch. xiii. begins the history of our Lord's Passion. In the third verse the Apostle directs attention to the fact that the suffering would finally lead to glory. In the first section is described how the opposition of the influential men among the Jews was gradually increased until the decisive fact of the resurrection of Lazarus led to a public outburst of their hatred. This description terminates with the official decree of Caiaphas (xi. 49, 50).

The Fathers supposed that the Gospel of John

was written at Ephesus, and there is some internal evidence in favour of the statement. One writer affirms that John wrote the Gospel which bears his name in Patmos, but that it was edited by the same Gaius whom Paul in the epistle to the Romans calls *mine host*. One might be inclined to explain by this circumstance the postscript contained in John xxi. 24, 25.

JOHN, THE EPISTLES OF. For the authenticity of the first epistle very ancient testimony may be adduced. Papias, the disciple of John, quotes some passages from it. Polycarp, also, another disciple of John, quotes a passage from this epistle. So, also, Irenæus.

The author of the first epistle describes himself, at its commencement, as an eye-witness of the life of our Lord. The style and language manifestly harmonize with those of the author of the Gospel of John. The polemics, also, which in ch. ii. 18-26, are directed against the Docetic Gnostics, in ch. iv. 1-3, agree with the sphere of action in Asia Minor in which the Evangelist John was placed. We may, therefore, suppose that the epistle was written to Christian congregations in Asia Minor, which were placed under the spiritual care of the apostle. It is generally admitted that ch. i. 2 refers to the Gospel. If this is correct, the apostle wrote this epistle at a very advanced age, after he had written his gospel. The epistle breathes love and devotion, but also zeal for moral strictness (iii. 6-8; v. 16). There is a remarkable absence of logical connection in the form of separate expressions, and in the transitions from one thought to another. Some writers have been inclined to find a reason for this in the advanced age of the writer. Old age may, perhaps, have contributed to this characteristic, but it is chiefly attributable to the mental peculiarity of the apostle. There has been no subject connected with Biblical literature which has attracted more attention than this epistle, in consequence of the controversies which have existed since the commencement of the sixteenth century, respecting the celebrated passage in 1 John v. 7, 8. We cannot enter here into the history of that controversy, which has continued with more or less of asperity to our own day. We shall merely remark that the disputed passage is found in no Greek manuscript, save only in two, both belonging to the fifteenth century; and that it has not once been quoted by any of the Greek, Latin, or Oriental fathers. It is now, therefore, generally omitted in all critical editions of the New Testament.

The second and third epistles of John were originally wanting in the ancient Syriac translation. From their nature, it may easily be explained how it happened that they were less generally known in ancient Christian congregations, and that the fathers do not quote them so often as other parts of Scripture, since they are very short, and treat of private affairs. The private nature of their contents removes also the suspicion that they could have been forged, since it would be difficult to discover any purpose which could have led to such a forgery.

The second epistle is addressed to a lady, called Kuria, whose name frequently occurs in ancient writers as that of a woman.

The third epistle is addressed to Gaius, a person otherwise unknown. It is remarkable

that the writer of this epistle calls himself 'the presbyter' or 'elder.' Some writers have been inclined to ascribe these letters to the presbyter John, who is sometimes spoken of in the ancient church, and to whom even the Apocalypse has been attributed; but if the presbyter John wrote these epistles, John's Gospel also must be ascribed to the same person, of whom otherwise so little is known. This, however, is inadmissible. We may suppose that the term 'presbyter' or 'elder' expressed in the epistles of John a degree of friendliness, and was chosen on account of the advanced age of the writer. The apostle Paul, also, in his friendly letter to Philemon, abstains from the title Apostle. The circumstances and events in the church, to which the second epistle alludes, coincide with those which are otherwise known to have happened in John's congregation. Here, also, are allusions to the dangers arising from the Gnostic heresy. The admonition, in verse 10, not to receive such heretics as Christian brethren, agrees with the ancient tradition, that John made haste to quit a public bath after Cerinthus the Gnostic entered it, declaring he was afraid the building would fall down.

JOHN MARK. [MARK.]

JOHN HYRCANUS. [MACCABEES.]

JOFADA (contraction of JEHOIADA, which see), a high-priest of the Jews, successor to Eliashib, or Joashib, who lived under Nehemiah, about B.C. 434 (Neh. xiii. 28).

JOK'SHAN (*father*), second son of Abraham and Keturah, whose sons Sheba and Dedan appear to have been the ancestors of the Sabæans and Dedanites, who peopled a part of Arabia Felix (Gen. xxv. 2, 3) [ARABIA].

JOK'TAN (*small*), one of the sons of Eber, a descendant from Shem (Gen. x. 25, 26), and the supposed progenitor of many tribes in Southern Arabia. The Arabians call him Kahtau, and recognise him as one of the principal founders of their nation.

JOK'THEEL (*God-subdued*). 1. A name given by King Azariah to the city Sela, or Petra, the capital of Arabia Petraea, when he took it from the Edomites (2 Kings xiv. 7) [PETRA]. 2. There was also a city of this name in the tribe of Judah (Josh. xv. 38).

JONADAB (*God-impelled*). 1. A nephew of David, a crafty person, whose counsel suggested to his cousin Ammon the means by which he accomplished his abominable design upon his half-sister Tamar (2 Sam. xiii. 4, 5).

2. A son or descendant of Rechab, the progenitor of those nomadic Rechabites, who held themselves bound by a vow to abstain from wine, and never to relinquish the nomadic life. The principle on which the tribe itself may be considered elsewhere [RECHABITES]. Jonadab was at the head of this tribe at the time when Jehu received his commission to exterminate the house of Ahab, and is supposed to have added to its ancient austerities the inhibition of wine. He was held in great respect among the Israelites generally; and Jehu, alive to the importance of obtaining the countenance and sanction of such a man to his proceedings, took him up in his chariot, when on his road to Samaria to complete the work he had begun at Jezreel. The terms of the colloquy which took place on this occasion are rather

remarkable. Perceiving Jonadab, he saluted him, and called out, 'Is thine heart right, as my heart is with thy heart?' Jonadab answered, 'It is.' Then said Jehu, 'If it be, give me thine hand.' And he gave him his hand, and was taken up into the chariot, Jehu inviting him to 'Come and see my zeal for the Lord' (2 Kings x. 15-17; Jer. xxxv. 6-10). It would seem that the Rechabites were a branch of the Kenites, over another branch of whom Heber was chief in the time of Deborah and Barak (Judg. iv. 11, 17); and as it is expressly said that Jonadab went out to meet Jehu, it seems probable that the people of Samaria, alarmed at the menacing letter which they had received from Jehu, had induced Jonadab to go to meet and appease him on the road. His venerated character, his rank as the head of a tribe, and his neutral position, well qualified him for this mission; and it was quite as much the interest of Jonadab to conciliate the new dynasty, in whose founder he beheld the minister of the divine decrees, as it was that of Jehu to obtain his concurrence and support in proceedings which he could not but know were likely to render him odious to the people.

JONAH (*a dove*), the fifth in order of the minor prophets. No era is assigned to him in the book of his prophecy, yet there is little doubt of his being the same person who is spoken of in 2 Kings xiv. 25. His birthplace was Gath-hepher, in the tribe of Zebulun. Jonah flourished in or before the reign of Jeroboam II., and predicted the successful conquests, enlarged territory, and brief prosperity of the Israelitish kingdom under that monarch's sway.

The book of Jonah contains an account of the prophet's commission to denounce Nineveh, and of his refusal to undertake the embassy—of the method he employed to escape the unwelcome task [*TARSHISH*], and the miraculous means which God used to curb his self-willed spirit, and subdue his petulant and querulous disposition. The third and fourth chapters briefly detail Jonah's fulfilment of the divine command, and present us with another exemplification of his refractory temper. His attempt to flee from the presence of the Lord must have sprung from a partial insanity, produced by the excitement of distracting motives in an irascible and melancholy heart. The temerity and folly of the fugitive could scarcely be credited, if they had not been equalled by future outbreaks of a similar peevish and morbid insatiation. The mind of Jonah was dark and moody, not unlike a lake which mirrors in the waters the gloomy thunder-clouds which overshadow it, and flash over its sullen waves a momentary gleam.

The history of Jonah is certainly striking and extraordinary. Its characteristic prodigy does not resemble the other miraculous phenomena recorded in Scripture; yet we must believe in its literal occurrence, as the Bible affords no indication of its being a mythus, allegory, or parable. On the other hand, our Saviour's pointed and peculiar allusion to it is a presumption of its reality (Matt. xii. 40). The opinion of the earlier Jews is also in favour of the literality of the adventure. It requires less faith to credit this simple excerpt from Jonah's biography, than to believe the numerous hypotheses that have been invented to deprive it of its supernatural character, the

great majority of them being clumsy and far-fetched, doing violence to the language, and despite to the spirit of revelation. In vindication of the reality of this striking narrative, it may be argued that the allusions of Christ to Old Testament events on similar occasions are to actual occurrences (John iii. 14; vi. 48); that the purpose which God had in view justified his miraculous interposition; that this miracle must have had a salutary effect both on the minds of the Ninevites and on the people of Israel. Neither is the character of Jonah improbable. Many reasons might induce him to avoid the discharge of his prophetic duty—fear of being thought a false prophet, scorn of a foreign and hostile race, desire for their utter destruction, a false dignity which might reckon it beneath his prerogative to officiate among uncircumcised idolaters. Some, who cannot altogether reject the reality of the narrative, suppose it to have had an historical basis, though its present form be fanciful or mythical. Grimm regards it as a dream produced in that sleep which fell upon Jonah as he lay on the sides of the ship, and others regard this book as an allegory.

Various other hypotheses have been proposed which are all vague and baseless, and do not merit a special refutation. Endeavouring to free us from one difficulty they plunge us into others yet more intricate and perplexing. Much profane wit has been expended on the miraculous means of Jonah's deliverance, very unnecessarily and very absurdly; it is simply said, 'The Lord had prepared a great fish to swallow up Jonah.' Now the species of marine animal is not defined, and the original word is often used to specify, not the genus whale, but any large fish or sea-monster. All objections to its being a whale which lodged Jonah in its stomach from its straitness of throat, or rareness of haunt in the Mediterranean, are thus removed. The Scripture speaks only of an enormous fish, which under God's direction swallowed the prophet, and does not point out the species to which the voracious prowler belonged. Since the days of Bochart it has been a common opinion that the fish was of the shark species or 'sea-dog.' Entire human bodies have been found in some fishes of this kind. The stomach, too, has no influence on any living substance admitted into it. Granting all these facts as proof of what is termed the economy of miracles, still must we say, in reference to the supernatural preservation of Jonah, is anything too hard for the Lord?

On what portion of the coast Jonah was set down in safety we are not informed. The prophet proceeded, on receiving a second commission, to fulfil it. The fearful menace had the desired effect. The city humbled itself before God, and a respite was vouchsafed. The king (Pul, according to Usher) and his people fasted, and their penitence was accepted. The spirit of Jonah was chafed that the doom he had uttered was not executed. He retired to a station out of the city whence he might witness the threatened catastrophe. Under the shadow of a gourd prepared by God he reclined, while Jehovah taught him by the growth and speedy death of this plant, and his attachment to it, a sublime lesson of patient and forgiving generosity. The book of Jonah is a simple narrative, with the exception

of the prayer or thanksgiving in chap. ii. Its style and mode of narration are uniform. There are no traces of compilation, as Nactigall supposed; neither is the prayer, as De Wette imagines, improperly borrowed from some other sources. That prayer contains, indeed, not only imagery peculiar to itself, but also such imagery as at once was suggested to the mind of a pious Hebrew preserved in circumstances of extreme jeopardy. On this principle we account for the similarity of some portions of its phraseology to Ps. lix., xlii., &c. The language in both places had been hallowed by frequent usage, and had become the consecrated idiom of a distressed and succoured Israelite. The hymn seems to have been composed after his deliverance, and the reason why his deliverance is noted after the hymn is recorded may be to show the occasion of its composition.

1. JONATHAN (*God-given*), a Levite descended from Gershom, the son of Moses, not Manasseh, as in our common copies, an interpolation made (Judg. xviii. 30) in order to save the character of the great lawgiver from the stain of having an idolater among his immediate descendants. The history of this Jonathan is involved in the narrative which occupies Judges xvii., xviii.; and the events themselves appear to have occurred soon after the death of Joshua, and of the elders who outlived him, when the government was in a most unsettled state.

Jonathan, who was resident at Bethlehem, lived at a time when the dues of the sanctuary did not afford a livelihood to the numerous Levites who had a claim upon them; and belonged to a tribe destitute of the lauded possessions which gave to all others a sufficient maintenance. He, therefore, went forth to seek his fortune. In Mount Ephraim he came to 'a house of gods,' which had been established by one Micah, who wanted nothing but a priest to make his establishment complete [MICAH]. This person made Jonathan what was manifestly considered the handsome offer of engaging him as his priest for his victuals, a yearly snit of clothes, and ten shekels (twenty-five shillings) a year in money. Here he lived for some time, till the Danite spies, who were sent by their tribe to explore the north, passed this way and formed his acquaintance. When, not long after, the body of armed Danites passed the same way when going to settle near the sources of the Jordan, the spies mentioned Micah's establishment to them; on which they went and took away not only 'the ephod, the teraphim, and the graven image,' but the priest also, that they might set up the same worship in the place of which they were going to take possession. Micah vainly protested against this robbery; but Jonathan himself was glad at the improvement in his prospects, and from that time, even down to the captivity, he and his descendants continued to be priests of the Danites in the town of Laish, the name of which they changed to Dan.

There is not any reason to suppose that this establishment, whether in the hands of Micah or of the Danites, involved an apostasy from Jehovah. It appears rather to have been an attempt to localize or domesticate His presence, under those symbols and forms of service which were common among the neighbouring nations, but

were forbidden to the Hebrews. The offence here was twofold,—the establishment of a sacred ritual different from the only one which the law recognised, and the worship by symbols, naturally leading to idolatry, with the ministrations of one who could not legally be a priest, but only a Levite, and under circumstances in which no Aaronic priest could legally have officiated. It is more than likely that this establishment was eventually merged in that of the golden calf, which Jeroboam set up in this place, his choice of which may very possibly have been determined by its being already in possession of 'a house of gods.'

2. JONATHAN, eldest son of Saul, king of Israel, and consequently heir apparent of the throne which David was destined to occupy (1 Sam. xiv. 9; 1 Chron. viii. 33; ix. 39). The war with the Philistines, which occupied the early part of his father's reign, afforded Jonathan more than one opportunity of displaying the chivalrous valour and the princely qualities with which he was endowed. His exploit in surprising the Philistine garrison at Michmash, attended only by his armour-bearer, is one of the most daring which history or even romance records (1 Sam. xiv. 1-14). His father came to follow up this victory, and in the ensuing pursuit of the confounded Philistines, Jonathan, spent with fatigue and hunger, refreshed himself with some wild honey which he found in a wood through which he passed. He knew not that his father had rashly vowed to put to death any one who touched a morsel of food before night. When the fact transpired, Saul felt himself bound to execute his vow even upon his gallant son; but the people, with whom the young prince was a great favourite, interposed and prevented the execution of his design (1 Sam. xiv. 16-52).

Jealousy and every mean or low feeling were strangers to the generous heart of Jonathan. Valiant and accomplished himself, none knew better how to acknowledge valour and accomplishment in others. The act of David in meeting the challenge of Goliath, and in overcoming that huge barbarian, entirely won his heart; and from that day forward the son of Jesse found no one who loved him so tenderly, who admired his high gifts with so much enthusiasm, or who risked so much to preserve him from harm, as the very prince whom he was destined to exclude from a throne. Jonathan knew well what was to happen, and he submitted cheerfully to the appointment which gave the throne of his father to the young shepherd of Bethlehem. In the intensity of his love and confidence he shrank not to think of David as his destined king and master; and his dreams of the future pictured nothing brighter than the day in which David should reign over Israel, and he be one with him in friendship, and next to him in place and council.

When Saul began to hate David as his intended successor, he was highly displeased at the friendship which had arisen between him and his son. This exposed Jonathan to much contumely, and even to danger of life; for, once at least, the king's passion against him on this account rose so high that he cast a javelin at him 'to smite him to the wall.'

This unequivocal act taught Jonathan that the court of Saul was no safe place for David. He

223. [Joppa.]

told him so, and they parted with many tears. David then set forth upon those wanderings among strangers and in solitary places, which lasted all the time of Saul. The friends met only once more. Saul was in pursuit of David when he was in the wilderness of Ziph; and Jonathan could not forbear coming to him secretly in the wood to give him comfort and encouragement (1 Sam. xxiii. 16-18). Nothing more is related of Jonathan till both he and his father lost their lives in the fatal battle of Gilboa, combating against the enemies of their country.

JOPPA, a sea-port town and haven on the coast of Palestine, situated on an eminence, in a sandy soil, about forty miles N.W. of Jerusalem, and nine miles W.N.W. from Ramleh. It was a very ancient town. To say nothing respecting the fabulous accounts of its great antiquity, it existed when the Israelites invaded the land of Canaan, and is mentioned as lying on the border of the tribe of Dan (Josh. xix. 46). Joppa was the only port possessed by the Israelites till Herod formed the harbour at Casarea; and hence it was here that the timber from Lebanon destined for both the first and second temples was landed (1 Kings v. 9; 2 Chron. ii. 16; Ezra iii. 7). It was the place to which Jonah went, in expectation of finding a ship bound on some distant voyage, and where he found one going to Tarshish (Jonah i. 3). Joppa belonged to the powers which were successively dominant on this shore; and it does not again appear in Jewish history till the time of Judas Maccabeus, when the inhabitants having, contrary to the faith of treaties, thrown 200 Jews into the sea, the hero, to avenge them, surprised the haven by night, and set the shipping on fire (2 Macc. xii. 3-7). It is mentioned in the New Testament only in connection with the visit of

the Apostle Peter, who here raised Tabitha from the dead, and lodged in the outskirts of the town with Simon, the tanner, when favoured with the vision which taught him to 'call no man common or unclean' (Acts ix. 36-39; x. 5, 18; xi. 5). From the first crusade down to our own day, Joppa has been the landing-place of pilgrims going to Jerusalem. There is still here an hospital for pilgrims, dependent on the convent of St. Salvador in Jerusalem, and occupied by Spanish monks. In 1797 the place was taken by storm by the French army under Napoleon, and was sacked without mercy; when the Turkish prisoners, to the number of 500 or 600, were carried to the neighbouring sand-hills and put to death by his order.

Joppa is naturally very unfit for a haven. The port is so dangerous, from exposure to the open sea, that the surf often rolls in with the utmost violence, and even so lately as 1842 a lieutenant and some sailors were lost in pulling to the shore from an English steamer that lay in the harbour. But however bad, it was the only port which existed within reach of the important district which lay behind it inland; and the miserable state of the ancient roads, or rather perhaps the absence of any roads, made a near harbour, however inconvenient, of more immediate consequence than a good one at a greater distance.

The town is approached on the land side through rich and extensive gardens and orchards, and is very picturesquely situated upon an eminence or promontory, which is crowned by a castle. It chiefly faces the north; and the buildings appear, from the steepness of the site, as if standing upon one another. The aspect of the whole is mean and gloomy, and inside the place has all the appearance of a poor though large

village. There are no public buildings to engage the eye, and the houses are mean and comfortable. No ancient ruins have been observed, nor are any to be expected in a place so often destroyed in war. There are three mosques in Joppa, and Latin, Greek, and Armenian convents. The former is that in which European pilgrims and travellers usually lodge. The town still enjoys a considerable trade with the neighbouring coasts. Its chief manufacture is soap, which is largely consumed in the baths of Cairo and Damascus; and its excellent fruits are exported in large quantities, especially water-melons, which are very extensively cultivated here and in other parts of the plain of Sharon. The inhabitants are said not to exceed 4000, of whom one-fourth are reckoned to be Christians. A British consul is now resident in the place.

JORAM (*God-exalted*, a contraction of **JERORAM**), ninth king of Israel, son of Ahab, and successor to his elder brother Ahaziah, who died childless. He began to reign *n.c.* 896, and reigned twelve years (2 Kings i. 17; iii. 1). Joram adhered to the sinful policy of Jeroboam in the matter of the golden calves; but, although his mother Jezebel was still alive, he discontinued the dark idolatries of Baal which she had introduced and maintained at such high cost of guilt and blood to the nation.

The Moabites had been tributary to the crown of Israel since the separation of the two kingdoms. But king Mesha deemed the defeat and death of Ahab so heavy a blow to the power of Israel that he might safely assert his independence. He accordingly did so, by withholding his tribute of '100,000 lambs, and 100,000 rams, with the wool.' The short reign of Ahaziah had afforded no opportunity for any operations against the revolt; but the new king hastened to reduce them again under the yoke they had cast off. The good king of Judah, Jehoshaphat, was too easily induced to take a part in the war. He perhaps feared that the example of Moab, if allowed to be successful, might seduce into a similar course his own tributary, the king of Edom, whom he now summoned to join in this expedition. The deliverance of the allies from perishing for lack of water, and the signal overthrow of the Moabites at the word of Elisha, have been already described under **ELISHA** and **JEHO-SHAPHAT**.

After this a more redoubtable enemy, Benhadad, king of Syria, occupied for a long time the attention and strength of the king. In the sacred records the more striking events of this war seem to be recorded for the sake of showing forth the great acts of **ELISHA**, and they have therefore been related under his name. It suffices here to indicate that they consisted in the Syrian king being constrained to terminate one campaign in consequence of all his plans being made known by the prophet to the king of Israel (2 Kings vi. 1-23); and in the deliverance of Samaria, according to the prediction of the prophet, from a horrible famine, caused by the city being besieged by the Syrians (2 Kings vi. 24-33; vii.). An interval of the war also afforded occasion for the remarkable cure of Naaman, the Syrian leper, by the same prophet (2 Kings v.) [**NAAMAN**].

After the death of Benhadad, Joram found a new and active enemy in his murderer and suc-

cessor, Hazael. During the illness of Benhadad, the king of Israel seems to have employed himself in strengthening his eastern frontier against the Syrians, and in fortifying Ramoth-Gilead, which had fallen into his hands, and which his father had perished in the attempt to recover from the Syrians. This strong fortress thenceforth became the head-quarters of the operations beyond the river. Hazael was scarcely settled on the throne before he took arms, and marched against Ramoth, in the environs of which the Israelites sustained a defeat, and the king was wounded. He returned to Jezreel to be healed of his wounds, leaving the army in the charge of Jehu, one of his ablest and most active generals. It was in this interval that Jehu was anointed king of Israel by the messenger of Elisha, and immediately proceeded to Jezreel to fulfil his commission to exterminate the house of Ahab. The king, who went forth from the city to meet him when the watchman on the tower of Jezreel announced his approach, was slain under the circumstances described in the article **JEHU**; and Ahaziah, the king of Judah, who was at Jezreel on a visit to his sick cousin, shared his fate (*n.c.* 884). With Joram ended the dynasty of Ahab, which reigned forty-four years in Israel (2 Kings viii. 25-29; ix. 1-20).

JORDAN, the principal river of Palestine. [**PALESTINE**.]

JOSEPH (*God-increased*), son of Jacob and Rachel, born under peculiar circumstances, as may be seen in Gen. xxx. 22; on which account, and because he was the son of his old age (xxxvii. 3), he was beloved by his father more than were the rest of his children, though Benjamin, as being also a son of Jacob's favourite wife, Rachel, was in a peculiar manner dear to the patriarch. The partiality evinced towards Joseph by his father excited jealousy on the part of his brethren, the rather that they were born of different mothers (xxxvii. 2). Joseph had reached his seventeenth year, when some conduct on the part of his brothers seems to have been such as in the opinion of Joseph to require the special attention of Jacob, to whom, accordingly, he communicated the facts. This greatly increased their dislike to him, and they henceforth 'hated him, and could not speak peaceably unto him' (xxxvii. 4). Their aversion, however, was carried to the highest pitch when Joseph acquainted them with two dreams, which appeared to indicate that Joseph would acquire pre-eminence in the family, if not sovereignty; and while even his father rebuked him, his brothers were filled with envy. Jacob, however, was not aware of the depth of their ill will; so that on one occasion, having a desire to hear intelligence of his sons, who were pasturing their flocks at a distance, he did not hesitate to make Joseph his messenger for that purpose. His appearing in view of his brothers was the signal for their malice to gain head. They began to devise means for his immediate destruction, which they would unhesitatingly have effected, but for his half-brother, Reuben, who, as the eldest son, might well be the party to interfere on behalf of Joseph. A compromise was entered into, in virtue of which the youth was stripped of the distinguishing vestments which he owed to his father's affection, and cast into a pit. Having performed this evil deed, and

while they were taking refreshment, the brothers beheld a caravan of Arabian merchants, who were bearing the spices and aromatic gums of India down to the well-known and much-frequented mart, Egypt. On the proposal of Judah they resolved that, instead of allowing Joseph to perish, they should sell him to the merchants. This was accordingly done. Joseph was sold for a slave, to be conveyed by his masters into Egypt. While on his way thither, Reuben returned to the pit, intending to rescue his brother, and convey him safely back to their father. Joseph was gone. On which Reuben went to the wicked young men, who, not content with selling a brother into slavery, determined to punish their father for his partiality towards the unoffending sufferer. With this view they dipped Joseph's party-coloured garment in the blood of a kid and sent it to Jacob, in order to make him believe that his favourite child had been torn to pieces by some wild beast. The trick succeeded, and Jacob was grieved beyond measure.

Meanwhile the merchants sold Joseph to Potiphar, an officer of Pharaoh's, and captain of the royal guard, who was a native of the country. In Potiphar's house Joseph enjoyed the highest confidence and the largest prosperity. A higher power watched over him; and whatever he undertook succeeded, till at length his master gave everything into his hands. But a second time he innocently brought on himself the vengeance of the ill-disposed. Charged by his master's wife with the very crime to which he had in vain been tempted, he was at once cast by his master into the state prison.

The narrative, which is obviously constructed in order to show the workings of divine Providence, states, however, that Joseph was not left without special aid, in consequence of which he gained favour with the keeper of the prison to such an extent that every thing was put under his direction. Two of the regal officers, 'the chief of the butlers' and 'the chief of the bakers,' having offended their royal master, were consigned to the same prison with Joseph. While there, each one had a dream, which Joseph interpreted correctly. The butler, whose fate was auspicious, promised the young Hebrew to employ his influence to procure his deliverance; but when again in the enjoyment of his 'butlership,' he forgot Joseph (xl.). Pharaoh himself, however, had two dreams, which found in Joseph a successful expounder; for the butler then remembered the skill of his prison-companion, and advised his royal master to put it to the test in his own case. Pharaoh's dream, as interpreted by Joseph, forbade the approach of a seven years' famine; to abate the evils of which Joseph recommended that some 'discreet and wise' man should be chosen and set in full power over the land of Egypt. The monarch was alarmed, and called a council of his advisers. The wisdom of Joseph was recognised as of divine origin and supereminent value; and the king and his ministers (whence it appears that the Egyptian monarchy—at Memphis—was not despotic, but constitutional) resolved that Joseph should be made (to borrow a term from Rome) Dictator in the approaching time of need. The highest honours were conferred upon him. He was made ruler over all the land of Egypt, and the

daughter of Poti-pherah, priest of On, given him to wife.

Seven years of abundance afforded Joseph opportunity to carry into effect such plans as secured an ample provision against the seven years of need. The famine came, but it found a prepared people. The visitation did not depend on any mere local causes, for 'the famine was over all the face of the earth,' 'and all countries came into Egypt to Joseph to buy corn' (ver. 56, 57). Among these customers appeared ten brethren, sons of the Hebrew Jacob. They had of necessity to appear before Joseph, whose licence for the purchase of corn was indispensable. Joseph had probably expected to see them, and he seems to have formed a deliberate plan of action. His conduct has brought on him the always ready charges of those who would rather impeach than study the Bible, and even friends of that sacred book have hardly in this case done Joseph full justice. Joseph's main object appears to have been to make his brothers feel and recognise their guilt in their conduct towards him. For this purpose suffering, then as well as now, was indispensable. Accordingly Joseph feigned not to know his brothers, charged them with being spies, threatened them with imprisonment, and allowed them to return home to fetch their younger brother, as a proof of their veracity, only on condition that one of them should remain behind in chains, with a prospect of death before him should not their words be verified. Then it was, and not before, that 'they said one to another, We are verily guilty concerning our brother, in that we saw the anguish of his soul and would not hear; therefore is this distress come upon us' (xliii. 21). On which, after weeping bitterly, he by common agreement bound his brother Simeon, and left him in custody. At length Jacob consented to Benjamin's going in company with his brothers, and provided with a present consisting of balm, honey, spices and myrrh, nuts and almonds, and with double money in their hands (double, in order that they might repay the sum which Joseph had caused to be put into each man's sack at their departure, if, as Jacob supposed, 'it was an oversight'), they went again down to Egypt and stood before Joseph (xliii. 15); and there, too, stood Benjamin, Joseph's beloved brother. The required pledge of truthfulness was given. If it is asked why such a pledge was demanded, since the giving of it caused pain to Jacob, the answer may be thus: Joseph knew not how to demean himself towards his family until he ascertained its actual condition. That knowledge he could hardly be certain he had gained from the mere words of men who had spared his life only to sell him into slavery. How had these wicked men behaved towards his venerable father? His beloved brother Benjamin, was he safe? or had he suffered from their jealousy and malice the worse fate with which he himself had been threatened? Nothing but the sight of Benjamin could answer these questions, and resolve these doubts.

Benjamin had come, and immediately a natural change took place in Joseph's conduct: the brother began to claim his rights in Joseph's bosom. Jacob was safe, and Benjamin was safe. Joseph's heart melted at the sight of Benjamin: 'And he said to the ruler of his house, Bring these men

home, and slay and make ready, for these men shall dine with me at noon' (xliii. 16). But guilt is always the ready parent of fear. Accordingly the brothers expected nothing but being reduced to slavery. When taken to their own brother's house, they imagined they were being entrapped. A colloquy ensued between them and Joseph's steward, whence it appeared that the money put into their sacks, to which they now attributed their peril, was in truth a present from Joseph, designed, after his own brotherly manner, to aid his family in their actual necessities. Noon came, and with it Joseph, whose first question regarded home: 'He asked them of their welfare, and said, Is your father well, the old man of whom ye spake? is he yet alive? And he lifted up his eyes and saw his brother Benjamin, his mother's son, and said, Is this your younger brother? And he said, God be gracious unto thee, my son!' And Joseph made haste, for his bowels did yearn upon his brother, and he sought where to weep, and he entered into his chamber and wept there.' Does this look like harshness?

The connection brings into view an Egyptian custom, which is of more than ordinary importance, in consequence of its being adopted in the Jewish polity: 'And they set on (food) for him by himself (Joseph), and for them by themselves (the brethren), and for the Egyptians which did eat with them, by themselves, because the Egyptians might not eat bread with the Hebrews; for that is an abomination with the Egyptians' (ver. 32). This passage is also interesting, as proving that Joseph had not, in his princely grandeur, become ashamed of his origin, nor consented to receive adoption into a strange nation: he was still a Hebrew, waiting, like Moses after him, for the proper season to use his power for the good of his own people.

Joseph, apparently with a view to ascertain how far his brethren were faithful to their father, hit upon a plan which would in its issue serve to show whether they would make any, and what, sacrifice, in order to fulfil their solemn promise of restoring Benjamin in safety to Jacob. Accordingly he ordered not only that every man's money (as before) should be put in his sack's mouth, but also that his 'silver cup in which my lord drinketh, and whereby he divineth,' should be put in the sack's mouth of the youngest. The brethren departed, but were soon overtaken by Joseph's steward, who charged them with having surreptitiously carried off this costly and highly-valued vessel. They on their part vehemently repelled the accusation, adding, 'with whomsoever of thy servants it be found, both let him die, and we also will be my lord's bondmen.' A search was made, and the cup was found in Benjamin's sack. Accordingly they returned to the city. And now came the hour of trial: Would they purchase their own liberation by surrendering Benjamin? After a most touching interview, in which they proved themselves worthy and faithful, Joseph declared himself unable any longer to withstand the appeal of natural affection. On this occasion Judah, who was the spokesman, showed the deepest regard to his aged father's feelings, and entreated for the liberation of Benjamin even at the price of his own liberty. In the whole of literature we know of

nothing more simple, natural, true, and impressive.

* Most natural and impressive is the scene also which ensues, in which Joseph, after informing his brethren who he was, and inquiring, first of all, 'Is my father alive?' expresses feelings free from the slightest taint of revenge, and even shows how, under Divine Providence, the conduct of his brothers had issued in good—'God sent me before you to preserve a posterity in the earth, and to save your lives by a great deliverance.' Five years had yet to ensue in which 'there would be neither earing nor harvest,' and therefore the brethren were directed to return home and bring Jacob down to Egypt with all speed. 'And he fell upon his brother Benjamin's neck and wept; and Benjamin wept upon his neck. Moreover, he kissed all his brethren, and wept upon them: and after that his brethren talked with him' (xlv. 14, 15).

The news of these striking events was carried to Pharaoh, who being pleased at Joseph's conduct, gave directions that Jacob and his family should come forthwith into Egypt. The brethren departed, being well provided for.—And to his father Joseph sent ten asses laden with the good things of Egypt, and ten she asses laden with corn and bread and meat for his father by the way.

The intelligence which they bore to their father was of such a nature that 'Jacob's heart fainted, for he believed them not.' When, however, he had recovered from the thus naturally told effects of his surprise, the venerable patriarch said, 'Enough; Joseph my son is yet alive: I will go and see him before I die' (xlv. 26, 28).

Accordingly Jacob and his family, to the number of threescore and ten souls, went down to Egypt, and by the express efforts of Joseph, were allowed to settle in the district of Goshen, where Joseph met his father: 'And he fell on his neck, and wept on his neck a good while.' There Joseph 'nourished his father and his brethren, and all his father's household, with bread, according to their families' (xlvii. 12).

Meanwhile the predicted famine was pauperizing Egypt. The inhabitants found their money exhausted, and their cattle and substance all gone, being parted with in order to purchase food from the public granaries, until at length they had nothing to give in return for sustenance but themselves. 'Buy us'—they then imploringly said to Joseph—'and our land for bread, and we and our land will be slaves unto Pharaoh.' And Joseph bought all the land of Egypt for Pharaoh, so the land became Pharaoh's. The people too, 'Joseph removed to cities from one end of the borders of the land to the other end.' Religion, however, was too strong to submit to these political and social changes, and so the priests still retained their land, being supplied with provisions out of the common store gratuitously. The land, which was previously the people's own, was now let to them on a tenancy, at the rent of one-fifth of the produce: the land of the priests being exempted.

Joseph had now to pass through the mournful scenes which attend on the death and burial of a father. Having had Jacob embalmed, and seen the rites of mourning fully observed, the faithful

and affectionate son proceeded into the land of Canaan, in order, agreeably to a promise which the patriarch had exacted, to lay the old man's bones with those of his fathers, in 'the field of Ephron the Hittite.' Having performed with long and bitter mourning Jacob's funeral rites, Joseph returned into Egypt. The last recorded act of his life forms a most becoming close. After the death of their father, his brethren, unable, like all guilty people, to forget their criminality, and characteristically finding it difficult to think that Joseph had really forgiven them, grew afraid, now they were in his power, that he would take an opportunity of inflicting some punishment on them. They accordingly go into his presence, and, in imploring terms and an abject manner, entreat his forgiveness. 'Fear not'—this is his noble reply—'I will nourish you and your little ones.'

Joseph lived an hundred and ten years, kind and gentle in his affections to the last; for we are told, 'The children of Machir, the son of Manasseh, were brought up upon Joseph's knees' (1. 23). And so having obtained a promise from his brethren, that when the time came, as he assured them it would come, that God should visit them, and 'bring them unto the land which he sware to Abraham, to Isaac, and to Jacob,' they would carry up his bones out of Egypt, Joseph at length 'died, and they embalmed him, and he was put in a coffin' (1. 26). This promise was religiously fulfilled. His descendants, after carrying the corpse about with them in their wanderings, at length put it in its final resting-place in Shechem, in a parcel of ground that Jacob bought of the sons of Hamor, which became the inheritance of the children of Joseph (Josh. xxiv. 32).

By his Egyptian wife, Asenath, daughter of the high priest of Heliopolis, Joseph had two sons, Manasseh and Ephraim (Gen. xli. 50, sq.), whom Jacob adopted (Gen. xlviii. 5), and who accordingly took their place among the heads of the twelve tribes of Israel.

JOSEPH, 'the husband of Mary, of whom was born Jesus, who is called Christ' (Matt. i. 16). By Matthew he is said to have been the son of Jacob, whose lineage is traced by the same writer through David up to Abraham. Luke represents him as being the son of Heli, and traces his origin up to Adam. How these accounts are to be reconciled, is shown under GENEALOGY.

The statements of Holy Writ in regard to Joseph are few and simple. According to a custom among the Jews, traces of which are still found, Joseph had pledged his faith to Mary; but before the marriage was consummated she proved to be with child. Grieved at this, Joseph was disposed to break off the connection; but, not wishing to make a public example of one whom he loved, he contemplated a private disruption of their bond. From this step, however, he is deterred by a heavenly messenger, who assures him that Mary has conceived under a divine influence. 'And she shall bring forth a son, and thou shalt call his name Jesus; for he shall save his people from their sins' (Matt. i. 18, sq.; Luke i. 27). To this account various objections have been taken; but most of them are drawn from the ground of a narrow, short-sighted, and half-informed rationalism, which

judges everything by its own small standard, and either denies miracles altogether, or admits only such miracles as find favour in its sight.

Joseph was by trade a carpenter, in which business he probably educated Jesus (Matt. xiii. 55; Mark vi. 3). The word rendered 'carpenter' is of a general character, and may be fitly rendered by the English word 'artificer' or 'artisan.' Schleusner asserts that the universal testimony of the ancient church represents our Lord as being a carpenter's son. Hilarius, on Matthew, asserts, in terms which cannot be mistaken, that Jesus was a smith. Of the same opinion was the venerable Bede; while others have held that our Lord was a mason, and Cardinal Cajetan, that he was a goldsmith. The last notion probably had its origin in those false associations of more modern times which disparage hand-labour. Among the ancient Jews all handicrafts were held in so much honour, that they were learned and pursued by the first men of the nation.

Christian tradition makes Joseph an old man when first espoused to Mary, being no less than eighty years of age, and father of four sons and two daughters. The painters of Christian antiquity conspire with the writers in representing Joseph as an old man at the period of the birth of our Lord—an evidence which is not to be lightly rejected, though the precise age mentioned may be but an approximation to fact.

It is not easy to determine when Joseph died, but it has been alleged, with great probability, that he must have been dead before the crucifixion of Jesus. There being no notice of Joseph in the public life of Christ, nor any reference to him in the discourses and history, while 'Mary' and 'His brethren' not unfrequently appear, these circumstances afford evidence not only of Joseph's death, but of the inferior part which, as legal father only of our Lord, Joseph might have been expected to sustain. So far as our scanty materials enable us to form an opinion, Joseph appears to have been a good, kind, simple-minded man, who, while he afforded aid in protecting and sustaining the family, would leave Mary unrestrained to use all the impressive and formative influence of her gentle, affectionate, pious, and thoughtful soul.

JOSEPH OF ARIMATHEA. The name Arimathea denotes probably the place where Joseph was born, not that where he resided. [ARIMATHEA.]

Joseph was a secret disciple of Jesus—'an honourable counsellor, who waited for the kingdom of God' (Mark xv. 43), and who, on learning the death of our Lord, 'came and went in boldly unto Pilate, and craved the body of Jesus.' Pilate having learned from the centurion, who commanded at the execution, that Jesus 'was actually dead,' gave the body to Joseph, who took it down and wrapped his deceased Lord in fine linen which he had purchased for the purpose; after which he laid the corpse in a sepulchre which was hewn out of a rock, and rolled a stone unto the door of the sepulchre (Mark xv. 43, sq.). From the parallel passages in Matthew (xxvii. 58, sq.), Luke (xxiii. 50, sq.) and John (xix. 38, sq.), it appears that the body was previously embalmed at the cost of another secret disciple, Nicodemus, and that the sepulchre was

new, 'wherein never man before was laid,' also that it lay in a garden, and was the property of Joseph himself. This garden was 'in the place where Jesus was crucified.' Luke describes the character of Joseph as 'a good man and a just,' adding, that 'he had not consented to the counsel and deed of them,' i. e. of the Jewish authorities. From this remark it is clear that Joseph was a member of the Sanhedrim: a conclusion which is corroborated by the epithet 'counsellor,' applied to him by both Luke and Mark. Tradition represents Joseph as having been one of the Seventy, and as having first preached the Gospel in our own country.

JOSEPH CALLED BARSABAS was one of the two persons whom the primitive church, immediately after the resurrection of Christ, nominated, praying that the Holy Spirit would show which of them should enter the apostolic band in place of the wretched Judas. On the lots being cast, it proved that not Joseph, but Matthias, was chosen.

Joseph bore the honourable surname of Justus, which was not improbably given him on account of his well-known probity. He was one of those who had 'compared with the Apostles all the time that the Lord Jesus went in and out amongst them, beginning from the baptism of John,' until the ascension (Acts i. 15, sq.). Tradition also accounted him one of the Seventy.

1. JÓSES, son of Mary and Cleopas, and brother of James the Less, of Simon and of Jude, and, consequently, one of those who are called the 'brethren' of our Lord (Matt. xiii. 55; xxvii. 56; Mark vi. 3; xv. 40, 47). [JAMES; JUDE.] He was the only one of these brethren who was not an apostle—a circumstance which has given occasion to some unsatisfactory conjecture. It is perhaps more remarkable that three of them were apostles than that the fourth was not.

2. JOSÉS (BARNABAS).

JOSHUA. This is the name of four persons in the Old Testament, and means *whose salvation is Jehovah*. The most distinguished of the four persons so called, who occur in the Old Testament, is Joshua the son of Nun, of the tribe of Ephraim, the assistant and successor of Moses. His name was originally Oshena, *salvation* (Num. xiii. 8); and it seems that the subsequent alteration of it by Moses (Num. xiii. 16) was significant, and proceeded on the same principle as that of Abram into Abraham (Gen. xvii. 5), and of Sarai into Sarah (Gen. xvii. 15).

In the Bible Joshua is first mentioned as being the victorious commander of the Israelites in their battle against the Amalekites at Rephidim (Exod. xvii. 8-16). He distinguished himself by his courage and intelligence during and after the exploration of the land of Canaan, on which occasion he represented his tribe, which was that of Ephraim (Nun. xiii. xiv.). Moses, with the divine sanction, appointed him to command the Israelites, even during his own lifetime (Num. xxvii. 18-23; Deut. iii. 28; xxxi. 23). After the death of Moses he led the Israelites over the Jordan, fortified a camp at Gilgal (Josh. ix. 6; x. 6-43), conquered the southern and middle portions of Canaan (vi.-x.), and also some of the northern districts (ix.). But the hostile nations, although subdued, were not entirely driven out and destroyed (xiii.; xxiii. 13; Judg. i. 27-35).

In the seventh year after entering the land, it was distributed among the various tribes, which then commenced individually to complete the conquest by separate warfare (xv. 13, sq.; xvi. 10; xvii. 12, sq.). Joshua died 110 years old (n.c. 1427), and was buried at Timnath-serah (Josh. xxiv.), on Mount Ephraim.

There occur some vestiges of the deeds of Joshua in other historians besides those of the Bible. Procopius mentions a Phœnician inscription near the city of Tingis in Mauritania, the sense of which was:—'We are those who fled before the face of Joshua the robber, the son of Nun.'

The book of Joshua is so called from the personage who occupies the principal place in the narration of events contained therein, and may be considered as a continuation of the Pentateuch. The Pentateuch, and especially Deuteronomy, are repeatedly referred to in the book of Joshua, the narration of which begins with the death of Moses and extends to the death of Joshua, embracing a chronological period of somewhat less than thirty years. The subject of the book is thus briefly stated in ch. i. 5, 6: 'There shall not any man be able to stand before thee all the days of thy life. As I was with Moses, so I will be with thee; I will not fail thee, nor forsake thee. Be strong and of a good courage; for unto this people shalt thou divide for an inheritance the land which I swear unto their fathers to give them.' In these two verses is also indicated the division of the book into two principal portions, with reference to the conquest and the distribution of the land of Canaan. The conquest is narrated in the first twelve, and the distribution in the following ten chapters. In the last two chapters are subjoined the events subsequent to the distribution up to the death of Joshua. The history of the conquest of Canaan is a series of miracles, than which none more remarkable are recorded in any part of sacred history. The passage into the Promised Land, as well as that out of Egypt, was through water. Jericho was taken not by might, but by the falling of the walls on the blast of the trumpets of seven priests; and in the war against Gibeon the day was prolonged to afford time for the completion of the victory.

It is generally granted that the first twelve chapters form a continuous whole: although the author, in ch. x. 13, refers to another work, he not merely transcribes but intimately combines the quotation with the tenor of his narration. It is certain that there sometimes occur episodes which seem to interrupt the chronological connection, as for instance the portion intervening between chs. i. ii., and iii. 1. But it belongs to the nature of detailed historical works to contain such episodes.

The whole tenor of the first twelve chapters bespeaks an eye-witness who bore some part in the transactions—a fact proved not merely by such expressions as 'we passed over,' in ch. v. 1, but especially by the circumstantial vividness of the narrative, which clearly indicates that the writer was an eye-witness.

The statement that the monuments which he erected were extant to this day, indicates that Joshua did not promulgate the book immediately after the events narrated (comp. iv. 9; vi. 26; viii. 28, 29; x. 27). The book, however, could not have been written very long after the time of

Joshua, because we find that Rahab was still alive when it was composed (vi. 29). The section from chapter xiii. to xxii. inclusive, which contains an account of the distribution of the land, seems to be based upon written documents, in which the property was accurately described. That this was the case is likely not merely on account of the peculiar nature of the diplomatic contents by which this 'Doomsday Book' is distinguished from the preceding part of Joshua, but also on account of the statement in chapter xviii. 4, where Joshua says to the children of Israel, 'Give out from among you three men from each tribe: and I will send them, and they shall rise, and go through the land, and describe it according to the inheritance of them; and they shall come again to me.' Compare ver. 6, 'Ye therefore shall describe the land into seven parts.' Compare also verses 8 and 9, 'And the men arose and went away; and Joshua charged them that went to describe the land, saying, Go, and walk through the land, and describe it, and come again to me, that I may here cast lots for you before the Lord in Shiloh. And the men went and passed through the land, and described it by cities into seven parts in a book, and came again to Joshua to the host at Shiloh.'

The author of the book of Joshua frequently repeats the statements of the Pentateuch in a more detailed form, and mentions the changes which had taken place since the Pentateuch was written. Compare Num. xxxiv. 13 and 14, with Josh. xiii. 7, sq.; Num. xxxii. 37, with Josh. xiii. 17, sq.; Num. xxxv. with Josh. xxi.

There is also considerable similarity between the following passages in the books of Joshua and Judges:—Josh. xiii. 4, Judg. iii. 3; Josh. xv. 13, sq., Judg. i. 10, 20; Josh. xv. 15-19, Judg. i. 11-15; Josh. xv. 62, Judg. i. 21; Josh. xvi. 10, Judg. i. 29; Josh. xvii. 12, Judg. i. 27; Josh. xix. 47, Judg. xviii.

It seems to have been the intention of the author of chapters xiii.-xxii. to furnish authentic records concerning the arrangements made by Joshua after the conquest of Canaan. Since we do not find in the subsequent history that the tribes, after the death of Joshua, disagreed among themselves about the ownership of the land, it would appear that the object of the book of Joshua, as a 'Doomsday Book,' was fully attained. The circumstance that the book of Joshua contains many Canaanitish names of places to which the Hebrew names are added, seems also to indicate that the second part originated in an early age, when neither the Canaanitish name was entirely forgotten, nor the Hebrew name fully introduced; so that it was expedient to mention both.

In the last two chapters occur two orations of Joshua, in which he bids farewell to the people whom he had commanded. In chapter xxiv. 26, we read, 'And Joshua wrote these words in the book of the law of God.' The expression, *these words*, seems to refer only to his last address, and the subsequent resolution of the people to follow his example. We are here, however, expressly informed that Joshua did write this much; and consequently we deem it the more likely that he also committed to writing the other memorable events connected with his career, such as the conquest and the distribution of the land.

Viewing all the circumstances together, we

consider it highly probable that the whole book of Joshua was composed by himself up to the twenty-eighth verse of the last chapter; to which a friendly hand subjoined some brief notices, contained in verses 29-33, concerning the death, age, and burial of Joshua; the continuance of his influence upon the people; the interment, in Shechem, of the bones of Joseph, which the children of Israel had brought from Egypt; and the death and burial of Eleazar, the son of Aaron, whom his son Phinehas interred in his allotment on Mount Ephraim.

The authority of the book of Joshua mainly rests upon the manner in which it is treated in other parts of the Bible.

Besides the allusions in the book of Judges, we find Joshua referred to in 1 Kings xvi. 34. (Comp. Josh. vi. 26). The second and third verses of Psalm xlv. contain a brief summary of the whole book of Joshua:—'Thou didst drive out the heathen with thy hand, and plantest them: thou didst afflict the people, and cast them out. For they got not the land in possession by their own sword, neither did their own arm save them: but thy right hand and thine arm, and the light of thy countenance, because thou hadst a favour unto them.' (Compare Psalm lxviii. 12-14; lxxviii. 54, 55; cxiv. 3 and 5, which refer to the book of Joshua.) Also, Hab. iii. 11: 'The sun and moon stood still in their habitation,' &c. Heb. xiii. 5: 'For he hath said, I will never leave thee, nor forsake thee.' (Compare Josh. i. 5.) Heb. xi. 31: 'By faith the harlot Rahab perished not with them that believed not, when she had received the spies with peace;' and James ii. 25: 'Likewise also was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?' (Compare Josh. ii. and vi. 22-25.) Acts vii. 45: 'Which (the tabernacle) also our fathers that came after brought in with Jesus into the possession of the Gentiles, whom God drove out before the face of our fathers.' (Compare Josh. iii. 14.) 11. b. xi. 30: 'By faith the walls of Jericho fell down, after they were compassed about seven days.' (Compare Josh. vi. 17-23.) Heb. iv. 8: 'For if Jesus [JOSHUA] had given them rest, then would he not afterwards have spoken of another day.'

The other persons of this name in the Bible are:

JOSHUA, a Beth-shemite (1 Sam. vi. 14, 18), an Israelite, the owner of the field into which the ark came which bore the ark on its return from the land of the Philistines.

JOSHUA (2 Kings xxiii. 8), the governor of the city of Jerusalem at the commencement of the reign of Josiah.

JOSHUA, the son of Josedec (Hagg. i. 1, 12, 14; Zech. iii. 1, 3, 9; vi. 11), a high-priest in the time of Haggai and Zechariah [JESHUA].

JOSIAH (*God-healed*), seventeenth king of Judah, and son of Amon, whom he succeeded on the throne in B.C. 698, at the early age of eight years, and reigned thirty-one years.

As Josiah thus early ascended the throne, we may the more admire the good qualities which he manifested. Avoiding the example of his immediate predecessors, he 'did that which was right in the sight of the Lord, and walked in all the ways of David his father, and turned not

aside to the right hand or to the left' (2 Kings xxii. 1, 2; 2 Chron. xxxiv. 1, 2). So early as the sixteenth year of his age he began to manifest that enmity to idolatry in all its forms which distinguished his character and reign; and he was not quite twenty years old when he proclaimed open war against it, although more or less favoured by many men of rank and influence in the court and kingdom. He then commenced a thorough purification of the land from all taint of idolatry, by going about and superintending in person the operations of the men who were employed in breaking down idolatrous altars and images, and cutting down the groves which had been consecrated to idol-worship. His detestation of idolatry could not have been more strongly expressed than by ransacking the sepulchres of the idolatrous priests of former days, and consuming their bones upon the idol-altars before they were overturned. Yet this operation, although unexampled in Jewish history, was foretold 326 years before Josiah was born, by the prophet who was commissioned to denounce to Jeroboam the future punishment of his sin. He even named Josiah as the person by whom this act was to be performed; and said that it should be performed in Beth-el, which was then a part of the kingdom of Israel (1 Kings xiii. 2). All this seemed much beyond the range of human probabilities. But it was performed to the letter; for Josiah did not confine his proceedings to his own kingdom, but went over a considerable part of the neighbouring kingdom of Israel, which then lay comparatively desolate, with the same object in view; and at Beth-el in particular, executed all that the prophet had foretold (2 Kings xxiii. 1-19; 2 Chron. xxxiv. 3-7, 32). In these proceedings Josiah seems to have been actuated by an absolute hatred of idolatry, such as no other king since David had manifested, and which David had scarcely occasion to manifest in the same degree.

In the eighteenth year of his reign and the twenty-sixth of his age, when the land had been thoroughly purified from idolatry and all that belonged to it, Josiah proceeded to repair and beautify the temple of the Lord. In the course of this pious labour, the high-priest Hilkiah discovered in the sanctuary a volume, which proved to contain the books of Moses, and which, from the terms employed, seems to have been considered the original of the law as written by Moses. On this point there has been much anxious discussion and some rash assertion. Some writers of the German school allege that there is no external evidence—that is, evidence beside the law itself—that the book of the law existed till it was thus produced by Hilkiah. This assertion it is the less necessary to answer here, as it is duly noticed in the art. PENTATEUCH. But it may be observed that it is founded very much on the fact that the king was greatly astonished when some parts of the law were read to him. It is indeed perfectly manifest that he had previously been entirely ignorant of much that he then heard; and he rent his clothes in consternation when he found that, with the best intentions to serve the Lord, he and all his people had been living in the neglect of duties which the law declared to be of vital importance. It is certainly difficult to account for this ignorance.

Some suppose that all the copies of the law had perished, and that the king had never seen one. But this is very unlikely; for however scarce complete copies may have been, the pious king was likely to have been the possessor of one. The probability seems to be that the passages read were those awful denunciations against disobedience with which the book of Deuteronomy concludes, and which from some cause or other the king had never before read, or which had never before produced on his mind the same strong conviction of the imminent dangers under which the nation lay, as now when read to him from a volume invested with a character so venerable, and brought with such interesting circumstances under his notice.

The king in his alarm sent to Huldah 'the prophetess,' for her counsel in this emergency (Huldah); her answer assured him that, although the dread penalties threatened by the law had been incurred and would be inflicted, he should be gathered in peace to his fathers before the days of punishment and sorrow came.

It was perhaps not without some hope of averting this doom that the king immediately called the people together at Jerusalem, and engaged them in a solemn renewal of the ancient covenant with God. When this had been done, the Passover was celebrated with careful attention to the directions given in the law, and on a scale of unexampled magnificence. But all was too late; the hour of mercy had passed; for 'the Lord turned not from the fierceness of his great wrath, wherewith his anger was kindled against Judah' (2 Kings xxii. 3-20; xxiii. 21-27; 2 Chron. xxxiv. 8-33; xxxv. 1-19).

That removal from the world which had been promised to Josiah as a blessing, was not long delayed, and was brought about in a way which he had probably not expected. His kingdom was tributary to the Chaldean empire; and when Pharaoh-necho, king of Egypt, sought a passage through his territories, on an expedition against the Chaldeans, Josiah, with a very high sense of the obligations which his vassalage imposed, refused to allow the march of the Egyptian army through his dominions, and prepared to resist the attempt by force of arms. Necho was very unwilling to engage in hostilities with Josiah; the appearance of the Hebrew army at Megiddo, however, brought on a battle, in which the king of Judah was so desperately wounded by arrows that his attendants removed him from the war-chariot, and placed him in another, in which he was taken to Jerusalem, where he died. No king that reigned in Israel was ever more deeply lamented by all his subjects than Josiah; and we are told that the prophet composed on the occasion an elegiac ode, which was long preserved among the people, but which is not now in existence (2 Kings xxiii. 29-37; 2 Chron. xxxv. 20-27).

JOT, properly Iota, designates the smallest letter of the Greek alphabet (ι); derived from the Hebrew *jod* (י) and employed metaphorically to express the minutest trifle. It is, in fact, one of several metaphors derived from the alphabet—as when *alpha*, the first letter, and *omega*, the last, are employed to express the beginning and the end.

1. JOTHAM (*God is upright*), the youngest of

Gideon's seventy legitimate sons; and the only one who escaped when the rest were massacred by the order of Abimelech. When the fratricide was made king by the people of Shechem, the young Jotham was so daring as to make his appearance on Mount Gerizim for the purpose of lifting up a protesting voice, and of giving vent to his feelings. This he did in a beautiful parable, wherein the trees are represented as making choice of a king, and bestowing on the bramble the honour which the cedar, the olive, and the vine would not accept. The obvious application, which indeed Jotham failed not himself to point out, must have been highly exasperating to Abimelech and his friends; but the speaker fled, as soon as he had delivered his parable, to the town of Beer, and remained there out of his brother's reach. We hear no more of him; but three years after, if then living, he saw the accomplishment of the malediction he had pronounced (*Judg. ix. 5-21*).

2. JOTHAM, tenth king of Judah, and son of Uzziah, whom he succeeded in B.C. 758, at the age of twenty-five; he reigned sixteen years. His father having during his last years been excluded by leprosy from public life (UZZIAH), the government was administered by his son. Jotham profited by the experience which the reign of his father, and of the kings who preceded him, afforded, and he ruled in the fear of God, although he was unable to correct all the corrupt practices into which the people had fallen. His sincere intentions were rewarded with a prosperous reign. He was successful in his wars. The Ammonites, who had 'given gifts' as a sort of tribute to Uzziah, but had ceased to do so after his leprosy had incapacitated him from governing, were constrained by Jotham to pay for three years a heavy tribute in silver, wheat, and barley (2 Chron. xxvi. 8; xxvii. 5, 6). Many important public works were also undertaken and accomplished by Jotham. The principal gate of the temple was rebuilt by him on a more magnificent scale; the quarter of Ophel, in Jerusalem, was strengthened by new fortifications; various towns were built or rebuilt in the mountains of Judah; and castles and towers of defence were erected in the wilderness. Jotham died greatly lamented by his people, and was buried in the sepulchre of the kings (2 Kings xv. 38; 2 Chron. xxvii. 3-9).

JU'BAL (*music*); one of Cain's descendants, son of Lamech and Adar. He is described as the inventor of the KINNOX, and the UGAN, rendered in our version 'the harp and the organ,' but perhaps more properly 'the lyre and month-organ,' or Pandean pipe (*Gen. iv. 21*) [*Music*].

JU'BILEE, according to some a period of fifty years, according to others, though less probably, of forty-nine years, the termination of which led to certain great changes in the condition of the Hebrews, all of which seem to have been designed and fitted to bring about from time to time a restoration of the original social state instituted by Moses, and so to sustain in its unimpaired integrity the constitution of which he was the author.

Intimately connected with the Jubilee was another singular Mosaic institution, namely, the Sabbatical year. On this account we shall speak briefly of the latter, as preparatory to a right understanding of the former.

While yet wandering in the wilderness, and therefore, before they had entered 'the land of promise,' the children of Israel received from the lips of their great legislator the following law—'six years thou shalt sow thy land, and shalt gather in the fruits thereof; but the seventh year thou shalt let it rest; that thine ox and thine ass may rest, and the son of thy handmaid and the stranger may be refreshed' (*Exod. xxiii. 10, sq.*). This injunction is repeated in *Lev. xxv. 1-7*, where it stands as proceeding immediately from the Lord. The land is to keep 'a sabbath for the Lord.' Then in immediate sequence follows the law relating to the Jubilee (*Lev. xx. 8*). 'And thou shalt number seven sabbaths of years unto thee, seven times seven years, forty and nine years; then shalt thou cause the trumpet of the Jubilee to sound in the tenth day of the seventh month, in the day of atonement shall ye make the trumpet sound throughout all your land. And ye shall hallow the fiftieth year, and proclaim liberty throughout all the land unto all the inhabitants thereof; and ye shall return every man unto his possession and unto his family,' &c. &c. (*Lev. xxv. 8-24*). Land might be redeemed by a kinsman or by the party who sold it; but in the Jubilee year it must return to its original proprietor. Dwelling-houses within a walled city might be redeemed within the first year; if not redeemed within the space of a full year they became the freehold of the purchaser. The houses of villages were to be counted as the fields of the country. The cities and houses of the Levites were redeemable at any time, and could never be held longer than the ensuing Jubilee: the field of the suburbs of their cities might not be sold (*vers. 25-38*). Israelites who were hired servants (Israelitish bond-servants were not allowed) might serve till the year of Jubilee, when they returned to their possessions. A Hebrew sold as a slave to a foreigner resident in Palestine was redeemable by himself or relatives at any time, by making payment according to the number of years to elapse before the next Jubilee; but at the Jubilee such bondsman was, under all circumstances, to be set at liberty (*vers. 39-55*). The only exception to this system of general restitution was in the case of property set apart and devoted to the Divine service—'Every devoted thing is most holy unto the Lord; none devoted shall be redeemed' (*Lev. xxvii. 28-29*).

With these scriptural details the account given by Josephus (*Antiq. iii. 12. 3*) substantially agrees; and it is worthy of notice that the Jewish historian speaks of the law as a reality, as a present reality, as something in actual operation.

The time required by the Sabbatical year and by the Jubilee to be rescued from the labours of the field, was very considerable. Strictly interpreted the language we have cited would take out of the ordinary course of things every sixth, seventh, and eighth year, during each successive septenary, till the circle of fifty years was in each period completed. Nay more, the old store, produced in the sixth year, was to last until the ninth year, for the sixth year was to bring forth fruits for three years.

The reader has now before him the whole of this extraordinary piece of legislation, which, viewed in all its bearings—in its effects on human labour, on character, on religious institutions and observances, as well as on the general condition

of society, no less than on the productiveness of the land, and the means of sustenance to its inhabitants—is wholly unparalleled by any event in the history of the world. It is, however, in strict harmony with the Mosaic economy.

The recurring periods of seven years are in keeping with the institution of the seventh day as a Sabbath for man and beast. The aim in both is similar—needful repose. The leading idea involved in the Jubilee—namely, restitution—also harmonizes with the fundamental principles of the Mosaic system. The land was God's, and was entrusted for use to the chosen people in such a way that every individual had his portion. A power of perpetual alienation would have been a virtual denial of God's sovereign rights, while the law of Jubilee was one continued recognition of them. The conception is purely *theoretical* in its whole character and tendencies. The theocracy was of such a nature as to disallow all subordinate 'thrones, principalities, and powers;' and consequently, to demand entire equality on the part of the people. But the power of perpetual alienation in regard to land would have soon given rise to the greatest inequalities of social condition, presenting splendid affluence on one side and sordid pauperism on the other. A passage in Deuteronomy (xv. 4), when rightly understood, as in the marginal translation—'to the end that there be no poor among you'—seems expressly to declare that the aim in view, at least, of the Sabbatical release, was to prevent the rise of any great inequality of social condition, and thus to preserve unimpaired the essential character of the theocracy. Equally benevolent in its aim and tendency does this institution thus appear, showing how thoroughly the great Hebrew legislator cared and provided for individuals, instead of favouring classes. Beginning with a narrow cycle of seven days, he went on to a wider one of as many years, embracing at last seven times seven annual revolutions, seeking in all his arrangements rest for man and beast, and, by a happy personification, rest even for the brute earth; and in the rest which he required for human beings, providing for that more needful rest of mind which the sharp competitions and eager rivalries of modern society deny to ten thousand times ten thousand. As being of a benign character and tendency, the law of the Sabbatical and Jubilee year is in accordance with the general spirit of the Mosaic legislation, and appears not unworthy of its divine origin.

Warburton adduced this law in order to show that Moses was in truth sent and sustained by God, since nothing but a divine power could have given the necessary supplies of food in the sixth year; and no unprejudiced person can deny the force of the argument.

Now these laws either emanated from Moses, or they did not. If they did not, they arose after the settlement in Canaan, and are of such a nature as to convict their fabricator of imposture, if, indeed, any one could have been found so daring as to bring forth laws implying institutions which did not exist, and which under ordinary circumstances could not find permanence, even if they could ever be carried into operation at all. But if these laws emanated from Moses, is it credible that he would have given utterance to commands which convict themselves of impossibility? or caused the rise of institutions, which, if unsp-

ported of heaven, must come to a speedy termination, and in so doing act to his own discredit as a professed divine messenger?

But it may be asked, Could the land sustain the people? On this point we find the following important passage in Palfrey's *Lectures on the Jewish Scriptures*, Boston, 1841, vol. i. p. 303: 'I find no difficulty arising from any inadequacy of the produce of six years to afford sustenance to the people for seven. To say that this was intended would merely be to say that the design was that the consumption of each year should only amount on an average to six-sevenths of its produce. In such an arrangement it cannot be thought that there was anything impracticable. There are states of this Union which export yearly more than half their produce, and subsist substantially on the remainder, their imports consisting mostly of luxuries. Again, in England nearly three quarters of the families are engaged in commerce, manufactures, professions, and unproductive pursuits; but in Judæa every man was a producer of food, with the advantage of a fine climate and a rich soil.'

In spite of all these arguments, some rationalistic writers have hazarded the surprising assertion that these laws were not executed before the Babylonish exile. But in addition to the proofs already mentioned, we have the positive evidence of the Roman historian Tacitus (*Hist.* v. 4), of Josephus (*Antiq.* xiv. 10-6), of Ezekiel (xlvi. 17), and of Isaiah (lxi. 1-2), to the observance of the Sabbatical year at least. And since the essential element of this system of law, namely, the Sabbatical year, was an established institution in the days of Tacitus, Josephus, the Maccabees, Ezekiel, and Isaiah, we think the fair and legitimate inference is in favour of those laws having been long previously observed, probably from the early periods of the Hebrew republic. Their existence in a declining state of the commonwealth cannot be explained without seeking their origin nearer the fountain-head of those pure, living waters, which, with the force of all primitive enthusiasm, easily effected great social wonders, especially when divinely guided and divinely sustained.

JUDÆA, the southernmost of the three divisions of the Holy Land. It denoted the kingdom of Judah as distinguished from that of Israel. But after the captivity, as most of the exiles who returned belonged to the kingdom of Judah, the name Judæa (Judah) was applied generally to the whole of Palestine west of the Jordan (Hag. i. 14; ii. 2). Under the Romans, in the time Christ, Palestine was divided into Judæa, Galilee and Samaria (John iv. 4, 5; Acts ix. 31), the last including the whole of the southern part west of the Jordan. But this division was only observed as a political and local distinction, for the sake indicating the part of the country, just as we use the name of a county (Matt. ii. 1, 5; iii. 1; iv. 25 Luke i. 65); but when the whole of Palestine was to be indicated in a general way, the term Judæa was still employed.

It is only Judæa, in the provincial sense, that requires our present notice, the country at large being described in the article PALESTINE. In this sense, however, it was much more extensive than the domain of the tribe of Judah, even more so than the kingdom of the same name. There are no materials for describing its limits with

precision; but it included the ancient territories of Judah, Benjamin, Dan, Simeon, and part of Ephraim.

Judah is a country full of hills and valleys. The hills are generally separated from one another by valleys and torrents, and are, for the most part, of moderate height, uneven, and seldom of any regular figure. The rock of which they are composed is easily converted into soil, which being arrested by the terraces when washed down by the rains, renders the hills cultivable in a series of long, narrow gardens, formed by these terraces from the base upwards. In this manner the hills were in ancient times cultivated most industriously, and enriched and beautified with the fig-tree, the olive-tree, and the vine; and it is thus that the scanty cultivation which still subsists is now carried on. But when the inhabitants were rooted out, and the culture neglected, the terraces fell to decay, and the soil which had been collected in them was washed down into the valleys, leaving only the arid rock, naked and desolate. This is the general character of the scenery; but in some parts the hills are beautifully wooded, and in others the application of the ancient mode of cultivation still suggests to the traveller how rich the country once was and might be again, and how beautiful the prospects which it offered. As, however, much of this was the result of cultivation, the country was probably anciently, as at present, *naturally* less fertile than either Samaria or Galilee.

JUDAH (*celebrated*), fourth son of Jacob and Leah (A.C. 1755). The narrative in Genesis brings this patriarch more before the reader, and makes known more of his history and character, than it does in the case of any other of the twelve sons of Jacob, with the single exception of Joseph. It is indeed chiefly in connection with Joseph that the facts respecting Judah transpire; and as they have already been given in the articles JACOB and JOSEPH, it is only necessary to indicate them shortly in this place. It was Judah's advice that the brethren followed when they sold Joseph to the Ishmaelites, instead of taking his life. By the light of his subsequent actions we can see that his conduct on this occasion arose from a generous impulse, although the form of the question he put to them has been sometimes held to suggest an interested motive:—'What profit is it if we slay our brother and conceal his blood? Come, let us sell him,' &c. (Gen. xxxvii. 26, 27).

Not long after this Judah withdrew from the paternal tents, and went to reside at Adullam, in the country which afterwards bore his name. Here he married a woman of Canaan, called Shuah, and had by her three sons, Er, Onan, and Shelah. When the eldest of these sons became of fit age, he was married to a woman named Tamar, but soon after died. As he died childless, the patriarchal law, afterwards adopted into the Mosaic code (Deut. xxv. 6), required him to bestow upon the widow his second son. This he did: but as Onan also soon died childless, Judah became reluctant to bestow his only surviving son upon this woman, and put her off with the excuse that he was not yet of sufficient age. Tamar accordingly remained in her father's house at Adullam. She had the usual passion of Eastern women for offspring, and could not endure the stigma of having been twice married without bear-

ing children, while the law precluded her from contracting any alliance but that which Judah withheld her from completing.

Meanwhile Judah's wife died, and after the time of mourning had expired, he went, accompanied by his friend Hirah, to attend the shearing of his sheep at Timnath in the same neighbourhood. These circumstances suggested to Tamar the strange thought of connecting herself with Judah himself, under the guise of a loose woman. Having waylaid him on the road to Timnath, she succeeded in her object, and when the consequences began to be manifest in the person of Tamar, Judah was highly enraged at her crime, and, exercising the powers which belonged to him as the head of the family she had dishonoured, he commanded her to be brought forth and committed to the flames as an adulteress. But when she appeared, she produced the ring, the bracelet, and the staff, which he had left in pledge with her; and put him to confusion by declaring that they belonged to the father of her coming offspring. Judah acknowledged them to be his, and confessed that he had been wrong in withholding Shelah from her. The result of this painful affair was the birth of two sons, Zerah and Pharez, from whom, with Shelah, the tribe of Judah descended. Pharez was the ancestor of the line from which David, the kings of Judah, and Jesus came (Gen. xxxviii.; xlv. 12; 1 Chron. ii. 3-5; Matt. i. 3; Luke iii. 33).

These circumstances seem to have disgusted Judah with his residence in towns; for we find him ever afterwards at his father's tents. His experience of life, and the strength of his character, appear to have given him much influence with Jacob; and it was chiefly from confidence in him that the aged father at length consented to allow Benjamin to go down to Egypt. That this confidence was not misplaced has already been shown [JOSEPH]; and there is not in the whole range of literature a finer piece of true natural eloquence than that in which Judah offers himself to remain as a bond-slave in the place of Benjamin, for whose safe return he had made himself responsible to his father. The strong emotions which it raised in Joseph disabled him from keeping up longer the disguise he had hitherto maintained, and there are few who have read it without being, like him, moved even to tears.

We hear nothing more of Judah till he received, along with his brothers, the final blessing of his father, which was conveyed in lofty language, glancing far into futurity, and strongly indicative of the high destinies which awaited the tribe that was to descend from him.

2. JUDAH, TRIBE OF. This tribe sprang from Judah, the son of Jacob. When the Israelites quitted Egypt, it already exhibited the elements of its future distinction in a larger population than any of the other tribes possessed. It numbered 74,000 adult males, being nearly 12,000 more than Dan, the next in point of numbers, and 34,100 more than Ephraim, which in the end contested with it the superiority among the tribes. During the sojourn in the wilderness, Judah neither gained, like some tribes, nor lost like others. Its numbers had increased to 76,500, being 12,100 more than Issachar, which had become next to it in population (Num. i. 22). In the first distribution of lands, the tribe of Judah

received the southernmost part of Palestine, to the extent of fully one-third of the whole country to be distributed among the nine and a half tribes for which provision was to be made. This oversight was discovered and rectified at the time of the second distribution, which was founded on an actual survey of the country, when Simeon and Dan received allotments out of the territory which had before been wholly assigned to Judah (Josh. xix. 9). That which remained was still very large, and more proportioned to the future greatness than the actual wants of the tribe.

When Judah became a kingdom, the original extent of territory assigned to the tribe was more than restored or compensated, for it must have included the domains of Simeon, and we know that Benjamin was included in it.

The history of the Judges contains fewer facts respecting this important tribe than might be expected. It seems however to have been usually considered that the birthright which Reuben forfeited had passed to Judah under the blessing of Jacob; and a sanction was given to this impression when, after the death of Joshua, the divine oracle nominated Judah to take precedence of the other tribes in the war against the Canaanites (Judg. i. 2). It does not appear that any tribe was disposed to dispute the superior claim of Judah on its own account, except Ephraim, although in doing this Ephraim had the support of other tribes. Ephraim appears to have rested its claims to the leadership of the tribes upon the ground that the house of Joseph, whose interest it represented, had received the birthright, or double portion of the eldest, by the adoption of the two sons of Joseph, who became the founders of two tribes in Israel. The existence of the sacerdotal establishment at Shiloh, in Ephraim, was doubtless also alleged by the tribe as a ground of superiority over Judah. When, therefore, Judah assumed the sceptre in the person of David, and when the sacerdotal establishment was removed to Jerusalem, Ephraim could not brook the eclipse it had sustained, and took the first opportunity of erecting a separate throne, and of forming separate establishments for worship and sacrifice. Perhaps the separation of the kingdoms may thus be traced to the rivalry of the two tribes. After that separation the rivalry was between the two kingdoms; but it was still popularly considered as representing the ancient rivalry of these great tribes; for the prophet, in foretelling the repose of a coming time, describes it by saying, 'The envy also of Ephraim shall depart, and the adversaries of Judah shall be cut off: Ephraim shall not envy Judah, and Judah shall not vex Ephraim' (Isa. xiii. 12).

3. JUDAH, KINGDOM OF. When the territory of all the rest of Israel, except Judah and Benjamin, was lost to the kingdom of Rehoboam, a special single name was needed to denote that which remained to him; and almost of necessity the word *Judah* received an extended meaning, according to which it comprised not Benjamin only, but the priests and Levites, who were ejected in great numbers from Israel, and rallied round the house of David. At a still later time, when the nationality of the ten tribes had been dissolved, and every practical distinction between the ten and the two had vanished during the captivity, the scattered body had no visible head,

except in Jerusalem, which had been re-occupied by a portion of *Judah's* exiles. In consequence the name Judah (or *Jew*) attached itself to the entire nation from about the epoch of the restoration. But in this article Judah is understood of the people over which David's successors reigned, from Rehoboam to Zedekiah. Under the article ISRAEL the chronology of the two kingdoms has been discussed, which, however, was not carried below the capture of Samaria. In the lower part of the list we lose the check which the double line of kings afforded; but for the same reason the problem is simpler. The only difficulty encountered here rises out of the ages assigned to some of the kings of Judah. For this reason, in the following list, all their ages are inserted, so far as they are recorded. It has been thought sufficient to add Winer's chronology to the dates as given above in the article ISRAEL.

Accession of	Years of Reign.	Age.	A.C.	Father's Age at Son's Birth.
Rehoboam . . .	17	41	975	—
Abijah . . .	3	—	957	*22
Asa . . .	41	—	955	*22
Jehoshaphat . . .	25	35	914	*22
[Jehoram installed]	8	32	—	—
Jehoram alone . . .	—	(35)	889	25
Ahaziah . . .	1	22	885	17
[Queen Athaliah]	7	—	884	—
Jehoash . . .	39?	7	878	22
Amaziah . . .	29	25	838	22
Uzziah . . .	53?	16	809	38
Jotham . . .	16	25	757	43
Ahaz . . .	16	20	741	22
Hezekiah . . .	29	25	726	10
Manassah . . .	55	12	696	42
Amon . . .	2	22	641	45
Josiah . . .	31	8	639	16
Jehoahaz . . .	$\frac{1}{2}$	23	609	15
Jehoiakim, his brother . . .	11	25?	609	13?
Jehoiachin . . .	$\frac{1}{2}$	18	598	18
Zedekiah, his father's brother . . .	11	21	598	28
Zedekiah is deposed	—	—	588	—

The ages of Abijah and Asa at their accession not being given, the three first numbers in the last column are averages only, Rehoboam having been born 66 or 67 years before Jehoshaphat. A glance at the table is sufficient to show that various errors must have crept into the numbers, but it is now extremely difficult, if not impossible, to correct them.

When the kingdom of Solomon became rent with intestine war, it might have been foreseen that the Edomites, Moabites, and other surrounding nations would at once refuse their accustomed tribute, and become again practically independent; and some irregular invasion of these tribes might have been dreaded. It was a mark of conscious weakness, and not a result of strength, that Rehoboam fortified 15 cities (2 Chron. xi. 5-11), in which his people might find defence against the irregular armies of his roving neighbours. But a more formidable enemy came in, Shishak king

of Egypt, against whom the fortresses were of no avail (xii. 4), and to whom Jerusalem was forced to open its gates; and, from the despoiling of his treasures, Rehoboam probably sustained a still greater shock in its moral effect on the Moabites and Edomites, than in the direct loss: nor is it easy to conceive that he any longer retained the commerce of the Red Sea, or any very lucrative trade.

After Jehoshaphat followed the calamitous affinity with the house of Ahab, and the massacres of both families. Under Jehoiada the priest, and Jehoash his pupil, no martial efforts were made; but Amaziah son of Jehoash, after hiring 100,000 Israelites to no purpose, made war on the Edomites, slew 10,000, and threw 10,000 more down from the top of their rock (xxv. 5, 6, 11, 12). His own force in Judah, from 20 years old and upwards, was numbered at 300,000 choice men, able to handle spear and shield. His son Uzziah had 2600 military officers, and 307,500 men of war (xxvi. 12, 13). Ahaz lost, in a single battle with Pekah, 120,000 valiant men (xxviii. 6), after the severe slaughter he had received from Rezin king of Syria; after which no further military strength is ascribed to the kings of Judah.

These figures have caused no small perplexity, and have suggested to some the need of conjectural emendation. It perhaps deserves remark, that in the book of Kings no numbers of such startling magnitude are found. The army ascribed to Rehoboam (1 Kings xii. 21) is, indeed, as in Chronicles, 180,000 men; but if we explain it of those *able* to fight, the number, though certainly large, may be dealt with historically.

As the most important external relations of Israel were with Damascus, so were those of Judah with Edom and Egypt. Some revolution in the state of Egypt appears to have followed the reign of Shishak. Apparently the country must have fallen under the power of an Ethiopian dynasty, for the name of the *Lubim*, who accompanied Zerah in his attack on Asa, is generally regarded as proving that Zerah was from Sennaar, the ancient Meroe. But as this invasion was signally repulsed, the attempt was not repeated; and Judah enjoyed entire tranquillity from that quarter until the invasion of Pharaoh Necho. In fact it may seem that this success assisted the reaction, favourable to the power of Judah, which was already begun, in consequence of a change in the policy of Damascus. Asa having bought, by a costly sacrifice, the serviceable aid of the Damascene king, Israel was soon distressed, and Judah became once more formidable to her southern neighbours. Jehoshaphat appears to have re-asserted the Jewish authority over the Edomites without war, and to have set his own viceroy over them (1 Kings xxii. 47). Intending to resume the distant commerce which had been so profitable to Solomon, he built ships suitable for long voyages ('ships of Tarshish' as they are rightly called in 1 Kings xxii. 48), but not having the advantage of Tyrian sailors, as Solomon had, he lost the vessels by violent weather before they had sailed. Upon this, Ahaziah, king of Israel, offered the service of his own mariners, probably from the tribe of Asher and others accustomed to the Mediterranean; but Jehoshaphat was too discouraged to accept his offer, and the experi-

ment was never renewed by any Hebrew king. The Edomites, who paid only a forced allegiance, soon after revolted from Jehoram, and elected their own king (2 Kings viii. 20, 22). At a later time they were severely defeated by Amaziah (2 Kings xiv. 7), whose son, Uzziah, fortified the town of Elath, intending, probably, to resume maritime enterprise; but it remained a barren possession, and was finally taken from them by Rezin, in the reign of Ahaz (2 Kings xvi. 6). The Philistines, in these times, seem to have fallen from their former greatness, their league having been so long dissolved. The most remarkable event in which they are concerned is the assault on Jerusalem, in the reign of Jehoram (2 Chron. xxi. 16, 17).

It is strikingly indicative of the stormy scenes through which the line of David passed, that the treasures of the king and of the Temple were so often plundered or bargained away. First, under Rehoboam, all the boards of Solomon, consecrated and common alike, were carried off by Shishak (1 Kings xiv. 26). Two generations later, Asa emptied out to Benhadad all that had since accumulated 'in the house of Jehovah or in the king's house.' A third time, when Hazael had taken Gath, and was preparing to march on Jerusalem, Jehoash, king of Judah, turned him away by sending to him all 'that Jehoshaphat, Jehoram, Ahaziah and Jehoash himself had dedicated, and all the gold that was found in the treasures of the house of Jehovah and in the king's house' (2 Kings xii. 18). In the very next reign Jehoash, king of Israel, defeated and captured Amaziah, took Jerusalem, broke down the walls, carried off hostages, and plundered the gold and silver deposited in the temple and in the royal palace (2 Kings xiv. 11-14). A fifth sacrifice of the sacred and of the royal treasure was made by Ahaz to Tiglath-pileser (2 Kings xvi. 8). The act was repeated by his son Hezekiah to Sennacherib, who had demanded '300 talents of silver and 30 talents of gold.' It is extraordinary, therefore, to find expressions used when Nebuchadnezzar took the city, which at first sight imply that Solomon's far-famed stores were still untouched (2 Kings xxiv. 13).

The severest shock which the house of David received was the double massacre which it endured from Jehu and from Athaliah. After a long minority, a youthful king, the sole surviving male descendant of his great-grandfather, and reared under the paternal rule of the priest Jehoiada, to whom he was indebted not only for his throne but even for his recognition as a son of Ahaziah, was not in a situation to uphold the royal authority. That Jehoash conceived the priests to have abused the power which they had gained, sufficiently appears in 2 Kings xii., where he complains that they had for twenty-three years appropriated the money, which they ought to have spent on the repairs of the temple. Jehoiada gave way; but we see here the beginning of a feud (hitherto unknown in the house of David) between the crown and the priestly order; which, after Jehoiada's death, led to the murder of his son Zachariah. The massacre of the priests of Baal, and of Athaliah, granddaughter of a king of Sidon, must also have destroyed cordiality between the Phœnicians and the kingdom of Judah; and when the victorious

Hazael had subjugated all Israel and showed himself near Jerusalem, Jehoash could look for no help from without, and had neither the faith of Hezekiah nor a prophet like Isaiah to support him. The assassination of Jehoash in his bed by 'his own servants' is described in the Chronicles as a revenge taken upon him by the priestly party for his murder of 'the sons' of Jehoiada; and the same fate, from the same influence, fell upon his son Amaziah, if we may so interpret the words in 2 Chron. xxv. 27: 'From the time that Amaziah turned away from following Jehovah they made a conspiracy against him,' &c. Thus the house of David appeared to be committing itself, like that of Saul, to permanent enmity with the priests. The wisdom of Uzziah, during a long reign, averted this collision, though a symptom of it returned towards its close. No further mischief from this cause followed, until the reign of his grandson, the weak and unfortunate Ahaz: after which the power of the kingdom rapidly mouldered away.

The struggle of the crown against (what we might call) the constitutional check of the priests, was perhaps the most immediate cause of the ruin of Judah. Ahaz was probably less guided by policy than by superstition, or by architectural taste, in erecting his Damascene altar (2 Kings xvi. 10-18). But the far more outrageous proceedings of Manasseh seem to have been a systematic attempt to extirpate the national religion because of its supporting the priestly power; and the 'innocent blood very much,' which he is stigmatized for shedding (2 Kings xxi. 16), was undoubtedly a sanguinary attack on the party opposed to his impious and despotic innovations. The storm which he had raised did not burst in his lifetime; but, two years after, it fell on the head of his son Amon; and the disorganization of the kingdom which his madness had wrought is commemorated as the cause of the Babylonish captivity (2 Kings xxiii. 26; xxiv. 3, 4). It is also credible that the long-continued despotism had greatly lessened patriotic spirit; and that the Jewish people of the declining kingdom were less brave against foreign invaders than against kindred and neighbour tribes or civil opponents. Faction had become very fierce within Jerusalem itself (Ezek. xxii.), and civil bloodshed was common. Wealth, where it existed, was generally a source of corruption, by introducing foreign luxury, tastes, manners, superstitions, immorality, or idolatry; and when consecrated to pious purposes, as by Hezekiah and Josiah, produced little more than a formal and exterior religion.

The appointment of Hilkiah to the office of high priest seems to mark the era at which (by a reaction after the atrocities of Manasseh and Amon) the purer priestly sentiment obtained its triumph over the crown. But the victory came too late. Society was corrupt and convulsed within, and the two great powers of Egypt and Babylon menaced it from without. True lovers of their God and of their country, like Jeremiah, saw that it was a time rather for weeping than for action; and that the faithful must resign themselves to the bitter lot which the sins of their nation had earned.

JU'DAS is merely the Greek form of the Hebrew name JUDAH.

1. JUDAS MACCABÆUS. [MACCABÆE.]

2. JUDAS ISCARIOT. The object of this article is not to elucidate all the circumstances recorded respecting this person, but simply to investigate his motives in delivering up Jesus to the chief-priests. The evangelists relate his proceedings, but give no opinion. The subject is consequently open to inquiry. Our conclusions must be guided by the facts of the case, and by the known feelings and principles of human nature. The only conceivable motives for the conduct of Judas are, a sense of duty in bringing his Master to justice, resentment, avarice, dissatisfaction with the procedure of Jesus, and a consequent scheme for the accomplishment of his own views. With regard to the first of these motives, if Judas had been actuated by a sense of duty in bringing his Master to justice for anything censurable in his intentions, words, or actions, he would certainly have alleged some charge against him in his first interview with the chief-priests, and they would have brought him forward as a witness against Jesus, especially when they were at so great a loss for evidence; or they would have reminded him of his accusations when he appealed to them after our Lord's condemnation, saying, 'I have sinned in that I have betrayed innocent blood'—a confession which amounts to an avowal that he had never seen anything to blame in his Master, but everything to approve. The second motive supposed, namely, that of resentment, is rather more plausible. Jesus had certainly rebuked him for blaming the woman who had anointed him in the house of Simon the leper, at Bethany (comp. Matt. xxvi. 8-17; John xii. 4, 5); and Matthew's narrative seems to connect his going to the chief-priests with that rebuke (ver. 14): 'Then one of the twelve, called Judas Iscariot, went unto the chief-priests; but closer inspection will convince the reader that those words are more properly connected with ver. 3. Besides, the rebuke was general, 'Why trouble ye the woman?' Nor was it nearly so harsh as that received by Peter, 'Get thee behind me, Satan' (Matt. xvi. 23), and certainly not so public (Mark viii. 32, 33). Even if Judas had felt ever so much resentment, it could scarcely have been his sole motive; and as nearly two days elapsed between his contract with the chief-priests and its completion, it would have subsided during the interval, and have yielded to that covetousness which we have every reason to believe was his ruling passion. St. John expressly declares that Judas 'was a thief, and had the bag, and bare (that is, conveyed away from it, stole) what was put therein' (xii. 6; comp. xx. 15, in the original). This rebuke, or rather certain circumstances attending it, might have determined him to act as he did, but is insufficient, of itself, to account entirely for his conduct, by which he endangered all his expectations of worldly advancement from Jesus, at the very moment when they seemed upon the verge of being fulfilled. It is, indeed, a most important feature in the case, that the hopes entertained by Judas, and all the apostles, from their Master's expected elevation, as the Messiah, to the throne of Judah, and, as they believed, to the empire of the whole world, were never more steadfast than at the time when he covenanted with the chief-priests to deliver him into their hands. Nor

does the theory of mere resentment agree with the terms of censure in which the conduct and character of Judas are spoken of by our Lord and the evangelists. Since, then, this supposition is insufficient, we may consider another motive to which his conduct is more commonly ascribed, namely, covetousness. But if by covetousness be meant the eager desire to obtain 'the thirty pieces of silver,' with which the chief-priests 'covenanted with him' (Matt. xxvi. 15), it presents scarcely a less inadequate motive. Can it be conceived that Judas would deliberately forego the prospect of immense wealth from his Master, by delivering him up for about four pounds ten shillings of our money, upon the highest computation, and not more than double in value, a sum which he might easily have purloined from the bag? Is it likely that he would have made such a sacrifice for any further sum, however large, which we may suppose 'they promised him' (Mark xiv. 11), and of which the thirty pieces of silver might have been the mere earnest (Luke xxii. 5)? Had covetousness been his motive, he would have ultimately applied to the chief-priests, not to bring again the thirty pieces of silver with the confession, 'I have sinned in that I have betrayed the innocent blood' (Matt. xxvii. 4), but to demand the completion of their agreement with him. We are now at liberty to consider the only remaining motive for the conduct of Judas, namely, dissatisfaction with the procedure of his Master, and a consequent scheme for the furtherance of his own views. It seems to us likely, that the impatience of Judas for the accomplishment of his worldly views, which we conceive to have ever actuated him in following Jesus, could no longer be restrained, and that our Lord's observations at Bethany served to mature a stratagem he had meditated long before. He had no doubt been greatly disappointed at seeing his Master avoid being made a king, after feeding the five thousand in Galilee. Many a favourable crisis had he seemed to lose, or had not dared to embrace, and now while at Bethany he talks of his burial (John xii. 7); and though none of his apostles, so firm were their worldly expectations from their Master, could clearly understand such 'sayings' (Luke xviii. 34); yet they had been made 'exceeding sorry' by them (Matt. xvii. 23). At the same time Judas had long been convinced by the miracles he had seen his Master perform that he was the Messiah (John vii. 31). He had even heard him accept this title from his apostles in private (Matt. xvi. 16). He had promised them that when he should 'sit upon the throne of his glory, they should sit upon twelve thrones judging the twelve tribes of Israel' (Matt. xix. 28). Yet now, when everything seemed most favourable to the assumption of empire, he hesitates and desponds. Within a few days, the people, who had lately given him a triumphal entry into the city, having kept the passover, would be dispersed to their homes, and Judas and his fellow apostles be, perhaps, required to attend their Master on another tedious expedition through the country. Hence it seems most probable that Judas resolved upon the plan of delivering up his Master to the Jewish authorities, when he would be compelled, in self-defence, to prove his claims, by giving them the

sign from heaven they had so often demanded; they would, he believed, elect him in due form as the King Messiah, and thus enable him to reward his followers. He did, indeed, receive from Jesus many alarming admonitions against his design; but the plainest warnings are lost upon a mind totally absorbed by a purpose, and agitated by many violent passions. The worst he would permit himself to expect, was a temporary displeasure for placing his Master in this dilemma; but as he most likely believed, judging from himself, that Jesus anticipated worldly aggrandizement, he might calculate upon his forgiveness when the emergency should have been triumphantly surmounted. Judas could not doubt his master's ability to extricate himself from his enemies by miracle. He had known him do so more than once (Luke iv. 30; John viii. 59; x. 39). Hence his directions to the officers to 'hold him fast,' when he was apprehended (Matt. xxvi. 48). With other Jews he believed the Messiah would never die (John xii. 34); accordingly, we regard his pecuniary stipulation with the priests as a mere artful cover to his deeper and more comprehensive design; and so that he served their purpose in causing the apprehension of Jesus, they would little care to scrutinize his motive. All they felt was being 'glad' at his proposal (Mark xiv. 11), and the plan appeared to hold good up to the very moment of our Lord's condemnation; for after his apprehension his miraculous power seemed unabated, from his healing Malchus. Judas heard him declare that he could even then 'ask, and his father would give him twelve legions of angels,' for his rescue. But when Judas, who awaited the issue of the trial with such different expectations, saw that though Jesus had avowed himself to be the Messiah, he had not convinced the Sanhedrim; and, instead of extricating himself from their power by miracle, had submitted to be 'condemned, buffeted, and spit upon,' by his judges and accusers; then it should seem he awoke to a full view of all the consequences of his conduct. The prophecies of the Old Testament, 'that Christ should suffer,' and of Jesus, concerning his own rejection and death, flashed on his mind in their true sense and full force, and he found himself the wretched instrument of their fulfilment. He made a last desperate effort to stay proceedings. He presented himself to the chief-priests, offered to return the money, confessed that he had sinned in that he had betrayed the innocent blood, and upon receiving their heartless answer was wrought into a phrenzy of despair, during which he committed suicide. There is much significance in these words of Matt. xxvii. 3, 'Then Judas, when he saw he was condemned,' not expiring on the cross, 'repented himself,' &c. If such be the true hypothesis of his conduct, then, however culpable it may have been, as originating in the most inordinate covetousness, impatience of the procedure of Providence, crooked policy, or any other bad quality, he is certainly absolved from the direct intention of procuring his Master's death. 'The difference,' says Archbishop Whately, 'between Iscariot and his fellow apostles was, that though they all had the same expectations and conjectures, he dared to act on his conjectures, departing from the plain course of his known duty

to follow the calculations of his worldly wisdom, and the schemes of his worldly ambition.

3. JUDAS, or JUDE, surnamed BARSABAS, a Christian teacher sent from Jerusalem to Antioch along with Paul and Barnabas (Acts xv. 22, 27, 32). He is supposed to have been one of the seventy disciples, and brother of Joseph, also surnamed Barsabas (son of Sabas), who was proposed, with Matthias, to fill up the place of the traitor Judas (Acts i. 23). Judas and Silas (who was also of the party) are mentioned together as 'prophets' and 'chief men among the brethren.'

4. JUDAS, [JUDE.]

5. JUDAS, a Jew of Damascus, with whom Paul lodged (Acts ix. 11).

6. JUDAS, surnamed the Galilean (Acts v. 37), so called also by Josephus, and likewise 'the Galanite.' In company with one Sadoc he attempted to raise a sedition among the Jews, but was destroyed by Cyrenius (Quirinus), then proconsul of Syria and Judæa.

JUDE, or JUDAS. There were two of this name among the twelve Apostles—Judas, called also Lebbaeus and Thaddæus (Matt. x. 4; Mark iii. 18, which see), and Judas Iscariot. Judas is the name of one of our Lord's brethren, but it is not agreed whether our Lord's brother is the same with the Apostle of this name [JAMES]. We are not informed as to the time of the vocation of the Apostle Jude to that dignity. Indeed, the only circumstance relating to him which is recorded in the Gospels consists in the question put by him to our Lord (John xiv. 22). 'Judas saith unto him (not Iscariot), Lord, how is it that thou wilt manifest thyself to us, and not unto the world?' Nor have we any account given of his proceedings after our Lord's resurrection, for the traditional notices which have been preserved of him rest on no very certain foundation. It has been asserted that he was sent to Edessa, to Abgarus, king of Osroene, and that he preached in Syria, Arabia, Mesopotamia, and Persia; in which latter country he suffered martyrdom.

JUDE, EPISTLE OF. Doubts have been thrown upon the genuineness of this Epistle from the fact of the writer having been supposed to have cited two Apocryphal books—Enoch and the Assumption of Moses. But notwithstanding the difficulties connected with this point, it was treated by the ancients with the highest respect, and regarded as the genuine work of an inspired writer. Although Origen on one occasion speaks doubtfully, calling it the 'reputed Epistle of Jude,' yet on another occasion, and in the same work, he says, 'Jude wrote an Epistle, of few lines indeed, but full of the powerful words of heavenly grace, who at the beginning says, "Jude, the servant of Jesus Christ and brother of James." The same writer calls it the writing of Jude the Apostle. The moderns are, however, divided in opinion between Jude the Apostle and Jude the Lord's brother, if indeed they be different persons. The author simply calls himself Jude, the brother of James, and a servant of Jesus Christ. This form of expression has given rise to various conjectures. Hug supposes that he intimates thereby a nearer degree of relationship than that of an Apostle. At the same time it must be acknowledged that the circumstance of his not naming himself an apostle is not of itself

necessarily sufficient to militate against his being the Apostle of that name, inasmuch as St. Paul does not upon all occasions (as in Philippians, Thessalonians, and Philemon) use this title. From his calling himself the brother of James, rather than the brother of the Lord, Michaelis deduces that he was the son of Joseph by a former wife, and not a full brother of our Lord's, as Herder contends [JAMES, JUDE]. From the great coincidence both in sentiment and subject which exists between this Epistle and the second of St. Peter, it has been thought by many critics that one of these writers had seen the other's work; but we shall reserve the discussion as to which was the earlier writing until we come to treat of St. Peter's Epistle. Dr. Lardner supposes that Jude's Epistle was written between the years 64 and 66, Beausobre and L'Enfant between 70 and 75 (from which Dodwell and Cave do not materially differ), and Dr. Mill fixes it to the year 90. If Jude has quoted the apocryphal book of Enoch, as seems to be agreed upon by most modern critics, and if this book was written, as Lücke thinks, after the destruction of Jerusalem, the age of our Epistle best accords with the date assigned to it by Mill.

It is difficult to decide who the persons were to whom this Epistle was addressed, some supposing that it was written to converted Jews, others to all Christians, without distinction. Many of the arguments seem best adapted to convince the Jewish Christians, as appeals are so strikingly made to their sacred books and traditions.

The design of this Epistle is to warn the Christians against the false teachers who had insinuated themselves among them and disseminated dangerous tenets of insubordination and licentiousness. The author reminds them, by the example of Sodom and Gomorrah, that God had punished the rebellious Jews; and that even the disobedient angels had shared the same fate. The false teachers to whom he alludes 'speak evil of dignities,' while the archangel Michael did not even revile Satan. He compares them to Balaam and Korah, to clouds without water, and to raging waves. Enoch, he says, foretold their wickedness; at the same time he consoles believers, and exhorts them to persevere in faith and love. The Epistle is remarkable for the vehemence, fervour, and energy of its composition and style.

JUDGES. This name is applied to fifteen persons who at intervals presided over the affairs of the Israelites during the 450 years which elapsed from the death of Joshua to the accession of Saul. The station and office of these 'rulers of the people,' as the original literally signifies, are involved in great obscurity, partly from the want of clear intimations in the history in which their exploits and government are recorded, and partly from the absence of parallels in the history of other nations, by which our notions might be assisted. They may be briefly described as faithful men, who acted for the most part as agents of the Divine will, regents for the Invisible King of the chosen people; and who, holding their commission directly from him, or with his sanction, would be more inclined to act as dependent vassals of Jehovah than kings, who, as members of royal dynasties, would come to reign with notions of independent rights and

royal privileges, which would draw away their attention from their true place in the theocracy. In this greater dependence of the judges upon the Divine King we see the secret of their institution. The Israelites were disposed to rest upon their separate interests as tribes; and having thus allowed the standing general government to remain inoperative through disuse, they would in cases of emergency have been disposed to forget that Jehovah had taken upon himself the function of their Supreme Ruler, and 'to make themselves a king like the nations,' had their attention not been directed to the appointment of officers whose authority could rest on no tangible right apart from character and services, which, with the temporary nature of their power, rendered their functions more accordant with the principles of the theocracy than those of any other public officers could be. And it is probably in this adaptation to the peculiar circumstances of the Hebrew theocracy that we shall discover the reason of our inability to find any similar office among other nations.

With regard to the nature of the office held by these judges, it is usual to consider them as commencing their career with military exploits to deliver Israel from foreign oppression; but this is by no means invariably the case. Eli and Samuel were not military men; Deborah judged Israel before she planned the war against Jabin; and of Jair, Ibzan, Elio, and Abdon, it is at least uncertain whether they ever held any military command. The command of the army can therefore be scarcely considered the distinguishing characteristic of these men, or military exploits the necessary introduction to the office. In many cases it is true that military achievements were the means by which they elevated themselves to the rank of judges; but in general the appointment may be said to have varied with the exigencies of the times, and with the particular circumstances which in times of trouble would draw the public attention to persons who appeared suited by their gifts or influence to advise in matters of general concernment, to decide in questions arising between tribe and tribe, to administer public affairs, and to appear as their recognised head in their intercourse with their neighbours and oppressors.

In nearly all the instances recorded the appointment seems to have been by the free unsolicited choice of the people. The only cases of direct Divine appointment are those of Gideon and Samson, and the last stood in the peculiar position of having been from before his birth ordained 'to begin to deliver Israel.' Deborah was called to deliver Israel, but was already a judge. Samuel was called by the Lord to be a prophet, but not a judge, which ensued from the high gifts which the people recognised as dwelling in him; and as to Eli, the office of judge seems to have devolved naturally, or rather *ex-officio*, upon him; and his case seems to be the only one in which the high priest appears in the character which the theocratical institutions designed for him.

The following clear summary of their duties and privileges is given by Jahn:—'The office of judges or regents was held during life, but it was not hereditary, neither could they appoint their successors. Their authority was limited by the

law alone; and in doubtful cases they were directed to consult the Divine King through the priest by Urim and Thummim (Num. xxvii. 21). They were not obliged in common cases to ask advice of the ordinary rulers; it was sufficient if these did not remonstrate against the measures of the judge. In important emergencies, however, they convoked a general assembly of the rulers, over which they presided and exerted a powerful influence. They could issue orders, but not enact laws; they could neither levy taxes nor appoint officers, except perhaps in the army. Their authority extended only over those tribes by whom they had been elected or acknowledged; for it is clear that several of the judges presided over separate tribes. There was no income attached to their office, nor was there any income appropriated to them, unless it might be a larger share in the spoils, and those presents which were made them as testimonials of respect (Judg. viii. 24). They bore no external marks of dignity, and maintained no retinue of courtiers, though some of them were very opulent. They were not only simple in their manners, moderate in their desires, and free from avarice and ambition, but noble and magnanimous men, who felt that whatever they did for their country was above all reward, and could not be recompensed, who desired merely to promote the public good, and who chose rather to deserve well of their country than to be enriched by its wealth. This exalted patriotism, like everything else connected with politics in the theocratical state of the Hebrews, was partly of a religious character, and those regents always conducted themselves as the officers of God; in all their enterprises they relied upon Him, and their only care was, that their countrymen should acknowledge the authority of Jehovah, their invisible king (Judg. viii. 22, sq.; comp. Heb. xi.). Still they were not without faults, neither are they so represented by their historians; they relate, on the contrary, with the utmost frankness, the great sins of which some of them were guilty. They were not merely deliverers of the state from a foreign yoke, but destroyers of idolatry, foes of pagan vices, promoters of the knowledge of God, of religion, and of morality; restorers of theocracy in the minds of the Hebrews, and powerful instruments of Divine providence in the promotion of the great design of preserving the Hebrew constitution, and, by that means, of rescuing the true religion from destruction.'

The times of the judges would certainly not be considered so turbulent and barbarous, much less would they be taken, contrary to the clearest evidence and to the analogy of all history, for a heroic age, if they were viewed without the prejudices of a preconceived hypothesis. It must never be forgotten that the book of Judges is by no means a complete history. This no impartial inquirer can ever deny. It is, in a manner, a mere register of diseases, from which, however, we have no right to conclude that there were no healthy men, much less that there were no healthy seasons; since the book itself, for the most part, mentions only a few tribes in which the epidemic prevailed, and notices long periods during which it had universally ceased. Whatever may be the result of more accurate investigation, it remains undeniable that the condition

of the Hebrews during this period perfectly corresponds throughout to the sanctions of the law; and they were always prosperous when they complied with the conditions on which prosperity was promised them; it remains undeniable that the government of God was clearly manifested, not only to the Hebrews, but to their heathen neighbours; that the fulfilling of the promises and threatenings of the law were so many sensible proofs of the universal dominion of the Divine King of the Hebrews; and, consequently, that all the various fortunes of that nation were so many means of preserving the knowledge of God on the earth. The Hebrews had no sufficient reason to desire a change in their constitution; all required was, that they should observe the conditions on which national prosperity was promised them.

The chronology of the period in which the judges ruled is beset with great and perhaps insuperable difficulties. There are intervals of time the extent of which is not specified; as, for instance, that from Joshua's death to the yoke of Chushan-rishathaim (ii. 8); that of the rule of Shamgar (iii. 31); that between Gideon's death and Abimelech's accession (viii. 31, 32); and that of Israel's renewal of idolatry previous to their oppression by the Ammonites (x. 6, 7). Sometimes round numbers seem to have been given, as forty years for the rule of Othniel, forty years for that of Gideon, and forty years also for the duration of the oppression by the Philistines. Twenty years are given for the subjection to Jabin, and twenty years for the government of Samson; yet the latter never completely conquered the Philistines, who, on the contrary, succeeded in capturing him. Some judges, who are commonly considered to have been successive, were in all probability contemporaneous, and ruled over different districts. Under these circumstances, it is impossible to fix the date of each particular event in the book of Judges; but attempts have been made to settle its general chronology, of which we must in this place mention the most successful.

The whole period of the judges, from Joshua to Eli, is usually estimated at 299 years, in order to meet the 480 years which (1 Kings vi. 1) are said to have elapsed from the departure of the Israelites from Egypt to the foundation of the temple by Solomon. But St. Paul says (Acts xiii. 20), 'God gave unto the people of Israel judges about the space of 450 years until Samuel the prophet.' Again, if the number of years specified by the author of our book, in stating facts, is summed up, we have 410 years, exclusive of those years not specified for certain intervals of time above mentioned. In order to reduce these 410 years and upwards to 299, events and reigns must, in computing their years of duration, either be entirely passed over, or, in a most arbitrary way, included in other periods preceeding or subsequent. This has been done by Archbishop Usher, whose system, here peculiarly faulty, has been adopted in the Authorized Version of the Scriptures. He excludes the repeated intervals during which the Hebrews were in subjection to their enemies, and reckons only the years of peace and rest which were assigned to the successive judges. For example, he passes over the eight years of servitude inflicted upon the Hebrews by Chushan-

rishathaim, and, without any interruption, connects the peace obtained by the victories of Othniel with that which had been conferred on the land by the government of Joshua; and although the sacred historian relates in the plainest terms possible that the children of Israel served the king of Mesopotamia eight years, and were afterwards delivered by Othniel, who gave the land rest forty years, the archbishop maintains that the forty years now mentioned began, not after the successes of this judge, but immediately after the demise of Joshua. Nothing certainly can be more obvious than that in this case the years of tranquillity and the years of oppression ought to be reckoned separately. Again, we are informed by the sacred writer, that after the death of Ehud the children of Israel were under the oppression of Jabin king of Hazor for twenty years, and that afterwards, when their deliverance was effected by Deborah and Barak, the land had rest forty years. Nothing can be clearer than this; yet Usher's system leads him to include the twenty years of oppression in the forty of peace, making both but forty years. All this arises from the obligation which Usher unfortunately conceived himself under of following the scheme adopted by the Masoretic Jews, who, as Dr. Hales remarks, have by a curious invention included the four first servitudes in the years of the judges who put an end to them, contrary to the express declarations of Scripture, which represents the administrations of the judges, not as synchronising with the servitudes, but as succeeding them. The Rabbins were indeed forced to allow the fifth servitude to have been distinct from the administration of Jephthah, because it was too long to be included in that administration; but they deducted a year from the Scripture account of the servitude, making it only six instead of seven years. They sank entirely the sixth servitude of forty years under the Philistines, because it was too long to be contained in Samson's administration; and, to crown all, they reduced Saul's reign of forty years to two years only.

The necessity for all these tortuous operations has arisen from a desire to produce a conformity with the date in 1 Kings vi. 1, which, as already cited, gives a period of only 480 years from the Exode to the foundation of Solomon's temple. As this date is incompatible with the sum of the different numbers given in the book of Judges, and as it differs from the computation of Josephus and of all the ancient writers on the subject, whether Jewish or Christian, it is not unsatisfactory to find grounds which leave this text open to much doubt and suspicion. We cannot here enter into any lengthened proof; but that the text did not exist in the Hebrew and Greek copies of the Scripture till nearly three centuries after Christ, is evident from the absence of all reference to it in the works of the learned men who composed histories of the Jews from the materials supplied to them in the sacred books. This might be shown by reference to various authors, who, if the number specified in it had existed, could not fail to have adduced it.

It only remains to arrange the different systems of the chronology of this period so as to exhibit them in one view to the eye of the reader. It has been deemed right, for the better apprehension of the differences, to make the table embrace the

whole period from the exode to the building of Solomon's temple. The *headings* are taken from Hales, simply because, from being the most copious, they can afford a framework within which all the explanations may be inserted.

The authorities for this table are: Josephus, *Antiquities*, v. 1-10; Theophilus, Bp. of Antioch

(A.D. 330), *Epist. ad Antiochum*, iii.; Eusebius (A.D. 330), *Preparatio Evangelica*, x. 14; Usher (1650), *Chronologia Sacra*, p. 71; Jackson (1752), *Chronological Antiquities*, p. 145; Hales (1811), *Analysis of Chronology*, i. 101; Russell (1827), *Connection of Sacred and Profane History*, i. 147.

JUDGES, BOOK OF, the third in the list of the historical compositions of the Old Testament. It consists of two divisions, the first comprising chaps. i.-xvii.; the second, being an appendix, chaps. xviii.-xxi.

That the author, in composing this work, had a certain design in view, is evident from ch. ii. 11-23, where he states the leading features of his narrative. He introduces it by relating (ch. i.) the extent to which the wars against the Canaanites were continued after the death of Joshua, and what tribes had spared them in consideration of a tribute imposed; also by alluding (ch. ii. 1-10) to the benefits which Jehovah had conferred on

them, and the distinguished protection with which he had honoured them. Next he states his leading object, namely, to prove that the calamities to which the Hebrews had been exposed since the death of Joshua were owing to their apostasy from Jehovah, and to their idolatry. 'They forsook the Lord, and served Baal and Ashtaroth' (ch. ii. 13); for which crimes they were deservedly punished and greatly distressed (ch. ii. 15). Nevertheless, when they repented and obeyed again the commandments of the Lord, he delivered them out of the hand of their enemies by the 'judges' whom he raised up, and made them prosper (ch. ii. 16-23). To illustrate this theme, the author

* Samson and Eli are supposed to have been judges simultaneously during 20 years of this period.

† Besides the 20 years under the sixth servitude.

collected several fragments of the Hebrew history during the period between Joshua and Eli. Some episodes occur; but in arguing his subject he never loses sight of his leading theme, to which, on the contrary, he frequently recurs while stating facts, and shows how it applied to them; the moral evidently being, that the only way to happiness was to shun idolatry and obey the commandments of the Lord. The design of the author was not to give a connected and complete history of the Hebrews in the period between Joshua and the kings; for if he had intended a plan of that kind, he would also have described the state of the domestic affairs and of the government in the several tribes, the relation in which they stood to each other, and the extent of power exercised by a judge; he would have further stated the number of tribes over whom a judge ruled, and the number of years during which the tribes were not oppressed by their heathen neighbours, but enjoyed rest and peace. The appendix, containing two narratives—that of Micah with his 'house of gods,' and the brutal outrage committed by the Benjamites of Gibeah, further illustrates the lawlessness and anarchy prevailing in Israel after Joshua's death.

If the first and second divisions had been by the same author, the chronological indications would also have been the same. Now the author of the second division always describes the period of which he speaks thus: 'In those days there was no king in Israel, but every man did that which was right in his own eyes' (ch. xvii. 6; xviii. 1; xix. 1; xxi. 25); but this expression never once occurs in the first division. If one author had composed both divisions, instead of this chronological formula, we should rather have expected, 'In the days of the judges,' 'At a time when there was no judge,' &c., which would be consonant with the tenor of the first sixteen chapters. The style also in the two divisions is different, and it will be shown that the appendix was written much later than the first part. All modern critics, then, agree in this, that the author of the first sixteen chapters of our book is different from him who composed the appendix. The authorship of the first sixteen chapters has been assigned to Joshua, Samuel, and Ezra. There is no evidence, however, in support of any of these opinions, and various conclusive reasons can be assigned to show that they are incorrect.

But though we cannot determine the authorship of the book of Judges, still its age may be determined from internal evidence. The first sixteen chapters must have been written under Saul, whom the Israelites made their king in the hope of improving their condition. Phrases used in the period of the Judges may be traced in them, and the author must consequently have lived near the time when they were yet current. He says that in his time 'the Jebusites dwelt with the children of Benjamin in Jerusalem' (ch. i. 21): now this was the case only before David, who conquered the town and drove out the Jebusites. Consequently, the author of the first division of the book of Judges must have lived and written before David, and under king Saul. If he had lived under David, he would have mentioned the capture of Jerusalem by that monarch, as the nature of his subject did not allow him to pass it over in silence. The omission, moreover, of the history, not only of Samuel but also of Eli, indicates an

author who, living in an age very near that of Eli, considered his history as generally known, because so recent. The exact time when the appendix was added to the book of Judges cannot indeed be determined, but its author certainly lived in an age much later than that of the recorded events.

It was published at a time when the events related were generally known, and when the veracity of the author could be ascertained by a reference to the original documents. Several of its narratives are confirmed by the books of Samuel (comp. Judg. iv. 2; vi. 14; xi., with 1 Sam. xii. 9-12; Judg. ix. 53 with 2 Sam. xi. 21). The Psalms not only allude to the book of Judges (comp. Ps. lxxxiii. 11, with Judg. vii. 25), but copy from it entire verses (comp. Ps. lxxviii. 8, 9; xcvi. 5; with Judg. v. 4, 5). Philo and Josephus knew the book, and made use of it in their own compositions. The New Testament alludes to it in several places (comp. Matt. ii. 13-23 with Judg. xiii. 5; xvi. 17; Acts xiii. 20; Heb. xi. 32). This external evidence in support of the authority of the book of Judges is corroborated by many internal proofs of its authenticity. All its narratives are in character with the age to which they belong, and agree with the natural order of things. We find here that shortly after the death of Joshua the Hebrew nation had, by several victories, gained courage and become valorous (ch. i. and xix.); but that it afterwards turned to agriculture, preferred a quiet life, and allowed the Canaanites to reside in its territory in consideration of a tribute imposed on them, when the original plan was that they should be expelled. This changed their character entirely: they became effeminate and indolent—a result which we find in the case of all nations who, from a nomadic and warlike life, turn to agriculture. The intercourse with their heathen neighbours frequently led the uncultivated Hebrews to idolatry; and this, again, further prepared them for servitude. They were consequently overpowered and oppressed by their heathen neighbours. The first subjugation, indeed, by a king of Mesopotamia, they endured but eight years; but the second, more severe, by Eglon, lasted longer: it was the natural consequence of the public spirit having gradually more and more declined, and of Eglon having removed his residence to Jericho with a view of closely watching all their movements (Joseph. *Antiq.* v. 5). When Ehud sounded the trumpet of revolt, the whole nation no longer rose in arms, but only the inhabitants of Mount Ephraim (ch. iii. 27); and when Barak called to arms against Sisera, many tribes remained quietly with their herds (ch. v. 14, 15, 26, 28). Of the 30,000 men who offered to follow Gideon, he could make use of no more than 300, this small number only being, as it would seem, filled with true patriotism and courage. Thus the people had sunk gradually, and deserved for forty years to bear the yoke of the Philistines, to whom they had the meanness to deliver Samson, who, however, loosed the cords with which he was tied, and killed a large number of them (ch. xv.). It is impossible to consider such an historical work, which perfectly agrees with the natural course of things, as a fiction: at that early period of authorship, no writer could have, from fancy, depicted the character of the Hebrews so conformably with

nature and established facts. All in this book breathes the spirit of the ancient world. Martial law we find in it, as could not but be expected, hard and wild. The conquered people are subjected to rough treatment, as is the case in the wars of all uncivilized people; the inhabitants of cities are destroyed wholesale (ch. viii. 16, 17; xx.). Hospitality and the protection of strangers received as guests is considered the highest virtue (ch. xix.; comp. Gen. xix.).

In the state of oppression in which the Hebrews often found themselves during the period from Joshua to Eli, it was to be expected that men, filled with heroism, should now and then rise up and call the people to arms in order to deliver them from their enemies. Such valiant men are introduced by our author, and he extols them, indeed, highly; but on the other hand he is not silent respecting their faults, which he discloses in a way proper to true history, but impossible to fiction, which could have no other object than the aggrandisement of the national character and exploits. And this frank, impartial tone pervades the whole work. It begins with displaying the Israelites as a refractory and obstinate people, and the appendix ends with the statement of a crime committed by the Benjamites, which had the most disastrous consequences. At the same time due praise is bestowed on acts of generosity and justice, and valiant feats are carefully recorded.

Objections have been made to the authenticity of this book, in consequence of the remarkable exploits ascribed to its heroes. But it will be easy to show that, when properly understood, these exploits do not necessarily exceed the limits of human power. Extraordinary indeed they were; but they are not alleged by the Scripture itself to have been supernatural. Those, however, who do hold them to have been supernatural cannot reasonably take exception to them on the ground of their extraordinary character. Considering the very remote period at which our book was written—considering also the manner of viewing and describing events and persons which prevailed with the ancient Hebrews, and which very much differs from that of our age—taking, moreover, into account the brevity of the narratives, which consist of historical fragments, we may well wonder that there do not occur in it more difficulties, and that not more doubts have been raised as to its historical authority.

JUDGMENT-HALL occurs Matt. xxvii. 27; Mark xv. 16; John xviii. 28, 33; xix. 9; Acts xxiii. 35; Phil. i. 13. In all these passages except one (Mark xv. 16) the English version gives an explanation of the word rather than a translation: thus, Matt. xxvii. 27, 'the common-hall' margin, 'or governor's house'; John xviii. 28, 33, 'the judgment-hall'; margin, 'or Pilate's house'; Philipp. i. 13, 'the palace'; margin, 'or Caesar's court.' Originally the word signified the general's tent in a camp, but it came at length to be applied to the residence of the civil governor in provinces and cities, and was used to signify whatever appertained to the prætor or governor; for instance, his residence, either the whole or any part of it, as his dwelling-house, or the place where he administered justice, or even the large enclosed court at the entrance to the prætorian residence.

Upon comparing the instances in which the

evangelists mention the prætorium, it will be seen, first, that in John xviii. 28, it means the residence of Pilate, which seems to have been the magnificent palace built by Herod, situated in the north part of the upper city, west of the temple, and overlooking the temple. Secondly, the word is applied in the New Testament, by synecdoche, to a particular part of the prætorian residence. Thus, Matt. xxvii. 27, and Mark xv. 16, 'And the soldiers led Jesus away into the hall called Prætorium, and gathered unto them the whole band, and they clothed him with purple,' &c.; where the word rather refers to the court or area in front of the prætorium, or some other court where the procurator's guards were stationed. In John xix. 9, the word seems applied, when all the circumstances are considered, to Pilate's *private examination room*. In like manner, when Felix 'commanded Paul to be kept in Herod's prætorium' (Acts xxiii. 25), the words apply not only to the whole palace originally built at Cæsarea by Herod, and now most likely inhabited by the prætor, but also to the *keep or donjon*, a prison for confining offenders, such as existed in our ancient royal palaces and grand baronial castles. Thirdly, in the remaining instance of the word, Phil. i. 3, 'So that my bonds in Christ are manifest in all the prætorium,' 'palace,' it is, in the opinion of the best commentators, used to signify the *prætorian camp* at Rome, a select body of troops constituted by Augustus to guard his person and to have charge of the city, so that the words of the apostle really mean, 'My bonds in Christ are manifest to all the prætorians, and by their means to the public at large.'

JUDITH, the name of one of the apocryphal or deuterocanonical books of the Old Testament, is placed in manuscripts of the Alexandrine version between the books of Tobit and Esther. In its external form this book bears the character of the record of an historical event, describing the complete defeat of the Assyrians by the Jews through the prowess of a woman.

The following is a sketch of the narrative:—Nebuchadnezzar, or, as he is called in the Greek, Nabuchodonosor, king of the Assyrians, having, in the twelfth year of his reign, conquered and taken Arphaxad, by whom his territory had been invaded, formed the design of subduing the people of Asia to the westward of Nineveh his capital, who had declined to aid him against Arphaxad. With this view he sent his general, Holofernes, at the head of a powerful army, and soon made himself master of Mesopotamia, Syria, Libya, Cilicia, and Idumæa. The inhabitants of the sea-coast made a voluntary submission; which, however, did not prevent their territories from being laid waste, their sacred groves burned, and their idols destroyed, in order that divine honours should be paid only to Nebuchadnezzar. Holofernes, having finally encamped in the plain of Esdraelon (ch. i. 3), remained inactive for a whole month—or two, according to the Latin version. But the Jews, who had not long returned from captivity, and who had just restored their temple and its worship, prepared for war under the direction of their high-priest Joacim, or Eliakim, and the senate. The high-priest addressed letters to the inhabitants of Bethulia and Betomestham, near Esdraelon (ch. iv. 6), charging them to guard the passes of the mountains. The

Jews at the same time kept a fast, and called upon God for protection against their enemies. Holofernes, astonished at their audacity and preparations, inquired of the Moabites and Ammonites who these people were. Achior, the leader of the Ammonites, informed him of the history of the Jews, adding, that if they offended their God he would deliver them into the hands of their enemies, but that otherwise they would be invincible. Holofernes, however, prepares to lay siege to Bethulia, and commences operations by taking the mountain passes, and intercepting the water, in order to compel the inhabitants to surrender. Ozias, the governor of the city, holds out as long as possible; but at the end of thirty-four days' siege, the inhabitants are reduced to that degree of distress from drought, that they are determined to surrender unless relieved within five days. Meantime Judith, a rich and beautiful woman, the widow of Manasseh, forms the patriotic design of delivering the city and the nation. With this view she entreats the governor and elders to give up all idea of surrender, and to permit the gates of the city to be opened for her. Arrayed in rich attire, she proceeds to the camp of Holofernes, attended only by her maid, bearing a bag of provisions. She is admitted into the presence of Holofernes, and informs him that the Jews could not be overcome so long as they remained faithful to God, but that they had now sinned against Him in converting to their own use the tithes, which were sacred to the priests alone; and that she had fled from the city to escape the impending and inevitable destruction which awaited it. She obtains leave to remain in the camp, with the liberty of retiring by night for the purpose of prayer, and promises that at the proper moment she will herself be the guide of Holofernes to the very walls of Jerusalem. Judith is favourably entertained; Holofernes is smitten with her charms, gives her a magnificent entertainment, at which, having drunk too freely, he is shut up with her alone in the tent. Taking advantage of her opportunity, while he is sunk in sleep, she seizes his falchion and strikes off his head. Giving it to her maid, who was outside the tent door, she leaves the camp as usual, under pretence of devotion, and returns to Bethulia, displaying the head of Holofernes. The Israelites, next morning, fall on the Assyrians, who, panic-struck at the loss of their general, are soon discomfited, leaving an immense spoil in the hands of their enemies. The whole concludes with the triumphal song of Judith, who accompanies all the people to Jerusalem to give thanks to the Lord. After this she returns to her native city Bethulia, gives freedom to her maid, and dies at the advanced age of 105 years. The Jews enjoying a profound and happy peace, a yearly festival (according to the Vulgate) is instituted in honour of the victory.

The difficulties, historical, chronological, and geographical, comprised in the narrative of Judith are so numerous and serious as to be held by many divines altogether insuperable. Events, times, and manners are said to be confounded, and the chronology of the times before and those after the exile, of the Persian and Assyrian, and even of the Maccabean period, confusedly and unaccountably blended.

The authorship of the book is as uncertain as its date. It is not named either by Philo or

Josephus; nor have we any indication whatever by which to form a conjecture respecting its author.

The original language is uncertain. Eichhorn and Jahn and Seiler, with whom is Bertholdt, conceive it to have been Greek. Calmet states, on the authority of Origen, that the Jews had the book of Judith in Hebrew in his time. Jerome states that it is written in Chaldee, from which he translated it, with the aid of an interpreter, giving rather the sense than the words.

Although the book of Judith never formed part of the Jewish canon, and finds no place in the ancient catalogues, its authority in the Christian church has been very great.

Along with the other deutero-canonical books, it has been at all times read in the church, and lessons are taken from it in the Church of England in course.

JULIA (a name common among the Romans), a Christian woman of Rome, to whom St. Paul sent his salutations (Rom. xvi. 15); she is named with Philologus, and is supposed to have been his wife or sister.

JULIUS, the centurion who had the charge of conducting Paul as a prisoner to Rome, and who treated him with much consideration and kindness on the way (Acts xxvii. 1, 3).

JUNIUS, a person who is joined with Andronicus in Rom. xvi. 7: 'Salute Andronicus and Junias, my kinsmen and fellow-prisoners, who are of note among the apostles.' They were, doubtless, Jewish Christians.

1. JUSTUS, surnamed Barsabas. [JOSEPH.]
2. JUSTUS, a Christian at Corinth, with whom Paul lodged (Acts xviii. 7).

3. JUSTUS, called also JESUS, a believing Jew, who was with Paul at Rome when he wrote to the Colossians (Col. iv. 11). The apostle names him and Marcus as being at that time his only fellow-labourers.

K.

KADESH, or KADESH-BARNEA, a site on the south-eastern border of the Promised Land towards Edom, of much interest as being the point at which the Israelites twice encamped with the intention of entering Palestine, and from which they were twice sent back; the first time in pursuance of their sentence to wander forty years in the wilderness, and the second time from the refusal of the king of Edom to permit a passage through his territories. It was from Kadesh that the spies entered Palestine by ascending the mountains; and the murmuring Israelites, afterwards attempting to do the same, were driven back by the Amalekites and Canaanites, and afterwards apparently by the king of Arad, as far as Hormah, then called Zephath (Num. xiii. 17; xiv. 40-45; xxi. 1-3; Deut. i. 41-44; comp. Judg. i. 7). There was also at Kadesh a fountain (En-mishpat) mentioned long before the exode of the Israelites (Gen. xiv. 7); and the miraculous supply of water took place only on the second visit, which implies that at the first there was no lack of this necessary article. After this, Moses sent messengers to the king of Edom, informing him that they were in Kadesh, a city

in the uttermost part of his border, and asking leave to pass through his country, so as to continue their course round Moab, and approach Palestine from the east. This Edom refused, and the Israelites accordingly marched to Mount Hor, where Aaron died; and then along the Arabah (desert of Zin) to the Red Sea (Num. xx. 14-29). The name of Kadesh again occurs in describing the southern quarter of Judah, the line defining which is drawn 'from the shore of the Salt Sea, from the bay that looked southward; and it went out to the south side of Ak-rabbim, and passed along to Zin, and ascended up on the south side to Kadesh-barnea' (Josh. xv. 1-3; comp. Num. xxxiv. 3, 4).

From these intimations the map-makers, who found it difficult to reconcile them with the place usually assigned to Kadesh (in the desert about midway between the Mediterranean and Dead Sea), were in the habit of placing a second Kadesh nearer the Dead Sea and the Wady Arabah. But it was shown by Dr. Kitto in the *Pictorial Bible* (Note on Num. xx. 1) that one Kadesh would sufficiently answer all the conditions required, by being placed more to the south, nearer to Mount Hor, on the west border of the Wady Arabah, than this second Kadesh.

According to this view Kadesh was laid down in his map in the same line, and not far from the place which has since been assigned to it from actual observation by Dr. Robinson. This concurrence of different lines of research in the same result is curious and valuable, and the position of Kadesh will be regarded as now scarcely open to dispute. It was clear that the discovery of the fountain in the northern part of the great valley would go far to fix the question. Robinson accordingly discovered a fountain called Ain el-Weibeh, which is even at this day the most frequented watering-place in all the Arabah, and he was struck by the entire adaptedness of the site to the Scriptural account of the proceedings of the Israelites on their second arrival at Kadesh. 'Over against us lay the land of Edom; we were in its uttermost border; and the great Wady el-Ghuweir afforded a direct and easy passage through the mountains to the table-land above, which was directly before us; while further in the south Mount Hor formed a prominent and striking object, at the distance of two good days' journey for such a host' (*Bib. Researches*, ii. 538). Further on (p. 610) he adds: 'There the Israelites would have Mount Hor in the S.E. towering directly before them... in the N.W. rises the mountain by which they attempted to ascend to Palestine, with the pass still called Sufah (Zephath); while further north we find also Tell Arad, marking the site of the ancient Arad. To all this comes then the vicinity of the southern bay of the Dead Sea, the line of cliffs or offset separating the Ghôr from the Arabah, answering to the ascent of Ak-rabbim; and the desert of Zin, with the place of the same name between Ak-rabbim and Kadesh, not improbably at the water of Hasb, in the Arabah. In this way all becomes easy and natural, and the Scriptural account is entirely accordant with the character of the country.'

KADMONITES, one of the nations of Canaan, which is supposed to have dwelt in the north-east part of Palestine, under Mount Hermon, at the

time that Abraham sojourned in the land (Gen. xv. 19). It is supposed that the name denotes 'an eastern people,' and that they were situated to the east of the Jordan, or rather that it was a term applied collectively, like 'Easterns,' or 'Orientals,' to all the people living in the countries beyond that river.

KEDAR (*black*), a son of Ishmael, and the name of the tribe of which he was the founder. The name is sometimes used in Scripture as that of the Bedouins generally, probably because this tribe was the nearest to them, and was best acquainted with them (Cant. i. 5; Isa. xxi. 16, 17; lx. 7). A great deal of speculation founded upon the meaning of the word, namely, 'black,' may be dismissed as wholly useless. The Kedarenes were so called from Kedar, and not because they lived in 'black' tents, or because they were 'blackened' by the hot sun of Southern Arabia; neither of which circumstances could, even if true, have been foreseen at the time that Kedar received his name.

KEDEMOTH, a city in the tribe of Reuben (Josh. xiii. 18), near the river Arnon, which gave its name to the wilderness of Kedemoth, on the borders of that river, from whence Moses sent messengers of peace to Sihon, king of Heshbon (Deut. ii. 26), the southern frontier of whose kingdom, and the boundary between the kingdom of the Ammonites and the Moabites, was the Arnon.

KE'DESH. There were two cities of this name; one in the tribe of Judah (Josh. xv. 23), and the other in the tribe of Naphtali (xix. 37). This last was the more considerable of the two; it was a Levitical city, and one of the six cities of refuge. As the Kedesh whose king was slain by Joshua is mentioned among the cities of the north (xii. 22), it was doubtless the Kedesh of Naphtali, of which also Barak was a native (Judg. iv. 6).

KEDRON. [KIDRON.]

KEILAH, a city of the tribe of Judah (Josh. xv. 44), about twenty miles south-west from Jerusalem. When this city was besieged by the Philistines, David was commissioned by God to relieve it; notwithstanding which, if he had not made his escape, the ungrateful inhabitants would have delivered him into the hands of Saul (1 Sam. xxiii. 1-13). Keilah was a considerable city in the time of Nehemiah (Neh. iii. 17, 18), and existed in the days of Eusebius and Jerome, who place it eight Roman miles from Eleuthero-polis on the road to Hebron.

KEM'UEL (*assembly of God*), third son of Abraham's brother Nahor, and father of six sons, the first of whom is named Aram, and the last Bethuel (Gen. xxii. 21, 23). All these are unknown, except the last, who was the father of Laban and Rebekah (Gen. xxiv. 15).

KENAZ (*hunting*). 1. A descendant of Esau; also a place or tract of country in Arabia Petraea, named after him (Gen. xxxvi. 11, 15, 42).

2. The younger brother of Caleb, and father of Othniel, who married Caleb's daughter (Josh. xv. 17; Judg. i. 13; 1 Chron. iv. 13).

3. A grandson of Caleb (1 Chron. iv. 15).

KENITES, a tribe of Midianites dwelling among the Amalekites (1 Sam. xv. 6; comp. Num. xxiv. 20, 21), or occupying in semi-no-

madic life the same region with the latter people in Arabia Petraea. When Saul was sent to destroy the Amalekites, the Kenites, who had joined them, perhaps upon compulsion, were ordered to depart from them that they might not share their fate; and the reason assigned was, that they 'shewed kindness to the children of Israel when they came out of Egypt.' This kindness is supposed to have been that which Jethro and his family showed to Moses, as well as to the Israelites themselves, in consequence of which the whole tribe appears to have been treated with consideration, while the family of Jethro itself accompanied the Israelites into Palestine, where they continued to lead a nomadic life, occupying there a position similar to that of the Tartar tribes in Persia at the present day. To this family belonged Heber, the husband of that Jael who slew Sisera, and who is hence called 'Heber the Kenite' (Judg. iv. 11). At a later age other families of Kenites are mentioned as resident in Palestine, among whom were the Rechabites (1 Chron. ii. 55; Jer. xxxv. 2); but it is not clear whether these were subdivisions of the increasing descendants of Jethro, as seems most likely, or families which availed themselves of the friendly dispositions of the Israelites towards the tribe to settle in the country. It appears that, whatever was the general condition of the Midianites, the tribe of the Kenites possessed a knowledge of the true God in the time of Jethro (Hoban); and that those families which settled in Palestine did not afterwards lose that knowledge, but increased it, as clear from the passages which have been cited [MIDIANITES; RECHABITES].

KEN'IZZITES, a Canaanitish tribe, mentioned in Gen. xv. 19, along with others, over which it was promised that the seed of Abraham should have dominion. The notion that they sprung from Kenaz, the grandson of Edom, and had their dwelling somewhere in Idumaea, cannot be entertained, seeing that the tribe is named long before Kenaz had existence. The Kenizzites of Num. xxxii. 12; Josh. xiv. 6, appear, however, to be a different race, the origin of which may without improbability be ascribed to Kenaz. The Kenizzites are not named among the nations whom the Israelites eventually subdued; whence it may be supposed that they had by that time merged into some of the other nations which Israel overcame.

KETU'RAH (*incense*), the second wife, or, as she is called in 1 Chron. i. 32, the concubine of Abraham, by whom he had six sons, Zimran, Jokshan, Medan, Midian, Ishbak, and Shuah, whom he lived to see grow to man's estate, and whom he established 'in the East country,' that they might not interfere with Isaac (Gen. xxv. 1-6). As Abraham was 100 years old when Isaac was born, who was given to him by the special bounty of Providence when 'he was as good as dead' (Heb. xi. 12), as he was 140 years old when Sarah died; and as he himself died at the age of 175 years, it has seemed improbable that these six sons should have been born to Abraham by one woman after he was 140 years old, and that he should have seen them all grow up to adult age, and have sent them forth to form independent settlements in that last and feeble period of his life. If Isaac was born to him out of the course of nature when he was 100 years old, how

could six sons be born to him in the course of nature after he was 140? It has therefore been suggested by good commentators, that as Keturah is called Abraham's 'concubine' in Chronicles, and as she and Hagar are probably indicated as his 'concubines' in Gen. xxv. 6, Keturah had in fact been taken by Abraham as his secondary or concubine-wife before the death of Sarah, although the historian relates the incident after that event, that his leading narrative might not be interrupted. According to the standard of morality then acknowledged, Abraham might quite as properly have taken Keturah before as after Sarah's death; nor can any reason why he should not have done so, or why he should have waited till then, be conceived. This explanation obviates many difficulties, and does not itself contain any.

KIB'ROTH-HATTA'AVAH, an encampment of the Israelites in the wilderness [WANDERING].

KIDRON (*the turbid*), the brook or winter torrent which flows through the valley of Jehoshaphat (as it is now called), on the east side of Jerusalem. 'The brook Kidron' is the only name by which 'the valley' itself is known in Scripture; for it is by no means certain, nor even probable, that the name 'valley of Jehoshaphat' in Joel (iii. 12) was intended to apply to this valley. The word rendered 'brook' (2 Sam. xv. 23; 1 Kings ii. 37, &c.), may be taken as equivalent to the Arabic *Wady*, meaning a stream and its bed or valley, or properly the valley of a stream, even when the stream is dry. The Septuagint, Josephus, and the Evangelists (John xviii. 1), designate it a storm brook, or winter torrent.

The brook Kidron derives all its importance from its vicinity to the holy city, being nothing more than the dry bed of a winter torrent, bearing marks of being occasionally swept over by a large volume of water. No stream flows through it, except during the heavy rains of winter, when the waters descend into it from the neighbouring hills. But even in winter there is no constant flow, and the resident missionaries assured Dr. Robinson that they had not during several years seen a stream running through the valley. The ravine in which the stream is collected takes its origin above a mile to the north-east of the city. This ravine deepens as it proceeds, and forms an angle opposite the temple. It then takes a south-east direction, and, passing between the village of Siloam and the city, runs off in the direction of the Dead Sea, through a singularly wild gorge, the course of which few travellers have traced. It is in this ravine that the celebrated monastery of Santa Saba is situated. Dr. Madden, who went through the valley to the Dead Sea, thus speaks of the character which it assumes as it approaches the monastery:—'After traversing for the last hour a wild ravine, formed by two rugged perpendicular mountains, the sides of which contained innumerable caverns, which once formed a sort of troglodyte city, in which the early Christians resided, the sight of the convent in this desolate place was like a glimpse of paradise.' On leaving the convent the next day he says that he 'marched through the bed of the Kidron, along the horrible ravine which he entered the day before;' but he gives no account of its outlet into the Dead Sea. This defect is

supplied by Dr. Robinson, who, on passing along the western borders of the lake, came 'to the deep and almost impassable ravine of the Kidron, running down by Mar Saba, and thence called Wady-er-Rahib, "Monk's Valley;" but here also bearing the name of Wady en-Nar, "Fire Valley." At this place it was running N. S. E., in a deep narrow channel, between perpendicular walls of rock, as if worn away by the rushing waters between these desolate chalky hills. There was, however, no water in it now; nor had there apparently been any for a long time.'

KING, a title applied in the Scriptures to men (Luke xxii. 25; 1 Tim. ii. 1, 2; 1 Pet. ii. 13-17), to God (1 Tim. i. 17; vi. 15, 16), and to Christ (Matt. xxvii. 11; Luke xix. 38; John i. 49; vi. 15; xviii. 32-37)—to men, as invested with regal authority by their fellows; to God, as the sole proper sovereign and ruler of the universe; and to Christ, as the Messiah, the Son of God, the King of the Jews, the sole Head and Governor of his church.

Regal authority was altogether alien to the institutions of Moses in their original and unadulterated form. Their fundamental idea was that Jehovah was the sole king of the nation (1 Sam. vii. 7): to use the emphatic words in Isa. xxxiii. 22, 'The Lord is our judge, the Lord is our lawgiver, the Lord is our king.' We consider it as a sign of that self-confidence and moral enterprise which are produced in great men by a consciousness of being what they profess, that Moses ventured, with his half-civilized hordes, on the bold experiment of founding a society without a king, and that in the solicitude which he must have felt for the success of his great undertaking, he forewent the advantages which a regal government would have afforded. Nor is such an attempt a little singular and novel at a period and in a part of the world in which royalty was not only general, but held in the greatest respect, and sometimes rose to the very height of pure despotism. Its novelty is an evidence of the divine original to which Moses referred all his polity. Equally honourable is the conduct of Moses in denying to his lower nature the gratification which a crown might have imparted, and it is obvious that this self-denial on the part of Moses, this omission to create any human kingship, is in entire accordance with the import, aim, and spirit of the Mosaic institutions, as being divine in their origin, and designed to accomplish a special work of Providence for man; and, therefore, affords, by its consistency with the very essence of the system of which it forms a part, a very forcible argument in favour of the divine legation of Moses.

That great man, however, well knew what were the elements with which he had to deal in framing institutions for the rescued Israelites. Slaves they had been, and the spirit of slavery was not yet wholly eradicated from their souls. They had, too, witnessed in Egypt the more than ordinary pomp and splendour which environ a throne, dazzling the eyes and captivating the heart of the uncultured. Not improbably the prosperity and abundance which they had seen in Egypt, and in which they had been, in a measure, allowed to partake, might have been ascribed by them to the regal form of the Egyptian government. Moses may well, therefore, have apprehended a

not very remote departure from the fundamental type of his institutions. Accordingly he makes a special provision for this contingency (Deut. xvii. 14), and labours, by anticipation, to guard against the abuses of royal power. Should a king be demanded by the people, then he was to be a native Israelite; he was not to be drawn away by the love of show, especially by a desire for that regal display in which horses have always borne so large a part, to send down to Egypt, still less to cause the people to return to that land; he was to avoid the corrupting influence of a large harem, so common among Eastern monarchs; he was to abstain from amassing silver and gold; he was to have a copy of the law made expressly for his own study—a study which he was never to intermit till the end of his days; so that his heart might not be lifted up above his brethren, that he might not be turned aside from the living God, but observing the divine statutes, and thus acknowledging himself to be no more than the vicegerent of heaven, he might enjoy happiness, and transmit his authority to his descendants.

The Jewish polity, then, was a sort of sacerdotal republic—we say sacerdotal, because of the great influence which, from the first, the priestly order enjoyed, having no human head, but being under the special supervision, protection, and guidance of the Almighty. The nature of the consequences, however, of that divine influence avowedly depended on the degree of obedience and the general faithfulness of the nation. The good, therefore, of such a superintendence in its immediate results was not necessary, but contingent. The removal of Moses and of Joshua by death soon left the people to the natural results of their own condition and character. Anarchy ensued. Noble minds, indeed, and stout hearts appeared in those who were termed Judges; but the state of the country was not so satisfactory as to prevent an unenlightened people, having law and gross affections, from preferring the glare of a crown and the apparent protection of a sceptre, to the invisible and, therefore, mostly unrecognised arm of omnipotence. A king accordingly was requested. The misconduct of Samuel's sons, who had been made judges, was the immediate occasion of the demand being put forth. The request came with authority, for it emanated from all the elders of Israel, who, after holding a formal conference, proceeded to Samuel, in order to make him acquainted with their wish. Samuel was displeased; but, having sought in prayer to learn the divine will, he is instructed to yield to the demand on a ground which we should not assuredly have found stated, had the book in which it appears been tampered with or fabricated for any courtly purposes or any personal ends, whether by Samuel himself, or by David, or any of his successors—for they have not rejected thee (Samuel), but they have rejected me, that I should not reign over them' (ver. 7, see also ver. 8). Samuel was, moreover, directed to 'protest solemnly unto them, and show them the manner of the king that shall reign over them.' Faithfully did the prophet depict the evils which a monarchy would inflict on the people. In vain: they said, 'Nay, but we will have a king over us.' Accordingly, Saul the son of Kish, of the tribe of Benjamin, was, by divine direction, selected, and privately anointed by Samuel 'to be captain over God's inheritance.'

thus he was to hold only a delegated and subordinate authority. Under the guidance of Samuel, Saul was subsequently chosen by lot from among the assembled tribes; and though his personal appearance had no influence in the choice, yet when he was plainly pointed out to be the individual designed for the sceptre, Samuel called attention to those qualities which in less civilized nations have a preponderating influence, and are never without effect, at least, in supporting 'the divinity which doth hedge a king': 'See ye him whom the Lord hath chosen, that there is none like him among all the people,' for he was higher than any of the people from his shoulders and upward; 'and all the people shouted, God save the king.'

Emanating as the royal power did from the demand of the people and the permission of a prophet, it was not likely to be unlimited in its extent or arbitrary in its exercise. The government of God, indeed, remained, being rather concealed and complicated than disowned, much less superseded. The king ruled not in his own right, nor in virtue of the choice of the people, but by concession from on high, and partly as the servant and partly as the representative of the theocracy. How insecure, indeed, was the tenure of the kingly power, how restricted it was in its authority, appears clear from the comparative facility with which the crown was transferred from Saul to David; and the part which the prophet Samuel took in effecting that transference points out the quarter where lay the power which limited, if it did not primarily, at least, control the royal authority. We must not, however, expect to find any definite and permanent distribution of power, any legal determination of the royal prerogatives as discriminated from the divine authority; circumstances, as they prompted certain deeds, restricted or enlarged the sphere of the monarch's action. Thus, in 1 Sam. xi. 4, sq., we find Saul, in an emergency, assuming, without consultation or deliberation, the power of demanding something like a levy *en masse*, and of proclaiming instant war. With the king lay the administration of justice in the last resort (2 Sam. xv. 2; 1 Kings iii. 16, sq.). He also possessed the power of life and death (2 Sam. xiv.). To provide for and superintend the public worship was at once his duty and his highest honour (1 Kings viii.; 2 Kings xii. 4; xviii. 4; xxiii. 1). One reason why the people requested a king was, that they might have a recognised leader in war (1 Sam. viii. 20). The Mosaic law offered a powerful hindrance to royal despotism (1 Sam. x. 25). The people also, by means of their elders, formed an express compact, by which they stipulated for their rights (1 Kings xii. 4), and were from time to time appealed to, generally in cases of 'great pith and moment' (1 Chron. xxix. 1; 2 Kings xi. 17.) Nor did the people fail to interpose their will, where they thought it necessary, in opposition to that of the monarch (1 Sam. xiv. 45). The part which Nathan took against David shows how effective, as well as bold, was the check exerted by the prophets; indeed, most of the prophetic history is the history of the noblest opposition ever made to the vices alike of royalty, priesthood, and people. When needful, the prophet hesitated not to demand an audience of the king, nor was he dazzled or deterred by royal power

and pomp (1 Kings xx. 22, 38; 2 Kings i. 15). As, however, the monarch held the sword, the instrument of death was sometimes made to prevail over every restraining influence (1 Sam. xxii. 17).

After the transfer of the crown from Saul to David, the royal power was annexed to the house of the latter, passing from father to son, with preference to the eldest born, though he might be a minor. Jehoash was seven years old when he began to reign (2 Kings xi. 21). This rule was not, however, rigidly observed, for instances are not wanting in which nomination of a younger son gave him a preferable title to the crown (1 Kings i. 17; 2 Chron. xi. 21): the people, too, and even foreign powers, at a later period, interrupted the regular transmission of royal authority (2 Kings xxi. 24; xxii. 24, 30; xxiv. 17). The ceremony of anointing, which was observed at least in the case of Saul, David, and Solomon (1 Sam. ix. 14; x. 1; xv. 1; xvi. 12; 2 Sam. ii. 4; v. 1; 1 Kings i. 34; xxxix. 5), and in which the prophet or high-priest who performed the rite acted as the representative of the theocracy and the expounder of the will of heaven, must have given to the spiritual power very considerable influence. Indeed, the ceremony seems to have been essential to constitute a legitimate monarch (2 Kings xi. 12; xxiii. 30); and thus the authorities of the Jewish church held in their hands, and had subject to their will, a most important power, which they could use either for their own purposes or the common good. We have seen in the case of Saul that personal and even external qualities had their influence in procuring ready obedience to a sovereign; and further evidence to the same effect may be found in Ps. xlv. 3; Ezek. xxviii. 12: such qualities would naturally excite the enthusiasm of the people, who appear to have manifested their approval by acclamations (1 Sam. x. 24; 1 Kings i. 25; 2 Kings ix. 13; xi. 13; 2 Chron. xxiii. 11). Jubilant music formed a part of the popular rejoicings (1 Kings i. 40); thank-offerings were made (1 Kings i. 25); the new sovereign rode in solemn procession on the royal mule of his predecessor (1 Kings i. 38), and took possession of the royal harem—an act which seems to have been scarcely less essential than other observances which appear to us to wear a higher character (1 Kings ii. 13, 22; 2 Sam. xvi. 22). A numerous harem, indeed, was among the most highly estimated of the royal luxuries (2 Sam. v. 13; 1 Kings xi. 1; xx. 3). It was under the supervision and control of eunuchs, and passed from one monarch to another as a part of the crown-property (2 Sam. xii. 8). The law (Deut. xvii. 17), foreseeing evils such as that by which Solomon, in his later years, was turned away from his fidelity to God, had strictly forbidden many wives; but Eastern passions and usages were too strong for a mere written prohibition, and a corrupted religion became a pander to royal lust, interpreting the divine command as sanctioning eighteen as the minimum of wives and concubines. In the original distribution of the land no share, of course, was reserved for a merely possible monarch; yet the kings were not without several sources of income. In the earlier periods of the monarchy the simple manners which prevailed would render copious revenues unnecessary; and a throne

which was the result of a spontaneous demand on the part of the people, would easily find support in free-will offerings, especially in a part of the world where the great are never approached without a present. There seems also reason to conclude that the amount of the contributions made by the people for the sustenance of the monarch depended, in a measure, on the degree of popularity which, in any particular case, he enjoyed, or the degree of service which he obviously rendered to the state (1 Sam. x. 27; xvi. 20; 2 Sam. viii. 11; 1 Kings x. 11, 25, sq.). That presents of small value and humble nature were not despised or thought unfit for the acceptance of royalty, may be learnt from that which Jesse sent to Saul (1 Sam. xvi. 20), 'an ass, with bread and a bottle of wine, and a kid.' The indirect detail 'of the substance which was king David's,' found in 1 Chron. xxvii. 25, sq. (comp. 1 Sam. viii. 14; 2 Chron. xxvi. 10, sq.), shows at how early a period the Israelitish throne was in possession of very large property, both personal and real. The royal treasury was replenished by confiscation, as in the case of Naboth (1 Kings xxi. 16; comp. Ezek. xvi. 16, sq.; 2 Sam. xvi. 4). Nor were taxes unknown. Samuel had predicted (1 Sam. viii. 15), 'He will take the tenth of your seed and of your vineyards,' &c.; and so in other passages (1 Kings v. 13; ix. 21) we find that levies both of men and money were made for the monarch's purposes; and, in cases of special need, these exactions were large and rigorously levied (2 Kings xxiii. 35), as when Jehoiakim 'taxed the land to give the money according to the commandment of Pharaoh; he exacted the silver and the gold of the people of the land, of every one according to his taxation.' So long, however, as the native vigor of a young monarchy made victory easy and frequent, large revenues came to the king from the spoils of war (2 Sam. viii. 2, sq.). Commerce also then supplied abundant resources (1 Kings x. 15).

According to Oriental custom, much ceremony and outward show of respect were observed. Those who were intended to be received with special honour were placed on the king's right hand (1 Kings ii. 19). The most profound homage was paid to the monarch, which was required not merely by common usage, but by the voice of religious wisdom (Prov. xxiv. 21)—a requirement which was not unnatural in regard to an office that was accounted of divine origin, and to have a sort of vice-divine authority. Those who presented themselves before the royal presence fell with their face towards the ground till their forehead touched it (1 Sam. xxv. 23; 2 Sam. ix. 6; xix. 18), thus worshipping or doing obeisance to the monarch, a ceremony from which even the royal spouse was not exempted (1 Kings i. 16). A kiss was among the established tokens of reverence (1 Sam. x. 1; Ps. ii. 12), as were also hyperbolic wishes of good (Dan. ii. 4; iii. 9). Serious offences against the king were punished with death (1 Kings xxi. 10).

Deriving their power originally from the wishes of the people, and being one of the same race, the Hebrew kings were naturally less despotic than other Oriental sovereigns, mingled more with their subjects, and were by no means difficult of access (2 Sam. xix. 8; 1 Kings xx. 39; Jer. xxxvii. 7; 1 Kings iii. 16; 2 Kings vi. 26; viii. 3). After

death the monarchs were interred in the royal cemetery in Jerusalem: 'So David slept with his fathers, and was buried in the city of David' (1 Kings ii. 10; xi. 43; xiv. 31). But bad kings were excluded 'from the sepulchres of the kings of Israel' (2 Chron. xxvii. 27). In 1 Kings iv. will be found an enumeration of the high officers of state under the reign of Solomon (see also 1 Kings x. 5; xii. 18; xviii. 3; 2 Kings viii. 16; x. 22; xviii. 18; xix. 2; 1 Chron. xxvii. 25; Isa. xxii. 15; Jer. lii. 25). The misdeeds of the Jewish crown, and the boldness with which they were reproved, may be seen exemplified in Jer. xxii.: 'Thus saith the Lord, Execute judgment and righteousness, and do no wrong; do no violence to the stranger, the fatherless, nor the widow; neither shed innocent blood. But if ye will not hear these words, this house shall become a desolation,' &c.

KINGS, BOOKS OF. The two books of Kings formed anciently but one book in the Jewish Scriptures. But great stress cannot always be laid on the Jewish forms of the sacred books, as they were arranged so as to correspond with the letters of the Hebrew alphabet.

The books of Kings contain the brief annals of a long period, from the accession of Solomon till the dissolution of the commonwealth. The first chapters describe the reign of Solomon over the united kingdom, and the revolt under Rehoboam. The history of the rival states is next narrated in parallel sections till the period of Israel's downfall on the invasion of Shalmanezar. Then the remaining years of the principality of Judah are recorded till the conquest of Nebuchadnezzar and the commencement of the Babylonish captivity. In the article ISRAEL, the period comprised has been exhibited under the name and reign of the kings who are mentioned in these books, and there also, and in the article JUDAH, the chronology of the books has been sufficiently considered.

There are some peculiarities in this succinct history worthy of attention. It is very brief, but very suggestive. It is not a biography of the sovereigns, nor a mere record of political occurrences, nor yet an ecclesiastical register. King, church, and state are all comprised in their sacred relations. It is a theocratic history, a retrospective survey of the kingdoms as existing under a theocratic government. The character of the sovereign is tested by his fidelity to the religious obligations of his office, and this decision in reference to his conduct is generally added to the notice of his accession. The new king's religious character is commonly portrayed by its similarity or opposition to the way of David, of his father, or of Jeroboam, son of Nebat, 'who made Israel to sin.' Ecclesiastical affairs are noticed with a similar purpose, and in contrast with past or prevalent apostasy, especially as manifested in the popular superstitions, whose shrines were on the 'high places.' Political or national incidents are introduced in general for the sake of illustrating the influence of religion on civic prosperity; of showing how the theocracy maintained a vigilant and vengeful guardianship over its rights and privileges—adherence to its principles securing peace and plenty, disobedience to them bringing along with it sudden and severe retribution. The books of Kings are a verification of the Mosaic warnings, and the author of them has

kept this steadily in view. He has given a brief history of his people, arranged under the various political chiefs in such a manner as to show that the government was essentially theocratic, that its spirit, as developed in the Mosaic writings, was never extinct, however modified or inactive it might sometimes appear.

Thus the books of Kings appear in a religious costume, quite different from the form they would have assumed either as a political or ecclesiastical narrative. In the one case legislative enactments, royal edicts, popular movements, would have occupied a prominent place; in the other, sacerdotal arrangements, Levitical service, music and pageantry, would have filled the leading sections of the treatise. In either view the points adduced would have had a restricted reference to the palace or the temple, the sovereign or the pontiff, the court or the priesthood, the throne or the altar, the tribute or tithes, the nation on its farms, or the tribes in the courts of the sacred edifice. But the theocracy conjoined both the political and religious elements, and the inspired annalist unites them as essential to his design. The agency of divinity is constantly recognised, the hand of Jehovah is continually acknowledged. The chief organ of theocratic influence enjoys peculiar prominence. We refer to the incessant agency of the prophets, their great power and peculiar modes of action as detailed by the composer of the books of Kings. They interfered with the succession, and their instrumentality was apparent in the schism. They roused the people, and they braved the sovereign. The balance of power was in their hands; the regal dignity seemed to be sometimes at their disposal. In times of emergency they dispensed with usual modes of procedure, and assumed an authority with which no subject in an ordinary state can safely be intrusted, executing the law with a summary promptness which rendered opposition impossible, or at least unavailing. They felt their divine commission, and that they were the custodians of the rights of Jehovah, while at the same time they protected the interests of the nation. The divine prerogative was to them a vested right, guarded with a sacred jealousy from royal usurpation or popular invasion; and the interests of the people were as religiously protected against encroachments, too easily made under a form of government which had not the safeguard of popular representation or aristocratic privilege. The priesthood was in many instances, though there are some illustrious exceptions, merely the creature of the crown, and therefore it became the duty of the prophets to assert its dignity and stand forth in the majestic insignia of an embassy from heaven.

The truth of these sentiments as to the method, design, and composition of the books of Kings, is confirmed by ample evidence.

1. Large space is occupied by the building of the temple—the palace of the Divine Protector—his throne in it being above the mercy-seat and between the cherubim (ch. v.-viii.). Care is taken to record the miraculous phenomenon of the descent of the Shekinah (ch. viii. 10). The prayer of Solomon at the dedication of the house is full of theocratic views and aspirations.

2. Reference is often made to the Mosaic Law with its provisions; and allusions to the earlier

history of the people frequently occur (1 Kings ii. 3; iii. 14; vi. 11, 12; viii. 58, &c.; 2 Kings x. 31; xiv. 6; xvii. 13, 15, 37; xviii. 4-6; xxi. 1-8). Allusions to the Mosaic code are found more frequently toward the end of the second book, when the kingdom was drawing near its termination, as if to account for its decay and approaching fate.

3. Phrases expressive of Divine interference are frequently introduced (1 Kings xi. 31; xii. 15; xiii. 1, 2, 9; and xx. 13, &c.).

4. Prophetic interposition is a very prominent theme of record. It fills the vivid foreground of the historical picture. Nathan was occupied in the succession of Solomon (1 Kings i. 45); Ahijah was concerned in the revolt (xi. 29-40). Shemaiah disbanded the troops which Rehoboam had mustered (xii. 21). Ahijah predicted the ruin of Jeroboam, whose elevation he had promoted (xiv. 7). Jehu, the prophet, doomed the house of Baasha (xvi. 1). The reign of Ahab and Ahaziah is marked by the bold, rapid, mysterious movements of Elijah. Under Ahab occurs the prediction of Micaiah (xxii. 8). The actions and oracles of Elisha form the marvellous topics of narration under several reigns. The agency of Isaiah is also recognised (2 Kings xix. 20; xx. 16). Besides, 1 Kings xiii. presents another instance of prophetic operation; and in xx. 35 the oracle of an unknown prophet is also rehearsed. Huldah, the prophetess, was an important personage under the government of Josiah (2 Kings xxii. 14). Care is also taken to report the fulfilment of striking prophecies, in the usual phrase, 'according to the word of the Lord' (1 Kings xii. 15; xv. 29; xvi. 12; 2 Kings xxiii. 15-18; ix. 36; xxiv. 2). So, too, the Old Syriac version prefixes, 'Here follows the book of the kings who flourished among the ancient people; and in this is also exhibited the history of the prophets who flourished during their times.'

5. Theocratic influence is recognised both in the deposition and succession of kings (1 Kings xiii. 33; xv. 4, 5, 29, 30; 2 Kings xi. 17, &c.). It is thus apparent that the object of the author of the Books of Kings was to describe the history of the kingdoms, especially in connection with the theocratic element.

The authorship and age of this historical treatise may admit of several suppositions. Whatever were the original sources, the books are evidently the composition of one writer. The style is generally uniform throughout. The same forms of expression are used to denote the same thing, e.g. the male sex (1 Kings xiv. 10, &c.); the death of a king (1 Kings xi. 43, &c.); modes of allusion to the law (1 Kings xi. 13); fidelity to Jehovah (1 Kings viii. 63, &c.). Similar idioms are ever recurring, so as to produce a uniformity of style. The sources whence this historic information has been derived have been variously named. That annals contemporary with the events which they describe were written in the early period of the Jewish state, may be at once admitted. Eichhorn supposes that the sources of 'Kings' were private historical works. Bertholdt, Hävernick, and Mövers hold that the books are extracts from the public annals. The inspired historiographer refers his readers to these sources of evidence in such fre-

quent phrases as 'the rest of the acts.' Such a reference is made especially to the sources, when other royal acts than those narrated in the books of Kings are glanced at. These sources are styled the book of the Chronicles of the kings of Judah or Israel. Similar phraseology is used in Esther x. 2; vi. 1, to denote the official annals of the Persian empire. Public documents are spoken of in the same way (Neh. xii. 23). There is little reason to suppose that the book referred to in this last passage is that styled Chronicles in our copy of the Scriptures. So we infer that the 'Book of the Chronicles of the Kings' so often alluded to, was an authentic document, public and official. Once indeed mention is made of a work entitled 'The Book of the Acts of Solomon.'

That the prophets themselves were employed in recording contemporaneous events is evident from 2 Chron. xx. 34; 1 Chron. xxix. 29. In the course of the narrative we meet with many instances of description, having the freshness and form of nature, and which are apparently direct quotations from some journal, written by one who testified what he had seen (1 Kings xx. 10; 2 Kings xii. 15; xiv. 8). Thus the credibility of the history contained in these books rests upon a sure foundation.

Now, the compiler from these old documents — he who shaped them into the form they have in our present books of Kings — must have lived in a late age. The Second Book of Kings concludes with an account of the liberation of Jehoiachin, king of Judah, from prison in Babylon — an event which, according to Jahn, happened in the twenty-sixth, or, according to Prideaux, in the twenty-eighth year after the destruction of Jerusalem. Jahn and Hävernick place the composition of 'Kings' in the reign of Evil-merodach; and De Wette, towards the end of the Captivity. Jewish tradition makes Jeremiah the author. Calmet ascribes the authorship to Ezra. The former opinion, adopted by Grotius, and lately reinvigorated by Hävernick, certainly appears the more probable. It explains the close similarity of the books of Kings and Jeremiah in spirit, style, and tendency, more easily and more satisfactorily than any other conjecture of like nature. The age of the book of Kings may be intermediate between the early work of Samuel and the later treatise of Chronicles.

KIR, a people and country subject to the Assyrian empire, to which the conquered Damascus were transplanted (2 Kings xvi. 9; Isa. xxii. 6; Amos i. 5, and whither also the Arameans in the east of Syria once wandered (Amos ix. 7). This is supposed by Major Rennel to be the same country which still bears the name of *Kurdistan* or *Koordistan*. There are, however, objections to this view, which do not apply so strongly to the notion of Rosenmüller and others, that it was a tract on the river Cyrus, or rather *Kuro*, in *Zend Koro*, which rises in the mountains between the Euxine and Caspian Seas, and runs into the latter after being joined by the *Araxes*. *Gurjistan*, or *Grusia* (*Grusiana*), commonly called *Georgia*, seems also to have derived its name from this river *Kur*, which flows through it.

KIR-HARESH; KIR-HARESETH; KIR-HERES.
(KIR-MOAB.)

KIRJATH. This word means *town* or *city*, and is much used in the formation of names of places, like our own *towns*. The following are the principal places distinguished by this term:—

1. KIRJATHIA'IM (*double town*), one of the most ancient towns in the country east of the Jordan, as it was possessed by the gigantic Enim (Gen. xiv. 5), who were expelled by the Moabites (Deut. ii. 9, 10), who in their turn were dispossessed by the Amorites, from whom it was taken by the Israelites. Kir-jathaim was then assigned to Reuben (Num. xxxii. 37; Josh. xiii. 19). But during the Assyrian exile the Moabites again took possession of this and other towns (Jer. xlviii. 1-23; Ezek. xxv. 9). Eusebius places it about half an hour west of the ruins of Medeba. There was another place of this name in the tribe of Naphtali (1 Chron. vi. 76).

2. KIRJATH-ARBA, the ancient name of Hebron, but still in use in the time of Nehemiah (vi. 26) (Hemmon).

3. KIRJATH-BAAL (*city of Baal*). This city is more usually called KIRJATH-JEARIM.

4. KIRJATH-HU'ZOTH (*city of streets*), a town in Moab (Num. xxii. 39).

5. KIRJATH-JEARIM (*city of forests*), one of the towns of the Gibeonites (Josh. ix. 17). It was to this place that the ark was brought from Bethshemesh, after it had been removed from the land of the Philistines, and where it remained till removed to Jerusalem by David (1 Sam. vii.; 1 Chron. xiii.). This was one of the ancient sites which were again inhabited after the exile (Ezra ii. 25; Neh. vii. 29). Eusebius and Jerome speak of it as being in their day a village nine or ten miles from Diospolis (Lydda), on the road to Jerusalem. Dr. Robinson thinks it possible that the ancient Kirjath-jearim may be recognised in the present Kuryet-el-Eaab. The close correspondence of name and position seems to warrant this conclusion. This place is that which ecclesiastical tradition has identified with the Anathoth of Jeremiah, which Dr. Robinson refers to Anata [ANATHOTH]. It is now a poor village, its principal buildings being an old convent of the Minorites, and a Latin church. The latter is now deserted, but not in ruins, and is said to be one of the largest and most solidly constructed churches in Palestine (Robinson, ii. 109; 334-337).

6. KIRJATH-SAN'NAH (*city of palms*; Josh. xv. 49), otherwise KIRJATH-SEPHER (*city of the book*), a city of the tribe of Judah, called also DEBIR, which see (Josh. xv. 15, 16; Judg. i. 11, 12).

KIR-MO'AB ('the wall, stronghold, or citadel of Moab'), Isa. xv. 1; called also KIR-HARESETH and KIR-HERES (*brick-fortress*; Isa. xvi. 7, 11; Jer. xlviii. 31), a fortified city in the territory of Moab. Joram king of Israel took the city, and destroyed it, except the walls; but it appears from the passages here cited that it must have been rebuilt before the time of Isaiah. Atulf-da describes Karak as a small town, with a castle on a high hill, and remarks that it is so strong that one must deny himself even the wish to take it by force. In the time of the Crusades, and when in possession of the Franks, it was invested by Saladin; but after lying before it a month he was compelled to raise the siege. The first person who visited the place in modern times was Scot-

sen, who says, 'Karak, formerly a city and bishop's see, lies on the top of the hill near the end of a deep valley, and is surrounded on all sides with lofty mountains. The hill is very steep, and in many places the sides are quite perpendicular. The walls round the town are for the most part destroyed, and Karak can at present boast of little more than being a small country town. The castle, which is uninhabited, and in a state of great decay, was formerly one of the strongest in these countries. The inhabitants of the town consist of Mohammedans and Greek Christians. The present bishop of Karak resides at Jerusalem. From this place one enjoys, by looking down the Wady Karak, a fine view of part of the Dead Sea, and even Jerusalem may be distinctly seen in clear weather. The hill on which Karak lies is composed of limestone and brittle marl, with many beds of blue, black, and grey flints. In the neighbouring rocks there are a number of curious grottoes; in those which are under ground wheat is sometimes preserved for a period of ten years.' A fuller account of the place is given by Burckhardt, by whom it was next visited, and another description is furnished by Irby and Maugles. From their account it would seem that the caverns noticed by Seetzen were probably the sepulchres of the ancient town. We also learn that the Christians of Karak (which 'hey and Burckhardt call Kerek) are nearly as numerous as the Turks, and boast of being stronger and braver. They were, however, on good terms with the Turks, and appeared to enjoy equal freedom with them.

KISII, son of Ner, and father of King Saul (1 Sam. ix. 1).

KISHON, a river which, after traversing the plain of Acre, enters the bay of the same name at its south-east corner. It is celebrated in Scripture for the overthrow of the host of Sisera in its overflowing stream (Judg. iv. 13; v. 21). It has been usual to trace the source of this river to Mount Tabor; but Dr. Shaw affirms that in travelling along the south-eastern brow of Mount Carmel, he had an opportunity of seeing the sources of the river Kishon, three or four of which lie within less than a furlong of each other, and are called Ras el-Kishon, or the head of the Kishon. These alone, without the lesser contributions near the sea, discharge water enough to form a river half as large as the Isis. During the rainy season all the waters which fall upon the eastern side of Carmel, or upon the rising grounds to the southward, empty themselves into it in a number of torrents, at which time it overflows its banks, acquires a wonderful rapidity, and carries all before it. It was doubtless in such a season that the host of Sisera was swept away, in attempting to ford it. But such inundations are only occasional, and of short duration, as is indeed implied in the destruction in its waters of the fugitives, who doubtless expected to pass it safely.

The course of the stream, as estimated from the sources thus indicated, is not more than seven miles. It runs very briskly till within half a league of the sea; but when not augmented by rains, it never falls into the sea in a full stream, but insensibly percolates through a bank of sand, which the north winds have thrown up at its mouth. It was in this state (saith Shaw himself

found it in the month of April, 1722, when it was crossed by him.

Notwithstanding Shaw's contradiction, the assertion that the Kishon derives its source from Mount Tabor has been repeated by modern travellers as confidently as by their ancient predecessors. We have had opportunities of seeing much of streams similarly constituted; and it does not seem to us difficult to reconcile the seemingly conflicting statements with reference to the Kishon. On further inquiry, and more extensive comparison of observations made at different times of the year, it will probably be found that the remoter source of the river is really in Mount Tabor; but that the supply from this source is cut off in early summer, when it ceases to be maintained by rains or contributory torrents; whereas the copious supply from the nearer springs at Ras el-Kishon, with other springs lower down, keep it up from that point, as a perennial stream, even during the drought of summer. Thus during one part of the year the source of the river may appear to be in Mount Tabor, while during another part the source of the diminished stream is at Ras el-Kishon.

The Scriptural account of the overthrow of Sisera's host manifestly shows that the stream crossed the plain, and must have been of considerable size.

The transaction of the prophet Elijah, who, after his sacrifice on Carmel, commanded the priests of Baal to be slain at the river Kishon (1 Kings xviii. 40), requires no explanation, seeing that it took place at the perennial lower stream. This also explains, what has sometimes been asked, whence, in that time of drought, the water was obtained with which the prophet inundated his altar and sacrifice.

KISS. Originally the act of kissing had a symbolical character, and, though this import may now be lost sight of, yet it must be recognised the moment we attempt to understand or explain its signification. Acts speak no less, sometimes far more forcibly, than words. In the language of action, a kiss, inasmuch as it was a bringing into contact of parts of the body of two persons, was naturally the expression and the symbol of affection, regard, respect, and reverence; and if any deeper source of its origin were sought for, it would, doubtless, be found in the fondling and caresses with which the mother expresses her tenderness for her babe. That the custom is of very early date appears from Gen. xxix. 13, where we read—'When Laban heard the tidings of Jacob, his sister's son, he ran to meet him, and embraced him and kissed him, and brought him to his house;' the practice was even then established and recognised as a matter of course. In Gen. xxvii. 26, 27, a kiss is a sign of affection between a parent and child. It was also, as with some modern nations, a token of friendship and regard bestowed when friends or relations met or separated (Tobit vii. 6; x. 12; Luke vii. 45; xv. 20; Acts xx. 37; Matt. xxvi. 48; 2 Sam. xx. 9). The church of Ephesus wept sore at Paul's departure, and fell on his neck and kissed him. When Orpah quitted Naomi and Ruth (Ruth i. 14), after the three had lifted up their voice and wept, she 'kissed her mother-in-law, but Ruth clave unto her.' It was usual to kiss the mouth (Gen. xxxiii. 4; Exod. iv. 27; xviii. 7; 1 Sam. xx. 41; Prov. xxiv. 26)

or the beard, which was then taken hold of by the hand (2 Sam. xx. 9). Kissing of the feet was an expression of lowly and tender regard (Luke vii. 38). Kissing of the hand of another appears to be a modern practice: the passage of Job xxxi. 27, 'Or my mouth hath kissed my hand,' is not in point, and refers to idolatrous usages, namely, the adoration of the heavenly bodies. It was the custom to throw kisses towards the images of the gods, and towards the sun and moon (1 Kings xix. 18; Hosea xiii. 2). The kissing of princes was a token of homage (Ps. ii. 12; 1 Sam. x. 1). Xenophon says that it was a national custom with the Persians to kiss whomsoever they honoured. Kissing the feet of princes was a token of subjection and obedience; which was sometimes carried so far that the print of the foot received the kiss, so as to give the impression that the very dust had become sacred by the royal tread, or that the subject was not worthy to salute even the prince's foot, but was content to kiss the earth itself near or on which he trod (Isa. xlix. 9; Micah vii. 17; Ps. lxxii. 9). The Rabbins, in the meddlesome, scrupulous, and falsely delicate spirit which animated much of what they wrote, did not permit more than three kinds of kisses, the kiss of reverence, of reception, and of dismissal.

The peculiar tendency of the Christian religion to encourage honour towards all men, as men, to foster and develop the softer affections, and, in the trying condition of the early church, to make its members intimately known one to another, and unite them in the closest bonds, led to the observance of kissing as an accompaniment of that social worship which took its origin in the very cradle of our religion. Hence the exhortation—'Salute each other with a holy kiss' (Rom. xvi. 16; see also 1 Cor. xvi. 20; 2 Cor. xiii. 12; 1 Thess. v. 26; in 1 Pet. v. 14, it is termed 'a kiss of charity'). The observance was continued in later days, and has not yet wholly disappeared, though the peculiar circumstances have vanished which gave propriety and emphasis to such an expression of brotherly love and Christian friendship.

KITE. [GLEDE.]

KNEADING-TROUGHS. [BREAD.]

KO'ATH (*assembly*), son of Levi, and father of Amram, Izhar, Hebron, and Uzziel (Gen. xlv. 11). The descendants of Kohath formed one of the three great divisions of the Levitical tribe. This division contained the priestly family which was descended from Aaron, the son of Amram. In the service of the tabernacle, as settled in the wilderness, the Kohathites had the distinguished charge of bearing the ark and the sacred vessels (Exod. vi. 16; Num. iv. 4-6).

KOPHER, or KOPHER, occurs twice in the Song of Solomon (i. 14; iv. 13), and is in both places translated *camphire* in the Authorized Version. It has been supposed to indicate a bunch of grapes (*Botrus kopher*), also *camphor*. The word *camphire* is the old mode of spelling *camphor*, but this substance does not appear to have been known to ancient commerce; at least we cannot adduce any proof that it was so. The word *Kopher* closely resembles the Greek *Kypros*, usually written *Cypros*. Indeed, as has been observed, it is the same word, with the Greek pronunciation and termination. Mariti remarks, that 'the shrub known in the Hebrew language

by the name of kopher is common in the island of Cyprus, and thence had its Latin name'; also, that 'the *Botrus Cypri* has been supposed to be a kind of rare and exquisite grapes, transplanted from Cyprus to Engaddi; but the *Botrus* is known to the natives of Cyprus as an odorous shrub called *henna*, or *alkanna*.' This identity is now universally acknowledged: the *Kypros*, therefore, must have been *Lawsonia inermis*, as the *Hinna* of the Arabs is well known to be. If we examine the works of Oriental travellers and naturalists, we shall find that this plant is universally esteemed in Eastern countries, and appears to have been so from the earliest times, both on account of the fragrance of its flowers and the colouring properties of its leaves.

224. [*Lawsonia inermis*.]

Thus Rauwolf, when at Tripoli, 'found there another tree, not unlike unto our privet, by the Arabians called *Alcana*, or *Henna*, and by the Grecians, in their vulgar tongue, *Schenna*, which they have from Egypt, wherc, but above all in Cayre, they grow in abundance. The Turks and Moors nurse these up with great care and diligence, because of their sweet-smelling flowers. They also, as I am informed, keep their leaves all winter, which leaves they powder and mix with the juice of citrons, and stain therewith against great holidays the hair and nails of their children of a red colour, which colour may perhaps be seen with us on the manes and tails of Turkish horses.' This custom of dyeing the nails and the palms of the hands and soles of the feet, of an iron-rust colour, with *henna*, exists throughout the East, from the Mediterranean to the Ganges, as well as in Northern Africa. In some parts the practice is not confined to women and children, but is also followed by men, especially in Persia. In dyeing the beard, the hair is turned to red by this application, which is then changed to black by a preparation of indigo. In dyeing the hair of children, and the tails and manes of horses and asses, the process is allowed

to stop at the red colour which the *henna* produces. In reference to this universal practice of the East, Dr. Harris observes that 'the expression in Deut. xxi. 12, "pare her nails," may perhaps rather mean "adorn her nails," and imply the antiquity of this practice. This is a universal custom in Egypt, and not to conform to it would be considered indecent. It seems to have been practised by the ancient Egyptians, for the nails of the mummies are most commonly of a reddish hue.' Seeing, then, that the *henna* is so universally admired in the East, both on account of the fragrance of its flowers and the dye yielded by its leaves, and as there is no doubt that it is the *Cyprus* of the Greeks, and as this word is so similar to the *hopher* of the Hebrews, there is every probability of this last being the *henna* of the Arabs, *Lavsonia alba* of botanists.

KORAH (i.e.), a Levite, son of Izhar, the brother of Amram, the father of Moses and Aaron, who were therefore cousins to Korah (Exod. vi. 21). From this near relationship we may, with tolerable certainty, conjecture, that the source of the discontent which led to the steps afterwards taken by this unhappy man, lay in his jealousy that the high honours and privileges of the priesthood, to which he, who remained a simple Levite, might, apart from the divine appointment, seem to have had as good a claim, should have been exclusively appropriated to the family of Aaron. When to this was added the civil authority of Moses, the whole power over the nation would seem to him to have been engrossed by his cousins, the sons of Amram. Under the influence of these feelings he organized a conspiracy, for the purpose of redressing what appeared to him the evil and injustice of this arrangement. Dathan, Abiram, and On, the chief persons who joined him, were of the tribe of Reuben; but he was also supported by many more from other tribes, making up the number of 250, men of name, rank, and influence, all who may be regarded as representing the families of which they were the heads. The private object of Korah was apparently his own aggrandizement, but his ostensible object was the general good of the people; and it is perhaps from want of attention to this distinction that the transaction has not been well understood. The design seems to have been made acceptable to a large body of the nation, on the ground that the first-born of Israel had been deprived of their sacerdotal birthright in favour of the Levites, while the Levites themselves announced that the priesthood had been conferred by Moses (as they considered) on his own brother's family, in preference to those who had equal claims; and it is easy to conceive that the Reubenites may have considered the opportunity a favourable one for the recovery of their birthright—the double portion and civil pre-eminence—which had been forfeited by them and given to Joseph.

The leading conspirators having organized their plans, repaired in a body to Moses and Aaron, boldly charged them with their usurpations, and required them to lay down their ill-gotten power. Moses no sooner heard this than he fell on his face, confounded at the enormity of so outrageous a revolt against a system framed so carefully for the benefit of the nation. He left the matter in the Lord's hands, and desired them

to come on the morrow, provided with censers for incense, that the Lord himself, by some manifest token, might make known his will in this great matter. As this order was particularly addressed to the rebellious Levites, the Reubenites left the place, and when afterwards called back by Moses, returned a very insolent refusal, charging him with having brought them out of the land of Egypt under false pretences, 'to kill them in the wilderness.'

The next day Korah and his company appeared before the tabernacle, attended by a multitude of people out of the general body of the tribes. Then the Shakkiah, or symbol of the Divine presence, which abode between the cherubim, advanced to the entrance of the sacred fabric, and a voice therefrom commanded Moses and Aaron to stand apart, lest they should share in the destruction which awaited the whole congregation. On hearing these awful words the brothers fell on their faces, and, by strong intercession, moved the Lord to confine his wrath to the leaders in the rebellion, and spare their unhappy dapes. The latter were then ordered to separate themselves from their leaders and from the tents in which they dwelt. The terrible menace involved in this direction had its weight, and the command was obeyed; and after Moses had appealed to what was to happen as a proof of the authority by which he acted, the earth opened, and received and closed over the tents of Korah, Dathan, and Abiram. The Reubenite conspirators were in their tents, and perished in them; and at the same instant Korah and his 250, who were offering incense at the door of the tabernacle, were destroyed by a fire which 'came out from the Lord;' that is, most probably, in this case, from out of the cloud in which his presence dwelt. The censers which they had used were afterwards made into plates, to form an outer covering to the altar, and thus became a standing monument of this awful transaction (Num. xvi.). On, although named in the first instance along with Dathan and Abiram, does not further appear either in the rebellion or its punishment. It is hence supposed that he repented in time: and Abendana and other Rabbinical writers allege that his wife prevailed upon him to abandon the cause.

It might be supposed from the Scripture narrative that the entire families of the conspirators perished in the destruction of their tents. Doubtless all who were in the tents perished; but as the descendants of Korah afterwards became eminent in the Levitical service, it is clear that his sons were spared. They were probably living in separate tents, or were among those who sundered themselves from the conspirators at the command of Moses. There is no reason to suppose that the sons of Korah were children when their father perished. The Korahites were appointed by David to the office of guarding the doors of the temple, and of singing praises. They, in fact, occupied a distinguished place in the choral service of the temple, and several of the Psalms (xlii. xliv. xlix. lxxiv. lxxxv. lxxxvii. lxxxviii.) are inscribed to them. Heman, the master of song under David, was of this family, and his genealogy is traced through Korah up to *Levi* (1 Chron. vi. 31-38).

L.

LA'BAN, son of Bethuel, and grandson of Nahor, brother of Rebekah, and father of Jacob's two wives, Leah and Rachel [JACOB].

LA'CHISH, a city in the south of Judah, in the plain between Adoraim and Azekah (Josh. x. 3, 5, 31; xv. 39). It was rebuilt and fortified by Rehoboam (2 Chron. xi. 9), and seems after that time to have been regarded as one of the strongest fortresses of the kingdom of Judah, having for a time braved the assaults of the Assyrian army under Sennacherib (2 Kings xviii. 17; xix. 8; 2 Chron. xxxii. 9). Eusebius and Jerome place it seven Roman miles from Eleutheropolis towards the south. There has not been any more recent notice of the place, and no modern vestige of the name or site has been discovered.

LA'ISH. [DAN.]

LAKES. [PALESTINE.]

LA'MECH, son of Methuselah, and father of Jabal, Jubal, Tubal-cain, and Naamah (Gen. iv. 18, 24, &c.). He is recorded to have taken two wives, Adah and Zillah; and there appears no reason why the fact should have been mentioned, unless to point him out as the author of the evil practice of polygamy. The manner in which the sons of Lamech distinguished themselves as the inventors of useful arts, is mentioned under their several names. The most remarkable circumstance in connection with Lamech is the poetical address which he is very abruptly introduced as making to his wives. This is not only remarkable in itself, but is the first and most ancient piece of poetry in the Hebrew Scriptures; and, indeed, the only example of Antediluvian poetry extant:—

'Adah and Zillah, hear my voice!
Wives of Lamech, receive my speech!
If I slew a man to my wounding,
And a young man—to my hurt:
If Cain was avenged seven times,
Then Lamech—seventy times seven.'

This exhibits the parallelism and other characteristics of Hebrew poetry, the development of which belongs to another article [POETRY]. It has all the appearance of an extract from an old poem, which we may suppose to have been handed down by tradition to the time of Moses. It is very difficult to discover to what it refers, and the best explanation can be nothing more than a conjecture. So far as we can make it out, it would seem to be, as Bishop Lowth explains, an apology for committing homicide, in his own defence, upon some man who had violently assaulted him, and, as it would seem, struck and wounded him: and he opposes a homicide of this nature to the wilful and inexcusable fratricide of Cain. Under this view Lamech would appear to have intended to comfort his wives by the assurance that he was really exposed to no danger from this act, and that any attempt upon his life on the part of the friends of the deceased would not fail to bring down upon them the severest vengeance.

2. LAMECH, son of Methuselah, and father of Noah (Gen. v. 28-31).

LAMENTATIONS. This book is called by the Hebrews, 'how,' from the first word of the

book; but sometimes they call it 'tears,' or 'lamentation,' in allusion to the mournful character of the work, of which one would conceive, says Bishop Lowth, 'that every letter was written with a tear, every word the sound of a broken heart.' From this, or rather from the translation of it in the Septuagint, comes our title of LAMENTATIONS.

The ascription of the Lamentations in the title is of no authority in itself, but its correctness has never been doubted. The style and manner of the book are those of Jeremiah, and the circumstances alluded to, those by which he is known to have been surrounded. This reference of the Lamentations to Jeremiah occurs in the introductory verse which is found in the Septuagint:—'And it came to pass, after Israel had been carried away captive, and Jerusalem was become desolate, that Jeremiah sat weeping, and lamented with this lamentation over Jerusalem, and said.'

It is disputed whether or not this verse existed in the Hebrew copies from which the translation of the Seventy was made. We are certainly not bound by its authority if disposed to question the conclusion which it supports. But it at least shows the opinion which prevailed as to the author, and the occasion of the book, at the time the translation was made. That opinion is now all but universally acquiesced in. It is adopted by nearly all commentators, who, as they proceed through the book, find that they cannot follow out the details on any other supposition. We may, under this view, regard the two first chapters as occupied chiefly with the circumstances of the siege, and those immediately following that event. In the third the prophet deploras the calamities and persecutions to which he had himself been exposed: the fourth refers to the ruin and desolation of the city, and the unhappy lot of Zedekiah; and the fifth and last seems to be a sort of prayer in the name, or on behalf, of the Jews in their dispersion and captivity. As Jeremiah himself was eventually compelled to withdraw into Egypt much against his will (Jer. xliii. 6), it has been suggested that the last chapter was possibly written there. Pareau refers chap. i. to Jer. xxxvii. 5, sqq.; chap. iii. to Jer. xxxviii. 2, sqq.; chap. iv. to Jer. xxxix. 1, sqq., and 2 Kings xxv. 1, sqq.; chap. ii. to the destruction of the city and temple; chap. v. is admitted to be the latest, and to refer to the time after that event. Ewald says that the situation is the same throughout, and only the time different. In chap. i. and ii. we find sorrow without consolation; in chap. iii. consolation for the poet himself; in chap. iv. the lamentation is renewed with greater violence; but soon the whole people, as if urged by their own spontaneous impulse, fall to weeping and hoping.

Dr. Blayney, regarding both the date and occasion of the Lamentations as established by the internal evidence, adds, 'Nor can we admire too much the flow of that full and graceful pathetic eloquence, in which the author pours out the effusions of a patriotic heart, and piously weeps over the ruins of his venerable country.' 'Never,' says an unquestionable judge of these matters, 'was there a more rich and elegant variety of beautiful images and adjuncts, arranged together within so small a compass, nor more happily chosen and applied.'

In the ancient copies this book is supposed to have occupied the place which is now assigned to it, after Jeremiah. Indeed, from the manner in which Josephus reckons up the books of the Old Testament, it has been supposed that Jeremiah and it originally formed but one book. In the Bible now used by the Jews, however, the book of Lamentations stands in the Hagiographa, and among the five Megilloth, or books of Ruth, Esther, Ecclesiastes, and Solomon's Song. They believe that it was not written by the gift of prophecy, but by the spirit of God (between which they make a distinction), and give this as a reason for not placing it among the prophets. It is read in their synagogues on the ninth of the month Ab, which is a fast for the destruction of the holy city.

LAMP. Lamps are very often mentioned in Scripture; but there is nothing to give any notion of their form. Almost the only fact we

225. [Egyptian Lamps.]

can gather is, that vegetable oils were burnt in them, and especially, if not exclusively, olive-oil. This, of the finest quality, was the oil used in the seven lamps of the Tabernacle (Exod. xxvii. 20). It is somewhat remarkable, that while the golden candlestick, or rather candelabrum, is so minutely described, not a word is said of the shape, or even the material, of the lamps (Exod. xxv. 37). This was, perhaps, because they were to be of the common forms, already familiarly known to the Hebrews, and the same probably which were used in Egypt, which they had just quitted. They were in this instance doubtless of gold, although metal is scarcely the best substance for a lamp. The golden candlestick may also suggest, that lamps in ordinary use were placed on stands, and where more than one was required, on stands with two or more branches. The modern Orientals, who are satisfied with very little light in their rooms, use stands of brass or wood, on which to raise the lamps to a sufficient height above the floor on which they sit. Such stands are shaped not unlike a tall candlestick, spreading out at the top. Sometimes the lamps are placed on brackets against the wall, made for the purpose, and often upon stools. Doubtless the same contrivances were employed by the Hebrews.

From the fact that lamps were carried in the pitchers of Gideon's soldiers, from which, at the end of the march, they were taken out, and borne in the hand (Judg. vii. 16, 20), we may with certainty infer that they were not, like many of the classical lamps, entirely open at top, but so shaped that the oil could not easily be spilled.

226. [Classical Lamps.]

This was remarkably the case in the Egyptian specimens, and is not rare in the classical. Gideon's lamps must also have had handles; but that the Hebrew lamps were always furnished with handles we are not bound to infer: in Egypt we find lamps both with and without handles.

Although the lamp-oils of the Hebrews were exclusively vegetable, it is probable that animal fat was used, as it is at present by the Western Asiatics, by being placed in a kind of lamp, and burnt by means of a wick inserted in it. This we have often witnessed in districts where oil-yielding plants are not common.

Cotton wicks are now used throughout Asia; but the Hebrews, like the Egyptians, probably employed the outer and coarser fibre of flax; and perhaps linen yarn, if the Rabbins are correct in alleging that the linen dresses of the priests were unravelled when old, to furnish wicks for the sacred lamps [CANDLESTICK].

It seems that the Hebrews, like the modern Orientals, were accustomed to burn lamps over-night in their chambers; and this practice may appear to give point to the expression of 'outer darkness,' which repeatedly occurs in the New Testament (Matt. viii. 12; xxii. 13): the force is greater, however, when the contrast implied in the term outer is viewed with reference to the effect produced by sudden expulsiion into the darkness of night from a chamber highly illuminated for an entertainment. This custom of burning lamps at night, with the effect produced by their going out or being extinguished, supplies various figures to the sacred writers (2 Sam. xxi. 17; Prov. xiii. 9; xx. 20). And, on the other hand, the keeping up of a lamp's light is used as a symbol of enduring and unbroken succession (1 Kings xi. 36; xv. 4; Ps. cxxxii. 17).

It appears from Matt. xxv. 1, that the Jews used lamps and torches in their marriage cere-

monies, or rather when the bridegroom came to conduct home the bride by night. This is still the custom in those parts of the East where, on account of the heat of the day, the bridal procession takes place in the night-time. The connection of lamps and torches with marriage ceremonies, it may be observed, is still preserved in Western Asia, even where it is no longer usual to bring home the bride by night. During two, or three, or more nights preceding the wedding, the street or quarter in which the bridegroom lives is illuminated with chandeliers and lanterns, or with lanterns and small lamps suspended from cords drawn across from the bridegroom's and several other houses on each side to the houses opposite; and several small silk flags, each of two colours, generally red and green, are attached to other cords. Lamps of this kind are sometimes hung over doors. There are some indications that the ancient Egyptians had lamps of glass; and, if so, there is no reason why the Jews also might not have had them, especially as this material is more proper for lamps intended to be hung up, and therefore to cast their light down from above. The Jews certainly used lamps in other festivals besides those of marriage. If this custom had not been so general in the ancient and modern East, it might have been supposed that the Jews adopted it from the Egyptians, who, according to Herodotus, had a 'Feast of Lamps,' which was celebrated at Sais, and, indeed, throughout the country at a certain season of the year. The description which the historian gives of the lamps employed on this occasion, strictly applies to those in modern use already described, and the concurrence of both these sources of illustration strengthens the probable analogy of Jewish usage. He speaks of them as 'small vases filled with salt and olive-oil, in which the wick floated, and burnt during the whole night.' It does not indeed appear of what materials these vases were made; but we may reasonably suppose them to have been of glass.

The later Jews had even something like this feast among themselves. A 'Feast of Lamps' was held every year on the twenty-fifth of the month Chisleu. It was founded by Judas Maccabeus in celebration of the restoration of the temple worship, and has ever since been observed by the lighting up of lamps or candles on that day in all the countries of their dispersion. Other Orientals have at this day a similar feast, of which the 'Feast of Lanterns' among the Chinese is, perhaps, the best known.

LANGUAGE. [TONGUES, CONFUSION OF.]

LANTERN. This word occurs only in John xviii. 3, where the party of men which went out of Jerusalem to apprehend Jesus in the garden of Gethsemane is described as being provided 'with lanterns and torches.' In the article LAMP it has been shown that the Jewish lantern, or, if we may so call it, lamp-frame, was similar to that now in use among the Orientals.

As the streets of Eastern towns are not lighted at night, and never were so, lanterns are used to an extent not known among us. Such, doubtless, was also formerly the case; and it is therefore remarkable that the only trace of a lantern which the Egyptian monuments offer, is that contained in the present engraving (No. 227). In this case it seems to be borne by the night-watch, or civic

guard, and is shaped like those in common use among ourselves. A similar lantern is at this

227.

day used in Persia, and perhaps does not materially differ from those mentioned in Scripture. More common at present in Western Asia is a large folding lantern of waxen cloth strained over rings of wire, with a top and bottom of tinned copper. It is usually about two feet long by nine inches in diameter, and is carried by servants before their masters, who often pay visits to their friends at or after supper-time. In many Eastern towns the municipal law forbids any one to be in the streets after nightfall without a lantern.

LAODICEA. There were four places of this name, which it may be well to distinguish, in order to prevent them from being confounded with one another. The first was in the western part of Phrygia, on the borders of Lydia; the second, in the eastern part of the same country, denominated Laodicea Combusta; the third, on the coast of Syria, called Laodicea ad Mare, and serving as the port of Aleppo; and the fourth, in the same country, called Laodicea ad Libanum, from its proximity to that mountain. The third of these, that on the coast of Syria, was destroyed by the great earthquake of Aleppo in August, 1822, and at the time of that event was supposed by many to be the Laodicea of Scripture, although in fact not less than four hundred miles from it. But the first named, lying on the confines of Phrygia and Lydia, about forty miles east of Ephesus, is the only Laodicea mentioned in Scripture, and is that one of the 'seven churches in Asia' to which St. John was commissioned to deliver the awful warning contained in Rev. iii. 14-19. The fulfilment of this warning is to be sought, as we take it, in the history of the Christian church which existed in that city, and not in the stone and mortar of the city itself; for, although it is true that the city is utterly ruined, it is not the city, but 'the church of the Laodiceans,' which is denounced.

Laodicea was the capital of Greater Phrygia and a very considerable city at the time it was named in Scripture; but the frequency of earthquakes, to which this district has always been liable, demolished, some ages after, great part of the city, destroyed many of the inhabitants, and eventually obliged the remainder to abandon the spot altogether.

Laodicea is now a deserted place, called by the Turks *Eski-hissar* (*Old Castle*). From its ruins, Laodicea seems to have been situated upon six or seven hills, taking up a large extent of ground. To the north and north-east runs the river Lycus, about a mile and a half distant; but nearer it is watered by two small streams, the Asopus and Caprus, the one to the west, and the other to the south-east, both passing into the Lycus, which last flows into the Mæander.

Laodicea preserves great remains of its importance as the residence of the Roman governors of Asia under the emperors; namely, a stadium, in uncommon preservation, three theatres, one of which is 450 feet in diameter, and the ruins of several other buildings. Col. Leake says: 'There are few ancient sites more likely than Laodicea to preserve many curious remains of antiquity beneath the surface of the soil; its opulence, and the earthquakes to which it was subject, rendering it probable that valuable works of art were often there buried beneath the ruins of the public and private edifices.'

LAPWING. The original word thus rendered in our version has been surmised to mean 'double-crest'; and is supposed on good grounds to mean the hoopoe, rather than the lapwing.

228. [Hoopoe.]

The hoopoe is not uncommon in Palestine at this day, and was from remote ages a bird of mystery. The summit of the augural rod is said to have been carved in the form of a hoopoe's head; and one of the kind is still used by Indian gossains, and even Armenian bishops, attention being no doubt drawn to the bird by its peculiarly arranged black and white bars upon a delicate vinous fawn-colour, and further embellished with a beautiful fan-shaped crest of the same colour, tipped with white and black. Its appellations in all languages appear to be either imitations of the bird's voice or indications of its filthy habits; which, however, modern ornithologists deny, or do not notice. In Egypt these birds are numerous; forming, probably, two species, the one permanently resident about human habitations, the other migratory, and the same that visits Europe. The latter wades in the mud when the Nile has subsided, and seeks for worms and insects; and the former is known to rear its young so much immersed in the shards and fragments of beetles, &c. as to cause a disagreeable smell about its nest, which is always in holes or in hollow trees. Though an unclean bird in the Hebrew law, the common migratory hoopoe is eaten in Egypt, and sometimes also in

Italy; but the stationary species is considered inedible. It is unnecessary to give further description of a bird so well known as the hoopoe, which, though not common, is nevertheless an annual visitant of England, arriving soon after the cuckoo.

LAVAR, a basin to contain the water used by the priests in their ablutions during their sacred ministrations. There was one of brass (fabricated out of the metal mirrors which the women brought from Egypt, Exod. xxxviii. 8). It had a 'foot' or base, which, from the manner in which 'the laver and its foot' are mentioned, must have been a conspicuous feature, and was perhaps separable from the basin itself for the purpose of removal. We are not informed of the size or shape of this laver; but it appears to have been large. It stood between the altar of burnt-offerings and the door of the tabernacle (Exod. xxx. 18-21; xl. 30-32). The water of this laver seems to have served the double purpose of washing the parts of the sacrifices, and the hands and feet of the priests. But in the temple of Solomon, when the number of both priests and victims had greatly increased, ten lavers were used for the sacrifices, and the molten sea for the personal ablutions of the priests (2 Chron. iv. 6). These lavers are more minutely described than that of the tabernacle. So far as can be made out from the description, they consisted of a square base or stand mounted upon rollers or wheels, and adorned with figures of palm-trees, cherubim, lions, and oxen. The stand doubtless formed a hollow basin for receiving the water which fell from the laver itself, and which appears to have been drawn from it by means of cocks (1 Kings vii. 27-39). Each of the lavers contained forty baths, or, according to the usual computation, about 300 English gallons.

In the second temple there appears to have been only one laver. Of its size or shape we have no information, but it was probably like those of Solomon's temple.

LAWYER. This word, in its general sense, denotes one skilled in the law, as in Tit. iii. 13. When, therefore, one is called a lawyer, this is understood with reference to the laws of the land in which he lived or to which he belonged. Hence among the Jews a lawyer was one versed in the laws of Moses, which he taught in the schools and synagogues (Matt. xxviii. 35; Luke x. 25). The same person who is called 'a lawyer' in these texts, is in the parallel passage (Mark xii. 28) called a scribe; whence it has been inferred that the functions of the lawyers and the scribes were identical. The individual may have been both a lawyer and a scribe; but it does not thence follow that all lawyers were scribes. Some suppose, however, that the 'scribes' were the public expounders of the law, while the 'lawyers' were the private expounders and teachers of it. But this is a mere conjecture; and nothing more is really known than that the 'lawyers' were expounders of the law, whether publicly or privately, or both.

LAZARUS (an abridged form of the Hebrew name Eleazer), an inhabitant of Bethany, brother of Mary and Martha, who was honoured with the friendship of Jesus, by whom he was raised from the dead after he had been four days in the tomb. This great miracle is minutely described in John xi. The credit which Christ obtained among the

people by this illustrious act, of which the life and presence of Lazarus afforded a standing evidence, induced the Sanhedrim, in plotting against Jesus, to contemplate the destruction of Lazarus also (John xii. 10). Whether they accomplished this object or not, we are not informed: but the probability seems to be that when they had satiated their malice on Christ, they left Lazarus unmolested.

LEAD, a well-known metal, the first Scriptural notice of which occurs in the triumphal song in which Moses celebrates the overthrow of Pharaoh, whose host is there said to have 'sunk like lead' in the waters of the Red Sea (Exod. xv. 10).

Before the use of quicksilver was known, lead was used for the purpose of purifying silver, and separating it from other mineral substances. To this Jeremiah alludes where he figuratively describes the corrupt condition of the people: 'In their fire the lead is consumed (in the crucible); the smelting is in vain, for the evil is not separated' (Jer. vi. 29).

Job (xix. 23, 24) expresses a wish that his words were engraven 'with an iron pen and lead.' These words are commonly supposed to refer to engraving on a leaden tablet; and it is undeniable that such tablets were anciently used as a writing material. But our authorized translators, by rendering 'an iron pen and lead in the rock for ever,' seem to have entertained the same view with Rosenmüller, who supposes that molten lead was to be poured into letters sculptured on stone with an iron chisel, in order to raise the inscription.

Although the Hebrew weights were usually of stone, and are indeed called 'stones,' a leaden weight denominated *anach*, which is the Arabic word for lead, occurs in Amos vii. 7, 8. In Acts xxvii. 28, a plummet for taking soundings at sea is mentioned, and this was of course of lead.

The ancient uses of lead in the East seem to have been very few; nor are they now numerous. One may travel far in Western Asia without discovering any trace of this metal in any of the numerous useful applications which it is made to serve in European countries.

We are not aware that any trace of lead has been yet found within the limits of Palestine. But ancient lead-mines, in some of which the ore has been exhausted by working, have been discovered by Mr. Burton in the mountains between the Red Sea and the Nile; and lead is also said to exist at a place called Sheff, near Mount Sinai.

LE'AH (*wearyed*), one of the two daughters of Laban who became the wives of Jacob [JACOB].

LEAVEN AND FERMENT. The organic chemists define the process of fermentation, and the substance which excites it, as follows:—'*Fermentation* is nothing else but the putrefaction of a substance containing no nitrogen. *Ferment*, or yeast, is a substance in a state of putrefaction, the atoms of which are in a continual motion.' This definition is in strict accordance with the views of the ancients, and gives point and force to many passages of Sacred Writ (Ps. lxxix. 21; Matt. xvi. 6, 11, 12; Mark viii. 15; Luke xii. 1; xiii. 21; 1 Cor. v. 5-8; Gal. v. 9). *Leaven*, and fermented or even some readily fermentible substances (as honey), were prohibited in many of the typical institutions both of the Jews and Gentiles. Plutarch assigns as the rea-

son why the priest of Jupiter was not allowed to touch *leaven*, 'that it comes out of corruption, and corrupts that with which it is mingled.' All fermented substances were prohibited in the Paschal Feast of the Jews (Exod. xii. 8, 19, 20); also during the succeeding seven days, usually called 'The Feast of Unleavened Bread'; though *bread* is not in the original. God forbade either *ferment* or *honey* to be offered to Him in his temple (i. e. in the symbolical rites), while they were permitted in offerings designed to be consumed as food (Num. xv. 20, 21). On the same principle of symbolism, God prescribes that *salt* shall always constitute a part of the oblations to Him (Lev. ii. 13). *Salt* prevents corruption or decay, and preserves flesh. Hence it is used as a symbol of incorruption and perpetuity. Thus St. Paul (comp. Col. *pv.* 6; Eph. iv. 29) uses 'salt' as preservative from corruption, on the same principle which leads him to employ that which is *unfermented* as an emblem of purity and uncorruptedness.

'The usual *leaven* in the East is dough kept till it becomes sour, and which is kept from one day to another for the purpose of preserving leaven in readiness. Thus, if there should be no leaven in all the country for any length of time, as much as might be required could easily be produced in twenty-four hours. *Sour dough*, however, is not exclusively used for leaven in the East, the *lees of wine* being in some parts employed as yeast.'

LEBANON, a long chain of mountains on the northern border of Palestine. The term Libanus is more convenient in use than the Hebrew form Lebanon, as enabling us to distinguish the parallel ranges of Libanus and Anti-Libanus, which have no such distinctive names in connection with the Hebrew designation. Lebanon seems to be applied in Scripture to either or both of these ranges; and we shall also use it in this general sense: but Libanus means distinctively the westernmost of those ranges, which faces the Mediterranean, and Anti-Libanus the eastern, facing the plain of Damascus; in which sense these names will be used in this article. The present inhabitants of the country have found the convenience of distinguishing these parallel ranges; and give to Libanus the name of 'Western Mountain' (Jebel esh-Sharki), and to Anti-Libanus that of 'Eastern Mountain' (Jebel el-Gharbi); although Jebel Liban (the same name in fact as Lebanon) occurs among the Arabs with special reference to the eastern range.

These two great ranges, which together form the Lebanon of Scripture, commence about the parallel of Tripoli (lat. 34° 28'), run in a general direction from N.E. to S.W., through about one degree of latitude, and form, at their southern termination, the natural frontier of Palestine. These parallel ranges enclose between them a fertile and well-watered valley, averaging about fifteen miles in width, which is the Cœle-Syria (Hollow Syria) of the ancients, but is called by the present inhabitants, by way of pre-eminence, el-Bekaa, or 'the Valley,' which is watered through the greater portion of its length by the river Litany, the ancient Leontes.

Nearly opposite Damascus the Anti-Libanus separates into two ridges, which diverge somewhat, and enclose the fertile Wady el-Teim. The easternmost of these two ridges, which has

already been pointed out as the *Hermion* of Scripture [HERMON]. *Jebel esh-Sheikh*, continues its S.W. course, and is the proper prolongation of Anti-Libanus. From the base of the higher part of this ridge, a low broad spur or mountainous tract runs off towards the south, forming the high land which shuts in the basin and Lake of el-Huleh on the east. This tract is called *Jebel Heish*, the higher portion of which terminates at Tel el-Faras, nearly three hours north of Fick. The other ridge of Anti-Libanus takes a more westerly direction. It is long, low, and level; and continues to border the lower part of the great valley of Bekaa, until it seems to unite with the higher bluffs and spurs of Lebanon, and thus entirely to close that valley. In fact, only a narrow gorge is here left between precipices, in some places of great height, through which the Litany finds its way down to the sea, north of Tyre. The chain of Lebanon, or at least its higher ridges, may be said to terminate at the point where it is thus broken through by the Litany. But a broad and lower mountainous tract continues towards the south, bordering the basin of the Huleh on the west. It rises to its greatest elevation about *Safed* (*Jebel Safed*); and at length ends abruptly in the mountains of Nazareth, as the northern wall of the plain of Esdraelon. This high tract may very properly be regarded as a prolongation of Lebanon.

The mountains of Lebanon are of limestone rock, generally of a whitish hue, and from the aspect which the range thus bears in the distance, in its cliffs and naked parts, the name of Lebanon (which signifies 'white') has been supposed to be derived; but others seek its origin in the snows which rest long upon its summits, and perpetually upon the highest of them.

Of the two ranges, that of Libanus is by far the highest. Its uppermost ridge is marked by a line, drawn at the distance of about two hours' journey from the summit, above which all is barren; but the slopes and valleys below this line afford pasturage, and are capable of cultivation, by reason of the numerous springs which are met with in all directions. Cultivation is, however, chiefly found on the seaward slopes, where numerous villages flourish, and every inch of ground is turned to account by the industrious natives, who, in the absence of natural levels, construct artificial terraces in order to prevent the earth from being swept away by the winter rains, and at the same time to retain the water requisite for the irrigation of the crops. When one looks upward from below, the vegetation on these terraces is not visible; so that the whole mountain appears as if composed only of immense rugged masses of naked whitish rock, traversed by deep wild ravines, running down precipitously to the plain. No one would suspect among these rocks the existence of a vast multitude of thrifty villages, and a numerous population of mountaineers, hardy, industrious, and brave. Here, amidst the crags of the rocks, are to be seen the remains of the renowned cedars; but a much larger proportion of firs, oaks, brambles, mulberry-trees, fig-trees, and vines.

Although the general elevation of Anti-Libanus is inferior to that of Libanus, the easternmost of the branches into which it divides towards its termination (*Jebel esh-Sheikh*) rises loftily, and

overtops all the other summits of heaven. Our information respecting Anti-Libanus is less distinct than that concerning the opposite range. It appears, however, that it has fewer inhabitants, and is scarcely in any part cultivated.

None of the summits of Libanus or Anti-Libanus have been measured. By comparing the accounts of different travellers, however, as to the continuance of snow upon the higher summits, and adjusting them with reference to the point of perpetual congelation in that latitude, a rough estimate may be formed, that the average height of the Libanus mountains, from the top of which the snow entirely disappears in summer, must be considerably below 11,000 feet, probably about 10,000 feet above the level of the sea. But the higher points, particularly the Sannin, which is the highest of all, must be above that limit, as the snow rests on them all the year. By the same rule the average height of the Anti-Libanus range is reckoned as not exceeding 9000 feet; but its highest point, in the *Jebel es-Sheik*, or Mount *Hermion*, is considered to be somewhat more lofty than the Sannin, the highest point of Libanus.

In Scripture Lebanon is very generally mentioned in connection with the cedar-trees in which it abounded; but its wines are also noticed (*Hosea* xiv. 8); and in *Cant.* iv. 11; *Hosea* xiv. 7, it is celebrated for various kinds of fragrant plants.

LEECH occurs only in *Prov.* xxx. 15. 'The *horse-leech*' is properly a species of leech discarded for medical purposes on account of the coarseness of its bite. The leech, as a symbol, in use among rulers of every class and in all ages, for avarice, rapine, plunder, rapacity, and even assiduity, is too well known to need illustration.

LEES. The original word (*Shemarim*) thus rendered is generally understood to denote the lees or dregs of wine. But this cannot be the meaning of the term in *Isa.* xxv. 6, where, we think, it must refer to some rich preserves appropriate to the feast of which that text speaks. The verse may be rendered thus:—'And Jehovah of hosts shall make to all peoples in this mountain a feast of fat things, a feast of preserves, of the richest fatness, of preserves well refined.' Considerable diversity of opinion has obtained among Biblical critics in regard to both the literal meaning and prophetic bearing of this text. The most usual interpretation supposes a reference to *wines on the lees*; but there are strong objections to this view, the most obvious of which is, that it is exceedingly inappropriate. There is no mention of wine in the original, but simply of dregs; and interpreters have been forced to suppose a reference to the former, from a conviction that the latter was altogether inapt. The mention of dregs does not naturally call up the idea of wine which has been drawn from them. We agree with the great majority of interpreters, that a signal blessing is here referred to; but we cannot agree with those who suppose that wine drawn off from dregs is made the emblem of that blessing. Such wine would evidently not answer the purpose. It was not the best wine. We regard it as indicating something excellent in its kind, and the best of its kind. It seems to refer to some rich preserves made from grapes or other fruits.

It is difficult to say how these *preserves* were prepared. 'In the East grapes enter very largely into the provisions at an entertainment. Thus Norden was treated by the Aga of Assaoun with coffee, and some bunches of grapes of an excellent taste.' It is probable, however, that some solid preparation of the dried grape is here intended. The very best grapes were anciently, and still are, employed to make such preparations in Palestine. 'The finest grapes in that country grow in the vineyards around Hebron. 'The produce of these vineyards,' says Professor Robinson, 'is celebrated throughout Palestine. No wine, however, nor 'Arak is made from them, except by the Jews, and this is not in great quantity. The wine is good. *The finest grapes are dried as raisins*; and the rest, being trodden and pressed, the juice is boiled down to a syrup, which, under the name of Dibs, is much used by all classes, wherever vineyards are found, as a condiment with their food. It resembles thin molasses, but is more pleasant to the taste.' The fact here stated regarding the use made of the finest grapes, supplies us with an article worthy of the feast mentioned in the text. Buckingham mentions the following facts:—'By way of desert, some walnuts and dried figs were afterwards served to us, besides a very curious article, probably resembling the dried wine of the ancients, which they are said to have preserved in cakes. They were of the size of a cucumber, and were made out of the fermented juice of the grape formed into a jelly, and in this state wound round a central thread of the kernel of walnuts; the pieces of the nuts thus forming a support for the outer coat of jelly, which became harder as it dried, and would keep, it is said, fresh and good for many months, forming a welcome treat at all times, and being particularly well adapted for sick or delicate persons, who might require some grateful provisions capable of being carried in a small compass, and without risk of injury on a journey.'

After a full consideration of the subject, we conclude that the *shemârim* of this text was a solid article, different from *grape-cake*, as not being pressed in any particular form, and different from *dried grapes*, as being refined and prepared for being served up at a sumptuous entertainment.

Neither of the other passages (Jer. xlviii. 11, Zeph. i. 12), where the word under discussion occurs, is invested with special interest. The wine was separated from the lees, sometimes at least, by being drawn off from one vessel to another, as appears from Jeremiah xlviii. 11, which Bishop Lowth renders thus:—

'Moab hath been at ease from his youth,
And he hath settled upon his lees;
Nor hath he been drawn off from vessel to vessel,
Neither hath he gone into captivity:
Therefore his taste remaineth in him,
And his flavour is not changed.'

Moab is here represented as spending a life of quiet indifference, living undisturbed in sin. Such, too, was the situation of those of whom Jehovah says (Zeph. i. 12), 'I will punish the men that are settled on their lees'; that is, those who disregarded his admonitions, and prosecuted

their sinful courses, unmoved by his threatenings.

LEGION, a division of the Roman army. It always comprised a large body of men; but the number varied so much at different times, that there is considerable discrepancy in the statements with reference to it. The legion appears to have originally contained about 3000 men, and to have risen gradually to twice that number, or even more. In and about the time of Christ it seems to have consisted of 6000 men; but this was exclusive of horsemen, who usually formed an additional body amounting to one-tenth of the infantry. As all the divisions of the Roman army are noticed in Scripture, we may add that each legion was divided into ten cohorts or regiments, each cohort into three *maniples* or bands, and each *maniple* into three *centuries* or companies of 100 each. This smaller division into centuries or hundreds, from the form in which it is exhibited as a constituent of the larger divisions, clearly shows that 6000 had become at least the formal number of a legion.

The word *legion* came to be used to express a great number or multitude. Thus, the unclean spirit (Mark v. 7), when asked his name, answers, 'My name is Legion, for we are many.'

LENTILES. Lentiles appear to have been chiefly used for making a kind of pottage. The red pottage for which Esau bartered his birthright was of lentiles (Gen. xxv. 29-34). The term *red* was, as with us, extended to *yellowish brown*, which must have been the true colour of the pottage, if derived from lentiles. The Greeks and Romans also called lentiles red. Lentiles were among the provisions brought to David when he fled from Absalom (2 Sam. xvii. 28), and a field of lentiles was 'the scene of an exploit of one of David's heroes' (2 Sam. xxiii. 11). From Ezek. iv. 9, it would appear that lentiles were sometimes used as bread. This was, doubtless, in times of scarcity, or by the poor. Soncini assures us that in southernmost Egypt, where corn is comparatively scarce, lentiles mixed with a little barley form almost the only bread in use among the poorer classes. It is called *bettan*, is of a golden yellow colour, and is not bad, although rather heavy. In that country, indeed, probably even more than in Palestine, lentiles anciently, as now, formed a chief article of food among the labouring classes. Large quantities of lentiles were exported from Alexandria. Pliny, in mentioning two Egyptian varieties, incidentally lets us know that one of them was red, by remarking that they like a red soil, and by speculating whether the pulse may not have thence derived the reddish colour which it imparted to the pottage made with it. This illustrates Jacob's red pottage. Dr. Shaw also states that these lentiles easily dissolve in boiling, and form a red or chocolate coloured pottage, much esteemed in North Africa and Western Asia. Putting these facts together, it is likely that the reddish lentile, which is now so common in Egypt, is the sort to which all these statements refer.

The tomb-paintings actually exhibit the operation of preparing pottage of lentiles, or, as Wilkinson describes it, 'a man engaged in cooking lentiles for a soup or porridge; his companion brings a bundle of faggots for the fire, and the lentiles themselves are seen standing near him in

wicker baskets.' The lentiles of Palestine have been little noticed by travellers.

229.

The lentile is an annual plant, and the smallest of all the leguminosae which are cultivated. It rises with a weak stalk about eighteen inches high, having pinnate leaves at each joint composed of several pairs of narrow leaflets, and terminating in a tendrill, which supports it by fastening about some other plant. The small

230. [Lentiles—Cicer lens.]

flowers, which come out of the sides of the branches on short peduncles, three or four together, are purple, and are succeeded by the short and flat legumes, which contain two or three flat round seeds slightly curved in the middle. The flower appears in May, and the seeds ripen in July. When ripe, the plants are rooted up, if they have been sown along with other plants, as is sometimes done; but they are cut down when grown by themselves. They are threshed, winnowed, and cleaned like corn.

LEOPARD (Cant. iv. 8; Isa. xi. 6; Jer. v. 6; xiii. 23; Hos. xiii. 7; Hab. i. 8; Dan. vii. 6;

231.

Rev. xiii. 2; Eccles. xxviii. 23). Though

zoologists differ in opinion respecting the identity of the leopard and the panther, and dispute, supposing them to be distinct, how these names should be respectively applied, and by what marks the animals should be distinguished, nevertheless there can be no doubt that the leopard of the Bible is that great spotted feline which anciently infested the Syrian mountains, and even now occurs in the wooded ranges of Libanus. The variety of leopard, or rather panther, of Syria, is considerably below the stature of a lioness, but very heavy in proportion to its bulk. Its general form is so well known as to require no description beyond stating, that the spots are rather more irregular, and the colour more mixed with whitish, than in the other pantherine feline, excepting the *Felis Uncia*, or *Felis Irbis*, of Iligh Asia, which is shaggy and almost white. It is a nocturnal, cat-like animal in habits, dangerous to all domestic cattle, and sometimes even to man. In the Scriptures it is constantly placed in juxtaposition with the lion or the wolf; which last, if the hyena be intended, forms a natural association. There is in Asia Minor a species or variety of panther, much larger than the Syrian, not unfrequent on the borders of the snowy tracts even of Mount Ida, above ancient Troy; and the group of these spotted animals is spread over the whole of Southern Asia to Africa. From several names of places, it appears that, in the earlier ages of Israelitish dominion, it was sufficiently numerous in Palestine. Leopard skins were worn as a part of ceremonial costume by the superiors of the Egyptian priesthood, and by other personages in Nubia; and the animal itself is represented in the processions of tributary nations.

LEPROSY. Leprosy is a name that was given by the Greek physicians to a scaly disease of the skin. During the dark ages it was indiscriminately applied to all chronic diseases of the skin, and more particularly to elephantiasis, to which latter, however, it does not bear the slightest resemblance. The disease, as it is known at the present day, commences by an eruption of small reddish spots slightly raised above the level of the skin, and grouped in a circle. These spots are soon covered by a very thin, semi-transparent scale or epidermis, of a whitish colour, and very smooth, which in a little time falls off, and leaves the skin beneath red and uneven. As the circles increase in diameter the skin recovers its healthy appearance towards the centre fresh scales are formed, which are now thicker, and superimposed one above the other, especially at the edges, so that the centre of the scale appears to be depressed. The scales are of a greyish white colour, and have something of a nacaceous or pearly lustre. The circles are generally of the size of a shilling or half-crown, but they have been known to attain half a foot in diameter. The disease generally affects the knees and elbows, but sometimes it extends over the whole body; in which case the circles become confluent. It does not at all affect the general health, and the only inconvenience it causes the patient is a slight itching when the skin is heated; or, in inveterate cases, when the skin about the joints is much thickened, it may in some degree impede the free motion of the

limbs. It is common to both sexes, to almost all ages, and all ranks of society. It is not in the least infectious, but it is always difficult to be cured, and in old persons, when it is of long standing, may be pronounced incurable. It is commonly met with in this country and in all parts of Europe. On turning to the Mosaic account, we find three species mentioned, which were all included under the generic term of *Bahéret*, or 'bright spot.' The first is called *Bôhag*, which signifies 'brightness,' but in a subordinate degree. This species did not render a person unclean. The second was called *Bahéret lebanah*, or a bright white *Bahéret*. The third was *Bahéret khah*, or dusky *Bahéret*, spreading in the skin. These two last were also called 'a stroke,' as if a chastisement, and rendered a person unclean. The characteristic marks of the *Bahéret lebanah* mentioned by Moses, are a glossy white and spreading scale upon an elevated base, the elevation depressed in the middle, the hair on the patches participating in the whiteness, and the patches themselves perpetually increasing. There are some other slight affections mentioned by name in Leviticus, which the priest was required to distinguish from leprosy. If a person had any of the above diseases he was brought before the priest to be examined. If the priest found the distinctive signs of a contagious leprosy, the person was immediately declared unclean. If the priest had any doubt on the subject, the person was put under confinement for seven days, when he was examined a second time. If in the course of the preceding week the eruption had made no advance, he was shut up for another seven days; and if then the disease was still stationary, and had none of the distinctive signs above noticed, he was declared clean (Lev. xiii.).

It may be useful here to subjoin a description of elephantiasis, or the leprosy of the middle ages, as this is the disease from which most of the prevalent notions concerning leprosy have been derived, and to which the notices of lepers contained in modern books of travels exclusively refer.

Elephantiasis first of all makes its appearance by spots of a reddish, yellowish, or livid hue, irregularly disseminated over the skin and slightly raised above its surface. These spots are glossy, and appear oily, or as if they were covered with varnish. After they have remained in this way for a longer or shorter time, they are succeeded by an eruption of tubercles. These are soft, roundish tumours, varying in size from that of a pea to that of an olive, and are of a reddish or livid colour. They are principally developed on the face and ears, but in the course of years extend over the whole body. The face becomes frightfully deformed; the forehead is traversed by deep lines and covered with numerous tubercles; the eyebrows become bald, swelled, furrowed by oblique lines, and covered with nipple-like elevations; the eyelashes fall out, and the eyes assume a fixed and staring look; the lips are enormously thickened and shining; the beard falls out; the chin and ears are enlarged and beset with tubercles; the lobe and alæ of the nose are frightfully enlarged and deformed; the nostrils irregularly dilated, internally constricted, and excoriated; the voice is

hoarse and nasal, and the breath intolerably fetid. After some time, generally after some years, many of the tubercles ulcerate, and the matter which exudes from them dries to crusts of a brownish or blackish colour; but this process seldom terminates in cicatrization. The extremities are affected in the same way as the face. The hollow of the foot is swelled out, so that the sole becomes flat; the sensibility of the skin is greatly impaired, and, in the hands and feet, often entirely lost; the joints of the toes ulcerate and fall off one after the other; insupportable fœtor exhales from the whole body. The patient's general health is not affected for a considerable time, and his sufferings are not always of the same intensity as his external deformity. Often, however, his nights are sleepless or disturbed by frightful dreams; he becomes morose and melancholy; he shuns the sight of the healthy, because he feels what an object of disgust he is to them, and life becomes a loathsome burden to him; or he falls into a state of apathy, and after many years of such an existence he sinks either from exhaustion, or from the superintention of internal disease. The Greeks gave the name of elephantiasis to this disease, because the skin of the person affected with it was thought to resemble that of an elephant, in dark colour, ruggedness, and insensibility, or, as some have thought, because the foot, after the loss of the toes, when the hollow of the sole is filled up and the ankle enlarged, resembles the foot of an elephant. About the period of the Crusades elephantiasis spread itself like an epidemic over all Europe, even as far north as the Faroe Islands; and henceforth, owing to the above-named mistakes, every one became familiar with leprosy under the form of the terrible disease that has just been described. Leper or lazarus-houses abounded everywhere; as many as 2000 are said to have existed in France alone. The disease was considered to be contagious possibly only on account of the belief that was entertained respecting its identity with Jewish leprosy, and the strictest regulations were enacted for secluding the diseased from society. Towards the commencement of the seventeenth century the disease gradually disappeared from Europe, and is now confined to intertropical countries. It existed in Faroe as late as 1676, and in the Shetland Islands in 1736, long after it had ceased in the southern parts of Great Britain. The best authors of the present day who have had an opportunity of observing the disease do not consider it to be contagious. There seems, however, to be little doubt as to its being hereditary.

LEVI (*a joining*), the third son of Jacob and Leah, born in Mesopotamia B.C. 1750 (Gen. xxix. 34). No circumstance is recorded of him save the part which he and his full brother Simeon took in the massacre of the Shechemites, to avenge the wrong done to their sister Dinah (Gen. xxxiv. 25, 26). This transaction was to his last hour regarded by Jacob with abhorrence, and he failed not to allude to it in his dying declaration. As Simeon and Levi were united in that act, so the patriarch couples them in his prophecy: 'Accursed be their anger, for it was fierce; and their wrath, for it was cruel! I will divide them in Jacob, and disperse them in Israel.' And, accordingly, their descendants were after-

wards, in different ways, dispersed among the other tribes; although, in the case of Levi, this curse was eventually turned into a benefit and blessing.

LEVATHAN (Job iii. 8; xli. 1; Ps. lxxiv. 14; civ. 26; Isa. xxvii. 1) [BEHEMOTH, CROCODILE, DRAGON]. Gesenius very justly remarks that this word, which denotes any twisted animal, is especially applicable to every great tenant of the waters, such as the great marine serpents and crocodiles, and, it may be added, the colossal serpents and great monitors of the desert. In general it points to the crocodile, and Job xli. is unequivocally descriptive of that Saurian. Probably the Egyptian crocodile is therein depicted in all its magnitude, ferocity, and indolence, such as it was in early days, when as yet unconscious of the power of man, and only individually tamed for the purposes of an imposture, which had sufficient authority to intimidate the public and protect the species, under the sanctified pretext that it was a type of pure water, and an emblem of the importance of irrigation; though the people in general seem ever to have been disposed to consider it a personification of the destructive principle. At a later period the Egyptians, probably of such places as Tentyris, where crocodiles were not held in veneration, not only hunted and slew them, but it appears from a statue that a sort of Bestiarii could tame them sufficiently to perform certain exhibitions mounted on their backs. The intense musky odour of its flesh must have rendered the crocodile, at all times, very unpalatable food, but breast-armor was made of the horny and ridged parts of its back. We have ourselves witnessed a periodical abstinence in the great Saurians, and have known negro women, while bathing, play with young alligators; which, they asserted, they could do without danger, unless they hurt them and thereby attracted the vengeance of the mother; but the impunity most likely resulted from the period of inactivity coinciding with the then state of the young animals, or from the negro women being many in the water at the same time. The occurrence took place at Old Harbour, Jamaica.

LEVITES, the descendants of Levi, through his sons Gershon, Kohath and Merari, whose descendants formed so many sub-tribes or great families of the general body. In a narrower sense the term Levites designates the great body of the tribe employed in the subordinate offices of the hierarchy, to distinguish them from that one family of their body—the family of Aaron—in which the priestly functions were vested.

While the Israelites were encamped before Mount Sinai, the tribe of Levi, to which Moses and Aaron belonged, was, by special ordinance from the Lord, set specially apart for sacerdotal services, in the place of the first-born of the different tribes and families to whom such functions, according to ancient usage, belonged; and which indeed had already been set apart as holy, in commemoration of the first-born of the Israelites having been spared when the first-born of the Egyptians were destroyed (Num. iii. 12, 13, 40-51; Exod. xiii.). When it was determined to set apart a single tribe of Levi for this service, the numbers of the first-born in Israel and of the tribe selected were respectively taken, when it was found that the former amounted to 22,273,

and the latter to 22,000. Those of the first-born beyond the number of the Levites were then redeemed at the rate of five shekels, or 12s. 6d. each, and the money assigned to the priests. At the same time the cattle which the Levites then happened to possess were considered as equivalent to all the firstlings of the cattle which the Israelites had; and, accordingly, the firstlings were not required to be brought, as in subsequent years, to the altar and to the priesthood (Num. iii. 41-51).

In the wilderness the office of the Levites was to carry the Tabernacle and its utensils and furniture from place to place, after they had been packed up by the priests (Num. iv. 4-15). In this service each of the three Levitical families had its separate department; the Gershonites carried the hangings and cords of the Tabernacle, for which they were allowed two wains, each drawn by four oxen (Num. iii. 25, 26; iv. 24-28; vii. 7). The Kohathites carried the ark, the table of shew-bread, the candlestick, the two altars, and such of the hangings as belonged to the sanctuary; for this they had no wains or oxen, the whole being carried upon their shoulders (Num. iii. 31; iv. 4-15; vii. 9); the Merarites had charge of the substantial parts of the Tabernacle—the boards, pillars, bars, bases, &c., and also all the ordinary vessels of service, for which they were allowed four wains and eight oxen (Num. iii. 36, 37; iv. 31, 32; vii. 8). In this manner they proceeded in all their journeys; and when they settled in a place, and had erected the Tabernacle, the different families pitched their tents around it in the following manner: the Gershonites behind it on the west (Num. iii. 23), the Kohathites on the south (iii. 29), the Merarites on the north (iii. 35), and the priests on the east (iii. 38). They all assisted Aaron and his sons in taking care of, and attending on, the Tabernacle, when it was pitched; but they were allowed to take no part in the services of the altar (xviii. 2-7).

This was the nature of their service in the desert; but when they entered the land of Canaan, and the tabernacle ceased to be migratory, the range of their service was considerably altered. While part attended at the tabernacle, the rest were distributed through the country in the several cities which were allotted to them. These cities are commonly reckoned forty-eight; but thirteen of them were reserved for the priests, so that only thirty-five belonged to the Levites. The names of these cities, and the tribes in which they were situated, are given in Josh. xxi. 20-42; 1 Chron. vi. 64-81. Of the forty-eight cities six were cities of refuge for the unintentional homicide, of which one, Hebron, was a priestly city (Deut. iv. 41-43; Josh. xx. 2-9).

In the time of David, when the number of the priests and Levites had much increased, a third and very important alteration was effected, as much, or more, with reference to the Temple, for which he made every possible preparation, as for the existing service at the Tabernacle. While the priests were divided into twenty-four courses, that they might attend the Temple in rotation weekly, and only officiate about two weeks in the year, the Levites were also divided into twenty-four courses. In the book of Chronicles we have four times twenty-four courses of Levites men-

tioned, but all their employments are not distinctly stated (1 Chron. xxiii. 7-23; xxiv. 20-31; xxv. 1-31; xxvi. 1-12). The most conspicuous classification is that of twenty-four courses of porters and servants, and twenty-four of musicians.

The office of the porters was to open and shut the doors and gates of the Temple-courts, at which they also attended throughout the day to prevent the entrance of any harmful or unclean person or thing (1 Chron. xxvi. 17, 18). They had also the charge of the treasure-chambers in their respective wards; for we find four of the chief porters holding this trust in 1 Chron. ix. 26, and their names and the articles in their charge are given in 1 Chron. xxvi. 20-29; 2 Chron. xxxi. 12-14.

Besides acting as porters and servants during the day, we learn that they were also the guards of the Temple. Without entering into specific details, it may be remarked that the whole number of guards to the Temple at night is stated to have been twenty-four, of whom three were priests. These are described as having been under an overseer called 'the man of the mountain of the house.' He went his rounds to see that the guards were at their posts: if he found any one seated who should have been standing, he said, 'Peace be unto thee;' but if he found any one asleep, he struck him, and sometimes set fire to his clothes.

We have thus seen that one division of the Levites was employed as porters during the day, and another as guards during the night: a third division served as musicians. A catalogue of these is given in 1 Chron. xxi. 1-9, according to their employments; and another, according to their courses, in 1 Chron. xxi. 9-31. We shall have to speak of Music under that head, and need only here state that on grand occasions, when a full band was formed, the family of Heman sung in the middle (1 Chron. vi. 33-38), the family of Asaph on the right hand (vi. 39-43), and the family of Ethan on the left. The ordinary place for the musicians, vocal and instrumental, was at the east end of the court of the priests, between the court of Israel and the altar.

It seems that the singers could never be under twelve, because that number was particularly mentioned at their first appointment (1 Chron. xxv. 9); but there was no objection to any larger number. The young sons of the Levites were, on such occasions only, allowed to enter the court of the priests with their fathers, that their small voices might relieve the deep bass of the men; and for this authority was supposed to be found in Ezra iii. 9.

The Levites were not at liberty to exercise any properly sacerdotal functions; but on extraordinary occasions they were permitted to assist in preparing the sacrifices, without, however, in any way concerning themselves with the blood (2 Chron. xxix. 34; xxx. 16, 17; xxxv. 1).

In Num. iv. 3 the Levites are described as commencing their actual service at thirty years of age; but in Num. viii. 24, 25, twenty-five is the age mentioned; and in 1 Chron. xxiii. 24, 25, and Ezra iii. 8, twenty. The reason of these apparent discrepancies is, that from twenty-five to thirty they were in the state of probationers, doing some things, but excluded from others (Aben Ezra, on Num. viii.). At thirty they be-

came qualified for every part of the Levitical service. This was under the Tabernacle; but when the Temple was built, and bodily strength was less required, the age was reduced to twenty. After fifty they were no longer called upon to serve as a matter of obligation; but they might attend if they thought proper, and perform any usual service which was not considered burdensome. Thus, in the wilderness, they ceased at that age to carry any part of the burdens when the ark and Tabernacle were removed (Num. viii. 25, 26).

When the Levitical body was first set apart for its sacred duties, the existing members were consecrated in the manner particularly described in Num. viii. 6, 22. They, and in them their descendants, were thus inducted into their particular office; and, in later times, when any one became of age, it was sufficient for his admission to prove that he belonged to a Levitical family, and, probably, to offer some trifling sacrifice. It does not appear that the Levites, when at home, had any particular dress to distinguish them from their countrymen; nor is there any positive evidence that they had any distinctive garb, even when on actual service at the tabernacle or temple. Josephus relates that only six years before the destruction of the Temple by the Romans, the Levites were allowed by Agrippa to wear a linen tunic, like the priests—an innovation with which the latter were highly displeased. This shows that the dress of the Levites, even when on duty, had not previously been in any respect similar to that of the priests.

The subsistence of the Levites was provided for in a peculiar manner. It consisted, first, of a compensation for the abandonment of their right to one-twelfth of the land of Canaan; and, secondly, of a remuneration for their services in their official capacity as devoted to the services of the sanctuary. The territorial compensation lay in the 48 cities which were granted to the whole tribe, including the priests. These cities were scattered among the different tribes, as centres of instruction, and had 1000 square cubits, equal to above 305 English acres, attached to each of them, to serve for gardens, vineyards, and pasturage. It is obvious, however, that this alone could not have been an adequate compensation for the loss of one-twelfth of the soil, seeing that the produce of 305 acres could not in any case have sufficed for the wants of the inhabitants of these cities. The further provision, therefore, which was made for them must be regarded as partly in compensation for their sacrifice of territory, although we are disposed to look upon it as primarily intended as a remuneration for the dedication of their services to the public. This provision consisted of the tithe, or tenth of the produce of the grounds allotted to the other tribes. The simplest view of this payment is to regard it, first, as the produce of about as much land as the Levites would have been entitled to if placed on the same footing with regard to territory as the other tribes; and also as the produce of so much more land, which the other tribes enjoyed in consequence of its not having been assigned to the tribe of Levi. In giving the produce of this land to the Levites the Israelites were therefore to be regarded as simply releasing them from the cares of agriculture, to enable

them to devote themselves to the service of the sanctuary. The land which produced the tithe was just so much land held by the other tribes in their behalf; and the labour of cultivating this land was the salary paid to the Levites for their official services. The tenth was paid to the whole tribe of Levi; but as the Levites had to give out of this one-tenth to the priests, their own allowance was only nine-tenths of the tenth. A more particular account of tithes belongs to another head [TITHES]. The Levites had also a certain interest in the 'second tithe,' being the portion which, after the first tithe had been paid, the cultivator set apart for hospitable feasts, which were held at the place of the sanctuary in two out of three years, but in the third year at home. This interest, however, extended no further than that the offerer was particularly enjoined to invite the priests and Levites to such feasts.

The earliest notice we have of the numbers of the Levites occurs at their first separation in the desert, when there were 22,300, of a month old and upwards; of whom 8580 were fit for service, or between the ages of 30 and 50 (Num. iii. 22, 28, 34; iv. 2, 34-49). Thirty-eight years after, just before the Israelites entered Canaan, they had increased to 23,000, not one of whom had been born at the time of the former enumeration (Num. xxvi. 57, 62-65). About 460 years after the entry into Canaan (B.C. 1015) they were again numbered by David, a little before his death, and were found to have increased to 38,000 men fit for Levitical service—of whom 24,000 were 'set over the work of the Lord,' 6000 were officers and judges, 4000 were porters, and 4000 were musicians (1 Chron. xxiii. 3, 4, 5). If the same proportion then existed between those come of age and those a month old which existed when the tribe quitted Egypt, the entire number of the Levitical body, in the time of David, must have been 96,433.

After the revolt of the ten tribes, those of the Levites who resided in the territories of those tribes, having resisted the request of Jeroboam to transfer their services to his idolatrous establishments at Dan and Bethel, were obliged to abandon their possessions and join their brethren in Judah and Benjamin (2 Chron. xi. 12, 13, 14; xiii. 9); and this concentration of the Levitical body in the kingdom of Judah must have had an important influence upon its condition and history. That kingdom thus actually consisted of three tribes—Judah, Benjamin, and Levi—of which one was devoted to sacerdotal uses. This altered position of the Levites—after they had been deprived of most of their cities, and the tithes from ten of the tribes were cut off—presents a subject for much interesting investigation, into which we cannot enter. Their means must have been much reduced; for it cannot be supposed that Judah and Benjamin alone were able, even if willing, to undertake the support of the whole Levitical body on the same scale as when the dues of all Israel flowed into its treasuries. In the subsequent history of Judah the Levites appear less frequently than might have been expected. The chief public measure in which they were engaged was the restoration of the house of David in the person of young Joash (2 Chron. xxiii. 1-11); which may be regarded as mainly the work of the Levitical body, including the priests.

Under the edict of Cyrus, only 341 Levites, according to Ezra (ii. 40-42), or 350, according to Nehemiah (vii. 43-45), returned with Zerubbabel to Jerusalem. This is less surprising than might at first sight appear: for if, before the captivity, the great body of them had been in straitened circumstances and without fixed possessions in Judah, it was only consistent with human prudence that those who had, in all probability, comfortably settled themselves in Babylon, should not be anxious to return in such numbers to Palestine as were likely to produce similar effects. A few more are mentioned in Neh. xii. 24-26. Those who did return seem to have had no very correct notion of their obligations and duties; for there were many who formed matrimonial alliances with the idolaters of the land, and thereby corrupted both their morals and genealogies. But they were prevailed upon to reform this abuse; and, as a token of obedience, signed the national covenant with Nehemiah, and abode at Jerusalem to influence others by their authority and example (Neh. x. 9-13; xi. 15-19).

The Levites are not mentioned in the Apocryphal books, and very slightly in the New Testament (Luke x. 32; John i. 19; Acts iv. 36); but the 'scribes' and the 'lawyers,' so often named in the Gospels, are usually supposed to have belonged to them.

It would be taking a very narrow view of the duties of the Levitical body if we regarded them as limited to their services at the sanctuary. On the contrary, we see in their establishment a provision for the religious and moral instruction of the great body of the people, which no ancient lawgiver except Moses ever thought of attending to. But that this was one principal object for which a twelfth of the population—the tribe of Levi—was set apart, is clearly intimated in Deut. xxxii. 9, 10: 'They shall teach Jacob thy judgments and Israel thy law; they shall put incense before thee, and whole burnt sacrifice upon thine altar.' They were to read the volume of the law publicly every seventh year at the Feast of Tabernacles (Deut. xxxi. 10-13). 'This public and solemn periodical instruction,' observes Dean Graves (*Lectures*, p. 170), 'though eminently useful, was certainly not the entire of their duty; they were bound from the spirit of this ordinance to take care that at all times the aged should be improved and the children instructed in the knowledge and fear of God, the adoration of his majesty, and the observance of his law; and for this purpose the peculiar situation and privileges of the tribe of Levi, as regulated by the divine appointment, admirably fitted them.'

LEVITICUS, the third book of Moses.

CONTENTS.—Leviticus contains the further statement and development of the Sinaitic legislation, the beginnings of which are described in Exodus. It exhibits the HISTORICAL progress of this legislation; consequently we must not expect to find the laws detailed in it in a systematic form. There is, nevertheless, a certain order observed, which arose from the nature of the subject, and of which the plan may easily be perceived. The whole is intimately connected with the contents of Exodus, at the conclusion of which book that sanctuary is described with which all external worship was connected (Exod. xxxv.-xl.).

Some critics have strenuously endeavoured to prove that the laws contained in Leviticus originated in a period much later than is usually supposed. But the following observations sufficiently support their Mosaic origin, and show that the whole of Leviticus is historically genuine. The laws in ch. i-vii. contain manifest vestiges of the Mosaic period. Here, as well as in Exodus, when the priests are mentioned, Aaron and his sons are named; as, for instance, in ch. i. 4, 7, 8, 11, &c. The tabernacle is the sanctuary, and no other place of worship is mentioned anywhere. Expressions like the following constantly occur, *before the tabernacle of the congregation, or the door of the tabernacle of the congregation* (ch. i. 3; iii. 8, 13, &c.). The Israelites are always described as a congregation (ch. iv. 13, sq.), under the command of the *elders of the congregation* (ch. iv. 15), or of a *ruler* (ch. iv. 22). Every thing has a reference to life in a camp, and that camp commanded by Moses (ch. iv. 12, 21; vi. 11; xiv. 8; xvi. 26, 28). A later writer could scarcely have placed himself so entirely in the times, and so completely adopted the modes of thinking of the age, of Moses: especially if, as has been asserted, these laws gradually sprung from the usages of the people, and were written down at a later period with the object of sanctioning them by the authority of Moses. They so entirely befit the Mosaic age, that, in order to adapt them to the requirements of any later period, they must have undergone some modification, accommodation, and a peculiar mode of interpretation. This inconvenience would have been avoided by a person who intended to forge laws in favour of the later modes of Levitical worship. A forger would have endeavoured to identify the past as much as possible with the present.

In ch. xvii. occurs the law which forbids the slaughter of any beast except at the sanctuary. This law could not be strictly kept in Palestine, and had therefore to undergo some modification (Deut. xii.). Our opponents cannot show any rational inducement for contriving such a fiction. The law (ch. xvii. 6, 7) is adapted to the nation only while emigrating from Egypt. It was the object of this law to guard the Israelites from falling into the temptation to imitate the Egyptian rites and sacrifices offered to he-goats; which word signifies also demons represented under the form of he-goats, and which were supposed to inhabit the desert.

The laws concerning food and purifications appear especially important if we remember that the people emigrated from Egypt. The fundamental principle of these laws is undoubtedly Mosaic, but in the individual application of them there is much which strongly reminds us of Egypt. This is also the case in Lev. xviii. sq., where the lawgiver has manifestly in view the two opposites, Canaan and Egypt. That the lawgiver was intimately acquainted with Egypt, is proved by such remarks as those about the Egyptian marriages with sisters (ch. xviii. 3); a custom which stands as an exception among the prevailing habits of antiquity.

The book of Leviticus has a prophetic character. The lawgiver represents to himself the future history of his people. This prophetic character is especially manifest in chs. xxv.,

xxvi., where the law appears in a truly sublime and divine attitude, and when its predictions refer to the whole futurity of the nation. It is impossible to say that these were prophecies delivered after the event, unless we would assert that this book was written at the close of Israelitish history. We must rather grant that passages like these are the real basis on which the authority of later prophets is chiefly built. Such passages prove also, in a striking manner, that the lawgiver had not merely an external aim, but that his law had a deeper purpose, which was clearly understood by Moses himself. That purpose was to regulate the national life in all its bearings, and to consecrate the whole nation to God. See especially ch. xxv. 18, sq.

But this ideal tendency of the law does not preclude its applicability to matters of fact. The law had not merely an *ideal*, but also a *real* character, evidenced by its relation to the faithlessness and disobedience of the nation. The whole future history of the covenant people was regulated by the law, which has manifested its eternal power and truth in the history of the people of Israel. Although this section has a general bearing, it is nevertheless manifest that it originated in the times of Moses. At a later period, for instance, it would have been impracticable to promulgate the law concerning the Sabbath and the year of Jubilee: for it was soon sufficiently proved how far the nation in reality remained behind the ideal Israel of the law. The sabbatical law bears the impress of a time when the whole legislation, in its fulness and glory, was directly communicated to the people, in such a manner as to attract, penetrate, and command.

LIBERTINES. 'Certain of the synagogue, which is called (the synagogue) of the *Libertines*, and Cyrenians, and Alexandrians,' &c., are mentioned in Acts vi. 9. There has been much diversity in the interpretation of this word. The most probable opinion, and that which is now generally entertained, is, that the Libertini were Jews, whom the Romans had taken in war and conveyed to Rome, but afterwards freed; and that this synagogue had been built at their expense. Libertini is, therefore, to be regarded as a word of Roman origin, and to be explained with reference to Roman customs. Further, we know that there were in the time of Tiberius many *libertini*, or 'freed-men,' of the Jewish religion at Rome.

LIBNAH, one of the royal cities of the Canaanites, taken by Joshua immediately after Makkedah (Josh. x. 29, 30). It lay within the territory assigned to Judah (Josh. xv. 42), and became one of the Levitical towns in that tribe (Josh. xxi. 13; 1 Chron. vi. 57). It was a strongly fortified place. The Assyrian king Sennacherib was detained some time before it when he invaded Judah in the time of Hezekiah; and it was before it that he sustained that dreadful stroke which constrained him to withdraw to his own country (2 Kings xix. 8; Isa. xxxvii. 3). In the reign of King Jehoram, Libnah is said to have revolted from him (2 Kings viii. 22; 2 Chron. xxi. 10). Libnah existed as a village in the time of Eusebius and Jerome, and is placed by them in the district of Eleuthropolis.

LIB'NATH, or, more fully, **SHIHOR-LIBNATH**, a stream near Carmel, on the borders of Asher (Josh. xix. 26). Michaelis conceives this to be the 'glass-river,' i. e. the Belus, from whose sands the first glass was made by the Phenicians.

LIBYA. This name, in its largest acceptation, was used by the Greeks to denote the whole of Africa. But Libya Proper, which is the Libya of the New Testament and the country of the Lubim in the Old, was a large tract, lying along the Mediterranean, to the west of Egypt.

Libya is supposed to have been first peopled by, and to have derived its name from, the Lehabim or Lubim [NATIONS, DISPERSION OF]. These, its earliest inhabitants, appear, in the time of the Old Testament, to have consisted of wandering tribes, who were sometimes in alliance with Egypt, and at others with the Ethiopians, as they are said to have assisted both Shishak, king of Egypt, and Zerah the Ethiopian in their expeditions against Judæa (2 Chron. xii. 4; xiv. 8; xvi. 9). They were eventually subdued by the Carthaginians; and it was the policy of that people to bring the nomade tribes of Northern Africa which they mastered into the condition of cultivators, that by the produce of their industry they might be able to raise and maintain the numerous armies with which they made their foreign conquests. But Herodotus assures us that none of the Libyans beyond the Carthaginian territory were tillers of the ground. Since the time of the Carthaginian supremacy the country, with the rest of the East, has successively passed into the hands of the Greeks, Romans, Saracens, and Turks. The name of Libya occurs in Acts ii. 10, where 'the dwellers in the parts of Libya about Cyrene' are mentioned among the stranger Jews who came up to Jerusalem at the feast of Pentecost.

LICE occurs in Exod. xiii. 16, 17, 18 (Heb. 12, 13, 14); Ps. cv. 31. The name of the creature, employed in the third plague upon Egypt, miraculously produced from the dust of the land. Its exact nature has been much disputed. Those who suppose the name to be derived from a Hebrew word which means *to fix, settle, or establish*, infer lice to be meant, from their fixing themselves on mankind, animals, &c. Dr. A. Clarke has further inferred from the words '*in man and in beast*,' that it was the 'tick.' It is probable, however, that not lice, but some species of gnats is the proper rendering. It is not a valid objection, that if this plague were gnats, &c., the plague of flies would be anticipated, since the latter most likely consisted of one particular species having a different destination [FLY]; whereas this may have consisted of not only mosquitoes or gnats, but of some other species which also attack domestic cattle, as the *astus*, or *tabanus*, or *zimb*; on which supposition these two plagues would be sufficiently distinct.

But since mosquitoes, gnats, &c., have ever been one of the evils of Egypt, there must have been some peculiarity attending them on this occasion, which proved the plague to be 'the finger of God.' From the next chapter, ver. 31, it appears that the flax and the barley were smitten by the hail; that the former was beginning to grow, and that the latter was in the ear—which, according to Shaw, takes place in

Egypt in March. Hence these gnats would be sent about February, i. e. before the increase of the Nile, which takes place at the end of May, or beginning of June. Since, then, the innumerable swarms of mosquitoes, gnats, &c., which every year affect the Egyptians come, according to Hasselquist, at the increase of the Nile, the appearance of them in February would be as much a variation of the course of nature as the appearance of the gadfly in January would be in England. They were also probably numerous and fierce beyond example on this occasion; and as the Egyptians would be utterly unprepared for them (for it seems that this plague was not announced), the effects would be signally distressing. For a description of the evils inflicted by these insects upon man, see Kirby and Spence, *Introduction to Entomology*, Lond. 1828, i. 115, &c.

LIGHT is represented in the Scriptures as the immediate result and offspring of a divine command (Gen. i. 3). The earth was void and dark, when God said, 'Let light be, and light was.' This is represented as having preceded the placing of 'lights in the firmament of heaven, the greater light to rule the day, and the lesser light to rule the night: he made the stars also' (Gen. i. 14, sq.). Whatever opinion may be entertained as to the facility with which these two separate acts may be reconciled, it cannot be questioned that the origin of light, as of every other part of the universe, is thus referred to the exertion of the divine will: as little can it be denied that the narrative in the original is so simple, yet at the same time so majestic and impressive, both in thought and diction, as to fill the heart with a lofty and pleasurable sentiment of awe and wonder.

The divine origin of light made the subject one of special interest to the Biblical nations—the rather because light in the East has a clearness, a brilliancy, is accompanied by an intensity of heat, and is followed in its influence by a largeness of good, of which the inhabitants of less genial climes can have no conception. Light easily and naturally became, in consequence, with Orientals, a representative of the highest human good. All the more joyous emotions of the mind, all the pleasing sensations of the frame, all the happy hours of domestic intercourse, were described under imagery derived from light (1 Kings xi. 36; Isa. lviii. 8; Esther viii. 16; Ps. cxvii. 11). The transition was natural from earthly to heavenly, from corporeal to spiritual things; and so light came to typify true religion and the felicity which it imparts. But as light not only came from God, but also makes man's way clear before him, so it was employed to signify moral truth, and pre-eminently that divine system of truth which is set forth in the Bible, from its earliest gleamings onward to the perfect day of the Great Sun of Righteousness. The application of the term to religious topics had the greater propriety because the light in the world, being accompanied by heat, purifies, quickens, enlivenes; which efforts it is the peculiar province of true religion to produce in the human soul (Isa. viii. 20; Matt. iv. 16; Ps. cxix. 105; 2 Pet. i. 19; Eph. v. 8; 2 Tim. i. 10; 2 Pet. ii. 9).

It is doubtless owing to the special providence

under which the divine lessons of the Bible were delivered, that the views which the Hebrews took on this subject, while they were high and worthy, did not pass into superstition, and so cease to be truly religious. Other Eastern nations beheld the sun when it shined, or the moon walking in brightness, and their hearts were secretly enticed, and their mouth kissed their hand in token of adoration (Job xxxi. 26, 27). This 'iniquity' the Hebrews not only avoided, but when they considered the heavens they recognised the work of God's fingers, and learnt a lesson of humility as well as of reverence (Ps. viii. 3, sq.).

Among the personifications on this point which Scripture presents we may specify, 1. God. The Apostle James (i. 17) declares that 'every good and perfect gift cometh down from the Father of lights, with whom is no variableness, neither shadow of turning'; obviously referring to the faithfulness of God, and the constancy of his goodness, which shine on undimmed and unshadowed. So Paul (1 Tim. vi. 16); 'God who dwelleth in the light which no man can approach unto.' Here the idea intended by the imagery is the incomprehensibility of the self-existent and eternal God.

2. Light is also applied to Christ: 'The people who sat in darkness have seen a great light' (Matt. iv. 16; Luke ii. 32; John i. 4, sq.). 'He was the true light': 'I am the light of the world' (John viii. 12; xii. 35, 36).

3. It is further used of angels, as in 2 Cor. xi. 14: 'Satan himself is transformed into an angel of light.' 4. Light is moreover employed of men: John the Baptist 'was a burning and a shining light' (John v. 35); 'Ye are the light of the world' (Matt. v. 14; see also Acts xiii. 47; Eph. v. 8).

LIGN ALOES. [ALOE.]

FIGURE. The Hebrew word *Leshem* is thus rendered in Exod. xxviii. 19; xxxix. 12; and in Rev. xxi. 20 it is put as equivalent to the *Jacinth* or *Hyacinth*; and it is certain that the figure and the *jacinth* are regarded as the same stone. The prevailing colour of the *jacinth* is orange-yellow-red; which passes over sometimes into reddish-brown, sometimes into brownish and pale red, and sometimes into imperfect pistachio green. It is harder than the emerald, but the artists of antiquity frequently engraved upon it. It comes to us from the East Indies.

LILY. This plant is mentioned in the well-known and beautiful passage (Matt. vi. 26): 'Consider the lilies of the field, how they grow; they toil not, neither do they spin, and yet I say unto you, that even Solomon, in all his glory, was not arrayed like one of these;' so also in Luke xii. 27. Here it is evident that the plant alluded to must have been indigenous or grown wild, in the vicinity of the sea of Galilee, must have been of an ornamental character, and, from the Greek name given to it, of a liliaceous nature. Travellers in Palestine mention that in the month of January the fields and groves everywhere abound with various species of lily, tulip, and narcissus. Benard noticed, near Acre, on Jan. 18th, and about Jaffa, on the 23rd, tulips, white, red, blue, &c. Gumpenberg saw the meadows of Galilee covered with the same flowers on the 31st. Tulips figure conspicuously among the flowers of Palestine. So Pococke says, 'I

saw many tulips growing wild in the fields (in March), and any one who considers how beautiful those flowers are to the eye, would be apt to conjecture that these are the lilies to which Solomon in all his glory was not to be compared.' This is much more likely to be the plant intended than some others which have been adduced, as, for instance, the scarlet *amaryllis*, having white flowers with bright purple streaks, found by Salt at Adowa. Others have preferred the *Yonan imperial*, which is a native of Persia and Cashmere. Most authors have united in considering the white lily, *Lilium candidum*, to be the plant to which our Saviour referred; but it is doubtful whether it has ever been found in a wild state in Palestine. This opinion is confirmed by a correspondent at Aleppo, who has resided long in Syria, but is acquainted only with the botany of Aleppo and Antioch: 'I never saw the white lily in a wild state, nor have I heard of its being so in Syria. It is cultivated here on the roofs of the houses in pots as an exotic bulb, like the daffodil.' The following extract of a letter from Dr. Bowring throws a new light upon the subject: 'I cannot describe to you with botanical accuracy the lily of Palestine. I heard it called by the title of *Lilia syriaca*, and I imagine under this title its botanical characteristics may be hunted out. Its colour is a brilliant red; its size about half that of the common tiger lily. The white lily I do not remember to have seen in any part of Syria. It was in April and May that I observed my flower, and it was most abundant in the district of Galilee, where it and the *Rhododendron* (which grew in rich abundance round the paths) most strongly excited my attention.' On this Dr. Lindley observes, 'It is clear that neither the white lily, nor the *Oporanthus luteus*, nor *Ixoliolirion*, will answer to Dr. Bowring's description, which seems to point to the Chalcidonian or scarlet *martagon* lily, formerly called the lily of Byzantium, found from the Adriatic to the Levant, and which, with its scarlet turban-like flowers, is indeed a most stately and striking object.' As this lily (the *Lilium chalcidonicum* of botanists) is in flower at the season of the year when the sermon on the Mount is supposed to have been spoken, is indigenous in the very locality, and is conspicuous, even in the garden, for its remarkable showy flowers, there can now be little doubt that it is the plant alluded to by our Saviour.

LINEN, FINE. The word *Shesh*, thus translated in the Authorized Version, occurs twenty-eight times in Exodus, once in Genesis, once in Proverbs, and three times in Ezekiel. Considerable doubts have, however, always been entertained respecting the true meaning of the word; but it appears to us to signify hemp, which is a plant that in the present day is extensively distributed, being cultivated in Europe, and extending through Persia to the southernmost parts of India. In the plains of that country it is cultivated on account of its intoxicating product, so well known as *bang*; in the Himalayas both on this account and for its yielding the ligneous fibre which is used for sack and rope-making. There is no doubt that it might easily have been cultivated in Egypt. Herodotus mentions it as being employed by the Thracians for making garments. 'These were so like linen, that none but a very

experienced person could tell whether they were of hemp or flax; one who had never seen hemp would certainly suppose them to be linen.' Hemp is used in the present day for smockfrocks and tunics; and Russia sheeting and Russia duck are well known. Dioscorides describes it as being employed for making ropes, and it was a good deal cultivated by the Greeks for this purpose. Though we are unable at present to prove that it was cultivated in Egypt at an early period, and used for making garments, yet there is nothing improbable in its having been so. Indeed, as it was known to various Asiatic nations, it could hardly have been unknown to the Egyptians. Hemp might thus have been used at an early period, along with flax and wool, for making cloth for garments and for hangings, and would be much valued until cotton and the finer kinds of linen came to be known.

L'INUS, one of the Christians at Rome whose salutations Paul sent to Timothy (2 Tim. iv. 21). He is said to have been the first bishop of Rome after the martyrdom of Peter and Paul.

LION, the most powerful, daring, and impressive of all carnivorous animals, the most magnificent in aspect and awful in voice. Being very common in Syria in early times, the lion naturally supplied many forcible images to the poetical language of Scripture, and not a few historical incidents in its narratives. This is shown by the great number of passages where this animal, in all the stages of existence—as the whelp, the young adult, the fully mature, the lioness—occurs under different names, exhibiting that multiplicity of denominations which always results when some great image is constantly present to the popular mind. Thus we have, 1. *Gor*, a lion's whelp, a very young lion (Gen. xlix. 9; Deut. xxxiii. 20; Jer. li. 38; Ezek. xix. 2; Nahum ii. 11, 12, &c.). 2. *Chephir*, a young lion, when first leaving the protection of the old pair to hunt independently (Ezek. xix. 2, 3; Ps. xci. 13; Prov. xix. 12, &c.). 3. *Ari*, an adult and vigorous lion, a lion having paired, vigilant and enterprising in search of prey (Nahum ii. 12; 2 Sam. xvii. 10; Num. xxiii. 24). This is the common name of the animal. 4. *Sachal*, a mature lion in full strength; a black lion? (Job iv. 10; x. 16; Ps. xci. 13; Prov. xxvi. 13; Hosea v. 14; xiii. 7). This denomination may very possibly refer to a distinct variety of lion, and not to a black species or race, because neither black nor white lions are recorded, excepting in Opian; but the term may be safely referred to the colour of the skin, not of the fur;

for some lions have the former fair, and even rosy, while in other races it is perfectly black. An Asiatic lioness, formerly at Exeter Change, had the naked part of the nose, the roof of the mouth, and the bare soles of all the feet pure black, though the fur itself was very pale buff. 5. *Laish*, a fierce lion, one in a state of fury (Job iv. 11; Prov. xxx. 30; Isa. xxx. 6). 6. *Lahia*, a lioness (Job iv. 11, where the lion's whelps are denominated 'the sons of Lahia,' (or of the lioness)).

The lion is the largest and most formidably armed of all carnassier animals, the Indian tiger alone claiming to be his equal. One full grown, of Asiatic race, weighs above 450 pounds, and those of Africa often above 500 pounds. The fall of a fore paw in striking has been estimated to be equal to twenty-five pounds' weight, and the grasp of the claws, cutting four inches in depth, is sufficiently powerful to break the vertebrae of an ox. The huge laniary teeth and jagged molars worked by powerful jaws, and the tongue entirely covered with horny papillae, hard as a rasp, are all subservient to an immensely strong, muscular structure, capable of prodigious exertion, and minister to the self-confidence which these means of attack inspire. In Asia the lion rarely measures more than nine feet and a half from the nose to the end of the tail, though a tiger-skin of which we took the dimensions was but a trifle less than 13 feet. In Africa they are considerably larger, and supplied with a much greater quantity of mane. Both tiger and lion are furnished with a small horny apex to the tail—a fact noticed by the ancients, but only verified of late years, because this object lies concealed in the hair of the tip, and is very liable to drop off. All the varieties of the lion are spotted when whelps; but they become gradually buff or pale. One African variety, very large in size, perhaps a distinct species, has a peculiar and most ferocious physiognomy, a dense black mane extending half way down the back, and a black fringe along the abdomen and tip of the tail; while those of southern Persia and the Dekkan are nearly destitute of that defensive ornament. The roaring voice of the species is notorious to a proverb, but the warning cry of attack is short, snappish, and sharp. Like all the feline, they are more or less nocturnal, and seldom go abroad to pursue their prey till after sunset. When not pressed by hunger, they are naturally indolent, and, from their habits of uncontrolled superiority, perhaps capricious, but often less sanguinary and vindictive than is expected.

Lions are monogamous, the male living constantly with the lioness, both hunting together, or for each other when there is a litter of whelps; and the mutual affection and care for their offspring which they display are remarkable in animals by nature doomed to live by blood and slaughter. It is while seeking prey for their young that they are most dangerous; at other times they bear abstinence, and when pressed by hunger will sometimes feed on carcasses found dead. They live to more than fifty years; consequently, having annual litters of from three to five cubs, they multiply rapidly when not seriously opposed. In ancient times, when the devastations of Egyptian, Persian, Greek, and Roman armies passed over Palestine, there can

be little doubt that these destroyers made their appearance in great numbers. The fact, indeed, is attested by the impression which their increase made upon the mixed heathen population of Samaria, when Israel was carried away into captivity (2 Kings xvii. 25, 26).

The Scriptures present many striking pictures of lions, touched with wonderful force and fidelity: even where the animal is a direct instrument of the Almighty, while true to his mission, he still remains so to his nature. Thus nothing can be more graphic than the record of the man of God (1 Kings xiii. 28), disobedient to his charge, struck down from his ass, and lying dead, while the lion stands by him, without touching the lifeless body, or attacking the living animal, usually a favourite prey. See also Gen. xlix. 9; Job iv. 10, 11; Nahum ii. 11, 12. Samson's adventure also with the young lion (Judg. xiv. 5, 6), and the picture of the young lion coming up from the underwood cover on the banks of the Jordan, all attest a perfect knowledge of the animal and its habits. Finally, the lions in the den with Daniel, miraculously leaving him unquiescent, still retain, in all other respects, the real characteristics of their nature.

The lion, as an emblem of power, was symbolic of the tribe of Judah (Gen. xlix. 9). The type recurs in the prophetic visions, and the figure of this animal was among the few which the Hebrews admitted in sculpture, or in cast metal, as exemplified in the throne of Solomon. Lions, in remote antiquity, appear to have been trained for the chase, and are, even now, occasionally domesticated with safety. Placability and attachment are displayed by them even to the degree of active defence of their friends, as was exemplified at Birr, in Ireland, in 1819, when 'a keeper of wild beasts, being within the den, had fallen accidentally upon a tiger, who immediately caught the man by the thigh, in the presence of numerous spectators; but a lion, being in the same compartment, rose up, and seizing the tiger by the neck, compelled it to let go, and the man was saved.' Numerous anecdotes of a similar character are recorded both by ancient and modern writers.

Zoologists consider Africa the primitive abode of lions, their progress towards the north and west having at one time extended to the forests of Macedonia and Greece; but in Asia, never to the south of the Nerbudda, nor east of the lower Ganges. Since the invention of gunpowder, and even since the havoc which the ostentatious barbarism of Roman grandees made among them, they have diminished in number exceedingly, although at the present day individuals are not unfrequently seen in Barbary, within a short distance of Cæuta.

LITTER. The word translated litter, in Isa. lxi. 20, is the same which, in Num. vii. 3, denotes the wains or carts *drawn* by oxen, in which the materials of the tabernacle were removed from place to place. It was not, therefore, a litter, which is not drawn, but carried. This is the only place in which the word occurs in the Authorized translation. We are not, however, to infer from this that the Hebrews had no vehicles of the kind. Litters or palanquins were, as we know, in use among the ancient Egyptians. They were borne upon the shoulders of men (No.

233), and appear to have been used for carrying persons of consideration short distances on visits, like the sedan chairs of a former day in England. We doubt if the Hebrews had this kind of litter, as it scarcely agrees with their simple, unluxurious habits; but that they had litters borne by beasts, such as are still common in Western Asia, seems in the highest degree probable.

In Cant. iii. 9 we find a word which occurs nowhere else in Scripture, and is applied to a vehicle used by king Solomon. This word is rendered 'chariot' in our Authorized version, although unlike any other word so rendered in that version. It literally means a *moring couch*, and is usually conceived to denote a kind of

233.

sedan, litter, or rather palanquin, in which great personages and women were borne from place to place. The name, as well as the object, immediately suggests that it may have been nearly the same thing as the *moring throne* or *seat* of the Persians. It consists of a light frame fixed on

234.

two strong poles, like those of our sedan-chair. The frame is generally covered with cloth, and has a door, sometimes of lattice work, at each side. It is carried by two mules, one between the poles before, the other behind. These conveyances are used by great persons when disposed for retirement or ease during a journey, or when sick or feeble from age. But they are chiefly used by ladies of consideration in their journeys (No. 234).

The popular illustrators of Scripture do not appear to have been acquainted with this and the other litters of Western Asia; and have, therefore, resorted to India, and drawn their illustrations from the palanquins borne by men, and from the *howdahs* of elephants. This is unnecessary, as Western Asia still supplies conveyances of this description, more suitable and more likely to have been anciently in use, than any which the further east can produce. If the one already described should seem too humble, there are other takht-ravans of more imposing appearance. Some readers may remember the 'litter of red cloth,

adorned with pearls and jewels,' together with ten mules (to bear it by turns), which the king Zahr Shah prepared for the journey of his daughter. This was, doubtless, of the kind which is borne by four mules, two behind and two before. In Arabia, or in the countries where Arabian usages prevail, two camels are usually employed to bear the *takht-ravan*, and sometimes two horses. When borne by camels, the head of the hindmost of the animals is bent painfully down under the vehicle. This is the most comfortable kind of litter, and two light persons may travel in it.

235.

The *shibreeyeh* is another kind of camel-litter, resembling the Indian *hoordah*, by which name (or rather *hódaj*) it is sometimes called. It is composed of a small square platform with a canopy or arched covering. It accommodates

236.

but one person, and is placed upon the back of a camel, and rests upon two square camel-chests, one on each side of the animal. It is very evident, not only from the text in view, but from others, that the Hebrews had litters; and there is little reason to doubt that they were the same as those now employed in Palestine and the neighbouring countries, where there are still the same circumstances of climate, the same domestic animals, and essentially the same habits of life, as in the Biblical period.

LIVER occurs in Exod. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4; viii. 16, 25; ix. 10, 19; Prov. vii. 23; Lam. ii. 11; Ezek. xxi. 21. In all the instances where the word occurs in the Pentateuch, it forms part of the phrase translated in the Authorized Version 'the caul that is above the liver,' but which Gesenius understands to be the great lobe of the liver itself, rather than the caul over it. Jahn thinks the smaller lobe to be meant. It appears from the same passages that it was burnt upon the altar, and not eaten as sacrificial food. The liver was supposed by the ancient Jews, Greeks, and Romans, to be the seat

of the passions, pride, love, &c. Thus, Gen. xlix. 6, 'with their assembly let not' literally 'my liver be united.' Wounds in the liver were supposed to be mortal; thus the expressions in Prov. vii. 23, 'a dart through his liver,' and Lam. ii. 11, 'my liver is poured out upon the earth,' are each of them a periphrasis for death itself. The passage in Ezekiel (ch. xxi. 21) contains an interesting reference to the most ancient of all modes of divination, by the inspection of the viscera of animals and even of mankind sacrificially slaughtered for the purpose. It is there said that the king of Babylon, among other modes of divination, referred to in the same verse, 'looked upon the liver.' The liver was always considered the most important organ in the ancient art of divination by the entrails. Philostratus felicitously describes it as 'the prophesying tripod of all divination.' It is an interesting inquiry how this regard to it originated. Vitruvius suggests a plausible theory of the first rise of divination by the liver. He says the ancients inspected the livers of those animals which frequented the places where they wished to settle; and if they found the liver, to which they chiefly ascribed the process of sanguification, was injured, they concluded that the water and nourishment collected in such localities were unwholesome (i. 4). But divination is coeval and co-extensive with a belief in the divinity. We know that as early as the days of Cain and Abel there were certain means of communication between God and man, and that those means were connected with the sacrifice of animals; and we prefer to consider those means as the source of divination in later ages, conceiving that when the real tokens of the divine interest with which the primitive families of man were favoured ceased, in consequence of the multiplying of human transgressions, their descendants endeavoured to obtain counsel and information by the same external observances. We believe that thus only will the minute resemblances be accounted for, which we discover between the different methods of divination, utterly untraceable to reason, but which have prevailed from unknown antiquity among the most distant regions. It is further important to remark that the first recorded instance of divination is that of the teraphim of Laban, a native of Padan-aram, a district bordering on that country (1 Sam. xix. 13, 16), but by which teraphim both the Sept. and Josephus understood 'the liver of goats.'

LIZARD. Under this denomination the modern zoologist places all the cold-blooded animals that have the conformation of serpents with the addition of four feet. Thus viewed, as one great family, they constitute the Saurians, Lacertinae, and Lacertidae of authors; embracing numerous generic divisions, which commence with the largest, that is, the crocodile group, and pass through sundry others, a variety of species, formidable, disgusting, or pleasing in appearance—some equally frequenting the land and water, others absolutely confined to the earth and to the most arid deserts; and though in general harmless, there are a few with dispirited properties, some being held to poison or corrode by means of the exudation of an ichor, and others extolled as of medical use in pharmacy; but these properties in most, if not in all, are undetermined

or illusory. Of some genera, such as the crocodile and chameleon, we have already made mention [CHAMELEON; CROCODILE; DRAGON; LEVIATHAN], and therefore we shall confine our present remarks to the lizards that are inhabitants of Western Asia and Egypt, and to those more particularly noticed in the Bible. Of these commentators indicate six or seven species, whereof some indeed may be misapprehended; but when it is considered that the regions of Syria, Arabia, and Egypt are overrun with animals of this family, there is every reason to expect allusion to more than one genus in the Scriptures, where so many observations and similes are derived from the natural objects which were familiar to the various writers. In Lev. xi. 29 mention is made of a species called *tzab*, which Bochart refers to one of the group of Monitors or Varanus, the Nilotic lizard. Like the other of this form, it is possessed of a tail double the length of the body, but is not so well known in Palestine, where there is only one real river (Jordan), which is not tenanted by this species. We have already shown that the true crocodile frequented the shores and marshes of the coast down to a comparatively late period; and therefore it may well have had a more specific name than *Leviathan*—a word apparently best suited to the dignified and lofty diction of the prophets, and clearly of more general significance than the more colloquial designation. Jerome was of this opinion; and it is thus likely that *tzab* was applied to both, as *varan* is now considered only a variety of, or a young, crocodile. There is a second of the same group, *Lacerta Scincus* of Merrem (*Varanus Arenarius*), *Varan-el-lard*, also reaching to six feet in length; and a third, not as yet clearly described, which appears to be larger than either, growing to nine feet, and covered with bright cupreous scales. This last prefers rocky and stony situations. It is in this section of the Saurians that most of the gigantic fossil species, the real 'children of the giants,' are found to be located; and of the existing species some are reported to possess great strength. One of the last-mentioned pursues its prey on land with a rapid bounding action, feeds on the larger insects, and is said to attack game in a body, sometimes destroying even sheep. The Arabs, in agreement with the ancients, assert that this species will do fierce and victorious battle with serpents.

237. [*Lacerta Stellio*.]

We come next to the group of lizards more properly so called, which Hebrew commentators take to be the *letaah*, a name having some allusion to poison and adhesiveness. The word occurs only once (Lev. xi. 30), where Saurians alone appear to be indicated. If the Hebrew root were to guide the decision, *letaah* would be another

name for the *gecko* or *anakah*, for there is but one species which can be deemed venomous; and with regard to the quality of adhesiveness, though the *geckos* possess it most, numerous common lizards run up and down perpendicular walls with great facility. We, therefore, take *chomet*, or the sand lizard of Bochart, to be the true lizard, several (probably many) species existing in myriads on the rocks in sandy places and in ruins in every part of Palestine and the adjacent countries. There is one species particularly abundant and small, well known in Arabia by the name of *Sarabandi*. We now come to the *Stelliones*, which have been confounded with the noxious *geckos* and others from the time of Aldrovandus, and thence have been a source of inextricable trouble to commentators. They are best known by the bundles of starlike spines on the body.

Next we place the *Geckotians*, among which comes *anakah*, in our versions denominated *ferret*, but which is with more propriety transferred to the noisy and venomous *abu-burs* of the Arabs. The particular species most probably meant is the *lacerta gecko* of Hasselquist, the *gecko lobatus* of Geoffroy, distinguished by having the soles of the feet dilated and striated like open fans, from whence a poisonous ichor is said to exude, inflaming the human skin, and infecting food that may have been trod upon by the animal. Hence the Arabic name of *abu-burs*, or 'father-leprosy,' at Cairo.

To these we add the *Chameleons*, already described [CHAMELEON]; and then follows the *Scincus*.

Of the species of *Seps*, that is, viviparous serpent-lizards, having the body of snakes, with four weak limbs, a species, with only three toes on each foot, appears to extend to Syria.

LOAN. The Mosaic laws which relate to the subject of borrowing, lending, and repaying, are in substance as follows:—If an Israelite became poor, what he desired to borrow was to be freely lent to him, and no interest, either of money or produce, could be exacted from him; interest might be taken of a foreigner, but not of an Israelite by another Israelite (Exod. xxii. 25; Deut. xxiii. 19, 20; Lev. xxv. 35, 38). At the end of every seven years a remission of debts was ordained; every creditor was to remit what he had lent: of a foreigner the loan might be exacted, but not of a brother. If an Israelite wished to borrow, he was not to be refused because the year of remission was at hand (Deut. xv. 1-11). Pledges might be taken, but not as such the mill or the upper millstone, for that would be to take a man's life in pledge. If the pledge was raiment, it was to be given back before sunset, as being needful for a covering at night. The widow's garment could not be taken in pledge (Exod. xxii. 26, 27; Deut. xxiv. 6, 17).

These laws relating to loans may wear a strange aspect to the mere modern reader, and cannot be understood, either in their bearing or their sanctions, unless considered from the Biblical point of view. The land of Canaan (as the entire world) belonged to its Creator, but was given of God to the descendants of Abraham under certain conditions, of which this liberality to the needy was one. The power of getting loans therefore was a part of the poor man's inheritance. It was a lien on the land (the source of all property with agri-

cultural people), which was as valid as the tenure of any given portion by the tribe or family to whose lot it had fallen. This is the light in which the Mosaic polity represents the matter, and in this light, so long as that polity retained its force, would it, as a matter of course, be regarded by the owners of property. Thus the execution of this particular law was secured by the entire force with which the constitution itself was recommended and sustained. But as human selfishness might in time endanger this particular set of laws, so Moses applied special support to the possibly weak part. Hence the emphasis with which he enjoins the duty of lending to the needy. Of this emphasis the very essence is the sanction supplied by that special providence which lay at the very basis of the Mosaic commonwealth; so that lending to the destitute came to be enforced with all the power derivable from the express will of God.

That the system of law regarding loans was carried into effect there is no reason to doubt. It formed an essential part of the general constitution, and therefore came recommended with the entire sanction which that system had on its own behalf; nor were there any predominant antagonist principles at work which would prevent this from proceeding step by step, in its proper place and time, with the residue of the Mosaic legislation. Nor do the passages of Scripture (Job xxii. 6; xxiv. 3; Matt. xviii. 28; Prov. xxviii. 8; Ezek. xviii. 8; Ps. xv. 5; cix. 11), which give us reason to think that usury was practised and the poor debtor oppressed, show anything but those breaches to which laws are always liable, especially in a period when morals grow corrupt and institutions in consequence decline.

While, however, the benign tendency of the laws in question is admitted, may it not be questioned whether they were strictly just? Such a doubt could arise only in a mind which viewed the subject from the position of our actual society. A modern might plead that he had a right to do what he pleased with his own; that his property of every kind—land, food, money—was his own; and that he was justified to turn all and each part to account for his own benefit. Apart from religious considerations this position is impregnable. But such a view of property finds no support in the Mosaic institutions. In them property has a divine origin, and its use is entrusted to man on certain conditions, which conditions are as valid as is the tenure of property itself. In one sense, indeed, the entire land—all property—was a great loan, a loan lent of God to the people of Israel, who might well therefore acquiesce in any arrangement which required a portion—a small portion—of this loan to be under certain circumstances accessible to the destitute. This view receives confirmation from the fact that interest might be taken of persons who were not Hebrews, and therefore lay beyond the sphere embraced by this special arrangement.

Had the Hebrews enjoyed a free intercourse with other nations, the permission to take usury of foreigners might have had the effect of impoverishing Palestine by affording a strong inducement for employing capital abroad; but, under the actual restrictions of the Mosaic law, this evil was impossible. Some not inconsiderable advantages must have ensued from the observance of these laws. The entire alienation and loss of the

lent property were prevented by that peculiar institution which restored to every man his property at the great year of release. In the interval between the jubilees the system under consideration would tend to prevent those inequalities of social condition which always arise rapidly, and which have not seldom brought disaster and ruin on states. The affluent were required to part with a portion of their affluence to supply the wants of the needy, without exacting that recompense which would only make the rich richer and the poor more needy; thus superinducing a state of things scarcely more injurious to the one than to the other of these two parties. There was also in this system a strongly conservative influence. Agriculture was the foundation of the constitution. Had money-lending been a trade, money-making would also have been eagerly pursued. Capital would be withdrawn from the land; the agriculturist would pass into the usurer; huge inequalities would arise; commerce would assume predominance, and the entire commonwealth be overturned—changes and evils which were prevented, or, if not so, certainly retarded and abated, by the code of laws regarding loans. As it was, the gradually increasing wealth of the country was in the main laid out on the soil, so as to augment its productiveness and distribute its bonnies.

These views may prepare the reader for considering the doctrine of 'the Great Teacher' on the subject of loans. It is found forcibly expressed in Luke's Gospel (vi. 34, 35): 'If ye lend to them of whom ye hope to receive, what thank have ye? for sinners also lend to sinners, to receive as much again: but love ye your enemies, and do good, and lend, hoping for nothing again; and your reward shall be great, and ye shall be the children of the Highest; for he is kind unto the unthankful and to the evil.' The meaning of the passage is distinct and full, unmistakable, and not to be evaded. He commands men to lend, not as Jews to Jews, but even to enemies, without asking or receiving any return, after the manner of the Great Benefactor of the Universe, who sends down his rains, and bids his sun to shine on the fields of the unjust as well as of the just. To attempt to view this command in the light of reason and experience would require space which cannot here be given; but we must add, that any attempt to explain the injunction away is most unworthy on the part of professed disciples of Christ; and that, not impossibly at least, fidelity to the behests of Him whom we call Lord and Master would of itself answer all doubts and remove all misgivings, by practically showing that this, as every other doctrine that fell from His lips, is indeed of God (John vii. 17).

LOAVES. [BREAD.]

LOCUST. There are ten Hebrew words which appear to signify 'locust' in the Old Testament. It has been supposed, however, that some of these words denote merely the different states through which the locust passes after leaving the egg, viz. the larva, the pupa, and the perfect insect—all which much resemble each other, except that the larva has no wings, and that the pupa possesses only the rudiments of those members, which are fully developed only in the adult locust (Michaelis, *Supplem. ad Lex. Hebr.* ii. 667, 1080). But this supposition is manifestly wrong with re-

gard to four of the terms, because, in Lev. xi. 22, the word 'after his kind,' or species, is added after each of them (comp. ver. 14, 15, 16). It is most probable, therefore, that all the rest are also the names of species, but we know not how to distinguish the several species from each other.

Locusts, like many other of the general provisions of nature, may occasion incidental and partial evil; but upon the whole they are an immense benefit to those portions of the world which they inhabit; and so connected is the chain of being that we may safely believe that the advantage is not confined to those regions. 'They clear the way for the renovation of vegetable productions which are in danger of being destroyed by the exuberance of some particular species, and are thus fulfilling the law of the Creator, that of all which he has made should nothing be lost. A region which has been choked up by shrubs and perennial plants and hard half-withered impalatable grasses, after having been laid bare by these scourges, soon appears in a far more beautiful dress, with new herbs, superb lilies, fresh annual grasses, and young and juicy shrubs of perennial kinds, affording delicious herbage for the wild cattle and game.' Meanwhile their excessive multiplication is repressed by numerous causes. Contrary to the order of nature with all other insects, the males are far more numerous than the females. It is believed that if they were equal in number they would in ten years annihilate the vegetable system. Besides all the creatures that feed upon them, rains are very destructive to their eggs, to the larvæ, pupæ, and perfect insect. When perfect, they always fly with the wind, and are therefore constantly being carried out to sea, and often ignorantly descend upon it as if upon land. Myriads are thus lost in the ocean every year, and become the food of fishes. On land they afford in all their several states sustenance to countless tribes of birds, beasts, reptiles, &c.; and if their office as the scavengers of nature, commissioned to remove all superfluous productions from the face of the earth, sometimes *incidentally* and as the operation of a general law, interferes with the labours of man, as do storms, tempests, &c., they have, from all antiquity to the present hour, afforded him an excellent supply till the land acquires the benefit of their visitations, by yielding him in the meantime an agreeable, wholesome, and nutritious aliment. They are eaten as meat, are ground into flour, and made into bread. They are even an extensive article of commerce. Diodorus Siculus mentions a people of Ethiopia who were so fond of eating them that they were called *Acridophagi*, 'eaters of locusts.' Whole armies have been relieved by them when in danger of perishing. Their great flights occur only every fourth or fifth season. Those locusts which come in the first instance only fix on trees, and do not destroy grain: it is the young before they are able to fly which are chiefly injurious to the crops. Nor do all the species feed upon vegetables; one, comprehending many varieties, the *truxalis*, feeds upon insects. Latreille says the house-cricket will do so. 'Locusts,' remarks a very sensible tourist, 'seem to devour not so much from a ravenous appetite as from a rage for destroying.' Destruction, therefore, and not

food, is the chief impulse of their devastations, and in this consists their utility; they are in fact omnivorous. The most poisonous plants are indifferent to them; they will prey even upon the crowfoot, whose causticity burns the very hides of beasts. They simply consume *everything* without predilection, vegetable matter, linen, woollen, silk, leather, &c.; and Pliny does not exaggerate when he says, 'and even the doors of houses,' for they have been known to consume the very varnish of furniture. They reduce everything indiscriminately to shreds, which become manure. It might serve to mitigate popular misapprehensions on the subject to consider what would have been the consequence if locusts had been carnivorous like wasps. All terrestrial beings, in such a case, not excluding man himself, would have become their victims. There are, no doubt, many things respecting them yet unknown to us which would still further justify the belief that this, like 'every' other 'work of God is good'—benevolent upon the whole.

LOG. [WEIGHTS AND MEASURES.]

LOIS, the grandmother of Timothy, not by the side of his father, who was a Greek, but by that of his mother. Hence the Syriac has 'thy mother's mother.' She is commended by St. Paul for her faith (2 Tim. i. 5); for although she might not have known that the Christ was come, and that Jesus of Nazareth was he, she yet believed in the Messiah to come, and died in that faith.

LONGEVITY. The lengthened ages of some of the ante and post-diluvian fathers, as given by Moses in the Hebrew text, are as follows:—

	Years.
Adam Gen. v. 5	930
Seth " 8	912
Enos " 11	905
Cainan. " 14	910
Mahalaleel " 17	895
Jared " 20	962
Enoch " 23	365
Methuselah " 27	969
Lamech " 31	777
Noah ix. 29	950
Shem xi. 10, 11	600
Arphaxad. " 12, 13	438
Salah " 14, 15	433
Eber " 16, 17	464
Peleg " 18, 19	239
Reu " 20, 21	239
Serug " 22, 23	230
Nahor. " 24, 25	148
Terah " 32	205
Abraham xxv. 7	175

Infidelity has not failed, in various ages, to attack revelation on the score of the supposed absurdity of assigning to any class of men this lengthened term of existence. In reference to this Josephus remarks:—'Let no one upon comparing the lives of the ancients with our lives, and with the few years which we now live, think that what we say of them is false; or make the shortness of our lives at present an argument that neither did they attain to so long a duration of life.' When we consider the compensating process which is going on, the marvel is that the human frame should not last longer than it does. Some, however, have supposed that the years above named are *lunar*, consisting of about thirty

days; but this supposition, with a view to reduce the lives of the ante-diluvians to our standard, is replete with difficulties. At this rate the whole time, from the creation of man to the Flood, would not be more than about 140 years; and Methuselah himself would not have attained to the age which many even now do, whilst many must have had children when mere infants! Besides, if we compute the age of the post-diluvians by this mode of calculation—and why should we not?—we shall find that Abraham, who is said to have died in a *good old age* (Gen. xxv. 8) could not have been more than *fifteen years old*! Moses must therefore have meant *solar*, not *lunar* years—not, however, exactly so long as ours, for the ancients generally reckoned twelve months, of thirty days each, to the year.

But it is asked, if Moses meant solar years, how came it to pass that the patriarchs did not begin to beget children at an earlier period than they are reported to have done? Seth was 105 years old, on the lowest calculation, when he begat Enos; and Methuselah 187 when Lamech was born! St. Augustine (i. 15) explains this difficulty in a two-fold manner, by supposing

1. Either that the age of puberty was later in proportion as the lives of the ante-diluvians were longer than ours; or

2. That Moses does not record the first-born sons, but as the order of the genealogy required, his object being to trace the succession from Adam, through Seth, to Abraham.

As to the probable reasons why God so prolonged the life of man in the earlier ages of the world, and as to the subordinate means by which this might have been accomplished, Josephus says: 'For those ancients were beloved of God, and lately made by God himself; and because their food was then fitter for the prolongation of life, they might well live so great a number of years: and because God afforded them a longer time of life on account of their virtue and the good use they made of it in astronomical and geometrical discoveries, which would not have afforded the time for foretelling the periods of the stars unless they had lived 600 years; for the great year is completed in that interval.'

In the above passage Josephus enumerates *four* causes of the longevity of the earlier patriarchs. As to the first, viz., their being dearer to God than other men, it is plain that it cannot be maintained; for the profligate descendants of Cain were equally long-lived, as mentioned above, with others. Neither can we agree in the second reason he assigns; because we find that Noah and others, though born so long subsequently to the creation of Adam, yet lived to as great an age, some of them to a greater age than he did. If, again, it were right to attribute longevity to the superior quality of the food of the ante-diluvians, then the seasons, on which this depends, must, about Moses' time—for it was *then* that the term of human existence was reduced to its present standard—have assumed a fixed character. But no change at that time took place in the revolution of the heavenly bodies, by which the seasons of heat, cold, &c., are regulated: hence we must not assume that it was the nature of the fruits they ate which caused longevity. How far the ante-diluvians had advanced in scientific research generally, and in astronomical

discovery particularly, we are not informed; nor can we place any dependence upon what Josephus says about the two inscribed pillars which remained from the old world. We are not, therefore, able to determine, with any confidence, that God permitted the earlier generations of man to live so long, in order that they might arrive at a high degree of mental excellence. From the *brief* notices which the Scriptures afford of the character and habits of the ante-diluvians, we should rather infer that they had not advanced very far in discoveries in natural and experimental philosophy (see ANTE-DILUVIANS). We must suppose that they did not reduce their language to alphabetical order; nor was it necessary to do so at a time when human life was so prolonged, that the tradition of the creation passed through only two hands to Noah. It would seem that the book ascribed to Enoch is a work of post-diluvian origin. Possibly a want of mental employment, together with the labour they endured ere they were able to extract from the earth the necessities of life, might have been some of the proximate causes of that degeneracy which led God in judgment to destroy the old world. If the ante-diluvians began to bear children at the age on an average of 100, and if they ceased to do so at 600 years, the world might then have been far more densely populated than it is now. Supposing, moreover, that the earth was no more productive antecedently than it was subsequently to the flood; and that the ante-diluvian fathers were ignorant of those mechanical arts which so much abridge human labour now, we can easily understand how difficult they must have found it to secure for themselves the common necessities of life, and this the more so if animal food was not allowed them. The prolonged life, then, of the generations before the flood, would seem to have been rather an *evil* than a blessing, leading as it did to the too rapid peopling of the earth. We can readily conceive how this might conduce to that awful state of things expressed in the words, 'And the whole earth was filled with violence.' In the absence of any well regulated system of government, we can imagine what evils must have arisen; the unprincipled would oppress the weak, the crafty would outwit the unsuspecting, and, not having the fear of God before their eyes, destruction and misery would be in their ways. Still we must admire the providence of God in the longevity of man immediately after the creation and the flood. After the creation, when the world was to be peopled by one man and one woman, the age of the greatest part of those on record was 500 and upwards. But after the flood, when there were three couples to repopulate the earth, none of the patriarchs, except Shem, reached the age of 500; and only the three first of his line, viz., Arphaxad, Selah, and Eber, came near that age, which was in the first century after the flood. In the second century we do not find that any attained the age of 240; and in the third century (about the latter end of which Abraham was born) none, except Terah, arrived at 200; by which time the world was so well peopled, that they had built cities, and were formed into distinct nations under their respective kings. See Gen. xv.

That the common age of man has been the same in all times since the world was peopled, is

manifest from profane as well as sacred history. Plato lived to the age of 81, and was accounted an old man; and those whom Pliny reckons up (vii. 48) as rare examples of long life, may, for the most part, be equalled in modern times. We cannot, then, but see the hand of God in the proportion that there is between births and deaths; for by this means the population of the world is kept up. If the fixed standard of human life were that of Methuselah's age, or even that of Abraham's, the world would soon be overstocked; or if the age of man were limited to that of divers other animals, to 10, 20, or 30 years only, the decay of mankind would then be too fast. But on the present scale the balance is nearly even, and life and death keep an equal pace. In thus maintaining throughout all ages and places these proportions of mankind, and all other creatures, God declares himself to be indeed the ruler of the world.

LOOKING-GLASSES. [MIRRORS.]

LORD, a Saxon word signifying ruler or governor. In the Authorized translation of the Scriptures it is used without much discrimination for all the names applied to God, which cannot be helped, as our language does not afford the same number of distinguishing titles as the Hebrew. When, however, the word represents the dread name of JEHOVAH, it is printed in small capitals, LORD, and is by this contrivance made a distinguishing term. As the Hebrew name JEHOVAH is one never used with reference to any but the Almighty, it is to be regretted that the Septuagint, imitated by our own and other versions, has represented it by a word which is *also* used for the Hebrew 'Adonai,' which is applied not only to God, but, like our 'Lord,' to creatures also, as to angels (Gen. xix. 2; Dan. x. 16, 17), to men in authority (Gen. xlii. 30, 33), and to proprietors, owners, masters (Gen. xlv. 8). The leading idea of the Hebrew, the Greek, and the English words, is that of an owner or proprietor, whether God or man; and it occurs in the inferior application with great frequency in the New Testament. This application is either literal or complimentary; *literal*, when the party is really an owner or master, as in Matt. x. 24; xx. 8; xxi. 40; Acts xvi. 16, 19; Gal. iv. 1, &c.; or when he is so as having absolute authority over another (Matt. ix. 38; Luke x. 2), or as being a supreme lord or sovereign (Acts xxv. 26); and *complimentary*, when used as a title of address, especially to superiors, like the English *Master*, Sir, as in Matt. xlii. 27; xxi. 20; Mark vii. 8; Luke ix. 54.

It cannot but be deemed desirable that, instead of the extensive use of the word *Lord* which we have described, discriminating terms should be adopted in translations. Apart from the Jewish superstitions which influenced the Seventy in their translation, there can be no good reason why the name JEHOVAH should not be retained wherever it occurs in the Hebrew. Then LORD might represent *Adonai*; or perhaps Sir, or Master, might be used when that word is applied to creatures; and God would very properly represent *Elohim*.

LORD'S DAY. The expression so rendered in the Authorized English Version occurs only once in the New Testament, viz. in Rev. i. 10, and is there unaccompanied by any other words

tending to explain its meaning. It is, however, well known that the same phrase was, in after ages of the Christian church, used to signify the first day of the week, on which the resurrection of Christ was commemorated. Hence it has been inferred that the same name was given to that day during the time of the Apostles, and was in the present instance used by St. John in this sense, as referring to an institution well known, and therefore requiring no explanation [see article SABBATH].

LOT (*a covering*); son of Haran and nephew of Abraham, who by the early death of his father had already come into possession of his property when Abraham went into the land of Canaan (Gen. xi. 31). Their united substance, consisting chiefly in cattle, was not then too large to prevent them from living together in one encampment. Eventually, however, their possessions were so greatly increased, that they were obliged to separate; and Abraham with rare generosity conceded the choice of pasture-grounds to his nephew. Lot availed himself of this liberality of his uncle, as he deemed most for his own advantage, by fixing his abode at Sodom, that his flocks might pasture in and around that fertile and well-watered neighbourhood (Gen. xiii. 5-13). He had soon very great reason to regret this choice; for although his flocks fed well, his soul was starved in that vile place, the inhabitants of which were sinners before the Lord exceedingly. There 'he vexed his righteous soul from day to day with the filthy conversation of the wicked' (2 Pet. ii. 7).

About eight years after his separation from Abraham (n.c. 1913), Lot was carried away prisoner by Chedorlaomer, along with the other inhabitants of Sodom, and was rescued and brought back by Abraham (Gen. xiv.), as related under other heads [ABRAHAM; CHEDORLAOMER]. This exploit procured for Abraham much celebrity in Canaan; and it ought to have procured for Lot respect and gratitude from the people of Sodom, who had been delivered from hard slavery and restored to their homes on his account. But this does not appear to have been the result.

At length the guilt of 'the cities of the plain' brought down the signal judgments of Heaven. The avenging angels, after having been entertained by Abraham, repaired to Sodom, where they were received and entertained by Lot, who was sitting in the gate of the town when they arrived. While they were at supper the house was beset by a number of men, who demanded that the strangers should be given up to them, for the unnatural purposes which have given a name of infamy to Sodom in all generations. Lot resisted this demand, and was loaded with abuse by the vile fellows outside on that account. They had nearly forced the door, when the angels smote them with instant blindness, by which their attempts were rendered abortive, and they were constrained to disperse. Towards morning the angels apprised Lot of the doom which hung over the place, and urged him to hasten thence with his family. He was allowed to extend the benefit of this deliverance to the families of his daughters who had married in Sodom; but the warning was received by those families with incredulity and insult, and he therefore left Sodom

accompanied only by his wife and two daughters. As they went, being hastened by the angels, the wife, anxious for those who had been left behind, or reluctant to remove from the place which had long been her home, and where much valuable property was necessarily left behind, lingered behind the rest, and was suddenly involved in the destruction, by which—smothered and stiffened as she stood by saline incrustations—she became 'a pillar of salt.'

Lot and his daughters then hastened on to Zoar, the smallest of the five cities of the plain, which had been spared on purpose to afford him a refuge; but, being fearful, after what had passed, to remain among a people so corrupted, he soon retired to a cavern in the neighbouring mountains, and there abode. After some stay in this place, the daughters of Lot became apprehensive lest the family of their father should be lost for want of descendants, than which no greater calamity was known or apprehended in those times; and in the belief that, after what had passed in Sodom, there was no hope of their obtaining suitable husbands, they, by a contrivance which has in it the taint of Sodom, where they had been brought up, made their father drunk with wine, and in that state seduced him into an act which, as they well knew, would in soberness have been most abhorrent to him. They thus became the mothers, and he the father, of two sons, named Moab and Ammon, from whom sprung the Moabites and Ammonites, so often mentioned in the Hebrew history (Gen. xix.). This circumstance is the last which the Scripture records of the history of Lot; and the time and place of his death are unknown.

LOTS, FEAST OF. [PURIM.]

LOVE FEAST, usually termed *Agape*, and signifying the social meal of the primitive Christians, which generally accompanied the Eucharist. If we reflect on the profound impression which the transactions of 'the night on which the Lord was betrayed' (1 Cor. xi. 23) must have made on the minds of the apostles, nothing can be conceived more natural, or in closer accordance with the genius of the new dispensation, than a wish to perpetuate the commemoration of his death in connection with their social meal. The primary celebration of the Eucharist had impressed a sacredness on the previous repast (comp. Matt. xxvi. 26, Mark xiv. 22, with Luke xxii. 20, 1 Cor. xi. 25); and when to this consideration we add the ardent faith and love of the new converts on the one hand, and the loss of property with the disruption of old connections and attachments on the other, which must have heightened the feeling of brotherhood, we need not look further to account for the institution of the *Agape*, at once a symbol of Christian love and a striking exemplification of its benevolent energy. However soon its purity was soiled, at first it was not undeserving of the eulogy pronounced by the great orator of the church—'A custom most beautiful and most beneficial; for it was a supporter of love, a solace of poverty, a moderator of wealth, and a discipline of humility.'

Thus the common meal and the Eucharist formed together one whole, and were conjointly denominated the *Lord's Supper* and *agape*. They

were also signified (according to Mosheim, Neander, and other eminent critics) by the phrases *breaking of bread* (Acts ii. 42, 46, xx. 7). We find the term *agape* thus applied once, at least, in the New Testament (Jude 12), 'These are spots in your feasts of charity.'

The following is the description given by Tertullian of these feasts. 'The nature of our *Cena*,' he says, 'may be gathered from its name, which is the Greek term for love. However much it may cost us, it is real gain to incur such expense in the cause of piety; for we aid the poor by this refreshment; we do not sit down to it till we have first tasted of prayer to God; we eat to satisfy our hunger; we drink no more than befits the temperate; we feast as those who recollect that they are to spend the night in devotion; we converse as those who know that the Lord is an ear-witness. After water for washing hands, and lights have been brought in, every one is required to sing something to the praise of God, either from the Scriptures or from his own thoughts; by this means, if any one has indulged in excess, he is detected. The feast is closed with prayer.' Contributions or oblations of provisions or money were made on these occasions, and the surplus placed in the hands of the presiding elder—compare 1 Tim. v. 17, by whom it was applied to the relief of orphans and widows, the sick and destitute, prisoners and strangers.

From the passages in the Epistles of Jude and Peter, already quoted, and more particularly from the language of Paul in 1 Cor. xi., it appears that at a very early period the *Agape* were perverted from their original design: the rich frequently practised a selfish indulgence, to the neglect of their poorer brethren: '*every one taketh before other his own supper*' (1 Cor. xi. 21); i.e. the rich feasted on the provisions they brought, without waiting for the poorer members, or granting them a portion of their abundance.

On account of these and similar irregularities, and probably in part to elude the notice of their persecutors, the Christians, about the middle of the second century, frequently celebrated the Eucharist by itself and before daybreak. From Pliny's Epistle it appears that the *agape* were suspected by the Roman authorities of belonging to the class of unions or secret societies which were often employed for political purposes, and as such denounced by the imperial edicts.

In modern times social meetings bearing a resemblance to the *agape*, and in allusion to them termed 'Love Feasts,' have been regularly held by the church of the United Brethren and the Wesleyan Methodists, also in Scotland by the followers of Mr. Robert Sandeman.

LUTHIM, the Libyans. [LIBYA.]

LUCIFER, a word that occurs once in the English Version in the lines—

'How art thou fallen from heaven,
Lucifer, son of the morning!
How art thou felled to the ground,
That didst weaken the nations!'

(Isa. xiv. 12). The meaning of the Hebrew word seems to be 'brilliant,' 'splendid,' 'illustrious,' and it appears to have been the Hebrew name of the morning star. Tertullian and Gregory the Great understood this passage of

Isaiah in reference to the fall of Satan; in consequence of which the name Lucifer has since been applied to Satan; and this is now the usual acceptance of the word. But Dr. Henderson, who in his *Isaiah* renders the line, 'Illustrious son of the morning' justly remarks in his annotation: 'The application of this passage to Satan, and to the fall of the apostate angels, is one of those gross perversions of Sacred Writ which so extensively obtain, and which are to be traced to a proneness to seek for more in any given passage than it really contains, a disposition to be influenced by sound rather than sense, and an implicit faith in received interpretations. The scope and connection show that none but the king of Babylon is meant. In the figurative language of the Hebrews a *star* signifies an illustrious king or prince (Num. xxiv. 17; comp. Rev. ii. 28: xxii. 16). The monarch here referred to, having surpassed all other kings in royal splendour, is compared to the harbinger of day, whose brilliancy surpasses that of the surrounding stars. Falling from heaven denotes a sudden political overthrow—a removal from the position of high and conspicuous dignity formerly occupied (comp. Rev. vi. 13: viii. 10).

LU'CIUS of Cyrene, a person named along with Barnabas, Saul, and others, as 'prophets and teachers' in the church at Antioch (Acts xiii. 1). Lucius was probably one of 'the synagogue of the Cyrenians,' and was without doubt one of the men of Cyrene, who went abroad in consequence of the persecution raised on the death of Stephen (Acts vi. 9; xi. 20). Some suppose that he was one of the seventy disciples; and the tradition is, that he was eventually bishop of Cyrene. This is probably the same Lucius who is mentioned in Rom. xvi. 21 as Paul's kinsman; and he has been supposed by some the same with Luke the Evangelist.

LU'D, fourth son of Shem (Gen. x. 22). For his descendants, see NATIONS, DISPERSION OF.

LU'DIM, the descendants of (Gen. x. 13), concerning whom see NATIONS, DISPERSION OF.

LUKE. This name is a contraction of *LUCANUS*, and indicates that Luke was descended from heathen ancestors, and that he was either a slave or a freedman. According to ecclesiastical tradition, the author of the Gospel is the same Luke who is mentioned in Paul's Epistles (Philem. 24; 2 Tim. iv. 11; Coloss. iv. 14), and who is called, in the last-mentioned passage, 'the physician.' This tradition is confirmed by the Acts of the Apostles, according to which the author of that work accompanied the Apostle Paul in his journeys (Acts xvii. 10, sq.; xx. 5-13). Luke accompanied Paul also in his last journey to Jerusalem and Rome (Acts xxi. 1-17; xxvii. 28). The profession of a physician harmonises also with the condition of a freedman, indicated by the form of the name. The higher ranks of the Romans were disinclined to practise medicine, which they left rather to their freedmen. It harmonises with this that Paul (Coloss. iv. 14) distinguishes Luke from the Christians of Jewish descent, whom, in verses 11 and 12, he styles, 'being of the Circumcision.' Eusebius states that Antioch in Syria was the native city of Luke. In this city there was at an early period a congregation of Christians converted from heathenism. Since Luke was a physician,

we must suppose that he was a man of education.

To those sceptics who excuse their disbelief of the miracles recorded in the Gospels, by the assertion that their authors were ill-informed Jews, greedy of the marvellous, it must appear of some importance to meet in Luke a well-informed Greek, skilled even in the medical sciences. The higher degree of his education is further proved by the classical style in which the introduction to his Gospel, and the latter portion of the Acts, are written; and also by the explicit and learned details which he gives in the Acts on various antiquarian, historical, and geographical subjects.

It is important to notice what he himself says, in his introduction, of the relation borne by his writings to those of others. It is evident that even then 'many' had attempted to compose a history of our Lord from the statements of eye-witnesses and of the first ministers of the word of God. As these 'many' are distinguished from eye-witnesses, we must suppose that many Christians wrote brief accounts of the life of Jesus, although they had not been eye-witnesses. It is possible that Luke made use of such writings. He states that he had accurately investigated the truth of the accounts communicated, and that, following the example of the 'many,' he had made use of the statements of eye-witnesses, whom he must have had frequent opportunities of meeting with when he travelled with Paul.

The Gospel of St. Luke contains exceedingly valuable accounts, not extant in the books of the other evangelists; for instance, those concerning the childhood of Jesus, the admirable parables in chapters xv. and xvi., the narration respecting the disciples at Emmaus, the section from chap. ix. 51 to xix. 27, which contains particulars mostly wanting in the other evangelists. It has been usual, since the days of Schleiermacher, to consider this portion as the report of a single journey to the feast at Jerusalem; but it is evident that it contains accounts belonging to several journeys, undertaken at different periods.

As to the statements of the ancients concerning the date or time when the Gospel of St. Luke was written, we find in Irenæus, that Mark and Luke wrote after Matthew. According to Eusebius, Origen stated that Luke wrote after Matthew and Mark; but Clement Alexandrinus, according to the same writer, asserted, on the authority of the 'tradition of the earlier elders,' that the Gospels containing the genealogies were written before the others. According to this view, Mark was written after Luke. It is however likely that this statement arose from a desire to explain why the genealogies were omitted by Mark and John.

From the circumstance that the book of Acts leaves St. Paul a captive, without relating the result of his captivity, most critics have, with considerable probability, inferred that Luke accompanied St. Paul to Rome, that he employed his leisure while there in composing the Acts, and that he left off writing before the fate of Paul was decided. Now, since the Gospel of St. Luke was written before the Acts, it seems to follow that it was written a considerable time before the destruction of Jerusalem.

It is likely that Luke, during Paul's captivity at Casarea, employed his leisure in collecting the accounts contained in his Gospel in the localities

where the events to which they relate happened. The most ancient testimonies in behalf of Luke's Gospel are those of Marcion, at the beginning of the second century, and of Irenæus, in the latter half of that century.

Besides the Gospel which bears his name, Luke wrote the Acts of the Apostles. This work contains the history of the foundation of the Christian church in two great sections: the first embracing the spread of Christianity among the Jews, chiefly by the instrumentality of Peter (ch. i.-xii.); and the second, its spread among the heathen, chiefly by the instrumentality of Paul (ch. xiii.-xxviii.).

That the accounts of Luke are authentic may be perceived more especially from a close examination of the inserted discourses and letters. The characteristic marks of authenticity in the oration of the Roman lawyer Tertullus, in ch. xxiv., and in the official letters in ch. xxiii. 26, sq.; xv. 23, sq.; can scarcely be overlooked. The address of Paul to the elders of the Ephesian church is characteristically Pauline, and even so full of definite allusions and of similarity to the Epistle to the Ephesians, that it furnishes a confirmation of the authenticity of that letter.

As for the testimonies in behalf of the authenticity of the Acts, they are the same as for Luke's Gospel. Clements Alexandrinus, Irenæus, and Tertullian, expressly mention the Acts, and Eusebius reckons them among the Homologoumena. However, the book of Acts was not read and quoted so often in the early church as other parts of Scripture.

LUNATICS. [DEMONIACS.]

LUZ, the ancient name of Bethel (Gen. xxviii. 19) [BETHEL]. The spot to which the name of Bethel was given appears, however, to have been at a little distance in the environs of Luz, and they are accordingly distinguished in Josh. xvi. 2, although the name of Bethel was eventually extended to that town. A small place of the same name, founded by an inhabitant of this Luz, is mentioned in Judg. i. 26.

LYCAONIA, a province of Asia Minor, having Cappadocia on the east, Galatia on the north, Phrygia on the west, and Isauria and Cilicia on the south. It extends in length about twenty geographical miles from east to west, and about thirteen in breadth. It was an undulating plain, involved among mountains, which were noted for the concourse of wild-asses. The soil was so strongly impregnated with salt that few of the brooks supplied drinkable water, so that good water was sold for money. But sheep thrived on the pasturage, and were reared with great advantage. It was a Roman province when visited by Paul (Acts xiv. 6), and its chief towns were Iconium, Lystra, and Derbe, of which the first was the capital. * The speech of Lycaonia (Acts xiv. 11) is supposed by some to have been the ancient Assyrian language, also spoken by the Cappadocians; but it is more usually conceived to have been a corrupt Greek, intermingled with many Syriac words.

LYCIA, a province in the south-west of Asia Minor, having Pamphylia on the east, Phrygia on the north, Caria on the west, and the Mediterranean on the south. Great part of the country, however, consists of a peninsula projecting south into the Mediterranean. It is mountainous, and

is watered by numerous small rivers which flow from the mountains. Its inhabitants were believed to be descendants of Cretans, who came thither under Sarpedon, brother of Minos. One of their kings was Bellerophon, celebrated in mythology. The Lycians were a warlike people, powerful on the sea, and attached to their independence, which they successfully maintained against Croesus, king of Lydia, and were afterwards allowed by the Persians to retain their own kings as satraps. Lycia is named in 1 Macc. xv. 23, as one of the countries to which the Roman senate sent its missive in favour of the Jews. The victory of the Romans over Antiochus (a.c. 189) gave Lycia rank as a free state, which it retained till the time of Claudius, when it was made a province of the Roman empire. Lycia contained many towns, two of which are mentioned in the New Testament; Patara (Acts xxi. 1, 2); Myra (Acts xxvii. 5); and one, Phaselis, in the Apocrypha (1 Macc. xv. 23).

LYDDA, a town within the limits of the tribe of Ephraim, nine miles east of Joppa, on the road between that port and Jerusalem. It bore in Hebrew the name of Lod, and appears to have been first built by the Benjamites, although it lay beyond the limits of their territory; and we find it again inhabited by Benjamites after the Exile (1 Chron. viii. 12; Ezra ii. 33; Neh. xi. 35). It is mentioned in the Apocrypha (1 Macc. xi. 34), as having been taken from Samaria and annexed to Judæa by Demetrius Nicator; and at a later date its inhabitants are named among those who were sold into slavery by Cassius when he inflicted the calamity of his presence upon Palestine after the death of Julius Cæsar. In the New Testament the place is only noticed, under the name of Lydda, as the scene of Peter's miracle in healing Æneas (Acts ix. 32, 35). Some years later the town was reduced to ashes by Cestius Gallus, in his march against Jerusalem; but it must soon have revived, for not long after we find it at the head of one of the toparchies of the later Judæa, and as such it surrendered to Vespasian. At that time it is described by Josephus as a village equal to a city; and the Rabbins have much to say of it as a seat of Jewish learning, of which it was the most eminent in Judæa after Jabneh and Bethar. In the general change of names which took place under the Roman dominion, Lydda became Diospolis, and under this name it occurs in coins of Severus and Caracalla, and is often mentioned by Eusebius and Jerome. It was early the seat of a bishopric, and is known to have continued such until at least A.D. 518. Lydda early became connected with the homage paid to the celebrated saint and martyr St. George, who is said to have been a native of this place, and who was not less renowned in the east than afterwards in the west. A church was here erected in honour of him by the Emperor Justinian. This church, which stood outside the town, had just been levelled to the ground by the Moslems when the Crusaders arrived at Lydda; but it was soon rebuilt by them, and they established a bishopric of Lydda and Ramleh. The church was destroyed by Saladin in 1191; and there is no evidence that it was ever rebuilt, although there was in later centuries an unfounded impression that the church, the ruins of which were then seen, and which

still exist, had been built by our king Richard. From that time there has been little notice of Lydia by travellers. It now exists, under its ancient name of Lud, as a considerable village of small houses, with nothing to distinguish it from ordinary Moslem villages, save the ruins of the celebrated church of St. George, which are situated in the eastern part of the town. The building must have been very large. The walls of the eastern end are standing only in the parts near the altar, including the arch over the latter; but the western end remains more perfect, and has been built into a large mosque, the lofty minaret of which forms the landmark of Lud.

LYDIA, a province in the west of Asia Minor, supposed to have derived its name from Lud, the fourth son of Shem (Gen. x. 22; see NATIONS, DISPERSION *ov*). It was bounded on the east by Greater Phrygia, on the north by Æolis or Mysia, on the west by Ionia and the Ægean Sea, and on the south it was separated from Caria by the Mæander. The country is for the most part level. Among the mountains, that of Tmolus was celebrated for its saffron and red wine. In the palmy days of Lydia its kings ruled from the shores of the Ægean to the river Halys; and Cræsus, who was its king in the time of Solon and of Cyrus, was reputed the richest monarch in the world. He was able to bring into the field an army of 420,000 foot and 60,000 horse against Cyrus, by whom, however, he was defeated, and his kingdom annexed to the Persian empire (Herod. i. 6). Lydia afterwards formed part of the kingdom of the Seleucide; and it is related in 1 Macc. viii. 3, that Antiochus the Great was compelled by the Romans to cede Lydia to king Eumenes. In the time of the travels of the Apostles it was a province of the Roman empire. Its chief towns were Sardis (the capital), Thyatira, and Philadelphia, all of which are mentioned in the New Testament, although the name of the province itself does not occur. The manners of the Lydians were corrupt even to a proverb.

LYDIA, a woman of Thyatira, 'a seller of purple,' who dwelt in the city of Philippi in Macedonia (Acts xvi. 14, 15). Lydia was not by birth a Jewess, but a proselyte, as the phrase 'who worshipped God' imports. She was converted by the preaching of Paul; and after she and her household had been baptised, she pressed the use of her house so earnestly upon him and his associates, that they were constrained to accept the invitation. The Lydians were famous for the art of dyeing purple vests, and Lydia, as 'a seller of purple,' is supposed to have been a dealer in vests so dyed, rather than in the dye itself.

LYSIANIAS, tetrarch of Abilene, when John commenced his ministry as the harbinger of Christ (Luke iii. 1). He is supposed to have been son or grandson of another Lysanias, known in history, who was put to death by Mark Antony, and part of his territories given to Cleopatra (ABILENE).

LYSIAS, or CLAUDIUS LYSIAS, chiliarch and commandant of the Roman troops who kept guard at the temple of Jerusalem, by whom Paul was scorned from the fury of the Jews, and sent under guard to the procurator Felix at Cæsarea (Acts xxi. 27; xxiii. 31).

LYSTRA, a city of Lycaonia in Asia Minor, to which Paul and Barnabas fled from the danger which threatened them at Iconium (Acts xiv. 6). Here, Paul having miraculously cured a cripple, they were both adored as gods; but afterwards, at the instigation of the Jews, Paul was stoned and left for dead (Acts xiv. 8-21). Timothy was a native of Lystra (Acts xvi. 1). This city was south of Iconium, but its precise site is uncertain, as well as that of Derbe, which is mentioned along with it.

M.

MA'ACAH, or MAACATH, a city and region at the foot of Mount Hermon, not far from Geshur, a district of Syria (Josh. xiii. 13; 2 Sam. x. 6, 8; 1 Chron. xix. 7). Hence the adjacent portion of Syria is called Aram-Maachab or Syria of Maachab (1 Chron. xix. 7). The Israelites seem to have considered this territory as included in their grant, but were never able to get possession of it (Josh. xiii. 13). In the time of David the small state had a king of its own, who contributed 1000 men to the grand alliance of the Syrian nations against the Jewish monarch (2 Sam. x. 6, 8). The lot of the half-tribe of Manasseh beyond the Jordan extended to this country, as had previously the dominion of Og, king of Bashan (Deut. iii. 14; Josh. xii. 5). Near, or within the ancient limits of Maacah, was the town called for that reason Abel beth-Maaneh [ABEL].

MAACAH, or MAACHAH, is also the name of several persons in the Old Testament, male and female, who may be mentioned to distinguish them from one another, namely—

1. MAACAH, the father of Achish, king of Gath (1 Kings ii. 39).
2. MAACAH, the father of Hanan, one of David's worthies (1 Chron. xi. 43).
3. MAACAH, the father of Shephatiah, the military chief of the Simeonites in the time of David (1 Chron. xxvii. 16).
4. MAACAH, a person whose sex does not appear, one of the offspring of Nahor's concubine Reumah (Gen. xxii. 24).
5. MAACAH, a concubine of Caleb (1 Chron. ii. 48).
6. MAACAH, grand-daughter of Benjamin, who was married to Machir, son of Manasseh (1 Chron. vii. 16).
7. MAACAH, daughter of Talmi, king of Geshur, wife of David and mother of Absalom (2 Sam. iii. 3). In 1 Sam. xxvii. 8, we read of David's invading the land of the Geshurites, and the Jewish commentators allege that he then took the daughter of the king captive, and, in consequence of her great beauty, married her, after she had been made a proselyte according to the law in Deut. xxi. But this is a gross mistake, for the Geshur invaded by David was to the south of Judah, whereas the Geshur over which Talmi ruled was to the north, and was regarded as part of Syria (2 Sam. xv. 8). The fact appears to be that David, having married the daughter of this king, contracted an alliance with him, in order to strengthen his interest against Ishbosheth in those parts.
8. MAACAH, daughter of Abishalom, wife

of Rehoboam, and mother of Abijah (1 Kings xv. 1). In verse 10 we read that Asa's 'mother's name was Maacah, the daughter of Abishalom.' It is evident that here 'mother' is used in a loose sense, and means 'grandmother,' which the Maacah named in verse 1 must have been to the Asa of verse 10. The Abishalom who was the father of this Maacah is called Absalom in 2 Chron. xi. 20, 21, and is generally supposed by the Jews to have been Absalom the son of David; which seems not improbable, seeing that Rehoboam's other two wives were of his father's family (2 Chron. xi. 18). But Josephus says that she was the daughter of Tamar, the daughter of Absalom, and consequently his granddaughter. This seems not unlikely [ABIJAH]. It would appear that Asa's own mother was dead before he began to reign; for Maacah bore the rank and state of queen-mother (resembling that of the Sultaneess Valide among the Turks), the powers of which she so much abused to the encouragement of idolatry, that Asa commenced his reforms by 'removing her from being queen, because she had made an idol in a grove' (1 Kings xv. 13; 2 Chron. xv. 16).

MACCABEES. The etymology of this word is too uncertain to reward the inquiries made respecting it. As a family, the Maccabees commenced their career of patriotic and religious heroism during the persecution of Antiochus Epiphanes, about the year B.C. 167. At this time the aged Mattathias, a descendant of the Asmoneans, and his five sons, inhabited the town of Modin, to which place Antiochus sent certain of his officers with instructions to erect an altar for heathen sacrifices, and to engage the inhabitants in the celebration of the most idolatrous and superstitious rites. The venerable Mattathias openly declared his resolution to oppose the orders of the tyrant, and one of the recreant Jews approaching the altar which had been set up, he rushed upon him, and slew him with his own hand. His part thus boldly taken, he called his sons and his friends around him, and immediately fled to the mountains, inviting all to follow him who had any zeal for God and the law. A small band of resolute and devoted men was thus formed, and the governor of the district saw reason to fear that a general insurrection would be the consequence of their proceeding. By a sudden attack directed against them on the Sabbath, when he knew the strictness of their principles would not allow them to take measures for their defence, he threw them into disorder, and slew about a thousand of their number, consisting of men, women, and children.

Warned by this event, and yielding to the necessity of their present condition, Mattathias and his sons determined that for the future they would defend themselves on the Sabbath in the same manner as on other days. The mountain-hold of the little band was now guarded more cautiously than before. Fresh adherents to the holy cause were continually flocking in; and in a few months the party found itself sufficiently strong to make attacks upon the towns and villages of the neighbourhood, throwing down the heathen altars, and punishing the reprobates who had taken part with the enemies of God.

By the death of Mattathias, the leadership of the party devolved upon his son Judas Macca-

bæus, whose worth and heroic courage pointed him out as most capable of carrying on the enterprise thus nobly begun. Judas lost no time in attacking the enemy. He made himself master of several towns, which he fortified and garrisoned. Apollonius, general of the army in Samaria, hastened to stop the progress of the insurgents. Judas met him on the way, joined battle with him, slew him, and routed his army. The same success attended him in his encounter with Seron, general of the Syrians; and it now became evident to Antiochus that the Jewish nation would soon be delivered from his yoke, unless he proceeded against them with a more formidable force. While, therefore, he himself went into Persia to recruit his treasures, Lysias, whom he left as regent at home, sent an army into Judæa, composed of forty thousand foot and seven thousand cavalry. This powerful army was further increased by auxiliaries from the provinces, and by bands of Jews, who dreaded nothing more than the triumph of those virtuous men of their own nation, who were struggling to save it from reprobation. So unequal did the forces of Judas appear to an encounter with such an army, that in addressing his followers he urged those among them who had any especial reason to love the present world to retire at once; while to those who remained he pointed out the promises of God as the best support of their courage and fidelity. By a forced march he reached a portion of the enemy encamped at Emmaus, while utterly unprepared for his approach. Complete success attended this bold proceeding. The several parts of the hostile army were successively put to flight, a splendid booty was secured, and Judas gained a position which made even the most powerful of his opponents tremble. Another and more numerous army was sent against him the following year, but with no better success. At the head of ten thousand determined followers, Judas defeated the army of Lysias, consisting of sixty thousand. A way was thereby opened for his progress to Jerusalem, whither he immediately hastened, with the devout purpose of purifying the temple and restoring it to its former glory. The solemn religious rites having been performed which were necessary to the cleansing of the sacred edifice, the Festival of the Purification was instituted, and added to the number of the other national festivals of more ancient date.

Judas had full occupation for his courage and ability in repelling the incursions of those numerous foes who dreaded the restoration of order and religion. But every day added to his successes. Having overthrown the Syrian commanders sent against him, he occupied Samaria, made himself master of the strong city of Hebron, of Azotus, and other important places, taking signal vengeance on the people of Joppa and Jamnia, who had treacherously plotted the destruction of numerous faithful Jews.

Antiochus Epiphanes was succeeded by Antiochus Eupator. At first this prince acted towards the Jews with moderation and tolerance. But he soon afterwards invaded Judæa with a powerful army, and was only induced to make peace with Maccabæus by the fears which he entertained of a rival aspirant to the throne. His caution did not save him. He was put to death by his own

uncle, Demetrius, who, obtaining the throne of Syria, made peace with Judas, but took possession of the citadel of Jerusalem, which was occupied by his general, Nicanor, and a body of troops. This state of things was not allowed to last long. Demetrius listened to the reports of Nicanor's enemies, and threatened to deprive him of his command unless he could disprove the accusation that he had entered into a league with Judas, and was betraying the interests of his sovereign. Nicanor immediately took measures to satisfy Demetrius, and Judas saw it necessary to escape from Jerusalem, and put himself in a posture of defence. A battle took place in which he defeated his enemy. Another was soon after fought at Beth-horon, where he was again victorious. Nicanor himself fell in this battle, and his head and right hand were sent among the spoils to Jerusalem. But the forces of Demetrius were still numerous. Judas had retired to Laish with about three thousand followers. He was there attacked by overwhelming numbers. Only eight hundred of his people remained faithful to him on this occasion. Resolved not to flee, he bravely encountered the enemy, and was speedily slain, regarding his life as a fitting sacrifice to the cause in which he was engaged.

Simon and Jonathan, the brothers of Judas, rallied around them the bravest of their companions, and took up a strong position in the neighbourhood of Tekoa. Jonathan proved himself a worthy successor of his heroic brother, and skilfully evaded the first attack of Bacchides, the Syrian general. For two years after this, the brothers were left in tranquillity, and they established themselves in a little fortress called Bethsai, situated among the rocks near Jericho. The skill and resolution with which they pursued their measures rendered them formidable to the enemy; and the state of affairs in Syria some time after obliged Demetrius to make Jonathan the general of his forces in Judæa, and to invest him with the authority of governor of Jerusalem. To this he was compelled by the rivalry of Alexander Balas; but his policy was too late to secure the attachment of his new ally. Jonathan received offers from Alexander to support his interests among the Jews, and the high-priesthood was the proffered reward. The invitation was accepted; and Jonathan became the first of the Asmonean line through which the high-priesthood was so long transmitted. Alexander Balas left nothing undone which might tend to secure the fidelity of Jonathan. He gave him a high rank among the princes of his kingdom, and adorned him with a purple robe. Jonathan continued to enjoy his prosperity till the year *a.c.* 143, when he fell a victim to the treachery of Trypho, who aspired to the Syrian throne. He was succeeded by his brother Simon, who confirmed the Jews in their temporary independence; and in the year *a.c.* 141 they passed a decree whereby the dignity of the high-priesthood and of prince of the Jews was rendered hereditary in the family of Simon. He fell a victim to the treachery of his son-in-law, Ptolemy, governor of Jericho; but was succeeded by his son, the celebrated John Hyrcanus, who possessed the supreme authority above thirty years, and at his death left it to be enjoyed by his son Aristobulus, who, soon after his accession to power, assumed the title of king. This dignity

continued to be enjoyed by descendants of the Asmonean family till the year *a.c.* 34, when it ceased with the downfall of Antigonids, who, conquered by Herod and the Romans, was put to death by the common executioner.

MACCABEES, BOOKS OF [APOCRYPHA]. The books of Maccabees are the titles of certain Jewish histories containing principally the details of the heroic exploits referred to in the preceding article.

There were in all four books (to which some add a fifth) known to the ancients, of which three are still read in the eastern, and two in the western church. Of these the *third* is the first in order of time. We shall, however, to avoid confusion, speak of them in the order in which they are commonly enumerated.

THE FIRST BOOK OF MACCABEES contains a lucid and authentic history of the undertakings of Antiochus Epiphanes against the Jews, from the year *a.c.* 175 to the death of Simon Maccabæus, *a.c.* 135. This history is confessedly of great value. Although its brevity, observes De Wette, renders it in some instances unsatisfactory, defective, and uncritical, and occasionally extravagant, it is upon the whole entitled to credit, chronologically accurate, and advantageously distinguished above all other historical productions of this period. It is the second book in order of time.

There is little question that this book was written in Hebrew, although the original is now lost. The Greek version abounds in Hebraisms and errors of translation.

Of the author nothing is known; but he must have been a Palestinian Jew, who wrote some considerable time after the death of Simon Maccabæus, and even of Hyrcanus, and made use of several written, although chiefly of traditionary, sources of information. At the same time it is not impossible that the author was present at several of the events which he so graphically describes.

THE SECOND BOOK OF MACCABEES (the third in order of time) is a work of very inferior character to the first. It is an abridgment of a more ancient work, written by a Jew named Jason, who lived at Cyrene in Africa, comprising the principal transactions of the Jews which occurred during the reigns of Seleucus IV., Antiochus Epiphanes, and Antiochus Eupator. It partly goes over the same ground with the first book, but commences ten or twelve years earlier, and embraces in all a period of fifteen years. It does not appear that the author of either saw the other's work. The second book of Maccabees is divided into two unconnected parts. It commences with a letter from the citizens of Jerusalem and Judæa to the Greek Jews in Egypt, written *a.c.* 123 (which refers to a former letter written to the same, *a.c.* 143, acquainting them of their sufferings), and informs them that their worship was now restored, and that they were celebrating the Feast of Dedication. The second part (ii. 18) contains a still more ancient letter, written *a.c.* 159, to the priest Aristobulus, the tutor of King Ptolemy, recounting, besides some curious matter, the death of Antiochus Epiphanes. The third part contains the preface, in which the author states that he is about to epitomise the five books of Jason. The work commences with the attack of Heliodorus on the temple, and closes with the

death of Nicanor, a period of fifteen years. The history supplies some blanks in the first book; but the letters prefixed to it contradict some of the facts recorded in the body of the work, and are consequently supposed to have been added by another hand. Neither are the letters themselves considered genuine, and they were probably written long after the death of Nicanor, and even of John Hyrcanus. This book gives a different account of the place and manner of the death of Antiochus Epiphanes from that contained in the first book.

The narrative, as De Wette observes, abounds in miraculous adventures, historical and chronological errors, extraordinary and arbitrary embellishments, affected descriptions, and moralising reflections. We are not aware when either Jason himself or his epitomiser lived. Jahn refers the age of the epitomiser to some time previous to the middle of the last century before the birth of Christ, and De Wette maintains that Jason must have written a considerable time after the year B.C. 161.

Jerome observes that the phraseology of this book evinces a Greek original. The elegance and purity of the style have misled some persons into the supposition that its author was Josephus.

THE THIRD BOOK OF MACCABEES, still read in the Greek church, is, as has been already observed, the first in order of time. It contains an account of the persecution of the Egyptian Jews by Ptolemy Philopator, who is said to have proceeded to Jerusalem after his victory at Raphia over Antiochus the Great, B.C. 217, and after sacrificing in the temple, to have attempted to force his way into the Holy of Holies, when he was prostrated and rendered motionless by an invisible hand. Upon his return to Egypt, he revenged himself by shutting up the Jews in the Hippodrome, and exposing them to be crushed beneath the feet of elephants. This book contains an account of their deliverance by divine interposition. It is anterior in point of date to the Maccabean period, and has received its designation from a general resemblance to the two first books in the heroic character of the actions which it describes. Calmet (*Commentary*) observes that this book is rejected as apocryphal in the Latin Church; not, however, as not containing a true history, but as not being inspired, as he considers the first two books to be. It is nevertheless regarded by De Wette as a tasteless fable, and notwithstanding the relation which it contains of an annual festival, considered by him as most probably destitute of any historical foundation. Dr. Milman (*Hist. of the Jews*) describes it as a 'romantic story.'

The author is unknown.

THE FOURTH BOOK OF MACCABEES, which is also found in the Alexandrian and Vatican manuscripts, is generally supposed to be the same with the *Supremacy of Reason*, attributed to Josephus, with which it for the most part accords. It consists of an inflated amplification of the history of the martyrdom of Eleazar, and of the seven brothers, whose torments and death, with that of their mother, form the subject of 2 Mace, ch. vi. vii.

Calmet has pointed out several contradictions between this and the second book, as well as the

books of Moses, together with some opinions derived from the Stoics, such as the equality of crimes; which, he supposes, together with its tedious descriptions, have consigned it to the rank of an Apocryphal book.

What has been called the FIFTH BOOK OF MACCABEES is now extant only in the Arabic and Syriac languages.

It is impossible to ascertain the author, who could scarcely have been Josephus, as he disagrees in many things with that historian.

The work consists of a history of Jewish affairs, commencing with the attempt on the treasury at Jerusalem by Heliodorus, and ending with the tragic fate of the last of the Asmonæan princes, and with the inhuman execution by Herod of his noble and virtuous wife Mariamne, and of his two sons. This history thus fills up the chasm to the birth of Christ.

Dr. Cotton has pointed out among the 'remarkable peculiarities' found in this book the phrases, 'Peace be unto thee,' and 'God be merciful to them,' showing that the practice of prayer for the dead was at this time prevalent. But the most remarkable passage in reference to this subject is 2 Mace. xii. 40-45, where Judas forwards to Jerusalem 2000, or according to the Syriac 3000, and according to the Vulgate 12,000 drachmas of silver, to make a sin-offering for the Jews slain in action, on whose persons were found things consecrated to idols, which they had sacrilegiously plundered in violation of the law of Moses (Deut. vii. 25, 26). The author of the book remarks that it was a holy and good thought to pray for the dead, which, he observes, would have been superfluous had there been no resurrection. Calmet observes that, according to the notions of the Jews and some of the Christian Fathers, the pains of hell for those who died in mortal sin (as appears to have been the case of these Jews) were alleviated by the prayers and alms of the living, if not entirely removed; and cites a passage from a very ancient Christian Liturgy to the same effect. This learned commentator supposes that the ancient and Catholic practice of prayer for the dead had its origin in this usage of the Jews, although he admits it to be a distinct thing from the doctrine of purgatory as held in the Roman Church.

The first two books of Maccabees have been at all times treated with a very high degree of respect in the Christian Church. Origin, professing to give a catalogue of the twenty-two canonical books, of which, however, he actually enumerates only twenty-one, adds, 'besides, there are the Maccabees.' This has given rise to the notion that he intended to include these books in the canon, while others have observed that he has omitted the minor prophets from his catalogue. In his preface to the Psalms he excludes the two books of Maccabees from the books of Holy Scripture, but in his *Princip.* (ii. 1), and in his *Comment. ad Rom.* ch. v., he speaks of them as inspired, and as of equal authority with the other books. St. Jerome says that the Church does not acknowledge them as canonical, although he elsewhere cites them as *Holy Scripture*. Bellarmine acknowledges that these, with the other deutero-canonical books, are rejected by Jerome, as they had not been then determined by any general council. The first councils which included them

in the canonical Scriptures were those of Hippo and Carthage. They were received with the other Apocryphal books by the Council of Trent. Basnage, cited by Lardner (*Credibility*), thinks that the word 'Canonical' may be supposed to be used here [by the councils of Hippo and Carthage] loosely, so as to comprehend not only those books which are admitted as a rule of faith, but those which are esteemed useful, and may be publicly read for the edification of the people, in contradistinction to such books as were entirely rejected. This is also the opinion of the Roman Catholic Professor Jahn, who expresses himself in nearly the same words. Dr. Lardner conceives that Augustine also, unless he would contradict himself, must be understood to have used the word in the same sense.

MACEDONIA, a country lying to the north of Greece Proper, having on the east Thrace and the Ægean Sea, on the west the Adriatic and Illyria, on the north Dardania and Masia, and on the south Thessaly and Epirus. The country is supposed to have been first peopled by Chittim or Kittim, a son of Javan (Gen. x. 4) [NATIONS, DISPERSION OR]; and in that case it is probable that the Macedonians are sometimes intended when the word Chittim occurs in the Old Testament. Macedonia was the original kingdom of Philip and Alexander, by means of whose victories the name of the Macedonians became celebrated throughout the East, and is often used for the Greeks in Asia generally. The rise of the great empire formed by Alexander is described by the prophet Daniel under the emblem of a goat with one horn (Dan. viii. 3-8). As the horn was a general symbol of power, and as the oneness of the horn implies merely the unity of that power, we are not prepared to go the lengths of some overzealous illustrators of Scripture, who argue that if a one-horned goat were not a recognised symbol of Macedonia we should not be entitled to conclude that Macedonia was intended. We hold that there could be no mistake in the matter, whatever may have been the usual symbol of Macedonia. It is, however, curious and interesting to know that Daniel did describe Macedonia under its usual symbol, as coins still exist in which that country is represented under the figure of a one-horned goat. There has been much discussion on this subject—more curious than valuable—but the kernel of it lies in this fact.

When subdued by the Romans under Paulus Æmilius (B.C. 168), Macedonia was divided into four provinces; but afterwards (B.C. 142) the whole of Greece was divided into two great provinces, Macedonia and Achaia [GREECE, ACHAEA]. Macedonia therefore constituted a Roman province, governed by a proconsul, in the time of Christ and his Apostles.

The Apostle Paul being summoned in a vision, while at Troas, to preach the Gospel in Macedonia, proceeded thither, and founded the churches of Thessalonica and Philippi (Acts xvi. 9), A.D. 55. This occasion repeated mention of the name, either alone (Acts xviii. 5; xix. 21; Rom. xv. 26; 2 Cor. i. 16; xi. 9; Phil. iv. 15), or along with Achaia (2 Cor. ix. 2; 1 Thess. i. 8). The principal cities of Macedonia were Amphipolis, Thessalonica, and Pella (Liv. xiv. 29); the towns of the province named in the New Testament, and noticed in the present

work, are Amphipolis, Thessalonica, Neapolis, Apollonia, and Berræa.

MACHPELAH (*twofold, double*), the name of the plot of ground containing the cave which Abraham bought of Ephron the Hittite for a family sepulchre (Gen. xxiii. 9, 17) [HEBRON].

MADAI, third son of Japhet (Gen. x. 2), from whom the Medes, &c., are supposed to have descended (GOG; NATIONS, DISPERSION OF).

MADMAN'NAH, a city of Simeon (Josh. xv. 31), very far south towards Gaza (1 Chron. ii. 49), which in the first distribution of lands had been assigned to Judah. Eusebius and Jerome identify it with a town of their time, called Menois, near the city of Gaza.

MADMEN'NAH, a town only named in Isa. x. 31, where it is manifestly placed between Nob and Gibeah. It is generally confounded with the preceding, which is much too far southward to suit the context.

MAG'DALA, a town mentioned in Matt. xv. 39, and the probable birthplace of Mary Magdalene, i. e. Mary of Magdala. It must have taken its name from *a tower or castle*, as the name signifies. It was situated on the lake Genesareth, but it has usually been placed on the east side of the lake, although a careful consideration of the route of Christ before he came to, and after he left, Magdala, would show that it must have been on its western shore. This is confirmed by the Jerusalem Talmud (compiled at Tiberias), which several times speaks of Magdala as being adjacent to Tiberias and Hamath, or the hot-springs. It was a seat of Jewish learning after the destruction of Jerusalem, and the Rabbins of Magdala are often mentioned in the Talmud. A small Moslem village, bearing the name of Mejdal, is now found on the shore of the lake about three miles north by west of Tiberias; and although there are no ancient ruins, the name and situation are very strongly in favour of the conclusion that it represents the Magdala of Scripture. This was probably also the Migdal-el, in the tribe of Naphtali, mentioned in Josh. xix. 38.

MAGI. The Magi were originally one of the six tribes into which the nation of the Medes was divided, who, like the Levites under the Mosaic institutions, were intrusted with the care of religion: an office which was held in the highest honour, gave the greatest influence, and which they probably acquired for themselves only after a long time, as well as many worthy efforts to serve their country, and when they had proved themselves superior to the rest of their brethren. As among other ancient nations, as the Egyptians, and Hebrews, for instance, so among the Medes, the priestly caste had not only religion, but the arts and all the higher culture, in their charge. Their name points immediately to their sacerdotal character (from *Mag* or *Mog*, which denotes 'priest'), either because religion was the chief object of their attention, or more probably because, at the first, religion and art were so allied as to be scarcely more than different expressions of the same idea.

Little in detail is known of the Magi during the independent existence of the Median government; they appear in their greatest glory after the Medes were united with the Persians. This doubtless is owing to the general imperfection of

the historical materials which relate to the earlier periods. So great, however, was the influence which the Magi attained under the united empire, that the Medes were not ill compensated for their loss of national independence. Under the Medo-Persian sway the Magi formed a sacred caste or college, which was very famous in the ancient world for the practice of divination, astrology, and magic. According to Strabo the Magi practised different sorts of divination—1. by evoking the dead; 2. by cups or dishes (Joseph's divining cup, Gen. xlv. 5); 3. by means of water. By the employment of these means the Magi affected to disclose the future, to influence the present, and to call the past to their aid. Even the visions of the night they were accustomed to interpret, not empirically, but according to such established and systematic rules as a learned priesthood might be expected to employ. The success, however, of their efforts over the invisible world, as well as the holy office which they exercised, demanded in themselves peculiar cleanliness of body, a due regard to which and to the general principles of their caste would naturally be followed by professional prosperity, which in its turn conspired with prevailing superstition to give the Magi great social consideration, and make them of high importance before kings and princes—an influence which they appear to have sometimes abused, when, descending from the peculiar duties of their high office, they took part in the strife and competitions of politics, and found themselves sufficiently powerful even to overturn thrones.

Abuses bring reform; and the Magian religion, which had lost much of its original character, and been debased by some of the lowest elements of earthly passions, loudly called for a renovation, when Zoroaster appeared to bring about the needed change. As to the time of his appearance, and in general the particulars of his history, differences of opinion prevail, after all the critical labour that has been expended on the subject. Winer says he lived in the second half of the seventh century before Christ. He was not the founder of a new system, but the renovator of an old and corrupt one, being, as he himself intimates, the restorer of the word which Ormuzd had formerly revealed, but which the influence of Deews had degraded into a false and deceptive magic. To destroy this, and restore the pure law of Ormuzd, was Zoroaster's mission. After much and long-continued opposition on the part of the adherents and defenders of existing corruptions, he succeeded in his virtuous purposes, and caused his system eventually to prevail. The Magi, as a caste, did not escape from his reforming hand. He appears to have remodelled their institute, dividing it into three great classes:—1, learners; 2, masters; 3, perfect scholars. The Magi alone he allowed to perform the religious rites; they possessed the forms of prayer and worship; they knew the ceremonies which availed to conciliate Ormuzd, and were obligatory in the public offerings. They accordingly became the sole medium of communication between the Deity and his creatures, and through them alone Ormuzd made his will known; none but they could see into the future, and they disclosed their knowledge to those only who were so fortunate as to conciliate their good will. Hence the power which the

Magian priesthood possessed. The general belief in the trustworthiness of their predictions, especially when founded on astrological calculations, the all but universal custom of consulting the will of the divinity before entering on any important undertaking, and the blind faith which was reposed in all that the Magi did, reported, or commanded, combined to create for that sacerdotal caste a power, both in public and in private concerns, which has probably never been exceeded. Neither the functions nor the influence of this sacred caste were reserved for peculiar, rare, and extraordinary occasions, but ran through the web of human life. At the break of day they had to chant the divine hymns. This office being performed, then came the daily sacrifice to be offered, not indiscriminately, but to the divinities whose day in each case it was—an office therefore which none but the initiated could fulfil. As an illustration of the high estimation in which the Magi were held, it may be mentioned that it was considered a necessary part of a princely education to have been instructed in the peculiar learning of their sacred order, which was an honour conceded to no other but royal personages, except in very rare and very peculiar instances. This Magian learning embraced everything which regarded the higher culture of the nation, being known in history under the designation of the law of the Medes and Persians. It comprised the knowledge of all the sacred rites, customs, usages, and observances, which related not merely to the worship of the gods, but to the whole private life of every worshipper of Ormuzd—the duties which, as such, he had to observe, and the punishments which followed the neglect of these obligations; whence may be learnt how necessary the act of the priest on all occasions was. Under the veil of religion the priest had bound himself up with the entire of public and domestic life. The judicial office, too, appears to have been, in the time of Cambyses, in the hands of the Magi, for from them was chosen the college or bench of royal judges, which makes its appearance in the history of that monarch. Men who held these offices, possessed this learning, and exerted this influence with the people, may have proved a check to Oriental despotism, no less powerful than constitutional, though they were sometimes unable to guarantee their own lives against the wrath of the monarch.

If we turn to the books of Scripture we find the import of what has been said confirmed, especially in the book of Daniel, where the great influence of the Magi is well illustrated.

The Magi were not confined to the Medes and Persians. Since they are mentioned by Herodotus as one of the original tribes of the Medes, they may have been primitively a Median priesthood. If so they extended themselves into other lands. Possibly Magi may have been at first not the name of a particular tribe or priestly caste, but a general designation for priests or learned men; as Pharaoh denoted not an individual, but generally king or ruler. However this may be, the Chaldeans also had an organized order of Magi, a caste of sacerdotal scholars, which bore the name of 'wise men' (Jer. l. 35); 'the wise men of Babylon' (Dan. ii. 12), among whom Daniel is classed (ii. 18, 24). Among the Greeks and Romans they were known under the name of

Chaldeans, and also of Magi. They lived scattered over the land in different places (Dan. ii. 14), and had possessions of their own. The temple of Belus was employed by them for astronomical observations, but their astronomy was connected with the worship of the heavenly bodies practised by the Babylonians, and was specially directed to vain attempts to foretell the future, predict the fate of individuals or of communities, and sway the present, in alliance with augury, incantation, and magic (Isa. xlvii. 9, 13; Dan. ii.).

It is easy to understand how the lofty science (so called) of these Magi—lofty while its scholars surpassed the rest of the world in knowledge, and were the associates, the advisers, the friends, and the monitors of great and flourishing monarchs, of indeed successively the rulers of the world—might, could indeed hardly fail, as resting on no basis of fact or reality, in process of time, to sink into its own native insignificance, and become either a mere bugbear to frighten the ignorant, or an instrument to aid the fraudulent: thus hastening on to the contempt into which all falsities are sure sooner or later to fall. The decline was indeed gradual; ages passed ere it was completed; but as soon as it ceased to have the support afforded by the mighty and splendid thrones of Asia, it began to lose its authority, which the progress of knowledge and the advent of Christ prevented it from ever regaining. The estimation, however, in which Simon Magus was evidently held, as recorded in the Acts ('some great one,' &c.), gives reason to think that Magianism still retained a large share of its influence at the commencement of our era. It seems, indeed, to have held a sort of middle position, half way between its ancient splendour and its coming degradation: whence we may understand the propriety of the visit paid by the Magi to the newborn King of the Jews (Matt. ii., 'star in the East'). For if the system had been then sunk so low as to correspond in any degree with our conception of these pretended arts, it is difficult to assign, at least to the unbeliever, a sufficient reason why the visit was made, or at any rate why it was recorded; but its credibility is materially furthered if the circumstances of the case are such as to allow us to regard that visit as a homage paid by the representatives of the highest existing influences to the rising star of a new day, in the fuller light of which they were speedily to vanish.

MAGICIANS, the title which in our version is applied to the 'wise men' of Egypt (Gen. xli. 8, 22; Exod. vii. 11; viii. 7, 18, 19; ix. 11), and of Babylon (Dan. i. 20; ii. 2). The Hebrew word properly denotes 'wise men,' as they called themselves and were called by others; but, as we should call them, 'men eminent in learning and science,' their exclusive possession of which in their several countries enabled them occasionally to produce effects which were accounted supernatural by the people.

MAGOG, son of Japhet (Gen. x. 2). In Ezekiel (xxxviii. 2; xxxix. 6) it occurs as the name of a nation, coupled with Gog, and is supposed to represent certain Scythian or Tartar tribes descended from the son of Japhet [NATIONS, DISPERSION OF].

MAHALATH, the title of Psalms liii. and lxxxviii. [PSALMS.]

MAHANAIM (*two hosts*), a place beyond the Jordan, north of the river Jabbok, which derived its name from Jacob's having been there met by the angels on his return from Padan-aram (Gen. xxxii. 2). The name was eventually extended to the town which then existed, or which afterwards arose in the neighbourhood. This town was in the territory of the tribe of Gad (Josh. xiii. 26, 30), and was a city of the Levites (Josh. xxi. 39). It was in this city that Ish-bosheth, the son of Saul, reigned (2 Sam. ii. 8), probably because he found the influence of David's name less strong on the east than on the west of the Jordan. The choice, at least, seems to show that Mahanaim was then an important and strong place. Hence, many years after, David himself repaired to Mahanaim when he sought refuge beyond the Jordan from his son Absalom (2 Sam. xvii. 24, 27; 1 Kings ii. 8). We only read of Mahanaim again as the station of one of the twelve officers who had charge, in monthly rotation, of raising the provisions for the royal establishments under Solomon (1 Kings iv. 14). The site has not yet been identified.

MAHER-SHALAL-HASH-BAZ, words prognostic of the sudden attack of the Assyrian army ('he hasteth to the spoil'), which the prophet Isaiah was first commanded to write in large characters upon a tablet, and afterwards to give as a symbolical name to a son that was to be born to him (Isa. viii. 1, 3). It is, as Dr. Henderson remarks, the longest of any of the Scripture names, but has its parallels in this respect in other languages, especially in our own during the time of the Commonwealth.

MAHILION, one of the two sons of Elimelech and Naomi, and first husband of Ruth the Moabitess (Ruth i. 2, sq.). [RUTH.]

MAKKEDAH, a royal city of the ancient Canaanites (Josh. xii. 16), in the neighbourhood of which was the cave in which the five kings who confederated against Israel took refuge after their defeat (Josh. x. 10-29). It afterwards belonged to Judah (Josh. xv. 41). Makkedah is placed by Eusebius and Jerome 8 Roman miles to the east of Eleutheropolis.

MALACHI, the last of the minor prophets, and consequently the latest writer in the canon of the Old Testament. Nothing is known of his person or history. It appears that he lived after Zechariah, since in his time the second temple was already built (ch. iii. 10); and it is probable that he was contemporary with Nehemiah (comp. ch. ii. 11, with Neh. xiii. 25-27, and ch. iii. 8, with Neh. xiii. 10).

The name Malachi means, as some understand it, *my angel*; but it seems more correct to regard it as a contracted form of *angel of Jehorah*. As the word translated 'angel' means also a 'messenger,' angels being, in fact, the messengers of God; and as the prophets are often styled angels or messengers of Jehorah, it is supposed that 'Malachi' is merely a general title descriptive of this character, and not a proper name. It has very generally been supposed that this prophet is the same with Ezra, but the weight of authority is decidedly in favour of his separate existence.

Although it is well agreed that Malachi was the last of the prophets, the date of his prophecy has been variously determined. Usher makes him contemporary with Nehemiah, in B.C. 416:

and the general opinion that this prophet was contemporary with, or immediately followed, Nehemiah, makes most of the proposed alternatives range within a few years of that date. He censures the same offences which excited the indignation of Nehemiah, and which that governor had not been able entirely to reform. Speaking of God's greater kindness to the Israelites than to the Edomites, he begins with declaiming against the priests for their profane and mercenary conduct, and against the people for their multiplied divorces and intermarriages with idolatrous nation; he threatens them with punishment and rejection, declaring that God would 'make his name great among the Gentiles' (ch. i. 11), for that he was wearied with the iniquity of Israel (ch. i. ii.). From this the prophet takes occasion solemnly to proclaim that the Lord whom they sought should suddenly come to his temple, preceded by that messenger who, like a harbinger, should prepare his way; that the Lord when he should appear would purify the sons of Levi from their unrighteousness, and refine them as metal from the dross (ch. iii. 1-3); that then 'the offering of Judah,' the spiritual sacrifice of the heart, 'should be pleasant to the Lord,' as was that of the patriarchs and their uncorrupted ancestors (ch. iii. 4); and that the Lord would quickly exterminate the corruptions and adulteries which prevailed. The prophet then proceeds with an earnest exhortation to repentance; promising high rewards and remembrance to the righteous in that last day when the Lord shall make up his peculiar treasures, and finally establish a distinction of doom and condition between the righteous and the wicked (ch. iii. 16-18). Malachi then concludes with an impressive assurance of approaching salvation to those who feared God's name from that 'sun of righteousness,' who should arise with healing in his wings, and render them triumphant; enjoining in the solemn close of his exhortation, when uttering as it were the last admonition of the Jewish prophets, an observance of the law of Moses, till the advent of Elijah the prophet (ch. iv. 5, or John the Baptist, who came in the spirit and power of Elias, Mark xi. 12; Luke i. 17), who before the coming of that 'great and dreadful day of the Lord,' should turn the hearts of the fathers to the children, and the heart of the children to their fathers' (ch. iv.). Thus Malachi sealed up the volume of prophecy with the description of that personage at whose appearance the evangelists begin their gospel history.

The claim of the book of Malachi to its place in the canon of the Old Testament has never been disputed; and its authority is established by the references to it in the New Testament (Matt. xi. 10; xvii. 12; Mark i. 2; ix. 11, 12; Luke i. 17; Rom. ix. 13).

The manner of Malachi offers few, if any, distinguishing characteristics. The style, rhythm, and imagery of his writings are substantially those of the old prophets, but they possess no remarkable vigour or beauty. This is accounted for by his living during that decline of Hebrew poetry, which we trace more or less in all the sacred writings posterior to the Captivity.

MALCHUS, the servant of the high-priest Caiaphas, whose right ear was cut off by Peter in the garden of Gethsemane (John xviii. 10).

MALLOWS (Job xxx. 4). The proper meaning of the word (*malluach*), which is thus rendered in the Authorized Version, has given rise to considerable discussion. Mallows are still used as food in India, as they formerly were in Europe, and probably in Syria. 'We saw,' says Biddulph, 'many poor people collecting mallows and three-leaved grass, and asked them what they did with it; and they answered, that it was all their food, and that they boiled it, and did eat it.' Lady Calcott is of opinion that the plant mentioned by the patriarch is Jews' mallow, which still continues to be eaten in Egypt and Arabia, as well as in Palestine.

The learned Bochart, however, contends that the word *malluach* denotes a saltish plant, which is supposed to be the *Atriplex Halimus* of botanists, or tall shrubby *Orache*. There is no doubt that species of *Orache* were used as articles of diet in ancient times, and probably still are so in the countries where they are indigenous; but there are many other plants, similar in nature, that is, soft and succulent, and usually very saline, which, like the species of *Atriplex*, belong to the same natural family of *Cheupodea*, and which from their saline nature have received their respective names. Some of these are shrubby, but most of them are herbaceous, and extremely common in all the dry, desert, and saline soils which extend from the south of Europe to the north of India. Most of them are saline and bitter, but some are milder in taste and mucilaginous, and are therefore employed as articles of diet, as spinach is in Europe. *Salsola indica*, for instance, which is common on the coasts of the Peninsula of India. Dr. Roxburgh states, saved the lives of many thousands of the poor natives of India during the famine of 1791-2-3; for while the plant lasted, most of the poorer classes who lived near the sea had little else to eat; and indeed its green leaves ordinarily form an essential article of the food of those natives who inhabit the maritime districts.

MAM'MON, a Chaldee word signifying 'wealth' or 'riches,' and bearing that sense in Luke xvi. 9, 11; but also used by our Saviour (Matt. vi. 24; Luke xvi. 13) as a personification of the god of riches: 'Ye cannot serve God and Mammon.'

MAM'RE, the name of an Amorithish chief who, with his brothers Aner and Eshcol, was in alliance with Abraham (Gen. xiv. 13, 24). Hence, in the Authorized Version, 'the oaks of Mamre,' 'plain of Mamre' (Gen. xiii. 18; xviii. 1), or simply 'Mamre' (xxiii. 17, 19; xxxv. 27), a grove in the neighbourhood of Hebron.

MAN. The derivation of the word is probably from *dam*, *likeness*, because man was made in the *likeness of God*. Others have, however, sought to derive it from a term signifying to be 'red' or 'red-haired'. Adam is 1. the proper name of the first man, though Gesenius thinks that when so applied it has the force rather of an appellative, and that, accordingly, in a translation, it would be better to render it *the man*. It seems, however, to be used by St. Luke as a proper name in the genealogy (iii. 38); by St. Paul (Rom. v. 14; 1 Tim. ii. 13, 14); and by Jude (14). St. Paul's use of it in 1 Cor. xv. 45 is remarkably clear. This derivation is as old as Josephus, who says that 'the first man was called Adam, because

he was formed from the red earth,' and adds, 'for the true virgin earth is of this colour' (*Antiq.* i. 1, § 2). But is this true? and when man is turned again to his earth, is *that* red? 2. It is the generic name of the human race as originally created, and afterwards, like the English word man, person, whether man or woman (*Gen.* i. 26, 27; v. 2; viii. 21; *Deut.* viii. 3; *Matt.* v. 13, 16; 1 *Cor.* vii. 26), and even without regard to age (*John* xvi. 21). It is applied to women only. 'the human persons of women' (*Num.* xxxi. 35). 3. It denotes man in opposition to woman (*Gen.* iii. 12; *Matt.* xix. 10), though, more properly, the husband in opposition to the wife (*comp.* 1 *Cor.* vii. 1). 4. It is used, though very rarely, for those who maintain the dignity of human nature, a man, as we say, meaning one that deserves the name: 'One man in a thousand have I found, but a woman,' &c. (*Eccles.* vii. 28). Perhaps the word here glances at the original uprightness of man. 5. It is frequently used to denote the more degenerate and wicked portion of mankind: an instance of which occurs very early, 'The sons, or worshippers, of God married the daughters of men, or the irreligious' (*Gen.* vi. 2). 6. The word is used to denote other men, in opposition to those already named as, 'both upon Israel and other men' (*Jer.* xxxii. 20), i. e. the Egyptians. 'Like other men' (*Ps.* lxxiii. 5), i. e. common men, in opposition to better men (*Ps.* lxxxii. 7); men of inferior rank, as opposed to men of higher rank (see *Ileb.*, Is. ii. 9; v. 15; *Ps.* xlix. 3; *lxii.* 10; *Prov.* viii. 4). The phrase 'son of man,' in the Old Testament, denotes man as frail and unworthy (*Num.* xxiii. 19; *Job* xxv. 6; *Ezek.* ii. 1, 3); as applied to the prophet, so often, it has the force of 'oh mortal!' There are three other Hebrew words thus translated in our version, and which in the original are used with much precision: one denoting a man as distinguished from a woman; another, 'mortals,' as transient, perishable, liable to sickness; and a third, man, in regard to the superior powers and faculties with which he is endowed above all earthly creatures.

MAN'AEN, a Christian teacher at Antioch, who had been foster-brother of Herod Antipas (*Acts* xiii. 1). He is supposed to have been one of the seventy disciples, but this is uncertain, as no particulars of his life are known.

MANASSEH, TRIBE OF. When the tribe of Manasseh quitted Egypt, it numbered 32,200 adult males (*Num.* i. 34, 35), being 8300 less than the tribe of Ephraim, the younger son of Joseph. This was the lowest number of adult males in any tribe at that period; but if we add the two together, the tribe of Joseph, composed of these two tribes, reached to 72,700, which was more than any other tribe contained, except Judah. During the sojourn in the wilderness, the tribe of Manasseh rose to 52,700 (*Num.* xxvi. 34), being an increase of 20,500. This gave it rank in point of population as the sixth of the tribes, Judah, Issachar, Zebulun, Dan, and Asher only being more numerous. In the same period Ephraim had declined to nearly the same position which Manasseh had previously occupied, its numbers being reduced to 32,500. Yet the prophecy of Jacob was fulfilled, and, when settled in Canaan, Ephraim became superior in wealth, power and population, not only to Manasseh, but to all the tribes except Judah. One circumstance

tending to weaken Manasseh may have been the division which took place in it on entering Palestine. The pastoral half of the tribe was allowed to establish itself with Reuben and Gad, on the east of the Jordan, where it occupied the northernmost portion, consisting of Argob and Bashan, from the Jabbok to Mount Hermon (*Nnm.* xxxii. 39; xxxiv. 14; *Deut.* iii. 3; *Josh.* xii. 6; xiii. 7; 1 *Chron.* vi. 23), while the other half was provided for with the rest of the tribes in Canaan proper, west of the Jordan, where it had a fine tract of country extending from that river to the Mediterranean, with the kindred tribe of Ephraim on the south, and Issachar on the north (*Josh.* xvi. 9; xvii. 7-11). The half-tribe west of the river was not, however, for some time able to expel the former inhabitants of the territory, so as to obtain the exclusive possession of it (*Josh.* xvii. 12; *Judg.* i. 27). The tribe of Manasseh makes no figure in the history of the Hebrews.

1. MANASSEH (*who makes forget*, see *Gen.* xli. 51), the elder of the two sons of Joseph, born in Egypt (*Gen.* xli. 51; xlii. 20), whom Jacob adopted as his own (xlviii. 1)—by which act each became the head of a tribe in Israel. The act of adoption was however accompanied by a clear intimation from Jacob, that the descendants of Manasseh, although the elder, would be far less numerous and powerful than those of the younger Ephraim. The result corresponded remarkably with this intimation (*EPHRAIM*).

2. MANASSEH, fourteenth king of Judah, son and successor of Hezekiah, who began to reign in B.C. 699, at the early age of twelve years, and reigned fifty-five years. It appears that the secret enemies of the vigorous reforms of Hezekiah re-appeared, and managed to gain much influence at court during the youth of Manasseh; and he was prevailed upon to re-establish all the idolatries and abominations which it had taken his excellent father so much pains to subvert. This bent having been unhappily given to the mind of one old enough to listen to evil counsels, but too young to see their danger, the king followed it with all the reckless ardour of youth, and without any of the prudent reservations which older sovereigns, more discreet in evincing the same inclinations, had maintained. Idolatry in its worst forms, and all the abominations connected with its observances, were practised without stint and without shame, not only in the face of the temple, but in its very courts, where altars to the heavenly bodies were set up, and rites of idolatrous worship performed. Under this altered state of things, the Judahites, with the sanction of the king's example, rushed into all the more odious observances of Syrian idolatry, with all the ardour which usually attends the outbreak of a restrained propensity, till they became far 'worse than the heathen, whom the Lord destroyed before the children of Israel.' In vain did the prophets raise their voice against these iniquities, and threaten Manasseh and his kingdom with awful tokens of Divine indignation. Instead of profiting by these warnings, the king vented his rage against those by whom they were uttered, and in this, and other ways, filled Jerusalem with innocent blood beyond any king who reigned before him (1 *Kings* xxi. 1-16; 2 *Chron.* xxxiii. 1-10).

At length the wrath of God burst over the guilty king and nation. At this time there was constant war between Assyria and Egypt, and it would seem that Manasseh adhered to the policy of his father in making common cause with the latter power. This or some other cause not stated by the sacred historian, brought into Judaea an Assyrian army, under the generals of Esarhaddon, which carried all before it. The miserable king attempted flight, but was discovered in a thorn-bush in which he had hidden himself, was laden with chains, and sent away as a captive to Babylon, which was then subject to the Assyrians, where he was cast into prison (B.C. 677). Here, at last, Manasseh had ample opportunity and leisure for cool reflection; and the hard lessons of adversity were not lost upon him. He saw and deplored the evils of his reign, he became as a new man, he humbly besought pardon from God, and implored that he might be enabled to evince the sincerity of his contrition, by being restored to a position for undoing all that it had been the business of his life to effect. His prayer was heard. His captivity is supposed to have lasted a year, and he was then restored to his kingdom under certain obligations of tribute and allegiance to the king of Assyria, which, although not expressed in the account of this transaction, are alluded to in the history of his successors (2 Chron. xxxiii. 11-13).

On his return to Jerusalem, Manasseh exerted himself to the utmost in correcting the errors of his early reign, and in establishing the worship of Jehovah in its former purity and splendour. The good conduct of his latter reign was rewarded with such prosperity as enabled him to do much for the improvement and strengthening of his capital and kingdom. He thoroughly repaired the old walls of Jerusalem, and added a new wall on the side towards Gihon; he surrounded and fortified by a separate wall the hill or ridge on the east of Zion, which bore the name of Ophel, and he strengthened, garrisoned, and provisioned 'the fenced cities of Judah' (2 Chron. xxxiii. 13-17). He died in peace (B.C. 664), at the age of sixty-eight, after having reigned longer than any other king of Judah, and was buried in a sepulchre which he had prepared for himself in his own garden (xxxiii. 20).

MANASSES, PRAYER OF [ΑΠΟΚΡΥΦΑ]. This pseudepigraphical work has come down to us in the MSS. of the Latin Vulgate, and is found in the early printed editions of that version. Du Pin asserts that the Latin fathers have often cited this prayer; but the earliest reference to it which we know of is in the *Apostolical Constitutions* attributed to Clement Romanus, but which are generally believed to be a work of the fourth century. In this work the prayer is cited as if it were an integral portion of the book of Chronicles, together with some traditional accounts of the nature of his imprisonment in shackles of iron, and of his miraculous release: which are also alluded to in the Targum on Chronicles. It is entitled 'The Prayer of Manasses, king of Judah, when he was holden captive in Babylon,' and had doubtless its origin from 2 Chron. xxxiii. 12, 13. This prayer, however, not being found in the Hebrew, and not being cited by the more eminent fathers, nor contained in any of

the catalogues of ancient councils, has not been received in the church as genuine or canonical. It is classed in the Sixth Article of the Church of England, among the 'other books read by the church for example of life and instruction of manners'; but the Church of Rome classes it with 3rd and 4th Esdras, removing it to the end of the Bible, and rejecting it from the deuterocanonical, as well as from the proto-canonical books.

The prayer of Manasses abounds in pious sentiments. Dr. Horne describes it as not unworthy of the occasion on which it is pretended to have been composed. Du Pin observes that, though not very eloquent, it is full of good thoughts.

MANDRAKE. This word only occurs in two places of Scripture; first in Genesis xxx. 14-16; and secondly, in Canticles vii. 13. From the notices given in these passages of their qualities it is evident that mandrakes were collected in the fields, that they were fit for gathering in the wheat harvest in Mesopotamia, where the first occurrence took place; that they were found in Palestine; that they or the plants which yielded them diffused a peculiar odour, and that they were supposed to be possessed of aphrodisiac powers, or of assisting in producing conception.

The plant referred to is probably *mandragora*.

238. [Atropa Mandragora.]

'At the village of St. John in the mountains, says Mariti, 'about six miles south-west from Jerusalem, this plant is found at present, as well as in Tuscany. It grows low, like lettuce, to which its leaves have a strong resemblance, except that they have a dark green colour. The flowers are purple, and the root is for the most part forked. The fruit, when ripe in the beginning of May, is of the size and colour of a small apple, exceedingly ruddy, and of a most agree-

able odour; our guide thought us fools for suspecting it to be unwholesome.' Maundrell was informed by the chief priest of the Samaritans that it was still noted for its genial virtue. Hasselquist also seems inclined to consider this the plant referred to, for, when at Nazareth, he says, 'what I found most remarkable in their villages was the great quantity of mandrakes that grew in a vale below it. The fruit was now (May 16) ripe. From the season in which this mandrake blossoms and ripens its fruit, one might form a conjecture that it is Rachel's *dudaim* (mandrakes). These were brought her in the wheat harvest, which in Galilee is in the month of May, about this time, and the mandrake was now in fruit.'

MANNA, or MAN. The name given to the miraculous food upon which the Israelites were fed for forty years, during their wanderings in the desert. The same name has in later ages been applied to some natural productions, chiefly found in warm dry countries, but which have little or no resemblance to the original manna. This is first mentioned in Exod. xvi. It is there described as being first produced after the eighth encampment in the desert of Sin, as white like hoar frost (or of the colour of *bellium*, Num. xi. 7), round, and of the bigness of coriander seed (*gad*). It fell with the dew every morning, and when the dew was exhaled by the heat of the sun, the manna appeared alone, lying upon the ground or the rocks round the encampment of the Israelites. 'When the children of Israel saw it, they said one to another, *What is it?* for they knew not what it was' (Exod. xvi. 15). In the Authorized, and some other versions, this passage is inaccurately translated—which indeed is apparent from the two parts of the sentence contradicting each other. Josephus (*Antiq.* iii. 1. § 10), as quoted by Dr. Harris, says: 'The Hebrews call this food *manna*, for the particle *man* in our language is the asking of a question, *What is this?* (*man-hu*). Moses answered this question by telling them, 'This is the bread which the Lord hath given you to eat.' We are further informed that the manna fell every day, except on the Sabbath. Every sixth day, that is on Friday, there fell a double quantity of it. Every man was directed to gather an omer (about three English quarts) for each member of his family; and the whole seems afterwards to have been measured out at the rate of an omer to each person: 'He who gathered much had nothing over, and he who gathered little had no lack.' That which remained ngathered dissolved in the heat of the sun, and was lost. The quantity collected was intended for the food of the current day only; for if any were kept till next morning, it corrupted and bred worms. Yet it was directed that a double quantity should be gathered on the sixth day for consumption on the Sabbath. And it was found that the manna kept for the Sabbath remained sweet and wholesome, notwithstanding that it corrupted at other times, if kept for more than one day. In the same manner as they would have treated grain, they reduced it to meal, kneaded it into dough, and baked it into cakes, and the taste of it was like that of wafers made with honey, or of fresh oil. In Num. xi. 6-9, where the description of the manna is repeated, an omer of it is directed to be preserved as a

memorial to future generations, 'that they may see the bread wherewith I have fed you in the wilderness;' and in Joshua v. 12 we learn that after the Israelites had encamped at Gilgal, and 'did eat of the old corn of the land, the manna ceased on the morrow after, neither had the children of Israel manna any more.'

239. [1. *Alhagi maurorum*. 2. *Tamarix gallica*.]

This miracle is referred to in Deut. viii. 3; Neh. ix. 20; Ps. lxxviii. 24; John vi. 31, 49, 58; Heb. ix. 4. Though the manna of Scripture was so evidently miraculous, both in the mode and in the quantities in which it was produced, and though its properties were so different from anything with which we are acquainted, yet, because its taste is in Exodus said to be like that of wafers made with honey, many writers have thought that they recognised the manna of Scripture in a sweetish exudation which is found on several plants in Arabia and Persia. The name *man*, or *mannu*, is applied to this substance by the Arab writers, and was probably so applied even before their time. But the term is now almost entirely appropriated to the sweetish exudation of the ash trees of Sicily and Italy. These, however, have no relation to the supposed manna of Scripture. Of this one kind is known to the Arabs by the name of *guznybern*, being the produce of a plant called *guz*, and which is ascertained to be a species of tamarisk. The same species seems also to be called *toorja*, and is common along different parts of the coast of Arabia. It is also found in the neighbourhood of Mount Sinai. In the month of June it drops from the thorns of the tamarisk upon the fallen twigs, leaves and thorns, which always cover the ground beneath the tree in the natural state. The Arabs use it as they do honey, to pour over their unleavened bread, or to dip their bread into; its taste is agreeable, somewhat aromatic, and as sweet as honey. If eaten in any quantity it is said to be highly purgative. When Lieut. Wellsted visited this place in the month of September, he found the extremities of the twigs and branches retaining the peculiar sweetness and flavour which characterize the manna. The Bedouins collect it early in the morning, and, after straining it through a cloth, place it either in skins or gourds; a considerable quantity is consumed by themselves; a portion is sent to Cairo;

and some is also disposed of to the monks at Mount Sinai. The latter retail it to the Russian pilgrims.* The Bedouins assured me that the whole quantity collected throughout the Peninsula, in the most fruitful season, did not exceed 150 wogas (about 700 pounds); and that it was usually disposed of at the rate of 60 dollars the woga.*

Another kind of manna, which has been supposed to be that of Scripture, is yielded by a thorny plant very common from the north of India to Syria, and which by the Arabs is called Al-haj; whence botanists have constructed the name *Alhagi maurorum* is remarkable for the exudation of a sweetish juice, which concretes into small granular masses, and which is usually distinguished by the name of Persian manna. The climates of Persia and Bokhara seem also well suited to the secretion of this manna, which in the latter country is employed as a substitute for sugar, and is imported into India for medicinal use through Canbul and Khorassan. These two, from the localities in which they are produced, have alone been thought to be the manna of Scripture. But, besides these, there are several other kinds of manna. Indeed, a sweetish secretion is found on the leaves of many other plants, produced sometimes by the plant itself, at others by the punctures of insects. It has been supposed, also, that these sweetish exudations being evaporated during the heat of the day in still weather, may afterwards become deposited, with the dew, on the ground, and on the leaves of plants; and thus explain some of the phenomena which have been observed by travellers and others. But none of these mannas explain, nor can it be expected that they should explain, the miracle of Scripture, by which abundance is stated to have been produced for millions, where hundreds cannot now be subsisted.

MANOAH, father of Samson [SAMSON].

MANSLAYER. [BLOOD-REVENGE].

MA'ON, a town in the tribe of Judah (Josh. xv. 55), which gave name to a wilderness where David hid himself from Saul, and around which the churlish Nabal had great possessions (1 Sam. xxiii. 24, 25; xxv. 2). Jerome places it to the east of Daroma. The name does not occur in modern times, and Dr. Robinson regards it as one of the sites first identified by himself. He finds it in the present Main, which is about seven miles south by east from Hebron. Here there is a conical hill about 200 feet high, on the top of which are some ruins of no great extent, consisting of foundations of hewn stone, a square enclosure, the remains probably of a tower or castle, and several cisterns. The view from the summit is extensive. This is Main. The traveller found here a band of peasants keeping their flocks, and dwelling in caves amid the ruins (*Bibl. Researches*, ii. 190-196).

MA'RAH (*bitterness*). The Israelites, in departing from Egypt, made some stay on the shores of the Red Sea, at the place where it had been crossed by them. From this spot they proceeded southward for three days without finding any water, and then came to a well, the waters of which were so bitter, that, thirsty as they were, they could not drink them. The well was called *Marah* from the quality of its waters. This name, in the form of Amarah, is now borne by

the barren bed of a winter torrent, a little beyond which is still found a well called Howara, the bitter waters of which answer to this description. Camels will drink it; but the thirsty Arabs never partake of it themselves; and it is said to be the only water on the shore of the Red Sea which they cannot drink. The water of this well, when first taken into the mouth, seems insipid rather than bitter, but when held in the mouth a few seconds it becomes exceedingly nauseous. The well rises within an elevated mound surrounded by sand-hills, and two small date-trees grow near it.

The Hebrews, unaccustomed as yet to the hardships of the desert, and having been in the habit of drinking their full of the best water in the world, were much distressed by its scarcity in the region wherein they now wandered; and in their disappointment of the relief expected from this well, they murmured greatly against Moses for having brought them into such a dry wilderness, and asked him, 'What shall we drink?' On this Moses cried to Jehovah, who indicated to him 'a certain tree,' on throwing the branches of which into the well, its waters became sweet and fit for use. The view which has been taken of this transaction by Dr. Kitto, in the *Pictorial Hist. of Palestine*, ii. 209, 210, is here introduced, as it has been judged satisfactory, and as no new information on the subject has since been obtained.

The question connected with this operation is—whether the effect proceeded from the inherent virtue of the tree in sweetening bad water; or that it had no such virtue, and that the effect was purely miraculous. In support of the former alternative, it may be asked why the tree should have been pointed out and used at all, unless it had a curative virtue? And to this the answer may be found in the numerous instances in which God manifests a purpose of working even his miracles in accordance with the general laws by which he governs the world, and for that purpose disguising the naked exhibition of supernatural power, by the interposition of an *apparent* cause; while yet the true character of the event is left indisputable, by the utter inadequacy of the apparent cause to produce, by itself, the resulting effect. This tends to show that the tree, or portion of it, need not be supposed, from the mere fact of its being employed, to have had an inherent curative virtue. It had not *necessarily* any such virtue; and that it positively had not such virtue seems to follow, or, at least, to be rendered more than probable by the consideration that, in the scanty and little diversified vegetation of this district, any such very desirable virtues in a tree, or part of a tree, could scarcely have been undiscovered before the time of the history, and if they had been discovered, could not but have been known to Moses; and the Divine indication of the tree would not have been needful. And, again, if the corrective qualities were inherent but were at this time first made known, it is incredible that so valuable a discovery would ever have been forgotten; and yet it is manifest that in after-times the Hebrews had not the knowledge of any tree which could render bad water drinkable; and the inhabitants of the desert have not only not preserved the knowledge of a fact which would have been so important to them.

but have not discovered it in the thirty-five centuries which have since passed. This is shown by the inquiries of travellers, some of whom were actuated by the wish of finding a plant which might supersede the miracle. No such plant, however, can be found; and whatever the tree was, it can have had no more inherent virtue in sweetening the bitter well of Marah, than the salt had, which produced the same effect, when thrown by Elisha into the well of Jericho.

MARANATHA. [ANATHHEMA.]

MARCHESHVAN is the name of that month which was the eighth of the sacred and the second of the civil year of the Jews, which began with the new moon of our November. There was a fast on the 6th, in memory of Zedekiah's being blinded, after he had witnessed the slaughter of his sons (2 Kings xxv. 7).

This month is always spoken of in the Old Testament by its numerical designation, except once, when it is called Bul (1 Kings vi. 38), supposed to be a shortened form of the Hebrew word signifying 'rain'; and the signification of *rain-month* is well suited to November in the climate of Palestine.

MARESHAH, a town in the tribe of Judah (Josh. xv. 14), rebuilt and fortified by Rehoboam (2 Chron. xi. 8). The Ethiopians under Zerah were defeated by Asa in the valley near Maresah (2 Chron. xiv. 9-13). It was laid desolate by Judas Maccabæus, on his march from Hebron to Ashdod (1 Macc. v. 65-68; Joseph. *Antiq.* xii. 8. 6). Josephus mentions it among the towns possessed by Alexander Jannæus, which had been in the hands of the Syrians (*Ib.* xiii. 15. 4); but by Pompey it was restored to the former inhabitants, and attached to the province of Syria (*Ib.* xiv. 4. 4). Maresa was among the towns rebuilt by Gabinus (*Ib.* xiv. 5. 3), but was again destroyed by the Parthians in their irruption against Herod (*Ib.* xiv. 5. 3). A place so often mentioned in history must have been of considerable importance; but it does not appear that it was ever again rebuilt. The site, however, is set down by Eusebius and Jerome as within two miles of Eleutheropolis, but the direction is not stated. Dr. Robinson found, at a mile and a half south of the site of Eleutheropolis, a remarkable tell, or artificial hill, with foundations of some buildings. As there are no other ruins in the vicinity, and as the site is admirably suited for a fortress, this, he supposes, may have been Maresah.

MARK. According to ecclesiastical testimonies, the evangelist Mark is the same person who in the Acts is called by the Jewish name John, whose Roman surname was Marcus (Acts xii. 12, 25). This person is sometimes called simply John (Acts xiii. 5, 13); and sometimes Mark (Acts xv. 39).

Mary, Mark's mother, had a house at Jerusalem, in which the Apostles were wont to assemble (Acts xii. 12). In the Epistle to the Colossians (iv. 10, 11) Mark is mentioned among the assistants of Paul, and as being one of the converts from Judaism. From this passage we learn also that Mark was a cousin of Barnabas, which circumstance confirms the opinion that he was of Jewish descent. It was probably Barnabas who first introduced him to Paul. He accompanied Paul and Barnabas on their travels as an assistant

(Acts xii. 25; xiii. 5). When they had arrived in Pamphylia, Mark left them and returned to Jerusalem, from which city they had set out (Acts xiii. 13). On this account Paul refused to take Mark with him on his second apostolical journey, 'and so Barnabas took Mark, and sailed unto Cyprus' (Acts xv. 37-39). It seems, however, that Mark, at a later period, became reconciled to Paul, since, according to Col. iv. 10, and Philem. 24, he was with the Apostle during his first captivity at Rome; and, according to 2 Tim. iv. 11, he was also with him during his second captivity. The passage in Colossians proves also that he was about to undertake for Paul a journey to Colosse.

There is a unanimous ecclesiastical tradition that Mark was the companion and 'interpreter' of Peter, probably so called because he was the assistant of Peter, and either orally or in writing communicated and developed what Peter taught. This tradition is the more credible, as the New Testament does not contain any passage that could have led to its invention. The testimony in favour of the connection between Mark and Peter is so old and respectable, that it cannot be called in question. It first occurs at the commencement of the second century, and proceeds from the presbyter John; it afterwards appears in Irenæus; in Tertullian; in Clemens Alexandrinus, Jerome, and others.

Eusebius represents (*Hist. Eccles.* ii. 15) from the later life of Mark, that he was with Peter at Rome. Epiphanius and others inform us that he introduced the Gospel into Egypt, founded the church at Alexandria, and that he died in the eighth year of Nero's reign.

THE GOSPEL OF MARK.—The same ancient authors, who call Mark a disciple and secretary of Peter, state also that he wrote his Gospel according to the discourses of that Apostle. The most ancient statement of this fact is that of the presbyter John and of Papias, which we thus translate from Eusebius (*Hist. Eccles.* iii. 39):—Mark having become secretary to Peter, whatever he put into style he wrote with accuracy, but did not observe the chronological order of the discourses and actions of Christ, because he was neither a hearer nor a follower of the Lord; but at a later period, as I have said, wrote for Peter to meet the requisites of instruction, but by no means with the view to furnish a connected digest of the discourses of our Lord. Consequently Mark was not in fault when he wrote down circumstances as he recollected them; for he had only the intention to omit nothing of what he had heard, and not to misrepresent anything.

It has been noticed in the article LUKE that, according to Irenæus, the Gospels of Mark and Luke were written later than that of Matthew; and according to a tradition preserved by Clemens Alexandrinus, the Gospels of Matthew and Luke preceded that of Mark. The chronological order of the Gospels is, according to Origen, the same in which they follow each other in the codices. Irenæus states that Mark wrote after the death of Peter and Paul; but, according to Clemens Alexandrinus and Eusebius, he wrote at Rome while Peter was yet living. These various data leave us in uncertainty.

In the article GOSPELS we have stated our opinion concerning the relative position in which

the evangelists stand to each other. We do not see any reason to contradict the unanimous tradition of antiquity concerning the dependence of Mark upon Peter. We deem it possible, and even probable, that Luke read Mark, and that he also alludes to him by reckoning him among the *many* who had written gospel history before him. This supposition, however, is by no means necessary or certain; and it is still possible that Mark wrote after Luke. Some of the ancient testimonies which we have quoted, namely, those of Irenæus, Clemens Alexandrinus, Jerome, and others, state that Mark's Gospel was written at Rome. Whether this was the case or not, it is certain that it was written for Gentile Christians. This appears from the explanation of Jewish customs (ch. vii. 2, 11; xii. 18; xiii. 3; xiv. 12; xv. 6, 42). The same view is confirmed by the scarcity of quotations from the Old Testament, perhaps also by the absence of the genealogy of Christ, and by the omission of the Sermon on the Mount, which explains the relation of Christ to the Old Testament dispensation, and which was, therefore, of the greatest importance to Matthew.

The characteristic peculiarity of Mark as an author is particularly manifest in two points:

1. He reports rather the works than the discourses of our Saviour; 2. He gives details more minutely and graphically than Matthew and Luke; for instance, he describes the cures effected by Jesus more exactly (iv. 31, 41; vi. 5, 13; vii. 33; viii. 23). He is also more particular in stating definite numbers (v. 13, 42; vi. 7, 14, 30), and furnishes more exact dates and times (i. 32, 35; ii. 1, 26; iv. 26, 35; vi. 2; xi. 11, 19, 20, &c.). It may be that these characteristics of Mark originated from his connection with Peter.

Most of the materials of Mark's narrative occur also in Matthew and Luke. He has, however, sections exclusively belonging to himself, viz. iii. 21, 31, sq.; vi. 17, sq.; xi. 11; xii. 28, sq.

We mention the conclusion of Mark's Gospel separately, since its genuineness may be called in question.

Among the *Codices Majusculi* the Codex B. omits ch. xvi. 9-20 altogether, and several of the *Codices Minusculi* mark this section with asterisks as doubtful. Several ancient Fathers and authors of *Scholia* state that it was wanting in some manuscripts. We cannot, however, suppose that it was arbitrarily added by a copyist, since at present all codices, except B., and all ancient versions contain it, and the Fathers in general quote it. We may also say that Mark could not have concluded his Gospel with ver. 8, unless he had been accidentally prevented from finishing it. Hence Michaelis and Hug have inferred that the addition was made by the evangelist at a later period, in a similar manner as John made an addition in ch. xxi. of his gospel. Perhaps also an intimate friend, or an amanuensis, supplied the defect. If either of these two hypotheses is well founded, it may be understood why several codices were formerly without this conclusion, and why, nevertheless, it was found in most of them.

MARRIAGE.—THE LEVIRATE LAW.—The divine origin of marriage, and the primitive state of the institution, are clearly recorded in the instance of the first human pair (Gen. ii. 18-25), whence it appears that woman was made after man to be 'a helper suited to him.' The narra-

tive is calculated to convey exalted ideas of the institution. It is introduced by a declaration of the Lord God, that 'it is not good that the man should be alone' (ver. 18); of the truth of which Adam had become convinced by experience. In order still further to enliven his sense of his deficiency, the various species of creatures are made to pass in review before him, 'to see what he would call them; on which occasion he could behold each species accompanied by its appropriate helper, and upon concluding his task would become still more affectingly aware, that amid all animated nature there was not found an help meet for himself.' It was at this juncture, when his heart was thus thoroughly prepared to appreciate the intended blessing, that a divine slumber, or trance, fell upon him—a state in which, as in after ages, the exercise of the external senses being suspended, the mental powers are peculiarly prepared to receive revelations from God (Gen. xv. 12; Acts x. 10; xxvii. 17; 2 Cor. xii. 2). His exclamation when Eve was brought to him shows that he had been fully conscious of the circumstances of her creation, and had been instructed by them as to the nature of the relation which would thenceforth subsist between them. 'The man said, *this time*, it is bone of my bone, and flesh of my flesh; *this* shall be called woman, for out of man was this taken.' The remaining words, 'for this cause shall a man leave his father and mother, and shall cleave unto his wife, and they (two) shall be one flesh,' which might otherwise seem a prophetic announcement by the historian of the social obligations of marriage, are by our Lord ascribed to the Divine agent concerned in the transaction, either uttered by him personally, or by the mouth of Adam while in a state of inspiration. 'Have ye not read that he that made them at the beginning, made them male and female, *and said*, for this cause,' &c. (Matt. xix. 4, 5). It is a highly important circumstance in this transaction, that God created only *one* female for *one* man, and united them—a circumstance which is the very basis of our Lord's reasoning in the passage against divorce and remarriage; but which basis is lost, and his reasoning consequently rendered inconclusive, by the inattention of our translators to the absence of the article, 'he made them a male and a female, and said, they shall become one flesh; so that they are no more two, but one flesh. What, therefore, God hath joined together, let no man put asunder.' The weight of our Lord's argument, says Campbell, 'lay in this circumstance, that God at first created no more than a single pair, one of each sex, whom he united in the bond of marriage, and, in so doing, exhibited a standard of that union to all generations.' The apostacy introduced a new feature into the institution, namely, the subjection of the wife's will to that of her husband (Gen. iii. 16; comp. Num. xxx. 6-16). The primitive model was adhered to even by Cain, who seems to have had but one wife (Gen. iv. 17). Polygamy, one of the earliest developments of human degeneracy, was introduced by Lamech, who 'took unto him two wives' (Gen. iv. 19; circa 3874 B.C.). The intermarriage of 'the Sons of God,' i. e. the worshippers of the true God, with 'the daughters of men,' i. e. the irreligious (B.C. 2468), is the next incident in the history of marriage. They indulged in unrestrained polygamy

'they took them wives of all that they chose.' From this event may be dated that headlong degeneracy of mankind at this period, which ultimately brought on them extirpation by a deluge (Gen. vi. 3-7). At the time of that catastrophe Noah had but one wife (Gen. vii. 7), and so each of his sons (ver. 13). Pursuing the investigation of the subject according to chronological arrangement, Job next appears (n.c. 2130) as the husband of one wife (Job ii. 9; xix. 17). Reference is made to the adulterer, who is represented as in terror and accursed (xxiv. 15-18). The wicked man is represented as leaving 'widows' behind him; whence his polygamy may be inferred (xxvii. 15). Job expresses his abhorrence of fornication (xxxi. 1), and of adultery (ver. 9), which appears in his time to have been punished by the judges (ver. 11). Following the same arrangement, we find Abraham and Nahor introduced as having each one wife (Gen. xi. 29). From the narrative of Abraham's first equivocation concerning Sarah, it may be gathered that marriage was held sacred in Egypt. Abraham fears that the Egyptians would sooner rid themselves of him by murder than infringe by adultery the relation of his wife to an obscure stranger. The reproof of Pharaoh, 'Why didst thou say, She is my sister? so I might have taken her to me to wife: now therefore behold thy wife, take her, and go thy way' (Gen. xii. 11-19), affords a most honourable testimony to the views of marriage entertained by Pharaoh at that period, and most likely by his court and nation. It seems that Sarah was Abraham's half-sister. Such marriages were permitted till the giving of the law (Lev. xviii. 9). Thus Amram, the father of Moses and Aaron, married his father's sister (Exod. vi. 20), a union forbidden in Lev. xviii. 12.

The first mention of concubinage, or the condition of a legal though subordinate wife, occurs in the case of Hagar, Sarah's Egyptian handmaid, whom Sarah, still childless, after a residence of ten years in Canaan, prevailed on Abraham, apparently against his will, to receive into that relation (Gen. xvi. 1), which was however considered inviolable (Gen. xlix. 4; Lev. xviii. 8; 2 Sam. iii. 8, 16; 21, 22; 1 Chron. v. 1). The vehement desire for offspring, common to women in the East, as appears from the histories of Rebecca (Gen. xxv. 21), of Rachel (xxx. 1), of Leah (ver. 5), and of Hannah (1 Sam. i. 6, 7), seems to have been Sarah's motive for adopting a procedure practised in such cases in that region in all ages. The miseries naturally consequent upon it are amply portrayed in the history of the Patriarchs (Gen. xvi. 4-10; xxx. 1, 3, 15).

Lot does not appear to have exceeded one wife (Gen. xix. 15). The second equivocation of the same kind by Abraham respecting Sarah elicits equally honourable sentiments concerning marriage, on the part of Abimelech, king of Gerar (Gen. xx. 5, 6, 9, 10, &c.), who, it appears, had but one proper wife (ver. 17; see also ch. xxvi. 7-11). Perhaps Abraham relied on the ancient custom, which will shortly be adverted to, of the consent of the 'brother' being requisite to the sister's marriage, and thus hoped to secure his wife's safety and his own. In ancient times the parents chose wives for their children (Gen. xxi. 21; xxxviii. 5; Deut. xxii. 16); or the man who wished a particular female asked his father to

obtain her from her father, as in the case of Shechem (n.c. 1732; Gen. xxxiv. 4-6; comp. Judges xiv. 2, 3). The consent of her brothers seems to have been necessary (ver. 5, 8, 11, 13, 14; comp. Gen. xxiv. 50; 2 Sam. xiii. 20-29). A dowry was given by the suitor to the father and brethren of the female (ver. 11, 12; comp. 1 Sam. xviii. 25; Hos. iii. 2). This, in a common case, amounted to from 30 to 50 shekels, according to the law of Moses (comp. Exod. xxii. 16; Deut. xxii. 29). Pausanias considers it so remarkable for a man to part with his daughter without receiving a marriage-portion with her, that he takes pains, in a case he mentions, to explain the reason. In later times we meet with an exception (Tobit viii. 23). It is most likely that from some time before the last-named period the Abrahamides restricted their marriages to circumcised persons (Gen. xxviii. 8; comp. Judg. iii. 6; 1 Kings xi. 8, 11, 16; Joseph. *Antiq.* xi. 8, 2; xii. 4, 6; xviii. 9, 5). The marriage of Isaac develops additional particulars; for beside Abraham's unwillingness that his son should marry a Canaanitess (Gen. xxiv. 3; comp. xxvi. 34; xxvii. 46; Exod. xxxiv. 16; Josh. xxiii. 12; Ezra ix. 2; x. 3, 10, 11), costly jewels are given to the bride at the betrothal (ver. 22), and 'precious things to her mother and brother' (ver. 53); a customary period between espousals and nuptials is referred to (ver. 55); and the blessing of an abundant offspring invoked upon the bride by her relatives (ver. 60)—which most likely was the only marriage ceremony then and for ages afterwards (comp. Ruth iv. 11-13; Ps. xlv. 16, 17); but in Tobit vii. 3, the father places his daughter's right hand in the hand of Tobias before he invokes his blessing. It is remarkable that no representation has been found of a marriage ceremony among the tombs of Egypt. The Rabbins say that among the Jews it consisted of a kiss (Cant. i. 2). It is probable that the marriage covenant was committed to writing (Prov. ii. 17; Mal. ii. 14; Tobit vii. 13, 14); perhaps, also, confirmed with an oath (Ezra xvi. 8). It seems to have been the custom with the patriarchs and ancient Jews to bury their wives in their own graves, but not their concubines (Gen. xlix. 31). In Gen. xxv. 1, Abraham, after the death of Sarah, marries a second wife. Esau's polygamy is mentioned Gen. xxviii. 9; xxxvi. 2-13 (n.c. 1740). Jacob serves seven years to obtain Rachel in marriage (Gen. xxix. 18-20); and has a marriage feast, to which the men of the place are invited (ver. 22; comp. Cant. v. 1; viii. 33). Samson's marriage feast lasts a week (Judg. xiv. 10-12; n.c. 1156; comp. John ii. 1, &c.); in later times it lasted longer (Tobit viii. 19). The persons invited to Samson's marriage are young men (Judg. xiv. 10); called 'sons of the bride-chamber,' Matt. ix. 15. Females were invited to marriages (Ps. xlv. 14), and attended the bride and bridegroom to their abode (1 Macc. ix. 37); and in the time of Christ, if it was evening, with lamps and flambeaux (Matt. xxv. 1-10). In later ages the guests were summoned when the banquet was ready (Matt. xxii. 3), and furnished with a marriage garment (ver. 11). The father of the bride conducted her at night to her husband (Gen. xxix. 23; Tobit viii. 1). The bride and bridegroom were richly ornamented (Isa. lxi. 10). In Mesopotamia, and the East generally, it

was the custom to marry the eldest sister first (Gen. xxix. 26). By the deception practised upon Jacob in that country, he marries two wives, and, apparently, without any one objecting (ver. 31). Laban obtains a promise from Jacob not to marry any more wives than Rachel and Leah (Gen. xxxi. 50). The wives and concubines of Jacob and their children travel together (Gen. xxxii. 22, 23); but a distinction is made between them in the hour of danger (Gen. xxxiii. 1, 2; comp. Gen. xxv. 6). Following the arrangement we have adopted, we now meet with the first reference to the *Levirite Law*. Judah, Jacob's son by Leah, had married a Canaanitish woman (Gen. xxxviii. 2). His first-born son was Er (ver. 3). Judah took a wife for him (ver. 6). Er soon after died (ver. 7), and Judah said to Onan, 'Go in unto thy brother's wife, Tamar, and marry her, and raise up seed to thy brother.' Onan knew that the offspring would not be his. All these circumstances bespeak a pre-established and well known law, and he evaded the purpose of it, and thereby, it is said, incurred the wrath of God (ver. 10). It seems, from the same account, to have been well understood, that upon his death the duty devolved upon the next surviving brother. No change is recorded in this law till just before the entrance of Israel into Canaan (n.c. 1451), at which time Moses modified it by new regulations to this effect:—If brethren dwell together (i. e. in the same locality), and one of them die, and leave no child, the wife of the dead must not marry out of the family, but her husband's brother or his next kinsman must take her to wife, and perform the duty of a husband's brother, and the first-born of this union shall succeed in the name of his deceased father, that his name may be extant in Israel; not literally bear his name, for Ruth allowed her son by Boaz to be called Obed, and not Mahlon, the name of her first husband (Ruth iv. 17, yet see Josephus, *Antiq.* iv. 8, 23). In case the man declined the office, the woman was to bring him before the elders, loose his shoe from off his foot, and spit in, or, as some render it, before his face, by way of contempt (Deut. xxv. 9, 10; Josephus understands in the face, *Antiq.* v. 9. 4), and shall say, 'So shall it be done unto the man that will not build up his brother's house; and his name shall be called in Israel, the house of him that hath his shoe loosed,' *quasi* Baresole! It does not appear that the original law was binding on the brother, if already married; and we may well believe that Moses, who wished to mitigate it, allowed of that exception. The instance of Ruth (n.c. 1245), who married Boaz, her husband's relation, exhibits the practice of the law under the Judges. Boaz was neither the father of, nor the nearest relation to, Elimelech, father-in-law to Ruth, the wife of Mahlon, and yet he married her after the refusal of him who was the nearest relation (Ruth ii. 20; iii., iv.).

It should seem, from the instance of Potiphar's wife, that monogamy was practised in Egypt (Gen. xxxix. 7). Pharaoh gave to Joseph one wife (Gen. xli. 45). The Israelites, while in Egypt, seem to have restricted themselves to one. One case is recorded of an Israelite who had married an Egyptian woman (Lev. xxiv. 10). The giving of the law (n.c. 1491) acquaints us

with many regulations concerning marriage, which were different from the practices of the Jews while in Egypt, and from those of the Canaanites, to whose land they were approaching (Lev. xviii. 3). There we find laws for regulating the marriages of bondmen (Exod. xxi. 3, 4), and of a bondmaid (ver. 7-12). The prohibition against marriages with the Canaanites is established by a positive law (Exod. xxiv. 16). Marriage is prohibited with any one near of kin, 'of the remainder of his flesh' (Lev. xviii. 6-19). A priest is prohibited from marrying one that had been a harlot, or divorced (Lev. xxi. 7.) The high-priest was also excluded from marrying a widow, and restricted to one wife (ver. 13, 14). Daughters who, through want of brothers, were heiresses to an estate, were required to marry into their own tribe, and, if possible, a kinsman, to prevent the estate passing into another family (Num. xxvii. 1-11; xxxvi. 1-12). The husband had power to annul his wife's vow, if he heard it, and interfered at the time (Num. xxx. 6-16). If a man had betrothed a wife, he was exempt from the wars, &c. (Deut. xx. 7; xxiv. 5). It was allowed to marry a beautiful captive in war, whose husband probably had been killed (Deut. xxi. 10-14, &c.). Abundance of offspring was one of the blessings promised to obedience, during the miraculous providence which superintended the Theocracy (Lev. xxvi. 9; Deut. vii. 13, 14; xxviii. 11; Ps. cxxxvii. 3; cxxxviii. 3); and disappointment in marriage was one of the curses (Deut. xxviii. 18, 30; comp. Ps. xlvii. 9; Jer. viii. 10). A daughter of a distinguished person was offered in marriage as a reward for perilous services (Josh. xv. 16, 17; 1 Sam. xvii. 25). Concubinage appears in Israel (n.c. 1413), (Judg. xix. 1-4). The violation of a concubine is avenged (Judg. xx. 5-10). Polygamy (Judg. viii. 30). The state of marriage among the Philistines may be inferred, in the time of Samson, from the sudden divorce from him of his wife by her father, and her being given to his friend (Judg. xiv. 20), and from the father offering him a younger sister instead (Judg. xv. 2). David's numerous wives (2 Sam. iii. 3-5). In Ps. xlv., which is referred to this period by the best harmonists, there is a description of a royal marriage upon a most magnificent scale. The marriage of Solomon to Pharaoh's daughter is recorded in 1 Kings iii. 1; to which the Song of Solomon probably relates, and from which it appears that his mother 'crowned him with a crown on the day of his espousals' (ver. 3, 11). It would appear that in his time females were married young (Prov. ii. 17; comp. Joel i. 8); also males (Prov. v. 18). An admirable description of a good wife is given in Prov. xxxi. 10-31. The excessive multiplication of wives and concubines was the cause and effect of Solomon's apostasy in his old age (1 Kings xi. 1-8). He confesses his error in Ecclesiastes, where he eulogizes monogamy (viii. 9; vii. 29). Rehoboam took a plurality of wives (2 Chron. xi. 18-21); and so Abijah (2 Chron. xiii. 21), and Ahab (1 Kings xx. 3), and Balshazzar, king of Babylon (Dan. v. 2). It would seem that the outward manners of the Jews, about the time of our Lord's advent, had become improved, since there is no case recorded in the New Testament of polygamy or concubinage among them. Our Lord

excludes all causes of divorce, except whoredom (Matt. v. 32), and ascribes the origin of the Mosaic law to the hardness of their hearts. The same doctrine concerning divorce had been taught by the prophets (Jer. iii. 1; Micah ii. 9; Mal. ii. 14-16). The apostles inculcate it likewise (Rom. vii. 3; 1 Cor. vii. 4, 10, 11, 39); yet St. Paul considers obstinate desertion by an unbelieving party as a release (1 Cor. vii. 15). Our Lord does not reprehend celibacy for the sake of religion, 'those who make themselves eunuchs for the kingdom of heaven's sake' (Matt. xix. 12; comp. 1 Cor. vii. 32, 36). Second marriages not condemned in case of death (Rom. vii. 12). Mixed marriages disapproved (1 Cor. vii. 39; 2 Cor. vi. 14). Early marriage not recommended (1 Cor. vii. 36). Marriage affords the means of copious illustrations to the writers of Scripture. The prophets employ it to represent the relation of the Jewish church to Jehovah, and the apostles that of the Christian church to Christ. The applications they make of the idea constitute some of the boldest and most touching figures in the Scripture.

MARS HILL. [AREOPAGUS.]

MARTHA, sister of Lazarus and Mary, who resided in the same house with them at Bethany [LAZARUS]. From the house at Bethany being called 'her house,' in Luke x. 38, and from the leading part which Martha is always seen to take in domestic matters, it has seemed to some that she was a widow, to whom the house at Bethany belonged, and with whom her brother and sister lodged; but this is uncertain, and the common opinion, that the sisters managed the household of their brother, is more probable. Luke probably calls it her house because he had no occasion to mention, and does not mention, Lazarus; and when we speak of a house which is occupied by different persons, we avoid circumlocution by calling it the house of the individual who happens to be the subject of our discourse. Jesus was intimate with this family, and their house was often his home when at Jerusalem, being accustomed to retire thither in the evening, after having spent the day in the city. The point which the Evangelists bring out most distinctly with respect to Martha, lies in the contrariety of disposition between her and her sister Mary. The first notice of Christ's visiting this family occurs in Luke x. 38-42. He was received with great attention by the sisters; and Martha soon hastened to provide suitable entertainment for the Lord and his followers, while Mary remained in his presence, sitting at his feet, and drinking in the sacred words that fell from his lips. The active, bustling solicitude of Martha, anxious that the best things in the house should be made subservient to the Master's use and solace, and the quiet earnestness of Mary, more desirous to profit by the golden opportunity of hearing his instructions, than to minister to his personal wants, strongly mark the points of contrast in the characters of the two sisters.

The part taken by the sisters in the transactions connected with the death and resurrection of Lazarus, is entirely and beautifully in accordance with their previous history. Martha is still more engrossed with outward things, while Mary surrenders herself more to her feelings, and to inward meditation. When they heard

that Jesus was approaching, Martha hastened beyond the village to meet him, 'but Mary sat still in the house' (John xi. 20, 22). When she saw Jesus actually appear, whose presence had been so anxiously desired, she exhibits a strong degree of faith, and hesitates not to express a confident hope that he, to whom all things were possible, would even yet afford relief. But, as is usual with persons of her lively character, when Christ answered, with what seemed to her the vague intimation, 'Thy brother shall rise again,' she was instantly cast down from her height of confidence, the reply being less direct than she expected: she referred this saying to the general resurrection at the last day, and thereon relapsed into despondency and grief. This feeling Jesus reproved, by directing her attention, before all other things, to that inward, eternal, and divine life, which consists in union with him, and which is raised far above the power even of the grave. This he did in the magnificent words, 'I am the resurrection, and the life: he that believeth in me, though he were dead, yet shall he live: and whosoever liveth and believeth in me shall never die. Believeth thou this?' Sorrow and shame permitted the troubled Martha, in whose heart the feeling of an unconditional and entire surrender to his will was re-awakened, to make only the general confession that he was actually the promised Messiah; in which confession she, however, comprised an acknowledgment of his power and greatness. It is clear, however, that she found nothing in this discourse with Christ, to encourage her first expectation of relief; and with the usual rapid change in persons of lively susceptibilities, she had now as completely abandoned all hope of rescue for her brother, as she had before been sanguine of his restoration to life. Thus, when Jesus directed the stone to be rolled away from the sepulchre, she gathered from this no ground of hope; but rather objected to its being done, because the body, which had been four days in the tomb, must already have become disagreeable. The reproof of Christ, 'Said I not unto thee, that, if thou wouldest believe, thou shouldst see the glory of God?' suggests that more discourse had passed between them than the evangelist has recorded, seeing that no such assurance is contained in the previous narrative (John xi. 39, 40).

Nothing more is recorded of Martha, save that some time after, at a supper given to Christ and his disciples at Bethany, she, as usual, busied herself in the external service. Lazarus, so marvellously restored from the grave, sat with her guests at table. 'Martha served,' and Mary occupied her favourite station at the feet of Jesus, which she bathed with her tears, and anointed with costly ointment (John xii. 1, 2) [LAZARUS; MARY].

There are few characters in the New Testament, and certainly no female character, so strongly brought out in its natural points as that of Martha; and it is interesting to observe that Luke and John, although relating different transactions in which she was concerned, perfectly agree in the traits of character which they assign to her.

MARTYR. This word means properly a witness, and is applied in the New Testament—

1. To judicial witnesses (Matt. xviii. 16; xxvii. 65; Mark xiv. 63; Acts vi. 13; vii. 58; 2 Cor. xiii. 1; 1 Tim. v. 19; Heb. x. 28). 2. To one who has testified, or can testify to the truth of what he has seen, heard, or known. This is a frequent sense in the New Testament: as in Luke xxiv. 48; Acts i. 8, 22; Rom. i. 9; 2 Cor. i. 23; 1 Thes. ii. 5, 10; 1 Tim. vi. 12; 2 Tim. ii. 2; 1 Pet. v. 1; Rev. i. 5; iii. 14; xi. 3, and elsewhere. 3. The meaning of the word which has now become the most usual, is that in which it occurs most rarely in the Scripture, i. e., one who by his death bears witness to the truth. In this sense we only find it in Acts xxii. 20; Rev. ii. 13; xvii. 6. This now exclusive sense of the word was brought into general use by the early ecclesiastical writers, who applied it to every one who suffered death in the Christian cause. Stephen was in this sense the first martyr (STEPHEN); and the spiritual honours of his death tended in no small degree to raise to the most extravagant estimation, in the early church, the value of the testimony of blood. Eventually a martyr's death was supposed, on the alleged authority of the under-named texts, to cancel all the sins of the past life (Luke xii. 50; Mark x. 39); to supply the place of baptism (Matt. x. 39); and at once to secure admittance to the presence of the Lord in Paradise (Matt. v. 10-12). In imitation of the family custom of annually commemorating at the grave the death of deceased members, the churches celebrated the deaths of their martyrs by prayer at their graves, and by love-feasts. From this high estimation of the martyrs, Christians were sometimes led to deliver themselves up voluntarily to the public authorities—thus justifying the charge of fanaticism brought against them by the heathen. For the most part, however, this practice was discontinued, the words of Christ himself being brought against it (Matt. x. 23; see Gieseler, *Eccles. Hist.* i. 109, 110).

1. MARY (*Miriam*), 'the Mother of Jesus' (Acts i. 14), and 'Mary his Mother' (Matt. ii. 11), are the appellations of one who has in later times been generally called the 'Virgin Mary,' but who is never so designated in Scripture.

Little is known of this 'highly favoured' individual, in whom was fulfilled the first prophecy made to man, that 'the seed of the woman should bruise the serpent's head' (Gen. iii. 15). As her history was of no consequence to Christianity, it is not given at large. Her genealogy is recorded by St. Luke (ch. iii.), in order to prove the truth of the predictions which had foretold the descent of the Messiah from Adam through Abraham and David, with the design evidently of showing that Christ was of that royal house and lineage.

Eusebius, the early ecclesiastical historian, although unusually lengthy upon 'the name Jesus,' and the genealogies in Matthew and Luke's Gospels, throws no new light upon Mary's birth and parentage. The legends respecting Anne, who is said to have been her mother, are pure fables without the slightest evidence.

The earliest event in her history, of which we have any notice, was the annunciation to her by the angel Gabriel, that she was destined, whilst yet a pure virgin, to become the mother of the Messiah—an event which was a literal fulfilment of the prophecy given centuries before by Isaiah,

that 'a virgin should conceive, and bear a son, and should call his name Immanuel,' which being interpreted, is 'God with us' (Isa. vii. 14; Matt. i. 23). On this occasion she was explicitly informed that she should conceive by the miraculous power of God, and that her child should be 'Holy,' and be called 'the Son of God.' As a confirmation of her faith in this announcement she was also told by the angel that her cousin Elizabeth, who was the wife of one of the chief priests, and who was now far advanced in years, had conceived a son, and that the time was not far off when her reproach among women should cease (Luke i. 36).

Almost immediately on receiving this announcement Mary hastened from Nazareth, where she was when the angel visited her, to the house of her cousin, who was then residing in the hilly district in 'a city of Judah,' supposed to be Hebron. The meeting of these two pious females, on whom such unexpected privileges had been conferred, was one of mutual congratulations, and united thanksgiving to the author of their blessings. It was on this occasion that Mary uttered the *Magnificat*—that splendid burst of grateful adoration which Christians of all parties have from the earliest times delighted to adopt as expressive of the best feelings of the pious heart towards God (Luke i. 39-56). After spending three months with her relative, Mary returned to Nazareth, where a severe trial awaited her, arising out of the condition in which it had now become apparent she was. Betrothed (perhaps in early life) to a person of the name of Joseph, an artificer of some sort (Matt. xiii. 55, probably, as our translators suppose, a carpenter), the Jewish law held her exposed to the same penalties which awaited the married wife who should be found unfaithful to the spousal vow. Joseph, however, being a right-hearted man (one who feels and acts as a man ought to do in the circumstances in which he is placed), was unwilling to subject her to the evils of a public exposure of what he deemed her infidelity; and accordingly was turning in his mind how he might privately dissolve his connection with her, when an angel was sent to him also to inform him in a dream of the true state of the case, and enjoin upon him to complete his engagement with her by taking her as his wife. This injunction he obeyed, and hence came to be regarded by the Jews as the father of Jesus (Matt. i. 18-25).

Summoned by an edict of Augustus, which commanded that a census of the population of the whole Roman empire should be taken, and that each person should be enrolled in the chief city of his family or tribe, Mary and her husband went up to Bethlehem, the city of the Davidic family; and whilst there the child Jesus was born. After this event the only circumstances in her history mentioned by the sacred historians are her appearance and offerings in the temple according to the law of Moses (Luke i. 22, ff.); her return with her husband to Nazareth (Luke ii. 39); their habit of annually visiting Jerusalem at the Feast of the Passover (ver. 41); the appearance of the Magi, which seems to have occurred at one of these periodic visits (Matt. ii. 1-12); the flight of the holy family into Egypt, and their return, after the death of Herod, to

Nazareth (ver. 13-23); the scene which occurred on another of those periodic visits when, after having proceeded two days' journey on her way homeward, she discovered that her son was not in the company, and, on returning to Jerusalem, found him sitting in the temple with the doctors of the law, 'both hearing them and asking them questions' (Luke ii. 42-52); her appearance and conduct at the marriage-feast in Cana of Galilee (John ii. 1, ff.); her attempt in the synagogue at Capernaum to induce Jesus to desist from teaching (Matt. xii. 46, ff.); her accompanying of her son when he went up to Jerusalem immediately before his crucifixion; her following him to Calvary; her being consigned by him while hanging on the cross to the care of his beloved apostle John, who from that time took her to reside in his house (John xix. 25, ff.); and her associating with the disciples at Jerusalem after his ascension (Acts i. 14).

The traditions respecting the death of Mary differ materially from each other. There is a letter of the General Council of Ephesus in the fifth century, which states that she lived at Ephesus with St. John, and there died and was buried. Another epistle of the same age says she died at Jerusalem, and was buried in Gethsemane. The legend tells that three days after her interment, when the grave was opened (that Thomas the Apostle might pay reverence to her remains), her body was not to be found, 'but only an exceeding fragrance,' whereupon it was concluded that it had been taken up to heaven. The translations of Enoch and Elijah, and the ascension of the Lord Jesus Christ, took place while they were *alive*, and the facts are recorded by the inspiration of God; but when the *dead* body of Mary was conveyed through the earth, and removed thence, there were *no witnesses*, and no revelation was ever made of the extraordinary and novel incident, which certainly has no parallel in Scripture. This miraculous event is appropriately called 'the Assumption.'

It is said that Mary died in A.D. 63. The Canon of Scripture was closed in A.D. 96, thirty-three years after her decease; which, however, is never alluded to by any of the Apostles in their writings, nor by St. John, to whose care she was entrusted.

In the Romish Church many facts are believed and doctrines asserted concerning the Virgin Mary, such as her immaculate conception—her perpetual virginity—her right to receive worship, and her mediation and intercession, which not only are without any authority from Scripture, but many of which are diametrically opposed to its declarations.

It does not appear that Mary ever saw Christ after the resurrection; for she was not one of the chosen witnesses specified in Scripture, as Mary Magdalene was.

2. MARY MAGDALENE was probably so called from Magdala in Galilee, the town where she may have dwelt. According to the Talmudists, Magdalene signifies 'a plaiter of hair.'

Much wrong has been done to this individual from imagining that she was the person spoken of by St. Luke in ch. vii. 39; but there is no evidence to support this opinion. How Mary Magdalene came to be identified with the person here mentioned, it is difficult to say; but such is the

case: and accordingly she is generally regarded as having been a woman of depraved character. For such an inference, however, there appears to be no just ground whatever.

The earliest notice of Mary Magdalene is in St. Luke's Gospel (viii. 2), where it is recorded that out of her 'had gone seven devils,' and that she was 'with Joanna, the wife of Herod's steward, and Susanna, and many others, which ministered unto Christ of their substance.'

This is sufficient to prove that she had not been known as a person of bad character; and it also implies that she was not poor, or amongst the lower classes, when she was the companion of one whose husband held an important office in the king's household.

It is as unjust to say that she who had been so physically wretched as to be possessed by seven devils, was dissolute, as to affirm that an insane person is necessarily depraved.

In the Saviour's last hours, and at his death and resurrection, Mary Magdalene was a chief and important witness. She was one of the women who stood by the cross (Matt. xxvi. 55-56); who after his death beheld where the body was laid (Mark xv. 47), and who prepared spices and ointments to embalm it. She visited the sepulchre early on the first day of the week, while it was yet dark (John xx. 1); and when Peter and John returned to their own homes she remained at the sepulchre weeping, and had her patient waiting rewarded by the appearance of her risen Lord.

3. MARY, wife of Cleophas or Alphaeus, and sister of the Lord's mother (Mat. xxvii. 56; Mark xv. 40; John xix. 25). This Mary was one of those holy women who followed Christ, and was present at the crucifixion; and she is that 'other Mary' who, with Mary Magdalene, attended the body of Christ to the sepulchre when taken down from the cross (Matt. xxvii. 61; Mark xv. 47; Luke xxiii. 55). She was also among those who went on the morning of the first day of the week to the sepulchre to anoint the body, and who became the first witnesses of the resurrection (Matt. xxviii. 1; Mark xvi. 1; Luke xxiv. 1). James, Jesus, Jude, and Simon, who are called the Lord's brethren [see the names; also ALPHEUS; BROTHER], are very generally supposed to have been the sons of this Mary, and therefore *consins* of Jesus, the term brother having been used with great latitude among the Hebrews.

4. MARY, sister of Lazarus and Martha. The friendship of our Lord for this family has been explained in other articles [LAZARUS; MARTHA].

The points of interest in connection with Mary individually arise from the contrast of character between her and her sister Martha, and from the incidents by which that contrast was evinced. Apart from this view, the most signal incident in the history of Mary is her conduct at the supper which was given to Jesus in Bethany, when he came thither after having raised Lazarus from the dead. The intense love which distinguished her character then glowed with the highest fervour, manifesting the depth of her emotion and gratitude for the deliverance from the cold terrors of the grave of that brother who now sat alive and cheerful with the guests at table. She took

the station she best loved, at the feet of Jesus. Among the ancients it was usual to wash the feet of guests before an entertainment, and with this the anointing of the feet was frequently connected [ANONING]. Mary possessed a large quantity of very costly ointment; and in order to testify her gratitude she sacrificed it all by anointing with it the feet of Jesus. We are told that the disciples murmured at the extravagance of this act, deeming that it would have been much wiser, if she had sold the ointment and given the money to the poor. But Jesus, looking beyond the mere external act to the disposition which gave birth to it—a disposition which marked the intensity of her gratitude—vindicated her deed. Always meditating upon his departure, and more especially at that moment, when it was so near at hand, he attributed to this act a still higher sense—as having reference to his approaching death. The dead were embalmed; and so, he said, have I received, by anticipation, the consecration of death (John xii. 1-8; Matt. xxvi. 6-13; Mark xiv. 3-9).

MASCHIL, a title of some of the Psalms [PSALMS].

MAS'SA, an encampment of the Israelites [WANDERING].

MATTHEW. According to Mark ii. 14, Matthew was a son of Alphaeus. It is generally supposed that Jacobus, or James, the son of Alphaeus, was a son of Mary, the wife of Cleophas, who was a sister of the mother of Jesus (John xix. 25). If this opinion is correct, Matthew was one of the relations of Jesus. Matthew was a *portitor*, or inferior collector of customs at Capernaum, on the Sea of Galilee. He was not a *publicanus*, or general farmer of customs. We may suppose either that he held his appointment at the port of Capernaum, or that he collected the customs on the high road to Damascus, which went through what is now called Khan Minyeh, which place, as Robinson has shown, is the ancient Capernaum. Thus we see that Matthew belonged to the lower class of people.

In Mark ii. 14, and Luke v. 27, he is called Levi. We hence conclude that he had two names. This circumstance is not mentioned in the list of the apostles (Matt. x. and Luke vi.); but the omission does not prove the contrary, as we may infer from the fact that Lebbeus is also called Judas in Luke vi. 16, in which verse the name Lebbeus is omitted. In Matt. ix. 9 is related how Matthew was called to be an apostle. We must, however, suppose that he was previously acquainted with Jesus, since we read in Luke vi. 13, that when Jesus, before delivering the Sermon on the Mount, selected twelve disciples, who were to form the circle of his more intimate associates, Matthew was one of them. After this Matthew returned to his usual occupation; from which Jesus, on leaving Capernaum, called him away. On this occasion Matthew gave a parting entertainment to his friends. After this event he is mentioned only in Acts i. 13.

According to a statement in Clemens Alexandrinus, Matthew abstained from animal food. Hence some writers have rather hastily concluded that he belonged to the sect of the Essenes. It is true that the Essenes practised abstinence in a high degree; but it is not true that they rejected animal food altogether. Admitting the

account in Clemens Alexandrinus to be correct, it proves only a certain ascetic strictness, of which there occur vestiges in the habits of other Jews.

According to another account, which is as old as the first century, Matthew, after the death of Jesus, remained about fifteen years in Jerusalem. This agrees with the statement in Eusebius (*Hist. Eccles.* iii. 24), that Matthew preached to his own nation before he went to foreign countries. Rufinus (*Hist. Eccles.* x. 9) and Socrates (*Hist. Eccles.* i. 19) state that he afterwards went into Ethiopia; and other authors mention other countries. There also he probably preached specially to the Jews. According to Hieron (about A.D. 150) and Clemens Alex. (*Strom.* iv. 9), Matthew was one of those apostles who did not suffer martyrdom.

THE GOSPEL OF ST. MATTHEW.—The genuineness of this Gospel has been more strongly attacked than that of any of the three others, as well by EXTERNAL as by INTERNAL arguments. With regard to the former, external testimonies are clearly in favour of the genuineness of this Gospel. Its authenticity, indeed, is as well supported as that of any work of classical antiquity. It can also be proved that it was early in use among Christians, and that the Apostolical Fathers at the end of the first century ascribed to it a canonical authority.

A good deal of discussion respecting the question—whether or not there was a Hebrew Gospel of St. Matthew, has arisen out of a statement made by Papias, that ‘Matthew wrote the sayings in the Hebrew tongue.’ Tholuck, who inclines to the opinion that the original Gospel of St. Matthew was written in Hebrew, thinks it by no means improbable that, after several inaccurate and imperfect translations of this original came into circulation, Matthew himself was prompted by this circumstance to publish a Greek translation, or to have his Gospel translated under his own supervision.

With regard to the internal arguments which have been brought against the authenticity of this Gospel, it has been objected, 1st, that the representations of Matthew have not that vivid clearness which characterizes the narration of an eyewitness, and which we find, for instance, in the Gospel of John. Even Mark and Luke surpass Matthew in this respect. Compare, for example, Matt. iv. 18 with Luke v. 1, sq.; Matt. viii. 5, sq. with Luke vii. 1, sq. This is most striking in the history of his own call, where we should expect a clearer representation.

2nd. He omits some facts which every apostle certainly knew. For instance, he mentions only one journey of Christ to the passover at Jerusalem, namely, the last; and seems to be acquainted only with one sphere of Christ's activity, namely, Galilee.

3rd. He relates unchronologically, and transposes events to times in which they did not happen; for instance, the event mentioned in Luke iv. 14-30 must have happened at the commencement of Christ's public career, but Matthew relates it as late as ch. xiii. 53, sq.

4th. He embodies in one discourse several sayings of Christ which, according to Luke, were pronounced at different times (comp. Matt. v. vii. and xxiii.).

To these objections we may reply as follows:—
1st. The gift of narrating luminously is a personal qualification of which even an apostle might be destitute, and which is rarely found among the lower orders of people: this argument therefore has recently been given up altogether. In the history of his call to be an apostle, Matthew has this advantage over Mark and Luke, that he relates the discourse of Christ (ix. 13) with greater completeness than these evangelists. Luke relates that Matthew prepared a great banquet in his house, while Matthew simply mentions that an entertainment took place, because the apostle could not well write that he himself prepared a great banquet.

2nd. An *argumentum a silentio* must not be urged against the evangelists. The raising of Lazarus is narrated only by John; and the raising of the youth at Nain only by Luke; the appearance to five hundred brethren after the resurrection, which, according to the testimony of Paul (1 Cor. xv. 6), was a fact generally known, is not recorded by any of the evangelists. The apparent restriction of Christ's sphere of activity to Galilee we find also in Mark and Luke. This peculiarity arose perhaps from the circumstance that the apostles first taught in Jerusalem, where it was unnecessary to relate what had happened there, but where the events which had taken place in Galilee were unknown, and required to be narrated: thus the sphere of narration may have gradually become fixed.

3rd. There is no reason to suppose that the Evangelists intended to write a chronological biography. On the contrary, we learn from Luke i. 4, and John xx. 31, that their object was of a more practical and apologetical tendency. With the exception of John, the Evangelists have grouped their communications more according to the subjects than according to chronological succession. This fact is now generally admitted. The principal groups of facts recorded by St. Matthew are:—1. The preparation of Jesus, narrated in ch. i.-iv. 16. 2. The public ministry of Jesus, narrated in ch. iv. 17-xvi. 20. 3. The conclusion of the life of Jesus, narrated in ch. xvi. 21-xxviii.

But our opponents further assert that the Evangelist not only groups together events belonging to different times, but that some of his dates are incorrect: for instance, the date in Matt. xiii. 53 cannot be correct if Luke, ch. iv., has placed the event rightly. If, however, we carefully consider the matter, we shall find that Matthew has placed this fact more chronologically than Luke. It is true that the question in Matt. xiii. 54, and the annunciation in Luke iv. 18-21, seem to synchronize best with the first public appearance of Jesus. But even Schleiermacher, who, in his work on Luke, generally gives the preference to the arrangement of that evangelist, nevertheless observes (p. 63) that Luke iv. 23 leads us to suppose that Jesus abode for a longer period in Capernaum (comp. the words 'as his custom was' in ver. 16).

4th. If the evangelist arranges his statements according to subjects, and not chronologically, we must not be surprised that he connects similar sayings of Christ, inserting them in the longer discourses after analogous topics had been mentioned. These discourses are not compiled by

the Evangelist, but always form the fundamental framework to which sometimes analogous subjects are attached. But even this is not the case in the Sermon on the Mount; and in ch. xiii. it may be doubted whether the parables were spoken at different times. In the discourses recorded in ch. x. and xxiii., it can be proved that several sayings are more correctly placed by Matthew than by Luke (comp. especially Matt. xxiii. 37-39 with Luke xiii. 34, 35).

These arguments may be supported by adding the positive internal proofs which exist in favour of the apostolical origin of this Gospel. 1. The nature of the book agrees entirely with the statements of the Fathers of the church, from whom we learn that it was written for Jewish readers. None of the other Evangelists quote the Old Testament so often as Matthew, who, moreover, does not explain the Jewish rites and expressions, which are explained by Mark and John. 2. If there is a want of precision in the narration of facts, there is, on the other hand, a peculiar accuracy and richness in the reports given of the discourses of Jesus; so that we may easily conceive why Papias styled the Gospel of Matthew, *the sayings of the Lord*.

Some of the most beautiful and most important sayings of our Lord, the historical credibility of which no sceptic can attack, have been preserved by Matthew alone (Matt. xi. 28-30; xvi. 16-19; xxviii. 20; comp. also xi. 2-21; xii. 3-6, 25-29; xvii. 12, 25, 26; xxvi. 13). Above all, the Sermon on the Mount must here be considered, which is given by Matthew, and which forms the most beautiful and the best arranged whole of all the evangelical discourses.

With regard to the DATE of this gospel, Clemens Alexandrinus and Origen state that it was written before the others. Irenæus agrees with them, but places its origin rather late—namely, at the time when Peter and Paul were at Rome. Even De Wette grants that it was written before the destruction of Jerusalem. In proof of this we may also quote ch. xxvii. 8.

MATTHIAS (*Matthew*), one of the seventy disciples who was chosen by lot, in preference to Joseph Barsabas, into the number of the apostles, to supply the deficiency caused by the treachery and suicide of Judas (Acts i. 23-26). Nothing is known of his subsequent career.

MAZZA'ROTH (Job xxxviii. 32). [ASTRONOMY.]

MEASURES. [WEIGHTS AND MEASURES.]

ME'DAD and EL'DAD, two of the seventy elders who were nominated to assist Moses in the government of the people, but who remained in the camp, probably as modestly deeming themselves unfit for the office, when the others presented themselves at the Tabernacle. The Divine spirit, however, rested on them even there, 'and they prophesied in the camp' (Num. xi. 24-29). The Targum of Jonathan alleges that these two men were brothers of Moses and Aaron by the mother's side.

ME'DAN or MADAN, son of Abraham, by Keturah (Gen. xxv. 2). He and his brother Midian are supposed to have peopled the country of Midian, east of the Dead Sea.

MEDEBA, a town east of the Jordan, in the tribe of Reuben (Josh. xiii. 9, 16), before which was fought the great battle in which Joab defeated

the Ammonites and their allies (1 Chron. xix. 7). It originally belonged to the Moabites (Num. xxi. 30); and after the captivity of the tribes beyond the Jordan, they again took possession of it (Isa. xv. 2). The *Onomasticon* places it near Heshbon; and it was once the seat of one of the thirty-five bishoprics of Arabia (Reland, *Palastina*. pp. 217, 223, 226). Medeba, now in ruins, still retains its ancient name, and is situated upon a round hill seven miles south of Heshbon. The ruins are about a mile and a half in circuit, but not a single edifice remains perfect.

MEDES, the inhabitants in ancient times of one of the most fruitful and populous countries of Asia, called Media, the precise boundaries of which it is not easy, if indeed it is now possible, to ascertain. Winer defines it as the country which lies westward and southward from the Caspian Sea, between 35° and 40° of N. lat. Nature has divided Media into three great divisions. On the north is a flat, moist, and insalubrious district, stretching along the Caspian Sea, which is made a separate portion by a chain of hills connected with Anti-Taurus. In this plain and on these mountains there live uncultivated and independent tribes. The country is now known under the names of Masanderan and Gilan. South of this mountain range lies the country which the ancients denominated Atropatene, being separated on the west from Armenia by Mount Caspius, which springs from Ararat; and on the south and south-east by the Orontes range of hills, which runs through Media. South and south-east of the Orontes is a third district, formerly termed Great Media, which Mount Zagros separates from Assyria on the west, and from Persia on the south: on the east it is bordered by deserts, and connected on the north-east with Parthia and Hyrcania by means of Mount Caspius, being now called Irak-Ajemi. This for the most part is a high hilly country, yet not without rich and fruitful valleys, and even plains. The sky is clear and bright, and the climate healthy. Media Atropatene, which corresponds pretty nearly with the modern Azerbaijan, contains fruitful and well-peopled valleys and plains. The northern mountainous region is cold and unfruitful. In Great Media lay the metropolis of the country, Ecbatana, as well as the province of Rhagiana and the city Rhage, with the plain of Nisæum, celebrated in the time of the Persian empire for its horses and horse-races. This plain was near the city Nisæa, around which were fine pasture lands producing excellent clover. The horses were entirely white, and of extraordinary height and beauty, as well as speed. They constituted a part of the luxury of the great, and a tribute in kind was paid from them to the monarch, who, like all Eastern sovereigns, used to delight in equestrian display. Some idea of the opulence of the country may be had when it is known that, independently of imposts rendered in money, Media paid a yearly tribute of not less than 3000 horses, 4000 mules, and nearly 100,000 sheep. The races, once celebrated through the world, appear to exist no more; but Ker Porter saw the Shah ride on festival occasions a splendid horse of pure white. Cattle abounded, as did the richest fruits, as pines, citrons, oranges, all of peculiar excellence, growing as in their native land. Here also was found the *Silphium* (pro-

bably *assafetida*), which formed a considerable article in the commerce of the ancients, and was accounted worth its weight in gold. The Median dress was proverbially splendid; the dress, that is, of the highest class, which seems to have gained a sort of classical authority, and to have been at a later period worn at the Persian court, probably in part from its antiquity. This dress the Persian monarchs used to present to those whom they wished to honour, and no others were permitted to wear it. It consisted of a long white loose robe, or gown, flowing down to the feet, and enclosing the entire body. The nature and the celebrity of this dress combine with the natural richness of the country to assure us that the ancient Medians had made no mean progress in the arts; indeed, the colours of the Persian textures are known to have been accounted second only to those of India. If these regal dresses were of silk, then was there an early commerce between Media and India; if not, weaving, as well as dyeing, must have been practised and carried to a high degree of perfection in the former country (Dan. iii. 21).

The religion of the Medes consisted in the worship of the heavenly bodies, more particularly the sun and moon, and the planets Jupiter, Venus, Saturn, Mercury, and Mars. The priestly caste were denominated magi; they were a separate tribe, and had the charge not only of religion, but of all the higher culture.

The language of the ancient Medes was not connected with the Shemitic, but the Indian; and divided itself into two chief branches, the Zend, spoken in North Media, and the Pehlvi, spoken in Lower Media and Parthia; which last was the dominant tongue among the Parthians.

The Medes originally consisted of six tribes, of which the Magi were one. Being overcome by Ninus, they formed a part of the great Assyrian empire, which, however, lost in course of time the primitive simplicity of manners to which its dominion was owing, and fell into luxury and consequent weakness; when Arbaces, who governed the country as a satrap for Sardanapalus, taking advantage of the effeminacy of that monarch, threw off his yoke, destroyed his capital, Nineveh, and became himself sovereign of the Medes, in the ninth century before the Christian era. According to Diodorus, this empire extended through nine monarchs, enduring 310 years, until Astyages, son of Cyaxares, was dethroned by Cyrus in the year of the world 3495, when Media became a part of the Persian empire, sinking from the same inevitable causes as those which enabled it to gain over the Assyrian power the dominion of Asia. The account given by Herodotus varies from that now set forth. We do not propose to subject the diversities to a critical investigation, believing that little, if any, good could result, at least within our narrow space. Dates, names, and dynasties may be more or less uncertain, but the facts we have given are unimpeached. The magnitude of the Median empire is another important fact equally well ascertained. Being in their time the most valorous, as well as the most powerful nation of Asia, the Medes extended their power towards the east and the west beyond any strictly definable limits, though, like dominion generally in Oriental countries, it was of a vague, variable, and unstable kind. That they regarded the Tigris as

their western boundary appears from the fact that they erected on its banks strongholds, such as Mespila and Larissa; but that they carried their victorious arms still farther westward, appears from both Herodotus (i. 134) and Isaiah (xiii. 17, 18). The eastern limits of the empire seem to have been different at different periods. Heeren inclines to the opinion that it may have reached as far as the Oxus, and even the Indus. Many, however, were the nations and tribes which were under the sway of its sovereigns. The government was a succession of satrapies, over all of which the Medes were paramount; but the different nations exerted a secondary dominion over each other, diminishing with the increase of distance from the centre of royal power, to which ultimately the tribute paid by each dependent to his superior eventually and securely came. Not only were the Medes a powerful, but also a wealthy and cultivated people; indeed, before they sank, in consequence of their degeneracy, into the Persian empire, they were during their time the foremost people of Asia, owing their celebrity not only to their valour, but also to the position of their country, which was the great commercial highway of Asia. The sovereigns exerted absolute and unlimited dominion, exacted a rigid court-ceremonial, and displayed a great love of pomp. Under the Persian monarchs Media formed a province, or satrapy, by itself, whose limits did not correspond with independent Media, but cannot be accurately defined. To Media belonged another country, namely, Aria, which, Heeren says, took its name from the river Arius (now Heri), but which appears to contain the elements of the name in the Zend language, which was common to the two, if not to other Eastern nations, who were denominated Indians by Alexander the Great, as dwellers in or near the Indus, which he also misnamed, but who were known in their own tongue as Arians. Subsequently, however, from whatever cause, the Arians were separated from the Medes, forming a distinct satrapy in the Persian empire. Thus the name of a clan, or gens, became the name of a nation, and then of an individual tribe. It may be added that Schlosser holds it as a fundamental fact, that the Medes and Persians formed in reality one kingdom, only that now one, now another, of the two elements gained predominance: whence he thinks himself enabled to explain the discrepancies which the ancients present as to the names and succession of monarchs.

The Medes are not mentioned in sacred Scripture till the days of Hoshai, king of Israel, about 740 B.C. when Shalmaneser, king of Assyria, brought that monarch under his yoke, and in the ninth year of his reign took Samaria, and carried Israel away into Assyria, placing them in Halah and in Habor, by the river of Gozan, and in the cities of the Medes. Here the Medes appear as a part of the Assyrian empire; but at a later period Scripture exhibits them as an independent and sovereign people (Isa. xiii. 17; Jer. xxv. 25; li. 11, 28). In the last passage their kings are expressly named: 'The Lord hath raised up the kings of the Medes; for his device is against Babylon to destroy it.' 'Prepare against her (Babylon) the kings of the Medes, the captains thereof, and all the rulers thereof.' It has been conjectured that soon after the time of Arbaces they

again fell under the dominion of the Assyrians; but availing themselves of the opportunity afforded by the distant expeditions which Sennacherib undertook, they gained their freedom, and founded a new line of kings under Deioces. Indeed, so sudden and rapid are the changes of government, even to the present day, in Oriental monarchies, that we need not be surprised at any difficulties which may occur in arranging the dynasties or the succession of kings, scarcely in any ancient history, certainly least of all in the fragmentary notices preserved regarding the kings of Media and other neighbouring empires. According, however, to other historical testimony, we find the Medes and Persians united as one people in holy writ (Dan. v. 28; vi. 15; viii. 20; Esth. i. 3, 18; x. 2), in the days of Cyrus, who destroyed the separate sovereignty of the former. To the united kingdom Babylon was added as a province. After the lapse of about 200 years, Media, in junction with the entire Persian monarchy, fell under the yoke of Alexander the Great (B.C. 330); but after the death of Alexander it became, under Seleucus Nicator, the Macedonian governor of Media and Babylonia, a portion of the new Syrian kingdom (1 Macc. vi. 56), and, after many variations of warlike fortune, passed over to the Parthian monarchy (1 Macc. xiv. 2; Strabo, xvi. p. 745).

The ancient Medes were a warlike people, and much feared for their skill in archery. They appear armed with the bow in the army of the Persians, who borrowed the use of that weapon from them. Those who remained in the more mountainous districts did not lose their valour; but the inhabitants of the cities and towns which covered the plains, in becoming commercial lost their former hardy habits, together with their bravery, and, giving way to luxury, became in process of time an easy prey to new aspirants to martial fame and civil dominion.

MEDIATOR. 1. 'Mediator' is a word peculiar to the Scriptures, and is used, in an accommodated sense, by many of the ancient Fathers, to denote one who intervenes between two dispensations. Hence it is applied to John the Baptist, because he came, as it were, between the Mosaic and Christian dispensations.

2. Again, it signifies, in its more proper sense, an intermedium, or ambassador, one who stands as the channel of communication between two contracting parties. Some commentators think that the Apostle Paul, in Gal. iii. 19, calls Moses *mediator*, because he conveyed the expression of God's will to the people, and reported to God their wants, wishes, and determinations. Many ancient and modern divines, however, are of opinion that Christ himself, and not Moses, is here meant by the inspired Apostle, and this view would seem to be confirmed by comparing Deut. xxxiii. 2 with Acts vii. 38-52.

3. Christ is called *Mediator* by virtue of the reconciliation He has effected between a justly offended God and his rebellious creature man. In this sense of the term Moses was, on many occasions, an eminent type of Christ. The latter, however, was not *Mediator*, merely by reason of his coming between God and his creatures, as certain heretics would affirm; but because he appeased his wrath, and made reconciliation for iniquity.

MEGIDDO, in Zech. xii. 11, a town belonging to Manasseh, although within the boundaries of Issachar (Josh. xvii. 11). It had been originally one of the royal cities of the Canaanites (Josh. xii. 21), and was one of those of which the Israelites were unable for a long time to gain actual possession. Megiddo was rebuilt and fortified by Solomon (1 Kings ix. 15), and thither Ahaziah king of Judah fled when wounded by Jehu, and died there (2 Kings ix. 27). It was in the battle near this place that Josiah was slain by Pharaoh-Necho (2 Kings xxiii. 29, 30; 2 Chron. xxxv. 20-25). From the great mourning held for his loss, it became proverbial to compare any grievous mourning as being 'like the mourning of Hadadrimmon in the valley of Megiddon' (Zech. xii. 11). 'The waters of Megiddo' are mentioned in Judges v. 19; and are probably those formed by the river Kishon. Eusebius and Jerome do not attempt to mark the situation of the place, and it appears that the name Megiddo was in their time already lost. They often mentioned a town called *Legio*, which must in their day have been an important and well-known place, as they assume it as a central point from which to mark the position of several other places in this quarter. This has been identified with the village now called Lejjun, which is situated upon the western border of the great plain of Esdraelon, where it begins to rise gently towards the low range of wooded hills that connect Carmel with the mountains of Samaria. This place was visited by Maundrell, who speaks of it as an old village near a brook, with a khan then in good repair. This khan was for the accommodation of the caravan on the route between Egypt and Damascus, which passes here. Having already identified the present village of Taannuk with the ancient Taanach, the vicinity of this to Lejjun induced Dr. Robinson to conceive that the latter might be the ancient Megiddo, seeing that Taanach and Megiddo are constantly named together in Scripture; and to this a writer in a German review adds the further consideration that the name of *Legio* was latterly applied to the plain, or low valley along the Kishon, as that of Megiddo had been in more ancient times. If this explanation be accepted, and it is certainly probable, though not certain, it only remains to conclude that the ancient *Legio* was not founded by the Romans, but that this was a new name imposed upon a still older place, which, like the names Neapolis (now Nablus) and Sebaste (now Sebastien), has maintained itself in the mouths of the native population, while the earlier name has perished.

MELCHIZEDEK (*king of righteousness*), 'priest of the most high God,' and king of Salem, who went forth to meet Abraham on his return from the pursuit of Chedorlaomer and his allies, who had carried Lot away captive. He brought refreshment, described in the general terms of 'bread and wine,' for the fatigued warriors, and bestowed his blessing upon their leader, who, in return, gave to the royal priest a tenth of all the spoil which had been acquired in his expedition (Gen. xiv. 18, 20).

This statement seems sufficiently plain, and to offer nothing very extraordinary; yet it has formed the basis of much speculation and con-

troversy. In particular, the fact that Abraham gave a tithe to Melchizedek attracted much attention among the later Jews. In one of the Messianic Psalms (cx. 4), it is foretold that the Messiah should be 'a priest after the order of Melchizedek,' which the author of the Epistle to the Hebrews (vi. 20) cites as showing that Melchizedek was a type of Christ, and the Jews themselves, certainly on the authority of this passage of the Psalms, regarded Melchizedek as a type of the regal-priesthood, higher than that of Aaron, to which the Messiah should belong. The bread and wine which were set forth on the table of shew-bread, was also supposed to be represented by the bread and wine which the king of Salem brought forth to Abraham (Schöttgen, *Hor. Heb.* ii. 645). A mysterious supremacy came also to be assigned to Melchizedek, by reason of his having received tithes from the Hebrew patriarch; and on this point the Epistle to the Hebrews (vii. 1-10) expatiates strongly, as showing the inferiority of the priesthood represented, to that of Melchizedek, to which the Messiah belonged. 'Consider how great this man was, unto whom even the patriarch Abraham gave a tenth of the spoils;' and he goes on to argue that the Aaronic priesthood, who themselves received tithes of the Jews, actually paid tithes to Melchizedek in the person of their great ancestor. This superiority is, as we take it, inherent in his typical rather than his personal character. But the Jews, in admitting this official or personal superiority of Melchizedek to Abraham, sought to account for it by alleging that the royal priest was no other than Shem, the most pious of Noah's sons, who, according to the shorter chronology, might have lived to the time of Abraham. Such conjectures require no refutation. The best founded opinion seems to be that of Carpzov and the most judicious moderns, who, after Josephus, allege that Melchizedek was a principal person among the Canaanites and posterity of Noah, and eminent for holiness and justice, and therefore discharged the priestly as well as regal functions among the people; and we may conclude that his twofold capacity of king and priest (characters very commonly united in the remote ages) afforded Abraham an opportunity of testifying his thankfulness to God in the manner usual in those times, by offering a tenth of all the spoil. This combination of characters happens for the first time in Scripture to be exhibited in his person, which, with the abrupt manner in which he is introduced, and the nature of the intercourse between him and Abraham, render him in various respects an appropriate and obvious type of the Messiah in his united regal and priestly character.

Salem, of which Melchizedek was king, is usually supposed to have been the original of Jerusalem.

MELITA, an island in the Mediterranean, on which the ship which was conveying St. Paul as a prisoner to Rome was wrecked, and which was the scene of the interesting circumstances recorded in Acts xxvii. 28.

Melita was the ancient name of Malta, and also of a small island in the Adriatic, now called Meleđa, and each of these has found warm advocates for its identification with the Melita of Scripture. The received and long-established

opinion is undoubtedly in favour of Malta; and those who uphold the claims of Meleda are to be regarded as dissenting from the general conclusion. This dissent proceeds chiefly upon the ground that the ship of St. Paul was 'driven about in (the sea of) Adria,' when wrecked on Melita. But it has been shown from ancient writers, that the name Adria was not, in its ancient acceptation, limited to the present Adriatic Sea, but comprehended the seas of Greece and Sicily, and extended even to Africa. Consequently the only strong argument in favour of Meleda must be regarded as having been entirely overthrown.

The name of St. Paul's Bay has been given to the place where the shipwreck is supposed to have taken place. This, the sacred historian says, was at 'a certain creek with a shore,' i. e. a seemingly practicable shore, on which they purposed, if possible, to strand the vessel, as their only apparent chance to escape being broken on the rocks. In attempting this the ship seems to have struck and gone to pieces on the rocky headland at the entrance of the creek. This agrees very well with St. Paul's Bay, more so than with any other creek of the island. This bay is a deep inlet on the north side of the island, being the last indentation of the coast but one from the western extremity of the island. It is about two miles deep, by one mile broad. The harbour which it forms is very unsafe at some distance from the shore, although there is good anchorage in the middle for light vessels. The most dangerous part is the western headland at the entrance of the bay, particularly as there is close to it a small island (Salamone), and a still smaller islet (Salamouetta), the currents and shoals around which are particularly dangerous in stormy weather. It is usually supposed that the vessel struck at this point. From this place the ancient capital of Malta (now Citta Vecchia, Old City) is distinctly seen at the distance of about five miles; and on looking towards the bay from the top of the church on the summit of the hill whereon the city stands, it occurred to the present writer that the people of the town might easily from this spot have perceived in the morning that a wreck had taken place; and this is a circumstance which throws a fresh light on some of the circumstances of the deeply interesting transactions which ensued.

The sacred historian calls the inhabitants 'barbarians':—'the barbarous people showed us no small kindness.' This is far from implying that they were savages or uncivilized men; it merely intimates that they were not of Greek or Roman origin. This description applies to the ancient inhabitants of Malta most accurately; and as it could not apply to the inhabitants of Melida, who were Greeks, this is another argument to show that not Melida but Malta is the Melita of Scripture.

The island of Malta lies in the Mediterranean, about sixty miles south from Cape Passaro in Sicily. It is sixty miles in circumference, twenty in length, and twelve in breadth. Near it, on the west, is a smaller island, called Gozo, about thirty miles in circumference. Malta has no mountains or high hills, and makes no figure from the sea. It is naturally a barren rock, but has been made in parts abundantly fertile by the

industry and toil of man. The island was first colonized by the Phœnicians, from whom it was taken by the Greek colonists in Sicily, about B.C. 736; but the Carthaginians began to dispute its possession about B.C. 528, and eventually became entire masters of it. From their hands it passed into those of the Romans B.C. 242, who treated the inhabitants well, making Melita a municipium, and allowing the people to be governed by their own laws. The government was administered by a prætor, who depended upon the prætor of Sicily; and this office appears to have been held by Publius when Paul was on the island (Acts xxviii. 7). On the division of the Roman empire, Melita belonged to the western portion; but having, in A.D. 553, been recovered from the Vandals by Belisarius, it was afterwards attached to the empire of the East. About the end of the ninth century the island was taken from the Greeks by the Arabs, who made it a dependency upon Sicily, which was also in their possession. The Arabs have left the impress of their aspect, language, and many of their customs, upon the present inhabitants, whose dialect is to this day perfectly intelligible to the Arabians and to the Moors of Africa. Malta was taken from the Arabs by the Normans in A.D. 1090, and afterwards underwent other changes till A.D. 1530, when Charles V., who had annexed it to his empire, transferred it to the Knights of St. John of Jerusalem, whom the Turks had recently dispossessed of Rhodes. Under the knights it became a flourishing state, and was the scene of their greatest glory and most signal exploits. The institution having become unsuited to modern times, the Order of St. John of Jerusalem, commonly called Knights of Malta, gradually fell into decay, and the island was surrendered to the French under Buonaparte when on his way to Egypt in 1798. From them it was retaken by the English with the concurrence and assistance of the natives; and it was to have been restored to the Knights of Malta by the stipulations of the treaty of Amiens; but as no sufficient security for the independence of the Order (composed mostly of Frenchmen) could be obtained, the English retained it in their hands, which necessary infraction of the treaty was the ostensible ground of the war which only ended with the battle of Waterloo. The island is still in the hands of the English, who have lately remodelled the government to meet the wishes of the numerous inhabitants. It has recently become the actual seat of an Anglican bishopric, which however takes its title from Gibraltar out of deference to the existing Roman Catholic bishopric of Malta, a deference not paid to the Oriental churches in recently establishing the Anglican bishopric of Jerusalem.

MELON. The word thus rendered, and no doubt correctly, occurs only in Num. xi. 5. The gourd tribe are remarkable for their power of adapting themselves to the different situations where they can be grown. Neither extreme heat nor extreme moisture prove injurious to them. Mr. Moorcroft describes an extensive cultivation of melons and cucumbers on the beds of weeds which float on the lakes of Cashmere. They are similarly cultivated in Persia and in China. In India some of the species may be seen in the most arid places, others in the densest jungles.

Planted at the foot of a tree, they emulate the vine in ascending its branches; and near a but they soon cover its thatch with a coating of green. They form a principal portion of the culture of Indian gardens; the farmer even rears them in the neighbourhood of his wells' (Royle, *Himalayan Botany*, p. 218).

These plants, though known to the Greeks, are not natives of Europe, but of Eastern countries, whence they must have been introduced into Greece. They probably may be traced to Syria or Egypt, whence other cultivated plants, as well as civilization, have travelled westwards. In Egypt they formed a portion of the food of the people at the very early period when the Israelites were led by Moses from its rich cultivation into the midst of the desert. The melon, the water-melon, and several others of the Cucurbitaceae, are mentioned by Wilkinson (*Thebes*, p. 212; *Ancient Egyptians*, iv. 62), as still cultivated there, and are described as being sown in the middle of December, and cut, the melons in ninety and the cucumbers in sixty days.

The melon was known to the Romans, and cultivated by Columella, with the assistance of some precaution at cold times of the year. It is said to have been introduced into this country about the year 1520, and was called musk-melon to distinguish it from the pumpkin, which was usually called melon.

The melon, being thus a native of warm climates, is necessarily tender in those of Europe, but, being an annual, it is successfully cultivated by gardeners with the aid of glass and artificial heat of about 75° to 80°. The fruit of the melon may be seen in great variety, whether with respect to the colour of its rind or of its flesh, its taste or its odour, and also its external form and size. The flesh is soft and succulent, of a white, yellowish, or reddish hue, of a sweet and pleasant taste, of an agreeable, sometimes musk-like odour, and forms one of the most delicious of fruits, which, when taken in moderation, is wholesome, but, like all other fruits of a similar kind, is liable to cause indigestion and diarrhoea when eaten in excess, especially by those unaccustomed to its use.

With the melon it is necessary to notice the Water-Melon, which at present is cultivated in all parts of Asia, in the north of Africa, and in the south of Europe.

The water-melon is clearly distinguished by Alpinus as cultivated in Egypt. Though resembling the other kinds very considerably in its properties, it is very different from them in its deep-cut leaves, from which it is compared to a very different plant of this tribe—that is, the colocynth. A few others have cut leaves, but the water-melon is so distinguished among the edible species. The plant is hairy, with trailing cirriferous stems. The pulp abounds so much in watery juice, that it will run out by a hole made through the rind; and it is from this peculiarity that it has obtained the names of water-melon, melon d'eau, wasser-melon. Hasselquist says that it is cultivated on the banks of the Nile, in the rich clayey earth which subsides during the inundation, and serves 'the Egyptians for meat, drink, and physic. It is eaten in abundance, during the season, even by the richer sort of people; but the common people, on whom Providence hath bestowed nothing but

poverty and patience, scarcely eat anything but these, and account this the best time of the year, as they are obliged to put up with worse at other seasons of the year.'

MEMPHIS, a very ancient city, the capital of Lower Egypt, standing at the apex of the Delta, ruins of which are still found not far from its successor and modern representative, Cairo. Its Egyptian name, in the hieroglyphics, is Memfiri; in Coptic, Memfi, Manfi, Membe, Panoifi or Mefi, being probably corrupted from Man-nofri, 'the abode'; or, as Plutarch terms it, 'the haven of good men.' It was called also Pthah-ei, the abode of Pthah. In Hebrew the city bears the name of Moph (Hos. ix. 6), or Noph (Isa. xix. 13). These several names are obviously variations of one, of which Meph seems to contain the essential sounds. Whether we may hence derive support to the statement that the place was founded by Menes, the first human king of Egypt, or whether we have here a very early instance of the custom which prevailed so extensively among the Greeks and Romans, of inventing founders for cities, having names correspondent with the names of the places they were said to have built, it is impossible, with the materials we possess, to determine with any fair approach to certainty. Menes, however, is universally reputed to have founded not only Memphis but Thebes; the addition of the latter may seem to invalidate his claim to the former, making us suspect that here, too, we have a case of that custom of referring to some one distinguished name great events which happened, in truth, at different and far distant eras. If, as is probable, Thebes as well as Memphis was, as an early period, the seat of a distinct dynasty, the cradle and the throne of a line of independent sovereigns, they could scarcely have had one founder.

Memphis is said to have been founded by Menes, who, according to tradition, having diverted the course of the Nile, which had washed the foot of the sandy mountains of the Libyan chain, obliged it to run in the centre of the valley, and built the city Memphis in the bed of the ancient channel. This change was effected by constructing a dyke about a hundred stadia above the site of the projected city, whose lofty mounds and strong embankments turned the water to the East and confined the river to its new bed. The dyke was carefully kept in repair by succeeding kings, and even as late as the Persian invasion, a guard was always maintained there to overlook the necessary repairs; for, as Herodotus asserts, if the river were to break through the dyke, the whole of Memphis would be in danger of being overwhelmed with water, especially at the period of the inundation. Subsequently, however, when the increased deposit of the alluvial soil had raised the circumjacent plains, the precautions became unnecessary; and though the spot where the diversion of the Nile was made may still be traced, owing to the great bend it takes about fourteen miles above ancient Memphis, the lofty mounds once raised there are no longer visible. The site of Memphis was first accurately fixed by Pococke, at the village of Metrahenny. According to the reports of the French, the heaps which mark the site of the ancient buildings have three leagues of circumference; but this is less than its extent in early times, since Diodorus gives it 150 stadia, or six

leagues and a quarter. Memphis declined after the foundation of Alexandria, and its materials were carried off to build Cairo.

The kingdom of which Memphis was the capital was most probably the Egypt of the patriarchs, in which Abraham, Jacob, and the Israelites resided. Psammetichus, in becoming sole monarch of all Egypt, raised Memphis to the dignity of the one metropolis of the entire land, after which Memphis grew in the degree in which Thebes declined. It became distinguished for a multitude of splendid edifices, among which may be mentioned a large and magnificent temple to Vulcan, who was called by the Egyptians Pthah, the demiurges, or creative power. Under the domination of the Persians, as well as of the Ptolemies, Memphis retained its pre-eminence as the capital, though even in the time of the former it began to part with its splendour; and when the latter bestowed their favour on Alexandria, it suffered a material change for the worse, from which the place never recovered. In the days of Strabo many of its fine buildings lay in ruins, though the city was still large and populous. The final blow was given to the prosperity of Memphis in the time of Abdollati, by the erection of the Arabian city of Cairo.

That the arts were carried to a great degree of excellence at Memphis is proved by the most abundant evidence. Its manufactures of glass were famed for the superior quality of their workmanship, with which Rome continued to be supplied long after Egypt became a province of the empire. The environs of Memphis presented cultivated groves of the acacia tree, of whose wood were made the planks and masts of boats, the handles of offensive weapons of war, and various articles of furniture. Memphis was also distinguished as being the place where Apis was kept, and where his worship received special honour.

MEN'AHM (*consuler*), sixteenth king of Israel, who began to reign B.C. 772, and reigned ten years. Menahem appears to have been one of the generals of king Zechariah. When he heard the news of the murder of that prince, and the usurpation of Shallum, he was at Tirzah, but immediately marched to Samaria, where Shallum had shut himself up, and slew him in that city. He then usurped the throne in his turn; and forthwith marched to Tiphah, which refused to acknowledge his rule. Having taken this place after a siege, he treated the inhabitants with a degree of savage barbarity, which, as Josephus remarks (*Antiq.* ix. 11. 1), would not have been pardonable even to foreigners. He adhered to the sin of Jeroboam, like the other kings of Israel. In his time the Assyrians, under their king Pul, made their first appearance on the borders of Palestine; and Menahem was only able to save himself from this great invading power at the heavy price of 1000 talents of silver, which he raised by a tax of 50 shekels from every man of substance in Israel. This was probably the only choice left to him; and he is not therefore to be blamed, as he had not that resource in the treasures of the temple of which the kings of Judah availed themselves in similar emergencies. Menahem died in B.C. 761, leaving the throne to his son Pekahiah (2 Kings xv. 14-22).

MENE, MENE, TEKEL, UPHARSIN, the inscription supernaturally written 'upon the

plaster of the wall' in Belshazzar's palace at Babylon (*Dan.* v. 5-25); which 'the astrologers, the Chaldeans, and the soothsayers' could neither read nor interpret, but which Daniel first read, and then interpreted. Yet the words, as they are found in Daniel, are pure Chaldee, and if they appeared in the Chaldee character, could have been read, at least, by any person present on the occasion who understood the alphabet of his own language. To account for their inability to decipher this inscription, it has been supposed that it consisted of those Chaldee words written in another character. Dr. Hales thinks that it may have been written in the primitive Hebrew character, from which the Samaritan was formed, and that, in order to show on this occasion that the writer of the inscription was the offended God of Israel, whose authority was being at that moment peculiarly despised (ver. 2, 3, 4), he adopted his own sacred character, in which he had originally written the Decalogue, which Daniel could understand, though it would be unknown to the wise men of Babylon. This theory has the recommendation, that it involves as little as possible of miraculous agency. It has been supposed by some, that 'the wise men' were not so much at fault to read the inscription, as to explain its meaning; and certainly it is said throughout our narrative that 'the wise men could not read the writing, nor make known the interpretation of it,' phrases which would seem to mean one and the same thing; since, if they mean different things, the order of ideas would be that they could not interpret nor even read it, and Wistie accordingly translates, 'could not read so as to interpret it' (*Improved Version of Daniel*, Lond. 1807). At all events the meaning of the inscription by itself would be extremely enigmatical and obscure. To determine the application, and to give the full sense, of an isolated device which amounted to no more than 'he or it is numbered, he or it is numbered, he or it is weighed, they are divided,' must surely have required a supernatural endowment on the part of Daniel—a conclusion which is confirmed by the exact coincidence of the event with the prediction, which he propounded with so much fortitude (ver. 30, 31).

MENI is mentioned in *Isa.* lxx. 11, together with Gad, as receiving an offering of mixed wine. The word is either taken, by those namely who consider Gad in that passage to mean *troop*, to signify a *multitude*, a *number*; or, by those who suppose the whole verse to refer to idolatrous worship, to be the name of a god, and to mean *destiny*. Pocock has, moreover, pointed out the resemblance between Meni and Manâ, an idol of the ancient Arabs. The fact of Meni being a Babylonian god renders it probable that some planet was worshipped under this name: but there is much diversity of opinion as to the particular planet to which the designation of *destiny* would be most applicable. It also deserves notice that there are some, who consider Gad and Meni to be names for one and the same god, and who chiefly differ as to whether the sun or the moon is the god intended.

MEPHIBOSHETH (*extermination of idols*); also in 1 Chron. ix. 40, MERIB-PAAL, son of Jonathan and nephew of Saul (2 Sam. iv. 4). He was only five years of age when his father and grandfather were slain in Mount Gilboa: and on

the news of this catastrophe, the woman who had charge of the child, apprehending that David would exterminate the whole house of Saul, fled away with him; but in her hasty flight she stumbled with the child, and lamed him for life (n.c. 1055). Under this calamity, which was very incapacitating in times when agility and strength were of prime importance, Mephibosheth was unable to take any part in the stirring political events of his early life. According to our notions, he should have been the heir of the house of Saul; but in those times a younger son of an actual king was considered to have at least as good a claim as the son of an heir apparent who had never reigned, and even a better claim if the latter were a minor. This, with his lameness, prevented Mephibosheth from ever appearing as the opponent or rival of his uncle Ishbosheth on the one hand, or of David on the other (2 Sam. ix.). He thus grew up in quiet obscurity in the house of Machir, one of the great men of the country beyond the Jordan (2 Sam. ix. 4; xvii. 27); and his very existence was unknown to David till that monarch, when firmly settled in his kingdom, inquired whether any of the family of Jonathan survived, to whom he might show kindness for his father's sake. Hearing then of Mephibosheth from Ziba, who had been the royal steward under Saul, he invited him to Jerusalem, assigned him a place at his own table, and bestowed upon him lands, which were managed for him by Ziba, and which enabled him to support an establishment suited to his rank. He lived in this manner till the revolt of Absalom, and then David, in his flight, having noticed the absence of Mephibosheth, inquired for him of Ziba, and being informed that he had remained behind in the hope of being restored to his father's throne, instantly and very hastily revoked the grant of land, and bestowed it on Ziba (2 Sam. xvi. 1-4). Afterwards, on his return to Jerusalem, he was met with sincere congratulations by Mephibosheth, who explained that being lame he had been unable to follow the king on foot, and that Ziba had purposely prevented his beast from being made ready to carry him: and he declared that so far from having joined in heart, or even appearance, the enemies of the king, he had remained as a mourner, and, as his appearance declared, had not changed his clothes, or trimmed his beard, or even dressed his feet, from the day that the king departed to that on which he returned. David could not but have been sensible that he had acted wrong, and ought to have been touched by the devotedness of his friend's son, and angry at the imposition of Ziba; but to cover one fault by another, or from indifference, or from reluctance to offend Ziba, who had adhered to him when so many old friends forsook him, he answered coldly, 'Why speakest thou any more of thy matters? I have said, thou and Ziba divide the land.' The reply of Mephibosheth was worthy of the son of the generous Jonathan:—'Yea, let him take all; forasmuch as my lord the king is come again in peace unto his own house' (2 Sam. xix. 24-30).

We hear no more of Mephibosheth, except that David was careful that he should not be included in the savage vengeance which the Gibeonites were suffered to execute upon the house of Saul for the great wrong they had sustained during his reign (2 Sam. xxi. 7). Another Mephibosheth,

a son of Saul by his concubine Rizpah, was, however, among those who suffered on that occasion (ver. 8, 9).

MER'AB (*increase*) eldest daughter of King Saul, who was promised in marriage to David; but when the time fixed for their union approached, she was, to the surprise of all Israel, bestowed in marriage upon an unknown personage named Adriel (1 Sam. xiv. 49; xviii. 17-19). By him she had six sons, who were among those of the house of Saul that were given up to the Gibeonites, who put them to death in expiation for the wrongs they had sustained from their grandfather.

MER'A'RI (*bitter*), youngest son of Levi, born in Canaan (Gen. xlv. 11; Exod. vi. 16; Num. iii. 17; 1 Chron. vi. 1). He is only known from his name having been given to one of the three great divisions of the Levitical tribe.

MERCURY. [HERMES.]

MERCY-SEAT. The Hebrew name literally denotes a *cover*, and, in fact, describes the lid of the ark with cherubim, over which appeared 'the glory of God' (Exod. xxvi. 17, sq.; xxx. 8; xxxi. 7, and elsewhere) [ARK]. The word used in the Septuagint and New Testament to translate this term, signifies the 'expiatory' or 'propitiatory,' in allusion to that application of the Hebrew word which we have noted: which application is in this instance justified and explained by reference to the custom of the high priest once a year entering the most holy place, and sprinkling the lid of the ark with the blood of an expiatory victim, whereby 'he made atonement for the sins of the people.' As this was the most solemn and significant act of the Hebrew ritual, it is natural that a reference to it should be involved in the name which the covering of the ark acquired. By a comparison of the texts in which the word occurs, it will be seen that there would, in fact, have been little occasion to name the cover of the ark separately from the ark itself, but for this important ceremonial.

MERIBAH, or MERIB-BAAI, a name given to Mephibosheth, son of Jonathan, in 1 Chron. viii. 34; ix. 40 [MEPHIBOSHETH]. Of the two the latter seems the more correct form. It means 'contender against BaaI.' Some think that the difference has arisen from some corruption of the text; but, from the analogy of Ishbosheth, whose original name was Esh-baal, it seems more like a designed alteration, arising probably from the reluctance of the Israelites to pronounce the name of BaaI [ISHBOSHETH].

1. MERIBAH (*quarrel, strife*), one of the names given by Moses to the fountain in the desert of Sin, on the western gulf of the Red Sea, that issued from the rock which he smote by the divine command (Exod. xvii. 1-17). He called the place, indeed, Massa (*temptation*) and Meribah, and the reason is assigned 'because of the chiding of the children of Israel, and because they did there tempt the Lord' [WANDERING].

2. MERIBAH, another fountain, produced in the same manner, and under similar circumstances, in the desert of Zin (Wady Arabah), near Kadesh, and to which the name was given with a similar reference to the previous misconduct of the Israelites (Num. xx. 13, 24; Deut. xxxiii. 8). In the last text, which is the only one where the two places are mentioned together, the former is

called Massah only, to prevent the confusion of the two Meribahs, 'Whom thou didst prove at Massah, and with whom thou didst strive at the waters of Meribah.' Indeed this latter Meribah is almost always indicated by the addition of 'waters,' i. e. 'waters of Meribah,' as if further to distinguish it from the other (Ps. lxxxi. 9; cvi. 32); and still more distinctly 'waters of Meribah in Kadesh' (Num. xxvii. 14; Deut. xxxii. 51; Ezek. xlvi. 19). Only once is this place called simply Meribah (Ps. xcv. 8).

MERODACH occurs in Jer. i. 2, in such connection with idols as to leave no doubt that it is the name of a Babylonian god. In conformity with the general character of Babylonian idolatry, Merodach is supposed to be the name of a planet; and, as the Talian and Arabic names for Mars are Neric and Mirrich, 'arrow,' there is some presumption that it may be Mars. As for etymologies of the word, Gesenius has suggested that it is the Persian *mardak*, the diminutive of *mard*, 'man,' used as a term of endearment; or, rather, that it is from the Persian and Iudo-Germaic *mord*, or *mort* (which means death, and is so far in harmony with the conception of Mars, as the lesser star of evil omen), and the affix *och*, which is found in many Assyrian names, as Nisroch, &c.

MEROM. 'The waters of Merom,' of Josh. ix. 5, are doubtless the lake Samechonitis, now called Huleh, the upper or highest lake of the Jordan [PALESTINE].

MEROZ, a place in the northern part of Palestine, the inhabitants of which are severely reprehended in Judg. v. 23, for not having taken the field with Barak against Sisera. It would seem as if they had had an opportunity of rendering some particular and important service to the public cause, which they neglected. The site is not known: Eusebius and Jerome fix it twelve Roman miles from Sebaste, on the road to Dothaim; but this position would place it south of the field of battle, and therefore scarcely agrees with the history.

MESECH; MESHECH. [NATIONS, DISPERSION OF.]

1. ME'SHA, a place mentioned in describing that part of Arabia inhabited by the descendants of Joktan (Gen. x. 30). [See NATIONS, DISPERSION OF.]

2. MESHA (*deliverance*), a king of Moab, who possessed an immense number of flocks and herds, and appears to have derived his chief wealth from them. In the time of Ahab, he being then under tribute, 'rendered unto the king of Israel 100,000 lambs, and 100,000 rams, with the wool (2 Kings iii. 4). These numbers may seem exaggerated, if understood as the amount of yearly tribute. It is, therefore, more probable that the greedy and implacable Ahab had at some one time levied this enormous impost upon the Moabites; and it is likely that it was in the apprehension of a recurrence of such ruinous exactions, that they seized the opportunity for revolt, which the death of Ahab seemed to offer (2 Kings i. 1; iii. 5). The short reign of Ahaziah afforded no opportunity for reducing them to obedience; but after his death his brother and successor, Jehoram, made preparations for war; and induced Jehoshaphat to join him in this expedition. The result, with the part taken by Elisha the prophet, has been

related under other heads [ELISHA; JEHORAM; JEHOSHAPHAT]. King Mesha was at length driven to shut himself up, with the remnant of his force, in Areopolis, his capital. He was there besieged so closely, that, having been foiled in an attempt to break through the camp of the Edomites (who were present as vassals of Judah), he was reduced to extremities, and, in the madness of his despair, sought to propitiate his angry gods by offering up his own son, the heir of his crown, as a sacrifice, upon the wall of the city. On beholding this fearful sight, the besiegers withdrew in horror, lest some portion of the monstrous crime might attach to their own souls. By this withdrawal they, however, afforded the king the relief he desired, and this was, no doubt, attributed by him to the efficacy of his offering, and to the satisfaction of his gods therewith. The invaders, however, ravaged the country as they withdrew, and returned with much spoil to their own land [MOABITES].

MESOPOTA'MIA. [ARAM.]

MESSIAH (*anointed*, which is also the signification of CHRIST). In order to have an accurate idea of the Scriptural application of the term, we must consider the custom of anointing which obtained amongst the Jews. That which was specifically set apart for God's service was anointed, whether *persons* or *things* [ANOINTING]. Thus we read that Jacob poured oil upon the pillar (Gen. xxviii. 18, 22). The tabernacle also and its utensils were anointed (Lev. viii. 10), being thereby appropriated to God's service. But this ceremony had, moreover, relation to *persons*. Thus *priests*, as Aaron and his sons, were anointed, that they might minister unto God (Exod. xl. 13, 15). Kings were anointed. Hence it is that a king is designated the *Lord's anointed* Saul and David were, according to the divine appointment, anointed by Samuel (1 Sam. x. 1, xv. 1; xvi. 3, 13). Zadok anointed Solomon, that there might be no dispute who should succeed David (1 Kings i. 39). We cannot speak with confidence as to whether the prophets were *actually* anointed with the material oil. We have neither an express law nor practice to this effect on record. True it is that Elijah is commanded to anoint Elisha to be prophet in his room (1 Kings xix. 16); but no more may be meant by this expression than that he should constitute him his successor in the prophetic office; for all that he did, in executing his divine commission, was to cast his own garment upon Elisha (1 Kings xix. 19); upon which he arose and ministered unto him (ver. 21). For kings and priests the precept and practice are unquestionable.

But the name *Messiah* is, *par excellence*, applied to the Redeemer of man in the Old Testament (Dan. ix. 16; Ps. ii. 2). The words of Hannah, the mother of Samuel, at the close of her divine song, are very remarkable (1 Sam. ii. 10): 'The adversaries of the Lord shall be broken in pieces; out of heaven shall He thunder upon them: the Lord shall judge the ends of the earth; and He shall give strength unto his king, and exalt the horn of his Messiah.' The Hebrews as yet had no king; hence the passage may be taken as a striking prophecy of the promised deliverer. In various parts of the New Testament is this epithet applied to Jesus. St. Peter (Acts x. 36, 38)

informs Cornelius the centurion that God had anointed Jesus of Nazareth to be the *Christ*, and our Lord himself acknowledges to the woman of Samaria that he is the expected Messiah (John iv. 25). This term, however, as applied to Jesus, is less a *name* than the expression of his office.

Thus the Jews had in *type*, under the Mosaic dispensation, what we have in *substance* under the Christian system. The prophets, priests, and kings of the former economy were types of Him who sustains these offices as the head of his mystical body, the Church. As the priests and kings of old were set apart for their offices and dignities by a certain form prescribed in the law of Moses, so was the blessed Saviour by a better anointing (of which the former was but a shadow), even by the Holy Ghost. Thus the apostle tells us that God anointed Jesus of Nazareth with the Holy Ghost, and with power (Acts x. 38). He was anointed:—

First, at his *conception*: the angel tells Mary, 'The Holy Ghost shall come upon thee, and the power of the Highest shall overshadow thee: therefore that holy thing which shall be born of thee shall be called the Son of God' (Luke i. 35).

Second, at his *baptism* at the river Jordan (Matt. iii. 13; Mark i. 9, 10, 11, 12). St. Luke, moreover, records (Luke iv. 17, 21) that our Lord being at Nazareth, he had given unto him the book of the prophet Isaiah; and on reading from ch. lxi. 1, 'The Spirit of the Lord is upon me,' &c., he said to his hearers, 'This day is this Scripture fulfilled in your ears.'

But as the Jews will not acknowledge the right of either Jesus or his apostles to apply the prophetic passages which point to the Messiah to himself, it now remains for us to show—

First, That the promised Messiah *has already come*.

Second, That Jesus of Nazareth is *unquestionably he*.

To prove the first assertion, we shall confine our remarks to *three* prophecies. The first occurs in Gen. xlix. 8, 10, where Jacob is giving his sons his parting benediction, &c. When he comes to Judah he says: 'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come; and unto him shall the gathering of the people be.' It is evident that by Judah is here meant, not the *person* but the *tribe*; for Judah died in Egypt, without any pre-eminence. By *sceptre* and *lawgiver* are obviously intended the legislative and ruling power, which did, in the course of time, commence in David, and which, for centuries afterwards, was continued in his descendants. Whatever variety the form of government—whether monarchical or aristocratical—might have assumed, the *law* and *polity* were still the *same*. This prediction all the ancient Jews referred to the Messiah. Now, that the sceptre has departed from Judah, and, consequently, that the Messiah has come, we argue from the acknowledgments of some most learned Jews themselves. The *precise* time when all authority departed from Judah is disputed. Some date its departure from the time when Herod, an Idumean, set aside the Maccabees and Sanhedrim. Others think that it was when Vespasian and Titus destroyed Jerusalem and the temple, that the Jews lost the last vestige of authority. If, therefore, the sceptre *has* departed from Judah

—and who can question it who looks at the broken-up, scattered, and lost state of that tribe for ages?—the conclusion is clearly irresistible, that the Messiah *must have long since come!*

The next proof that the Messiah has long since come, may be adduced from Dan. ix. 25, 26, 27. It is evident that the true Messiah is here spoken of. He is twice designated by the very name. And if we consider what the work is which he is here said to accomplish, we shall have a full confirmation of this. Who but He could finish and take away transgression, make reconciliation for iniquity, bring in everlasting righteousness, seal up the vision and prophecy, confirm the covenants with many, and cause to cease the sacrifice and oblation? If then it be the *true* Messiah who is described in the above prophecy, it remains for us to see how the time predicted for his coming has long since transpired. This is expressly said to be seventy weeks from the going forth of the commandment to restore and build Jerusalem. That by seventy weeks are to be understood seventy *sevens* of years, a day being put for a year, and a week for seven years, making up 490 years, is allowed by Kimchi, Jarchi, Rabbi Sandias, and other learned Jews, as well as by many Christian commentators. This period of time then *must have long since* elapsed, whether we date its commencement from the first decree of Cyrus (Ezra i. 1, 2), the second of Darius Hystaspes (ch. vi. 15), or that of Artaxerxes (ch. viii. 11).

We can only barely allude to one remarkable prediction more, which fixes the time of the Messiah's advent, viz., Hag. ii. 7-9: 'I will shake all nations, and the desire of all nations shall come: and I will fill this house with glory, saith the Lord of Hosts. The silver is mine, and the gold is mine, saith the Lord of Hosts. The glory of this latter house shall be greater than of the former, saith the Lord of Hosts.' The glory here spoken of *must* be in reference to the Messiah, or on some other account. It could not have been said that the second Temple exceeded in glory the former one; for in many particulars, according to the acknowledgment of the Jews themselves, it was far inferior both as a building (Ezra iii. 3, 12), and in respect of the symbols and tokens of God's special favour being wanting. The promised glory, therefore, must refer to the coming and presence of him who was promised to the world before there was any nation of the Jews; and who is aptly called the '*Desire of all nations*.' This view is amply confirmed by the prophet Malachi (ch. iii. 1). Since then the very Temple into which the Saviour was to enter, has for ages been destroyed, *He must*, if the integrity of this prophecy be preserved, *have come*. That there was, at the time of our Lord's birth, a great expectation of the Messiah, both amongst Jews and Gentiles, may be seen from Tacitus, Suetonius, and Josephus, as well as from the sacred Scriptures. We may just add, that as there was a general expectation of the Messiah at this time, so there were many impostors who drew after them many followers (Joseph. *Antiq.* xx. 2. 6; *De Bell. Jud.* lviii. 31). Christ prophecies of such persons (Matt. xxiv. 24, 29).

The limits of this article will admit of our only touching upon the proofs that Jesus of Nazareth, and none other, is the very Messiah

who was to come. What was predicted of the Messiah was fulfilled in Jesus. Was the Messiah to be of the seed of the woman (Gen. iii. 15), and this woman a virgin? (Isa. vii. 14). So we are told (Gal. iv. 4; Matt. i. 18, and 22, 23) that Jesus was made of a woman, and born of a virgin. Was it predicted that he (Messiah) should be of the tribe of Judah, of the family of Jesse, and of the house of David? (Mich. v. 2; Gen. xlix. 10; Isa. xi. 10; Jer. xxiii. 5). This was fulfilled in Jesus (Luke i. 27, 69; Matt. i. 1) [GENEALOGY].

2. If the Messiah was to be a prophet like unto Moses, so was Jesus also (Isa. xlviii.; John vi. 14). If the Messiah was to appear in the second Temple, so did Jesus (Hag. ii. 7, 9; John xviii. 20).

3. Was Messiah to work miracles? (Isa. xxxv. 5, 6; comp. Matt. xi. 4, 5).

4. If the Messiah was to suffer and die (Isa. liii.), we find that Jesus died in the same manner, at the very time, and under the identical circumstances, which were predicted of him. The very man who betrayed him, the price for which he was sold, the indignities he was to receive in his last moments, the parting of his garments, and his last words, &c., were all foretold of the Messiah, and accomplished in Jesus.

5. Was the Messiah to rise from the dead? So did Jesus. How stupendous and adorable is the Providence of God, who, through so many apparent contingencies, brought such things to pass!

METALS. The principal metals are in this work considered separately under their several names; and a few general observations alone are necessary in this place.

The mountains of Palestine contained metals, nor were the Hebrews ignorant of the fact (Deut. viii. 9); but they do not appear to have understood the art of mining. They therefore obtained from others the superior as well as the inferior metals, and worked them up. They received also metal utensils ready made, or metal in plates (Jer. x. 9), from neighbouring and distant countries of Asia and Europe. The metals named in the Old Testament are iron (steel, Jer. xv. 12); copper, or copper ore; silver; gold; lead; and tin. The trade in these metals was chiefly in the hands of the Phœnicians (Ezek. xxvii. 7), who obtained them from their colonies, principally those in Spain (Jer. x. 9; Ezek. xxvii. 12). Some also came from Arabia (Ezek. xxvii. 19), and some apparently from the countries of the Caucasus (Ezek. xxvii. 13). A composition of several metals is expressed by the Hebrew word *chaamil*. In general the ancients had a variety of metallic compositions, and that which the word *chaamil* describes appears to have been very valuable. Whether it was the same as that precious compound known among the ancients as Corinthian brass is uncertain, but it is likely that in later times the Jews possessed splendid vessels of the costly compound known by that name. Indeed this is distinctly affirmed by Josephus (*Vita*, 13).

The vast quantity of silver and gold used in the temple in the time of Solomon, and which was otherwise possessed by the Jews during the flourishing time of the nation, is very remarkable, under whatever interpretation we regard

such texts as 1 Chron. xxii. 14; xxix. 4, &c. In like manner, we find among other ancient Asiatic nations, and also among the Romans, extraordinary wealth in gold and silver vessels and ornaments of jewellery. As all the accounts, received from sources so various, cannot be founded on exaggeration, we may rest assured that the precious metals were in those ancient times obtained abundantly from mines—gold from Africa, India, and perhaps even then from Northern Asia; and silver principally from Spain.

The following are the metallic manufactures named in the Old Testament:—Of iron, axes (Deut. xix. 5; 2 Kings vi. 5); saws (2 Sam. xii. 31); stone-cutters' tools (Deut. xxvii. 5); saucepans (Ezek. iv. 3); bolts, chains, knives, &c., but especially weapons of war (1 Sam. xvii. 7; 1 Macc. vi. 35). Bedsteads were even sometimes made of iron (Deut. iii. 11); 'chariots of iron,' i. e. war-chariots, are noticed elsewhere (CHARIOTS). Of copper we find vessels of all kinds (Lev. vi. 28; Num. xvi. 39; 2 Chron. iv. 16; Ezek. viii. 27); and also weapons of war, principally helmets, cuirasses, shields, spears (1 Sam. xvii. 5; vi. 38; 2 Sam. xxi. 16); also chains (Judg. xvi. 21); and even mirrors (Exod. xxxviii. 8) [COPPER]. Gold and silver furnished articles of ornament, also vessels, such as cups, goblets, &c. The holy vessels of the temple were mostly of gold (Exra v. 14). Idolaters had idols and other sacred objects of silver (Exod. xx. 20; Isa. ii. 20; Acts xvii. 29; xix. 24). Lead is mentioned as being used for weights, and for plumb-lines in measuring (Amos vii. 7; Zech. v. 8). Some of the tools of workers in metal are also mentioned: anvil (Isa. xli. 7); hammer (Isa. xli. 7); pincers; and bellows (Jer. vi. 29); crucible (Prov. xvii. 3); melting-furnace (Ezek. xxii. 18).

There are also allusions to various operations connected with the preparation of metals. 1. The smelting of metal was not only for the purpose of rendering it fluid, but in order to separate and purify the richer metal when mixed with baser minerals, as silver from lead, &c. (Isa. i. 25; comp. Plin. *Hist. Nat.* xxxvii. 47; Ezek. xxii. 18-20). For the actual or chemical separation other materials were mixed in the smelting, such as alkaline salts (Isa. i. 25); and lead (Jer. vi. 29; comp. Plin. *Hist. Nat.* xxxiii. 31). 2. The casting of images (Exod. xxx. 12; xxvi. 37; Isa. xl. 19); which are always of gold, silver, or copper. The casting of iron is not mentioned, and was perhaps unknown to the ancients. 3. The hammering of metal, and making it into broad sheets (Num. xvi. 38; Isa. xli. 12; Jer. x.). 4. Soldering and welding parts of metal together (Isa. xli. 7). 5. Smoothing and polishing metals (1 Kings vii. 45). 6. Overlaying with plates of gold and silver and copper (Exod. xxv. 11-24; 1 Kings vi. 20; 2 Chron. iii. 5; comp. Isa. xl. 19). The execution of these different metallurgic operations appears to have formed three distinct branches of handicraft before the Exile; for we read of the blacksmith, by the name of the 'worker in iron' (Isa. xli. 12); the brass-founder (1 Kings vii. 14); and the gold and silver smith (Judg. xvii. 4; Mal. iii. 2).

The invention of the metallurgic arts is in Scripture ascribed to Tubal-cain (Gen. iv. 22). In

later times the manufacture of useful utensils and implements in metals seems to have been carried on to a considerable extent among the Israelites, if we may judge from the frequent allusions to them by the poets and prophets. But it does not appear that, in the finer and more elaborate branches of this great art, they made much, if any progress, during the flourishing times of their commonwealth; and it will be remembered that Solomon was obliged to obtain assistance from the Phœnicians in executing the metal work of the temple (1 Kings vii. 13).

The Hebrew workers in iron, and especially such as made arms, were frequently carried away by the different conquerors of the Israelites (1 Sam. xiii. 19; 2 Kings xxiv. 14, 15; Jer. xxiv. 1; xxix. 2); which is one circumstance among others to show the high estimation in which this branch of handicraft was anciently held.

METHUS'AEL (*man of God*), son of Mehujael, of the race of Cain (Gen. iv. 18).

METHUS'ELAH (*man of the dust*), son of Enoch, and remarkable as being the oldest of those antediluvian patriarchs whose great ages are recorded (Gen. v. 21, 22). At the age of 187 years he begat Lamech (the father of Noah); after which he lived 782 years, making altogether 969 years [LONGEVITY].

MICAH, one of the twelve Minor Prophets, who, according to the inscription of the book, prophesied during the reigns of Jotham, Ahaz, and Hezekiah (B.C. 759-699), and was consequently contemporary with Isaiah. It is, however, doubtful whether any accurate separation of the particular prophecies of Micah can be ascertained. He was a native of Moresheth of Gath (i. 14, 15), so called to distinguish it from another town of the same name, in the tribe of Judah (Josh. xv. 44; 2 Chron. xiv. 9, 10). Micah is to be distinguished from a former prophet of the same name, called also Micaiah, mentioned in 1 Kings xxii. 8 (B.C. 897).

The contents of Micah's prophecy may be briefly summed up. It consists of two parts, the first of which terminates with chapter v. He commences with a majestic exordium (i. 2-4), in which is introduced a sublime theophany, the Lord descending from his dwelling-place to judge the nations of the earth, who are approaching to receive judgment. There is then a sudden transition to the judgment of Israel, whose captivity is predicted (chaps. i. and ii.). That of Judah follows, when the complete destruction of Jerusalem is foretold, with the expatriation of the Jews to Babylon, their future return, the glories of Zion, and the celebrity of its temple (iv. 1, 8, 9, 12), with the chastisement prepared for the oppressors of the Jews (ver. 13). After this, glorious wars are seen in perspective, attended with great slaughter (ch. v.); after many calamities a ruler is seen to arise from Bethlehem. An invasion of the Assyrians is predicted, to oppose which there will be no want of able leaders (v. 4-8). A new monarchy is beheld, attended with wars and destruction.

The second part, from this to the end, consists of an elegant dialogue or contestation between the Lord and his people, in which the corruption of their morals is reproved, and their chastisement threatened; but they are consoled by the promise of a return from their captivity.

Jahn (*Introd.*) points out the following predictions as contained in the prophet Micah. 1. The destruction of the kingdom of Israel, which was impeding when the prophecy was delivered, and which was fulfilled in the taking of Samaria by Shalmaneser, in the sixth year of Hezekiah (2 Kings xvii.), and then that of the kingdom of Judah, with the destruction of Jerusalem (iii. 12; vii. 13). 2. The Babylonian captivity (iv. 10, 11; vii. 7, 8, 13). These predictions were delivered 150 years before the event, when the Chaldeans, by whom they were accomplished, were scarcely known as a people. 3. The return from the exile, with its happy effects, and the tranquillity enjoyed by the Jews under the Persian and Grecian monarchies, which referred to events from 200 to 500 years distant (iv. 18; vii. 11; xiv. 12). 4. The heroic deeds of the Maccabees, and their victories over the Syrians or Syro-Macedonians, called Assyrians in Micah v., as well as Zechariah x. 11 (iv. 13). 5. The establishment of the royal residence in Zion (iv. 8). 6. The birth and reign of the Messiah (v. 2). The three last prophecies, observes this learned writer, are more obscure than the others, by reason of the remote distance, in point of time, of their accomplishment, from the period of their being delivered.

There is no prophecy in Micah so interesting to the Christian as that in which the native place of the Messiah is announced. 'But thou, Bethlehem Ephrathah [though] thou be little among the thousands of Judah, [yet] out of thee shall he come forth unto me, [that is] to be ruler in Israel' (Eng. Authorized Version). The citation of this passage by the Evangelist differs both from the Hebrew and the Septuagint:—'And thou, Bethlehem, [in] the land of Judah, art not the least among the princes of Judah: for out of thee shall come a governor, that shall rule [Gr. feed] my people Israel' (Matt. ii. 6). The difference, however, is but verbal.

Of more importance is the application of the prophecy. It is evident that the Jews in the time of Jesus interpreted this passage of the birth-place of the Messiah (Matt. ii. 5; John vii. 41, 42). But some of the later Rabbinical writers have maintained that it had only an indirect reference to the birth-place of the Messiah, who was to be a descendant of David, a Bethlehemite, but not of necessity himself born in Bethlehem. Others, however, expressly mention Bethlehem as the birth-place of the Messiah. Jahn observes that it is evident that the Jews in the time of Christ expected the Messiah's birth to take place at Bethlehem; and he contends that it is not possible to apply the prophecy fully and literally to any but Him who was not only of the house and lineage of David, but was actually born at Bethlehem, according to the direct testimony of both St. Matthew's and St. Luke's Gospels.

The style of Micah is sublime and vehement, in which respects he exceeds Amos and Hosea. De Wette observes that he has more roundness, fullness, and clearness in his style and rhythm than the latter prophet. He abounds in rapid transitions and elegant tropes, and piquant plays upon words. He is successful in the use of the dialogue, and his prophecies are penetrated by the purest spirit of morality and piety (see especially ch. vi. 6-8; and vii. 1-10).

Mican is the third of the minor prophets according to the arrangement of the Septuagint, the sixth according to the Hebrew, and the fifth according to the date of his prophecies.

2. MICAH. An Ephraimite, apparently contemporary with the elders who outlived Joshua. He secretly appropriated 1100 shekels of silver which his mother had saved; but being alarmed at her imprecations on the author of her loss, he confessed the matter to her, and restored the money. She then forgave him, and returned him the silver, to be applied to the use for which it had been accumulated. Two hundred shekels of the amount were given to the founder, as the cost or material of two teraphim, the one molten and the other graven; and the rest of the money served to cover the other expenses of the semi-idolatrous establishment which was formed in the house of Micah, of which a wandering Levite became the priest, at a yearly stipend; till the Danite army, on their journey to settle northward in Laish, took away both the establishment and the priest, which they afterwards maintained in their new settlement (Judg. xvii. 18) [DAN; JONATHAN 2]. The establishments of this kind, of which there are other instances—as that of Gideon at Ophrah—were, although most mistakenly, formed in honour of Jehovah, whom they thus sought to serve by means of a local worship, in imitation of that at Shiloh. This was in direct contravention of the law, which allowed but one place of sacrifice and ceremonial service; and was something of the same kind, although different in extent and degree, as the service of the golden calves, which Jeroboam set up, and his successors maintained, in Dan and Bethel. The previous existence of Micah's establishment in the former city no doubt pointed it out to Jeroboam as a suitable place for one of his golden calves.

MICAH'AH (*who as Jehovah?*), a prophet of the time of Ahab. He was absent from the mob of false prophets who incited the kings of Israel and Judah to march against the Syrians in Ramoth-gilead; for Ahab, having been offended by his sincerity and boldness, had not called for him on this occasion. But he was sent for at the special desire of Jehoshaphat; and as he declared against the enterprise, which the other prophets encouraged, Ahab commanded him to be imprisoned, and allowed only 'bread and water of affliction' till he returned from the wars in peace. To which the prophet ominously answered, 'If thou return at all in peace, then the Lord hath not spoken by me' (1 Kings xxii. 8-28). The event corresponded with this intimation [AHAB]; but we have no further information concerning the prophet.

2. MICAHIAH. One of the princes whom Jehoshaphat sent to 'teach in the cities of Judah' (2 Chron. xviii. 7).

3. MICAHIAH, son of Gemariah, who, after having heard Baruch read the terrible predictions of Jeremiah in his father's hall, went, apparently with good intentions, to report to the king's officers what he had heard (Jer. xxxvi. 11-13).

MP'CHAEAL (*who as God?*), the name given to one of the chief angels, who, in Dan. x. 13-21, is described as having special charge of the Israelites as a nation; and in Jude 9, as disputing with Satan about the body of Moses, in which dispute, instead of bringing against the arch-enemy any

railing accusation, he only said, 'The Lord rebuke thee, O Satan!' Again, in Rev. xii. 7-9, Michael and his angels are represented as warring with Satan and his angels in the upper regions, from which the latter are cast down upon the earth. This is all the reference to Michael which we find in the Bible.

The passages in Daniel and Revelations must be taken as symbolical, and in that view offer little difficulty. The allusion in Jude 9 is more difficult to understand, unless, with Vitringa, Lardner, Macknight, and others, we regard it also as symbolical; in which case the dispute referred to is that indicated in Zech. iii. 1; and 'the body of Moses' as a symbolical phrase for the Mosaic law and institutions [JUDE]. A comparison of Jude 9 with Zech. iii. 1 gives much force and probability to this conjecture.

MICHAL (*who as God?*), youngest daughter of king Saul (1 Sam. xiv. 49). She became attached to David, and made no secret of her love; so that Saul, after he had disappointed David of the elder daughter [MERAB], deemed it prudent to bestow Michal in marriage upon him (1 Sam. xviii. 20-28). Saul had hoped to make her the instrument of his designs against David, but was foiled in his attempt through the devoted attachment of the wife to her husband. Of this a most memorable instance is given in 1 Sam. xix. 11-17. When David escaped the javelin of Saul he retired to his own house, upon which the king set a guard over-night, with the intention to slay him in the morning. This being discovered by Michal, she assisted him to make his escape by a window, and afterwards amused the intended assassins under various pretences, in order to retard the pursuit. When these were detected, Michal pretended to her father that David had threatened her with death if she did not assist his escape. Saul probably did not believe this; but he took advantage of it by cancelling the marriage, and bestowing her upon a person named Phalti (2 Sam. xxv. 44). David, however, as the divorce had been without his consent, felt that the law (Deut. xxiv. 4) against a husband taking back a divorced wife could not apply in this case: he therefore formally reclaimed her of Ish-bosheth, who employed no less a personage than Abner to take her from Phalti, and conduct her with all honour to David. It was under cover of this mission that Abner sounded the elders of Israel respecting their acceptance of David for king, and conferred with David himself on the same subject at Hebron (2 Sam. iii. 12-21).

The re-union was less happy than might have been hoped. On that great day when the ark was brought to Jerusalem, Michal viewed the procession from a window, and the royal notions she had imbibed were so shocked at the sight of the king not only taking part in, but leading, the holy transports of his people, that she met him on his return home with a keen sarcasm on his undignified and unkingly behaviour. This ill-timed sneer, and the unsympathising state of feeling which it manifested, drew from David a severe but not unmerited retort; and the Great King, in whose honour David incurred this contumely, seems to have punished the wrong done to him, for we are told that 'therefore Michal, the daughter of Saul, had no child to the day of her death' (2 Sam. vi. 16-23). It was thus, perhaps, as

Abarbanel remarks, ordered by Providence that the race of Saul and David should not be mixed, and that no one deriving any apparent right from Saul should succeed to the throne.

MICHMAS, or MICHMAH, a town of Benjamin (Ezra ii. 27; Neh. xi. 31; comp. vii. 31), east of Beth-aven (1 Sam. xiii. 5), and south from Migron, on the road to Jerusalem (Isa. x. 28). The words of 1 Sam. xiii. 2, xiv. 4, and Isa. x. 29, show that at Michmas was a pass where the progress of a military body might be impeded or opposed. It was perhaps for this reason that Jonathan Maccabæus fixed his abode at Michmas (1 Macc. ix. 73); and it is from the chivalrous exploit of another hero of the same name, the son of Saul, that the place is chiefly celebrated (1 Sam. xiii., xiv. 4-16). Eusebius describes Michmas as a large village nine Roman miles from Jerusalem, on the road to Ramah. Travellers have usually identified it with Bir or el-Bireh; but Dr. Robinson recognises it in a place still bearing the name of Mukhmas, at a distance and position which correspond well with these intimations. This is a village situated upon a slope to the north of a valley called Wady es-Suweinit. It is small, and almost desolate, but bears marks of having been once a place of strength and importance. There are many foundations of hewn stones, and some columns lie among them. The valley es-Suweinit, steep and precipitous, is probably the 'passage of Michmah' mentioned in Scripture. In it, says Dr. Robinson, 'just at the left of where we crossed, are two hills of a conical, or rather spherical, form, having steep rocky sides, with small wadis running up between each so as almost to isolate them. One of them is on the side towards Jeba (Gibeah), and the other towards Mukhmas. These would seem to be the two rocks mentioned in connection with Jonathan's adventure (1 Sam. xiv. 4, 5). They are not, indeed, so "sharp" as the language of Scripture would seem to imply; but they are the only rocks of the kind in this vicinity. The northern one is connected towards the west with an eminence still more distinctly isolated.'

MID'IAN, fourth son of Abraham, by Keturah, and progenitor of the Midianites (Gen. xxv. 2).

MIDIANITES, a tribe of people descended from Abraham's son Midian. His descendants must have settled in Arabia, and engaged in trade at an early period, if we identify them with those who in the time of Jacob appear, along with the Ishmaelites, as merchants travelling from Gilead to Egypt, and who, having in their way bought Joseph from his brethren, sold him in the latter country (Gen. xxxvii. 28, 36). It is, however, very difficult to conceive that the descendants of a son of Abraham, born so many years after Isaac, had become a tribe of people at the time when the descendants of Isaac himself were so few. One is therefore much inclined to suppose that these Midianites were different and distinct from those descended from Abraham's son; and there appears the more ground for this when at a later period we find two tribes of Midianites, different in locality and character, and different in their feelings towards the Israelites. If this distinction be admitted, then it would be necessary to seek the earlier Midianites in those dwelling about the eastern arm of the Red Sea, among whom Moses found refuge when 'he fled from Egypt,' and

whose priest or sheikh was Jethro, who became the father-in-law of the future lawgiver (Exod. iii. 1; xviii. 5; Num. x. 29). These, if not of Hebrew, would appear to have been of Cushite origin, and descended from Midian the son of Cush. We do not again meet with these Midianites in the Jewish history, but they appear to have remained for a long time settled in the same quarter, where indeed is the seat of the only Midianites known to Oriental authors.

The other Midianites, undoubtedly descended from Abraham and Keturah, occupied the country east and south-east of the Moabites, who were seated on the east of the Dead Sea; or rather, perhaps, we should say that, as they appear to have been a semi-nomade people, they pastured their flocks in the unsettled country beyond the Moabites, with whom, as a kindred, although more settled tribe, they seem to have been on the most friendly terms, and on whose borders were situated those 'cities and goodly castles which they possessed' (Num. xxxi. 10). These Midianites, like the other tribes and nations who had a common origin with them, were highly hostile to the Israelites. In conjunction with the Moabites, they designedly enticed them to idolatry as they approached Canaan (Num. xxxi. 2, 5; xxv. 6, 14-18); on which account Moses attacked them with a strong force, killed all their fighting men, including their five princes or emirs, and made the women and children captives (Num. xxxi.). The account of the spoil confirms the view which we have taken of the semi-nomade position of the Midianites—namely, 675,000 sheep, 72,000 beeves, 61,000 asses, 32,000 persons. This was only the 'prey,' or live stock; but besides this there was a great quantity of 'barbaric pearl and gold,' in the shape of 'jewels of gold, chains, and bracelets, rings, ear-rings, and tablets.'

Some time after the Israelites obtained possession of Canaan, the Midianites had become so numerous and powerful, that, for seven successive years, they made inroads into the Hebrew territory in the time of harvest, carrying off the fruits and cattle, and desolating the land. At length Gideon was raised up as the deliverer of his country, and his triumph was so complete that the Israelites were never more molested by them (Judg. vi. 1-7; vii.; viii.). To this victory there are subsequent allusions in the sacred writings (Ps. lxxxiii. 10, 12; Isa. ix. 4; x. 6); but the Midianites do not again appear in sacred or profane history.

MIG'DOL, a place between which and the Red Sea the Israelites were commanded to encamp on leaving Egypt (Exod. xiv. 2; Num. xxxiii. 7) [EXODUS]. The name, which means a *tower*, appears to indicate a fortified place. In Jer. xlv. 1; xlv. 14, it occurs as a city of Egypt, and it would seem to have been the last town on the Egyptian frontier, in the direction of the Red Sea; hence 'from Migdol to Syene,' in Ezek. xxix. 10; xxx. 6.

MIG'RON, a town which, from the historical indications, must have been south or south-west of Ai, and north of Michmas (Isa. x. 28). From Michmas northward a narrow valley extends out of and at right angles with that which has been identified as the pass of Michmas [MICHMAS]. The town of Migron seems to have been upon and to have commanded the pass through this valley, but its precise situation has not been de-

terminated. Saul was stationed at the further side of Gibeah, 'under a pomegranate-tree which is by Migron' (1 Sam. xiv. 2), when Jonathan performed his great exploit at Michmas; and this is to be explained on the supposition that Migron was on the border, towards Michmas, of the district to which Gibeah gave its name.

MIL/COM. [Moloch.]

MILE. This word is only mentioned in Matt. v. 41, where Christ says, 'If any one compel thee to go with him one mile, go with him two.' The mile was originally (as its derivation from *mille*, 'a thousand,' implies) a Roman measure of 1000 geometrical paces (*passus*) of 5 feet each, and was therefore equal to 5000 Roman feet. Taking the Roman foot at 11.6496 English inches, the Roman mile would be 1618 English yards, or 142 yards less than the English statute mile. By another calculation, in which the foot is taken at 11.62 inches, the mile would be little more than 1614 yards. The number of Roman miles in a degree of a large circle of the earth is very little more than 75. The Roman mile contained 8 Greek stadia. The Greek stade hence bore the same relation to the Roman mile which the English furlong does to the English mile.

MILETUS, a city and sea-port of Ionia in Asia Minor, about thirty-six miles south of Ephesus. St. Paul touched at this port on his voyage from Greece to Syria, and delivered to the elders of Ephesus, who had come to meet him there, a remarkable and affecting address (Acts xx. 15-38). Miletus was a place of considerable note, and the ancient capital of Ionia and Caria. It was the birth-place of several men of renown—Thales, Timotheus, Anaximander, Anaximenes, Democritus. Ptolemy places Miletus in Caria by the sea, and it is stated to have had four havens, one of which was capable of holding a fleet. It was noted for a famous temple of Apollo, the oracle of which is known to have been consulted so late as the fourth century. There was, however, a Christian church in the place; and in the fifth, seventh, and eighth centuries we read of bishops of Miletus, who were present at several councils. The city fell to decay after its conquest by the Saracens, and is now in ruins, not far from the spot where the Meander falls into the sea. The site bears, among the Turks, the name of Melas.

MILK. Milk, and the preparations from it, butter and cheese, are often mentioned in Scripture. Milk, in its fresh state, appears to have been used very largely among the Hebrews, as is usual among people who have much cattle, and yet make but sparing use of their flesh for food. The proportion which fresh milk held in the dietary of the Hebrews, must not, however, be measured by the comparative frequency with which the word occurs; because, in the greater number of examples, it is employed figuratively, to denote great abundance, and in many instances it is used as a general term for all or any of the preparations from it.

In its figurative use, the word occurs sometimes simply as the sign of abundance (Gen. xlix. 12; Ezek. xxv. 4; Joel iii. 18, &c.); but more frequently in combination with honey—'milk and honey,' being a phrase which occurs about twenty times in Scripture. Thus a rich and fertile soil is described as a 'land flowing with milk and

honey,' which, although usually said of Palestine, is also applied to other fruitful countries, as Egypt (Num. xvi. 13). Hence its use to denote the food of children. Milk is also constantly employed as a symbol of the elementary parts or rudiments of doctrine (1 Cor. iii. 2; Heb. v. 12, 13); and from its purity and simplicity, it is also made to symbolize the unadulterated word of God (1 Pet. ii. 2; comp. Isa. lv. 1).

In reading of milk in Scripture, the milk of cows naturally presents itself to the mind of the European reader; but in Western Asia, and especially among the pastoral and semi-pastoral people, not only cows, but goats, sheep, and camels, are made to give their milk for the sustenance of man. That this was also the case among the Hebrews, may be clearly inferred even from the slight intimations which the Scriptures afford. Thus we read of 'butter of kine, and milk of sheep' (Deut. xxxii. 14); and in Prov. xxvii. 27, the emphatic intimation, 'Thou shalt have goats' milk for food,' seems to imply that this was considered the best for use in the simple state. 'Thirty milch camels' were among the cattle which Jacob presented to his brother Esau (Gen. xxxii. 15), implying the use of camels' milk.

The Hebrew word for curdled milk is always translated 'butter' in the Authorized Version. It seems to mean both butter and curdled milk, but most generally the latter; and the context will, in most cases, suggest the distinction, which has been neglected by our translators. It was this curdled milk, highly esteemed as a refreshment in the East, that Abraham set before the angels (Gen. xviii. 8), and which Jael gave to Sisera, instead of the water which he asked (Judg. v. 25). In this state milk acquires a slightly intoxicating power, if kept long enough. Isaiah vii. 22, where it is rendered 'butter,' is the only text in which the word is coupled with 'honey,' and there it is a sign of scarcity, not of plenty, as when honey is coupled with fresh milk. It means that there being no fruit or grain, the remnant would have to live on milk and honey; and perhaps, that milk itself would be so scarce, that it would be needful to use it with economy; and hence to curdle it, as fresh milk cannot be preserved for chary use. Although, however, this word properly denotes curdled milk, it seems also to be sometimes used for milk in general (Deut. xxxii. 14; Job xx. 15; Isa. vii. 15).

The most striking Scriptural allusion to milk is that which forbids a kid to be seethed in its mother's milk, and its importance is attested by its being thrice repeated (Exod. xxiii. 19; xxiv. 26; Deut. xiv. 21). There is, perhaps, no precept of Scripture which has been more variously interpreted than this. It is probable that the prohibition refers not to a common act of cookery, but to an idolatrous or magical rite. Maimonides urges this opinion. He says, 'Flesh eaten with milk, or in milk, appears to me to have been prohibited, not only because it affords gross nourishment, but because it savoured of idolatry, some of the idolaters probably doing it in their worship, or at their festivals.' This is confirmed by an extract which Cudworth gives from an ancient Karate commentary on the Pentateuch. 'It was a custom of the ancient heathen, when they had gathered in all their fruits, to take a

kid, and boil it in the dam's milk, and then in a magical way to go about and besprinkle with it all their trees, and fields, and gardens, and orchards, thinking that by this means they should make them fructify, and bring forth more abundantly the following year.' Some such rite as this is supposed to be the one interdicted by the prohibition.

BUTTER is not often mentioned in Scripture, and even less frequently than our version would suggest. Indeed, it may be doubted whether it denotes butter in any place besides Deut. xxxii. 14, 'butter of kine,' and Prov. xxx. 33, 'the churning of milk bringeth forth butter,' as all the other texts will apply better to curdled milk than to butter. Butter was, however, doubtless much in use among the Hebrews, and we may be sure that it was prepared in the same manner as at this day among the Arabs and Syrians. The milk is put into a large copper pan over a slow fire, and a little *leben* or sour milk (the same as the curdled milk mentioned above), or a portion of the dried entrails of a lamb, is thrown into it. The milk then separates, and is put into a goat-skin bag, which is tied to one of the tent poles, and constantly moved backwards and forwards for two hours. The buttery substance then coagulates, the water is pressed out, and the butter put into another skin. In two days the butter is again placed over the fire, with the addition of a quantity of *burgul* (wheat boiled with leaven, and dried in the sun), and allowed to boil for some time, during which it is carefully skimmed. It is then found that the *burgul* has precipitated all the foreign substances, and that the butter remains quite clear at the top. This is the process used by the Bedouins, and it is also the one employed by the settled people of Syria and Arabia. The chief difference is, that in making butter and cheese the townspeople employ the milk of cows and buffaloes, whereas the Bedouins, who do not keep these animals, use that of sheep and goats. The butter is generally white, of the colour and consistence of lard, and is not much relished by English travellers. It is eaten with bread in large quantities by those who can afford it, not spread out thinly over the surface, as with us, but taken in mass with the separate morsels of bread [CHEESE].

MILL. The mill for grinding corn had not wholly superseded the mortar for pounding it in the time of Moses. The mortar and the mill are named together in Num. xi. 8. But fine meal, that is, meal ground or pounded fine, is mentioned so early as the time of Abraham (Gen. xviii. 6); hence mills and mortars must have been previously known. The mill common among the Hebrews differed little from that which is in use to this day throughout Western Asia and Northern Africa. It consisted of two circular stones two feet in diameter, and half a foot thick. The lower is called the 'nether millstone,' Job xli. 16 (24), and the upper the 'rider' (Judg. ix. 53; 2 Sam. xi. 21). The former was usually fixed to the floor, and had a slight elevation in the centre, or, in other words, was slightly convex in the upper surface. The upper stone had a concavity in its under surface fitting to, or receiving, the convexity of the lower stone. There was a hole in the top, through which the corn was introduced by handfuls at a time. The upper stone

had an upright stick fixed in it as a handle, by which it was made to turn upon the lower stone, and by this action the corn was ground, and came out at the edges. As there were neither public mills nor bakers, except the king's (Gen. xl. 2; Hos. vii. 4-8), each family possessed a mill; and

as it was in daily use, it was made an infringement of the law for a person to take another's mill or millstone in pledge (Deut. xxiv. 6). The mill was, as now, commonly turned by two persons, usually women, and these, the work being laborious, the lowest maid-servants in the house. They sat opposite each other. One took hold of the mill-handle, and impelled it half way round; the other then seized it, and completed the revolution (Exod. xi. 5; Job xxxi. 10, 11; Isa. xlvii. 2; Matt. xxiv. 41). As the labor was severe and menial, enemies taken in war were often condemned to perform it (Judg. xvi. 21; Lam. v. 13). It will be seen that this millstone does not materially differ from the Highland *quern*; and is, indeed, an obvious resource in those remote quarters, where a population is too thin or too scattered to afford remunerative employment to a miller by trade. In the East this trade is still unknown, the hand-mill being in general and exclusive use among the corn-consuming, and the mortar among the rice-consuming, nations [BREAD].

MILLET occurs in Ezek. iv. 9, where the Prophet is directed to take unto him wheat, and barley, and beans, and lentiles, and millet and fitches, and to put them into one vessel, and to make bread thereof for himself. All the grains enumerated in this verse continue to form the chief articles of diet in the East in the present day, as they appear to have done in ancient times. The common millet is cultivated from the middle of Europe to the most southern part of India, and is sometimes cultivated in England on account of the seeds being used for feeding birds and poultry. But the grain is usually imported into this country from the Mediterranean. In India it is

cultivated in the cold weather, that is, in the same season with wheat and barley, and is an article of diet with the inhabitants. Having mentioned the extreme points where this grain is cultivated, it is hardly necessary to state that it is produced in the intermediate countries.

241. [Millet—*Panicum miliaceum*.]

Tournefort says that in the Isle of Samos the inhabitants, in preparing their bread, knead together one half wheat and the other half barley and millet mixed together. It is also an article of diet both in Persia and India, and is so universally cultivated in the East as one of their smaller corn-grasses, that it is most likely to be the kind alluded to in the passage of Ezekiel.

MILLO. This word denotes 'fulness,' and is applied to a mound or rampart, probably as being filled up with stones or earth. Hence it is the name given to

1. Part of the citadel of Jerusalem, probably the rampart (2 Sam. v. 9; 1 Kings ix. 15, 24; xl. 27; 1 Chron. xi. 8; 2 Chron. xxxii. 5).

2. The fortress in Shechem. 'All the men of Shechem, and all that dwelt in the house of Millo;' that is, in the castle or citadel (Judg. ix. 6, 20).

MINISTER, one who acts as the less or inferior agent, in obedience or subservience to another, or who serves, officiates, &c., as distinguished from the master or superior. In the Old Testament the term is applied to Joshua as the minister of Moses (Exod. xxiv. 13), and to Elisha as the minister to Elijah (2 Kings vi. 15). Persons thus designated sometimes succeeded to the office of their principal, as did Joshua and Elisha. The word is applied to the angels, Ps. ciii. 21; comp. Ps. civ. 4; Heb. i. 7; and also to the Jews in their capacity as a sacred nation, 'Men shall call you the ministers of our God' (Isa. lxi. 6); and to the priests (Jer. xxxiii. 21; Ezek. xlv. 11; xlv. 4; Joel i. 9). In the New Testament the

term is applied to Christian teachers, Acts xiii. 2; Rom. xv. 16; and to Christ, Heb. viii. 2; to the collectors of the Roman tribute, in consequence of the divine authority of political government, 'they are God's ministers.' The word *diakonos*, 'minister,' is applied to Christian teachers, 1 Cor. iii. 5; 2 Cor. iii. 6; vi. 4; xi. 23; 1 Thess. iii. 2; to false teachers, 2 Cor. xi. 15; to Christ, Rom. xv. 8, 16; Gal. ii. 17; to heathen magistrates, Rom. xiii. 4; in all which passages it has the sense of a minister, assistant, or servant in general, as in Matt. xx. 26; but it means a particular sort of minister, 'a deacon,' in Philip. i. 1; 1 Tim. iii. 8, 12. Another word similarly rendered is applied to Christian ministers, Luke i. 2; Acts xxvi. 16; 2 Cor. iv. 1. The word denotes, in Luke iv. 20, the attendant in a synagogue who handed the volume to the reader, and returned it to its place. In Acts xiii. 5 it is applied to 'John whose surname was Mark,' in his capacity as an attendant or assistant on Barnabas and Saul. It primarily signifies an under-rower on board a galley, of the class who used the longest oars, and consequently performed the severest duty, as distinguished from the rower upon the upper bench of the three, and from the sailors or the marines; hence in general a hand, agent, minister, attendant, &c.

MINNI. [ARMENIA.]

MINNITH, a town in the country of the Ammonites (Judg. xi. 33), celebrated for the excellence of its wheat, which was exported to the markets of Tyre (Ezek. xxvii. 17). It still existed in the age of Eusebius, four R. miles from Heshbon, on the road to Philadelphia.

MINT is mentioned in Matt. xxiii. 23: 'Woe unto you, Scribes and Pharisees, hypocrites! for ye pay tithe of mint and anise (properly *dill*) and cummin, and have omitted the weightier matters of the law;' and, again, in Luke xi. 42: 'But woe unto you, Pharisees! for ye tithe *mint* and rue, and all manner of herbs, and pass over judgment and the love of God: these ought ye to have done, and not to leave the other undone.' All the plants mentioned in the above passages belong to the smaller ones cultivated in gardens in Europe, and which usually come under the denomination of sweet herbs. Lady Calcott inquires whether mint was one of the bitter herbs which the Israelites ate with the Paschal Lamb; and infers the probability of its being so from our own practice of eating lamb with mint sauce. Dr. Harris argues that mint, anise, and cummin were not tithed, and that the Pharisees only paid tithes of these plants from an overstrained interpretation of the law. But, in the article **DILL**, it may be seen that dill was tithed, and it is one of the herbs mentioned along with mint. The meaning, therefore, seems to be, that the Pharisees, while, in conformity with the law, they paid these minute tithes, neglected the most important moral duties,—truth, justice, and mercy; for it is added, 'these ought ye to have done, and not to leave the other undone.'

The species of mint most common in Syria is *Mentha sylvestris*, found by Russell at Aleppo, and mentioned by him as one of the herbs cultivated in the gardens there. It also occurs in Greece, Taurus, Caucasus, the Altai Range, and as far as Cashmere, whence we have obtained specimens. Mint is highly esteemed in Eastern countries.

and apparently was so also by the Jews. It was much esteemed by the ancients, as Pliny testifies. Dioscorides also mentions it as useful to the stomach, and peculiarly grateful as a condiment. Mint was employed by the ancients in the preparation of many dishes.

It is difficult to determine the exact species or variety of mint employed by the ancients. There are numerous species very nearly allied to one another. They usually grow in moist situations, and are herbaceous, perennial, of powerful odour, especially when bruised, and have small reddish-coloured flowers, arranged in spikes or whorls. The taste of these plants is bitter, warm, and pungent, but leaving a sensation of coolness on the tongue: in their properties they are so similar to each other, that either in medicine, or as a condiment, one species may safely be substituted for another.

MIRACLES. God sees fit to carry on his common operations on established and uniform principles. These principles, whether relating to the physical or moral world, are called the *laws of nature*. And by the laws of nature the most enlightened philosophers and divines have understood the *uniform plan according to which, or the uniform manner in which, God exercises his power throughout the created universe*.

This uniform method of divine operation is evidently conducive to the most important ends. It manifests the immutable wisdom and goodness of God, and, in ways too many to be here specified, promotes the welfare of his creatures. Without the influence of this uniformity, rational beings would have no effectual motive to effort, and the affairs of the universe, intelligent and unintelligent, would be in a state of total confusion. And this general fact may be considered as a sufficient reason why God, in the common course of his providence, has adopted a uniform method of operation in preference to any other.

But if, in conducting the affairs of his great empire, God sees, in any particular case, as good a reason for a *deviation* from this uniform order, as there is generally for *uniformity*, that is, if the glory of his attributes and the good of his creatures require it—and no one can say that such a case may not occur—then, unquestionably, the unchangeable God will cause such a deviation; in other words, will work *miracles*.

It is admitted that no man, apart from the knowledge of facts, could ever, by mere reasoning, have arrived at a confident belief, that the conjuncture supposed would certainly occur. But to us, who know that mankind are so depraved and wretched, and that the efforts of human wisdom to obtain relief have been in vain, the importance of a special divine interposition is very apparent. And being informed what the plan is, which a merciful God has adopted for our recovery to holiness and happiness, and being satisfied that this plan, so perfectly suited to the end in view, could never have been discovered by man, and never executed, except by a divine dispensation involving miracles, we conclude, that the introduction of a new and miraculous dispensation was in the highest degree an honour to God and a blessing to the world. The mode which God has chosen to impart the knowledge of this dispensation to man, is that of making a revelation to a number of individuals, who are to

write and publish it for the benefit of the world. This revelation to individuals is made in such a manner as renders it certain to their minds, that the revelation is from God. But how can that revelation be made available to others? It will not answer the purpose for those who receive it merely to declare that God has made such a revelation to them, and authorized them to proclaim it to their fellow-creatures. For how shall we know that they are not deceivers? Or, if their character is such as to repel any suspicion of this kind, how shall we know that they are not themselves deceived? Have we not a right, nay, are we not bound in duty, to ask for evidence of the divine authority of what they reveal? But what evidence will suffice? The reply is obvious. The revelation, in order to be of use to us, as it is to those who receive it directly from God, must not only be declared by them to us, but must have a divine attestation. In other words, those who declare it to us must show, by some incontestable proof, that it is from God. Such proof is found in a miracle. If an event takes place which we know to be contrary to the laws of nature, we at once recognise it as the special act of him who is the God of nature, and who alone can suspend its laws, and produce effects in another way. The evidence of a direct interposition of God given in this way is irresistible. No man, no infidel, could witness an obvious miracle, without being struck with awe, and recognising the *finger of God*.

It is clear that no event, which can be accounted for on natural principles, can prove a supernatural interposition, or contain a divine attestation to the truth of a prophet's claim. But when we look at an event which cannot be traced to the laws of nature, and is clearly above them, such as the burning of the wood upon the altar in the case of Elijah's controversy with the false prophets, or the resurrection of Lazarus, we cannot avoid the conviction, that the Lord of heaven and earth does, by such a miracle, give his testimony, that Elijah is his prophet, and that Jesus is the Messiah. The evidence arising from miracles is so striking and conclusive, that there is no way for an infidel to evade it, but to deny the existence of miracles, and to hold that all the events called miraculous may be accounted for according to the laws of nature.

Hume arrays *uniform experience* against the credibility of miracles. But the shallow sophistry of his argument has been fully exposed by Campbell, Paley, and many others. We inquire what and how much he means by *uniform experience*. Does he mean his own experience? But because he has never witnessed a miracle, does it follow that others have not? Does he mean the uniform experience of the greater part of mankind? But how does he know that the experience of a smaller part has not been different from that of the greater part? Does he mean, then, the uniform experience of all mankind in all ages? How then does his argument stand? He undertakes to prove that no man has ever witnessed or experienced a miracle, and his real argument is, that no one *has* ever witnessed or experienced it. In other words, to *prove* that there has never been a miracle, he *asserts* that there never has been a miracle. This is the nature of his argument—an example of begging the question, which a man

of Hume's logical powers would never have resorted to, had it not been for his enmity to religion.

The miraculous events recorded in the Scriptures, particularly those which took place in the times of Moses and Christ, have all the marks which are necessary to prove them to have been matters of fact, and worthy of full credit, and to distinguish them from the feats of jugglers and impostors. This has been shown very satisfactorily by Leslie, Paley, Douglas, and many others. These miracles took place in the most public manner, and in the presence of many witnesses; so that there was opportunity to subject them to the most searching scrutiny. Good men and bad men were able and disposed to examine them thoroughly, and to prove them to have been impostures, if they had been so.

A large number of men, of unquestionable honesty and intelligence, constantly affirmed that the miracles took place before their eyes. And some of these original witnesses wrote and published histories of the facts, in the places where they were alleged to have occurred, and near the time of their occurrence. In these histories it was openly asserted that the miracles, as described, were publicly known and acknowledged to have taken place; and this no one took upon him to contradict, or to question. Moreover, many persons who stood forth as witnesses of these miracles passed their lives in labours, dangers, and sufferings, in attestation of the accounts they delivered, and solely in consequence of their belief of the truth of those accounts; and, from the same motive, they voluntarily submitted to new rules of conduct; while nothing like this is true respecting any other pretended miracles.

It has been a long agitated question, whether miracles have ever been wrought, or can be consistently supposed to be wrought, *by apostate spirits*.

It is sufficient to say here, that it would be evidently inconsistent with the character of God to empower or to suffer wicked beings to work miracles *in support of falsehood*. And if wicked spirits in the time of Christ had power to produce preternatural effects upon the minds or bodies of men, and if those effects are to be ranked among real miracles (which, however, we do not affirm), still the end of miracles is not contravened. For those very operations of evil spirits were under the control of divine providence, and were made in two ways to subserve the cause of Christ. First; they furnished an occasion, as doubtless they were designed to do, for Christ to show his power over evil spirits, and, by his superior miracles, to give a new proof of his Messiahship. Secondly; the evil spirits themselves were constrained to give their testimony, that Jesus was the Christ, the Holy One of Israel.

As to the time when the miraculous dispensation ceased, we can only remark, that the power of working miracles, which belonged pre-eminently to Christ and his apostles, and, in inferior degrees, to many other Christians in the apostolic age, subsided gradually. After the great object of supernatural works was accomplished in the establishment of the Christian religion, with all its sacred truths, and its divinely appointed institutions, during the life of Christ and his apostles, there appears to have been no further

occasion for miracles, and no satisfactory evidence that they actually occurred.

MIRIAM (*bitterness*), sister of Moses and Aaron, and supposed to be the same that watched her infant brother when exposed on the Nile; in which case she was probably ten or twelve years old at the time (Exod. ii. 4, sq.). When the Israelites left Egypt, Miriam naturally became the leading woman among them. She is called 'a prophetess' (Exod. xv. 20). After the passage of the Red Sea, she led the music, dance, and song, with which the women celebrated their deliverance (Exod. xv. 20-22). The arrival of Moses' wife in the camp seems to have created in her an unseemly dread of losing her influence and position, and led her into complaints of and dangerous reflections upon Moses, in which Aaron joined. For this she was smitten with leprosy, and, although healed at the intercession of Moses, was excluded for seven days from the camp (Num. xii.; Deut. xxiv. 9). Her death took place in the first month of the fortieth year after the Exodus, at the encampment of Kadesh-barnea (Num. xx. 1), where her sepulchre was still to be seen in the time of Eusebius.

MIRROR (Exod. xxxviii. 8; Job xxxii. 8). In the first of these passages the mirrors in the possession of the women of the Israelites, when

242. [Egyptian Metal Mirror.]

they quitted Egypt, are described as being of brass; for 'the laver of brass, and the foot of it,' are made from them. In the second, the garment is compared to 'a molten mirror.' In fact, all the mirrors used in ancient times were of metal; and as those of the Hebrew women in the wilderness were brought out of Egypt, they were doubtless of the same kind as those which have been found in the tombs of that country, and many of which now exist in our museums and collections of Egyptian antiquities. These are of mixed metals, chiefly copper, most carefully wrought and highly polished; and so admirably did the skill of the Egyptians succeed in the composition of metals, that this substitute for our modern looking-glass was susceptible of a lustre which has even been partially revived at the present day in some of those discovered at

Thebes, though buried in the earth for so many centuries. The mirror itself was nearly round, and was inserted in a handle of wood, stone, or metal, the form of which varied according to the taste of the owner.

MISH'AEI, one of the three companions of Daniel, who were cast into the burning furnace by Nebuchadnezzar, and were miraculously delivered from it (Dan. iii. 13-30). The Chaldean name was Meshech (Dan. i. 7).

MISH'PAT, a fountain in Kadesh [see KADESH].

MIS'REPHOTH-MA'IM, a place or district near Sidon (Josh. xi. 8; xiii. 6). The name means 'burnings of water,' which Kimchi understands of warm baths; but more probably it means burnings by or beside the water—either lime-kilns or smelting furnaces situated near water.

MITE, a small piece of money, two of which made a quadrans—four of the latter being equal

243. [Roman Quadrans.]

to the Roman *as*. The *as* was of less weight and value in later than in early times. Its original value was 3/4 farthings, and afterwards 2/4 farthings. The latter was its value in the time of Christ, and the mite being one-eighth of that sum, was little more than one-fourth of an English farthing. It was the smallest coin known to the Hebrews (Luke xii. 59).

MITHCAH, one of the encampments of the Israelites [WANDERING].

MITYLENE, the capital of the isle of Lesbos, in the Ægean Sea, about seven miles and a half from the opposite point on the coast of Asia Minor. It was a well-built town, but unwholesomely situated. It was the native place of Pittacus, Theophanes, Theophrastus, Sappho, Alcæus, and Diophanes. St. Paul touched at Mitylene in his voyage from Corinth to Judæa (Acts xx. 14). It does not appear that any Christian church was established at this place in the apostolic age. No mention is made of it in ecclesiastical history until a late period; and in the second century heathenism was so rife in Mitylene that a man was annually sacrificed to Dionysus. In the fifth, sixth, seventh, and eighth centuries, we, however, find bishops of Mitylene present at several councils. Mitylene still exists, and has given its name, in the form of Mytilini, to the whole island; but it is now a place of no importance.

MIZPAH. The word signifies a *watch-tower*, and is the name of several towns and places in lofty situations, whether furnished with a watch-tower or not.

1. MIZPAH, a town or city in Gilead (Judg. x. 17; xi. 11, 34; Hos. v. 1). The place originated in the heap of stones set up by Laban, and to which he gave his name (Gen. xxxi. 49). Some

confound this with the Mizpeh of Gilead in Judg. xi. 29; but it is better to distinguish them [MIZPEH 3].

2. MIZPAH, a city of Benjamin, where the people were wont to convene (Josh. xviii. 26; Judg. xx. 1, 3; xxi. 1; 1 Sam. vii. 5-16; x. 17, sq.). It was afterwards fortified by Asa, to protect the borders against the kingdom of Israel (1 Kings xv. 22; 2 Chron. xvi. 6). In later times it became the residence of the governor under the Chaldeans (Jer. xl. 6, sq.; comp. Neh. iii. 7, 15, 19). Its position is nowhere mentioned in Scripture or by Josephus; but it could not have been far from Ramah, since king Asa fortified it with materials taken from that place; and that it was situated on an elevated spot is clear from its name. Neby Samwil, a poor village seated upon the summit of an elevated ridge about four and a half miles N.N.W. from Jerusalem, is supposed to correspond with the position of Mizpah.

MIZPEH. This name has the same meaning and application as Mizpah, and is borne by several places mentioned in Scripture.

1. MIZPEH, a town in the plains of Judah (Josh. xv. 38). Eusebius and Jerome identify it with a place which, in their time, bore the name of Mapha, on the borders of Eleutheropolis southward, on the road to Ælia or Jerusalem.

2. MIZPEH, the place more usually called Mizpah, in the tribe of Benjamin, is once called Mizpeh (Josh. xviii. 26) [MIZPAH 2].

3. MIZPEH OF GILEAD, through or by which Jephthah passed in his pursuit of the Ammonites (Judg. xi. 29). Some think it the same with Mizpah 1; and it is possibly the same with the Ramath-mizpeh of Josh. xiii. 26.

4. MIZPEH, a valley in the region of Lebanon (Josh. xi. 8; comp. xi. 3).

MIZRAIM, or LAND OF MIZRAIM, the name by which, in Scripture, Egypt is generally designated, apparently from its having been peopled by Mizraim, the son of Ham (Gen. x.). This ancient title is still preserved in Misr, the existing Arabic name of the country [EGYPT].

MNA'SON, an 'old disciple,' with whom St. Paul lodged when at Jerusalem in A.D. 58 (Acts xxi. 16). He seems to have been a native or Cyprus, but an inhabitant of Jerusalem, like Jesus and Barnabas. Some think that he was converted by Paul and Barnabas while at Cyprus (Acts xiii. 9); but the designation 'an old disciple,' has more generally induced the conclusion that he was converted by Jesus himself, and was perhaps one of the seventy.

MOAB, son of Lot and his eldest daughter (Gen. xix. 30-38). He was born about the same time with Isaac, and became the founder of the Moabites.

MOABITES, a tribe descended from Moab the son of Lot, and consequently related to the Hebrews (Gen. xix. 37). Previous to the exodus or the latter from Egypt, the former, after expelling the original inhabitants, called Emims (Gen. xiv. 5; Deut. ii. 11), had possessed themselves of the region on the east of the Dead Sea and the Jordan, as far north as the river Jabbok. But the northern, and indeed the finest and best, portion of the territory, viz. that extending from the Jabbok to the Arnon, had passed into the hands of the Amorites, who founded there one of their kingdoms, with Heshbon for its capital (Num. xxi.

26). Og had established another at Bashan. Hence at the time of the exodus the valley and river Arnon constituted the northern boundary of Moab (Num. xxi. 13; Judg. xi. 18). As the Hebrews advanced in order to take possession of Canaan, they did not enter the proper territory of the Moabites (Deut. ii. 9; Judg. xi. 18), but conquered the kingdom of the Amorites (a Canaanitish tribe), which had formerly belonged to Moab; whence the western part, lying along the Jordan, frequently occurs under the name of 'plains of Moab' (Deut. i. 5; xxix. 1). The Moabites, fearing the numbers that were marching around them, showed them at least no kindness (Deut. xxiii. 3); and their king (Balak) hired Balaam to utter prophetic curses, which, however, were converted into blessings in his mouth (Num. xii. sq.). The Gadites now took possession of the northern portion of this territory, which the Amorites had wrested from the Moabites, and established themselves there; while the Reubenites settled in the southern part (Num. xxxii. 34; comp. Josh. xiii., which, however, differs somewhat in the designation of particular towns).

We see the first hostilities breaking out in the beginning of the period of the Judges, when the Hebrews had been for a long time tributary to the Moabites, but threw off their yoke under Ehud (Judg. iii. 12-30). Towards the end of this period, however, peace and friendship were restored, mutual honours were reciprocated (as the history of Ruth shows), and Moab appears often to have afforded a place of refuge to outcasts and emigrant Hebrews (Ruth i. 1; comp. 1 Sam. xxii. 3, 4; Jer. xl. 11; Isa. xvi. 2). After Saul had waged successful war against them (1 Sam. xiv. 47), David made them tributary (2 Sam. viii. 2, 12; xxiii. 20). The right to levy this tribute seems to have been transferred to Israel after the division of the kingdom; for upon the death of Ahab (about B.C. 896), they refused to pay the customary tribute of 100,000 lambs and as many rams (2 Kings i. 1; iii. 4; comp. Isa. xvi. 1). Jehoram (B.C. 896), in alliance with Judah and Edom, sought indeed to bring them back to their subjection. The invading army, after having been preserved from perishing by thirst through the intervention of Elisha, defeated the Moabites and ravaged the country; but, through the strange conduct of the king, in offering up in sacrifice his son [MESHA], were induced to retire without completing the object of the expedition. The Moabites deeply resented the part which the king of Judah took in this invasion, and formed a powerful confederacy with the Ammonites, Edomites, and others, who marched in great force into Judæa, and formed their camp at Engedi, where they fell out among themselves and destroyed each other, through the special interposition of Providence in favour of Jehoshaphat and his people (2 Kings iii. 4, sq.; comp. 2 Chron. xx. 1-30) [ELISHA; JEHOHAM; JEHOSEPHAT]. Under Jehoshaphat (B.C. 849) we see them undertake incursions into the kingdom of Israel, and carry on offensive war against it (2 Kings xiii. 20).

Though the subsequent history of Israel often mentions the Moabites, yet it is silent respecting a circumstance which, in relation to one passage, is of the greatest importance, namely, the re-conquest of the territory between the Arnon and the

Jabbok, which was wrested from the Moabites by the Amorites, and afterwards of the territory possessed by the tribes of Reuben and Gad. This territory in general we see, according to Isa. xvi., in the possession of the Moabites again. Even Selah, the ancient capital of the Edomites, seems likewise, from Isa. xvi. 1, to have belonged to them, at least for a time. The most natural supposition is, that, after the carrying away of those tribes into captivity, the Moabites occupied their territory; as it is expressly stated (Jer. xlix. 1-5) that the Amorites intruded themselves into the territory of the captive Gadites, as the Edomites did in respect to the Jews at a later period.

Still later, under Nebuchadnezzar, we see the Moabites acting as the auxiliaries of the Chaldeans (2 Kings xxiv. 2), and beholding with malicious satisfaction the destruction of a kindred people (Ezek. xxv. 8-11); yet, according to an account in Josephus (*Antiq.* x. 9. 7), Nebuchadnezzar, when on his way to Egypt, made war upon them, and subdued them, together with the Ammonites, five years after the destruction of Jerusalem.

That continual wars and contentions must have created a feeling of national hostility between the Hebrews and the Moabites, may be readily conceived. This feeling manifested itself on the part of the Hebrews, sometimes in bitter proverbs, sometimes in the denunciations of the prophets; on the part of the Moabites in proud boastings and expressions of contempt (Isa. xvi. 6).

Among the prophecies, however, that of Balaam (Num. xxii.-xxiv.) is above all remarkable, in which this ancient prophet (who withal was not an Israelite), hired by Moab to curse, is impelled by the Divine Spirit to bless Israel, and to announce the future destruction of Moab by a mighty hero in Israel (Num. xxiv. 17). The destruction of the Moabites for their scorn and contempt of Israel is predicted by Jeremiah, Ezekiel, Amos, and Zephaniah.

After the exile an intimate connection between the two nations had found place by means of intermarriages (Ezra ix. 1, sq.; Neh. xiii. 1), which, however, were dissolved by the theoretic zeal of Ezra. The last (chronologically) notice of the Moabites which occurs in Scripture is in Dan. xi. 41, which contains an obscure intimation of the escape of the Moabites from the overthrow with which neighbouring countries would be visited (*Antiq.* xiii. 15). Thenceforth their name is lost under that of the Arabians, as was also the case with Ammon and Edom. Until of late the accounts of the territory of Moab are uncommonly meagre, but within these few years it has been explored by various travellers, who have shed a new light on the topography of this region.

From their researches we learn that in the land of Moab, which lay to the east and south-east of Judæa, and which bordered on the east, north-east, and partly on the south of the Dead Sea, the soil is rather more diversified than that of Ammon; and, where the desert and plains of salt have not encroached upon its borders, of equal fertility. There are manifest and abundant signs of its ancient importance. The whole of the plains are covered with the sites of towns on every eminence or spot convenient for the construction of one; and as the land is capable of rich culti-

vation, there can be no doubt that the country, now so deserted, once presented a continued picture of plenty and fertility. The form of fields is still visible, and there are remains of Roman highways which are in some places completely paved, 'and on which there are milestones of the times of Trajan, Marcus Aurelius, and Severus, with the numbers of the miles legible upon them. Wherever any spot is cultivated the corn is luxuriant; and the frequency and almost, in many instances, the close vicinity of the sites of ancient towns, prove that the population of the country was formerly proportioned to its fertility. It was in its state of highest prosperity that the prophets foretold that the cities of Moab should become desolate, without any to dwell in them; and accordingly we find, that although the sites, ruins, and names of many ancient cities of Moab can be traced, not one of them exists at the present day as tenanted by man. The argument for the inspiration of the sacred records deducible from this, among other facts of the same kind, is produced with considerable force by Dr. Keith in his work on Prophecy.

MOLE (*choled*, Lev. xi. 29, in our version 'weasel'). Although the similarity of sound in names is an unsafe ground to depend upon when it is applied to specific animals, still, the Hebrew and Syriac appearing likewise to imply creeping into, creeping underneath by burrowing—characteristics most obvious in moles—and the Arabic denomination being *ndonud*, *choled* may be assumed to indicate the above animal. This conclusion is the more to be relied on as the animal is rather common in Syria, and in some places abundant. Zoologists have considered the particular species to be the *Talpa Europaea*, which, under the name of the common mole, is so well known as not to require a more particular description. The ancients represented the mole to have no eyes: which assertion later scientific writers believed they had disproved by showing our species to be possessed of these organs, though exceedingly small. Nevertheless, recent observations have proved that a species, in other respects scarcely, if at all, to be distinguished from the common, is totally destitute of eyes. It is to be found in Italy, and probably extends to the East, instead of the *Europaea*. Moles must not, however, be considered as forming a part of the Rodent order, whereof all the families and genera are provided with strong incisor teeth, like rats and squirrels, and therefore intended for subsisting chiefly on grain and nuts: they are on the contrary supplied with a great number of small teeth, to the extent of twenty-two in each jaw—indicating a partial regimen; for they feed on worms, larvae, and under-ground insects, as well as on roots, and thus belong to the insectivorous order: which brings the application of the name somewhat nearer to carnivora and its received interpretation 'weasel'.

MOLOCH, or rather **MOLECH**, is chiefly found in the Old Testament as the national god of the Ammonites, to whom children were sacrificed by fire. There is some difficulty in ascertaining at what period the Israelites became acquainted with this idolatry; yet various reasons render it probable that it was before the time of Solomon, the date usually assigned for its introduction. Nevertheless, it is for the first time directly stated that

Solomon erected a high-place for Molech on the Mount of Olives (1 Kings xi. 7); and from that period his worship continued uninterrupted there, or in Tophet, in the valley of Hinnom, until Josiah defiled both places (2 Kings xxiii. 10, 13). Jehoahaz, however, the son and successor of Josiah, again 'did what was evil in the sight of Jehovah, according to all that his fathers had done' (2 Kings xxiii. 32). The same broad condemnation is made against the succeeding kings, Jehoiakim, Jehoiachin, and Zedekiah; and Ezekiel, writing during the captivity, says, 'Do you, by offering your gifts, and by making your sons pass through the fire, pollute yourselves with all your idols *until this day*, and shall I be enquired of by you?' (xx. 31). After the restoration, all traces of this idolatry disappear.

It has been attempted to explain the terms in which the act of sacrificing children is described in the Old Testament so as to make them mean a mere passing between two fires, without any risk of life, for the purpose of purification. This theory—which owes its origin to a desire in some Rabbins to lessen the mass of evidence which their own history offers of the perverse idolatries of the Jews—is effectually declared untenable by such passages as Ps. cvi. 38; Jer. vii. 31; Ezek. xvi. 20; xxiii. 37; the last two of which may also be adduced to show that the victims were slaughtered before they were burnt.

MONEY. This term is used to denote whatever commodity the inhabitants of any country may have agreed or are compelled to receive as an equivalent for their labour, and in exchange for other commodities.

Different commodities have been used as money in the primitive state of society in all countries, such as skins, cattle, corn, dried fish, sugar, and salt. A long period of time must have intervened between the first introduction of the precious metals into commerce, and their becoming generally used as money. The peculiar qualities which so eminently fit them for this purpose would only be gradually discovered. They would probably be first introduced in their gross and unrefined state. A sheep, an ox, a certain quantity of corn, or any other article, would afterwards be bartered or exchanged for pieces of gold or silver in bars or ingots, in the same way as they would formerly have been exchanged for iron, copper, cloth, or anything else. The merchants would soon begin to estimate their proper value, and, in effecting exchanges, would first agree upon the quality of the metal to be given, and then the quantity which its possessor had become bound to pay would be ascertained by weight. This, according to Aristotle and Pliny, was the manner in which the precious metals were originally exchanged in Greece and Italy. The same practice is still observed in different countries. In many parts of China and Abyssinia the value of gold and silver is always ascertained by weight. Iron was the first money of the Lacedæmonians, and copper of the Romans.

In the sacred writings there is frequent mention of gold, silver, and brass, sums of money, purchases made with money, current money, and money of a certain weight. Indeed, the money of Scripture is all estimated by weight. 'Abraham weighed to Ephron the silver which he had named in the audience of the sons of Heth, four hundred

shekels of silver, current money with the merchant' (Gen. xxiii. 19). The brethren of Joseph carried back into Egypt the money 'in full weight' which they had found in their sacks (Gen. xliii. 21). (See also Gen. xxiv. 22; Jer. xxxii. 9; Amos viii. 5; Deut. xxv. 13). It was customary for the Jews to have scales attached to their girdles for weighing the gold and silver they received; but the Canaanites carried them in their hands.

There is no direct allusion in the sacred writings to coined money as belonging to the Jewish nation. In Gen. xxxiii. 19, Jacob is said to have bought a part of a field 'for an hundred pieces of money;' and the friends of Job are said to have given him each 'a piece of money' (Job xlii. 11). The term in the original is *kesitoh*, and is by some thought to denote 'sheep' or 'lamb;' by others a kind of money having the impression of a sheep or lamb; and by others again a purse of money. The most correct translation may be presumed to be that which favours the idea of a piece of money bearing some stamp or mark indicating that it was of the value of a sheep or lamb. Maurice, in his *Antiquities of India* (vol. vii.), bears testimony to the fact that the earliest coins were stamped with the figure of an ox or sheep. In the British Museum there is a specimen of the original Roman As, the surface of which is nearly the size of a brick, with the figure of a bull impressed upon it. Other devices would suggest themselves to different nations as arising out of, or connected with, particular places or circumstances, as the Babylonish lion, Egina's tortoise, Bœotia's shield, the lyre of Mitylene, the wheat of Metapontum. Religion would also at an early period claim to be distinguished, and accordingly the effigies of Juno, Diana, Ceres, Jove, Hercules, Apollo, Bacchus, Pluto, Neptune, and many other of the heathen deities are found impressed upon the early coins. The Jews, however, were the worshippers of the one only true God; idolatry was strictly forbidden in their law; and therefore their shekel never bore a head, but was impressed simply with the almond rod and the pot of manna.

244.

The first Roman coinage took place, according to Pliny (*Hist. Nat.* xxxiii. 3), in the reign of Servius Tullius, about 550 years before Christ; but it was not until Alexander of Macedon had subdued the Persian monarchy, and Julius Cæsar had consolidated the Roman empire, that the image of a living ruler was permitted to be stamped upon the coins. Previous to that period heroes and deities alone gave currency to the money of imperial Rome.

Antiochus Sidetes, king of Syria, is represented to have granted to Simon Maccabæus the privilege of coining money in Judæa (1 Macc. xv. 6). This

is considered to be the first mention of Hebrew money, properly so called. It consisted of shekels and demi-shekels, the third part of a shekel, and the quarter of a shekel, of silver.

From the time of Julius Cæsar, who first struck a living portrait on his coins, the Roman coins run in a continued succession of so-called Cæsars, their queens and crown-princes, from about B.C. 48 down to Romulus Augustulus, emperor of the West, who was dethroned by Odoacer about A.D. 475.

After its subjugation by Rome much foreign money found its way into the land of Judæa. The piece of tribute money, or coin mentioned in Luke xx. 24, as presented to our Saviour, bore the image and superscription of the Roman emperor, and it is reasonable to suppose that a large quantity of Roman coin was at that time in circulation throughout Judæa.

MONEY CHANGERS. It is mentioned by Volney that in Syria, Egypt, and Turkey, when any considerable payments are to be made, an agent of exchange is sent for, who counts paras by thousands, rejects pieces of false money, and weighs all the sequins either separately or together. It has hence been suggested that the 'current money with the merchant,' mentioned in Scripture (Gen. xxiii. 16), might have been such as was approved of by competent judges whose business it was to detect fraudulent money if offered in payment. It appears that there were bankers or money-changers in Judæa, who made a trade of receiving money in deposit and paying interest for it (Matt. xxv. 27). Some of them had even established themselves within the precincts of the temple at Jerusalem (xxi. 12), where they were in the practice of exchanging one species of money for another. Persons who came from a distance to worship at Jerusalem would naturally bring with them the money current in their respective districts, and it might therefore be a matter of convenience for them to get this money exchanged at the door of the temple for that which was current in Jerusalem, and upon their departure to receive again that species of money which circulated in the districts to which they were journeying. These money-changers would, of course, charge a commission upon all their transactions, but from the observation of our Saviour, when he overthrew the tables of those in the temple, it may be inferred that they were not distinguished for honesty and fair dealing: 'It is written, my house shall be called the house of prayer, but ye have made it a den of thieves' (ver. 13).

MOON. The worship of the heavenly bodies was among the earliest corruptions of religion, which would naturally take its rise in the eastern parts of the world, where the atmosphere is pure and transparent, and the heavens as bright as they are glowing. In these countries the moon is of exceeding beauty. If the sun 'rules the day,' the moon has the throne of night, which, if less gorgeous than that of the sun, is more attractive, because of a less oppressively brilliant light, while her retinue of surrounding stars seems to give a sort of truth to her regal state, and certainly adds not inconsiderably to her beauty. The moon was therefore worshipped as a goddess in the East at a very early period; in India under the name of Maja; among the Assyrians at

Mylitta; with the Phœnicians she was termed Astarte or Ashteroth, who was also denominated the Syrian mother. The Greeks and Romans worshipped her as Artemis and Diana. Job (xxx. 26) alludes to the power of the moon over the human soul: 'If I beheld the sun when it shined, or the moon walking in brightness, and my heart hath been secretly enticed, or my mouth hath kissed my hand: this also were an iniquity, for I should have denied the God that is above.' The moon, as being mistress of the night, may well have been considered as the lesser of the two great lights of heaven (Gen. i. 16). It was accordingly regarded in the old Syrian superstition as subject to the sun's influence, which was worshipped as the active and generative power of nature, while the moon was revered as the passive and producing power. The moon, accordingly, was looked upon as feminine. Herein Oriental usage agrees with our own. But this usage was by no means universal.

The epithet 'queen of heaven' appears to have been very common. Nor was it, any more than the worship of the moon, unknown to the Jews, as may be seen in a remarkable passage in Jeremiah (xlv. 17), where the Israelites (men and women, the latter exert most influence) appear given over to this species of idolatry: 'We will certainly burn incense to the *queen of heaven*, and pour out drink-offerings unto her, as we have done, we and our fathers; for then had we plenty of victuals, and were well, and saw no evil. But since we left off to burn incense to the queen of heaven, we have wanted all things.' The last verse of the passage adds to the burnt-offerings and drink-offerings, 'cakes to worship her.' Vows were also made by the Jews to the moon, which superstition required to be fulfilled (ver. 25).

The baneful influence of the moon still finds credence in the East. Moonlight is held to be detrimental to the eyes. In Ps. cxxi. 6 we read, 'The sun shall not smite thee by day, nor the moon by night'; so that the impression that the moon may do injury to man is neither partial nor vague. Rosenmüller refers this to the cold of night, which, he says, is very great and sensible in the East, owing, partly, to the great heat of the day. If this extreme (comparative) cold is considered in connection with the Oriental custom of sleeping out of doors, on the flat roofs of houses, or even on the ground, without in all cases sufficient precautionary measures for protecting the frame, we see no difficulty in understanding whence arose the evil influence ascribed to the moon.

MOON, NEW. [FESTIVALS.]

MORDECAI (supposed to come from the Persian word signifying *little man*, *mannikin*; or, according to others, from the idol *Merodach*, thus signifying a *votary of Merodach*). The last supposition is not unlikely, seeing that Daniel had the Chaldean name of Belshazzar, son of Jair, of the tribe of Benjamin, descended from one of the captives transported to Babylon with Jehoiachin (Esth. ii. 5). He was resident at Susa, then the metropolis of the Persian empire, and had under his care his niece Hadessa, otherwise Esther, at the time when the fairest damsels of the land were gathered together, that from among them a fitting successor to queen Vashti might be

selected for king Ahasuerus. Among them was Esther, and on her the choice fell; while, by what management we know not, her relationship to Mordecai, and her Jewish descent, remained unknown at the palace. The uncle lost none of his influence over the niece by her elevation, although the seclusion of the royal harem excluded him from direct intercourse with her. He seems to have held some office about the court; for we find him in daily attendance there, and it appears to have been through this employment that he became privy to a plot of two of the chamberlains against the life of the king, which through Esther he made known to the monarch. This great service was however suffered to pass without reward at the time. On the rise of Haman to power at court, Mordecai alone, of all the nobles and officers who crowded the royal gates, refused to manifest the customary signs of homage to the royal favourite. It would be too much to attribute this to an independence of spirit, which, however usual in Europe, is unknown in Eastern courts. Haman was an Amalekite; and Mordecai brooked not to bow himself down before one of a nation which from the earliest times had been the most devoted enemies of the Jewish people. The Orientals are tenacious of the outward marks of respect, which they hold to be due to the position they occupy; and the erect mien of Mordecai among the bending courtiers escaped not the keen eye of Haman. He noticed it, and brooded over it from day to day: he knew well the class of feelings in which it originated, and—remembering the eternal enmity vowed by the Israelites against his people, and how often their conquering sword had all but swept his nation from the face of the earth—he vowed by one great stroke to exterminate the Hebrew nation, the fate of which he believed to be in his hands. The temptation was great, and to his ill-regulated mind irresistible. He therefore procured the well-known and bloody decree from the king for the massacre of all the Israelites in the empire in one day. When this decree became known to Mordecai, he covered himself with sackcloth and ashes, and rent the air with his cries. This being made known to Esther through the servants of the harem, who now knew of their relationship, she sent Hatach, one of the royal eunuchs, to demand the cause of his grief: through that faithful servant he made the facts known to her, urged upon her the duty of delivering her people, and encouraged her to risk the consequences of the attempt. She was found equal to the occasion. She risked her life by entering the royal presence uncalled, and having by discreet management procured a favourable opportunity, accused Haman to the king of plotting to destroy her and her people. His doom was sealed on this occasion by the means which in his agitation he took to avert it; and when one of the eunuchs present intimated that this man had prepared a gallows fifty cubits high on which to hang Mordecai, the king at once said, 'Hang him thereon.' This was, in fact, a great aggravation of his offence, for the previous night, the king, being unable to sleep, had commanded the records of his reign to be read to him; and the reader had providentially turned to the part recording the conspiracy which had been frustrated through Mordecai. The king asked what

had been the reward of this mighty service, and being answered 'Nothing,' he commanded that any one who happened to be in attendance without, should be called. Haman was there, having come for the very purpose of asking the king's leave to hang Mordecai upon the gallows he had prepared, and was asked what should be done to the man whom the king delighted to honour? Thinking that the king could delight to honour no one but himself, he named the highest and most public honours he could conceive, and received from the monarch the astounding answer, 'Make haste, and do even so to Mordecai that sitteth in the king's gate!' Then was Haman constrained, without a word, and with seeming cheerfulness, to repair to the man whom he hated beyond all the world, to invest him with the royal robes, and to conduct him in magnificent cavalcade through the city, proclaiming, 'Thus shall it be done to the man whom the king delighteth to honour.' After this it may seem that it was a strong sense of the fitness of the case for the literal application of the *lex talionis*, that induced the king, when he heard of the gallows prepared for Mordecai, to command that Haman himself should be hanged thereon.

Mordecai was invested with power greater than that which Haman had lost, and the first use he made of it was, as far as possible, to neutralize or counteract the decree obtained by him. It could not be recalled, as the kings of Persia had no power to rescind a decree once issued; but as the altered wish of the court was known, and as the Jews were permitted to stand on their defence, they were preserved from the intended destruction, although much blood was, on the appointed day, shed even in the royal city. The Feast of Purim was instituted in memory of this deliverance, and is celebrated to this day (Esth. ii. 5; x.) [PURIM].

A Mordecai, who returned from the exile with Zerubbabel, is mentioned in Ezra ii. 2, and Neh. vii. 7; but this cannot well have been the Mordecai of Esther, as some have supposed.

MOR'AH, one of the hills of Jerusalem, on which the temple was built by Solomon (2 Chron. iii. 1). The name seldom occurs, being usually included in that of Zion, to the north-east of which it lay, and from which it was separated by the valley of Tyropæon (Joseph. *Antiq.* viii. 3-9) [JERUSALEM]. THE LAND OF MORIAH, whither Abraham went to offer up Isaac (Gen. xxii. 2), is generally supposed to denote the same place, and may at least be conceived to describe the surrounding district. The Jews themselves believe that the altar of burnt-offerings in the temple stood upon the very site of the altar on which the patriarch purposed to sacrifice his son.

MOSE'RAH, MOSEROTH, a station of the Israelites near Mount Hor (Num. xxxiii. 30) [WANDERING].

MO'SES, the lawgiver of Israel, belonged to the tribe of Levi, and was a son of Amram and Jochebed (Exod. vi. 20). According to Exod. ii. 10, the name means *drawn out of water*, and is therefore a significant memorial of the marvellous preservation of Moses when an infant, in spite of those Pharaonic edicts which were promulgated in order to lessen the number of the Israelites. It was the intention of divine pro-

vidence that the great and wonderful destiny of the child should be from the first apparent; and what the Lord had done for Moses he intended also to accomplish for the whole nation of Israel.

It was an important event that the infant Moses, having been exposed near the banks of the Nile, was found there by an Egyptian princess; and that, having been adopted by her, he thus obtained an education at the royal court (Exod. ii. 1-10). Having been taught all the wisdom of the Egyptians (Acts vii. 22; comp. Joseph. *Antiq.* ii. 9. 7), the natural gifts of Moses were fully developed, and he thus became in many respects better prepared for his future vocation.

After Moses had grown up, he returned to his brethren, and, in spite of the degraded state of his people, manifested a sincere attachment to them. He felt deep compassion for their sufferings, and showed his indignation against their oppressors by slaying an Egyptian whom he saw ill treating an Israelite. This doubtful act became by Divine Providence a means of advancing him further in his preparation for his future vocation, by inducing him to escape into the Arabian desert, where he abode for a considerable period with the Midianitish prince, Jethro, whose daughter Zipporah he married (Exod. ii. 11, sq.). Here, in the solitude of pastoral life, he was appointed to ripen gradually for his high calling, before he was unexpectedly and suddenly sent back among his people, in order to achieve their deliverance from Egyptian bondage.

His entry upon this vocation was not in consequence of a mere natural resolution of Moses, whose constitutional timidity and want of courage rendered him disinclined for such an undertaking. An extraordinary divine operation was required to overcome his disinclination. On Mount Horeb he saw a burning thorn-bush, in the flame of which he recognised a sign of the immediate presence of Deity, and a divine admonition induced him to resolve upon the deliverance of his people. He returned into Egypt, where neither the dispirited state of the Israelites, nor the obstinate opposition and threatenings of Pharaoh, were now able to shake the man of God.

Supported by his brother Aaron, and commissioned by God as his chosen instrument, proving, by a series of marvellous deeds, in the midst of heathenism, the God of Israel to be the only true God, Moses at last overcame the opposition of the Egyptians. According to a divine decree, the people of the Lord were to quit Egypt, under the command of Moses, in a triumphant manner. The punishments of God were poured down upon the hostile people in an increasing ratio, terminating in the death of the firstborn, as a sign that all had deserved death. The formidable power of paganism, in its conflict with the theocracy, was obliged to bow before the apparently weak people of the Lord. The Egyptians paid tribute to the emigrating Israelites (Exod. xii. 35), who set out laden with the spoils of victory.

The enraged king vainly endeavoured to destroy the emigrants. Moses, firmly relying upon miraculous help from the Lord, led his people through the Red Sea into Arabia, while the host of Pharaoh perished in its waves (Exod. xii. xv.).

After this began the most important functions of Moses as the lawgiver of the Israelites, who were destined to enter into Canaan as the people of promise, upon whom rested the ancient blessings of the patriarchs. By the instrumentality of Moses they were appointed to enter into intimate communion with God through a sacred covenant, and to be firmly bound to him by a new legislation. Moses, having victoriously repulsed the attack of the Amalekites, marched to Mount Sinai, where he signally punished the defection of his people, and gave them the law as a testimony of divine justice and mercy. From Mount Sinai they proceeded northward to the desert of Paran, and sent spies to explore the Land of Canaan (Num. x.-xiii.). On this occasion broke out a violent rebellion against the lawgiver, which he, however, by divine assistance, energetically repressed (Num. xiv.-xvi.).

The Israelites frequently murmured, and were disobedient during about forty years. In a part of the desert of Kadesh, which was called Zin, near the boundaries of the Edomites, after the sister of Moses had died, and after even the new generation had, like their fathers, proved to be obstinate and desponding, Moses fell into sin, and was on that account deprived of the privilege of introducing the people into Canaan. He was appointed to lead them only to the boundary of their country, to prepare all that was requisite for their entry into the land of promise, to admonish them impressively, and to bless them.

It was according to God's appointment that the new generation also, to whom the occupation of the country had been promised, should arrive at their goal only after having vanquished many obstacles. Even before they had reached the real boundaries of Canaan they were to be subjected to a heavy and purifying trial. It was important that a man like Moses was at the head of Israel during all these providential dispensations. His authority was a powerful preservative against despondency under heavy trials.

Having in vain attempted to pass through the territory of the Edomites, the people marched round its boundaries by a circuitous and tedious route. Two powerful kings of the Amorites, Sihon and Og, were vanquished. Moses led the people into the fields of Moab over against Jericho, to the very threshold of Canaan (Num. xx., xxi.).

Moses happily averted the danger which threatened the Israelites on the part of Midian (Num. xxv.-xxxi.). Hence he was enabled to grant to some of the tribes permanent dwellings in a considerable tract of country situated to the east of the river Jordan (Num. xxxii.), and to give to his people a foretaste of that well-being which was in store for them.

Moses made excellent preparations for the conquest and distribution of the whole country, and took leave of his people with powerful admonitions and impressive benedictions, transferring his government to the hands of Joshua, who was not unworthy to become the successor of so great a man. With a longing but gratified look, he surveyed, from the elevated ground on the border of the Dead Sea, the beautiful country destined for his people.

Moses died in a retired spot at the age of one hundred and twenty years. He remained vigor-

ous in mind and body to the last. His body was not buried in the promised land, and his grave remained unknown, lest it should become an object of superstitious and idolatrous worship.

The Pentateuch is the greatest monument of Moses as an author. The ninetyeth psalm also seems to be correctly ascribed to him. Some learned men have endeavoured to prove that he was the author of the book of Job, but their arguments are inconclusive [Jon].

Numerous traditions, as might have been expected, have been current respecting so celebrated a personage. Some of these were known to the ancient Jews, but most of them occur in later rabbinical writers.

The name of Moses is celebrated among the Arabs also, and is the nucleus of a mass of legends. The Greek and Roman classics repeatedly mention Moses, but their accounts contain the authentic Biblical history in a greatly distorted form.

MOTH occurs in Job iv. 19; xiii. 28; xxvii. 18; Isa. i. 9; li. 8; Hosea v. 12; Matt. vi. 19, 20; Luke xii. 33; Eccles. xix. 3; xlii. 13. There is no Biblical insect whose identity is better ascertained. The following allusions to the moth occur in Scripture:—to its being produced in clothes—'for from garments cometh a moth' (Eccles. xlii. 13); to its well-known fragility—'mortal men are crushed before the moth' (Job iv. 19), literally 'before the face of the moth'. The allusion to 'the house of the moth' (Job xxvii. 18) seems to refer plainly to the silky spindle-shaped case, covered with detached hairs and particles of wool, made and inhabited by the larva of the *Tinea sarcitella*; or to the felted case or tunnel formed by the larva of the *Tinea pellionella*; or to the arched gallery formed by eating through wool by the larva of the *Tinea tapetzella*. References occur to the destructiveness of the clothes-moth: 'as a garment that is moth-eaten' (Job xii. 28); 'the moth shall eat them up' (Isa. i. 9); 'the moth shall eat them up like a garment' (li. 8); 'I will be to Ephraim as a moth,' i. e. will secretly consume him (Hos. v. 12); comp. Matt. vi. 19, 20; Luke xii. 33; James v. 2, metaphorically. Since the 'treasures' of the Orientals, in ancient times, consisted partly of 'garments, both new and old' (Matt. xiii. 32; and comp. Josh. vii. 21; Judg. xiv. 12), the ravages of the clothes-moth afforded them a lively emblem of destruction. Moths, like fleas, &c., amid other more immediate purposes of their existence, incidentally serve as a stimulus to human industry and cleanliness; for, by a remarkable discrimination in her instinct, the parent moth never deposits her eggs in garments frequently overlooked or kept clean. Indeed, the most remarkable of all proofs of animal intelligence is to be found in the larvæ of the water-moth, which get into straws, and adjust the weight of their case so that it can always float: when too heavy they add a piece of straw or wood, and when too light a bit of gravel.

MOTHER. The ordinary applications of the word require no illustration; but the following points of Hebrew usage may be noticed. When the father had more than one wife, the son seems to have confined the title of 'mother' to his real mother, by which he distinguished her from the other wives of his father. Hence the source of

Joseph's peculiar interest in Benjamin is indicated in Gen. xliii. 29, by his being 'his mother's son.' The other brethren were the sons of his father by other wives. Nevertheless, when this precision was not necessary, the step-mother was sometimes styled mother. Thus Jacob (Gen. xxxvii. 10) speaks of Leah as Joseph's mother, for his real mother had long been dead. The step-mother was however more properly distinguished from the womb-mother by the name of 'father's wife.' The word 'mother' was also, like father, brother, sister, employed by the Hebrews in a somewhat wider sense than is usual with us. It is used of a grandmother (1 Kings xv. 10), and even of any female ancestor (Gen. iii. 20); of a benefactress (Judg. v. 7), and as expressing intimate relationship (Job xvii. 14). In Hebrew, as in English, a nation is considered as a mother, and individuals as her children (Isa. i. 1; Jer. i. 12; Ezek. xix. 2; Hos. ii. 4; iv. 5); so our 'mother-country,' which is quite as good as 'father-land,' which we seem beginning to copy from the Germans. Large and important cities are also called mothers, i. e. 'mother-cities,' with reference to the dependent towns and villages (2 Sam. xx. 19), or even to the inhabitants, who are called her children (Isa. iii. 12; xlix. 23) [WOMAN].

MOUNTAINS. The mountains mentioned in Scripture are noticed under their different names, and a general statement with reference to the mountains of Palestine is given under that head. We have therefore in this place only to notice more fully some remarkable symbolical or figurative uses of the word in the Bible.

In Scripture the governing part of the body politic appears under symbols of different kinds. If the allegory or figurative representation is taken from the heavens, the luminaries denote the governing body; if from an animal, the head or horns; if from the earth, a mountain or fortress; and in this case the capital city or residence of the governor is taken for the supreme power. These mutually illustrate each other. For a capital city is the head of the political body; the head of an ox is the fortress of the animal; mountains are the natural fortresses of the earth; and therefore a fortress or capital city, though seated in a plain, may be called a mountain. Thus the words head, mountain, hill, city, horn, and king, are used in a manner as synonymous terms to signify a kingdom, monarchy, or republic, united under one government, only with this difference, that it is to be understood in different respects; for the term head represents it in respect of the capital city; mountain or hill in respect of the strength of the metropolis, which gives law to, or is above, and commands the adjacent territory. When David says, 'Lord, by thy favour thou hast made my mountain to stand strong' (Ps. xxx. 7), he means to express the stability of his kingdom.

It is according to these ideas that the kingdom of the Messiah is described under the figure of a mountain (Isa. ii. 2; xi. 9; Dan. ii. 35), and its universality by its being the resort of all nations, and by its filling the whole earth. The mystic mountains in the Apocalypse denote kingdoms and states subverted to make room for the Messiah's kingdom (Rev. vi. 14; xvi. 20).

The Chaldean monarchy is described as a

mountain in Jer. li. 25; Zech. iv. 7. In this view, then, a mountain is the symbol of a kingdom, or of a capital city with its domains, or of a king, which is the same.

Mountains are frequently used to signify places of strength, of what kind soever, and to whatsoever use applied (Jer. iii. 23).

Eminences were very commonly chosen for the sites of pagan temples: these became places of asylum, and were looked upon as the fortresses and defenders of the worshippers, by reason of the presence of the false deities in them. On this account mountains were the strongholds of paganism, and therefore in several parts of Scripture they signify idolatrous temples and places of worship (Jer. ii. 23; Ezek. vi. 2-6; Mic. iv. 1; comp. Deut. xii. 2; Jer. ii. 20; iii. 16; Ezek. vi. 3).

MOURNING. This head embraces both the outward expressions of sorrow for the dead, referred to in the Scriptures, and those expressions which were intended to exhibit repentance, &c. These subjects may be noticed according to Townsend's chronological arrangement, and since they nearly approximate, will be pursued together. Under this arrangement, the earliest reference to any kind of mourning is that of Job (n.c. 2130), who, being informed of the destruction of his children as the climax of his calamities, 'arose, rent his mantle, shaved his head, and fell down upon the ground and worshipped' (Job i. 20), uttered sentiments of submission (ver. 21), and sat down among the ashes (ch. ii. 8). His friends came to him by an appointment among themselves to mourn with him and comfort him (ver. 11); they lift up their voices and wept upon a view of his altered appearance; they rent every man his mantle and sprinkled dust upon their heads towards heaven (ver. 12), and sat down with him on the ground seven days and seven nights, waiting till his grief should subside before they commenced their office as mourners. Job then bewails alone his unhappy condition (ch. iii.). In ch. xvi. 15, 16, reference is made to the customs of sewing sackcloth upon the skin, defiling the head with dust, and suffering the face to be begrimed with weeping. Clamour in grief is referred to (xix. 7; xx. 28): it is considered a wicked man's portion that his widows shall not weep at his death (xxvii. 15). However it is to be accounted for, in the course of the book of Job nearly all the chief characteristics of eastern mourning are introduced. This will appear as we proceed. The next instance is that of Abraham, who came to mourn and weep for Sarah (n.c. 1871), words which denote a formal mourning (Gen. xxiii. 2). Days of mourning are referred to in regard to the expected death of Isaac (Gen. xxvii. 41). These appear generally to have consisted of seven, as for Saul (1 Sam. xxxi. 13). Weeping appears (n.c. 1729), either as one chief expression of mourning, or as the general name for it. Hence when Deborah, Rebecca's nurse, was buried at Bethel under an oak, at this period, the tree was called Allon-baebeth, the oak of weeping (Gen. xxxv. 8). The children of Israel were heard to weep by Moses throughout their families, every man in the door of his tent (Num. xi. 10; comp. xiv. 1; xxv. 6). So numerous are the references to tears in the Scriptures as to give the impression that the Orientals had them nearly at

command (comp. Ps. vi. 6). Reuben rent his clothes upon finding Joseph gone (Gen. xxxvii. 29), and uttered lamentations (ver. 30). Jacob rends his clothes and puts sackcloth upon his loins, and mourns for his son many days; his sons and his daughters rise up to comfort him, and he gives utterance to his grief; 'thus his father wept for him' (Gen. xxxvii. 34, 35). Joseph's brothers rend their clothes (Gen. xlv. 13); and this act, as expressive of grief or horror, occurs in multitudes of passages down to the last age of the Jewish empire (Acts xiv. 14). Scarcely less numerous are the references to sackcloth on the loins as an expression of mourning; we have even lying in sackcloth (1 Kings xxi. 27), and sackcloth upon both man and beast at Nineveh (Jonah iii. 8). Joseph's brethren fell to the ground before him in token of grief (Gen. xlv. 14); and this, or lying or sitting on the ground, was a common token of mourning (comp. Ps. xxxv. 14; 1 Sam. xxv. 24; Isa. iii. 26; xlvii. 1; Ezek. xxvi. 16, &c.). The next incident in the history of the subject is the mourning for Jacob by the Egyptians, which was conducted, no doubt, by professional mourners during threescore and ten days (Gen. l. 3), called the days of mourning (ver. 4), though most likely that computation includes the process of embalming. It seems to have amounted to a royal mourning, doubtless out of regard to Joseph. The mourning for Joseph's father was renewed by Joseph's command, with a very great and sore lamentation, upon the funeral cavalcade having arrived in Canaan, and continued seven days (ver. 10). When the children of Israel (n.c. 1491) mourned under the threat of the divine displeasure, they did not put on their ornaments (Exod. xxxiii. 4; comp. Joel ii. 16; Ezek. xxiv. 17). At the giving of the law the modes of mourning were regulated by several enactments. It was forbidden the Jews to make cuttings in their flesh for the dead (Lev. xix. 28). The ancient Egyptians, according to Herodotus, did not cut themselves (ii. 61); it was a Syrian custom, as appears from the votaries of Baal (1 Kings xviii. 28); nor were the Jews allowed to make any baldness between their eyes for the dead (Deut. xiv. 1). The priests were forbidden to uncover the head in mourning (Lev. x. 6), or to rend their clothes, or to contract the ceremonial defilement involved in mourning except for their nearest kindred (Lev. xxi. 1, 4); but the high-priest was entirely forbidden to do so even for his father or his mother (ver. 11), and so was the Nazarite (Num. vi. 7). These prohibitions respecting the head and the beard (Lev. xix. 27) seem to have been restricted to funeral occasions, as the customs referred to were lawfully practised on other sorrowful events (comp. Ezra ix. 3; Job i. 20; Isa. xxii. 12; Jer. vii. 29; Micah i. 16). Even the food eaten by mourners was considered unclean (comp. Deut. xxvi. 14, with Hos. ix. 4; Ezek. xxiv. 17). The Jews were commanded to afflict their souls on the day of atonement (Lev. xxiii. 27), and at the Feast of Trumpets (Num. xxix. 7). All the house of Israel mourned for Aaron thirty days (Num. xx. 29). The Israelites wept for Moses thirty days, called the days of weeping and mourning for Moses (Deut. xxxiv. 8; n.c. 1451). Joshua and the elders of Israel put dust upon their heads at the defeat of Ai, and fasted (Josh. vii. 6), as did the eleven tribes

after the defeat at Gibeah, and wept (Judg. xx. 26), as did all the Israelites at the command of Joshua, on which occasion it is said 'they drew water and poured it out before the Lord' (1 Sam. vii. 6; comp. Ps. xxii. 14). The prophet Joel commanded a fast as part of a national mourning. A fast is proclaimed to all the inhabitants or visitors at Jerusalem (Jer. xxxvi. 9; comp. Zech. vii. 5). Fasting is practised at Nineveh as part of a public humiliation (Jonah iii. 5). In our Lord's language, 'to fast' and 'to mourn' are the same thing (Matt. ix. 15). Public humiliations attended with religious assemblies and prayers (Joel ii. 16, 17); with fasts (Isa. lviii. 3); see all these united (1 Mac. iii. 44, 47, 48). The first complete description of mourning for the dead occurs in 2 Sam. iii. 31, 35. Elegies were composed by the prophets on several disastrous occasions (Ezek. xxvi. 1-18; xxvii. 1-36; Amos v. 1, &c.). In Ps. xxxv., which is ascribed to David, there is a description of the humiliations practised by the friends of the sick, in order to procure their recovery. Samuel is honoured with a public mourning by the Israelites (1 Sam. xxv. 1), b.c. 1058. Upon the death of Saul, David wrote an elegy (2 Sam. i. 17-27). This, like that upon the death of Abner, seems to be a poetical description of the character of the departed, like the dirge for an Egyptian king. Lifting up the hands seems to have been an expression of grief (Ps. cxli. 2; Lam. i. 17; Ezra ix. 5). Messengers were sent to condole with survivors; thus David sent such to Hanun, king of Ammon, upon the death of his father (2 Sam. x. 1, 2); 'Many of the Jews came to comfort Martha and Mary' (John xi. 19); 'A great company of women attended our Lord to the cross, bewailing and lamenting him' (Luke xxiii. 27); 'Much people' were with the widow of Nain (Luke vii. 12). Indeed, if persons met a funeral procession they were expected to join it—a custom which is thought to illustrate St. Paul's words, 'Weep with them that weep' (Rom. xii. 15). Ashes were often laid on the head in token of mourning; thus 'Tamar put ashes on her head, rent her garment, and laid her hand upon her head, and went on crying' (2 Sam. xiii. 19, 20; comp. Isa. lxi. 3; 2 Esdras ix. 38). They even wallowed in ashes (Ezek. xxvii. 30). Mourning apparel is first mentioned in 2 Sam. xiv. 2, where it appears that the wearer did not anoint himself with oil (comp. Matt. vi. 17). The first reference to hired mourners occurs in Eccles. xii. 5, 'The mourners go about the streets.' They are certainly alluded to in Jer. ix. 17-20, 'the mourning women' (probably widows, comp. Ps. lxxvii. 64; Acts ix. 39). Another reference to them occurs in 2 Chron. xxxv. 25. The greater number of the mourners in ancient Egypt were women, as in the modern East. In the following cut (No. 245) mourners, all females, are shown casting dust upon their heads before the mummy of a man. Mourning for the dead was conducted in a tumultuous manner; they also wept and wailed greatly (Mark v. 38). Even devout men made great lamentations (Acts viii. 2).

Among other signs of mourning they shaved the head, and even tore off the hair (Amos viii. 10; Micah i. 16; Isa. xv. 2; xxii. 12; Jer. vi. 29). Ezra plucked off the hair of his head and of his beard (Ezra ix. 3; Joseph. *Antiq.* xvi. 7. 5).

The Jews went up to the house-tops to mourn (Isa. xv. 2, 3; xxii. 1); and so did the Moabites

245. [Egyptian Mourners—sashes on Head.]

(Jer. xlviii. 37, 38; Judith viii. 5). They also made cuttings in their hands (Jer. xlviii. 37, 38); they smote upon the thigh (Jer. xxxi. 19; Ezek. xxi. 12); on the breast (Nahum i. 7; Luke xviii. 13; xxiii. 48); they smote both hands together (Num. xxiv. 10), stamped with the foot (Ezek. vi. 11), bowed down the head (Lam. ii. 10), covered the lips (Micah iii. 7), the face (2 Sam. xix. 4), and the head (2 Sam. xv. 30), and went barefoot (2 Sam. xv. 30). Neighbours and friends provided food for the mourners (2 Sam. iii. 35; Jer. xvi. 7; comp. Ezek. xxiv. 17); this was

246. [Wail with Tabrets, &c.]

called 'the bread of bitterness,' 'the cup of consolation.' In later times the Jews had a custom of giving bread to the poor, at funerals, and leaving it for their use at tombs and graves. Women went to tombs to indulge their grief (John xi. 31); anniversary mournings (1 Esdras i. 22).

MOUSE. The word occurs where, it seems, the nomenclature in modern zoology would point out two species of distinct genera (Lev. xi. 29; 1 Sam. vi. 4, 5, 11, 18; Isa. lxvi. 17). It is likely that the Hebrews extended the acceptance of the word *achbar*, in the same manner as was the familiar custom of the Greeks, and still more of the Romans, who included within their term *mus* several species, such as shrews, stoats, &c. In the above texts, all in 1 Sam. vi. apparently refer to the short-tailed field-mouse, which is still the most destructive animal to the harvests of Syria, and is most likely the species noticed in antiquity and during the crusades; for, had they been *jerboas* in shape and resembled miniature kangaroos, we would expect William of Tyre to have mentioned the peculiar form of the destroyers, which was then unknown to Western Europe; whereas, they being of species or ap-

pearance common to the Latin nations, no particulars were required. But in Leviticus and Isaiah, where the mouse is declared an unclean animal, the species most accessible and likely to invite the appetite of nations who, like the Arabs, were apt to covet all kinds of animals, even when expressly forbidden, were, no doubt, the hamster and the dormouse; and both are still eaten in common with the *jerboa*, by the Bedouins, who are but too often driven to extremity by actual want of food.

MOUTH. The ordinary applications of this word, common to all languages, require no explanation; but the following somewhat peculiar uses may be noted: 'Heavy-mouthed,' that is, slow of speech, and so translated in Exod. iv. 10; 'smooth mouth' (Ps. xxvi. 28), that is, a flattering mouth; so also 'a mouth of deceit' (Ps. cix. 2). The following are also remarkable phrases: 'To speak with one mouth to mouth, that is, in person, without the intervention of an interpreter (Num. xii. 8; comp. 1 Kings viii. 15; Jer. xxxii. 4). 'With one mouth,' that is, with one voice or consent (Josh. ix. 2; 1 Kings xxii. 13; 2 Chron. xxvii. 12). 'With the whole mouth,' that is, with the utmost strength of voice (Job xix. 16; Ps. lxxvi. 17). 'To put words into one's mouth,' that is, to suggest what one shall say (Exod. iv. 15; Num. xxii. 38; xxiii. 5, 12; 2 Sam. xiv. 19, &c.). 'To be in one's mouth,' is to be often spoken of, as a law, &c. (Exod. xiii. 9; comp. Ps. v. 10; xxxviii. 15). 'To lay the hand upon the mouth,' is to be silent (Judg. xviii. 19; Job xxi. 5; xl. 4; comp. Prov. xxx. 32), just as we lay the finger on the mouth to enjoin silence. 'To write from the mouth of any one' is to do so from his dictation (Jer. xxxvi. 4, 27, 32; xlv. 1).

The mouth, as the organ of speech, also signifies the words that proceed out of it, which in the sacred style are the same as commands and actions. Hence, for a person or thing to come out of the mouth of another is to be constituted or commanded to become an agent or minister under a superior power: this is frequent in the Revelations (Rev. xvi. 13, 14; i. 16; xi. 4, 5; xii. 15; ix. 19). The term *mouth* is not only applied to a speech or words, but to the speaker (Exod. iv. 16; Jer. xv. 19), in which sense it has a near equivalent in our expression 'mouth-piece.'

MUSIC. It seems probable that music is the oldest of all the fine arts. It is more than any other an immediate work of nature. Hence we find it among all nations, even those which are totally ignorant of every other art. Some instruments of music are in Scripture named even before the deluge, as being invented by Jubal, one of Cain's descendants (Gen. iv. 21); and some will regard this as confirmed by the common opinion of the Orientals. Chardin relates that the Persians and Arabians call musicians and singers *Kayne*, or 'descendants from Cain.' The instruments invented by Jubal seem to have remained in use after the flood, or at least the names were still in use, and occur in the latest books of the Old Testament. Music, in practical use, is almost constantly mentioned in connection with the song and the dance (Gen. xxxi. 27; Exod. xv. 20), and was doubtless employed to elevate the former and regulate the latter. Women

especially are seen to have employed it in this connection from the earliest times (Exod. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6). At a later period we trace the appearance of foreign girls in Palestine, as in Greece and Italy, who visited the towns like the Hayaderes of the present day (Isa. xxiii. 16). Music was also through all periods used in social meetings, and in public rejoicings (1 Kings i. 40; Isa. v. 12; xiv. 11; xxiv. 8; Amos vi. 5; Hag. v. 14; 1 Macc. ix. 39; Judith iii. 8). By David music was variously and conspicuously connected with the temple worship (1 Chron. xxv. 1); in particular, the Levites, in their several choirs, performed their music divided into different classes at the great sacrifices (2 Chron. xxix. 25; xxx. 21; xxxv. 15). The prophets also appear to have regarded music as necessary to their services (1 Sam. x. 5); and they used it sometimes for the purpose, apparently, of bringing their minds into the frame suited for prophetic inspirations (2 Kings iii. 15). In the case of David playing before Saul, we have marked and interesting evidence that the effect of music in soothing the perturbations of a disordered intellect was well known among the Hebrews (1 Sam. xvi. 16).

With respect to the nature of the Hebrew music, it was doubtless of the same essential character as that of other ancient nations, and of all the present Oriental nations; consisting not so much in harmony (in the modern sense of the term) as in unison or melody.

The old, the young, maidens, &c., appear to have sung one part. The instruments by which, in singing, this melody was accompanied, occupied the part of a sustained base; and, if we are disposed to apply in this case what Niebuhr has told us, the beauty of the concerts consisted in this—that other persons repeated the music which had just been sung, three, four, or five notes, lower or higher. Such, for instance, was the concert which Miriam held with her musical fellows, and to which the ‘toph,’ or tabret, furnished the continued base. To this mode of performance belongs the 24th Psalm, which rests altogether upon the varied representation; in like manner, also, the 20th and 21st Psalms. This was all the change it admitted; and although it is very possible that this monotonous, or rather unisonous music, might not be interesting to ears tuned to musical progressions, modulations, and cadences, there is something in it with which the Orientals are well pleased.

A music of this description could easily dispense with the compositions which mark the time by notes; and the Hebrews do not appear to have known anything of musical notation; for that the accents served that purpose is a position which yet remains to be proved. At the best the accent must have been a very imperfect instrument for this purpose, however high its antiquity.

The Hebrew music is judged to have been of a shrill character; for this would result from the nature of the instruments—harps, flutes, and cymbals—which were employed in the temple service.

The manner of singing single songs was, it seems, ruled by that of others in the same measure, and it is usually supposed that many of the titles of the Psalms are intended to indicate the

names of other songs according to which these were to be sung [PSALMS].

The allusions to music in the Scriptures are so incidental and concise, that it will never be possible to form out of them a complete or connected view of the state of musical science among the ancient Hebrews. The little knowledge which has been realized on the subject has been obtained chiefly through the patient labours and minute investigations of Calmet, Forkel, Pfeiffer, Jahn, Winer, De Wette, and other authors.

It is less difficult to determine the general character of the Hebrew instruments of music, than to identify the particular instruments which are named in the Hebrew Scriptures. We see certain instruments different from our own in use among the modern Orientals, and we infer that the Hebrew instruments were probably not unlike these. When, however, we endeavour to identify with these a particular instrument named by the Hebrews, our difficulty begins; because the Hebrew names are seldom to be recognised in those which they now bear, and because the Scripture affords us little information respecting the form of the instruments which it mentions.

The matter naturally arranges itself under the following heads—

I. Stringed Instruments.

II. Wind Instruments.

III. Instruments of Percussion.

I.—1. At the head of the **STRINGED INSTRUMENTS** we must place the *kinnor*, which is rendered ‘harp’ in the Authorized Version. The invention and first use of this instrument are ascribed to Jubal (Gen. iv. 21); and Laban names it among the instruments which should have celebrated the departure of his son-in-law (Gen. xxxi. 27). In the first ages the *kinnor* was consecrated to joy and exultation; hence the frequency of its use by David and others in praise of the Divine Majesty. It is thought probable that the instrument received some improvements from David (comp. Amos vi. 5). In bringing back the ark of the covenant (1 Chron. xvi. 5), as well as afterwards, at the consecration of the temple, the *kinnor* was assigned to players of known eminence, chiefly of the family of Jeduthun (1 Chron. xxv. 3). The sorrowing Jews of the captivity, far removed from their own land and the shadow of the sanctuary, hung their *kinnores* upon the willows by the waters of Babylon, and refused to sing the songs of Zion in a strange land (Ps. cxxxvii. 2). Many other passages of similar purport might be adduced in order to fix the uses of an instrument, the name of which occurs so often in the Hebrew Scriptures. They mostly indicate occasions of joy, such as jubilees and festivals. Of the instrument itself the Scripture affords us little further information than that it was composed of the sounding parts of good wood, and furnished with strings. David made it of the berosh wood [Berosh]; Solomon of the more costly algaum (2 Sam. vi. 5; 2 Kings x. 12); and Josephus mentions some composed of the mixed metal called electrum. He also asserts that it was furnished with ten strings, and played with a plectrum (*Antiq.* vii. 12. 3); which however is not understood to imply that it never had any other number of strings, or was always played with the plectrum. David certainly played it with the hand (1 Sam. xvi.

23; xviii. 10; xix. 9), and it was probably used in both ways, according to its size.

That this instrument was really a harp, is now very generally denied; some writers on the subject conclude that it was a kind of guitar, and there is little room to doubt that this instrument was known to the Hebrews, and probably in use among them. It has been suggested, however, by the editor of the *Pictorial Bible* (on Ps. xliii. 4) that the *lyre*, in some of its various kinds, was denoted by the word *kinnor*; and subsequent inquiry has tended to establish this conclusion as firmly perhaps as the nature of the subject admits.

247. [Egyptian figures of lyres. 1, 2, played without, and 3, 4, with the plectrum; 4 is the supposed Hebrew lyre.]

2. The *NEBEL* is the next instrument which requires attention. The word is rendered 'psaltery' in the Authorized Version. As to when this instrument was invented, and when it came into use among the Hebrews, nothing can be determined with certainty. The first mention of it is in the reign of Saul (1 Sam. x. 5), and from that time forward we continue to meet with it in the Old Testament. The use of the instrument prevailed particularly in the public worship of God. It was played upon by several persons in the grand procession at the removal of the ark (1 Chron. xv. 16; xvi. 5); and in the final organization of the temple music it was entrusted to the families of Asaph, Heman, and Jeduthun (1 Chron. xxv. 1-7). Out of the worship of God, it was employed at festivals and for luxurious purposes (Amos vi. 5). In the manufacture of this instrument a constant increase of splendour was exhibited. The first we meet with were made simply of the wood of the *berosh* (2 Sam. vi. 5; 1 Chron. xiii. 8), others of the rarer *algum* tree (1 Kings x. 12; 2 Chron. ix. 11); and some perhaps of metal (Joseph. *Antiq.* i. 8. 3), unless the last is to be understood of particular parts of the instrument.

Conjectures respecting the probable form of this instrument have been exceedingly various. Passing by the eccentric notion that the *nebel* was a kind of bagpipe, we may assume from the evident tendency of the Scriptural intimations, and from the general bearing of other authorities, that

it was composed of strings stretched over a wooden frame. This being assumed or granted, we must proceed to seek some hint concerning its shape; and we find nothing more tangible than the concurrent testimony of Jerome, Isidorus, and Cassiodorus, that it was like the Greek letter Δ inverted (∇).

248. [Egyptian triangular instruments.]

We are, however, far from thinking that the *nebel* was always of this shape. It appears to us to be a general name for several of the larger stringed instruments of the harp kind, and also to denote, in a more special sense, one particular sort. In fact we have the names of several instruments which are generally conceived to be different varieties of the *nebel*. One of these kinds, if not the principal kind, or the one most frequently denoted by the word, was the ancient harp, agreeing more or less with that represented in the Egyptian monuments.

249. [Grand Egyptian harps.]

3. *ASON* occurs as an instrument in only a few places, and never but in connection with the *nebel*. This has given rise to the conjecture that the two instruments may have differed from each other only in the number of their strings, or the openings at the bottom. We see no reason to dissent from this conclusion.

4. *GITTITH* is a word which occurs in the titles to Ps. viii., lxxxi., lxxxiv., and is generally supposed to denote a musical instrument. From the name it has been supposed to be an instrument which David brought from Gath; and it has been inferred from Isa. xvi. 10, that it was in particular use at the vintage season. If an instrument of music, it is remarkable that it does not occur in the list of the instruments assigned by David to the temple musicians; nor even in that list which appears in verses 1 and 2 of Ps. lxxxii., in the title of which it is found. The

supposition of Gesenius, that it is a general name for a *stringed instrument*, obviates this difficulty.

5. The word *MINNIM*, which occurs in Ps. xlv. 8, and cl. 4, is supposed by some to denote a stringed instrument, but it seems merely a poetical allusion to the *strings* of any instrument.

6. The *SABECA* is the instrument rendered 'sackbut,' in Dan. iii. 5, 7, 10, 15. It seems to have been a species of harp or lyre, and, as some think, was only a species of the *nebel*, distinguished by the number of its strings.

250. [Bow-shaped Egyptian instruments.]

7. The *PESANTERIN* is the psaltery of the Greeks: it occurs only in Dan. iii. 7, 10, 15, where it is supposed to represent the Hebrew *nebel*.

8. The word *MACHALATH*, which occurs in the titles of Ps. liii. and lxxxviii., is supposed by Gesenius and others to denote a kind of lute or guitar, which instrument others find in the *minnim* above noticed. There can be little doubt that the Hebrews were in possession of instruments of this kind, although we cannot say with certainty that these are the precise words by which they are denoted.

251. [Egyptian Instruments of the Lute kind.]

11. **WIND INSTRUMENTS.**—There is, happily, less difficulty with respect to instruments of this class than with respect to stringed instruments. The most ordinary division of these is into trumpets and pipes, of which the Hebrews had both, and of various kinds.

1. The word *KEREN*, 'horn,' sometimes, but not often, occurs as the name of a musical instrument (Josh. vi. 5; 1 Chron. xxv. 5; Dan. iii. 5, 7, 10, 15). Of natural horns, and of instruments in the shape of horns, the antiquity and general use are evinced by every extensive collection of antiquities. It is admitted that natural horns were at first used, and that they at length came to be

imitated in metal, but were still called horns. This use and application of the word are illustrated in our 'cornet.' It is generally conceived that rams' horns were the instruments used by the early Hebrews; and these are, indeed, expressly named in our own and many other versions, as the instruments used at the noted siege of Jericho (Josh. vi. 5); and the horns are those of the ram which Josephus assigns to the soldiers of Gideon (Antiq. v. 6. 5; comp. Judg. vii. 16).

2. The name *SHOPHAR*, which is a far more common word than *keren*, is rendered 'trumpet' in the Authorized Version. This name seems, first, to denote horns of the straighter kind, including, probably, those of neat cattle, and all the instruments which were eventually made in imitation of and in improvement upon such horns. It is, however, difficult to draw a distinction between it and the *keren*, seeing that the words are sometimes used synonymously. Upon the whole, we may take the *shophar*, however distinguished from the *keren*, to have been that kind of horn or horn-shaped trumpet which was best known to the Hebrews. The name *shophar* means bright

252. [1, 2, 3, 4, Ancient horns and curved trumpets; 5, straight trumpet; 6, pipe.]

or clear, and the instrument may be conceived to have been so called from its clear and shrill sound, just as we call an instrument a 'clarion,' and speak of a musical tone as 'brilliant' or 'clear.' In the service of God this *shophar* or trumpet was only employed in making announcements, and for calling the people together in the time of the holy solemnities, of war, of rebellion, or of any other great occasion (Exod. xix. 13; Num. x. 10; Judg. iii. 7; 1 Sam. xiii. 3; xv. 10; 2 Chron. xv. 14; Isa. xviii. 3).

3. The *CHATZOZERAH* was the straight trumpet, different from the *shophar*, which was more or less bent like a horn. There has been various speculation on the name; but we are disposed to assent to the conclusion of Gesenius, that it is an onomatopoeic word, imitating the broken puls-like sound of the trumpet, like the Latin *taratantara*. Among the Israelites these trumpets were a divine regulation, Moses having been expressly directed how to make them (Num. x. 2). They were of pure beaten silver, but the particular form does not appear in Scripture. They are figured, however, on the arch of Titus, among the other spoils of the Jewish Temple (Fig. 5, No. 252), and they correspond with the description which Josephus, who, as a priest, could not in this matter

be mistaken, has given: 'Moses,' he says, 'invented a kind of trumpet of silver; in length it was little less than a cubit, and it was somewhat thicker than a pipe; its opening was oblong, so as to permit blowing on it with the mouth; at the lower end it had the form of a bell, like the horn.' The tone of this trumpet, or rather the noise made by blowing on it, was very variable, and is distinguished by different terms in Scripture.

4. **JOBEL.** There has been much speculation concerning the term, and it seems now to be agreed that the word does not denote a separate instrument, but is an epithet applied to the trumpets with which the jubilees were proclaimed, i. e. the 'jubilee-trumpet,' and as the same trumpets were used for signals and alarms, 'the alarm-trumpet, the alarm-horn.' This name for the sound of music is supposed to be derived from Jubal, the inventor of instruments of music.

Wind instruments of softer sound next require attention. The first and principal of these is the

5. **CHALLI,** the meaning of which is *bored through*, denotes a pipe, perforated and furnished with holes. There are but five places where it occurs in the Old Testament (1 Sam. x. 5; 1 Kings i. 40; Isa. v. 12; xxx. 29; Jer. xlviii. 36); but would seem to have come rather late into use among the Hebrews, and probably had a foreign origin. The passages to which we have referred will indicate the use of this instrument or class

253. [Egyptian reed-pipes.]

of instruments; but of the form we can only guess by reference to those of the ancient Egyptians, which are very similar to those still in use in Western Asia. The pipe is, however, rarely introduced in the Egyptian sculptures, and does not seem to have been held in much estimation. The principal are the single and double pipes. The single pipe of the Greeks is allowed to have been introduced from Egypt, from which the Jews probably had theirs. It was a straight tube, without any increase at the mouth, and when played was held with both hands. It was usually of moderate length, about eighteen inches, but occasionally less, and sometimes so exceedingly long, and the holes so low that the player was obliged to extend his arms to the utmost. Some had three holes, others four, and actual specimens made of common reed have been found.

254. [1, 2, 3, Single pipes; 4, double pipe.]

The double pipe was formed with two of such

tubes, of equal or unequal lengths, having a common mouth-piece, and each played with the corresponding hand. They were distinguished as the right and left pipes, and the latter, having but few holes and emitting a deep sound, served as a base; the other had more holes and gave a sharp sound: this pipe is still used in Palestine.

From the references which have been given it will be seen that the pipe was, among the Jews, chiefly consecrated to joy and pleasure. So much was this the case that in the time of Judas Maccabæus the Jews complained 'that joy was taken from Jacob, and the pipe with the harp ceased' (1 Macc. iii. 45). It was particularly used to enliven the periodical journeys to Jerusalem to attend the great festivals (Isa. xxx. 29); and this custom of enlivening with music the tedium of travelling is common in the East at this day. Athenæus tells us of a plaintive pipe which was in use among the Phœnicians. This serves to illustrate Matt. ix. 23, where our Saviour, finding the flute-players with the dead daughter of the ruler, orders them away, because the damsel was not dead; and in this we also recognise the regulation of the Jews, that every one, however poor he might be, should have at least two pipes at the death of his wife.

6. The word **MISHROKITHA** occurs four times in Daniel (ch. iii. 5, 7, 10, 15), but nowhere else, and appears to be the Chaldean name for the flute with two reeds, of which we have already spoken.

7. **UGAB** is the word rendered 'organ' in our version. This and the *kinnor* are the instruments whose invention is ascribed to Jubal (Gen. iv. 21), and higher antiquity cannot therefore be claimed for any instrument. There are only three other places in which it is mentioned in the Old Testament; two in the book of Job (xxi. 12; xxx. 31), and one in the Psalms (cl. 4). The name is taken from the term *organon*, employed by the Septuagint, which simply denotes a double or manifold pipe; and hence in particular the Pandæan or shepherd's pipe, which is at this day called a 'mouth-organ' among ourselves. Formerly it was called simply 'organ,' and 'mouth' has been added to distinguish it from the comparatively modern instrument which has usurped the more simple designation of 'organ.' The Pandæan pipe is an instrument of such antiquity that the profane writers do not know to whom to ascribe it. This antiquity corresponds with the Scriptural intimation concerning the *ugab*, and justifies us in seeking for the *syrix* among the more ancient instruments of the Orientals, especially as it is still common in Western Asia. Niebuhr saw it in the hands of a peasant at Cairo; and Russell says that 'the *syrix* or Pan's pipe is still a festival instrument in Syria; it is known also in the city, but very few performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt like the dervise flute, to make a hissing sound, though blown by a good player. The number of reeds of which the *syrix* is composed varies in different instruments from five to twenty-three. The classical *syrix* is usually said to have had seven reeds, but we find some in the monuments with a greater number, and the shepherd of Theocritus had one of nine reeds.

III. INSTRUMENTS OF PERCUSSION,—or such

as give forth their sounds on being struck or shaken.

1. The word *Toph* seems to have denoted primarily the tambourine, and generally all instruments of the drum kind which were in use among the Israelites. There is not the slightest doubt about this instrument. All the translations and lexicons agree in this one point; and we have, besides, the actual evidence of existing instruments of this kind among the Arabians, bearing the same name in the forms of *doff* and *adufe*. The *toph* was known to the Jews before they quitted Syria (Gen. xxxi. 27); it is also mentioned by Job (xxi. 12), and it is the first instrument named after the exodus, being that with which Miriam led the dances with which the daughters of Israel celebrated the overthrow of Pharaoh (Exod. xv. 20). It was employed by David in all the festivities of religion (2 Sam. vi. 5). Isaiah adduces it as the instrument of voluptuaries, but left in silence amid wars and desolations (Isa. xxiv. 8). The occasions on which it was used were mostly joyful, and those who played upon it were generally females (Ps. lxxviii. 25), as was the case among most ancient nations, and is so at the present day in the East. It is nowhere mentioned in connection with battles or warlike transactions.

235. [Tambourines: 1, angular; 2, circular.]

Whether the Israelites had drums or not does not clearly appear, and in the absence of evidence it is useless to speculate on the subject. If they had, they must be included under the general name of *toph*. The ancient Egyptians had a long drum, very similar to the tom-toms of

236. [Ancient Egyptian drums.]

India (No. 256, figs. 1, 3). It was about two feet

or two feet and a half in length, and was beaten with the hand. The case was of wood or copper, covered at both ends with parchment or leather, and braced with cords extended diagonally over the exterior of the cylinder. It was used chiefly in war. There was another larger drum, less unlike our own; it was about two feet and a half long by about two feet broad, and was shaped much like a sugar-cask (No. 257, fig. 3). It was formed of copper, and covered at the ends with red leather, braced by catgut springs passing through small holes in its broad margin. This kind of drum was beaten with sticks (fig. 5). It does not appear on the monuments, but an actual specimen was found in the excavations made by D'Athanasi, in 1823, and is now in the museum at Paris.

Another species of drum is represented in the Egyptian paintings, and is of the same kind which is still in use in Egypt and Arabia, under the name of the *darabouka* drum. It is made of parchment stretched over the top of a funnel-shaped case of metal, wood, or pottery (No. 257, figs. 1, 2, 4). It is beaten with the hand, and when relaxed, the parchment is braced by exposing it for a few moments to the sun, or the warmth of a fire. This kind of drum claims

257. [Drums: 1, 2, 4, modern oriental; 3, ancient Egyptian; 5, sticks to 3.]

particular attention from its being supposed to be represented on one of the coins ascribed to Simon Maccabæus.

2. The word *PHAAEMON* denotes the small golden appendages to the robe of the high-priest (Exod. xxviii. 33; xxxix. 25), which all versions agree in rendering 'bells,' or 'little bells.'

3. The words *TZELTZELIM*, *METZILLOTH*, and *METZILTHAIM*, are translated *cymbals* in most versions, except in Zech. xiv. 20, where they are rendered 'bells'—the 'bells of the horses.' If the words, however, denote cymbals in other

258. [Cymbals—Egyptian.]

places, they cannot well denote a different thing there. There is an important passage (Ps. cl. 5), 'Praise him with the clear cymbal, praise him with the resounding cymbal,' which clearly points to two instruments under the same name, and leaves us to conclude that the Hebrews had both hand-cymbals and finger-cymbals (or castagnets).

although it may not in all cases be easy to say which of the two is intended in particular texts. Cymbals figure in the grand procession at the removal of the ark (1 Chron. xiii. 8); other instances occur of their being used in the worship of God (Neh. xii. 27; Ps. cl. 5; 1 Chron. xv. 2); and the illustrious Asaph was himself a player on the cymbal (1 Chron. xvi. 5). The sound of these instruments is very sharp and piercing, but it does not belong to fine, speaking, expressive music.

4. The name *SHALISHIM* occurs but once, viz. in 1 Sam. xviii. 6, and is there uncertainly rendered, in the Authorized Version, 'instruments of music,' and in the margin 'three-stringed instruments.' The word is plural, and means 'threes.' Most writers, proceeding upon this interpretation, identify it with the triangle, which Athenæus (iv. 23) alleges to have been a Syrian invention.

5. *MENANEIM* is another word which occurs but once in Scripture (2 Sam. vi. 5), where our version translates it by 'cymbals,' although it has appropriated another word to that instrument. It is now more generally thought to denote the *sistrum*. The *sistrum* was generally from eight

259. [Sistra—various Egyptian specimens.]

to sixteen or eighteen inches in length, and entirely of bronze or brass. It was sometimes inlaid with silver, gilt, or otherwise ornamented, and being held upright was shaken, the rings moving to and fro upon the bars. The last were frequently made to imitate snakes, or simply bent at each end to secure them from slipping through the holes. Several actual specimens of these instruments have been found, and are deposited in the British, Berlin, and other museums. They are mostly furnished with sacred symbols, and were chiefly used by the priests and priestesses in the ceremonies of religion, particularly in those connected with the worship of Isis.

MUSTARD TREE. The *Siapi* of the Greek Testament, rendered 'mustard tree' in the Authorized Version, has engaged the attention of many commentators, great difficulty having been experienced in finding a plant with the requisite

characteristics, notwithstanding the several attempts which have been made. The subject was investigated by Dr. Royle in a paper read before

260. [Salvadora Persica.]

the Royal Asiatic Society, on the 16th March, 1844. Having referred to the passages of the New Testament in which the word occurs (Matt. xiii. 31; xvii. 20; Mark iv. 31; Luke xiii. 19; xvii. 6), he first showed how unsuitable were the plants which had been adduced to the circumstances of the sacred narrative, and mentioned that his own attention had been turned to the subject in consequence of the present Bishop of Lichfield having informed him that Mr. Amenny, a Syrian student of King's College, was well acquainted with the tree. Mr. A. stated that this tree was found near Jerusalem, but most abundantly on the banks of the Jordan and round the sea of Tiberias; that its seed was employed as a substitute for mustard, and that it was called *khardal*, which, indeed, is the common Arabic name for mustard. Dr. Royle knew a tree of N. W. India, which was there called *kharjal*, and which appeared possessed of the requisite properties, but he could not find it mentioned in any systematic work, or local Flora, as a native of Palestine. The plant is *Salvadora Persica*, a large shrub, or tree of moderate size, a native of the hot and dry parts of India, of Persia, and of Arabia. Dr. Roxburgh describes the berries as much smaller than a grain of black pepper, having a strong aromatic smell, and a taste much like that of garden cresses. Irby and Mangles, in their travels, mention a tree which they suppose to be the mustard tree of Scripture. They met with it while advancing towards Kerak, from the southern extremity of the Dead Sea. It bore its fruit in bunches, resembling the currant; and the seeds had a pleasant, though strongly aromatic taste, nearly resembling mustard. They say, 'We think it possible that this is the tree our Saviour alluded to in the parable of the mustard seed, and not the mustard plant which we have in the north, and which, even when growing large, can never be called a tree, whereas the other is really such, and birds might easily, and actually do, take shelter under its shadow.' On further inquiry, Dr. Royle learned that a specimen of the tree had been brought home by Mr. W. Barker, and that it had been ascertained by Messrs. Don and

Lambert to be the *Salvadora Persica* of botanists.

The paper above referred to concludes by stating it as an important fact, that the writer had come to the same conclusion as Irby and Mangles, by an independent mode of investigation, even when he could not ascertain that the plant existed in Palestine; which is, at all events, interesting, as proving that the name *kharjal* is applied, even in so remote a country as the north-west of India, to the same plant which, in Syria, is called *khardal*, and which no doubt is the *chardal* of the Talmudists, one of whom describes it as a tree of which the wood was sufficient to cover a potter's shed, and another says that he was wont to climb into it, as men climb into a fig-tree. Hence there can be little doubt but that *Salvadora Persica* is the mustard tree of Scripture. The plant has a small seed, which produces a large tree with numerous branches, in which the birds of the air may take shelter. The seed is possessed of the same properties, and is used for the same purposes, as mustard, and has a name, *khardal*, of which *sinapi* is the true translation, and which, moreover, grows abundantly on the very shores of the sea of Galilee, where our Saviour addressed to the multitude the parable of the mustard seed.

MY'RA, one of the chief towns of Lycia, in Asia Minor. It lay about a league from the sea (in N. lat. 36° 18'; E. long. 30°), upon a rising ground, at the foot of which flowed a navigable river with an excellent harbour at its mouth. The town now lies desolate. When Paul was on his voyage from Caesarea to Rome, he and the other prisoners were landed here, and were re-embarked in a ship of Alexandria bound to Rome (Acts xxvii. 5).

MYRRH is the exudation of a little-known tree found in Arabia, but much more extensively in Abyssinia. It formed an article of the earliest commerce, was highly esteemed by the Egyptians and Jews, as well as by the Greeks and Romans, as it still is both in the East and in Europe. The earliest notice of it occurs in Exod. xxx. 23, 'Take thou also unto thee principal spices, of pure myrrh (*morderor*) 500 shekels.' It is afterwards mentioned in Esther ii. 12, as employed in the purification of women; in Ps. xlv. 8, as a perfume, 'All thy garments smell of myrrh, and aloes, and cassia;' also in several passages of the Song of Solomon (iv. 6; v. 5). We find it mentioned in Matt. ii. 11, among the gifts presented by the wise men of the East to the infant Jesus—'gold, and frankincense, and myrrh.' It may be remarked as worthy of notice, that myrrh and frankincense are frequently mentioned together. In Mark xvi. 23, we learn that the Roman soldiers 'gave him (Jesus) to drink wine mingled with myrrh; but he received it not.' The Apostle John (xix. 39) says, 'Then came also Nicodemus, and brought a mixture of myrrh and aloes, about an hundred pound weight,' for the purpose of embalming the body of our Saviour.

Though myrrh seems to have been known from the earliest times, and must consequently have been one of the most ancient articles of commerce, the country producing it long remained unknown. Some is undoubtedly procured in Arabia, but the largest quantity has always been obtained from Africa. Mr. Johnson, in his re-

cently published *Travels in Abyssinia* (l. 249), mentions that 'Myrrh and mimosa trees abounded in this place' (Koranebedudah in Adal). The former he describes as being 'a low, thorny, ragged-looking tree, with bright-green trifoliate leaves; the gum exudes from cracks in the bark of the trunk near the root, and flows freely upon

261. [Balsamodendron Myrrha.]

the stones immediately underneath. Artificially it is obtained by bruises made with stones. The natives collect it principally in the hot months of July and August, but it is to be found, though in very small quantities, at other times of the year.

Several kinds of myrrh were known to the ancients; and in modern commerce we have Turkish and East Indian myrrh, and different names used to be, and are still applied to it, as red and fatty myrrh, myrrh in tears, in sorts, and myrrh in grains. In the Bible also several kinds of myrrh are enumerated, respecting which various opinions have been entertained.

Myrrh, it is well known, was celebrated in the most ancient times as a perfume, and a fumigator, as well as for its uses in medicine. Myrrh was burned in the temples, and employed in embalming the bodies of the dead. It was offered in presents, as natural products commonly were in those days, because such as were procured from distant countries were very rare. The ancients prepared a wine of myrrh, and also an oil of myrrh, and it formed an ingredient in many of the most celebrated compound medicines, as the *Theriaca*, the *Mithridata*, *Manus Dei*, &c. Even in Europe it continued to recent times to enjoy the highest medicinal reputation, as it does in the East in the present day. From the sensible properties of this drug, and from the virtues which were ascribed to it, we may satisfactorily account for the mention of it in the several passages of Scripture which have been quoted.

MYRTLE occurs in several passages of the Old Testament, as in Isa. xlii. 19; lv. 13; Neh. viii. 15; Zech. i. 8, 10, 11.

The myrtle has from the earliest periods been

highly esteemed in all the countries of the south of Europe. By the Greeks and Romans it was dedicated to Venus, and employed in making wreaths to crown lovers, but among the Jews it was the emblem of justice. The note of the Chaldee Targum on the name Esther, according to Dr. Harris, is, 'they call her Hadassah because she was *just*, and those that are just are compared to *myrtles*.'

The repute which the myrtle enjoyed in ancient times it still retains, notwithstanding the great accession of ornamental shrubs and flowers which has been made to the gardens and greenhouses of Europe. This is justly due to the rich colouring of its dark green and shining leaves, contrasted with the white starlike clusters of its flowers, affording in hot countries a pleasant shade under its branches, and diffusing an agreeable odour from its flowers or bruised leaves. It is, however, most agreeable in appearance when in the state of a shrub, for when it grows into a tree, as it does in hot countries, the traveller looks under instead of over its leaves, and a multitude of small branches are seen deprived of their leaves by the crowding of the upper ones. This shrub is common in the southern provinces of Spain and France, as well as in Italy and Greece; and also on the northern coast of Africa, and in Syria. The poetical celebrity of this plant had, no doubt, some influence upon its employment in medicine, and numerous properties are ascribed to it by Dioscorides (i. 127). It is aromatic and astringent, and hence, like many other such plants, forms a stimulant tonic, and is useful in a variety of complaints connected with debility. Its berries were formerly employed in Italy, and still are so in Tuscany, as a substitute for spices, now imported so plentifully from the far East. A wine was also prepared from them, which was called *myrtidanum*, and their essential oil is possessed of excitant properties. In many parts of Greece and Italy the leaves are employed in tanning leather. The myrtle, possessing so many remarkable qualities, was not likely to have escaped the notice of the sacred writers, as it is a well-known inhabitant of Judea.

MYSTIA, a province occupying the north-west angle of Asia Minor, and separated from Europe only by the Propontis and Hellespont: on the south it joined *Æolis*, and was separated on the east from Bithynia by the river *Æsopus*. Latterly *Æolis* was included in Mysia, which was then separated from Lydia and Ionia by the river *Hermus*, now *Sarabud* or *Djedis*. In ancient times the province of Mysia was celebrated for its fertility in corn and wine, and although now but poorly tilled, it is still one of the finest tracts in Asia Minor. Paul passed through this province and embarked at its chief port, *Troas*, on his first voyage to Europe (Acts xvi. 7, 8).

MYSTERY. A most unscriptural and dangerous sense is but too often put upon this word, as if it meant something absolutely unintelligible and incomprehensible; whereas, in every instance in which it occurs in the Sept. or New Testament, it is applied to something which is *revealed*, declared, explained, spoken, or which may be known or understood. This fact will appear from the following elucidation of the passages in which it is found. First, it is sometimes used to denote the meaning of a symbolical represent-

ation, whether addressed to the mind by a parable, allegory, &c., or to the eye, by a vision, &c. (Matt. xiii. 10; Mark iv. 11). Again, the mystery or symbolical vision of the 'seven stars and of the seven golden candlesticks' (Rev. i. 12, 16), is explained to mean 'the angels of the seven churches of Asia, and the seven churches themselves' (ver. 20). Again, 'the mystery' or symbolical representation 'of the woman upon a scarlet-coloured beast' (Rev. xvii. 3-6) is also explained: 'I will tell thee the mystery of the woman,' &c. (xvii. 7). When St. Paul, speaking of marriage, says, 'this is a great mystery' (Eph. v. 32), he evidently treats the original institution of marriage as affording a figurative representation of the union betwixt Christ and the church. The word is also used to denote anything whatever which is hidden or concealed, till it is explained. Thus it is employed in the New Testament to denote those doctrines of Christianity, general or particular, which the Jews and the world at large did not understand, till they were revealed by Christ and His apostles, 'Great is the mystery of godliness,' i. e. the Christian religion (1 Tim. iii. 16), the chief parts of which the apostle instantly proceeds to adduce.—'God was manifest in the flesh, justified by the Spirit, seen of angels,' &c.—facts which had not entered into the heart of man (1 Cor. ii. 9) until God visibly accomplished them, and revealed them to the apostles by inspiration (ver. 10). Thus also the Gospel in general is called 'the mystery of the faith' (1 Tim. iii. 9), and 'the mystery which from the beginning of the world had been hid with God, but which was now made known through means of the church' (Eph. iii. 9). The same word is used respecting certain particular doctrines of the Gospel, as, for instance, 'the partial and temporary blindness of Israel,' of which mystery 'the Apostle would not have Christians' ignorant (Rom. xi. 25), and which he explains (ver. 25-32). He styles the calling of the Gentiles 'a mystery which, in other ages, was not made known unto the sons of men as it is now revealed unto the holy apostles and prophets by the Spirit' (Eph. iii. 4-6; comp. i. 9, 10, &c.). To this class we refer the well-known phrase, 'Behold I show you a mystery' (1 Cor. xv. 51), we shall all be changed; and then follows an explanation of the change (ver. 51-55). And in the prophetic portion of his writings 'concerning the mystery of iniquity' (2 Thess. ii. 7), he speaks of it as being ultimately 'revealed' (ver. 8); and to complete the proof that the word 'mystery' is used in the sense of *knownable secrets*, we add the words 'Though I understand all mysteries' (1 Cor. xiii. 2).

N.

1. **NA'AMAH** (*pleasant*), daughter of Lamech and Zillah, and sister of Tubal-cain (Gen. iv. 22).

2. **NAAMAH**, an Ammonitess, one of the wives of Solomon, and mother of Rehoboam (1 Kings xiv. 21).

NA'AMAN (*pleasantness*), commander of the armies of Damascus Syria, in the time of Joram, king of Israel. Through his valour and abilities Naaman held a high place in the esteem of his

king Benhadad; and although he was afflicted with leprosy, it would seem that this did not, as among the Hebrews, operate as a disqualification for public employment. Nevertheless, the condition of a leper could not but have been in his high place both afflicting and painful; and when it was heard that a little Hebrew slave-girl, who waited upon Naaman's wife, had spoken of a prophet in Samaria who could cure her master of his leprosy, the faint and uncertain hope thus offered was eagerly seized; and the general obtained permission to visit the place where this relief was to be sought. Benhadad even furnished him with a letter to his old enemy king Joram; but as this letter merely stated that Naaman had been sent for him to cure, the king of Israel rent his clothes in astonishment and anger, suspecting that a request so impossible to grant, involved a studied insult or an intention to fix a quarrel upon him with a view to future aggressions. When tidings of this affair reached the prophet Elisha, he desired that the stranger might be sent to him. Naaman accordingly went, and his splendid train of chariots, horses, and laden camels filled the street before the prophet's house. As a leper, Naaman could not be admitted into the house; and Elisha did not come out to him as he expected, and as he thought civility required; but he sent out his servant to tell him to go and dip himself seven times in the Jordan, and that his leprosy would then pass from him. He was, however, by this time so much chafed and disgusted by the apparent neglect and incivility with which he had been treated, that if his attendants had not prevailed upon him to obey the directions of the prophet, he would have returned home still a leper. But he went to the Jordan, and having bent himself seven times beneath its waters, rose from them clear from all leprous stain. His gratitude was now proportioned to his previous wrath, and he drove back to vent the feelings of his full heart to the prophet of Israel. He avowed to him his conviction that the God of Israel, through whom this marvellous deed had been wrought, was great beyond all gods; and he declared that henceforth he would worship Him only, and to that end he proposed to take with him two mules' load of the soil of Israel wherewith to set up in Damascus an altar to Jehovah. This shows he had heard that an altar of earth was necessary (Exod. xx. 24); and the imperfect notions which he entertained of the duties which his desire to serve Jehovah involved, were natural in an un instructed foreigner. He had also heard that Jehovah was a very jealous God, and had forbidden any of his servants to bow themselves down before idols; and therefore he expressed to Elisha a hope that he should be forgiven if, when his public duty required him to attend his king to the temple of Rimmon, he bowed with his master. The grateful Syrian would gladly have pressed upon Elisha gifts of high value, but the holy man resolutely refused to take anything, lest the glory redounding to God from this great act should in any degree be obscured. His servant, Gehazi, was less scrupulous, and hastened with a lie in his mouth to ask in his master's name for a portion of that which Elisha had refused. The illustrious Syrian no sooner saw the man running after his chariot, than he alighted to meet him, and happy to relieve himself in some degree under the

sense of overwhelming obligation, he sent him back with more than he had ventured to ask (2 Kings v.). Nothing more is known of Naaman; and what befel Gehazi is related under another head [GEHAZI].

NA'BAL (*stupid, foolish*), a descendant of Caleb, dwelling at Maon, and having large possessions near Carmel of Judah, in the same neighbourhood. He had abundant wealth, being the possessor of 3000 sheep and 1000 goats, but his churlish and harsh character had not been softened by the prosperity with which he had been favoured. He was holding a great sheep-shearing of his numerous flocks at Carmel—which was a season of great festivity among the sheep-masters of Israel—when David sent some of his young men to request a small supply of provisions, of which his troop was in great need. He was warranted in asking this, as, while Nabal's flocks were out in the desert, the presence of David and his men in the neighbourhood had effectually protected them from the depredations of the Arabs. But Nabal refused this application, with harsh words, reflecting coarsely upon David and his troop as a set of worthless ruffians. On learning this, David was highly incensed, and set out with his band to avenge the insult. But his intention was anticipated and averted by Nabal's wife Abigail, who met him on the road with a most acceptable supply of provisions, and, by her consummate tact and good sense, mollified his anger, and, indeed, caused him in the end to feel thankful that he had been prevented from the bloodshed which would have ensued. When Nabal, after recovering from the drunkenness of the feast, was informed of these circumstances, he was struck with such intense terror at the danger to which he had been exposed, that 'his heart died within him, and he became as a stone;' which seems to have been the exciting cause of a malady that carried him off about ten days after. David, not long after, evinced the favourable impression which the good sense and comeliness of Abigail had made upon him, by making her his wife, B.C. 1061 (1 Sam. xxv.) [ABIGAIL].

NABATHE'ANS, [NEBAIOTH.]

NA'BOTH (*fruit, produce*), an inhabitant of Jezreel, who was the possessor of a patrimonial vineyard adjoining the garden of the palace which the kings of Israel had there. King Ahab had conceived a desire to add this vineyard to his ground, to make of it 'a garden of herbs,' but found that Naboth could not, on any consideration, be induced to alienate a property which he had derived from his fathers. This gave the king so much concern, that he took to his bed and refused his food; but when his wife, the notorious Jezebel, understood the cause of his trouble, she bade him be of good cheer, for she would procure him the vineyard. Some time after Naboth was, at a public feast, accused of blasphemy, by an order from her under the royal seal, and, being condemned through the testimony of false witnesses, was stoned to death, according to the law, outside the town (Lev. xxiv. 16; Num. xv. 30). His estate, by a usage which appears to have crept in, was forfeited to the crown.

When Ahab heard of the death of Naboth—and he must have known how that death had been accomplished, or he would not have supposed him self a gainer by the event—he hastened to take

possession. But he was speedily taught that this horrid crime had not passed without notice by the all-seeing God, and would not remain unpunished. The only tribunal to which he remained accountable, pronounced his doom through the prophet Elijah, who met him on the spot, 'In the place where dogs licked the blood of Naboth, shall dogs lick thy blood, even thine' (1 Kings xxi.).

NA'CHON. The floor of Nachon is the name given to the threshing-floor near which Uzzah was slain, for laying his hand upon the ark (2 Sam. vi. 6).

NA'CHOR. [NAHOR.]

1. NA'DAB (*liberal*), eldest son of Aaron, who, with his brother Abihu, was slain for offering strange fire to the Lord (Lev. x.).

2. NADAB, son of Jeroboam, and second king of Israel. He ascended the throne upon the death of his father (n.c. 954), whose deep-laid, but criminal and dangerous policy, he followed.

NAHA'LIEL, an encampment of the Israelites in the wilderness [WANDERING].

NAHAL'LAL, a town in the tribe of Zebulun (Josh. xix. 15), which was assigned to the Levites (Josh. xxi. 35), but of which Zebulun was slow in dispossessing the Canaanites (Judg. i. 30).

1. NA'HASH (*a serpent*), a person named only in 2 Sam. xvii. 25; and as he is there described as the father of Abigail and Zeruih, who are elsewhere called the sisters of David, this must have been either another name for Jesse, or, as some suppose, of a former husband of David's mother.

2. NAHASH, king of the Ammonites, noted for the barbarous terms of capitulation which he offered to the town of Jabesh-Gilead, and for his subsequent defeat by Saul [JABESH].

1. NA'HOR (*snorting*), or rather Nachor, as in Luke iii. 34, son of Serug, and father of Terah, the father of Abraham (Gen. xi. 22-25).

2. NAHOR, grandson of the preceding, being one of the sons of Terah, and brother of Abraham. Nahor espoused Milcah his niece, daughter of his eldest brother Haran (Gen. xi. 27-29). Nahor did not quit his native place, 'Ur of the Chaldees,' when the rest of the family removed to Harau (Gen. xi. 30); but it would appear that he went thither afterwards, as we eventually find his son Bethuel, and his grandson Laban, established there (Gen. xxvii. 43; xxix. 5).

NAH'SHON (*enchanter*), from which he is called Naasson in the genealogies of Christ in Matt. i. 4; Luke iii. 32, son of Aminadab, and prince or chief of the tribe of Judah, at the time of the exode (Num. i. 7; ii. 3).

NAHUM (*consolation*), the seventh of the minor prophets, according to the arrangement of both the Greek and Hebrew, but the sixth in point of date, was a native of Elkosh, a village of Galilee. He prophesied in Judah after the deportation of the ten tribes, and soon after the unsuccessful irruption of Sennacherib (ch. i. 11-13; ii. 1, 14), consequently towards the close of the reign of Hezekiah. Attempts have been made to fix the date with precision, from the allusion to the destruction of No-Ammon or Thebes in Egypt (ch. iii. 8); but as it is uncertain when this event took place, Eichhorn and others have conjectured that it was near the beginning of the reign of Hezekiah, or about n.c. 720, as about this time Sargon, king of

Assyria, waged an unsuccessful war for three years against Egypt (Isa. xx.).

The contents of the prophecy of Nahum are as follows:—Chap. i. 2-7. The destruction of Nineveh and of the Assyrian monarchy is depicted in the liveliest colours, together with the relief of Judah from oppression. The destruction of Nineveh is detailed with still greater particularity in the third chapter; which has induced some to suppose that the prophet refers to two different events—the sack of Nineveh by the Medes, n.c. 867, in the reign of Sardanapalus, and its second and final destruction, under Chyniladan, by Cyaxares the First and Nabopolassar, n.c. 625. But this opinion has been satisfactorily refuted by Jahn and De Wette.

The beauty of the style of Nahum has been universally felt. It is classic, observes De Wette, in all respects. It is marked by clearness, by its finished elegance, as well as by fire, richness, and originality. The rhythm is regular and lively. The whole book remarkably coherent, and the author only holds his breath, as it were, in the last chapter. Jahn observes that the language is pure, with a single exception; that the style is ornate, and the tropes bold and elegant (rendering it, however, necessary for the reader to supply some omissions; see ii. 8; ix. 3, 16); and that the descriptions of the divine omnipotence, and of the destruction of Nineveh, are resplendent with all the perfection of oratory.

NA'IL. There are two Hebrew words thus translated in the Auth. Vers., which it may be well to distinguish.

1. *Yathed*, which usually denotes a peg, pin, or nail, as driven into a wall (Ezek. xv. 3; Isa. xxii. 25); and more especially a tent-pin driven into the earth to fasten the tent (Exod. xxvii. 19; xxxv. 18; xxxviii. 31; Judg. iv. 21, 22; Isa. xxxiii. 20; liv. 2).

2. *Mismeroeth*, which, with some variations of form, is applied to ordinary and ornamental nails. It always occurs in the plural, and is the word which we find in 1 Chron. xxii. 3; 2 Chron. iii. 9; Isa. xli. 7; Jer. x. 4; Eccles. xii. 11. The last of these texts involves a very significant proverbial application—'The words of the wise are as nails infixed,' &c.

NA'IN, a town of Palestine, where Jesus raised the widow's son to life (Luke vii. 11-17). Eusebius and Jerome describe it as near Endor.

NA'OT, a place in or near Ramah, where Samuel abode with his disciples (1 Sam. xix. 18, 19, 22, 23; xx. 1).

NAKED. The word *arom*, rendered 'naked' in our Bibles, does not in many places mean absolute nakedness. It has this meaning in such passages as Job i. 21; Eccles. v. 15; Mic. i. 8; Amos ii. 16. But in other places it means one who is ragged or poorly clad (1 John xxi. 7; Isa. lviii. 7); which does not indeed differ from a familiar application of the word 'naked' among ourselves. A more peculiar and Oriental sense of the word is that in which it is applied to one who has laid aside his loose outer garment, and goes about in his tunic, and it was thus that Isaiah went 'naked' and barefoot (Isa. xx. 2; comp. John xxi. 7). Persons in their own houses freely laid aside their outer garment, and appeared in their tunic and girdle; but this is undress, and they would count it improper to appear abroad, or to see

company in their own house without the outer robe.

NA'OMI, wife of Elimelech of Bethlehem, and mother-in-law of Ruth, in whose history hers is involved [RUTH].

NAPHTALI (*my wrestling*), the sixth son of Jacob, and his second by Bilhah, Rachel's hand-maid, born B.C. 1747, in Padan-Aram. Nothing of his personal history is recorded. The description given of Naphtali in the testamentary blessing of Jacob (Gen. xlix. 21) has been variously rendered. In the Authorized Version it is translated 'a hind let loose, he giveth goodly words.' But, according to the reading in the Septuagint, the verse may be rendered, 'Naphtali is a goodly tree [terebinth or oak] that puts forth lovely branches.' We certainly incline to this view of the text; the metaphor which it involves being well adapted to the residence of the tribe of Naphtali, which was a beautiful woodland country, extending to Mount Lebanon, and producing fruits of every sort. With this interpretation, better than with the other, agrees the blessing of Moses upon the same tribe: 'O Naphtali, satisfied with favour, and full with the blessing of the Lord, possess thou the west and the south' (Deut. xxxiii. 23).

When the Israelites quitted Egypt, the tribe of Naphtali numbered 53,400 adult males (Num. i. 43), which made it the sixth in population among the tribes; but at the census taken in the plains of Moab it counted only 45,400 (Num. xxvi. 50), being a decrease of 8000 in one generation, whereby it became the seventh in point of numbers. The limits of the territory assigned to this tribe are stated in Josh. xix. 32-39, which show that it possessed one of the finest and most fertile districts of Upper Galilee, extending from the Lake Genesareth and the border of Zebulun, on the south, to the sources of the Jordan and the spurs of Lebanon on the north, and from the Jordan, on the east, to the borders of Asher on the west. But it was somewhat slow in acquiring possession of the assigned territory (Judg. i. 33). The chief towns of the tribe were Kedesh, Hazor, Harosheth, and Chinnereth, which last was also the name of the great lake afterwards called Genesareth. In the Hebrew history Naphtali is distinguished for the alacrity with which it obeyed the call to arms against the oppressors of Israel when many other tribes held back (Judg. iv. 10; v. 18; vi. 35; vii. 23). In the time of David the tribe had on its rolls 37,000 men fit for military service, armed with shields and spears, under a thousand officers (1 Chron. xii. 34).

NARCISSUS, a person of Rome, apparently of some consequence, to the believers of whose household St. Paul sent his greetings (Rom. xvi. 11). Many commentators have supposed this person the same Narcissus who was the freedman and favourite of the Emperor Claudius.

NATHAN (*given*), a prophet of the time of David. When that monarch conceived the idea of building a temple to Jehovah, the design and motives seemed to Nathan so good that he ventured to approve of it without the Divine authority, but the night following he received the Divine command, which prevented the king from executing this great work (2 Sam. vii. 2, sq.; 1 Chron. xvii.). Nathan does not again appear in the sacred history till he comes forward in the

name of the Lord to reprove David, and to denounce dire punishment for his frightful crime in the matter of Uriah and Bathsheba. This he does by exciting the king's indignation, and leading him to condemn himself, by reciting to him the very striking parable of the traveller and the lamb. Then, changing the voice of a suppliant for that of a judge and a commissioned prophet, he exclaims, 'Thou art the man!' and proceeds to announce the evils which were to embitter the remainder of his reign (2 Sam. xii. 1, sq.; comp. Ps. li.). The lamentations of the repentant king drew forth some mitigation of punishment; but the troubled history of the remainder of his reign shows how completely God's righteous doom was fulfilled. The child conceived in adultery died; but when Bathsheba's second son was born, the prophet gave him the name of Jedidiah (*beloved of Jehovah*), although he is better known by that of Solomon (2 Sam. xii. 24, 25). He recognised in this young prince the successor of David; and it was in a great measure through his interposition that the design of Adonijah to seize the crown was unsuccessful (1 Kings i. 8, sq.). Nathan probably died soon after the accession of Solomon, for his name does not again historically occur. It is generally supposed that Solomon was brought up under his care. His sons occupied high places in this king's court (1 Kings iv. 5). He assisted David by his counsels when he re-organized the public worship (2 Chron. xxix. 25); and he composed annals of the times in which he lived (1 Chron. xxix. 29; 2 Chron. ix. 29); but these have not been preserved to us. In Zechariah (xii. 12) the name of Nathan occurs as representing the great family of the prophets.

NATHANAEL (*given of God*), a person of Cana in Galilee, who, when informed by Philip that the Messiah had appeared in the person of Jesus of Nazareth, asked, 'Can any good thing come out of Nazareth?' But he nevertheless accepted Philip's laconic invitation, 'Come and see!' When Jesus saw him coming he said, 'Behold an Israelite indeed, in whom is no guile.' Astonished to hear this from a man to whom he supposed himself altogether unknown, he asked, 'Whence knowest thou me?' And the answer, 'Before that Philip called thee, when thou wast under the fig-tree, I saw thee,' wrought such conviction on his mind that he at once exclaimed, 'Rabbi, thou art the son of God; thou art the king of Israel!' (John i. 45-51). It is clear, from the effect, that Nathanael knew by this that Jesus was supernaturally acquainted with his disposition and character, as the answer had reference to the private acts of devotion, or to the meditations which filled his mind, when under the fig-tree in his garden. It is questioned whether Jesus had actually seen Nathanael or not with his bodily eyes. It matters not to the result; but the form of the words employed seems to suggest that he had actually noticed him when under the fig-tree, and had then cast a look through his inward being. It is believed that Nathanael is the same as the apostle Bartholomew. All the disciples of John the Baptist named in the first chapter of St. John became apostles; and St. John does not name Bartholomew, nor the other evangelists Nathanael in the lists of the apostles (Matt. x. 3; Mark iii. 18; Luke vi. 14); besides, the name of Bartholomew always follows that of Philip; and it would appear

that Bartholomew (son of Tholmai) is no more than a surname [BARTHOLOMEW].

NATIONS, DISPERSION OF. Under this or some similar designation, it has been the prevalent opinion that the *outspreading*, which is the entire subject of Genesis, ch. x., and the *scattering* narrated in ch. xi. 1-9, refer to the same event, the latter being included in the former description, and being a statement of the *manner* in which the separation was effected. From this opinion, however, we dissent. An unbiased reading of the text appears most plainly to mark the distinctness, in time and character, of the two narratives. The first was universal, regulated, orderly, quiet, and progressive; the second, local, embracing only a part of mankind, sudden, turbulent, and attended with marks of the Divine displeasure.

The former is introduced and entitled in these words:—‘Shem, and Ham, and Japheth:—these are the three sons of Noah; and from them was the whole earth overspread.’ After the mention of the sons of Japheth, it is added, ‘From these the isles of the nations were dispersed, in their lands, each to its language, to their families, in their nations.’ A formula somewhat differing is annexed to the descendants of Ham: ‘These are the sons of Ham, [according] to their families, to their tongues, in their lands, in their nations.’ The same phrase follows the enumeration of the house of Shem: and the whole concludes with, ‘These are the families of the sons of Noah, [according] to their generations, in their nations; and from these the nations were dispersed in the earth after the Flood’ (Gen. ix. 19; x. 5, 20, 31, 32).

The second relation begins in the manner which often, in the Hebrew Scriptures, introduces a new subject. We shall present it in a literality even servile, that the reader may gain the most prompt apprehension of the meaning. ‘And it was all the earth (but with perfect propriety it might be rendered *the whole land, country, region, or district*): lip one and words one [i. e. *the same, similar*]. And it was in their going forwards that they discovered a plain in the country Shinar; and they fixed [their abode] there.’ Then comes the narrative of their resolving to build a lofty tower which should serve as a signal-point for their rallying and remaining united. The defeating of this purpose is expressed in the anthropomorphism which is characteristic of the earliest Scriptures, and was adapted to the infantile condition of mankind. ‘And Jehovah scattered them from thence upon the face of the whole earth [or *land*], and they ceased to build the city’ (ch. xi. 2-9).

NAVIGATION. [SUP.]

NAZARENE, an epithet constituting a part of one of the names given to our Lord. From the number of times that the epithet is employed, it appears that it became at the very first an appellation of our Lord, and was hence applied to designate his followers. Considering that the name was derived from the place where Jesus resided during the greater part of his life, we see no reason to think that at first it bore with it, in its application to him or his followers, anything of an offensive nature. Such a designation was in this case natural and proper. In process of time, however, other influences came into operation. Nazareth was in Galilee, a part of Palestine which was held in disesteem for several

reasons:—its was a provincial dialect; lying remote from the capital, its inhabitants spoke a strange tongue, which was rough, harsh, and uncouth, having peculiar combinations of words, and words also peculiar to themselves; its population was impure, being made up not only of provincial Jews, but also of heathens of several sorts, Egyptians, Arabians, Phœnicians; its people were in an especial manner given to beseiditions, which quality of character they not rarely displayed in the capital itself on occasion of the public festivals; whence may be seen the point of the accusation made against Paul, as ‘ringleader of the sect of Nazarenes’ (Acts xxiv. 5). As Galilee was a despised part of Palestine, so was Nazareth a despised part of Galilee, being a small, obscure, if not mean place. Accordingly its inhabitants were held in little consideration by other Galileans, and, of course, by those Jews who dwelt in Judæa. Hence the name Nazarene came to bear with it a bad odour, and was nearly synonymous with a low, ignorant, and uncultured, if not un-Jewish person (Kuinoel, in Matt. ii. 23). It became accordingly a contemptuous designation and a term of reproach, and as such, as well as a mere epithet of description, it is used in the New Testament.

NAZARITE. This word is derived from a Hebrew word, which signifies to ‘separate one’s-self;’ and as such separation from ordinary life to religious purposes must be by abstinence of some kind, so it denotes ‘to refrain from anything.’ Hence the import of the term Nazarite—one, that is, who, by certain acts of self denial, consecrated himself in a peculiar manner to the service, worship, and honour of God.

We are here, it is clear, in the midst of a sphere of ideas totally dissimilar to the genius of the Christian system; a sphere of ideas in which the outward predominates, in which self-mortification is held pleasing to God, and in which man’s highest service is not enjoyment with gratitude, but privation with pain.

It may be questioned, if at least so much of this set of notions as supposes the Deity to be gratified and conciliated by the privations of his creatures, is in harmony with the ideas of God which the books of Moses exhibit, or had their origin in the law he promulgated. The manner in which he speaks on the subject (Num. vi. 1-21) would seem to imply that he was not introducing a new law, but regulating an old custom; for his words take for granted, that the subject was generally and well known, and that all that was needed was such directions as should bring existing observances into accordance with the Mosaic ritual.

The law of the Nazarite, which may be found in Num. vi., is, in effect, as follows:—male and female might assume the vow; or doing so a person was understood to separate himself unto the Lord; this separation consisted in abstinence from wine and all intoxicating liquors, and from everything made therefrom: ‘From vinegar of wine, and vinegar of strong drink; neither shall he drink any liquor of grapes, nor eat moist grapes or dried;’ he was to ‘eat nothing of the vine-tree, from the kernels even to the husks.’ Nor was a razor to come upon his head all the time of his vow; he was to ‘be holy, and let the locks of the hair of his head grow.’ With special care he was

to avoid touching any dead body whatever. Being holy unto the Lord, he was not to make himself unclean by touching the corpse even of a relative. Should he happen to do so, he was then to shave his head and offer a sin-offering and a burnt-offering; thus making an atonement for himself, 'for that he sinned by the dead.' A lamb also, of the first year, was to be offered as a trespass-offering. On the termination of the period of the vow the Nazarite himself was brought unto the door of the tabernacle of the congregation, there to offer a burnt-offering, a sin-offering, a peace-offering, and a meat and a drink-offering. The Nazarite also shaved his head at the door of the tabernacle, and put the hair grown during the time of separation into the fire which was under the sacrifice of the peace-offerings. 'And the priest shall take the sodden shoulder of the ram and one unleavened cake out of the basket, and one unleavened wafer, and shall put them in the hands of the Nazarite after the hair of his separation is shaven; and the priest shall wave them for

a wave-offering.' 'After that the Nazarite may drink wine.'

There are not wanting individual instances which serve to illustrate this vow, and to show that the law in the case went into operation. Hannah, Samson's mother, became a Nazarite that she might have a son. Samson himself was a Nazarite from the time of his birth (Judg. xiii.).

From the language employed by Samson, as well as from the tenor of the law in this case, the retention of the hair seems to have been one essential feature in the vow. It is, therefore, somewhat singular that any case should have been considered as the Nazaritic vow in which the shaving of the head is put forth as the chief particular. St. Paul is supposed to have been under this vow, when (Acts xviii. 18) he is said to have 'shorn his head in Cenchrea, for he had a vow' (see also Acts xxi. 24). The head was not shaven till the vow was performed, when a person had not a vow.

NAZARETH, a town in Galilee, in which the

262. [Nazareth.]

parents of Jesus were resident, and where in consequence he lived till the commencement of his ministry. It derives all its historical importance from this circumstance, for it is not even named in the Old Testament or by Josephus: which suffices to show that it could not have been a place of any consideration, and was probably no more than a village.

Nazareth is situated about six miles W.N.W. from Mount Tabor, on the western side of a narrow oblong basin, or depressed valley, about a mile long by a quarter of a mile broad. The buildings stand on the lower part of the slope of the western hill, which rises steep and high above them. It is now a small, but more than usually well-built place, containing about three thousand inhabitants, of whom two-thirds are Christians.

The flat-roofed houses are built of stone, and are mostly two stories high. The environs are planted with luxuriantly-growing fig-trees, olive-trees, and vines, and the crops of corn are scarcely equalled throughout the length and breadth of Canaan. All the spots which could be supposed to be in any way connected with the history of Christ are, of course, pointed out by the monks and local guides, but on authority too precarious to deserve any credit, and with circumstances too puerile for reverence. It is enough to know that the Lord dwelt here; that for thirty years he trod this spot of earth, and that his eyes were familiar with the objects spread around. In the south-west part of the town is a small Maronite church, under a precipice of the hill, which here breaks off in a perpendicular wall forty or fifty feet in

height. Dr. Robinson noticed several such precipices in the western hill around the village, and with very good reason concludes that one of these, probably the one just indicated, may well have been the spot whither the Jews led Jesus, 'unto the brow of the hill whereon the city was built, that they might cast him down headlong' (Luke iv. 28-30); and not the precipice, two miles from the village, overlooking the plain of Esdraelon, which monkish tradition indicates to the traveller as the 'Mount of Precipitation.'

NEAPOLIS, a maritime city of Macedonia, near the borders of Thrace, now called Napoli. Paul landed here on his first journey into Europe (Acts xvi. 11).

NEBAI'OTH, or NEBAJOTH, the first-born son of Ishmael (Gen. xxv. 13; 1 Chron. i. 29), and the prince or *sheikh* of one of the twelve Ishmaelitic tribes, which, as well as the territory they occupied, continued to bear his name in after times (Gen. xxv. 16; comp. ch. xvii. 20). One of Esau's wives, Mahalath, otherwise called Bashemath, is expressly designated as 'the sister of Nebaioth' (Gen. xxviii. 9; xxxvi. 3); and by a singular coincidence the land of Esau, or Edom, was ultimately possessed by the posterity of Nebaioth. In common with the other Ishmaelites, they first settled in the wilderness 'before' (i. e. to the east of) their brethren, the other descendants of Abraham; by which we are probably to understand the great desert lying to the east and south-east of Palestine (Gen. xxv. 18; xxi. 21; xvi. 12; and see the article ARABIA). From various references in Scripture it is evident that the tribe of Nebaioth for ages followed the nomadic life of shepherds.

The successful invasion of Western Asia, first by the Assyrians and afterwards by the Chaldeans, could not but affect the condition of the tribes in Northern Arabia, though we possess no record of the special results. The prophet Isaiah, after his obscure oracle regarding Dumah (ch. xxi. 11, 12), introduces a 'judgment upon Arabia,' i. e. Desert Arabia, which some suppose to have been fulfilled by Sennacherib, while others think it refers to the later events that are foretold by Jeremiah (ch. xlix. 28-33), as befalling 'Kedar and the kingdoms of Hazor,' in consequence of the ravages of Nebuchadnezzar. Be this as it may, we know that when the latter carried the Jews captive to Babylon, the Edomites made themselves masters of a great part of the south of Palestine (IDUMEA), while either then or at a later period they themselves were supplanted in the southern part of their own territory by the Nabatheans, though doubtless this general designation included a variety of Arab races who took their common name from the progenitor of the largest or most influential tribe, Nebaioth, the first-born of Ishmael.

The territory occupied by the Nabatheans in its widest sense included the whole of Northern Arabia from the Euphrates to the Eilatitic Gulf of the Red Sea; but more strictly taken it denoted (at least in later times) only a portion of the southern part of that vast region. We first hear of the Nabatheans in history in the reign of Antigonos, who succeeded Alexander the Great in Babylon, and died in the year B.C. 301. He sent two expeditions against them, but both were unsuccessful. The Nabatheans were as yet essen-

tially a pastoral people, though they were likewise engaged in commerce, which they afterwards prosecuted to a great extent, and thereby acquired great riches and renown. It was in this way that they gradually became more fixed in their habits; and living in towns and villages they were at length united under a regular monarchical government, constituting the kingdom of Arabia, or more strictly Arabia Petraea, the name being derived not, as some suppose, from the rocky nature of the country, but from the chief city Petra.

The common name of the kings of Arabia Petraea was either Aretas or Obodas. Even in the time of Antiochus Epiphanes (about B.C. 166), we read in 2 Macc. v. 8, of an Aretas, king of the Arabians; and from that period downwards they came frequently into contact both with the Jews and Romans, as may be seen in the books of the Maccabees and the writings of Josephus. Long before the kingdom of Arabia was actually conquered by the Romans, its sovereigns were dependent on the Roman power. An expedition was sent thither by Augustus, under Elus Gallus, governor of Egypt, and a personal friend of the geographer Strabo, who has left us an account of it. After various obstacles, he at last reached Albus Pagnis, the emporium of the Nabatheans, and the port of Petra, which was probably at or near Elath. Another friend of Strabo, the Stoic philosopher Athenodorus, had spent some time in Petra, and related to him with admiration how the inhabitants lived in entire harmony and union under excellent laws. The kingdom was hereditary; or at least the king was always one of the royal family, and had a prime minister or vizier, who was styled the *king's brother*. Another Arabian king of the name of Aretas is the one mentioned by St. Paul (2 Cor. ii. 32; comp. Acts vii. 24, 25; Joseph. *Antiq.* xviii. 5, 1). We find that a former Aretas had been invited to assume the sovereignty by the inhabitants of Damascus; and now, during the weak reign of Caligula, the same city is seized by another Aretas, and governed through an *ethnarch*, as related by Paul. The kingdom of Arabia Petraea maintained its nominal independence till about A.D. 105, in the reign of the Emperor Trajan, when it was subdued by Cornelius Palma, governor of Syria, and annexed to the vast empire of Rome.

The Nabatheans had, as we have seen, early applied themselves to commerce, especially as carriers of the products of Arabia, India, and the far-distant East, which, as we learn from Strabo, were transported on camels from the above-mentioned Leuke Kome to Petra, and thence to Rhinocoloura (el-Arish) and elsewhere. But under the Roman dominion the trade of these regions appears to have widely extended itself, and to have flourished in still greater prosperity; probably from the circumstance that the lawless rapacity of the adjacent nomadic hordes was now kept in check by the Roman power, and particularly by the garrisons which were everywhere established for this specific purpose. The country, too, was now rendered more accessible, and the passage of merchants and caravans more practicable, by military ways. But as the power of Rome fell into decay, the Arabs of the desert would seem again to have acquired the ascend-

ancy. They plundered the cities, but did not destroy them; and hence those regions are still full of uninhabited, yet stately and often splendid ruins, of ancient wealth, and taste, and greatness. Even Petra, the rich and impregnable metropolis, was subjected to the same fate; and now exists, in its almost inaccessible loneliness, only to excite the curiosity of the scholar, and the wonder of the traveller, by the singularity of its site, its ruins, and its fortunes.

In the course of the fourth century this region came to be included under the general name of 'Palestine.' It became the diocese of a metropolitan, whose seat was at Petra, and who was afterwards placed under the patriarch of Jerusalem. With the Mohammedan conquest in the seventh century its commercial prosperity disappeared. Lying between the three rival empires of Arabia, Egypt, and Syria, it lost its ancient independence; the course of trade was diverted into new channels; its great routes were abandoned; and at length the entire country was quietly yielded up to the Bedawees of the surrounding wilderness, whose descendants still claim it as their domain. During the twelfth century it was partially occupied by the Crusaders, who gave it the name of *Arabia Tertia*, or *Syria Sobal*. From that period it remained unvisited by Europeans, and had almost disappeared from their maps, until it was partially explored, first by Setzen in 1807, and more fully by Burckhardt in 1812; and now the wonders of the Wady Mûsa are familiarly known to all.

1. NEBO, a Chaldean idol mentioned in Isa. xli. 1, and supposed to have been the symbol of the planet Mercury, the celestial scribe and interpreter of the gods, answering to the Hermes and Anubis of the Egyptians. He was likewise worshipped by the Sabians in Arabia. The divine worship paid to this idol by the Chaldeans and Assyrians is attested by many compound proper names of which it forms part, as *Nebuchadnezzar*, *Nebuzaradan*, *Nebushashban*; besides others mentioned in classical writers,—*Nabonidus*, *Nabonassar*, *Naburianus*, *Nabonabus*, *Nabopolassar*.

2. NEBO, the name of a mountain on the confines of Moab (Dent. xxxii. 49; xxxiv. 1), and of a town near it (Num. xxxii. 3, 38; Isa. xv. 2). Since the time of Setzen and Burckhardt, Mount Nebo has been usually identified with Mount Attarus, east of the Dead Sea.

3. NEBO, a town in the tribe of Judah (Ezra ii. 29); or more fully, in order to distinguish it from the preceding, 'the other Nebo' (Neh. vii. 33).

NEBUCHADNEZZAR (Kings, Chronicles, and Daniel; Jer. xxvii.; xxviii.; xxxiv. 1; xxxix. 1; Ezek. xxvi. 7; and Ezra v. 12; written also Nebuchadrezzar, generally in Jeremiah, and in Ezek. xxx. 18) was the name of the Chaldean monarch of Babylon by whom Judah was conquered, and the Jews led into their seventy years' captivity. The name of this monarch has been commonly explained to signify the *treasure of Nebo*, but according to some it signifies *Nebo the prince of gods*.

The only notices which we have of this monarch in the canonical writings are found in the books of Kings, Chronicles, Daniel, and Ezra, and in the allusions of the prophets Jeremiah and Ezekiel.

From 2 Kings xxiii. 29, and 2 Chron. xxxv. 20, we gather that in the reign of Josiah (n.c. 610), Pharaoh Necho, king of Egypt, having approached by sea the coast of Syria, made a friendly application to King Josiah to be allowed a passage through his territories to the dominions of the Assyrian monarch, with whom he was then at war: 2 Chron. xxxv. 20, 21). The design of Pharaoh-Necho was to seize upon Carchemish (Circesium or Cercus um), a strong post on the Euphrates; but Josiah, who was tributary to the Babylonian monarch, opposed his progress at Megiddo, where he was defeated and mortally wounded [JOSIAH]. Necho marched upon Jerusalem, when the Jews became tributary to the king of Egypt. Upon this, Nebuchadnezzar, king of Babylon (2 Kings xxiv. 1; 2 Chron. xxxvi. 6, where this monarch's name is for the first time introduced), invaded Judah, retook Carchemish, with the territory which had been wrested from him by Necho, seized upon Jehoiachin, the vassal of Pharaoh-Necho, and reduced him to submission. (n.c. 607). Jehoiachin was at first loaded with chains, in order to be led captive to Babylon, but was eventually restored by Nebuchadnezzar to his throne, on condition of paying an annual tribute. Nebuchadnezzar carried off part of the ornaments of the Temple, together with several hostages of distinguished rank, among whom were the youths Daniel and his three friends Hananiah, Azariah, and Mishael (Dan. i.). These were educated at court in the language and sciences of the Chaldeans, where they subsequently filled offices of distinction. The sacred vessels were transferred by Nebuchadnezzar to his temple at Babylon (Isa. xxxix.; 2 Chron. xxxvi. 6, 7) [BABYLON].

After the conquest of Judæa, Nebuchadnezzar turned his attention towards the Egyptians, whom he drove out of Syria, taking possession of all the land between the Euphrates and the river (2 Kings xxiv. 7): which some suppose to mean the Nile, but others a small river in the desert, which was reckoned the boundary between Palestine and Egypt.

The fate of Jerusalem was now rapidly approaching its consummation. After three years of fidelity, Jehoiachin renounced his allegiance to Babylon, and renewed his alliance with Necho, when Nebuchadnezzar sent incursions of Ammonites, Moabites, and Syrians, together with Chaldeans, to harass him. At length, in the eleventh year of his reign, he was made prisoner, and slain (Jer. xxii.) [JEHOAKIM]. He was succeeded by his son Jehoiachin, who, after three months' reign, surrounded himself with his family to Nebuchadnezzar, who had come in person to besiege Jerusalem, in the eighth year of his reign (2 Kings xxiv. 10-12) [JEHOACHIN]. Upon this occasion all the most distinguished inhabitants, including the artificers, were led captive [CAPTIVITIES]. Among the captives, who amounted to no less than 50,000, were Ezekiel (Ezek. i. 1) and Mordecai [ESTHER]. The golden vessels of Solomon were now removed, with the royal treasures, and Mattaniah, the brother of Jehoiachin, placed on the throne by Nebuchadnezzar, who gave him the name of Zedekiah, and bound him by an oath not to enter into an alliance with Egypt. Zedekiah, however, in the ninth year of his reign, formed an alliance with Pha-

raoh-Hopra, the successor of Necho. Hopra, coming to the assistance of Zedekiah, was driven back into Egypt by Nebuchadnezzar, who finally captured Jerusalem in the eleventh year of Zedekiah's reign (B.C. 588) [ZEDEKIAH]. The Temple, and the whole city, with its towers and walls, were all razed to the ground by Nebuzaradan, Nebuchadnezzar's lieutenant, and the principal remaining inhabitants put to death by Nebuchadnezzar at Riblah. Jeremiah was, however, spared, and Gedaliah appointed governor. He was shortly after murdered by Ishmael, a member of the royal family, who was himself soon obliged to take refuge among the Ammonites. Many of the remaining Jews fled into Egypt, accompanied by Jeremiah; those who remained were soon after expatriated by Nebuchadnezzar, who depopulated the whole country.

He next undertook the siege of Tyre, and after its destruction proceeded to Egypt, now distracted by internal commotions, and devastated or made himself master of the whole country from Migdol to Syene (according to the reading of the Seventy, Ezek. xxix. 10; xxx. 6), transferring many of the inhabitants to the territory beyond the Euphrates.

We have referred to the captivity of the prophet Daniel, and have to turn to the book which bears his name for the history of this prophet, who, from an exile, was destined to become the great protector of his nation. In the second year of the reign of Nebuchadnezzar, Daniel, who was found superior in wisdom to the Chaldean magi, was enabled not only to interpret, but to reveal a dream of Nebuchadnezzar's, the very subject of which that monarch had forgotten [DREAMS]. This was the dream of the statue consisting of four different metals, which Daniel interpreted of four successive monarchies, the last of which was to be the reign of the Messiah. Daniel was elevated to be first minister of state, and his three friends were made governors of provinces. The history of these events (Dan. ii. 4, 8, 9) is written in the Chaldee language, together with the narrative which immediately follows (ch. iii.), of the golden statue erected by Nebuchadnezzar in the plain of Dura, for refusing to worship which, Daniel's three friends were thrown into a furnace, but miraculously preserved. The fourth chapter, also written in Chaldee, contains the singular history of the judgment inflicted on Nebuchadnezzar as a punishment for his pride, and which is narrated in the form of a royal proclamation from the monarch himself, giving an account to his people of his affliction and recovery. This affliction had been, by the monarch's account, predicted by Daniel a year before, in the interpretation of his fearful dream of the tree in the mid-st of the earth. While walking in his palace, and admiring his magnificent works, he uttered, in the plenitude of his pride, the remarkable words recorded in ver. 30, 'Is not this great Babylon that I have built for the house of the kingdom, by the might of my power, and for the honour of my majesty? He had scarce uttered the words, when a voice from heaven proclaimed to him that his kingdom was departed from him; that he should be for seven times (generally supposed to mean years, although some reduce the period to fourteen months) driven from the habitations of men to dwell among the beasts of the field, and made to

eat grass as an ox, until he learned 'that the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will.' The sentence was immediately fulfilled, and Nebuchadnezzar continued in this melancholy state during the predicted period, at the end of which he was restored to the use of his understanding (ver. 36). We have no account in Scripture of any of the actions of this monarch's life after the period of his recovery, but the first year of the reign of his successor Evil-merodach is represented as having taken place in the thirty-seventh year of Jehoia-chin, answering to B.C. 562 (2 Kings xxv. 27).

The difficulties attending the nature of the disease and recovery of Nebuchadnezzar have not escaped the notice of commentators in ancient as well as modern times. Origen supposed that the account of Nebuchadnezzar's metamorphosis was merely a representation of the fall of Lucifer. Bodin maintains that Nebuchadnezzar underwent an actual metamorphosis of soul and body, a similar instance of which is given by Clavier on the testimony of an eye-witness. Tertullian confines the transformation to the body only, but without loss of reason, of which kind of metamorphosis St. Augustine reports some instances said to have taken place in Italy, to which he himself attaches little credit; but Gaspard Peucer asserts that the transformation of men into wolves was very common in Livonia. Some Jewish Rabbins have asserted that the soul of Nebuchadnezzar, by a real transmigration, changed places with that of an ox; while others have supposed not a real, but an apparent or doctetic change, of which there is a case recorded in the life of St. Macarius, the parents of a young woman having been persuaded that their daughter had been transformed into a mare. The most generally received opinion, however, is, that Nebuchadnezzar laboured under that species of hypochondriacal monomania which leads the patient to fancy himself changed into an animal or other substance, the habits of which he adopts. To this disease of the imagination physicians have given the name of Lycanthropy, Zoonthropy, or Insania Canina [DISEASES OF THE JEWS].

NEBUSHAS'BAN (Jer. xxxix. 13), a follower of Nebu; the name of one of the Babylonian officers sent by Nebuzaradan to take Jeremiah out of prison.

NEBUZAR'ADAN (1 Kings xxv. 8; Jer. xxxix. 9; xl. 1; lii. 12, &c.). 'Nebu is the Lord,' according to the Hebrew; or, according to the Persian, 'Nebu is wise.' The name of the captain of Nebuchadnezzar's guard, by whom the ruin of Jerusalem was completed.

NECHO, an Egyptian king, son and successor (according to Herodotus, ii. 153) of Psammetichus, and contemporary of the Jewish king Josias (B.C. 610). The wars and success of Necho, in Syria, are recorded by sacred as well as profane writers. Studious of military renown, and the furtherance of commerce, Necho, on ascending the throne of Egypt, applied himself to reorganize the army, and to equip a powerful fleet. In order to promote his purposes, he courted the Greeks, to whose troops he gave a post next to his Egyptians. He fitted out a fleet in the Mediterranean, and another in the Red Sea. Having engaged some expert Phœnician sailors, he sent them on a voyage of discovery along the coast of

Africa. To him belongs the honour of being the first to equip an expedition for the purpose of circumnavigating Africa, and he thereby ascertained the peninsular form of that continent. twenty-one centuries before the Cape of Good Hope was seen by Diaz, or doubled by Vasco de Gama.

Before entering on this voyage of discovery, Necho had commenced re-opening the canal from the Nile to the Red Sea, which had been cut many years before by Sesostris or Rameses the Great. The work, however, if we may believe Herodotus, was abandoned, an oracle warning the Egyptian monarch that he was labouring for the barbarian (Herod. ii. 158).

Necho also turned his attention to the Egyptian conquests already made in Asia: and, fearing lest the growing power of the Babylonians should endanger the territories acquired by the arms of his victorious predecessors, he determined to check their progress, and to attack the enemy on his own frontier. With this view he collected a powerful army, and entering Palestine, followed the route along the sea-coast of Judæa, intending to besiege the town of Carchemish on the Euphrates. But Josiah, king of Judah, offended at the passage of the Egyptian army through his territories, resolved to impede, if unable to prevent, their march. Necho sent messengers to induce him to desist, assuring him that he had no hostile intentions against Judæa, 'but against the house wherewith I have war; for God commanded me to make haste.' This conciliatory message was of no avail. Josiah posted himself in the valley of Megiddo, and prepared to oppose the Egyptians. In this valley the feeble forces of the Jewish king, having attacked Necho, were routed with great slaughter. Josiah, being wounded in the neck with an arrow, ordered his attendants to take him from the field. Escaping from the heavy shower of arrows with which their broken ranks were overwhelmed, they removed him from the chariot in which he had been wounded, and placing him in a 'second one that he had,' they conveyed him to Jerusalem, where he died (2 Kings xxiii. 29, sq.; 2 Chron. xxxv. 20, sq.).

Intent upon his original project, Necho did not stop to revenge himself upon the Jews, but continued his march to the Euphrates. Three months had scarcely elapsed, when, returning from the capture of Carchemish and the defeat of the Chaldeans, he learned that, though Josiah had left an elder son, Jehoahaz had caused himself to be proclaimed king on the death of his father, without soliciting Necho to sanction his taking the crown. Incensed at this, he ordered Jehoahaz to meet him 'at Riblah, in the land of Hamath;' and having detained him, and condemned the land to pay a heavy tribute, he carried him a prisoner to Jerusalem. On arriving there, Necho made Eliakim, the eldest son, king, changing his name to Jehoiakim; and taking the silver and gold which had been levied upon the Jewish nation, he returned to Egypt with the captive Jehoshaz, who there terminated his short and unfortunate career. Herodotus says that Necho, after having routed the Syrians (the Jews) at Magdolis, took Cadytis, a large city of Syria, in Palestine, which, he adds, is very little less than Sardis (ii. 159; iii. 5). By Cadytis there is scarcely a doubt

he meant Jerusalem; the word is only a Greek form of the ancient, as well as the modern, name of that city.

Pleased with his success, the Egyptian monarch dedicated the dress he wore to the Deity who was supposed to have given him the victory. He did not long enjoy the advantages he had obtained. In the fourth year after his expedition, being alarmed at the increasing power of the Babylonians, he again marched into Syria, and advanced to the Euphrates. The Babylonians were prepared for his approach. Nebuchadnezzar completely routed his army, recovered the town of Carchemish, and, pushing his conquests through Palestine, took from Necho all the territory belonging to the Pharaohs, from the Euphrates to the southern extremity of Syria (2 Kings xxiv. 7; Jer. xli. 2; 2 Chron. xxxvi. 9; 2 Kings xxiv. 8). Nebuchadnezzar deposed Jehoahaz, who had succeeded his father, and carried the warriors and treasures away to Babylon; a short time previous to which Necho died, and was succeeded by Psammetichus II.

NEG'INIOTH, a word which occurs in the titles of several Psalms [PSALMS].

NEHEMIAH (*comforted of Jehovah*). Three persons of this name occur in Scripture; one, the son of Azbuk (Neh. iii. 16), respecting whom no more is known than that he was ruler in Beth-zur, and took a prominent part in repairing the wall of Jerusalem [BETH-ZUR]. Another is mentioned (Ezra ii. 2; Neh. vii. 7) among those who accompanied Zerubbabel on the first return from captivity. Nothing further is known of this man, though some writers hold him, without valid reasons, to be the same with the well-known Jewish patriot.

NEHEMIAH, whose genealogy is unknown, except that he was the son of Hachaliah (Neh. i. 1), and brother of Hanani (Neh. vii. 2). Some think he was of priestly descent, because his name appears at the head of a list of priests in Neh. x. 1-8; but it is obvious, from Neh. ix. 38, that he stands there as a prince, and not as a priest—that he heads the list because he was head of the nation. Others with some probability infer, from his station at the Persian court and the high commission he received, that he was, like Zerubbabel, of the tribe of Judah and of the house of David.

While Nehemiah was cupbearer in the royal palace at Shushan, in the twentieth year of Artaxerxes Longimanus, or 444 years B.C. [ARTAXERXES], he learned the mournful and desolate condition of the returned colony in Judæa. This filled him with such deep and prayerful concern for his country, that his sad countenance revealed to the king his 'sorrow of heart,' which induced the monarch to ascertain the cause, and also to vouchsafe the remedy, by sending him, with full powers, to rebuild the wall of Jerusalem, and 'to seek the welfare of the children of Israel.' Being furnished with this high commission, and enjoying the protection of a military escort (ch. ii. 9), Nehemiah reached Jerusalem in the year B.C. 444, and remained there till B.C. 432, being actively engaged for twelve years in promoting the public good (ch. v. 14). The principal work which he then accomplished was the rebuilding, or rather the repairing, of the city wall, which was done 'in fifty and two days' (ch. vi. 15), notwithstanding many discouragements and difficulties, caused

chiefly by Sanballat, a Moabite of Horonaim, and Tobiah, an Ammonite, who were leading men in the rival and unfriendly colony of Samaria (ch. iv. 1-3). These men, with their allies among the Arabians, Ammonites, and Ashdodites (ch. iv. 7), sought to hinder the re-fortifying of Jerusalem, first by scoffing at the attempt; then by threatening to attack the workmen—which Nehemiah averted by 'setting a watch against them day and night,' and arming the whole people, so that 'every one with one of his hands wrought in the work, and with the other hand held a weapon' (ch. iv. 7-18); and finally, when scoffs and threats had failed, by using various stratagems to weaken Nehemiah's authority, and even to take his life (ch. vi. 1-14). But in the midst of these dangers from without, our patriot encountered troubles and hindrances from his own people, arising out of the general distress, which was aggravated by the cruel exactions and oppression of their nobles and rulers (ch. v. 1-5). These popular grievances were promptly redressed on the earnest and solemn remonstrance of Nehemiah, who had himself set a striking example of retrenchment and generosity in his high office (ch. v. 6-19). It appears also (ch. vi. 17-19) that some of the chief men in Jerusalem were at that time in conspiracy with Tobiah against Nehemiah. The wall was thus built in 'troublesome times' (Dan. ix. 25); and its completion was most joyously celebrated by a solemn dedication (ch. xii. 27-43).

Having succeeded in fortifying the city, Nehemiah turned his attention to other measures in order to secure its good government and prosperity. He appointed some necessary officers (ch. vii. 1-3; also ch. xii. 44-47), and excited among the people more interest and zeal in religion by the public reading and exposition of the law (ch. viii. 1-12), by the unequalled celebration of the Feast of Tabernacles (ch. viii. 13-18), and by the observance of a national fast, when the sins of the people and the iniquities of their fathers were publicly and most strikingly confessed (ch. ix.), and when also a solemn covenant was made by all ranks and classes 'to walk in God's law,' by avoiding intermarriages with the heathen, by strictly observing the Sabbath, and by contributing to the support of the temple service (ch. x.). But the inhabitants of the city were as yet too few to defend it and to ensure its prosperity; and hence Nehemiah brought one out of every ten in the country to take up his abode in the ancient capital, which then presented so few inducements to the settler, that 'the people blessed all the men that willingly offered themselves to dwell at Jerusalem' (ch. vii. 4; also ch. xi. 1-19).

In these important public proceedings, which appear all to have happened in the first year of his government, Nehemiah enjoyed the assistance of Ezra, who is named on several occasions as taking a prominent part in conducting affairs (ch. vii. 1, 9, 13; xii. 36). Ezra had gone up to Jerusalem thirteen years before according to some, or thirty-three years according to others; but on either reckoning, without supposing unusual longevity, he might well have lived to be Nehemiah's fellow-labourer [EZRA].

Nehemiah, at the close of his successful administration, 'from the twentieth year even to the thirty-second year of Artaxerxes the king' (ch. v.

14), returned to Babylon in the year a.c. 432, and resumed, as some think, his duties as royal cupbearer.

He returned, however, after a while, to Jerusalem, where his services became again requisite, in consequence of abuses that had crept in during his absence. His stay at the court of Artaxerxes was not very long (certainly not above nine years); 'for after certain days he obtained leave of the king and came to Jerusalem' (ch. xiii. 6, 7).

After his return to the government of Judæa, Nehemiah enforced the separation of all the mixed multitude from Israel (ch. xiii. 1-3); and accordingly expelled Tobiah the Ammonite from the chamber which the high-priest, Eliashib, had prepared for him in the temple (ch. xiii. 4-9). Better arrangements were also made for the support of the temple service (ch. xiii. 10-14), and for the rigid observance of the Sabbath (ch. xiii. 15-22). One of the last acts of his government was an effort to put an end to mixed marriages, which led him to 'chase' away a son of Joiada the high-priest, because he was son-in-law to Sanballat the Horonite (ch. xiii. 23-29). His second administration probably lasted about ten years, and terminated about the year b.c. 405, towards the close of the reign of Darius Nothus, who is mentioned in ch. xii. 22 [DARIUS]. At this time Nehemiah would be between sixty and seventy years old, if we suppose him (as most do) to have been only between twenty and thirty when he first went to Jerusalem. Of the place and year of his death nothing is known.

THE BOOK OF NEHEMIAH, which bears the title *Nehemiah's Words*, was anciently connected with Ezra, as if it formed part of the same work. It arose, doubtless, from the fact that Nehemiah is a sort of continuation of Ezra [EZRA].

The canonical character of Nehemiah's work is established by very ancient testimony.

The contents of the book have been specified above in the biography of the author. The work can scarcely be called a history of Nehemiah and his times. It is rather a collection of notices of some important transactions that happened during the first year of his government, with a few scraps from his later history. The contents appear to be arranged in chronological order, with the exception perhaps of ch. xii. 27-43, where the account of the dedication of the wall seems out of its proper place: we might expect it rather after ch. vii. 1-4, where the completion of the wall is mentioned.

As to the date of the book, it is not likely that it came from Nehemiah's hand till near the close of his life. Certainly it could not have been all written before the expulsion of the priest, recorded in ch. xiii. 23-29, which took place about the year b.c. 413.

While the book as a whole is considered to have come from Nehemiah, it consists in part of compilation. He doubtless wrote the greater part himself, but some portions he evidently took from other works. It is allowed by all that he is, in the strictest sense, the author of the narrative from ch. i. to ch. vii. 5. The account in ch. vi. 6-73 is avowedly compiled, for he says in ver. 5, 'I found a register,' &c. This register we actually find also in Ezra ii. 1-70; hence it might be thought that our author borrowed this part from Ezra;

but it is more likely that they both copied from public documents, such as 'the book of the chronicles,' mentioned in Neh. xii. 23.

Chapters viii.-x. were probably not written by Nehemiah, since the narrative respecting him is in the third person (ch. viii. 9; x. 1), and not in the first, as usual (ch. ii. 9-20). Hävernick, indeed, makes it appear, from the contents and style, that Ezra was the writer of this portion. The remaining chapters (xi.-xiii.) also exhibit some marks of compilation (ch. xii. 26, 47); but there are, on the contrary, clear proofs of Nehemiah's own authorship in ch. xii. 27-43, and in ch. xiii. 6-31; and hence Hävernick thinks he wrote the whole except ch. xii. 1-26, which he took from 'the book of the chronicles,' mentioned in ver. 23.

NEHILOTH, a word which occurs in the title of the fifth Psalm [PSALMS].

NEHUSH'TA (*brass*), the mother of king Jehoiachin (2 Kings xxiv. 8).

NER (*a light*), grandfather of king Sanl (1 Sam. xiv. 50, 51; xxvi. 5; 1 Chron. viii. 33).

NERD or NARD is mentioned in three places in the Song of Solomon, and by Mark and John in the New Testament. It is translated in the Authorized Version by the word *spikenard*, which indicates a far-famed perfume of the East, that has often engaged the attention of critics, but the plant which yields it has only been ascertained in very recent times. That the *nerd* of Scripture was a perfume is evident from the fact that, in

latry of the Assyrians and Chaldeans have led to the conclusion that Nergal is one of the names for the planet Mars. This name of the planet, both among the Zabians and Arabians, means *ill-luck, misfortune*; and it was by no means peculiar to the mythology of the West to make it the symbol of bloodshed and war. Among the people first named, the planet Mars was typified under the figure of a man holding in one hand a drawn sword, and in the other a human head just cut off; and his garments were also red, which, as well as the other ideas attached to this idol, were no doubt founded on the reddish hue which the body of the planet presents to the eye. Among the southern Arabs his temple was painted red; and they offered to him garments stained with blood, and also a warrior (probably a prisoner), who was cast into a pool.

NER'GAL-SHAREZER (*Nergal, prince of fire*). 1. A military chieftain under Nebuchadnezzar (Jer. xxxix. 3). 2. The chief of the magi (Rab-mag) under the same king, and present in the same expedition (Jer. xxxix. 3, 13).

NET. There are in Scripture several words denoting different kinds of nets, and this, with the frequency of images derived from them, shows that nets were much in use among the Hebrews for fishing, hunting, and fowling. Indeed, for the two latter purposes, nets were formerly used to an extent of which now, since the invention of fire-arms, a notion can scarcely be formed.

We have no positive information concerning the nets of the Hebrews, and can only suppose that they were not materially different from those of the ancient Egyptians, concerning which we now possess very good information. Indeed, the nets of Egypt, the fishers who used them, and the fish caught by them, are more than once mentioned in Scripture (Isa. xix. 8). The usual fishing net among this people was of a long form, like the common drag-net, with wooden floats on the upper, and leads on the lower side. It was sometimes let down from a boat, but those who pulled it usually stood on the shore, and landed the fish on a shelving bank. This mode, how-

263. [Nardostachys Jatamansi.]

Cant. i. 12; iv. 14, it is mentioned along with many of the most valued aromatics which were known to the ancients. That the nard or nardus was of great value we learn from the New Testament (Mark xiv. 3; John xii. 3).

NER'GAL. Recent inquiries into the astro-

264.

ever, was more adapted to river than to lake fishing; and hence, in all the detailed examples of fishing in the New Testament, the net is cast from and drawn into boats, excepting in one case where, the draft being too great to take into the boat, the fishers dragged the net after their boats to the shore (John xxi. 6, 8). Sometimes use was made of a smaller net for catching fish in shallow water, furnished with a pole on either side, to which it was attached; and the fisherman, holding one of the poles in either hand, thrust it below the surface of the water, and awaited the moment when a shoal of fish passed over it.

It is interesting to observe that the fishermen in the boat, excepting the taster (No. 264), are

265.

almost naked, as are also those who have occasion to wade in the water in hauling the net to the shore (No. 265). Such seems also to have been the practice among the Hebrew fishermen; for Peter, when he left the boat to hasten on shore to his risen Lord, 'girt his fisher's coat unto him, for he was naked' (John xxi. 7); although, in this case, the word 'naked' must be understood with some latitude [NAKED].

Nets were also used in taking birds, to an extent of which we can scarcely form an adequate conception. A clap-net was usually employed. This was of different kinds. It consisted of two sides or frames, over which the net-work was spread: at one end was a short net, which they fastened to a bush, or a cluster of reeds, and at the other was one of considerable length, which, as soon as the birds were seen feeding in the area within, was pulled by the fowlers, causing the instantaneous collapse of the two sides (No. 266).

266.

In hunting, a space of considerable size was sometimes enclosed with nets, into which the animals were driven by beaters. The spots thus enclosed were usually in the vicinity of the water-brooks to which they were in the habit of repairing in the morning and evening; and having awaited the time when they went to drink, the hunters disposed their nets, occupied proper positions for observing them unseen, and gradually closed in upon them. These practices are obviously alluded to in such passages as Job xix. 6; Ps. cxi. 5; Isa. li. 20.

NETHINIM. This name, which means 'the given' or 'the devoted,' was applied to the servants of the temple, or temple slaves, who were under the Levites in the ministry of the tabernacle and temple. The first servants whom the Levites obtained were the Gibeonites, on whom devolved the very laborious services of fetching water and collecting wood (Josh. ix. 3-27). The number of such servants appears to have been increased by David; and it seems to have been then, when these servants ceased to be wholly Gibeonites, that Nethinim came into use as a proper name for the whole class (Ezra viii. 20). From that time forward, they appear

to have been no longer regarded or treated as slaves, but as the lowest order of the servants of the sanctuary: who, although in their origin foreigners and heathen, had doubtless embraced the Jewish religion. These did not all forget their relationship to the sanctuary during the Captivity. Some of them returned to their duties under the decree of Cyrus, and were placed in cities with the Levites (Neh. xi. 3; Ezra ii. 70; 1 Chron. ix. 27). It was not to be expected that many of them would return to this humble station in Palestine, but 220 accompanied Ezra (Ezra viii. 20), and 392 Zerubbabel (ii. 5-8). The voluntary devotedness which was thus manifested by these persons considerably raised the station of the Nethinim, which was thenceforth regarded rather as honourable than degrading. Their number was, however, insufficient for the service of the temple; whence, as Josephus tells us, a festival, called Xylphoria, was established, in which the people, to supply the deficiency, were obliged to bring a certain quantity of wood to the temple for the use of the altar of burnt-offering.

NETOPHAI, a place not far from Bethlehem in Judæa (Ezra ii. 22; Neh. vii. 26). Hence the Gentile name Netophite (2 Sam. xxiii. 28, 29; 2 Kings xxv. 23).

NETTLES. The word (*charul*) which is so rendered, occurs in three places in Scripture. Thus in Prov. xxiv. 30, 31, it is written, 'I went by the field of the slothful, &c., and, lo, it was all grown over with thorns, and nettles (*charullim*) had covered the face thereof.' So in Job xxx. 7 it is stated that he was insulted by the children of those whom he would formerly have disdained to employ, and who were so abject and destitute that 'among the bushes they brayed; under the nettles they were gathered together'; and in Zeph. ii. 9, 'Surely Moab shall be as Sodom, and the children of Ammon as Gomorrah, even the breeding of nettles, and salt-pits, and a perpetual desolation.' Considerable difficulty has been experienced in determining the plant which is alluded to in the above passages. The majority of translators and commentators have thought that some thorny or prickly plant, or a nettle, is intended. Hence brambles, the wild plum, and thistles, have been severally selected; but nettles have had the greatest number of supporters.

NETTLE. [THORN.]

NEW MOON. [FESTIVALS; MOON.]

NEW YEAR. [YEAR.]

NIBHAZ, an idol of the Avites (2 Kings xvii. 31). In the Zabian books the corresponding name is that of an evil demon, who sits on a throne upon the earth, while his feet rest on the bottom of Tartarus; but it is doubtful whether this should be identified with the Avite Nibhaz.

NICODEMUS, a Pharisee and member of the Sanhedrim, who was impressed by what he had heard concerning Jesus; but being unwilling, on account of his station, to commit himself without greater surety than he possessed, repaired by night to the house in which Christ dwelt, and held with him that important discourse which occupies the third chapter of John's Gospel. The effect which was then produced upon his mind may be collected from the fact that subsequently, at one of the sittings of the venerable body to

which he belonged, he ventured to let fall a few words in favour of Jesus, whose proceedings were then in question (John vii. 50); and that he took part with his colleague, Joseph of Arimathea, in rendering the last honours to the body of the crucified Redeemer (John xix. 39). Nothing further is known of Nicodemus from Scripture. Tradition, however, adds that after he had thus openly declared himself a follower of Jesus, and had been baptized by Peter, he was displaced from his office, and expelled from Jerusalem (Phot. *Cod.* p. 171). It is added that he found refuge in a country house of his cousin Gamaliel, and remained there till his death. Too strong an appreciation of the world's good opinion seems to have been the failing of Nicodemus. We do not lay much stress upon what he ventured to say in the Sanhedrin; for he suffered himself to be easily put down, and did not come forward with any bold avowal of his belief. Winer calls attention to the fact, that although he took part in the sepulchral rites of Jesus, he did not join Joseph in his application to Pilate for the body of his crucified Lord; and justly remarks that such characters usually require a strong external impulse to bring them boldly forward, which impulse was probably in this case supplied by the resurrection of Jesus.

NICOLAITANS. This word occurs twice in the New Testament (Rev. ii. 6, 15). In the former passage the conduct of the Nicolaitans is condemned; in the latter, the angel of the church in Pergamus is censured because certain members of his church held their doctrine. Various traditional accounts of the origin and practices of this sect have been given by the fathers, but none of them are entitled to any credit.

It is evident from the accounts which they give, that the Nicolaitans with whom they were acquainted were Gnostics; since they impute to them the distinctive tenets and practices of the Gnostics. But in the short allusion in Rev. ii. 6, 15, there is nothing to identify the tenets or conduct alluded to with Gnosticism, even supposing that Gnosticism, properly so called, existed in the Apostolic age, which, to say the least, has not been proved to be the case. So that the conjecture mentioned by Mosheim, and which Tertullian appears to favour, may be regarded as probable, that the Nicolaitans mentioned in Revelation had erroneously been confounded with a party of Gnostics formed at a later period by one Nicholas.

The ingenious conjecture of Michaelis is worthy of consideration, who supposes that by Nicolaitans (Rev. ii. 6, 15) the same class of persons is intended whom St. Peter (2 Ep. ii. 15) describes as *followers of the way of Balaam*; and that their name, Nicolaitans, is merely a Greek translation of their Hebrew designation. The only objection which occurs to us against this very ingenious and probable supposition, arises from the circumstance that, in the passage, Rev. ii. 14, 15, both 'they that hold the doctrine of Balaam,' and 'the Nicolaitans,' are specified, and are distinguished from each other: 'So hast thou also,' the Nicolaitans, as well as the Balaamites, mentioned in the previous verse. So that whatever general agreement there might be between those two classes of heretics—and their collocation in the passage before us seems to imply that

there was such agreement—it appears equally evident that some distinction also must have separated them the one from the other.

NICOLAS, a proselyte of Antioch, and one of the seven deacons (Acts vi. 5). Nothing further is known of him; but a large body of unsafe tradition has been connected with his name, under the supposition that he was the founder of the heresy of the Nicolaitans, stigmatised in Rev. ii. 6, 15. (See the preceding article.)

NICOPOLIS, a city of Thrace, now Nicopi, on the river Nessus, now Karason, which was here the boundary between Thrace and Macedonia; and hence the city is sometimes reckoned as belonging to the latter. In Titus iii. 15, Paul expresses an intention to winter at Nicopolis, and invites Titus, then in Crete, to join him there.

NIGER. [SIMON.]

NIGHT. The general division of the night among the Hebrews has been described under DAY; and it only remains to indicate a few marked applications of the word. The term of human life is usually called a day in Scripture; but in one passage it is called *night*, to be followed soon by day, 'the day is at hand' (Rom. viii. 12). Being a time of darkness, the image and shadow of death, in which the beasts of prey go forth to devour, it was made a symbol of a season of adversity and trouble, in which men prey upon each other, and the strong tyrannize over the weak (Isa. xxi. 12; Zech. xiv. 6, 7; comp. Rev. xxi. 23; xxii. 5). Hence continued day, or the absence of night, implies a constant state of quiet and happiness, undisturbed by the vicissitudes of peace and war. Night is also put, as in our own language, for a time of ignorance and helplessness (Mic. iii. 6). In John ix. 4, night represents death, a necessary result of the correlative usage which makes life a day.

NIGHT-HAWK (Lev. xi. 16; Dent. xiv. 15) is mentioned as one of the unclean birds in the Pentateuch, but so little characterized that no decided opinion can be expressed as to what species is really intended. Commentators incline to the belief that the name imports voracity, and therefore indicates a species of owl, which, however, we take to be not this bird, but the *litbit*; and as the night-hawk of Europe, or a species very nearly allied to it, is an inhabitant of Syria, there is no reason for absolutely rejecting it in this place, since it belongs to a genus highly connected with superstitions in all countries; and though a voracious bird among moths, and other insects that are abroad during darkness, it is absolutely harmless to all other animals, and as wrongfully accused of sucking the udders of goats, as of being an indicator of misfortune and death to those who happen to see it fly past them after evening twilight; yet, beside the name of 'goat sucker,' it is denominated 'night-hawk' and 'night-raven,' as if it were a bulky species, with similar powers of mischief as those day birds possess. The night-hawk is a migratory bird, inferior in size to a thrush, and has very weak talons and bill; but the gape or mouth is wide; it makes now and then a plaintive cry, and preys on the wing; it flies with the velocity and action of a swallow, the two genera being nearly allied. Like those of most night birds, the eyes are large and remarkable, and the plumage a mixture of colours and dots, with a pre-

railling grey effect; it is finely webbed, and entirely noiseless in its passage through the air. Thus the bright eyes, wide mouth, sudden and inaudible flight in the dusk, are the original causes of the superstitious fear these birds have excited; and as there are in southern climates other species of this genus, much larger in size, with peculiarly contrasted colours, strangely disposed feathers on the head, or paddle-shaped single plumes, one at each shoulder, projecting in the form of two additional wings, and with plaintive loud voices often uttered in the night, all the species contribute to the general awe they have inspired in every country and in all ages.

NILE. [EGYPT.]

NIM'RA. [BETH-NIMRA.]

NIMROD, a son of Cush, the eldest son of Ham (Gen. x. 8-10). Five sons of Cush are enumerated in ver. 7 in the more usual manner of this chapter; but a change of phrase introduces Nimrod. This difference may indicate that while, in relation to the other five, the names have a national and geographical reference, this appellation is exclusively personal. It denotes intensively the *extremely impious rebel*. Hence we conceive that it was not his original proper name, but was affixed to him afterwards, perhaps even after his death, as a characteristic appellation.

No other persons connected with this work must be considered as answerable for the opinion which the writer of this article thinks to rest upon probable grounds, that the earlier part of the book of Genesis consists of several independent and complete compositions, of the highest antiquity and authority, marked by some differences of style, and having clear indications of commencement in each instance. If this supposition be admitted, a reason presents itself for the citation of a proverbial phrase in ch. x. 9. The single instance of minute circumstantiality, in so brief a relation, seems to imply that the writer lived near the age of Nimrod, while his history was still a matter of traditional notoriety, and the comparison of any hero with him was a familiar form of speech. It is also supposed that those, not fragments, but complete, though short and separate compositions (of which eight or more are hypothetically enumerated in J. P. Smith's *Scripture and Geology*, p. 202), were, under Divine authority, prefixed by Moses to his own history. Their series has a continuity generally, but not rigorously exact. If we place ourselves in such a point of time, suppose the age succeeding Nimrod, which might be the third century after the Deluge, we may see how naturally the origination of a common phrase would be in the writer's mind; and that a motive of usefulness would be suggested with it. But both these ideas involve that of nearness to the time; a period in which the country traditions were yet fresh, and an elucidation of them would be acceptable and consonant to general feeling. The following is a close translation of the passage in which mention is made of Nimrod:—'And Cush begat Nimrod: he began to be a hero in the earth [or in the land]: he was a hero at the chase in the presence of Jehovah; on which account the saying is, Like Nimrod, the hero of the chase, in the presence of Jehovah. And the chief [city]

of his dominion was Babel; and [he founded] Ezeek and Akkad, and Kaluch, in the land of Shinar.'

Interpreters, with scarcely an exception, from the S-pinagint and the Targums down to our own times, understand the whole case thus: that Nimrod was a man of vast bodily strength, and eminent for courage and skill in the arts of hunting down and capturing or killing the dangerous animals, which probably were both very numerous and frequently of enormous size; that, by these recommendations, he made himself the favourite of bold and enterprising young men, who readily joined his hunting expeditions; that hence he took encouragement to break the patriarchal union of venerable and peaceful subordination, to set himself up as a military chieftain, assailing and subduing men, training his adherents into formidable troops, by their aid subduing the inhabitants of Shinar and its neighbouring districts; and that, for consolidating and retaining his power, now become a despotism, he employed his subjects in building forts, which became towns and cities, that which was afterwards called Babel being the principal. Combining this with the contents of chapter xi., we infer that Nimrod either was an original party in the daring impiety of building the tower, or subsequently joined himself to those who had begun it. The former fact is positively affirmed by Josephus; but it is not probable that he could have any other evidence than that of the general interpretation of his countrymen. The late Mr. Rich, not thirty years ago, in the extensive plain where lie buried the ruins of Babylon, discovered the very remarkable mound with remains of buildings on its summit (of which see the figure in the article BABEL), which even now bears the name of *Birs Nimrod*; and this may well be regarded as some confirmation of the common opinion.

As a great part of the ancient mythology and idolatry arose from the histories of chiefs and sages, decorated with allegorical fables, it is by no means improbable that the life and actions of Nimrod gave occasion to stories of this kind. Hence, some have supposed him to have been signified by the Indian Bacchus, deriving that name from *Bar-Chus*, 'son of Cush'; and, it is probable, by the Persian giant *Gibber* (answering to the Hebrew *Gibbor*, 'mighty man,' 'hero,' in Gen. x. 8, 9); and by the Greek *Orion*, whose fame as a 'mighty hunter' is celebrated by Homer, in the *Odyssey*, xi. 571-4. The Persian, and the Grecian fables are both represented by the well-known and magnificent constellation.

NINEVEH, meaning the dwelling of Nimus; a famous city of the ancient world, capital of the great Assyrian empire, which stood on the eastern bank of the river Tigris, opposite to the present Mosul; its actual site being most probably the same with that of Ninnia and the tomb of Jonah, at about three-fourths of a mile from the river, in the midst of ruins, N. lat. 36° 20' 17"; E. long. 43° 10' 17". The Bible makes the city a sort of colony from Babylon or Babel, Shinar [see BABEL], stating (Gen. x. 11), 'out of that land [Babel, &c., in the land of Shinar] went forth Asshur and builded Nineveh.' After this simple statement the sacred record is for a long time entirely silent respecting Nineveh, which, we

may therefore presume, remained inconsiderable for many generations. At length, some fifteen hundred years after the first mention of the place, in the days of Jeroboam II., king of Israel (b.c. 825), Nineveh again enters by name on the Biblical record, having meanwhile grown into a mighty power. This re-appearance of Nineveh is accidental, and shows that the Bible does not profess to give any orderly and systematic history of the world. Other countries come on the scene and disappear, just as the course of events in the kingdoms of Judah and Israel seems to require or may chance to occasion. Nineveh is described in the book of Jonah as 'that great city,' 'an exceeding great city of three days' journey,' probably in a straight line through the place, as the large cities of Asia stood on a great extent of country, having gardens, and even fields, in the midst of them; and Jonah is said to enter into the city a day's journey' (ch. iii. 4)

before he began to foretell its overthrow; that is, as is most likely, he penetrated into the heart of the place, as being that which was most suitable for delivering his burden. The magnitude of the place may also be gathered from what is said in the last verse of the book: 'That great city, wherein are more than six score thousand persons that cannot discern between their right hand and their left hand, and also much cattle (grazing).' The population of a place must have been immense in which there were no fewer than 120,000 children—young children the language employed seems to denote. It also appears from the same book that the state of society was highly complex, organized in divers ranks from the king and the noble to the peasant; and, if we may argue from the exactness with which the number of children is given, we should be justified in asserting that the people were in an advanced stage of civilization, seeing that their social sta-

267. [Nineveh.]

tistics were well attended to and carefully preserved. Civilization, however, had brought luxury, and luxury corruption of morals, for 'their wickedness had gone up before God' (ch. i. 2). Yet was not their iniquity of the lowest kind, for the Ninevites repented at the preaching of Jonah.

A few years later we find the prophet Nahum intrusted with 'the burden of Nineveh.' From this book it would appear that the repentance of the city, if sincere, was not durable. Therefore was the anger of Jehovah about to fall upon it and make it a perpetual waste. The impending destruction of this 'great city' was also foretold by Zephaniah (ii. 13), and by Isaiah (xiv. 24) in language which gives a striking view of its commercial greatness (it was the entrepôt for the trade of Eastern and Western Asia), its surpassing opulence, its high culture, its immense population, and deep criminality (see Nahum, chap. iii.,

and Ezek. chap. xxxi.). From Strabo we learn that the place was much greater than even Babylon; and from Diodorus Siculus, that it measured 480 stadia in circumference, having very high and broad walls, which, aided by the river, rendered it impregnable. This safety was, however, merely imaginary. Sardanapalus, who had a full share of the vices of his subjects, endured in the eighth century before Christ a siege of three years' duration at the hands of the Medes, under Arbaces, which led to the overthrow of the city (Diod. Sic. ii. 26). But so large and so powerful a capital was not easily destroyed. Nineveh was the seat of an Assyrian kingdom till the year b.c. 625, when it was taken by Nabopolassar of Babylon, and Cyaxares, king of the Medes, which led to the destruction of the Assyrian kingdom. Nineveh flourished no more. Strabo represents it as lying waste; though in the times of the Roman emperors some remains of it seem to have

survived, as a Nineveh on the Tigris is mentioned in Tacitus, and is characterized as a fort, probably some small fortification raised out of the ruins of the city for predatory purposes.

The present remains comprise a rampart and foss, four miles in circuit, with a moss-covered wall about twenty feet in height. The ruins at first sight present a range of hills. From these hills large stones are constantly dug out, from which probably a bridge over the Tigris has been built.

Jonah's connection with the city is still preserved in a tomb which bears his name; but how far back in antiquity this building runs, it is now impossible to say. The tomb stands on a hill, and is covered by a mosque which is held in great veneration. Bricks, partly whole, partly in fragments, and pieces of gypsum with inscriptions in the arrow-head character, are found from time to time. Landseer, in his *Sabian Researches*, gives an engraving of cylinders dug up at Nineveh, which he states to be numerous in the East, and supposes to have been employed as signets: they are of jasper, chalcidony, and jade, and bear astronomical emblems, the graving of which, especially considering the hardness of the materials, shows a high state of art.

Mosul, with which Nineveh is commonly identified, stands on the opposite, or western bank of the Tigris, and lies so near the river that its streets are often flooded. This place, like its great prototype, carries on a trade (though to a small extent) between the East and the West. The climate is stated to be very healthy; the average temperature of summer not exceeding 66° Fahr.; but in spring, during the floods, epidemics are common, though not fatal.

NISAN, the first month of the Hebrew civil year. Abib, by which name this month is called in the Pentateuch (Exod. xiii. 4; xxiii. 15; Dent. xvi. 1), means an ear of grain, a green ear; and hence 'the month Abib' is 'the month of green ears.' It thus denoted the condition of the barley in the climate of Egypt and Palestine in this month. Nisan, otherwise Abib, began with the new moon of April, or, according to the Rabbins, of March [MONTH].

NIS'ROCH, an idol of the Ninevites (2 Kings xix. 37; Isa. xxxvii. 38). The word is now usually supposed to mean 'great eagle.' This bird was held in peculiar veneration by the ancient Persians; and was likewise worshipped by the Arabs before the time of Mohammed.

NITRE occurs in Prov. xxv. 20; Jer. ii. 22; where the substance in question is described as effervescing with vinegar, and as being used in washing; neither of which particulars applies to what is now, by a misappropriation of this ancient name, called 'nitre,' and which in modern usage means the sulphate of commerce, but they both apply to the *natron*, or true *nitrum* of the ancients. Natron, though found in many parts of the East, has ever been one of the distinguishing natural productions of Egypt. The principal natron lakes now found in that country, six in number, are situate in a barren valley about thirty miles westward of the Delta, where it both floats as a whitish scum upon the water, and is found deposited at the bottom in a thick incrustation, after the water is evaporated by the heat of summer. It is a natural mineral alkali, composed of the car-

bonate, sulphate, and muriate of soda, derived from the soil of that region. Forsköl says that it is known by the name *atran*, or *natrun*, that it effervesces with vinegar, and is used as soap in washing linen, and by the bakers as yeast, and in cookery to assist in boiling meat, &c. Combined with oil it makes a harder and firmer soap than the vegetable alkali.

NO, or NO-AMMON. [THEBES.]

NOAH, the second father of the human race, was the son of the second Lamech, the grandson of Methuselah, and the tenth in descent from Adam.

The father of Noah must not be confounded with the Lamech who was the fourth in descent from Cain. The two Lamechs have one remarkable circumstance in common; to each of them a fragment of inartificial poetry is attached as his own composition. That of the Cainitic Lamech is in Gen. iv. 23, 24. That of the Sethite now comes before us in ch. v. 28, 29:—'Lamech lived 182 years, and then begat a son, and he called his name NOAH, saying

This shall comfort us

From our labour,

And from the sorrowful toils of our hands;

From the ground,

Which Jehovah hath cursed.'

The allusion is undoubtedly to the penal consequences of the fall in earthly toils and sufferings, and to the hope of a Deliverer excited by the promise made to Eve. That this expectation was grounded upon a divine communication we infer from the importance attached to it, and the confidence of its expression.

That the conduct of Noah corresponded to the faith and hope of his father we have no reason to doubt. The brevity of the history satisfies not human curiosity. He was born six hundred years before the Deluge. We may reasonably suppose that through that period he maintained the character given of him:—'Noah found favour in the eyes of the Lord. Noah was a just man, and perfect in his generations. Noah walked with God' (ch. vi. 8, 9). These words declare his piety, sincerity, and integrity, that he maintained habitual communion with the Father of Mercies, by the exercises of devotion, and that he was an inspired instrument of conveying the will of God to mankind. The wickedness of the human race had long called upon the wisdom and justice of God for some signal display of his displeasure, as a measure of righteous government and an example to future ages. For a long time, probably many centuries, the better part of men, the descendants of Seth, had kept themselves from society with the families of the Cainite race. The former class had become designated as 'the sons of God,' faithful and obedient: the latter were called by a term evidently designed to form an appellation of the contrary import, 'daughters of men,' of impious and licentious men. These women possessed beauty and blandishments, by which they won the affections of unwary men, and intermarriages upon a great scale took place. As is usual in such alliances the worse part gained the ascendancy. The offspring became more depraved than the parents, and a universal corruption of minds and morals took place. Many of them became 'giants, the mighty men of old, men of renown,' apostates (as the word implies),

hermes, warriors, plunderers, 'filling the earth with violence.' God mercifully afforded a respite of one hundred and twenty years (ch. vi. 3; 1 Pet. iii. 20; 2 Pet. ii. 5), during which Noah sought to work salutary impressions upon their minds, and to bring them to repentance. Thus he was 'a preacher of righteousness,' exercising faith in the testimony of God, moved with holy reverence, obeying the divine commands, and, by the contrast of his conduct, condemning the world (Heb. xi. 7); and probably he had during a long previous period laboured in that benevolent and pious work.

At last the threatening was fulfilled. All human kind perished in the waters, except this eminently favoured and righteous man, with his three sons (born about a hundred years before) and the four wives (DELUGE).

At the appointed time this terrible state of the earth ceased, and a new surface was disclosed for the occupation and industry of the delivered family. In some places that surface would be washed bare to the naked rock; in others sand would be deposited, which would be long uncultivable; but by far the larger portion would be covered with rich soil. With agriculture and its allied arts the antediluvians must have been well acquainted (ADAM). The four men, in the vigour of their mental faculties and bodily strength, according to the then existing scale of human life, would be at no loss for the profitable application of their powers. Immediately after the desolating judgment the merciful Jehovah gave intimations of his acceptance of the sacrifice and thanksgivings of Noah and his family, and of his gracious purposes revealed in the form of a solemn covenant for the continual benefit of them and their posterity. The beautiful phenomenon of the rainbow was put to a new and significant use. As infallibly certain as is the production of a rainbow under certain conditions of the atmosphere, so certain and sure of fulfilment are the promises of Jehovah.

As the flood affected equally the common ancestry of mankind, all nations that have not sunk into the lowest barbarism would be likely to preserve the memory of the chief person connected with it; and it would be a natural fallacy that every people should attach to itself a principal interest in that catastrophe, and regard that chief person as the founder of their own nation and belonging to their own locality. Hence we can well account for the traditions of so many peoples upon this capital fact of ancient history, and the chief person in it;—the Xisuthrus of the Chaldeans, with whom is associated a remarkable number of precise circumstances, corresponding to the Mosiac narrative; the Phrygian Noë of the celebrated Apamean medal, which, besides Noah and his wife with an ark, presents a raven, and a dove with an olive-branch in its mouth; the *Menes* of the Lydians; the Deucalion of the Syrians and the Greeks, of whose deluge the account given by Lucian is a copy almost exactly circumstantial of that in the book of Genesis; the many coincidences in the Greek mythology in respect of Saturn, Janus, and Bacchus; the traditions of the aboriginal Americans, as stated by Clavigero, in his *History of Mexico*; and many others.

NOB, a city of Benjamin, in the vicinity of

Jerusalem, belonging to the priests, and where the tabernacle was stationed in the time of Saul (1 Sam. xxi. 2; xxii. 9, 11, 19; Neh. xi. 32; Isa. x. 32). From the last of these texts it would appear that Jerusalem was visible from Nob, which, therefore, must have been situated somewhere upon the ridge of the Mount of Olives, north-east of the city.

NOBLEMAN. The word so rendered in John iv. 46, probably signifies one belonging to the court. This person was, therefore, probably of the court of Herod Antipas, who reigned over Galilee and Perea.

NOD, the land to which Cain withdrew, and in which he appears to have settled (Gen. iv. 16). While the site of paradise itself remains undetermined, it is useless to seek for that of the land of Nod. This land, wherever it was, could not have had a name till Cain went to it; and it was doubtless called Nod (which signifies *flight, wandering*), from the circumstance that Cain fled to it.

NOPH. [MEMPHIS.]

NORTH. The Shemite, in speaking of the quarters of the heavens and of the earth, supposes his face turned towards the east, so that the east is before him, the west behind, the south on the right hand, and the north on the left. Hence the words which signify east, west, north, and south, signify also that which is before, behind, on the right hand, and on the left. The Hebrew word, translated north, occurs in the five following senses:—1. It denotes a particular quarter of the heavens; thus, 'fair weather cometh out of the north' (Job xxxvii. 22; see also Eccles. i. 6, and Ezek. i. 4). 2. It means a quarter of the earth (Ps. cvii. 3; Isa. xliii. 6; Ezek. xx. 47; xxxii. 30; comp. Luke xiii. 29). 3. It occurs in the sense of a northern aspect or direction, &c.; thus, 'looking north' (1 Kings vii. 25; 1 Chron. iv. 24; Num. xxxiv. 7); on 'the north side' (Ps. xlviii. 2; Ezek. viii. 14; xl. 44; comp. Rev. xxi. 13). 4. It seems used as the conventional name for certain countries, irrespectively of their true geographical situation, namely, Babylonia, Chaldaea, Assyria, and Media, which are constantly represented as being to the north of Judaea, though some of them lay rather to the east of Palestine. Thus Assyria is called the north (Zeph. ii. 13; and Babylonia (Jer. i. 14; xlvii. 6, 10, 20, 24; Ezek. xxvi. 7; Judith xvi. 4). 5. The Hebrew word is applied to the north wind; see Prov. xxvii. 16, and Cant. iv. 6.

NOSE-JEWEL. [WOMEN.]

NOVICE, or NEOPHYTE, one newly converted (literally *newly planted*), not yet matured in Christian experience (1 Tim. iii. 6). The word continued to be in use in the early church; but it gradually acquired a meaning somewhat different from that which it bore under the Apostles, when 'newly converted' and 'newly baptized' described, in fact, the same condition, the converted being at once baptized. For when, in subsequent years, the church felt it prudent to put converts under a course of instruction before admitting them to baptism and the full privileges of Christian brotherhood, the term Novices was sometimes applied to them, although more usually distinguished by the general term of Catechumens.

NUMBERS is the appellation given to the fourth book of Moses.

This book embraces more especially the continuation of the Sinaitic legislation, the march through the wilderness, the rejection of a whole generation, and the commencement of the conquest of Canaan. Thus we see that it treats on very different subjects, and on this account it has frequently been attempted to resolve it into separate fragments and documents, and to represent it as being composed of the most heterogeneous materials. We will endeavour to refute this opinion, by furnishing an accurate survey of its contents, and by describing the internal connection of its component parts, so that the organization of the book may be clearly understood.

The sum and substance of the law having been stated in the preceding books, that of Numbers commences with the arrangements requisite for preserving good order in the camp of the Israelites. The people are numbered for the express purpose of separating the Levites from those Israelites who had to bear arms, and of thus introducing into practice the law concerning the first-born, for whom the tribe of Levi became a substitute. For this reason the people are not merely numbered, but also classed according to their descent; the order which each tribe should occupy in the camp is defined, and the Levites are introduced into their respective functions (ch. i.-iv.).

The camp, having been consecrated, was to be kept pure according to the law of Levitical cleansings; consequently all persons were excluded from it who were afflicted with leprosy, who had become unclean by a flux, and who had touched a corpse (ch. v. 1-4).

Thus, after civil and sacerdotal life had been brought into a definite form, other laws based upon this form came into force, especially those laws which regulated the authority of the priests in civil affairs (ch. v. 5; vi. 27). These regulations conclude with the beautiful form of benediction which indicates the blessing to be expected from the true observance of the preceding directions. The people are impressed with this fact; the hearts of the Israelites are willing to offer the required gifts, and to intrust them to the Levites.

Jehovah is faithful to his promise, and gloriously reveals himself to his people (ch. vii.). Before the Levites enter upon the discharge of their sacred functions, the law concerning the lamps to be lighted in the sanctuary is significantly repeated (ch. viii.). These lamps symbolize the communication of the Holy Spirit, and bring to the recollection of the nation the blessings of theocracy to be derived from setting apart the tribe of Levi, which had recently been separated from the rest of the people.

Then follows a description of the celebration of the Passover, preparatory to the departure of the people from Mount Sinai (ch. ix. 1-14). Some regulations are connected with the celebration of the Passover, and the whole miraculous guidance of the people is described (ch. ix. 15-x.).

Thus the entrance of Israel into the Holy Land seemed to be fully prepared; and it was of great importance to show how they were prevented from entering it. Accurate details are therefore given of the spirit which pervaded the nation; a spirit which, in spite of the forbearance of God,

manifested itself in daring rebellions against the divine authority (ch. xi, xii.).

Now comes the turning point of the history. Everything seems externally prepared for the conquest of the country, when it appears that the nation are not yet internally ripe for the performance of so important an act (ch. xiii., xiv.).

In immediate connection with this are some laws which were given in the desert; the intention of which was to recal to the recollection of the rejected race, which had been justly condemned to suffer severe punishment, that nevertheless they had not ceased to be the people of the covenant, and the depository of divine revelation (comp. ch. xv. 2, 13-16, 22, 23, sq.). In this respect the facts mentioned in ch. xv. 32-36, and ch. xvi. are also of great importance. They show, on the one hand, the continuance of an evil disposition in the people, and, on the other, the majesty of God watching over his holy law.

The contents of ch. xv.-xix. are of a similar character. The facts there recorded relate to a period of thirty-eight years. The consciousness with which they are stated significantly indicates the strictly legal and theocratical principles of the Mosiacal legislation. The period of Israel's rejection is characterized by the circumstance, that the historian is almost silent respecting it, as being a period not strictly belonging to theocratical history. During this period the striking deeds of God, his miracles and signs, the more prominent operations of his grace, and his peculiar blessings, cease. The rejection of the nation consisted in this suspension of the divine operations. During this period God, as it were, ignored his people. Consequently, the historian also almost ignores the rebellious race. But the period in which the divine promises were to be fulfilled again forms a prominent portion of the history. The termination of the penal period is the commencement of the most important era in the Mosiacal history. It brings the legislation to a splendid conclusion. The most glorious facts here follow each other in close succession; facts which were interlarded clearly to demonstrate that the chosen people entered into the land of promise, not by their own power and might, but that this land was given into their hands by the God of promise.

There have frequently been raised strong doubts against the historical credibility of the book of Numbers, although it is in pressed with indubitable marks of the age to which it refers, and of perfect authenticity. The author proves himself to possess an intimate knowledge of Egypt and of Egyptian history, and manners and customs. Narratives like the history of Balaam furnish also numerous proofs of their high antiquity. Its geographical statements are found to be uncommonly accurate, and the nations particularly mentioned in that prophecy belong to the Mosiacal period, and some of them at a later era disappeared entirely from history. The list of stations in chap. xxxiii. bears undeniable marks of antiquity; and the historical notices which the list contains demonstrate the accurate historical information of the author. Moreover the great fact which is the basis of the narrative of the whole book—the sojourn of the Israelites during forty years in the wilderness—can only be accounted for by assuming an extraordinary divine intervention.

NUN (*a fish*), the father of Joshua, who is hence constantly called Joshua ben Nun, 'Joshua the son of Nun.' Nothing is known of the person who bore this name.

NUTS. This word occurs only in Gen. xliii. 11, where Jacob, wishing to conciliate the ruler of Egypt, desires his sons on their return to 'take of the best fruits in the land in their vessels and carry down the man a present,' and along with other articles mentions '*nuts* and almonds.' There is little doubt that *pistachio-nuts* is the article here meant.

The pistachio-nut-tree is well known, extending as it does from Syria to Afghanistan. From the latter country the seeds are carried as an article of commerce to India, where they are eaten in their uncooked state, added to sweetmeats, or as a dessert fried with pepper and salt, being much relished by Europeans for the delicacy of their flavour. The pistacia-tree is most common in the northern, that is, the cooler parts of Syria, but it is also found wild in Palestine in some very remarkable positions, as Mount Tabor, and the summit of Mount Attarus (Nebo?). It delights in a dry soil, and rises to the height of 20, and sometimes 30 feet. As it belongs to the same genus as the terebinth-tree, so like it the male and female flowers grow on separate trees.

O.

OAK. In our version various words are rendered by 'oak,' particularly *Alah*, which more probably denotes the terebinth-tree. The oak is, in fact, less frequently mentioned in the original than in the A. V., where it occurs so often as to suggest that the oak is as conspicuous and as common in Palestine as in this country. But in Syria oaks are by no means common, except in hilly regions, where the elevation gives the effect of a more northern climate; and even in such circumstances it does not attain the grandeur in which it often appears in our latitudes. Indeed, Syria has not the species which forms the glory of our own forests. The 'oaks of Bashan' are in Scripture mentioned with peculiar distinction (Isa. ii. 3; Ezek. xxvii. 6; Zech. xi. 2), as if in the hills beyond the Jordan the oaks had been more abundant and of larger growth than elsewhere. This is the case even at the present day. In the hilly regions of Bashan and Gilead, Burckhardt repeatedly mentions forests of thick oaks—thicker than any forests which he had seen in Syria. Oaks of low stature are frequent on the hills and plains near the sources of the Jordan, and in the lower slopes of Lebanon. Lord Lindsay describes the hills of northern Judea about Hebron as covered to the top with low shrubs of the prickly oak. Prickly and evergreen oaks occur between Samaria and Mount Carmel, and on the banks of the Kishon. The thick trees which cover Mount Tabor are composed chiefly of oaks and pistachio-trees.

The species of oak found in Palestine are, 1. The Evergreen Oak. This is a tall but not wide-spreading tree, and the timber being very hard, is much used for purposes in which compactness

and durability are required. 2. The Holly-leaved Montpelier Oak, another evergreen. This tree also, as its name imports, is a native of Southern Europe, and is markedly distinguished from the former by its numerous straggling branches and the thick underdown of its leaves. 3. The Hairy-cupped Oak, so called from the bristly appearance of the calyx. It grows to a considerable size, and furnishes an excellent timber, much used by the Turks in the building of ships and houses. 4. The Great Prickly-cupped Oak, which takes its name from its large prickly calyx. This species is common in the Levant, where it is a handsome tree, which it is not in our ungenial climate, though it has long been cultivated. The wood of this species is of little worth; but its acorns form the valonia of commerce, of which 150,000 cwt. are yearly imported into this country for the use of tanners. 5. The Kermes Oak takes its name from an insect (*kermes*, of the genus *coccus*) which adheres to the branches of this bushy evergreen shrub, in the form of small reddish balls about the size of a pea. This affords a crimson dye, formerly celebrated, but now superseded by cochineal. This dye was used by the ancient Hebrews.

From the hints of travellers there appears to be some other species of oaks in Palestine, but their information is not sufficiently distinct to enable us to identify them.

OATH. an appeal to God in attestation of the truth of what you say, or in confirmation of what you promise or undertake. Cicero correctly terms an oath a religious affirmation; that is, an affirmation with a religious sanction. Hence it appears that there are two essential elements in an oath: first, the human, a declared intention of speaking the truth, or performing the action in a given case; secondly, the divine, an appeal to God, as a Being who knows all things and will punish guilt. According to usage, however, there is a third element in the idea which 'oath' commonly conveys, namely, that the oath is taken only on solemn, or, more specifically, on juridical occasions.

The essence of an oath lies obviously in the appeal which is thereby made to God, or to divine knowledge and power. The customary form establishes this, 'So help me God.' The Latin words (known to have been used as early as the sixth century), whence our English form is taken, may be thus rendered: *so may God and these holy gospels help me*; that is, 'as I say the truth.' The present custom of kissing a book containing the Gospels has in England taken place of the latter clause in the Latin formula.

Oaths did not take their origin in any divine command. They were a part of that consuetudinary law which Moses found prevalent, and was bound to respect, since no small portion of the force of law lies in custom, and a legislator can neither abrogate nor institute a binding law of his own mere will. Accordingly, Moses made use of the sanction which an oath gave, but in that general manner, and apart from minute directions and express words of approval; which shows that he merely used, without intending to sanction, an instrument that he found in existence and could not safely dispense with. Examples are found in Exod. xxii. 11, where an oath is ordered to be applied in the case of lost property:

and here we first meet with what may strictly be called a judicial oath (Lev. vi. 3-5).

The forms of adjuration found in the Scriptures are numerous. Saul swore unto Jonathan, 'As the Lord liveth' (1 Sam. xix. 6). 'A heap and a pillar' were for a witness between Laban and Jacob, with the ensuing for a sanction, 'The God of Abraham and the God of Nahor, the God of their father, judge betwixt us. And Jacobswore by the fear of his father Isaac' (Gen. xxxi. 52, sq.). A common formula is, 'The Lord do so to me and more also' (Ruth i. 17; 1 Sam. iv. 44), which approaches nearly to our modern form, 'So help me God,' and is obviously elliptical. Reference appears to be had to the ancient custom of slaying some animal in confirmation of a treaty or agreement. The animal thus slain and offered in a burnt offering to God became an image or type, betokening the fate which would attend that one of the two contracting parties who failed in his engagement; subsequently the sacrifice was in ordinary cases omitted, and the form came in itself to have the force of a solemn asseration.

An oath, making an appeal to the divine justice and power, is a recognition of the divinity of the being to whom the appeal is made. Hence to swear by an idol is to be convicted of idolatry. Such an act is accordingly given in Scripture as a proof of idolatry and a reason for condign punishment. 'How shall I pardon thee for this? Thy children have forsaken me, and sworn by them that are no gods' (Jer. v. 7; xii. 16; Amos viii. 14; Zeph. i. 5).

Other beings besides God are sometimes added in the form of an oath: Elijah said to Elisha, 'As the Lord liveth, and as thy soul liveth' (2 Kings ii. 2; 1 Sam. xx. 3). The party addressed is frequently sworn by, especially if a prince: 'As thy soul liveth, my lord, I am the woman,' &c. (1 Sam. i. 26; xvii. 55; xxv. 26; 2 Sam. xi. 11). The Hebrews as well as the Egyptians swore also by the head or the life of an absent as well as a present prince: 'By the life of Pharaoh' (Gen. xlii. 15). Hanway says that the most sacred oath among the Persians is 'by the king's head.'

The oath-taker swore sometimes by his own head (Matt. v. 36); or by some precious part of his body, as the eyes; sometimes, but only in the case of the later Jews, by the earth, the heaven, and the sun (Matt. v. 34, 35); as well as by angels; by the temple (Matt. xxiii. 16), and even by parts of the temple (Matt. xxiii. 16). They also swore by Jerusalem, as the holy city (Matt. v. 35). The Rabbinical writers indulge in much prolixity on the subject of oaths, entering into nice distinctions, and showing themselves exquisite casuists.

We have already intimated that it was usual to put the hand under the thigh (Gen. xxiv. 2; xlvii. 29). The more usual employment of the hand was to raise it towards heaven; designed, probably, to excite attention, to point out the oath-taker, and to give solemnity to the act (Gen. xiv. 22, 23). In the strongly anthropomorphic language of parts of the Scripture, even God is introduced saying, 'I lift up my hand to heaven, and say, I live for ever' (Deut. xxxii. 40). It can only be by the employment of a similar licence that the Almighty is represented as in any

way coming under the obligation of an oath (Exod. vi. 8; Ezek. xx. 5). Instead of the head, the phylactery was sometimes touched by the Jews on taking an oath.

The levity of the Jewish nation in regard to oaths, though reproved by some of their doctors, was notorious; and their conduct in this respect was severely censured by Christ himself in language which seems to forbid the use of oaths altogether (Matt. v. 34-37; James v. 12).

OBADIAH (*servant of Jehovah*), the name of several persons mentioned in Scripture.

1. OBADIAH, the fourth of the minor prophets according to the Hebrew, the fifth according to the Greek, and the eighth according to chronological arrangement, is supposed to have prophesied about the year B.C. 599. We have, however, but a small fragment of his prophecies, and it is impossible to determine anything with certainty respecting himself or his history. It is evident from ver. 20 that he prophesied while Jerusalem was subjected to the yoke of the Chaldeans, and after the expatriation of several of the citizens—which refers him to the period after the seventh year of the captivity, B.C. 599. From a comparison of Obad. ver. 1-4, with Jer. xlix. 14-16; Obad. ver. 6, with Jer. xlix. 9, 10; and Obad. ver. 8, with Jer. xlix. 7, it is evident that one of these prophets had read the other's work. It is not easy, observes Calmet, to decide which of the two copied from the other; but from the fact that Jeremiah had made use of the writings of other prophets also, it has been generally concluded that Obadiah was the original writer.

His prophecies are directed against the Edomites, and in this respect correspond with Amos i. 11, Jer. xlix. 22, Ezek. xxv. 12-14, and Ps. cxxxvii. 7. He menaces Edom with destruction for their hostile feeling towards Judah, and their insulting conduct towards the Hebrews when Jerusalem was taken (ver. 11, 12); but consoles the Jews with a promise of restoration from their captivity, when the Hebrews and the Ten Tribes shall repossess both their land and that of Edom and Philistia—a prophecy which was fulfilled in the time of the Maccabees, under John Hyrcanus, B.C. 125.

The language of Obadiah is pure; but Jahn and others have observed that he is inferior to the more ancient prophets in his too great addition to the interrogatory form of expression (see ver. 8). His sentiments are noble, and his figures bold and striking.

2. OBADIAH, the governor of King Ahab's household, and high in the confidence of his master, notwithstanding his aversion to the idolatries which the court patronized. In the persecution raised by Jezebel, Obadiah hid one hundred of the Lord's prophets in caves, and supplied them secretly with nourishment during the famine. It was this person, when sent out to explore the country in the vain search of pasture unconsumed by the drought, whom Elijah encountered when about to show himself to Ahab, and who was reluctantly prevailed upon to conduct the prophet to his master (1 Kings xviii. 4-16), B.C. 906.

3. OBADIAH, one of the heroes of the tribe of Gad, who joined David at Ziklag (1 Chron. xii. 9).

4. OBADIAH, one of the nobles whom Je-

hoshaphat sent to teach in the cities of Judah (2 Chron. xvii. 7).

5. OBADIAH, one of the Levites who presided over the restoration of the temple under Josiah (2 Chron. xxxiv. 12).

6. OBADIAH, the head of a party, consisting of 218 males, with females and children in proportion, who returned with Ezra from Babylon (Ezra viii. 9).

7. OBADIAH, one of the priests who sealed the written covenant which Nehemiah caused the people to enter into (Neh. x. 5).

Other persons of this name occur in 1 Chron. iii. 21; vii. 3; viii. 38; ix. 16, 44; xxvii. 19.

OBED (*serving*), son of Boaz and Ruth, and father of Jesse the father of David, according to the apparently incomplete genealogical list (Ruth iv. 17; 1 Chron. ii. 12). The name occurs in the genealogies of Matthew (i. 5) and Luke (iii. 32).

O'BED-EDOM (*serving Edom*), a Levite in whose premises, and under whose care, the ark was deposited, when the death of Uzzah caused David to apprehend danger in taking it farther. It remained here three months, during which the family of Obed-edom so signally prospered, that the king was encouraged to resume his first intention, which he then happily carried into effect (2 Sam. vi. 10-12). We learn from 1 Chron. xvi. 38, that Obed-edom's connection with the ark did not then terminate, he and his brethren having charge of the doors of the sanctuary (1 Chron. xv. 18, 24).

O'BIL (*chief of the camels*), an Ishmaelite, or Arab, doubtless of the nomade tribes, who had charge of the royal camels in the time of David—an exceedingly fit employment for an Arab (1 Chron. xxvii. 30). As Obil means in Arabic 'a keeper of camels,' Jerome reasonably infers that the person had his name from his office, which has always been a very common circumstance in the East.

OBLATION. [OFFERING.]

OBOTII, a station of the Israelites [WANDERING].

1. O'DED (*erecting*), the prophet who remonstrated against the detention as captives of the persons whom the army of King Pekah had brought prisoners from Judah, and at whose suggestion they were handsomely treated, and conducted back with all tenderness and care to their own country (2 Chron. xxviii. 9).

2. O'DED, father of Azariah the prophet, who was commissioned to meet and encourage Asa on his return from defeating the Ethiopians (2 Chron. xv. 1-8).

OFFERING is anything presented to God as a means of conciliating his favour: which being in the Jewish, as well as in all other religions, considered as the one thing needful, offerings accordingly have always constituted an essential part of public worship and private piety.

Offerings have been divided into three kinds: those which are designed to procure some favour or benefit; those which are expressive of gratitude for bounties or mercies received; those which are meant to atone for sins and to propitiate the Deity. Among the Hebrews we find a complex and multifarious system of offerings extending through the entire circle of divine worship, and prescribing the minutest details. A

leading distinction separates their offerings into unbloody and bloody. Used in its widest sense the term offering, or oblation, indicates in the Hebrew ritual a very great number of things—as the firstlings of the flock, first-fruits, tithes, incense, the shew-bread, the wood for burning in the temple. The objects offered were salt, meal, baked and roasted grain, olive-oil, clean animals, such as oxen, goats, doves, but not fish. The animals were required to be spotless, and, with the exception of the doves, not under eight days old, younger animals being tasteless and innutritious. The smaller beasts, such as sheep, goats, and calves, were commonly one year old. Oxen were offered at three years of age; in Judges (vi. 25) one is offered which is seven years old. As to sex, an option was sometimes left to the offerer, as in peace and sin offerings; at other times males were required, as in burnt sacrifices, for, contrary to classical usage, the male was considered the more perfect. In burnt offerings and in thank offerings the kind of animal was left to the choice of the worshipper, but in trespass and sin offerings it was regulated by law. If the desire of the worshipper was to express his gratitude, he offered a peace or thank offering; if to obtain forgiveness, he offered a trespass or sin offering. Burnt-offerings were of a general kind. Hecatombs or large numbers of cattle were sacrificed on special occasions (see 1 Kings viii. 5, 63). Offerings were also either public or private, prescribed or free-will. Sometimes they were presented by an individual, sometimes by a family; once, or at regular and periodic intervals. Foreigners were permitted to make offerings on the national altar. Offerings were made by Jews for heathen princes. In the case of bloody offerings the possessor, after he had sanctified himself, brought the victim, in case of thank-offerings, with his horns gilded and with garlands, &c., to the altar, where, laying his hand on the head of the animal, he thus, in a clear and pointed way, devoted it to God. Having so done, he proceeded to slay the victim himself; which act might be, and in later times was, done by the priests, and probably by the Levites. The blood was taken, and, according to the kind of offering, sprinkled upon the altar, or brought into the temple and there shed upon the ark of the covenant and smeared upon the horns of the altar of incense, and then the remainder poured forth at the foot of the altar of burnt-offerings. Having slain the animal, the offerer struck off its head, which, when not burnt, belonged either to the priest or to the offerer. The victim was then cut into pieces, which were either all, or only the best and most tasty, set on fire on the altar by the priests or the offerer, or must be burnt without the precincts of the holy city. The treatment of doves may be seen in Lev. xiv. 14, 19; v. 8. In some sacrifices heaving and waving were usual either before or after the slaying.

The place where offerings were exclusively to be presented was the outer court of the national sanctuary, at first the Tabernacle, afterwards the Temple. Every offering made elsewhere was forbidden under penalty of death. The precise spot is laid down in Lev. i. 3; iii. 2, 'at the door of the tabernacle of the congregation before the Lord.' The object of these regulations was to prevent any secret idolatrous rites from taking

place under the mask of the national ritual; and a common place of worship must have tended considerably to preserve the unity of the people, whose constant disagreements required precautions of a special kind (1 Kings xii. 27). The oneness, however, of the place of sacrifice was not strictly preserved in the troubled period of the Judges, nor indeed till the time of David (1 Kings iii. 2, 3). Offerings were made in other places besides the door of the Tabernacle (1 Sam. vii. 17; Judg. ii. 5). High places, which had long been used by the Canaanites, retained a certain sanctity, and were honoured with offerings (Judg. vi. 26; xiii. 19). Even the loyal Samuel followed this practice (1 Sam.), and David endured it (1 Kings iii. 2). After Solomon these offerings on high places still continued. In the kingdom of Israel, cut off as its subjects were from the holy city, the national temple was neglected.

Under the load and the multiplicity of these outward oblations, however, the Hebrews forgot the substance, lost the thought in the symbol, the thing signified in the sign; and, failing in those devotional sentiments and that practical obedience which offerings were intended to prefigure and cultivate, sank into the practice of mere dead works. Hereupon began the prophets to utter their admonitory lessons, to which the world is indebted for so many graphic descriptions of the real nature of religion and the only true worship of Almighty God (Isa. i. 11; Jer. vi. 20; vii. 21, sq.; Hos. vi. 6; Amos v. 22; Micah vi. 6, sq.; comp. Ps. xl. 6; li. 17, sq.; Prov. xxi. 3).

OG (*giant*), an Amorish king of Bashan (Num. xxi. 33; xxxii. 33; Deut. iv. 47; xxxi. 4). In form he was a giant, so that his bedstead was preserved as a memorial of his huge stature (Deut. iii. 11; Josh. xiii. 12) [B&P]. He was defeated by the Israelites under Moses (Num. xxi. 33; Deut. i. 4; iii. 3); and his country, which contained many walled cities (Deut. iii. 4-10), was assigned to the tribe of Manassah (Deut. iii. 13; Josh. xiii. 30).

OIL was far more extensively used among the ancient Hebrews than in our northern climate. The use of oil is equally general throughout Western Asia at the present time, as it was in primitive ages. Oil was much used instead of butter and animal fat, at meals and in various preparations of food (see FOOD, and comp. Ezek. xvi. 13). In such uses oil, when fresh and sweet, is more agreeable than animal fat. The Orientals think so; and Europeans soon acquire the same preference. Oil was also in many cases taken as a meat-offering; and it was then mixed with the meal of oblation [OFFERING]. The rite of sprinkling with oil, as a libation, does not occur in the law, but seems to be alluded to in Micah vi. 7.

The application of oil to the person has been described in the article ANOINTING. Whether for luxury or ceremony, the head and beard were the parts usually anointed, and this use of oil became at length proverbially common among the Israelites (Prov. xxi. 17).

The employment of oil for burning has been illustrated in the article LAMPS. It is only necessary to add, that for this, and indeed for most other purposes, olive-oil was considered the best.

and was therefore used in the lamps of the tabernacle.

OLIVE-TREE. It is more than probable that the olive was introduced from Asia into Europe; and though it continues to be much cultivated in Syria, it is yet much more extensively so in the south of Europe, whence the rest of the world is chiefly supplied with olive-oil.

The olive-tree is of slow growth, but remarkable for the great age it attains. It never, however, becomes a very large tree, though sometimes two or three stems rise from the same root, and reach from twenty to thirty feet high. The leaves are in pairs, lanceolate in shape, of a dull green on the upper, and hoary on the under surface. Hence in countries where the olive is extensively cultivated, the scenery is of a dull character from this colour of the foliage. The fruit is an elliptical drupe, with a hard stony kernel, and remarkable from the outer fleshy part being that in

368. [Olea Europea.]

which much oil is lodged, and not, as is usual, in the almond of the seed. It ripens from August to September.

Of the olive-tree two varieties are particularly distinguished; the long leaved, which is cultivated in the south of France and in Italy, and the broad-leaved in Spain, which has also its fruit much larger than that of the former kind. That the olive grows to a great age, has long been known. Pliny mentions one which the Athenians of his time considered to be coeval with their city, and therefore 1600 years old. Near Terni, in the vale of the cascade of Marmora, there is a plantation of very old trees, supposed to consist of the same plants that were growing there in the time of Pliny. Chateaubriand says: 'Those in the garden of Olivet (or Gethsemane) are at least of the time of the Eastern empire, as is demonstrated by the following circumstance. In Tur-

key every olive-tree found standing by the Muslims, when they conquered Asia, pays one *medina* to the Treasury, while each of those planted since the conquest is taxed half its produce. The eight olives of which we are speaking are charged only eight *medinas*. By some, especially by Dr. Martin, it is supposed that these olive-trees may have been in existence even in the time of our Saviour.

The wood of the olive-tree, which is imported into this country from Leghorn, is described by M. Holtzapffel to be 'like that of the box, but softer, with darker grey-coloured veins. The roots have a very pretty knotted and curly character; they are much esteemed on the continent for making embossed boxes, pressed into engraved metallic moulds.' A resin-like exudation is obtained from it, which was known to the ancients, and is now sometimes called olive-gum; but the fruit, with its oil, is that which renders the tree especially valuable. The green unripe fruit is preserved in a solution of salt, and is well known at our desserts. The fruit when ripe is bruised in mills, and the oil pressed out of the paste.

The olive is one of the earliest of the plants specifically mentioned in the Bible, the fig being the first. Thus, in Gen. viii. 11, the dove is described as bringing the olive-branch to Noah. It is always enumerated among the valued trees of Palestine; which Moses describes (Deut. vi. 11; viii. 8) as 'a land of oil-olive and honey' (so in xxviii. 40, &c.); and (2 Chron. ii. 10) Solomon gave to the labourers sent him by Hiram, king of Tyre, 20,000 baths of oil. Besides this, immense quantities must have been required for home consumption, as it was extensively used as an article of diet, for burning in lamps, and for the ritual service. The olive still continues one of the most extensively cultivated of plants. The olive, being an evergreen, was adduced as an emblem of prosperity (Ps. liii. 8), and it has continued, from the earliest ages, to be an emblem of peace among all civilized nations.

OLIVES, MOUNT OF, a mountain or ridge now called by the Arabs Jebel et-Tur, lying to the east of Jerusalem, from which it is separated only by the narrow valley of Jehoshaphat. Towards the south it sinks down into a lower ridge, over against the so-called 'well of Nehemiah,' now called by Franks the Mount of Offence, in allusion to the idolatrous worship established by Solomon 'on the hill that is before,' that is, eastward of 'Jerusalem.' In this direction lies the usual road to Bethany, so often trodden by our Saviour. About a mile towards the north is another summit, nearly or quite as high as the middle one. The ridge between the two bends slightly eastward, leaving room for the valley below to expand somewhat in that part. The view of the Holy City and of the Dead Sea, from the southern summit, is described in the article JERUSALEM; that from the northern summit does not embrace the Dead Sea. The elevation of the central peak of the Mount of Olives is stated by Schubert at 2556 Paris feet, or 416 Paris feet above the valley of Jehoshaphat; and hence it appears to be 175 Paris feet above the highest part of Mount Zion. Beyond the northern summit the ridge sweeps round towards the west, and spreads out into the high level tract north of the city, which is skirted on the west and south by

the upper part of the valley of Jehoshaphat. This inconsiderable ridge derives all its importance from its connection with Jerusalem, and from the sacred associations which hence became connected with it. To the mount whose ascent David 'went up, weeping and barefoot,' to which our Saviour oftentimes withdrew with his disciples, over which he often passed, and from which he eventually ascended into heaven, belongs a higher degree of sacred and moral interest than is to be found in mere physical magnitude, or than the record connects even with Lebanon, Tabor, or Ararat.

OLYMPAS, a Christian at Rome, whom Paul salutes in his Epistle to the Romans (Rom. xvi. 15).

OMEGA, the last letter of the Greek alphabet, proverbially applied to express the end, as Alpha, the first letter, the beginning of anything [ALPHA].

OMER. [WEIGHTS AND MEASURES.]

OMRI (*God-taught*), sixth king of Israel, who began to reign in B.C. 929, and reigned twelve years. He was raised to the throne by the army, while it was engaged in the siege of Gibbethon, a Levitical city in Dan, of which the Philistines had gained possession, when the news came to the camp of the death of Elah, and the usurpation of Zimri. On this, the army proclaimed their general, Omri, king of Israel. He then lost not a moment, but leaving Gibbethon in the power of the infidels, went and besieged his competitor in Tirzah. But he was no sooner delivered of this rival (ZIMRI), than another appeared in the person of Tibni, whom a part of the people had raised to the throne, probably from unwillingness to submit to military dictation. This occasioned a civil war, which lasted six years, and left Omri undisputed master of the throne, B.C. 925. His reign lasted six years more, and its chief event was the foundation of Samaria, which thenceforth became the capital city of the kingdom of Israel (1 Kings xvi. 15-28) [SAMARIA].

ON (*strength*), a king of the tribe of Reuben, who was one of the accomplices of Korah in the revolt against the authority of Moses and Aaron. He is mentioned among the leaders of this conspiracy in the first instance (Num. xvi. 17), but does not appear in any of the subsequent transactions, and is not by name included in the final punishment. The Rabbinical tradition is, that the wife of On persuaded her husband to abandon the enterprise.

ON, one of the oldest cities in the world, situated in Lower Egypt, about two hours N.E. from Cairo. The Septuagint translates the name On by Heliopolis, which signifies 'city of the sun'; and in Jer. xliii. 13, it bears a name, Bethshemesh, of equivalent import. On is a Coptic and ancient Egyptian word, signifying light and the sun. The site is now marked by low mounds, enclosing a space about three-quarters of a mile in length by half a mile in breadth, which was once occupied by houses and by the celebrated Temple of the Sun. This area is at present a ploughed field, a garden of herbs; and the solitary obelisk which still rises in the midst of it is the sole remnant of the former splendours of the place. In the days of Edrisi and Abdallatif the place bore the name of Ain Shems; and in the neighbouring village, Matariyeh, is still shown

an ancient well bearing the same name. Near by it is a very old *synagogue*, its trunk straggling and gnarled, under which legendary tradition relates that the holy family once rested. Heliopolis was the capital of a district of *nomos* bearing the same name.

The place is mentioned in Gen. xli. 45, where it is said that Pharaoh gave to Joseph a wife, Asenath, the daughter of Poti-pherah, priest of On (ver. 50). From the passage in Jeremiah it may be inferred that it was distinguished for idolatrous worship. The names, 'City of the Sun,' 'Temples of the Sun,' connected with the place, taken in conjunction with the passage just alluded to, seem to refer the mind to the purer form of worship which prevailed at a very early period in Egypt, namely, the worship of the heavenly bodies, and thence to carry the thoughts to the deteriorations which it afterwards underwent in sinking to the adoration of images and animals.

The traces of this city which are found in classic authors correspond with the little of it that we know from the brief intimations of Holy Writ. According to Herodotus, Heliopolis was one of the four great cities that were rendered famous in Egypt by being the centres of solemn religious festivals, which were attended by splendid processions and homage to the gods. In Heliopolis the observance was held in honour of the sun. It had its priesthood, a numerous and learned body, celebrated before other Egyptians for their historical and antiquarian lore; it long continued the university of the Egyptians, the chief seat of their science; the priests dwelt as a holy community in a spacious structure appropriated to their use. The city suffered heavily by the Persian invasion. At an early period remains of its famous temple were found. An obelisk which the Emperor Augustus caused to be carried to Rome, and placed in the Campus Martius, is held by Zoega to have been brought from Heliopolis, and to have owed its origin to Sesostris. This city furnished works of art to Augustus for adorning Rome, and to Constantine for adorning Constantinople. Ritter says that the sole remaining obelisk is from 60 to 70 feet high, of a block of red granite, bearing hieroglyphics which remind the beholder of what Strabo terms the Etruscan styles. 'The figure of the cross which it bears, has attracted the special notice of Christian antiquaries.'

ONAN (*strong, stout*), second son of Judah, who, being constrained by the obligations of the ancient Levirate law to espouse Tamar, his elder brother's widow, took means to frustrate the intention of this usage, which was to provide heirs for a brother who had died childless. This crime, rendered without excuse by the allowance of polygamy, and the seriousness of which can scarcely be appreciated but in respect to the usages of the times in which it was committed, was punished by premature death (Gen. xxxviii. 4, sq.).

ONESIMUS (*profitable*), a slave belonging to Philemon of Colossæ, who fled from his master, and proceeded to Rome, where he was converted by St. Paul, who sent him back to his master, a friend and convert of the apostle, with an eloquent letter, the purport of which is described in the article PHILEMON. Onesimus, accompanied by Tychicus, left Rome with not only this epistle,

but with those to the Ephesians and Colossians (Col. iv. 9). It is believed that Onesimus, anxious to justify the confidence which Paul reposed in him, by appearing speedily before his master, left Tychicus to take the Epistle to the Ephesians; and hastened to Colossæ, where he doubtless received the forgiveness which Paul had so touchingly implored for him as 'a brother beloved.' An uncertain tradition makes Onesimus to have been bishop of Berea, where he is said to have suffered martyrdom. The part which Paul took in this difficult and trying case is highly honourable to him; while for Onesimus himself, the highest praise is, that he obtained the friendship and confidence of the apostle.

ONESIPHORUS (*profit-bringer*), a believer of Ephesus, who came to Rome during the second captivity of St. Paul in that city; and having found out the apostle, who was in custody of a soldier, to whose arm his own was chained, was 'not ashamed of his chain,' but attended him frequently, and rendered him all the services in his power. This faithful attachment, at a time of calamity and desertion, was fully appreciated and well remembered by the apostle, who, in his Epistle to Timothy, carefully records the circumstance; and, after charging him to salute in his name 'the household of Onesiphorus,' expresses the most earnest and grateful wishes for his spiritual welfare (1 Tim. ii. 16-18). It would appear from this that Onesiphorus had then quitted Rome.

ONION. Onions are mentioned in Num. xi. 5, among the articles of food for which the Israelites murmured. The onion was early employed as an article of diet in Egypt. It is distinguished from other species of Allium by its fistular leaves and swelling stalks, and is well known to be cultivated in all parts of Europe and in most parts of Asia. Its native country is not known; but it is probable that some part of the Persian region may have first produced it in a wild state, as many species of Allium are found in the mountainous chain which extends from the Caspian to Cashmere, and likewise in the Himalayan Mountains. It is common in Persia, where it is called *piaz*, and has been long introduced into India, where it receives the same name. The onions of warm dry countries grow to a considerable size, and, instead of being acid and pungent in taste, are comparatively bland, and mild and nutritious articles of diet. This is particularly conspicuous in the Portugal onions, which are largely imported into this country. Other celebrated varieties are those of Spain and Tripoli; but Egypt itself is famed for the production of fine onions, as stated by Hasselquist: 'Whoever has tasted onions in Egypt, must allow that none can be had better in any part of the universe. Here they are sweet; in other countries they are pungent and strong. Here they are soft; whereas in the northern and other parts they are hard, and their coats are so compact, that they are difficult of digestion. Hence they cannot in any place be eaten with less prejudice and more satisfaction than in Egypt.'

ONYX. The Hebrew word translated by 'onyx-stone' in Gen. ii. 12, is different from that so rendered in the descriptions of the breastplate of the high-priest (Exod. xxviii. 19; xxxix. 11), and it is doubtful if the onyx is really intended

by either. This stone has a whitish ground, and is variegated with bands of white and brown which run parallel to each other. It is a semi-pellucid stone of a fine flinty texture, taking an excellent polish, and is strictly of the flint or siliceous class. 'Onyx' is the Greek word for the human nail; and the stone takes its name from the resemblance of the ground-colour to that lunated spot at the base of the nail.

O'PHEL, a place or quarter of Jerusalem near the walls (2 Chron. xxvii. 3; xxxiii. 44), on the east side (Neh. iii. 26; xi. 21). From the intimations regarding it given by Josephus, Winer collects that Ophel was a high or ascending place, built over (in the ancient city) with houses. This view is confirmed by Dr. Robinson, who identifies it with the low ridge which extends southward from the temple mount to Mount Zion, between the exterior valley of Jehoshaphat and the interior valley of Tyropœon. This ridge is considerably below the level of Mount Moriah; its length is 1550 feet, and its breadth in the middle part, from brow to brow, 290 feet [JERUSALEM].

O'PHIR occurs first, as the proper name of one of the thirteen sons of Joktan, the son of Eber, a great-grandson of Shem, in Gen. x. 26-29. Many Arabian countries are believed to have been peopled by these persons, and to have been called after their respective names, as Sheba, &c., and among others Ophir. Ophir occurs also as the name of a place, country, or region, famous for its gold, which Solomon's ships visited in company with the Phœnician. The difficulty is to ascertain where Ophir was situated. The first theory which appears to be attended with some degree of evidence not purely fanciful is that Ophir was situate in Arabia. In Gen. x. 29, Ophir stands in the midst of other Arabian countries. Still, as Gesenius observes, it is possibly mentioned in that connection only on account of its being an Arabian colony planted abroad. Though gold is not now found in Arabia, yet the ancients ascribe it to the inhabitants in great plenty (Judg. viii. 24, 26; 2 Chron. i. 1; 1 Kings x. 1, 2; Ps. lxxii. 15). This gold, Dr. Lee thinks, was no other than the gold of Havilah (Gen. ii. 11), which he supposes to have been situate somewhere in Arabia. But Diodorus Siculus ascribes gold-mines to Arabia. He also testifies to the abundance of 'precious stones' there (ii. 54), especially among the inhabitants of Sabas (iii. 46; comp. Gen. ii. 12; 2 Chron. ix. 1; 1 Kings x. 1, 2). Others suppose that, though Ophir was situate somewhere on the coast of Arabia, it was rather an emporium, at which the Hebrews and Tyrians obtained gold, silver, ivory, apes, almsg-trees, &c., brought thither from India and Africa by the Arabian merchants, and even from Ethiopia, to which Herodotus (iii. 114) ascribes gold in great quantities, elephants' teeth, and trees and shrubs of every kind. In behalf of the supposition that Ophir was the Arabian port Apher, it may be remarked that the name has undergone similar changes to that of the Sept. of Ophir; for it is called by Arrian Apher, by Pliny Saphar, by Ptolemy Sapphera, and by Stephanus Saphirui. Grotius thinks his to be Ophir. The very name El Ophir has been lately pointed out as a city of Oman, in former times the centre of a very active Arabian commerce. In favour of the theory which places Ophir in Africa, it has been suggested that we

have the very name in *afri*, Africa. Origen also says, on Job xxii. 24, that some of the interpreters understood Ophir to be Africa. Michaelis supposes that Solomon's fleet, coming down the Red Sea from Ezion-geber, coasted along the shore of Africa, doubling the Cape of Good Hope, and came to Tarshish, which he, with many others, supposes to have been Tartessus in Spain, and thence back again the same way; that this conjecture accounts for their three years' voyage out and home; and that Spain and the coasts of Africa furnished all the commodities which they brought back. Strabo indeed says that Spain abounded in gold, and immensely more so in silver (see 1 Macc. viii. 3). Others have not hesitated to carry Solomon's fleet round from Spain up the Mediterranean to Joppa. In behalf of the conjecture that Ophir was in India, the following arguments are alleged: that it is most natural to understand from the narrative that all the productions said to have been brought from Ophir came from one and the same country, and that they were all procurable only from India. The Sept. translators also appear to have understood it to be India. Josephus also gives to the sons of Joktan the locality from Cophen, an Indian river, and in part of Asia adjoining it (*Antiq.* i. 6. 4). He also expressly and unhesitatingly affirms that the land to which Solomon sent for gold was 'anciently called Ophir, but now the Aurea Chersonesus, which belongs to India' (*Antiq.* viii. 6. 4). There are several places comprised in that region which was actually known as India to the ancients [INDIA], any of which would have supplied the cargo of Solomon's fleet: for instance, the coast of Malabar. Perhaps the most probable of all is Malacca, which is known to be the Aurea Chersonesus of the ancients. It is also worthy of remark that the natives of Malacca still call their gold-mines *ophira*. On the other hand, some writers give a wider extent to the country in question. Heeren observes that 'Ophir, like the name of all other very distant places or regions of antiquity, like Thule, Tartessus, and others, denotes no particular spot, but only a certain region or part of the world, such as the East or West Indies in modern geography. Hence Ophir was the general name for the rich countries of the south lying on the African, Arabian, or Indian coasts, as far as at that time known.'

1. OPHIRAH, a town of Benjamin (Josh. xviii. 23), seemingly in the north-east of that tribe's domain (1 Sam. xiii. 17). Accordingly it is placed by Eusebius and Jerome five Roman miles east of Bethel. This corresponds with the position of a place called et-Taiyibeh, which was visited by Dr. Robinson in his excursion to Bethel. It is now a small village, curiously situated upon a conical hill, on the summit of which is an old tower, whence is commanded a splendid view of the valley of the Jordan, the Dead Sea, and the eastern mountains.

2. OPHIRAH, a town in the tribe of Manasseh, to which Gideon belonged, and where he continued to reside after he had delivered Israel from the Midianites, establishing there his epoch, which became a snare to Israel (Judg. vi. 11-24; vii. 27).

O'REB and Z'EEB, the remarkable names (*raven and wolf*) of two emirs of the Midianites, who were made prisoners by the Ephraimites in

attempting to recross the Jordan after the victory of Gideon. They were put to death by the captors, and their heads carried as a trophy to the conqueror, who was then on the other side the Jordan (Judg. vii. 25; viii. 3). The first of these princes met his death near a rock, which thenceforth bore his name (Isa. x. 26); the other seems to have at first sought refuge in one of those excavations in which wines were preserved, and which was thenceforth called the winepress of Zeeb (Judg. vii. 25).

ORION. [ASTRONOMY.]

OR'PAH (*Jawa*), daughter-in-law of Naomi, who remained behind among her kindred in Moab, when Ruth returned with Naomi to Bethlehem (Ruth i. 4-14) [RUTH].

OSPRAY, an unclean bird, which has been identified with the *haliaetus* or sea-eagle. Species of this bird occur in Europe, Asia, Africa, America, and Australia.

Mr. Macgillivray describes 'its savage scream of anger when any one approaches the neighbourhood of its nest, its intimidating gestures, and even its attempts to molest individuals who have ventured among its native crags.'

Mr. Selby, respecting the ospray, observes, 'It is strictly piscivorous, and is found only in the vicinity of lakes, rivers, or such pools as abound with fish. It is a powerful bird, often weighing five pounds; the limbs are very muscular in proportion to its general dimensions; its feet are admirably adapted for retaining firm hold of its slippery prey.' Mr. Montagu remarks, 'Its principal food is fish, which it often catches with great dexterity, by pouncing upon them with vast rapidity, and carrying them off in its talons.'

OSSIFRAGE, a bird of prey, which is supposed to be identical with the griffon of Cuvier, the *Gypætes barbatus* of nomenclators. The species in Europe is little if at all inferior in size to the Condor of South America, measuring from

269. [*Gypætes barbatus*.]

the point of the bill to the end of the tail four feet two or three inches, and sometimes ten feet in the expanse of wing; the head and neck are not, like those of vultures, naked, but covered with whitish narrow feathers; and there is a beard of bristly hair under the lower mandible: the rest of the plumage is nearly black and brown, with

some whitish streaks on the shoulders, and an abundance of pale rust-colour on the back of the neck, the thighs, vent, and legs; the toes are short and bluish, and the claws strong. In the young the head and neck are black, and the species or variety of Abyssinia appears to be rusty and yellowish on the neck and stomach.

OSTRICH. The ostrich is frequently mentioned in the Bible in terms of great beauty and precision; which commentators, perhaps more conversant with the exploded misstatements of the ancients than with the true physiological history of the bird in question, have not been happy in explaining, sometimes referring it to wrong species, such as the peacock, or mistaking

270.

it for the stork, the eagle, or the bustard (Lev. xi. 19; Deut. xiv. 15; Job xxx. 29; xxxix. 13; Isa. xlii. 21; xxxiv. 13; xliii. 20; Jer. l. 39; Lam. iv. 3; Micah i. 8). In several of these passages 'owls' has been used in our version for ostriches, which the original word there employed really means.

There are two varieties, if not two species, of the ostrich; one never attaining seven feet in height, and covered chiefly with grey and dingy feathers: the other sometimes growing to more than ten feet, and of a glossy black plumage; the males in both having the great feathers of the wings and tail white, but the females the tail only of that colour. Their dimensions render them both the largest animals of the feathered creation now existing. They appear promiscuously in Asia and Africa, but the troops or coveys of each are always separate; the grey is more common in the south, while the black, which grows largest in Caffraria, predominates to the north of the equator. The common-sized ostrich weighs about eighty pounds.

Ostriches are gregarious—from families consisting of a male with one or several female birds, and perhaps a brood of two or three young, up to troops of near a hundred. They keep aloof from the presence of water in the wild and arid desert, mixing without hesitation among herds of zebu, wild asses, quaggas, and other striped Equine, and the larger species of Antelope. From the

nature of their food, which consists of seeds and vegetables, although seldom or never in want of drink, it is evident that they must often approach more productive regions, which, by means of the great rapidity of motion they possess, is easily accomplished; and they are consequently known to be very destructive to cultivated fields. As the organ of taste is very obtuse in these birds, they swallow with little or no discrimination all kinds of substances, and among others stones; it is also probable that, like poultry, they devour lizards, snakes, and the young of birds that fall in their way. It is not yet finally decided whether the two species are polygamous, though concurrent testimony seems to leave no doubt of the fact: there is, however, no uncertainty respecting the nest, which is merely a circular basin scraped out of the soil, with a slight elevation at the border, and sufficiently large to contain a great number of eggs; for from twelve to about sixty have been found in them, exclusive of a certain number, always observed to be outlying, or placed beyond the raised border of the nest, and amounting apparently to nearly one-third of the whole. These are supposed to feed the young brood when first hatched, either in their fresh state, or in a corrupted form, when the substance in them has produced worms. These eggs are of different periods of laying, like those within, and the birds hatched form only a part of the contents of a nest, until the breeding season closes. The eggs are of different sizes, some attaining to seven inches in their longer diameter, and others less, having a dirty white shell, finely speckled with rust-colour; and their weight borders on three pounds. Within the tropics they are kept sufficiently warm in the day-time not to require incubation, but beyond these one or more females sit constantly, and the male bird takes that duty himself after the sun is set. It is then that the short roar may be heard during darkness; and at other times different sounds are uttered, likened to the cooing of pigeons, the cry of a hoarse child, and the hissing of a goose; no doubt expressive of different emotions.

Although possessed of strength sufficient to carry with velocity two adult human beings, and although readily tamed, even when taken in a state of maturity, may easily rendered familiar and docile, and although they are by no means the stupid creatures they have been believed, still their voracity, leading to the destruction of young poultry, and the impracticability of guiding their powers, will ever render them unsafe and unprofitable domestics. Though at first sight useless, we may be assured that Providence has not appointed their abode in the desert in vain; and they still continue to exist, not only in Africa, but in the region of Arabia, east and south of Palestine beyond the Euphrates; but it may be a question whether they extend so far to the eastward as Goa, although that limit is assigned them by late French ornithologists.

The flesh of a young ostrich is said to be not unpalatable; but its being declared unclean in the Mosaic legislation may be ascribed to a twofold cause. The first is sufficiently obvious from its indiscriminate voracity already mentioned, and the other may have been an intention to lay a restriction upon the Israelites in order to wean them from the love of a nomade life, which

hunting in the desert would have fostered; for ostriches must be sought on the barren plains, where they are not accessible on foot, except by stratagem. When pursued, they cast stones and gravel behind them with great force; and though it requires long endurance and skill, their natural mode of fleeing in a circular form enables well-mounted Arabs to overtake and slay them.

OTH'NIEL (*lion of God*), first judge of Israel, son of Kenaz, the younger brother of Caleb, whose daughter Achsah he obtained in marriage by his daring valour at the siege of Debir (Josh. xv. 17; Judg. i. 13; 1 Chron. iv. 13). Rendered famous among his countrymen by this exploit, and connected by a twofold tie with one of the only two Israelites of the former generation who had not died in the desert, we are prepared for the fact that on him devolved the mission to deliver Israel from the Mesopotamian oppression under which, in punishment for their sins, they fell after the death of Joshua and of the elders who outlived him (Judg. iii. 9). This victory secured to Israel a peace of forty years.

OWL. There are noticed in Egypt and Syria three well-known species of the genus *Strix*, or owl:—the great-eared owl; the common barn owl; and the little owl. In this list the long-eared owl, the short-eared owl, known nearly over the whole earth, and the Oriental owl of Hasselquist, are not included, and several other species of these wandering birds, both of Africa and Asiatic regions, occur in Palestine. The barn owl is still sacred in Northern Asia.

271.

The eagle-owl, or great-eared owl, we do not find in ornithological works as an inhabitant of Syria, though no doubt it is an occasional winter visitant; and the smaller species, which may be a rare but permanent resident, probably also visiting Egypt. It is not, however, we believe, that species, but the *Otus ascalaphus* of Cuvier, which is common in Egypt, and which in all probability is the type of the innumerable representations of an eared owl in hieroglyphical inscriptions.

Next we have the short-eared owl, likewise found in Egypt and Arabia, as well as to the north of Syria, a bold, pugnacious bird, residing in ruined buildings, mistaken by commentators for the screech-owl. The spectral species, again, confounded with the goat-sucker, is, we believe, *Strix coromanda* (NIGHT-HAWK), and the same as the Oriental owl of Hasselquist.

The little owl of Egypt is not likely to be the *Passerine* species of Europe, and probably does not occur under a distinct name in Biblical Hebrew; but that the owls which inhabited Palestine were numerous may be inferred with tolerable certainty from the abundance of mice, rats, and other vermin, occasioned by the offal and offerings at the numerous sacrifices, and consequently the number of nocturnal birds of prey that subsisted upon them, and were tolerated for that purpose.

OX. Having already noticed the domestic *beeves* under BULL and CALF (to which we refer), the few words added here will apply to the breeds of Western Asia and the manner of treating them. The earliest pastoral tribes appear to have had domesticated cattle in the herd; and judging from the manners of South Africa, where we find nations still retaining in many respects primeval usages, it is likely that the patriarchal families, or at least their moveables, were transported on the backs of oxen in the manner which the Caffres still practise, as also the Gwallahs and grain-merchants in India, who come down from the interior with whole droves bearing burthens.

The breeds of Egypt were various, differing in the length and flexures of the horns. There were some with long horns, others with short, and even none, while a hunched race of Nubia reveals an Indian origin, and indicates that at least one of the nations on the Upper Nile had come from the valleys of the Ganges; for it is to the east of the Indus alone that that species is to be found whose original stock appears to be the mountain yak.

The domestic buffalo was unknown to Western Asia and Egypt till after the Arabian conquest: it is now common in the last-mentioned region and far to the south, but not beyond the equator; and from structural differences it may be surmised that there was in early ages a domesticated distinct species of this animal in Africa. In Syria and Egypt the present races of domestic cattle are somewhat less than the large breeds of Europe, and those of Palestine appear to be of at least two forms, both with short horns and both used to the plough, one being tall and lanky, the other more compact; and we possess figures of the present Egyptian cattle with long horns bent down and forwards. From Egyptian pictures it is to be inferred that large droves of fine cattle were imported from Abyssinia, and that in the valley of the Nile they were in general stall-fed, used exclusively for the plough, and treated with humanity. In Palestine the Mosaic law provided with care for the kind treatment of cattle; for in treading out corn—the Oriental mode of separating the grain from the straw—it was enjoined that the ox should not be muzzled (Deut. xxv. 4), and old cattle that had long served in tillage were often suffered to wander at large till their death—a practice still in vogue, though from a different motive, in India. But the Hebrews and other nations of Syria grazed their domestic stock, particularly those tribes which, residing to the east of the Jordan, had fertile districts for that purpose. Here, of course, the droves became shy and wild; and though we are inclined to apply the passage in Ps. xxii. 12, to wild species, yet old bulls, roaming at large in a land where the

lion still abounded, no doubt became fierce; and as they would obtain cows from the pastures, there must have been feral breeds in the woods, as fierce and resolute as real wild Uri.

P.

PADAN-ARAM. [ARAM.]

PALACE, in Scripture, denotes what is contained within the outer enclosure of the royal residence, including all the buildings, courts, and gardens (2 Chron. xxxvi. 19; comp. Ps. xlviii. 4; cxxii. 7; Prov. ix. 3; xviii. 19; Isa. xxiii. 13; xxv. 2; Jer. xxii. 14; Amos i. 7, 12, 14; Nah. ii. 6). In the New Testament the term palace is applied to the residence of a man of rank (Matt. xxvi. 3; Mark xiv. 66; Luke xi. 21; John xviii. 15). The specific allusions are to the palace built by Herod, which was afterwards occupied by the Roman governors, and was the prætorium, or hall, which formed the abode of Pilate when Christ was brought before him (Mark xv. 16); the other passages above cited, except Luke xi. 21, refer to the residence of the high-priest.

The particulars which have been given under the head HOUSE, require only to be aggrandized to convey a suitable idea of a palace; for the general arrangements and distribution of parts are the same in the palace as in the house, save that the courts are more numerous, and with more distinct appropriations, the buildings more extensive, and the materials more costly. The palace of the kings of Judah in Jerusalem was that built by Solomon, called 'the house of the forest of Lebanon,' of which some particulars are given in 1 Kings vii. 1-12; and if read along with the description which Josephus gives of the same pile (*Antiq.* v. 5), a faint idea may be formed of it, as a magnificent collection of buildings in adjoining courts, connected with and surrounded by galleries and colonnades.

PALESTINE. This name, usually applied to the country formerly inhabited by the Israelites, does not occur in the Hebrew Bible. It is, however, derived from Philistia, or the country of the Philistines, which comprised the southern part of the coast plain of Canaan along the Mediterranean. The word *Philistia* occurs in Exod. xiii. 17; Ps. lx. 8; lxxxiii. 7; lxxxvii. 4; eviii. 9; Isa. xiv. 29, 31. From this arose the name Palestine, which was applied by most ancient writers, and even by Josephus, to the whole land of the Israelites.

NAMES.—The other names of the country may be given in the order of their occurrence in Scripture.

1. *Canaan*, from Canaan, the fourth son of Ham, from whom the first inhabitants were descended. It is the most ancient name of the country, and is first found as such in Gen. xi. 31. This denomination was confined to the country between the Mediterranean and the Jordan; but in later times it was understood to include Phœnicia (Isa. xxiii. 11; Matt. xv. 21, 22), and also the land of the Philistines.

2. *Land of Israel*. This name was given to the whole country as distributed among and occupied by the tribes of Israel.

3. *Land of Promise.* So called as the land which God promised to the patriarchal fathers to bestow on their descendants.

4. *Land of Jehovah.* So called as being in a special and peculiar sense the property of Jehovah, who, as the sovereign proprietor of the soil, granted it to the Hebrews (Lev. xxv. 23; Ps. lxxxv. 1; Isa. viii. 8).

5. *The Holy Land.* This name only occurs in Zech. ii. 12. The land is here called 'Holy,' as being the Lord's property, and sanctified by his temple and worship.

5. *Judah, Judaea.* This name belonged at first to the territory of the tribe of Judah alone. After the separation of the two kingdoms, one of them took the name of Judah, which contained the territories both of that tribe and of Benjamin. After the Captivity, down to and after the time of Christ, Judaea was used in a loose way as a general name for the whole country of Palestine; but in more precise language, and with reference to internal distribution, it denoted nearly the territories of the ancient kingdom, as distinguished from Samaria and Galilee on the west of the Jordan, and Peraea on the east.

DIVISIONS.—The divisions of Palestine were different in different ages.

1. *In the time of the Patriarchs,* the country was divided among the tribes or nations descended from the sons of Canaan. The precise locality of each nation is not, in every case, distinctly known; but our map exhibits the most probable arrangement.

2. *After the Conquest* the land was distributed by lot among the tribes. The particulars of this distribution will be best seen by reference to the map.

3. *After the Captivity* we hear very little of the territories of the tribes, for ten of them never returned to occupy their ancient domains.

4. *In the time of Christ* the country on the west of the Jordan was divided into the provinces of Galilee, Samaria, and Judaea. Galilee is a name which was applied to that part of Palestine north of the plain of Esdraelon or Jezreel. This province was divided into Lower or Southern, and Upper or Northern Galilee. Samaria occupied nearly the middle of Palestine; but, although it extended across the country, it did not come down to the sea-shore. Judaea, as a province, corresponded to the northern and western parts of the ancient kingdom of that name; but the south-eastern portion formed the territory of Idumaea. On the other side of the Jordan the divisions were, at this time, more numerous and less distinct. The whole country generally was called Peraea, and was divided into eight districts or cantons, namely:—1. *Peraea*, in the more limited sense, which was the southernmost canton, extending from the river Arnon to the river Jabbok. 2. *Gilead*, north of the Jabbok, and highly populous. 3. *Decapolis*, or the district of ten cities, which were Scythopolis or Bethshan (on the west side of the Jordan), Hippos, Gadara, Pella, Philadelphia (formerly Rabbath), Dium, Canatha, Gerasa, Raphana, and perhaps Damascus. 4. *Gaulonitis*, extending to the north-east of the Upper Jordan and of the lake of Gennesareth. 5. *Batanea*, the ancient Bashan, but less extensive, east of the lake of Gennesareth. 6. *Auranitis*, also called *Iturea*, and known to this

day by the old name of Hauran (Ezek. xlvii. 16-18), to the north of Batanea and the east of Gaulonitis. 7. *Trachonitis*, extending to the north of Gaulonitis, and east from Paneas (Caesarea Philippi) and the sources of the Jordan, where it was separated from Galilee (Luke iii. 1). 8. *Abilene*, in the extreme north, among the mountains of Anti-Libanus, between Baalbec and Damascus. The more important of these names have been noticed under their several heads.

SITUATION AND BOUNDARIES.—Palestine is the south-western part of Syria, extending from the mountains of Lebanon to the borders of Egypt. It lies about midway between the equator and the polar circle, to which happy position it owes the fine medium climate which it possesses. Its length is embraced between 30° 40' and 33° 32' of N. latitude, and between 35° 45' of E. longitude in the south-west, and 35° 48' in the north-east. The breadth may be taken at an average of sixty-five miles, the extreme breadth being about 100 miles. The length, from Mount Hermon in the north, to which the territory of Manasseh beyond the Jordan extended (Josh. xiii. 11), to Kadesh-barnea in the south, to which the territory of Judah reached, was 180 miles.

Palestine may be regarded as embracing an area of almost 11,000 square miles. But the real surface is much greater than this estimate would imply; for Palestine being essentially a hilly country, the sides of the mountains and the slopes of the hills enlarge the available surface to an extent which does not admit of calculation.

With regard to the lines of boundary, the clearest description of them is that contained in Num. xxxiv. From the statements there made it appears that the writer, after prolonging the eastern boundary-line from the end of the Dead Sea down the edge of the Arabah, to a point somewhere south of Kadesh-barnea, then turns off westward to form the southern line, which he extends to the Mediterranean, at a point where 'the river of Egypt' falls into the sea. This river of Egypt is usually, and on very adequate grounds, supposed to be the stream which falls into the sea near El-Arish.

The western border is stated as defined by the Mediterranean coast. But the Hebrews never possessed the whole of this territory. The northern part of the coast, from Sidon to Akko (Acre), was in the hands of the Phœnicians, and the southern part, from Azotus to Gaza, was retained by the Philistines, except at intervals; and a central portion, about one-third of the whole, from Mount Carmel to Jabneh (Jamnia) was alone permanently open to the Israelites.

The northern boundary-line commenced at the sea somewhere not far to the south of Sidon, whence it was extended to Lebanon, and crossing the narrow valley which leads into the great plain enclosed between Libanus and Anti-Libanus, terminated at Mount Hermon, in the latter range.

The eastern boundary, as respects Canaan Proper, was defined by the Jordan and its lakes; but as respects the whole country, including the portion beyond the Jordan, it extended to Salchah, a town on the eastern limits of Bashan. From this point it must have inclined somewhat sharply to the south-west, to the point where the Wady ed-Deir enters the Zerka, and thence it

probably extended almost due south to the Arnon, which was the southern limit of the eastern territory.

MINERALOGY.—The mountains on the west of the Jordan consist chiefly of chalk, on which basalt begins to occur beyond Cana (northward). The so-called white limestone, which is met with around Jerusalem and thence to Jericho, which covers the summit and forms the declivities of the Mount of Olives, and which is also found at Mount Tabor and around Nazareth, is a kind of chalk considerably indurated, and approaching to whitish compact limestone. Layers and detached masses of flint are very commonly seen in it. Besides this indurated chalk, a stone is found in the immediate vicinity of Jerusalem, chiefly towards the north, as well as towards Safet, and in other parts of the country, which, together with the dolomite formation occasionally met with, appears to be of what in Germany is called the Jura formation. Palestine may be most emphatically called the country of salt, which is produced in vast abundance, chiefly in the neighbourhood of the Dead Sea, which deserves to be regarded as one of the great natural salt-works of the world.*

Under this head it may be noted that the fine impalpable desert-sand, which proves so menacing to travellers, and even to inhabitants, is scarcely found in Palestine Proper: but it occurs beyond Lebanon, near Beirut, and in the neighbourhood of Damascus.

Palestine is eminently a country of caverns, to which there is frequent allusion in Scripture [CAVES], and which are hardly so numerous in any country of the same extent. Many of them were enlarged by the inhabitants, and even artificial grottoes were formed by manual labour. In these the inhabitants still like to reside; as in summer they afford protection from the heat, and in winter from cold and rain. Even now, in many places, houses are observed built so near to rocks, that their cavities may be used for rooms or sheds suited to the condition of the season. Though the country is not unfrequently visited by earthquakes, they leave behind no such frightful traces as those of Asia Minor; as the vaults of limestone offer more effectual resistance than the sandstone of the latter country.

We are glad to see so competent a witness as Schubert bear his testimony to the natural resources of the soil, which superficial observers, judging only from present appearance, have so often questioned. He says, 'no soil could be naturally more fruitful and fit for cultivation than that of Palestine, if man had not destroyed the source of fertility by annihilating the former green covering of the hills and slopes, and thereby destroying the regular circulation of sweet water, which ascends as vapour from the sea to be cooled in the higher regions, and then descends to form the springs and rivers, for it is well known that the vegetable kingdom performs in this circulation the function of capillary tubes. But although the natives, from exasperation against their foreign conquerors and rulers, and the invaders who have so often overruled this scene of ancient blessings, have greatly reduced its prosperity, still I cannot comprehend how not only scorers like Voltaire, but early travellers, who doubtless intended to declare the truth, represent

Palestine as a natural desert, whose soil never could have been fit for profitable cultivation. Whoever saw the exhaustless abundance of plants on Carmel and the border of the desert, the grassy carpet of Esdraelon, the lawns adjoining the Jordan, and the rich foliage of the forests of Mount Tabor; whoever saw the borders of the lakes of Merom and Gennesareth, wanting only the cultivator to intrust to the soil his seed and plants, may state what other country on earth, devastated by two thousand years of warfare and spoliation, could be more fit for being again taken into cultivation. The bountiful hand of the Most High, which formerly showered abundance upon this renowned land, continues to be still open to those desirous of his blessings.'

The following table of levels in Palestine is copied from a recently published supplement to Rammer's *Palästina*. The measurements are in Paris feet, above and below the level of the Dead Sea.

	Above.
Great Hermon	10,000
Mount St. Catherine (in Sinai)	8063
Jebel Mousa (in Sinai)	7033
Jebel et Tyh (in Sinai)	4300
Jebel er-Ramah	3000
Kanneytra	2850
Hebron	2700
Mount of Olives	2536
Sinjal	2520
Safet	2500
Mount Gerizim	2400
Semua	2225
Damascus	2186
Kidron (brook)	2140
Nabulus	1751
Mount Tabor	1748
Pass of Zephath	1437
Desert of et-Tyh	1400
Nazareth	821
Zerin	515
Plain of Esdraelon	459
	Below.
Lake of Tiberias	329*
The Arabah at Kadesh	91
Dead Sea	1312*

Some of these results are most extraordinary. First, here is the remarkable fact, that the Mount of Olives and the Kidron, and consequently Jerusalem, stand 700 feet higher than the top of Mount Tabor, and about 2500 feet above the level of the Mediterranean. More to the south, Hebron stands on still higher ground; and while it is 2700 feet above the sea on the one hand, the Asphaltic Lake lies 4000 feet below it on the other. This fact has no known parallel in any other region, and within so short a distance of the sea; and the extraordinary depression of the lake (1337 feet below the sea level) adequately accounts for the very peculiar climate which its remarkable basin exhibits. The points at Tiberias to the north, and Kadesh to the south of the Dead

* These measurements are in English feet, and give the results of the lines of altitude carried from the Mediterranean to the Dead Sea and the Lake of Tiberias, by the British engineers left in Syria to make a military survey of the country, when the fleet was withdrawn from the coast in 1841.

Sea, are both, and nearly equally, below the Mediterranean level, and taken, together, they show the great slope both from the north and from the south towards the Dead Sea, confirming the discovery of Dr. Robinson, that the watershed to the south of the Asphaltic Lake is towards its basin, and that, therefore, the Jordan could not at any time, as the country is at present constituted, have flowed on southward to the Euphratic Gulf, as was formerly supposed.

MOUNTAINS.—As all the principal mountains of Palestine are noticed in this work under their respective names, it is unnecessary to offer any observations under this head.

The most important or the most distinguished of the plains and valleys of Palestine are those of Lebanon, of the Jordan, of Jericho, of Esdraelon, and of the Coast.

The Plain of Lebanon may be described as the valley which is enclosed between the parallel mountain ranges of Libanus and Anti-Libanus. This enclosed plain is the Cæle-Syria of the ancients, and now bears the name of el-Bekka (the Valley). It is about ninety miles in length, from north to south, by eleven miles in breadth, nearly equal throughout, except that it widens at the northern end and narrows at the southern. This plain is, perhaps, the most rich and beautiful part of Syria.

The Plain of the Jordan. By this name we understand the margin of the lakes, as well as the valley watered by the river. Here the heat is still greater than in the valley of Lebanon, and as water is usually wanting, the whole plain is barren and desolate.

The Plain of Jericho is but an opening or expansion in the plain of the Jordan, towards the Dead Sea. It is partly desert, but, from the abundance of water and the heat of the climate, it might be rendered highly productive; indeed, the fertility of this plain has been celebrated in every age. But of all the productions which once distinguished it, and the greater part of which it enjoyed in common with Egypt, very few now remain.

The Plain of Esdraelon is often mentioned in sacred history (Judg. iv. 13, 15, 16; v. 19; 2 Kings xxiii. 29; Zech. xii. 11; Judith i. 8), as the great battle-field of the Jewish and other nations, under the names of the *Valley of Megiddo* and the *Valley of Jezreel*; and by Josephus as the *Great Plain*. This extensive plain, exclusive of three great arms which stretch eastward towards the valley of the Jordan, may be said to be in the form of an acute triangle, having the measure of thirteen or fourteen miles on the north, about eighteen on the east, and above twenty on the south-west. In the western portion it seems perfectly level, with a general declivity towards the Mediterranean; but in the east it is somewhat undulated by slight spurs and swells from the roots of the mountains; from the eastern side three great valleys go off to the valley of the Jordan. These valleys are separated by the ridges of Gilboa and Little Hermon, and the space which lies between these two ridges is the proper valley of Jezreel, which name seems to be sometimes given to the whole plain of Esdraelon. The valley of Jezreel is a deep plain, and about three miles across. Before the verdure of spring and early summer has been parched up by the

heat and drought of the late summer and autumn, the view of the Great Plain is, from its fertility and beauty, very delightful. The plain itself is almost without villages, but there are several on the slopes of the enclosing hills, especially on the side of Mount Carmel.

The Plain of the Coast is that tract of land which extends along the coast, between the sea and the mountains. In some places, where the mountains approach the sea, this tract is interrupted by promontories and rising grounds; but, taken generally, the whole coast of Palestine may be described as an extensive plain of various breadth. Sometimes it expands into broad plains, at others it is contracted into narrow valleys. With the exception of some sandy tracts the soil is throughout rich, and exceedingly productive. The climate is everywhere very warm, and is considered rather insalubrious as compared with the upland country. It is not mentioned by any one collective name in Scripture. The part fronting Samaria, and between Mount Carmel and Jaffa, near a rich pasture-ground, was called the *Valley of Sharon*; and the continuation southward, between Jaffa and Gaza, was called *The Plain*, as distinguished from the hill-country of Judah.

RIVERS.—The Jordan is the only river of any note in Palestine, and besides it there are only two or three perennial streams. The greater number of the streams which figure in the history, and find a place in the maps, are merely torrents or watercourses.

The Jordan. We should like to consider this river simply as the stream issuing from the reservoir of the lake Huleh, but custom requires its source to be traced to some one or more of the streams which form that reservoir. The two largest streams, which enter the lake on the north, are each formed by the junction of two others. It is usual to refer the origin of a river to its remotest sources; but in this case the largest and longest, being the most easterly of the two streams, does not appear to have been at any time identified with the Jordan—that honour having for ages been ascribed to the western stream; this river has distinct sources, at Banias and at Tel-el-Kâdi. It is the former of these where a stream issues from a spacious cavern under a wall of rock which Josephus describes as the main source of the Jordan.

The true Jordan—the stream that *quits* the lake Huleh—passes rapidly along the narrow valley, and between well-shaded banks, to the lake of Gennesareth: the distance is about nine miles. Nearly two miles below the lake is a bridge, called Jacob's bridge; and here the river is about eighty feet wide, and four feet deep.

On leaving the lake of Gennesareth the river enters a very broad valley, or *Ghor*, which varies in width from five to ten miles between the mountains on each side. Within this valley there is a lower one, and within that, in some parts, another still lower, through which the river flows; the inner valley is about half a mile wide, and is generally green and beautiful, covered with trees and bushes, whereas the upper or large valley is, for the most part, sandy or barren. The distance between the lake of Gennesareth and the Dead Sea, in a direct line, is about sixty miles. In the first part of its course the

stream is clear, but it becomes turbid as it advances to the Dead Sea, probably from passing over beds of sandy clay. The water is very wholesome, always cool and nearly tasteless. The breadth and depth of the river vary much in different places and at different times of the year. Dr. Shaw calculates the average breadth at thirty yards, and the depth at nine feet. In the season of flood, in April and early in May, the river is full, and sometimes overflows its lower banks, to which fact there are several allusions in Scripture.

The Kishon, that 'ancient river,' by whose wide and rapid stream the hosts of Sisera were swept away (Judg. iv. 13; v. 21), has been noticed under the proper head [KISHON].

The Belus, now called *Nahr Kardanus*, enters the bay of Acre higher up than the Kishon. It is a small stream, fordable even at its mouth in summer. It is not mentioned in the Bible, and is chiefly celebrated for the tradition, that the

accidental vitrefaction of its sands taught man the art of making glass.

The other streams of note enter the Jordan from the east; these are the Jarmuth, the Jabbok, and the Arnon, of which the last two have been noticed under their proper heads. *The Jarmuth*, called also *Sheriat-el-Mandhour*, anciently *Hieromax*, joins the Jordan five miles below the lake of Gennesareth. Its source is ascribed to a small lake, almost a mile in circumference, at Mezareib, which is thirty miles east of the Jordan. It is a beautiful stream, and yields a considerable body of water to the Jordau [ARNON; JABBOK].

LAKES.—The river Jordan in its course forms three remarkable lakes, in the last of which, called the Dead Sea, it is lost:—

The Lake Merom or *Samochonitis*, now called *Huleh*, the first of these, serves as a kind of reservoir to collect the waters which form the Jordan, and again to send them forth in a single stream. In the spring, when the waters are highest, the

272. [Ford of the Jordan.

lake is seven miles long and three and a half broad; but in summer it becomes a mere marsh. In some parts it is sown with rice, and its reeds and rushes afford shelter to wild hogs.

The Lake of Gennesareth, called also the *Sea of Galilee*, and the *Lake of Tiberias*. After quitting the lake Merom, the river Jordan proceeds for about thirteen miles southward, and then enters the great lake of Gennesareth. This lake lies very deep, among fruitful hills and mountains, from which, in the rainy season, many rivulets descend; its shape will be seen from the map. Its extent has been greatly over-rated: Professor Robinson considers that its length, in a straight line, does not exceed eleven or twelve geographical miles, and that its breadth is from five to six miles. From numerous indications, it is judged that the bed of this lake was formed by some ancient volcanic eruption, which history has not recorded. Its waters are very clear and sweet, and contain various kinds of excellent fish in

great abundance. It will be remembered that several of the apostles were fishermen of this lake, and that it was also the scene of several transactions in the life of Christ. The borders of the lake were in the time of Christ well peopled, being covered with numerous towns and villages; but now they are almost desolate, and the fish and water-fowl are but little disturbed.

The Dead Sea, called also the *Salt Sea*, the *Sea of Sodom*, and the *Asphaltic Lake* (*Lacus Asphaltites*), is from its size the most important, and from its history and qualities the most remarkable, of all the lakes of Palestine. It is now thought probable that before the destruction of the cities of the plain, a lake existed, which, as now, received the river Jordan, but that an encroachment of the waters, southward, took place when these cities were destroyed, overwhelming a beautiful and well-watered plain which lay on the southern border of the lake, and on which

Sodom, Gomorrah, Admah, Zeboim, and Zoar were situated.

The Dead Sea is about thirty-nine or forty geographical miles long from north to south, and nine or ten miles wide from east to west; and it lies embedded very deep between lofty cliffs on the western side, which are about 1500 feet high, and mountains on the eastern shore, the highest ridges of which are reckoned to be from 2000 to 2500 feet above the water. The water of the lake is much saltier than that of the sea. From the quantity of salt which the water holds in solution it is thick and heavy, and no fish can live, or marine plants grow in it. Lying in its deep cauldron, surrounded by lofty cliffs of naked limestone rock, exposed for seven or eight months in the year to the unclouded beams of a burning sun, nothing but sterility and solitude can be looked for upon its shores; and nothing else is actually found, except in those parts where there are fountains or streams of fresh water; in all which places there is a fertile soil and abundant vegetation. Birds also abound, and they are observed to fly over and across the sea without being, as old stories tell, injured or killed by its exhalations.

On the borders of this lake is found much sulphur, in pieces as large as walnuts, and even larger. There is also a black shining stone, which will partly burn in the fire, and which then emits a bituminous smell: this is the 'stink-stone' of Burchardt. At Jerusalem it is made into rosaries and toys, of which great quantities are sold to the pilgrims who visit the sacred places. Another remarkable production found here, from which, indeed, the lake takes one of its names, is *asphaltum*, or bitumen. Josephus says, that 'the sea in many places sends up black masses of asphaltum, which float upon the surface, having the size and shape of headless oxen.' From recent information it appears that large masses are rarely found, and then generally after earthquakes. The substance is doubtless produced from the bottom of the sea, in which it coagulates, and rises to the surface; or possibly the coagulation may have been ancient, and the substance adheres to the bottom until detached by earthquakes and other convulsions, when its buoyancy brings it to the surface. We know that 'the vale of Siddim' (Gen. xiv. 10) was anciently 'full of slime-pits' or sources of bitumen; and these, now under the water, probably supply the asphaltum which is found on such occasions.

CLIMATE AND SEASONS.—The variations of sunshine and rain which, with us, extend throughout the year, are in Palestine confined chiefly to the latter part of autumn and the winter. During all the rest of the year the sky is almost uninterruptedly cloudless, and rain very rarely falls.

The autumnal rains usually commence at the latter end of October, or beginning of November, not suddenly, but by degrees; which gives opportunity to the husbandman to sow his wheat and barley. During the months of November and December the rains continue to fall heavily; afterwards they return at longer intervals, and are not so heavy; but at no period during the winter do they entirely cease to occur. Rain continues to fall more or less during the month of March, but is afterwards very rare. Morning

mists occur as late as May, but rain almost never. Rain in the time of harvest was as incomprehensible to an ancient Jew as snow in summer (Prov. xxvi. 1; 1 Sam. xii. 17; Amos iv. 7). The 'early' and the 'latter' rains, for which the Jewish husbandmen awaited with longing (Prov. xvi. 15; James v. 7), seem to have been the first showers of autumn, which revived the parched and thirsty soil, and prepared it for the seed; and the later showers of spring, which continued to refresh and forward the ripening crops and the vernal products of the fields.

The cold of winter is not severe, and the ground is never frozen. Snow falls more or less, but even in the higher lands it does not lie long on the ground. Thunder and lightning are frequent in the winter.

In the plains and valleys the heat of summer is oppressive, but not in the more elevated tracts, as at Jerusalem, except when the south wind (*Sirocco*) blows (Luke xii. 55). In such high grounds the nights are cool, often with heavy dew. The total absence of rain in summer soon destroys the verdure of the fields, and gives to the general landscape, even in the high country, an aspect of drought and barrenness. No green thing remains but the foliage of the scattered fruit-trees, and occasional vineyards and fields of millet. In autumn the whole land becomes dry and parched; the cisterns are nearly empty, and all nature, animate and inanimate, looks forward with longing for the return of the rainy season.

In the hill-country the season of harvest is later than in the plains of the Jordan and of the sea-coast. The barley-harvest is about a fortnight earlier than that of wheat. In the plain of the Jordan the wheat-harvest is early in May; in the plains of the Coast and of Esdraelon it is towards the latter end of that month; and in the hills, not until June. The general vintage is in September, but the first grapes ripen in July, and from that time the towns are well supplied with this fruit.

The climate of Palestine has always been considered healthy, and the inhabitants have for the most part lived to a good old age (Tacit. *Hist.* v. 6). Jerusalem, in particular, from its great elevation, clear sky and invigorating atmosphere, should be a healthy place, and so it is generally esteemed; but the plague frequently appears among its ill-fed and uncleanly population; and bilious fevers, the result of great and sudden vicissitudes of temperature, are more common than might be expected in such a situation.

INHABITANTS.—Under this head we present the reader with the following observations of Dr. Olin (*Travels*, ii. 438, 439):—The inhabitants of Palestine are Arabs; that is, they speak the Arabic, though, with slight exceptions, they are probably all descendants of the old inhabitants of Syria. They are a fine, spirited race of men, and gave Mohammed Ali much trouble in subduing them, and still more in retaining them in subjection. They are said to be industrious for Orientals, and to have the right elements for becoming, under better auspices, a civilized intellectual nation. . . . The mercantile class is said to be little respected, and generally to lack integrity. Veracity is held very lightly by all classes. The people are commonly temperate and frugal, which may be denominated Oriental

virtues. Their situation, with regard to the physical means of comfort and subsistence, is, in many respects, favourable, and under a tolerable government would be almost unequalled. As it is, the Syrian peasant and his family fare much better than the labouring classes of Europe. The people almost always appear well clothed. Their houses, too, though often of a slight construction and mean appearance, must be pronounced commodious when compared with the dark, crowded apartments usually occupied by the corresponding classes in Europe. Agricultural wages vary a good deal in different parts of the country, but I had reason to conclude that the average was not less than three or four piasters per day. With all these advantages population is on the decline, arising from polygamy, military conscription, unequal and oppressive taxation, forced labour, general insecurity of property, the discouragement of industry, and the plague.

NATURAL HISTORY.—As all the objects of natural history, mentioned in Scripture, are in the present work examined under the proper heads with unexampled care and completeness, by writers eminent in their several departments, it is unnecessary in this place to go over the ground which has been so advantageously pre-occupied. It may suffice to mention the following facts in respect to the *actual* natural history of the country.—The olive certainly was, and still continues to be, the chief of all the trees of Palestine, which seems to be its natural home. Excellent oil is still obtained from the fruit. But although the pre-eminence among the trees of Palestine must be assigned to the olive, *fig-trees* also occur in great numbers, and the plantations sometimes cover large tracts which the eye can scarcely embrace. The fruit has a peculiarly pleasant flavour, and an aromatic sweetness, but is generally smaller than that of Smyrna. The *vine*, which is now only found in some districts of Palestine, is not surpassed by any on earth for the strength of its juice, and—at least in the southern mountains—for the size and abundance of the grapes.

The first tree whose blossoms appear prior to the period of the latter rains, and open in the very deep valleys before the cold days of February set in, is the *Luz* or *almond-tree*. In March, the fruit-trees are in blossom, among which are the apricot, the apple, and the pear; in April the purple of the pomegranate flowers combines with the white of the myrtle blossoms; and at the same period the roses of the country, and the variegated ladanæ (*Cistus*); the zikkim-tree (*Elaeagnus angustifolius*), the storax tree, whose flowers resemble those of the German jasmine (*Philadelphus coronarius*), emit their fragrant odours. The palm-tree is not now seen in the interior of the country; but it thrives well in the low lands near the coast. The tall cypress only exists in Palestine, as cultivated by man, in gardens, and in cemeteries, and other open places of towns. But as the spontaneous growth of the country, we find upon the heights and swelling hills the *azarole* (*Cratægus azarolus*), the walnut-tree, the strawberry-tree, the laurel-tree, the laurustinus, species of the pistachio and terebinth trees, of evergreen oaks, and of the rhinunus of the size of trees and shrubs, the cedrine juniper-tree, and some sorts of thymelæus; while on the

formerly wooded heights various kinds of pine-trees, large and small, still maintain their ground. The sycamore, the carob trees, and the *opuntia fig-trees*, are only found as objects of cultivation in or near towns; and orchards of orange and lemon trees occur chiefly in the neighbourhood of Nablus (Shechem).

The various kinds of corn grow spontaneously in great plenty in many districts, chiefly in the plains of Jezreel and the heights of Galilee, being the wild progeny of formerly cultivated fields, and bearing testimony by their presence to the fitness of the soil for the production of grain. In addition to wheat and barley, among this wild growth, the common rye was often seen. The present course of agriculture, which is but carelessly practised, comprises nearly the same kinds of grain which are grown in Egypt. Fields are seen covered with the *dhurra*, or *Holcus sorghum*. Maize, spelt, and barley thrive everywhere; and rice is produced on the Upper Jordan and the marshy borders of the lake Merom. Upon the Jordan, near Jacob's bridge, may be seen fine tall specimens of the papyrus reed. Of pulse the inhabitants grow the chick pea, the blue chickling vetch, the Egyptian bean, the kidney bean, the *gilban* (*Lathyrus sativus*), together with the lentil, and the grey or field pea. Of esculent vegetables, the produce of the various species of hibiscus are much liked and cultivated. In some places the Christian inhabitants or Franks are endeavouring to introduce the potato. In the garden of the monasteries the artichoke is very common: in most districts, as about Nablus (Shechem), the water-melon and cucumber are very common. Hemp is more generally grown in Palestine than flax; and in favourable localities cotton is cultivated, and also madder for dyeing.

Herds of black cattle are now but rarely seen in Palestine. The ox in the neighbourhood of Jerusalem is small and unsightly, and beef or veal is but rarely eaten. But in the northern parts of the country the ox thrives better and is more frequently seen. The buffalo thrives upon the coast, and is there equal in size and strength to the buffalo of Egypt. Sheep and goats are still seen in great numbers in all parts of the country: their flesh and milk serve for daily food, and their wool and hair for clothing. The common sort of sheep in Palestine manifest the tendency to form a fat and large tail. The long-eared Syrian goat is furnished with hair of considerable fineness, but seemingly not so fine as that of the same species of goat in Asia Minor. Of animals of the deer kind, Schubert saw only the female of the fallow-deer; but several species of antelopes are met with in the country.

Camels are not reared to any extent worth mentioning. Palestine cannot boast of its native breed of horses, although fine animals of beautiful shape, and apparently of high Arabian race, are not unfrequently seen. The ass of the country scarcely takes higher relative rank than the horse; asses and mules are still, however, much used for riding, as they afford a means of locomotion well suited to the difficult mountain paths of the country. Boars are very often observed upon Mount Tabor and the Lesser Hermon, as well as on the woody slopes of Mount Carmel. Among indigenous animals of the genus *felis*, we may name the common panther, which is found

among the mountains of central Palestine; and in the genus *canis* there is the small *Abul Hoss-seyn*, or *Canis famelicus*, and a kind of large fox (*Canis Syriacus*). In addition to these is the jackal, which is very injurious to the flocks. The hyena is found chiefly in the valley of the Jordan, and in the mountains around the lake of Tiberias, but is also occasionally seen in other districts of Palestine. Bears are said to be found in the Anti-Libanus, not far from Damascus. A hedgehog, procured near Bethlehem, was found to resemble the common European animal, and not to be the long-eared Egyptian species. The hare is the same as the Arabian. The porcupine is frequently found in the clefts of the rocks.

Among the larger birds of prey the common vulture and the kite are oftenest seen. The native wild dove differs not perceptibly from our own species, which is also the case with the shrikes, crows, rollers, and other species found in Palestine.

Tortoises are not uncommon. Serpents are rare, and none of those which have been observed are poisonous. The *Jauchina fragilis*, which yields the common purple dye, has been noticed near the coast. Among the insects the bee is the most conspicuous. Mosquitoes are somewhat troublesome. Beetles are abundant, and of various species.

PALM. [WEIGHTS AND MEASURES.]

PALM-TREE. The family of palms is characteristic of tropical countries, and but few of them extend into northern latitudes. In the old world, the species *P. dactylifera*, genus *Phoenix*, is that found farthest north. It spreads along the course of the Euphrates and Tigris across to Palmyra and the Syrian coast of the Mediterranean. It has been introduced into the south of Spain, and thrives well at Malaga; and is also cultivated at Bordaghieri in the south of France, chiefly on account of its leaves, which are sold at two periods of the year, in Spring for Palm Sunday, and again at the Jewish Passover.

The peculiarities of the palm-tree are such that they could not fail to attract the attention of the writers of any country where it is indigenous, and especially from its being an indication of the vicinity of water even in the midst of the most desert country. Its roots, though not penetrating very deep, or spreading very wide, yet support a stem of considerable height, which is remarkable for its uniformity of thickness throughout. The centre of this lofty stem, instead of being the hardest part, as in other trees, is soft and spongy, and the bundles of woody fibres successively produced in the interior are regularly pushed outwards, until the outer part becomes the most dense and hard, and is hence most fitted to answer the purposes of wood. The outside, though devoid of branches, is marked with a number of protuberances, which are the points of insertion of former leaves. These are from four to six and eight feet in length, ranged in a bunch round the top of the stem, the younger and softer being in the centre, and the older and outer series hanging down. They are employed for covering the roofs or sides of houses, for fences, frame-work, mats, and baskets. The male and female flowers being on different trees, the latter require to be fecundated by the pollen of the former before the fruit can ripen. The

tender part of the spathe of the flowers being pierced, a bland and sweet juice exudes, which being evaporated, yield sugar, and is no doubt what is alluded to in some passages of Scripture: if it be fermented and distilled a strong spirit or *arak* is yielded. The fruit, however, which is yearly produced in numerous clusters and in the utmost abundance, is its chief value; for whole tribes of Arabs and Africans find their chief sustenance in the date, of which even the stony seeds, being ground down, yield nourishment to the camel of the desert.

273. [1. Cluster of dates; 2. flower; 3. a date; 4. section of the same.]

The palm-tree is first mentioned in Exod. xv. 27, when the Israelites encamped at Elim, where there were twelve wells and threescore and ten palm-trees. In the present day Wady Ghorendel is found the largest of the torrent beds on the west side of the Sinai peninsula, and is a valley full of date-trees, tamarisks, &c. Jericho was called the City of Palm-Trees, no doubt from the locality being favourable to their growth. Mariti and Shaw describe them as still existing there, though in diminished numbers. The palm-tree was considered characteristic of Judæa, not so much probably because it was more abundant there than in other countries, but because that was the first country where the Greeks and Romans would meet with it in proceeding southward. Hence the coins of the Roman conquerors of Judæa have inscribed on them a weeping female sitting under a palm-tree, with the inscription 'Judæa capta'.

PALSY. [DISEASES.]

PAMPHYLIA, a province in the southern part of Asia Minor, having the Mediterranean on the south, Cilicia on the east, Pisidia on the north, and Lycia on the west. It was nearly opposite the island of Cyprus, and the sea between the coast and the island is called in Acts the sea of Pamphylia. The chief cities of this province were Perga and Attalia. Christianity was probably first preached in this country by some of the Jewish proselytes who were converted on the day of Pentecost (Acts ii. 10, 13, 38). It was afterwards visited by Paul and Barnabas (Acts xiii. 13).

PAN'NAG occurs only once in Scripture, but so much uncertainty exists respecting the meaning of the word, that in many translations, as, for instance, in the Authorized English Version, the

original is retained. • Thus in the account of the commerce of Tyre, it is stated in Ezek. xxvii. 17, 'Julah and the land of Israel, they were thy merchants; they traded in thy markets wheat of Minnith, and *Pannaq*, and oil, and honey, and *balm*' (*tzeri*, translated also *rosin* in the margin of the English Bible). From the context it is evident that wheat, oil, and honey, were conveyed by Judah and Israel, that is, the products of their country as an agricultural people, as articles of traffic to the merchants and manufacturers of Tyre, who, it is certain, must, from their insular position, have obtained their chief articles of diet from the neighbouring land of Syria. It is probable, therefore, that *pannaq* and *tzeri*, whatever they may have been, were the produce of Palestine, or at least of Syria. Some have considered *pannaq* to indicate *balaam*, others *cassia*, and some again *sweetmeats*. The Syrian version renders it by a word which signifies millet. The variety and conflicting character of these interpretations are a sufficient proof that *pannaq* must still be considered undetermined.

PAPER, PAPPYRUS. [WRITING.]

PA'PHOS, a city of Cyprus, at the western extremity of the island, and the seat of the Roman governor. That officer, when Paul visited the place, was named Sergius Paulus, who was converted through the preaching of the apostle and the miracle performed on Elymas (Acts xiii. 6-11). Paphos was celebrated for a temple of Venus, whose infamous rites were still practised here 400 years afterwards, notwithstanding the success of Paul, Barnabas, and others, in preaching the Gospel. Paphos is now a poor and inconsiderable place, but gives its name to a Greek bishopric.

PARABLE. The word parable denotes 1. an obscure or enigmatical saying, e. g. Ps. xlix. 4; lxxviii. 2.

2. It denotes a fictitious narrative, invented for the purpose of conveying truth in a less offensive or more engaging form than that of direct assertion. Of this sort is the parable by which Nathan reproved David (2 Sam. xii. 2, 3). To this class also belong the parables of Christ. 3. Any discourse expressed in figurative, poetical, or highly ornamented diction is called a *parable*. Thus it is said, 'Balaam took up his *parable*' (Num. xxiii. 7); and, 'Job continued his *parable*' (Job xxvii. 1).

In the New Testament the word seems to have a more restricted signification, being generally employed in the second sense mentioned above, viz., to denote a fictitious narrative, under which is veiled some important truth. Another meaning which the word occasionally bears in the New Testament is that of a *type* or *emblem*, as in Heb. ix. 9, where the original word is rendered in our version *figure*.

The excellence of a parable depends on the propriety and force of the comparison on which it is founded; on the general fitness and harmony of its parts; on the obviousness of its main scope or design; on the beauty and conciseness of the style in which it is expressed; and on its adaptation to the circumstances and capacities of the hearers. If the illustration is drawn from an object obscure or little known, it will throw no light on the point to be illustrated. If the resemblance is forced and inobvious, the mind is per-

plexed and disappointed in seeking for it. We must be careful, however, not to insist on too minute a correspondence of the objects compared. It is not to be expected that the resemblance will hold good in every particular; but it is sufficient if the agreement exists in those points on which the main scope of the parable depends.

If we test the parables of the Old Testament by the rules above laid down, we shall not find them wanting in any excellence belonging to this species of composition. What can be more forcible, more persuasive, and more beautiful than the parables of Jotham (Judg. ix. 7-15), of Nathan (2 Sam. xii. 1-14), of Isaiah (v. 1-5), and of Ezekiel (xix. 1-9)?

But the parables uttered by our Saviour claim pre-eminence over all others on account of their number, variety, appositeness, and beauty. Indeed it is impossible to conceive of a mode of instruction better fitted to engage the attention, interest the feelings, and impress the conscience, than that which our Lord adopted. Among its advantages may be mentioned the following:—

1. It secured the attention of multitudes who would not have listened to truth conveyed in the form of abstract propositions.

2. This mode of teaching was one with which the Jews were familiar and for which they entertained a preference.

3. Some truths which, if openly stated, would have been opposed by a barrier of prejudice, were in this way insinuated, as it were, into men's minds, and secured their assent unawares.

4. The parabolic style was well adapted to conceal Christ's meaning from those who, through obstinacy and perverseness, were indisposed to receive it. This is the meaning of Isaiah in the passage quoted in Matt. xiii. 13. Not that the truth was ever hidden from those who sincerely sought to know it; but it was wrapped in just enough of obscurity to veil it from those who 'had pleasure in unrighteousness,' and who would 'not come to the light lest their deeds should be reproved.' In accordance with strict justice, such were 'given up to strong delusions, that they might believe a lie.' 'With the upright man thou wilt show thyself upright; with the froward thou wilt show thyself froward.'

The scope or design of Christ's parables is sometimes to be gathered from his own express declaration, as in Luke xii. 16-20; xiv. 11; xvi. 9.

In other cases it must be sought by considering the context, the circumstances in which it was spoken, and the features of the narrative itself, i. e. the *literal* sense. For the right understanding of this, an acquaintance with the customs of the people, with the productions of their country, and with the events of their history, is often desirable. Most of our Lord's parables, however, admit of no doubt as to their main scope, and are so simple and perspicuous that 'he who runs may read,' 'if there be first a willing mind.' To those more difficult of comprehension, more thought and study should be given, agreeably to the admonition prefixed to some of them by our Lord himself, 'Whoso heareth, let him understand.'

PARADISE, the term which by long and extensive use has been employed to designate the GARDEN of Eden, the first dwelling-place of human beings. The word was used by Xenophon

and Plutarch to signify an extensive plot of ground, enclosed with a strong fence or wall, abounding in trees, shrubs, plants, and garden culture, and in which choice animals were kept in different ways of restraint or freedom, according as they were ferocious or peaceable; thus answering very closely to our English word *park*, with the addition of *gardens*, a *menagerie*, and an *aviary*.

From its original meaning the term came by degrees to be employed as a metaphor for the abstract idea of exquisite delight, and then was transferred still higher to denote the happiness of the righteous in the future state. The origin of this application must be assigned to the Jews of the middle period between the Old and the New Testament. The Talmudical writings contain frequent references to *Paradise* as the immortal heaven, to which the spirits of the just are admitted immediately upon the liberation from the body.

Hence we see that it was in the acceptance of the current Jewish phraseology that the expression was used by our Lord and the apostles: 'To-day thou shalt be with me in Paradise;' 'He was caught up into Paradise;' 'The tree of life, which is in the Paradise of my God' (Luke xxiii. 43; 2 Cor. xii. 4; Rev. ii. 7).

EDEN is the most ancient and venerable name in geography, the name of the first district of the earth's surface of which human beings could have any knowledge.

All that we know of it goes to show that *Eden* was a tract of country; and that in the most eligible part of it was the *Paradise*, the garden of all delights, in which the Creator was pleased to place his new and pre-eminent creature, with the inferior beings for his sustenance and solace.

Upon the question of the exact geographical position of Eden, dissertations innumerable have been written. Many authors have given descriptive lists of them, with arguments for and against each. But we more than doubt the possibility of finding any locality that will answer to all the conditions of the problem. That *Phrat* is the Euphrates, and *Hiddekel* the Tigris, is agreed, with scarcely an exception; but in determining the two other rivers, great diversity of opinion exists; and, to our apprehension, satisfaction is and must remain unattainable, from the impossibility of making the evidence to cohere in all its parts. It has been remarked that this difficulty might have been expected, and is obviously probable, from the geological changes that may have taken place, and especially in connection with the deluge. This remark would not be applicable, to the extent that is necessary for the argument, except upon the supposition before mentioned, that the earlier parts of the book of Genesis consist of primeval documents, even antediluvian, and that this is one of them. There is reason to think that *since the deluge* the face of the country cannot have undergone any change approaching to what the hypothesis of a postdiluvian composition would require. But we think it highly probable that the principal of the immediate causes of the deluge, the 'breaking up of the fountains of the great deep,' was a subsidence of a large part or parts of the land between the inhabited tract (which we humbly venture to place in E. long. from Greenwich, 30° to 90°, and N. lat. 25°

to 40°) and the sea which lay to the south; or an elevation of the bed of that sea. Either of these occurrences, produced by volcanic causes, or both of them conjointly or successively, would be adequate to the production of the awful deluge, and the return of the waters would be effected by an elevation of some part of the district which had been submerged; and that part could scarcely fail to be charged with animal remains. Now the recent geological researches of Dr. Falconer and Capt. Cautley have brought to light bones, more or less mineralized, of the giraffe in the Sewalik range of hills, which seems to be a branch of the Himalaya, westward of the river Jumna. But the giraffe is not an animal that can live in a mountainous region, or even on the skirts of such a region; its subsistence and its safety require 'an open country and broad plains to roam over.' The present position, therefore, of these fossil remains, lodged in ravines and vales among the peaks, at vast elevations, leads to the supposition of a late elevation of extensive plains.

Thus we seem to have a middle course pointed out between the two extremes; the one, that by the deluge, the ocean and the land were made to exchange places for permanency; the other, that very little alteration was produced in the configuration of the earth's surface. Indeed, such alteration might not be considerable in places very distant from the focus of elevation; but near that central district it could not but be very great. An alteration of level, five hundred times less than that effected by the upthrow of the Himalayas, would change the beds of many rivers, and quite obliterate others.

From all we can learn, then, of the Garden of Eden, it appears to have been a tract of country, the finest imaginable, lying probably between the 33rd and the 37th degree of N. latitude, of such moderate elevation, and so adjusted, with respect to mountain ranges and water-sheds and forests, as to preserve the most agreeable and salubrious conditions of temperature and all atmospheric changes. Its surface must therefore have been constantly diversified by hill and plain. From its hill-sides, between the croppings out of their strata, springs trickled out, whose streamlets, joining in their courses, formed at the bottom small rivers, which again receiving other streams (which had in the same way flowed down from the higher grounds), became, in the bottom of every valley, a more considerable river. These valleys inoculated, as must consequently their contained streams; wider valleys or larger plains appeared; the river of each united itself with that of its next neighbour; others contributed their waters as the augmenting stream proceeded; and finally it quitted the land of Eden, to continue its course to some sea, or to lose its waters by the evaporation of the atmosphere or the absorption of the sandy desert. In the finest part of this land of Eden, the Creator had formed an enclosure, probably by rocks and forests and rivers, and had filled it with every product of nature conducive to use and happiness. Due moisture, of both the ground and the air, was preserved by the streamlets from the nearest hills, and the rivulets from the more distant; and such streamlets and rivulets, collected according to the levels of the surrounding country ('it proceeded from Eden')

flowed off afterwards in four larger streams, each of which thus became the source of a great river.

With regard to its locality, after the explanation we have given it may seem the most suitable to look for the site of Paradise on the south of Armenia. From this opinion few, we think, will dissent.

PARAN, a name which seems to be applied in Scripture to the whole of the desert region extending from the frontiers of Judah to the borders of Sinai. The name is still preserved in that of Wady *Feiran*, a valley of the lower Sinai, through which lay the road which appears to have been taken by the Israelites in their march to the upper region. In this valley there are ruins of a town, and indeed of more than one, with towers, aqueducts, and sepulchral excavations; and here Ruppell found the remains of a church, which he assigns to the fifth century. This was the Pharan or Faran which had a Christian population, and was the seat of a bishopric so early as A. D. 400.

PARCHMENT. [WRITING.]

PARLOUR. [HOUSE.]

PARMENAS, one of the seven first deacons of the church formed at Jerusalem (Acts vi. 5). Nothing more is known of him; but the Roman martyrologies allege that he suffered martyrdom under Trajan.

PARTHIA, the country of the Parthians, mentioned in Acts ii. 9, as being, with their neighbours the Medes and Elamites, present at Jerusalem on the day of Pentecost. The persons referred to were Jews from Parthia, and the passage is a strong evidence showing how widely spread were members of the Hebrew family in the first century of our era. The term originally referred to a small mountainous district lying to the north-east of Media. Afterwards it came to be applied to the great Parthian kingdom, into which this province expanded. Parthia Proper, or Ancient Parthia, lying between Aria and Hyrcania, the residence of a rude and poor tribe, and traversed by bare mountains, woods, and sandy steppes, formed a part of the great Persian monarchy, being a dependency on the satrapy of Hyrcania. Its inhabitants were of Scythian origin. They formed a part of the army of Xerxes, and were found in that of the last Darius. In the breaking up of the kingdom of Alexander the Parthians took sides with Eumenes, and became subject to Antigonus and the Seleucidae. About 256 years before Christ Arsaces rose against the Syro-Macedonian power, and commenced a new dynasty in his own person, designated by the title of Arsacide. This was the beginning of the great Parthian empire, which extended itself in the early days of Christianity over all the provinces of what had been the Persian kingdom, having the Euphrates for its western boundary, by which it was separated from the dominions of Rome. It was divided into eighteen provinces. Now at peace, now in bitter hostilities with Rome, now the victor and now the vanquished, the Parthians were never subjugated by the Romans. At length Artaxerxes founded a new dynasty. Representing himself as a descendant of the ancient Persian kings, and calling upon the Persians to recover their independence, he raised a large army, defeated the Parthians in a great battle, succeeded to all the dominions of the Parthian kings, and founded the

new Persian empire, to the rulers of which is commonly given the name of the Sassanidae. The government of Parthia was monarchical; but as there was no settled and recognised line of succession, rival aspirants were constantly presenting themselves, which weakened the country with internal broils, especially as the Romans saw it to be their interest to foster dissensions and encourage rivalries, and led eventually to the overthrow of the dynasty in the case of the successful aspirant Artaxerxes. During the Syro-Macedonian period the Parthian and Jewish history kept apart in separate spheres, but under the Romans the Parthians defended the party of Antigonus against Hyrcanus, and even took and plundered Jerusalem.

PARTRIDGE (1 Sam. xxvi. 20; Jer. xvii. 11; Eccles. xi. 31). Late commentators state that there are four species of the *tetrao* (grouse) of Linnæus abundant in Palestine; the francolin (*T. francolinus*), the katta (*T. alchata*), the red-legged or Barbary partridge (*T. petronus*), and the Greek partridge (*T. saxatilis*). In this now obsolete classification there are included not less than three genera, according to the more correct systems of recent writers, and not one strictly a grouse occurs in the number, though the real *T. Crogallus*, or cock of the woods, is reported to frequent Asia Minor in winter, and in that case is probably no stranger in Libanus. There is, however, the genus *Pterocles*, of which the *P. alchata* is the katta, ganga, cata, and pin-tailed grouse of authors, a species very common in Palestine, and innumerable in Arabia; but it is not the only one, for the sand-grouse of Latham (*P. arenarius*) occurs in France, Spain, Barbary, Arabia, Persia, and on the north side of the Mediterranean, or all round Palestine. *P. Arabicus*, and probably *P. exustus*, or the Arabian and singed gangas, occur equally in the open districts of the south, peopling the desert along with the ostrich. All are distinguished from other genera of *Tetraonidae* by their long and powerful wings, enabling them to reach water, which they delight to drink in abundance; and by this propensity they often indicate to the thirsty caravan in what direction to find relief. They feed more on insects, larvæ, and worms than on seeds, and none of the species having a perfect hind toe that reaches the ground, they run fast: these characteristics are of some importance in determining whether they were held to be really clean birds, and consequently could be the *selah* of the Israelites, which our versions have rendered 'quail' [QUAIL; UNCLEAN BIRDS].

The Francolin forms a second genus, whereof the common tree-partridge is the Syrian species best known, though most likely not the only one of that country. It is larger than the ganga; the male is always provided with one pair of spurs (though others of the genus have two), and has the tail longer than true partridges. This species is valued for the table, is of handsome plumage, and common from Spain and France, on both sides of the Mediterranean, eastward to Bengal.

The partridge is a third genus, reckoning in Syria the two species before named, both red-legged and furnished with orange and black crescents on the sides; but the other markings differ, and the Barbary species is smaller than

the Greek. They are inferior in delicacy to the common partridge, and it is probable that *Perdix ufa*, and the Caspian partridge, both resembling

the former in many particulars, are no strangers in Syria.

The expostulation of David with Saul, where he says, 'The king of Israel is come out to seek a flea, as when one doth hunt a partridge on the mountains,' is perfectly natural; for the red-legged partridges are partial to upland brushwood, which is not an uncommon character of

the hills and mountains of Palestine; and the koria sitting on her eggs and not hatching them (Jer. xvii. 11), we take to allude to the liability of the nest being trodden under foot, or robbed by carnivorous animals, notwithstanding all the care and interesting manœuvres of the parent birds to save it or the brood; for this genus is monogamous, nestles on the ground, and both male and female sit and anxiously watch over the safety of their young.

PAKVA'IM, a region producing the finest gold (2 Chron. iii. 6). There is very strong reason to conclude, with Bochart, that it is the same with Ophir.

1. PASH'UR, son of Immer, a priest, and chief overseer of the Temple, who smote Jeremiah and put him in the stocks for his prophecies of captivity and ruin; on which the prophet was commissioned to declare that he should be one of those to go into exile, and that he and all his friends should die in Babylon, and be buried there (Jer. xx. 1-6).

2. PASHUR, son of Melchiah, a high officer of

king Zedekiah, and one of those at whose instance Jeremiah was cast into prison (Jer. xxi. 1; xxxviii. 1-6). A descendant of his is mentioned among the new colonists of Jerusalem after the captivity (Neh. xi. 12).

PASS'OVER. The Passover, like the sabbath and other institutions, had a two-fold reference—historical and typical. As a commemorative institution it was designed to preserve amongst the Hebrews a grateful sense of their redemption from Egyptian bondage, and of the protection granted to their first-born on the night when all the first-born of the Egyptians were destroyed (Exod. xii. 27); as a typical institute its object was to shadow forth the great facts and consequences of the Christian Sacrifice (1 Cor. v. 7).

The word PASSOVER has three general acceptations in Scripture. 1st. It denotes the yearly solemnity celebrated on the 14th day of Nisan or Abib, which was strictly the *Passover of the Lamb*, for on that day the Israelites were commanded to roast the lamb and eat it in their own houses; 2nd. It signifies that yearly festivity, celebrated on the 15th of Nisan, which may be called the *Feast of the Passover* (Deut. xvi. 2; Num. xxviii. 16, 17); 3rd. It denotes the whole solemnity, commencing on the 14th, and ending on the 21st day of Nisan (Luke xxii. 1). The paschal lamb, in the age following the first institution of the Passover in Egypt, and after the settlement of the Hebrews in Palestine, could only be killed by the priests in the court of the temple (Deut. xvi. 5-7; 2 Chron. xxxv. 1-11; Lev. xvii. 3-6), whence the owner of the lamb received it from the priests, and 'brought it to his house in Jerusalem, and roasted it, and ate it in the evening;' and it was thus that Christ kept the Passover, eating it in a chamber within Jerusalem (Luke xxii. 7-11); but the feast of *unfermented things* (Exod. xii. 15) the Jews thought themselves bound to keep in every place in which they might dwell, if they could not visit Jerusalem. As, however, from the evening of the 14th to the 21st day of Abib or Nisan (April), all ferment was banished from the habitations of the Hebrews, both institutions thus received a common name (1 Cor. v. 5, 7, 8, 13).

On the 10th of the month Abib, the master of a family separated a ram or a goat of a year old, without blemish (Exod. xii. 1-6; 1 Pet. i. 19), which was slain on the 14th day, *between the two evenings*, before the altar (Deut. xvi. 2, 5, 6).*

* The Jewish day had twelve hours (John xi. 9), counting from sunrise, about six of the clock of our time. The ninth hour (or three in the afternoon) was the hour of prayer, when they went into the temple, at the daily evening sacrifice (Acts iii. 1). This was the ordinary time for the Passover, as appears from the Babylonian Talmud. 'The daily evening sacrifice was killed at the eighth hour and a-half, and it was offered up at the ninth hour and a-half. In the evening of the Passover it was killed at the seventh hour and a-half, and offered at the eighth hour and a-half.' Thus in the evening of times (Heb. i. 2; 1 Pet. i. 19, 20), or *last days*, about the same hour of the day when the paschal lamb was offered in the temple, did Christ die on Calvary, so that the substance and the shadow corresponded (Mark xv. 25-33).

Originally the blood was sprinkled on the posts of the door (Exod. xii. 7), but afterwards the priests sprinkled the blood upon the bottom of the altar (comp. Deut. vi. 9; 1 Pet. i. 2; Heb. viii. 10; ix. 13, 14). The ram or kid was roasted in an oven whole, with two spits made of pomegranate wood thrust through it, the one lengthwise, the other transversely (crossing the longitudinal one near the fore-legs), thus forming a cross. Thus roasted with fire, as an emblem of purification, it was served up with a bitter salad unpickled, indicative of the bitterness of their bondage in Egypt, and with the flesh of the other sacrifices (Deut. xvi. 2-6). What of the flesh remained uneaten was to be consumed with fire, lest it should see corruption (comp. Exod. xii. 10; Ps. xvi. 10; Acts ii. 27). Not fewer than ten, nor more than twenty persons, were admitted to this sacred solemnity. At its first observance the Hebrews ate the Passover with loins girt about, sandals on their feet, staves in their hands, and in haste, like travellers equipped and prepared for immediate departure (Exod. xii. 11); but subsequently the usual mode of reclining was adopted in token of rest and security (John xiii. 23).

PASTURAGE. In the first period of their history the Hebrews led an unsettled pastoral life, such as we still find among many Oriental tribes. One great object of the Mosaic polity was to turn them from this condition into that of fixed cultivators of the soil. Pasturage was, however, only discouraged as a *condition of life* unfriendly to settled habits and institutions, and not as a pursuit connected with agriculture. Hence, although in later times the principal attention of the Hebrews was given to agriculture, the tending of sheep and cattle was not at any time neglected.

The shepherds who move about with their flocks from one pasture-ground to another, according to the demands of the season, the state of the herbage, and the supply of water, are called *nomades*—that is, not merely *shepherds*, but *wandering shepherds*. They feed their flocks on the 'commons,' or the deserts and wildernesses, which no settled or cultivating people have appropriated. At first, no pastoral tribe can have any particular property in such tracts of ground in preference to another tribe; but, in the end, a particular tract becomes appropriated to some one tribe, or section of a tribe, either from long occupation, or from digging wells therein. According to the ideas of the East, the digging of a well is so meritorious an act, that he who performs it acquires a property in the waste-lands around. In the time of the patriarchs, Palestine was but thinly peopled by the Canaanites, and offered many such tracts of unappropriated grounds fit for pasturage. In these they fed their flocks, without establishing any exclusive claims to the soil, until they proceeded to dig wells, which, being considered as an act of appropriation, was opposed by some of the inhabitants (Gen. xxi. 25, 26). After the conquest of Canaan, those Israelites who possessed large flocks and herds sent them out, under the care of shepherds, into the 'wildernesses,' or commons, of the east and south, where there are rich and juicy pasturages during the moist seasons of the year. 1 Sam. xvii. 28; xxv. 4-15; 1 Chron. xxvii. 29-31; Isa. lxx. 10; Jer. l. 39.

PATARA, a port of Lycia in Asia Minor, where Paul, on his voyage to Jerusalem, changed his ship for one bound to Phœnicia (Acts xxi. 1, 2). Patara was at the mouth of the river Xanthus, and had a famous temple and oracle of Apollo.

PATH'ROS, a name given to Egypt, particularly Upper Egypt, by the prophet Ezekiel (ch. xxix. 14; xxx. 14) [EGYPT].

PATMOS, a rocky and bare island of the Ægean Sea, about fifteen miles in circumference, and reckoned as one of the Sporades. On account of its stern and desolate character, the island was used, under the Roman empire, as a place of banishment, which accounts for the exile of John thither 'for the testimony of Jesus' (Rev. i. 9) [JOHN]. He was here favoured with those visions which are contained in the Apocalypse, and to which the place owes its Scriptural interest.

On approaching the island the coast is found to be high, and to consist of a succession of capes, which form so many ports, some of which are excellent. The only one in use is, however, a deep bay, sheltered by high mountains on every side but one, where it is protected by a projecting cape. The town attached to this port is situated upon a high rocky mountain, rising immediately from the sea; and this, with the Scala below upon the shore, consisting of some shops and houses, forms the only inhabited site of the island.

Patmos is deficient of trees, but abounds in flowering plants and shrubs. Walnuts and other fruit trees are grown in the orchards; and the wine of Patmos is the strongest and best flavoured of any in the Greek islands. Maize and barley are cultivated, but not in a quantity sufficient for the use of the inhabitants, and for the supply of their own vessels and others which often put in at the great harbour for provisions. The island now bears the names of Patino and Palmosa, and the inhabitants do not exceed 4000 or 5000, many of whom are emigrants from the neighbouring continent.

PAVEMENT. [GABBATHA.]

PAVILION. [TENT.]

PAUL, originally *Saul*, was a native of Tarsus, a city of Cilicia (Acts xxii. 3, &c.), and was of Jewish descent, of the tribe of Benjamin (Phil. iii. 5). From his father he inherited the rights of Roman citizenship, which had probably been earned by some of his ancestry through services rendered to the Roman state. The supposition that he enjoyed them in virtue of being a native of Tarsus is not well founded.

At that time Tarsus was the rival of Athens and Alexandria as a place of learning and philosophical research; but to what extent the future 'Apostle of the Gentiles' enjoyed the advantage of its schools we have no means of accurately determining. It must be allowed, however, that the mere circumstance of having spent his early years in such a city as Tarsus could not but exert a very powerful influence on the mind of such a man as Paul, in the way of sharpening his faculties, refining his tastes, and enlarging the circle of his sympathies and affections.

But whatever uncertainty may hang over the early studies of the Apostle in the department of Greek learning, there can be no doubt that, being

the son of a Pharisee, and destined, in all probability, from his infancy to the pursuits of a doctor of Jewish law, he would be carefully instructed from his earliest years in the elements of Rabbinical lore. It is probable also that at this time he acquired his skill in that handicraft trade by which in later years he frequently supported himself (Acts xvii. 3; 1 Cor. iv. 12, &c.); for it was a maxim among the Jews, that 'he who does not teach his son a trade, teaches him to steal.'

At the proper age (supposed to be after he was fourteen years old), the Apostle proceeded to Jerusalem, to prosecute his studies in the learning of the Jews. Here he became a student under Gamaliel, a distinguished teacher of the law, and who is supposed to be the person of that name who is celebrated in the writings of the Talmudists as one of the seven teachers to whom the title 'Rabban' was given. Besides acquaintance with the Jewish law, and a sincere conviction of the supreme excellence of Judaism, Gamaliel appears to have possessed a singularly calm and judicious mind, and to have exercised a freedom of thought as well as pursued a range of study very unlike what was common among the party to which he belonged (Acts v. 34-39). It cannot be doubted that the instructions and example of such a teacher must have exercised a powerful influence on the mind of the future Apostle.

We now approach the period in Paul's history when he becomes a prominent figure on the page of the sacred historian, and when, consequently, the facts of his life can be more confidently narrated. He is introduced to our notice by the sacred historian for the first time in connection with the martyrdom of Stephen, in which transaction he was, if not an assistant, something more than a mere spectator. Immediately after this event he is represented as sharing the counsels of the chief priests, and as intrusted by them with the entire responsibility of executing their designs against the followers of Jesus (Acts xxvi. 10, 12). For such a task he showed a painful aptitude, and discharged it with a zeal which spared neither age nor sex (Acts viii. 1-3; xxvi. 10, 11). But whilst thus, in his ignorance and unbelief, he was seeking to be 'injurious' to the cause of Christ, the great Author of Christianity was about to make him a distinguished trophy of its power, and one of the most devoted and successful of its advocates. Whilst journeying to Damascus, with a commission from the high priest, to arrest and bring back as prisoners to Jerusalem the Christians who had escaped thither from the fury of their persecutors, and when he had almost completed his journey, he was suddenly arrested by a miraculous vision of Christ, who addressing him from heaven, demanded the reason of his furious zeal, in the remarkable words, 'Saul, Saul, why persecutest thou me?' Struck to the ground by the suddenness and overwhelming splendour of the vision, and only able to ask by whom it was he was thus addressed, he received for answer, 'I am Jesus of Nazareth whom thou persecutest; but arise, and go into the city, and it shall be told thee what to do.' This command the confounded and now humble zealot immediately rose to obey, but as the brilliancy of the light which had shone around him had dazzled him to blindness, he had to be led into the city by his attendants. Here

he remained for three days and nights in a state of deep mental conflict and dejection, tasting neither meat nor drink, until a person of the name of Ananias appeared at the command of Christ to relieve his distress, and to admit him into the Christian fraternity by baptizing him into the name of the Lord (Acts ix. 1-18).

Immediately on his conversion to Christianity Saul seems to have gone into Arabia, where he remained three years (Gal. i. 11-17); and where he, in all probability, was chiefly occupied by meditation and study, in preparing himself for the great work to which he had been called. Here also we may venture to suppose he received that Gospel which afterwards he preached 'by revelation' from Christ (Gal. i. 12).

Returning from Arabia to Damascus the Apostle commenced his public efforts in the service of Christ, by boldly advocating in the synagogues of the Jews the claims of Jesus to be venerated as the Son of God. At first astounded, the Jews were afterwards furiously incensed at this change in the opinions and conduct of Saul, and in consequence of their attempts upon his liberty and life, he was obliged to make his escape from Damascus. This he effected with difficulty by the aid of the Christians, some of whom let him down in a basket from the window of a dwelling erected upon the outer wall of the city (Acts ix. 21, &c.; 2 Cor. xi. 32). After this he went up to Jerusalem (for the first time after his conversion), where, on the testimony of Barnabas, he was acknowledged as a Christian brother, and admitted by the Apostles to that place in their fraternity which had been assigned to him by Christ. From Jerusalem he was soon driven by the hostility of the Jews; when, after visiting Cæsarea, he went to his native town Tarsus, where he abode several years (Acts ix. 26-30). From this retreat he was summoned by Barnabas, who, having been appointed by the Apostles at Jerusalem to visit the church at Antioch, where accessions had been made to the number of the followers of Jesus from among the Gentiles as well as the Jews, and finding the need of counsel and co-operation in his work, went to Tarsus to procure the assistance of Saul (Acts xi. 22-25). After residing and labouring for a year in Antioch, these two distinguished servants of Christ were sent up to Jerusalem with certain contributions which had been made among the Christians at Antioch, on behalf of their brethren in Judea, who were suffering from the effects of a dearth (Acts xi. 27-30). This, as commonly received, was the Apostle's second visit to Jerusalem after his conversion.

Having discharged this commission, they returned to Antioch, accompanied by John Mark, the nephew of Barnabas, and were shortly afterwards despatched by that church, in obedience to an injunction from heaven, on a general missionary tour. In the course of this tour, during the earlier part only of which they were accompanied by Mark, in consequence of his shrinking from the toils and dangers of the journey and returning to Jerusalem, they visited Seleucia, Cyprus, Perga in Pamphylia, Antioch in Pisidia, Iconium, Lystra and Derbe, cities of Lycaonia (in the former of which the fickle populace, though at first they had with difficulty been prevented from offering them Divine honours, were

almost immediately afterwards, at the instigation of the Jews, led to stone the Apostle until he was left for dead; and then they returned by way of Attalia, a city of Pamphylia, by sea to Antioch, where they rehearsed to the church all that God had done by them (Acts xiii.-xiv.). This formed the Apostle's *first* great missionary tour.

In the narrative of this journey, given by Luke, the historian, without assigning any reason for so doing, drops the name Saul, and adopts that of Paul, in designating the Apostle. It is probable from this, that it was during this journey that the Apostle's change of name actually took place. What led to that change we can only conjecture; and of conjectures on this point there has been no lack. The most probable opinion is, that as the Romans and Greeks were in the habit of softening the Hebrew names in pronunciation, and accommodating their form to that of the Latin or Greek, they substituted Paul for Saul, and the Apostle henceforward adopted the substituted name as his usual designation.

Not long after Paul and Barnabas had returned to Antioch, they were deputed by the church there again to visit Jerusalem, to consult the Apostles and elders upon the question, which certain members of the church at Jerusalem had raised in that at Antioch, whether converts from heathenism required to be circumcised, and so become Jews before they could be saved? The Apostle on this occasion visited Jerusalem for the *third* time after his conversion; and after the question had been settled by the parties in that city with whom the power to do so lay, he and his companion returned to Antioch. After restoring peace to the church there, Paul proposed to Barnabas to undertake another missionary tour, to which the latter cordially assented; but, unhappily, on the very eve of their departure a contention arose between them, in consequence of Barnabas being determined to take with them his nephew John Mark; and Paul being equally determined that one, who had on a former occasion ingloriously deserted them, should not again be employed in the work. Unable to come to an agreement on this point, they separated; and Paul, accompanied by Silas, commenced his second missionary journey, in the course of which, after passing through Syria and Cilicia, he revisited Lystra and Derbe. At the former of these places he found Timothy, whom he associated with Silas, as the companion of his further travels, after he had been ordained by the Apostle and the presbytery of the church of which he was a member (1 Tim. iv. 14). Paul then passed through the regions of Phrygia and Galatia, and avoiding Asia, strictly so called, and Bithynia, he came with his companions by way of Mysia to Troas, on the borders of the Hellespont. Hence they crossed to Samothracia, and thence to Neapolis, and so to Philippi, whither he had been summoned in a vision by a man of Macedonia saying, 'Come over and help us.' After some time spent in this city, they passed through Amphipolis and Apollonia, cities of Macedonia, and came to Thessalonica, where, though they abode only a short time, they preached the Gospel with no small success. Driven from that city by the malice of the Jews, they came by night to Beroa, another city of Macedonia, where at first they were favourably received by the Jews, until a

party from Thessalonica, which had followed them, incited the Bereans against them. Paul, as especially obnoxious to the Jews, deemed it prudent to leave the place, and accordingly retired to Athens, where he determined to await the arrival of Silas and Timothy. Whilst residing in this city, and observing the manners and religious customs of its inhabitants, his spirit was stirred within him, when he saw how entirely they were immersed in idolatry; and, unable to refrain, he commenced in the synagogues of the Jews and in the market-place to hold discussions with all whom he encountered. This led to his being taken to the Areopagus, where, surrounded by perhaps the shrewdest, most polished, most acute, most witty, and most scornful assemblage that ever surrounded a preacher of Christianity, he, with exquisite tact and ability, exposed the folly of their superstitious, and unfolded the character and claims of the living and true God. For the purpose of more effectually arresting the attention of his audience, he commenced by referring to an altar in their city, on which he had read the inscription, to an *unknown God*; and, applying this to Jehovah, he proposed to declare to them that Deity whom thus, without knowing him, they were worshipping.

On being rejoined by Timothy (1 Thess. iii. 1), and perhaps also by Silas, the Apostle sent them both back to Macedonia, and went alone to visit Corinth, whither they soon after followed him (Acts xviii. 5). Here he abode for a year and a half preaching the Gospel, and supporting himself by his trade as a tent-maker, in which he was joined by a converted Jew of the name of Aquila, who, with his wife Priscilla, had been expelled from Rome by an edict of the emperor, forbidding Jews to remain in that city. Driven from Corinth by the enmity of the Jews, he, along with Aquila and Priscilla, betook himself to Ephesus, whence, after a residence of only a few days, he went up to Jerusalem, being commanded by God to visit that city, at the time of the approaching passover. His visit on this occasion—the *fourth* since his conversion—was very brief; and at the close of it he went down to Antioch, thereby completing his *second* great apostolic tour.

At Antioch he abode for some time, and then, accompanied, as is supposed, by Titus, he commenced another extensive tour, in the course of which, after passing through Phrygia and Galatia, he visited Ephesus. The importance of this city, in relation to the region of Inner Asia, determined him to remain in it for a considerable time; and he accordingly continued preaching the Gospel there for three years, with occasional brief periods of absence, for the purpose of visiting places in the vicinity. With such success were his efforts crowned, that the gains of those who were interested in supporting the worship of Diana, the tutelary goddess of the city, began to be seriously affected; and at the instigation of one of these, by name Demetrius, a silversmith, who had enjoyed a lucrative traffic by the manufacture of what appear to have been miniature representations of the famous temple of Diana, a popular tumult was excited against the Apostle, from the fury of which he was with difficulty rescued by the sagacity and tact of the town-clerk, aided by others of the chief men of the place, who appear to have been friendly towards Paul. By this

occurrence the Apostle's removal from Ephesus, on which, however, he had already determined (Acts xix. 21), was in all probability expedited; and, accordingly, he very soon after the tumult went by way of Troas to Philippi, where he appears to have resided some time, and from which, as his head-quarters, he made extensive excursions into the surrounding districts, penetrating even to Illyricum, on the eastern shore of the Adriatic (Rom. xv. 19). From Philippi he went to Corinth, where he resided three months, and then returned to Philippi, having been frustrated in his design of proceeding through Syria to Jerusalem by the malice of the Jews. Sailing from Philippi, he came to Troas, where he abode seven days; thence he journeyed on foot to Assos; thence he proceeded by sea to Miletus, where he had an affecting interview with the elders of the church at Ephesus (Acts xx. 17, sq.); thence he sailed for Syria, and, after visiting several intermediate ports, landed at Tyre; and thence, after a residence of seven days, he travelled by way of Ptolemais and Casarea to Jerusalem. This constituted his *fifth* visit to that city after his conversion.

On his arrival at Jerusalem he had the mortification to find that, whilst the malice of his enemies the Jews was unabated, the minds of many of his brother Christians were alienated from him on account of what they deemed his too lax and liberal notions of the obligations of the Mosaic ritual. To obviate these feelings on their part, he, at the suggestion of the Apostle James, joined himself to four persons who had taken on them the vows of a Nazarite, and engaged to pay the cost of the sacrifices by which the Mosaic ritual required that such should be absolved from their vows. But this somewhat questionable act of the Apostle had no effect whatever in securing for him any mitigation of the hatred with which he was regarded by the unconverted Jews; on the contrary, his appearance in the temple so much exasperated them, that, before his vow was accomplished, they seized him, and would have put him to death had not Lysias, the commander of the Roman cohort in the adjoining citadel, brought soldiers to his rescue. Under the protection of Lysias, the Apostle addressed the angry mob, setting forth the main circumstances of his life, and especially his conversion to Christianity, and his appointment to preach the Gospel to the Gentiles. Up to this point they heard him patiently; but no sooner had he insinuated that the Gentiles were viewed by him as placed on a par with the Jews, than all their feelings of national bigotry burst forth in a tempest of execration and fury against the Apostle. Lysias, ignorant of what Paul had been saying, from his having addressed the people in Hebrew, and suspecting from these vehement demonstrations of the detestation in which he was held by the Jews that something flagrantly vicious must have been committed by him, gave orders that he should be examined, and forced by scourging to confess his crime. From this indignity Paul delivered himself by asserting his privileges as a Roman citizen, whom it was not lawful to bind or scourge. Next day, in the presence of the Sanhedrim, he entered into a defence of his conduct. In the course of which, having avowed himself a believer in the doctrine of a bodily resurrection, he awakened so fierce a

controversy on this point between the Pharisees and the Sadducees in the council, that Lysias, fearing he might be torn to pieces among them, gave orders to remove him into the fort. From a conspiracy into which above forty of the Jews had entered to assassinate him he was delivered by the timely interposition of his nephew, who, having acquired intelligence of the plot, intimated it first to Paul, and then to Lysias. Alarmed at the serious appearance which the matter was assuming, Lysias determined to send Paul to Casarea, where Felix the procurator was residing, and to leave the affair to his decision. At Casarea Paul and his accusers were heard by Felix; but though the Apostle's defence was unanswerable, the procurator, fearful of giving the Jews offence, declined pronouncing any decision, and still retained Paul in bonds. Some time after he was again summoned to appear before Felix, who, along with his wife Drusilla, expressed a desire to hear him 'concerning the faith in Christ;' and on this occasion the faithful and fearless Apostle discoursed so pointedly on certain branches of good morals, in which the parties he was addressing were notoriously deficient, that Felix trembled, and hastily sent him from his presence. Shortly after this Felix was succeeded in his government by Porcius Festus, before whom the Jews again brought their charges against Paul; and who, when the cause came to be heard, showed so much of a disposition to favour the Jews, that the Apostle felt himself constrained to appeal to Caesar. To gratify King Agrippa and his wife Bernice, who had come to Casarea to visit Festus, and whose curiosity was excited by what they had heard of Paul, he was again called before the governor, and 'permitted to speak for himself.' On this occasion he recapitulated the leading points of his history, and gave such an account of his views and designs, that a deep impression was made on the mind of Agrippa favourable to Christianity and to the Apostle; so much so that, but for his having appealed to Caesar, it is probable he would have been set at liberty. His cause, however, having by that appeal been placed in the hands of the emperor, it was necessary that he should go to Rome, and thither accordingly Festus sent him. His voyage was long and disastrous. Leaving Casarea when the season was already considerably advanced, they coasted along Syria as far as Sidon, and then crossed to Myra, a port of Lycia; thence they sailed slowly to Cnidus; and thence, in consequence of unfavourable winds, they struck across to Crete, and with difficulty reached a port on the southern part of that island called 'The Fair Haven,' near the town of Lasca. There Paul urged the centurion, under whose charge he and his fellow-prisoners had been placed, to winter; but the place not being very suitable for this purpose, and the weather promising favourably, this advice was not followed, and they again set sail, intending to reach Phoenice, a port in the same island, and there to winter. Scarcely had they set sail, however, when a tempest arose, at the mercy of which they were driven for fourteen days in a westerly direction, until they were cast upon the coast of Malta, where they suffered shipwreck, but without any loss of life. Hospitably received by the natives, they abode there three months, during

which time Paul had a favourable opportunity of preaching the Gospel, and of showing the power with which he was endued for the authentication of his message by performing many miracles for the advantage of the people. On the approach of spring they availed themselves of a ship of Alexandria which had wintered in the island, and set sail for Syracuse, where they remained three days; thence they crossed to Rhegium, in Italy; and thence to Puteoli, from which place Paul and his companions journeyed to Rome. Here he was delivered by the centurion to the captain of the guard, who permitted him to dwell in his own hired house under the surveillance of a soldier. And thus he continued for two years, 'receiving all that came to him, preaching the kingdom of God, and teaching those things which concern the Lord Jesus Christ, with all confidence, no man forbidding him' (Acts xxi. 17; xxviii. 31).

At this point the evangelist abruptly closes his narrative, leaving us to glean our information regarding the subsequent history of the Apostle from less certain sources. Tradition steadfastly affirms that he suffered martyrdom at Rome, and that the manner of his death was by beheading; but whether this took place at the close of the imprisonment mentioned by Luke, or after a second imprisonment incurred subsequent to an intervening period of freedom and active exertion in the cause of Christianity, has been much discussed by modern writers.

If, on the evidence furnished by the allusions in the Second Epistle to Timothy, we adopt the latter hypothesis, it will follow that Paul, during the interval between his first and second imprisonments, undertook an extensive apostolic tour, in the course of which he visited his former scenes of labour in Asia and Greece, and perhaps also fulfilled his purpose of going into Spain (Rom. xv. 24-28). He probably also visited Crete and Dalmatia.

PEACOCK. A good deal of discussion has taken place respecting the precise meaning of the word which is thus rendered in the Authorized Version (1 Kings x. 22; 2 Chron. ix. 21). Some have supposed that a crested parrot is meant, others that the pheasant is the bird intended, but the weight of evidence is in favour of the usual rendering.

There are only two species of true peacocks, viz., that under consideration, which is the *Pavo cristatus* of Linn.; and another, *Pavo muticus*, more recently discovered, which differs in some particulars, and originally belongs to Japan and China. Peacocks bear the cold of the Himalayas; they run with great swiftness, and where they are, serpents do not abound, as they devour the young with great avidity, and, it is said, attack with spirit even the cobra de capello when grown to considerable size, arresting its progress and confusing it by the rapidity and variety of their evolutions around it, till exhausted with fatigue it is struck on the head and despatched.

A detailed description of a species so well known, we deem superfluous.

PEARLS. It is doubtful that pearls are mentioned in the Old Testament. The word *gabish*, rendered 'pearl' in Job xxviii. 18, appears to mean crystal; and the word *penaim*, which our version translates by 'rubies,' is now supposed to

mean coral [CORAL]. But in the New Testament the pearls are repeatedly mentioned. In Matt. xiii. 45, 46, a merchant (travelling jeweller) seeking goodly pearls, finds one pearl of great price, and to be able to purchase it, sells all that he has—all the jewels he had previously secured. In 1 Tim. ii. 9, and Rev. xvii. 4, pearls are mentioned as the ornaments of females; in Rev. xviii. 12-16, among costly merchandize; and Rev. xxi. 12, the twelve gates of the heavenly Jerusalem are 'twelve pearls.' These intimations seem to indicate that pearls were in more common use among the Jews after than before the captivity, while they evince the estimation in which they were in later times held. The island of Tylos (Bahrein) was especially renowned for its fishery of pearls; the Indian ocean was also known to produce pearls. 'Pearls have at all times been esteemed one of the most valuable commodities of the East. Their modest splendour and simple beauty appear to have captivated the Orientals, even more than the dazzling brilliancy of the diamond, and have made them at all times the favourite ornament of despotic princes. In the West, the passion for this elegant luxury was at its height about the period of the extinction of Roman freedom, and they were valued in Rome and Alexandria as highly as precious stones. In Asia this taste was of more ancient date, and may be traced to a period anterior to the Persian dynasty; nor has it ever declined. A string of pearls of the largest size is an indispensable part of the decorations of an Eastern monarch. It was thus that Tippoo was adorned when he fell before the gates of his capital; and it is thus that the present ruler of the Persians is usually decorated.

PEKAH (*open-eyed*), the officer who slew Pekahiah and mounted the throne in his stead (n.c. 758), becoming the eighteenth king of Israel. He reigned twenty years. Towards the close of his life (but not before the seventeenth year of his reign) he entered into a league with Rezin, king of Damascus-Syria, against Judah; and the success which attended their operations induced Ahaz to tender to Tiglath-pileser, king of Assyria, his homage and tribute, as the price of his aid and protection. The result was that the kings of Syria and Israel were soon obliged to abandon their designs against Judah in order to attend to their own dominions, of which considerable parts were seized and retained by the Assyrians. Israel lost all the territory east of the Jordan, and the two and a half tribes which inhabited it were sent into exile. These disasters seem to have created such popular discontent as to give the sanction of public opinion to the conspiracy headed by Hoshea, in which the king lost his life (2 Kings xv. 25, sq.; xvi. 5, sq.; Isa. vii.; viii. 1-9; xvii. 1-11).

PEKAHIAH (*Jehovah has opened his eyes*), son and successor of Menahem, king of Israel, who began to reign in B.C. 760. He patronized and supported the idolatry of the golden calves; and after an undistinguished reign of two years, Pekah, one of his generals, conspired against him, and, with the aid of Argob and Arish, and fifty Gileadites, slew him in the haram of his own palace (2 Kings xv. 22-25).

PELEG, son of Eber, and fourth in descent from Shem. His name means *division*, and is

aid to have been given him 'because in his days the earth was divided' (Gen. x. 25; xi. 16).

PELICAN (Lev. xi. 18; Deut. xiv. 17; Ps. ciii. 6; Isa. xxxiv. 11; Zeph. ii. 14).

The name *kaath* thus rendered, is supposed to be derived from the action of throwing up food, which the bird really effects when discharging the contents of the bag beneath its bill. But it may be suggested, as not unlikely, that the name is imitative of the voice of the pelican, which, although seldom heard in captivity, is uttered frequently at the periods of migration, and is compared to the braying of an ass.

Pelicans are chiefly tropical birds, equal or superior in bulk to the common swan: they have powerful wings; fly at a great elevation; are partially gregarious; and though some always remain in their favourite subarctic regions, most of them migrate in our hemisphere with the northern spring, occupy Syria, the lakes and

276.

rivers of temperate Asia, and extend westward into Europe up the Danube into Hungary, and northward to some rivers of southern Russia. They likewise frequent salt-water marshes, and the shallows of harbours, but seldom alight on the open sea, though they are said to dart down upon fish from a considerable height.

PE'LI'ITHITES. [CHERETHITES and PELI'ITHITES.]

PEN. [WRITING.]

PEN'UEL (*face of God*), or PENU'EL, a place beyond the Jordan, where Jacob wrestled with the angel, and 'called the name of the place Peniel; for I have seen God face to face, and my life is preserved' (Gen. xxxii. 30). There was in after-times a fortified town in this place, the inhabitants of which exposed themselves to the resentment of Gideon, for refusing succour to his troops when pursuing the Midianites (Judg. viii. 8). The site is not known; but it must have been at some point on or not far from the north bank of the Jabkok. Men of this name occur in 1 Chron. iv. 4; viii. 25.

PENIN'NAH (*coral*), one of the two wives of Elkanah, the father of Samuel (1 Sam. i. 2).

PENNY. [DRACHMA; DENARIUS.]

PENTATEUCH is the title given to the five books of Moses. The Jews usually call the Pentateuch *the law*.

In considering the Pentateuch, the first question which arises is—Who was its AUTHOR? It is of great importance to hear, first, what the book itself says on this subject. The Pentateuch does not present itself as an anonymous production. It is manifestly intended and destined to be a public monument for the whole people, and it does not veil its origin in a mysterious obscurity; on the contrary, the book speaks most clearly on this subject.

According to Exod. xvii. 14, Moses was commanded by God to write the victory over the Amalekites in the book. This passage shows that the account to be inserted was intended to form a portion of a more extensive work, with which the reader is supposed to be acquainted. It also proves that Moses, at an early period of his public career, was filled with the idea of leaving to his people a written memorial of the Divine guidance, and that he fully understood the close and necessary connection of an authoritative law with a written code. It is, therefore, by no means surprising that the observation repeatedly occurs, that Moses wrote down the account of certain events (Exod. xxiv. 4, 7; xxxiv. 27, 28; Num. xxxiii. 2). Especially important are the statements in Deut. i. 5; xxviii. 58. In Deut. xxxi. 9, 24 (30) the whole work is expressly ascribed to Moses as the author, including the poem in Deut. xxxii. It may be made a question whether the hand of a later writer, who finished the Pentateuch, is perceptible from ch. xxxi. 24 (comp. xxxiii. 1, and xxxiv.), or whether the words in xxxi. 24-30 are still the words of Moses. In the former case we have two witnesses, viz. Moses himself, and the continuator of the Pentateuch; in the latter case, which seems to us the more likely, we have the testimony of Moses alone.

Modern criticism has raised many objections against these statements of the Pentateuch relative to its own origin. Many critics suppose that they can discover in the Pentateuch indications that the author intended to make himself known as a person different from Moses. The most important objection is the following: that the Pentateuch, speaking of Moses, always uses the third person, bestows praise upon him, and uses concerning him expressions of respect. The Pentateuch even exhibits Moses quite objectively in the blessing recorded in Deut. xxxiii. 4, 5.

To this objection we reply, that the use of the third person proves nothing. The later Hebrew writers also speak of themselves in the third person. We might adduce similar instances from the classical authors, as Cæsar, Xenophon, and others. The use of the third person, instead of the first, prevails also among Oriental authors. In addition to this we should observe, that the nature of the book itself demands the use of the third person, in reference to Moses, throughout the Pentateuch. This usage entirely corresponds with the character both of the history and of the law contained in the Pentateuch. If we consider that the Pentateuch was destined to be a book of divine revelation, in which God exhibited to his people the exemplification of his providential guidance, we cannot expect that Moses, by whom the Lord had communicated his latest revelations, should be spoken of otherwise than in the third person. In the poetry contained in Deut. xxxiii.

4. Moses speaks in the name of the people, which he personifies and introduces as speaking. The expressions in Exod. xi. 3. and Num. xii. 3 and 7, belong entirely to the context of history, and to its faithful and complete relation; consequently it is by no means vain boasting that is there expressed, but admiration of the divine mercy glorified in the people of God. In considering these passages we must also bear in mind the far greater number of other passages which speak of the feebleness and the sins of Moses.

It is certain that the author of the Pentateuch asserts himself to be Moses. The question then arises, whether it is possible to consider this assertion to be true—whether Moses can be admitted to be the author? In this question is contained another, viz. whether the Pentateuch forms such a continuous whole that it is possible to ascribe it to one author? This question has been principally discussed in modern criticism. In various manners it has been tried to destroy the unity of the Pentateuch, and to resolve its constituent parts into a number of documents and fragments. Eichhorn and his followers assert that GENESIS only is composed of several ancient documents. This assertion is still reconcilable with the Mosaic origin of the Pentateuch. But Vater and others allege that the whole Pentateuch is composed of fragments; from which it necessarily follows that Moses was not the author of the whole. Modern critics are, however, by no means unanimous in their opinions. The latest writer on this subject, Ewald, in his history of the people of Israel, asserts that there were seven different authors concerned in the Pentateuch. On the other hand, the internal unity of the Pentateuch has been demonstrated in many able essays. The attempts at division are especially supported by an appeal to the prevailing use of the different names of God in various portions of the work; but the arguments derived from this circumstance have been found insufficient to prove that the Pentateuch was written by different authors.

The inquiry concerning the unity of the Pentateuch is intimately connected with its HISTORICAL CHARACTER. If there are in the Pentateuch decided contradictions, or different contradictory statements of one and the same fact, not only its unity but also its historical truth would be negatived. On the other hand, if the work is to be considered as written by Moses, the whole style and internal veracity of the Pentateuch must correspond with the character of Moses. Considerate critics, who are not under the sway of dogmatic prejudices, find that the passages which are produced in order to prove that the Pentateuch was written after the time of Moses, by no means support such a conclusion, and that a more accurate examination of the contents of the separate portions discovers many vestiges demonstrating that the work originated in the age of Moses.

In the remote times of Jewish and Christian antiquity, we find no vestiges of doubt as to the genuineness of the Mosaic books. The Gnostics, indeed, opposed the Pentateuch, but attacked it merely on account of their dogmatical opinions concerning the Law, and Judaism in general; consequently they did not impugn the authenticity, but merely the divine authority of the Law.

Heathen authors alone, as Celsus and Julian, represented the contents of the Pentateuch as being mythological, and paralleled them with Pagan mythology.

In the middle ages, but not earlier, we find some very concealed critical doubts in the works of some Jews—as Isaac Ben Josos, who lived in the eleventh century, and Aben Ezra. After the Reformation, it was sometimes attempted to demonstrate the later origin of the Pentateuch. Such attempts were made by Spinoza, Richard Simon, Le Clerc, and Van Dale; but these critics were not unanimous in their results.

In the period of English, French, and German deism, the Pentateuch was attacked rather by jests than by arguments. Attacks of a more scientific nature were made about the end of the eighteenth century. But these were met by such critics as John David Michaelis and Eichhorn, who energetically and effectually defended the genuineness of the Pentateuch. These critics, however, on account of their own false position, did as much harm as good to the cause.

A new epoch of criticism commences about the year 1805. This was produced by Vater's *Commentary and de Wette's Beiträge zur Einleitung in das alte Testament*. Vater embodied all the arguments which had been adduced against the authenticity of the Pentateuch, and applied to the criticism of the sacred books the principles which Wolf had employed with reference to the Homeric poems. He divided the Pentateuch into fragments, to each of which he assigned its own period, but referred the whole generally to the age of the Assyrian or Babylonian exile. Since the days of Vater a series of the most different hypotheses has been produced by German critics about the age of the Pentateuch, and that of its constituent sections. No one critic seems fully to agree with any other; and frequently it is quite evident that the opinions advanced are quite arbitrary, and destitute of any sure foundation.

PENTECOST, the name (signifying fiftieth) given in the New Testament to the Feast of Weeks, or of Ingathering, which was celebrated on the *fiftieth* day from the festival of unleavened bread, or the Passover; or seven weeks from the 16th day of Nisan. It was a festival of thanks for the harvest, and commenced immediately after the Passover [FESTIVALS]. It was one of the three great yearly festivals, in which all the males were required to appear before God at the place of his sanctuary. Josephus states that in his time great numbers of Jews resorted from every quarter to Jerusalem to keep this festival. This testimony affords interesting corroboration of Acts ii. 1, 9-11; xx. 16; 1 Cor. xvi. 8, in which the same fact appears. The commencement of the Christian church on the day of Pentecost, preceded as it was by our Lord's ascension, attached a peculiar interest to this season, and eventually led to its being set apart for the commemoration of these great events. It was not, however, established as one of the great festivals until the fourth century. The combination of two events (the Ascension and the descent of the Holy Ghost) in one festival has a parallel in the original Jewish feast, which is held to have included the feast of first-fruits, and of the delivering of the law (Exod. xxiii. 16; Lev. xxiii. 14-21;

Num. xxviii. 26). Indeed, this festival in some respects bears a close analogy to the Jewish one; and is evidently little more than a modification of it. The converts of that day, on which the Holy Ghost descended, were the *first fruits* of the Spirit. This festival became one of the three baptismal seasons, and it derives its name of Whitsunday, or white-Sunday, from so many being clad in white on this the day of their baptism.

1. PEOR, a mountain in the land of Moab (Num. xxiii. 28). Eusebius places it between Livias and Esbus, over against Jericho; which shows that it was not supposed to be east of the Dead Sea, as usually stated. It has not in modern times been recognised.

2. PEOR, an idol. [BAL-PEOR.]

PEREZ-UZZAH, a place in the neighbourhood of Jerusalem, which obtained this name (meaning 'breach of Uzzah') from the judgment inflicted upon Uzzah for rashly handling the ark (2 Sam. vi. 8; 1 Chron. xiii. 11).

PERFUMES. In the article ANOINTING we have noticed the use of perfumes in Eastern countries; and in the botanical articles all the aromatic substances mentioned in Scripture are carefully examined. Here, therefore, we have only to add a few remarks, which the scope of those articles does not embrace.

The ointments and oils used by the Israelites were rarely simple, but were compound of various ingredients (Job xl. 22). Olive oil, the valued product of Palestine (Deut. xxviii. 40; Mic. vi. 15), was combined with sundry aromatics, chiefly foreign (1 Kings x. 10; Ezek. xxvii. 22), particularly bosen, myrrh, and nard [see these words]. Such ointments were for the most part costly (Amos vi. 6), and formed a much-coveted luxury. The ingredients, and often the prepared oils and resins in a state fit for use, were obtained chiefly in traffic from the Phœnicians, who imported them in small alabaster boxes [ALABASTER], in which the delicious aroma was best preserved. The preparation of the more costly unguents required peculiar skill and therefore formed a particular profession. The *ro-kechim* of Exod. xxx. 25, 35; Neh. iii. 8; Eccles. x. 1, called 'Apothecary' in the Auth. Vers., was no other than a maker of perfumes. So strong were the better kinds of ointments, and so perfectly were the different component substances amalgamated, that they have been known to retain their scent several hundred years. One of the alabaster vases in the museum at Alnwick Castle contains some of the ancient Egyptian ointment, between two and three thousand years old, and yet its odour remains.

The 'holy anointing oil,' employed in the sacerdotal unction, was composed of two parts 'myrrh,' two parts 'cassia,' one part 'cinnamon,' one part 'sweet calamus,' compounded 'according to the art of the perfumer,' with a sufficient quantity of the purest olive oil to give it the proper consistence (Exod. xxx. 23, 25). It was strictly forbidden that any perfume like this, that is, composed of the same ingredients, should be used for common purposes, or indeed made at all (xxx. 32, 33).

The prodigious quantity of this holy ointment made on the occasion which the text describes, being no less than 750 ounces of solids com-

pounded with five quarts of oil, may give some idea of the profuse use of perfumes among the Hebrews. We are, indeed, told by the Psalmist (cxxxiii. 2), that when the holy anointing oil was poured upon the head of Aaron, it flowed down over his beard and dress, even to the skirts of his garments.

PERGA, a town of Pamphylia, in Asia Minor, situated upon the river Cestrus, sixty stades from its estuary. On a hill near the town stood a celebrated temple of Artemis, at which the inhabitants of the surrounding country held a yearly festival in honour of the goddess. Perga was originally the capital of Pamphylia; but when that province was divided into two, Side became the chief town of the first, and Perga of the second Pamphylia. The apostle Paul was twice at this place (Acts xiii. 13; xiv. 25). In the first instance he seems to have landed at Perga, and the Cestrus was then, in fact, navigable to the town, although the entrance to the river is now impassable, having long been closed by a bar. The site has been established by Col. Leake, as that where extensive remains of vaulted and ruined buildings were observed by General Köhler on the Cestrus, west of Stavros. It is called by the Turks Eski-kalesi.

PERGAMOS, or PERGAMUM, a town of the Great Mysia, the capital of a kingdom of the same name, and afterwards of the Roman province of Asia Propria. The river Caicus, which is formed by the union of two branches meeting thirty or forty miles above its mouth, waters an extensive valley not exceeded in natural beauty and fertility by any in the world. In this valley, in N. lat. 39° 4', E. long. 27° 12', stood Pergamos, at the distance of about twenty miles from the sea. It lay on the north bank of the Caicus, at the base and on the declivity of two high and steep mountains, on one of which now stands a dilapidated castle. About two centuries before the Christian era, Pergamos became the residence of the celebrated kings of the family of Attalus, and a seat of literature and the arts. King Eumenes, the second of the name, greatly beautified the town, and increased the library of Pergamos so considerably that the number of volumes amounted to 200,000. As the papyrus shrub had not yet begun to be exported from Egypt, sheep and goat skins, cleaned and prepared for the purpose, were used for manuscripts; and as the art of preparing them was brought to perfection at Pergamos, they, from that circumstance, obtained the name of *pergamena*, or parchment. The library remained at Pergamos after the kingdom of the Attali had lost its independence, until Antony removed it to Egypt, and presented it to Queen Cleopatra. The valuable tapestries, called in Latin *auleæ*, from having adorned the hall of King Attalus, were also wrought in this town. The last king of Pergamos bequeathed his treasures to the Romans, who took possession of the kingdom also, and erected it into a province under the name of Asia Propria. Pergamos retained under the Romans that authority over the cities of Asia, which it had acquired under the successors of Attalus, and it still preserves many vestiges of its ancient magnificence. Remains of the Asclepium and of some other temples, of the theatre, stadium, amphitheatre, and several other buildings, are still to be seen. Even now, Perga-

mos, under the name of Bergamo, is a place of considerable importance, containing a population estimated at 14,000, of whom about 3000 are Greeks, 300 Armenians, and the rest Turks. The town consists for the most part of small and mean wooden houses, among which appear the remains of early Christian churches, showing 'like vast fortresses amid vast barracks of wood.'

In Pergamos was one of 'the seven churches of Asia,' to which the Apocalypse is addressed. This church is commended for its fidelity and firmness in the midst of persecutions, and in a city so eminently addicted to idolatry. 'I know,' it is said, 'thy works, and where thou dwellest, even where Satan's seat is' (Rev. ii. 13). Now there was at Pergamos a celebrated and much frequented temple of Æsculapius, who probably there, as in other places, was worshipped in the form of a living serpent, fed in the temple, and considered as its divinity. Hence Æsculapius was called the god of Pergamos, and on the coins struck by the town Æsculapius appears with a rod encircled by a serpent. As the sacred writer mentions (Rev. xii. 9) the great dragon and the old serpent, there is reason to conclude that when he says in the above passage, that the church of Pergamos dwelt 'where Satan's seat is,' he alludes to the worship of the serpent, which was there practised.

PERIZZITE, a Canaanitish tribe inhabiting the mountainous region which they eventually yielded to Ephraim and Judah (Josh. xi. 3; xvii. 15; Judg. i. 4, 5). They were kindred to the Canaanites strictly so called (Exod. xxiii. 23; Judg. i. 45); sometimes Canaanites and Perizzites are put for all the other tribes of Canaan (Gen. xiii. 7; xxxiv. 30); while in other places the Perizzites are enumerated with various other tribes of the same stock (Gen. xv. 20; Exod. iii. 8, 17; Deut. vii. 1, &c.). A residue of the Perizzites still remained in the time of Solomon, and were by him subjected to bond-service (1 Kings ix. 20).

PERSIANS, the name of people and nation which occurs only in the later periods of the biblical history, and then for the most part in conjunction with the Medes [MEDÆ]—a conjunction which tends to confirm the truth of the sacred records, since the most respectable historical authorities have found reason to conclude that the Medes and Persians were in truth but one nation, only that at an earlier period the Medes, at a later period the Persians, gained the upper hand and bore sway. This ascendancy, in the case of the Persians, as generally in the ancient Asiatic governments, was owing to the corrupting and enervating influence of supreme and despotic power on the one side, and on the other to the retention on the part of mountaineers, or of tribes seated remotely from the centre of the empire, of primitive simplicity,—in laborious lives, hard fare, and constant exposure, which create patient endurance, athletic strength, manly courage, independence: qualities which in their turn refuse or throw off a yoke, and convert a subject into a conquering and ruling nation. At what precise time this great change was brought about in regard to the Medes and Persians, we are not in a condition to determine historically. With Cyrus the elder, however, begins (B.C. 558) the domination of the Persian dynasty which held rule over

Media as well as Persia. Whether Cyrus came to the throne by inheritance, as the son-in-law of Cambyzes II., according to Xenophon, or whether he won the throne by vanquishing Astyages, the last Median king, agreeably to the statements of Herodotus, is one of those many points connected with early Eastern history, which, for want of documents, and in the midst of historical discrepancies, must remain probably for ever uncertain.

The most interesting event to the theologian in the history of Cyrus is the permission which he gave (B.C. 536) to the captive Jews to return to their native land. After a prosperous reign of the unusual length in Asiatic monarchies of thirty years, Cyrus was gathered to his fathers (B.C. 529). He was succeeded by Cambyzes (B.C. 529), who, according to Herodotus, reigned seven years and five months. Then came (B.C. 522) Smerdis, nominally brother of Cambyzes, but in reality a Magian; and as the Magi were of Median blood, this circumstance shows that, though the Medes had lost the sovereignty, they were not without great power. Smerdis being assassinated (B.C. 521), Darius Hystaspis was elected king. He favoured the Jews, and permitted them to resume and complete the building of their temple, which had been broken off by reason of jealousy on the part of the heterogeneous populations of Samaria (Ezra iv. 2; 2 Kings xvii. 24), and the influence which they exerted at the Persian court (Ezra iv. 11). The last monarch had for successor Xerxes (B.C. 485), who is probably the Ahasuerus of Esther and Mordecai. After a reign of twenty years, Xerxes was murdered by Artabanus, who, however, enjoyed his booty only for the short period of seven months. The next in order was Artaxerxes (I.) Longimanus (B.C. 465), who enjoyed his power for the surprisingly long period of forty years, and then quietly handed the sceptre over to his son Xerxes II. (B.C. 424), who reigned but two months. He was followed by his step-brother Sogdianus (B.C. 424), whose rule came to an end in seven months; thus making way for Darius Nothus, whose reign lasted nineteen years. Artaxerxes (II.) Mnemon next took the throne (B.C. 404), and is reported to have reigned forty or forty-three years (Diod. Sicul. xiii. 108; xv. 93). His successor was Artaxerxes Ochus (B.C. 364), who occupied the throne for twenty-six years. Then came Arses (B.C. 338), reigning three years. At last Darius Codomannus (B.C. 335) ascended the throne. But the valour, hardihood, and discipline which had gained the dominion, and which, as the length of several reigns in the succession shows, had sustained it with a firm and effectual hand, were almost at an end, having been succeeded by the effeminacy, the luxury, and the vices which had caused the dissolution of earlier Asiatic dynasties, and among them that of the Medes, which the Persians had set aside. When this relaxation of morals has once taken place, a dynasty or a nation only waits for a conqueror. In this case one soon appeared in the person of Alexander, misnamed the Great, who assailing Darius on several occasions, finally overcame him at Arbela (B.C. 330), and so put a period to the Persian monarchy after it had existed for 219 years. On this the country shared the fate that befell the other parts of the world which the Macedonian

madman had overrun; but, more fortunate than that of other eastern nations, the name of Persia and of Persians has been preserved even to the present day, as the representative of a people and a government.

The events which transpired during this succession of Persian kings, so far as they are connected with the biblical history, may be thus briefly narrated:—Cyrus, having conquered Babylon, permitted the Jews to quit their captivity and return into Palestine, affording them aid for the reconstruction of their national house of worship. Under Cambyzes, who invaded Egypt and became master of the land, adversaries of the Jews tried to render them objects of suspicion at the court; which intrigues, however, had full effect only in the reign of his successor, Smerdis, who issued a decree expressly commanding the building of the temple to cease (Ezra iv. 21); in which prohibition Smerdis, as he was of the Magian tribe and therefore of the priestly caste, may have been influenced by religious considerations. A milder and more liberal policy ensued. Darius, having by search in the national records ascertained what Cyrus had done towards the Jews, took off the prohibition, and promoted the rebuilding of the temple. Darius Hystaspis was distinguished for great enterprises, as well as liberal ideas. He carried the renown of the Persian arms to India, Libya, and Europe, and began the Persian attempt to subjugate Greece. What Xerxes undertook, and what success he had in his warlike undertakings against Greece, is known to all. His conduct towards the Jews, as well as his own despotism and inluxuriousness, are exhibited in the book of Esther with great force as well as truth. Artaxerxes Longimanus led an army into Egypt, which had rebelled against its Persian masters. He was compelled to make peace with the Greeks. Palestine must have suffered much by the passage of troops through its borders on their way from Persia to Egypt; the new colony at Jerusalem began to sink, when the monarch permitted Nehemiah to proceed with

277. [Ancient Persian king on throne.]

full powers to the Jewish capital, in order to strengthen the hands of his brethren. Darius Nothus had to fight on all sides of his kingdom, and made Phœnicia the scene of a war against the combined forces of Egypt and Arabia. Even Artaxerxes Mnemon, though long busied with his arms in other parts, did not lose sight of Egypt, which had thrown off his yoke, and sent new Persian armies into the vicinity of Palestine. In consequence, the Jews had much to endure from the insolence of a Persian general, namely, Bagoses, who polluted the temple, and 'punished the Jews seven years.' Oechus followed the plan

of his father, subdued the revolted Phœnicians, and again fell upon Egypt. The remaining period of the Persian dominion over the Jews passed away peacefully.

The biblical books, Daniel, Esther, Nehemiah, and Ezra, combine to present a true as well as high idea of the Persian court and government. The extent of the government as represented in the book of Esther, was from India to Ethiopia, including 127 provinces. The empire was under the control of vassal princes and nobles, 'the power of Persia and Media,' under whom were governors of various ranks, and officers for every species of duty. It was specially the duty of seven ministers of state ('chamberlains') to serve in the immediate presence of the monarch. Other officers, however high in rank, were admitted to the royal person only through the barriers of a strictly-observed ceremonial. Even the prime minister himself, and the favoured concubine who was honoured with the title of queen, durst come no nearer than the outer court, unless, on making

278. [Ancient Persian guards.]

their appearance, the king extended towards them his sceptre of gold. The gorgeousness of the court dazzles the mind, and surpasses imagination. Though the monarch was despotic, he was not strictly arbitrary. Aided by a council, controlled by a priesthood, guided by the past as well as influenced by the present, the king, much as he may have been given up to his personal pleasures, must yet have had a difficult office to fill, and heavy duties to discharge. Rulers are generally insecure in proportion to the degree of their despotism; and so we find, from the plot against the life of Ahasuerus (Xerxes, B.C. 485-465), which Mordecai discovered and made known, that even the recesses of a palace did not protect the kings of Persia from the attempts of the assassin. In the punishment, however, which fell upon the wicked Haman, we see the summary means which the Persian monarchs employed for avenging or defending themselves, as well as the unshared and unqualified power which they held over the life of their subjects even in the highest grades. Indeed it is not possible to read the book of Esther without fancying more than once that you are in the midst of the court of the Grand Seignior. Not least among the causes of this illusion is what is narrated in regard to the harem of Xerxes. The women, it seems, had a palace of their own, and dwelt there apart from the king, who paid them visits of ceremony.

The greatness of the power of the chief viziers of the Persian monarchy is illustrated in the re

corded acts of Haman and Mordecai. The mode of delegating power was by presenting to the intrusted person the royal signet, which appears to have licensed him to do what he would, by such means as he pleased.

On the religion of the ancient Persians we refer to the articles MEDES and MAGI, from whom the Persians received their religion, as well as the constitution of their social state. If, indeed, the Persians, as a separate tribe in the general government of the Medes, succeeded in getting the upper hand of their effeminate masters, and wresting the sceptre from their enfeebled hands, the Medes were not without a recompense in that they perpetuated, even by the instrumentality of their conquerors, most of the higher appliances and effects of civilization to which in the course of ages they had given birth, and which have in all ages constituted the true honour of men and the best treasure of states. The oldest Persians were, however, fire-worshippers—a species of idolatry which is least removed from monotheism, and also least unpardonable in such a clime as that of Persia. That such a worship is not incompatible with the esoteric recognition of one intelligent Creator is obvious, for the fire may have been regarded, and doubtless by the wise and philosophic was regarded, as merely symbolical of the Great Power which, as imaged in the sun, quickens, vivifies, and blesses all things. But even this simple form of symbolical worship tended to corruption; and though we are unable to trace the steps of the progress, yet we know that it did gradually, in the case of the Persians, lead first to dualism, and then to gross idolatry.

The name 'Persia' is not found in the older records of the Bible, but after the Babylonish period it occurs frequently (2 Chron. xxxvi. 20, 22; Ezra iv. 5, sq.; vi. 14, sq.; Esth. i. 3; viii. 10; 1 Macc. i. 1), meaning the great Persian kingdom founded by Cyrus, which in the period of its highest glory comprised all Asiatic countries from the Mediterranean to the Indus, from the Black and Caspian Sea to Arabia and the Indian Ocean.

The Persian language was diverse from the Shemitic, and connected with the Indo-Germanic tongues, of which the Sanscrit may be considered as the eldest branch.

PESTILENCE. The terms pestilence and plague are used with much laxity in our Auth. Version. The latter, however, is by far the wider term, as we read of 'plagues of leprosy,' 'of hail,' and of many other visitations. Pestilence is employed to denote a deadly epidemic. In our time, however, both these terms are nearly synonymous; but *plague* is, by medical writers at least, restricted to mean the glandular plague of the East. There is indeed no description of any pestilence in the Bible, which would enable us to form an adequate idea of its specific character. Severe epidemics are the common accompaniments of dense crowding in cities, and of famine; and we accordingly often find them mentioned in connection (Lev. xxvi. 25; Jer. xiv. 12; xxix. 18; Matt. xxiv. 7; Luke xxi. 11). But there is no better argument for believing that 'pestilence' in these instances means the glandular plague, than the fact of its being at present a prevalent epidemic of the East. It is also remarkable that

the Mosaic law, which contains such strict rules for the seclusion of lepers, should have allowed a disease to pass unnoticed, which is above all others the most deadly, and, at the same time, the most easily checked by sanitary regulations of the same kind.

PETER (originally **SIMEON** or **SIMON**, *heard*) was a native of Bethsaida, in Galilee, and was the son of a certain Jonas, or John; whence he is named on one occasion in the Gospel history Simon Barjona, that is, son of Jona (Matt. xvi. 17). Along with his brother Andrew, he followed the occupation of a fisherman on the sea of Galilee. It is probable that, before they became known to Christ, they were both disciples of John the Baptist. Their becoming known to Christ was owing to John's pointing him out on the day after his baptism to Andrew and another disciple (probably the evangelist John), as 'the Lamb of God; on which they immediately followed Christ, and spent some time in receiving his instructions. Shortly after this, Andrew finding Simon, carried him to Christ, who, on receiving him as his disciple, bestowed upon him that surname by which he has since that time been most commonly designated: 'When Jesus beheld him he said, Thou art Simon the son of Jona; thou shalt be called Cephas, which is by interpretation a stone.' After this interview the two brothers seem to have returned to their usual occupation for a season, as we have an account in Matthew (iv. 18-20) of their being summoned from that occupation by Christ on a subsequent occasion, posterior to his temptation in the wilderness, and to the commencement of his public ministry as a religious teacher. From this time forward they were his devoted and admiring followers. In the course of the evangelical history several anecdotes of Peter are incidentally recorded, for the purpose, doubtless, principally of illustrating the character and teaching of our Lord, but which tend also to throw light upon the history and character of his attached disciple. Such are the accounts furnished by the evangelists of his walking upon the agitated waters of the sea of Galilee to meet his master (Matt. xiv. 22-31; Mark vi. 45-50); of his bold and intelligent avowals of the undoubted Messiahship of Jesus, notwithstanding the difficulties which he, along with the rest of the disciples, felt in reconciling what they saw in him with what they had fondly expected the Christ to be (Matt. xvi. 13-20); of his rash but affectionate rebuke of his Lord for speaking of suffering and death as in prospect for him, and as forming a necessary part of his mediatorial work (Matt. xvi. 21-23); of his conduct in first rejecting, with an earnestness bordering on horror, the offer of Christ to wash his feet, and then, when the symbolical nature of that act had been explained to him, his over-ardent zeal that not his feet only, but also his hands and his head, might be washed (John xiii. 4-10); of his bold and somewhat vaunting avowal of attachment to his Master, and his determination never to forsake him, followed by his disgraceful denial of Jesus in the hour of trial (John xii. 36, 37; Mark xiv. 29, &c.); of his deep and poignant contrition for this sin (Matt. xxvi. 75); and of his Lord's ample forgiveness of his offence, after he had received from him a profession of attachment as strong and as frequently repeated as his former denial of him

(John xxi. 15-18). From these notices it is easy to gather a tolerably correct conception of the predominating features of the apostle's character up to this period. He seems to have been a man of undoubted piety, of ardent attachment to his Master, and of great zeal for what he deemed his Master's honour; but, at the same time, with a mind rather quick than accurate in its apprehensions, and with feelings rather hasty in their impulse than determined and continuous in their exercise. Hence his readiness in avowing his opinions, and his rashness in forming them; and hence also the tendency which beset his honest openness to degenerate into bravado, and his determinations of valour to evaporate into cowardice at appalling forms of danger. His fall, however, and his subsequent restoration, connected as these were with the mysterious events of his Master's crucifixion and resurrection, and with the new light which had by them been cast around his character and work, produced a powerful change for the better upon the apostle's mind. From this time forward he comes before us under a new aspect. A sober dignity and firmness of purpose have displaced his former hasty zeal; sagacity and prudence characterize his conduct; and whilst his love to his Master shows no symptom of abatement, it displays itself rather in active labour and much-enduring patience in his service, than in loud protestations or extravagant exhibitions of attachment. In the subsequent Scripture history he is presented to us as the courageous herald of the kingdom of Christ, by whose mouth the first public declaration of salvation through the crucified Jesus was made to the people; by whose advice and counsel the early churches were planted and governed; and by whom the prejudices of Judaism were first fairly surmounted, and the Gospel preached in all its universal freeness to the Gentile world. The Acts of the Apostles contain recitals of many interesting incidents which befell him whilst engaged in those efforts. Of these, the chief are his imprisonment and trial before the Sanhedrim for preaching Christ, and his bold avowal of his determination to persist in that work (Acts iv. 1-22); his miraculously inflicting the punishment of death on the infatuated couple who had dared to try an experiment upon the omniscience of the Holy Ghost (v. 1-11); his visit to Samaria, and rebuke of Simon Magus, who deemed that the miracles of the apostle were the result of some deep magic spell of which he had not yet become possessed, and which, consequently, he was desirous of purchasing from Peter (viii. 14-24); the vision by which he was taught that the ancient ritual distinctions between clean and unclean had been abolished, and thereby prepared to attend on the summons of Cornelius, to whom he preached the Gospel (x. 1-48); his apprehension by Herod Agrippa, and his deliverance by the interposition of an angel, who opened for him the doors of his prison, and set him free (xii. 3-19); and his address to the council at Jerusalem, on the occasion of a request for advice and direction being sent to the church there by the church in Antioch, in which he advocated the exemption of Gentile converts from the ceremonial institutes of the law of Moses (xv. 6-11). In all these incidents we trace the evidences of his mind having undergone an entire change, both as to its views of truth and impressions of duty, from

what is displayed by the earlier events of his history. On one occasion only do we detect something of his former weakness, and that, strangely enough, in regard to a matter in which he had been the first of the apostles to perceive, and the first to recommend and follow, a correct course of procedure. The occasion referred to was his withdrawing, through dread of the censures of his Jewish brethren, from the Gentiles at Antioch, after having lived in free and friendly intercourse with them, and his timidly dissembling his convictions as to the religious equality of Jew and Gentile. For this Paul withstood him to the face, and rebuked him sharply, because of the injury which his conduct was calculated to produce to the cause of Christianity. With this single exception, however, his conduct seems to have been in full accordance with the name which his Master had prophetically bestowed on him when he called him Simon the Rock, and with the position which Paul himself assigns to him, at the very time that he recounts his temporary dereliction, as one of 'the Pillars of the Church' (Gal. ii. 9, 14).

Thus far we are enabled, from the inspired documents, to trace the history of this apostle; but for what remains we must be indebted to evidence of a less explicit and certain character. Ecclesiastical tradition asserts that he performed an extensive missionary tour throughout those districts, to the converts in which his epistles are addressed. This tradition, however, though deriving some countenance from 1 Pet. v. 13, is very uncertain. Another tradition reports the apostle as having towards the close of his life visited Rome, become bishop of the church in that city, and suffered martyrdom in the persecution raised against the Christians by Nero. The importance of these points in connection with the claims urged by the Catholics on behalf of the supremacy of the pope, has led to a careful and sifting examination of the accuracy of this tradition; the result of which seems to be, that whilst it is admitted as *certain* that Peter suffered martyrdom, in all probability by crucifixion, and as *probable* that this took place at Rome, it has, nevertheless, been made pretty clear that he never was for any length of time resident in that city, and morally certain that he never was bishop of the church there.

The assertion that Peter was bishop of Rome is connected with another, by which the claims of the papacy are sought to be established, namely, that to him was conceded a right of supremacy over the other apostles. In support of this, an appeal is made to those passages in the Gospels, where declarations supposed to imply the bestowal of peculiar honour and distinction on Peter are recorded as having been addressed to him by our Lord. The most important of these are: 'Thou art Peter, and on this rock will I build my church' (Matt. xvi. 18); and, 'Unto thee will I give the keys of the kingdom of heaven,' &c. (Matt. xvi. 19). At first sight these passages would seem to bear out the assumption founded on them; but, upon a more careful investigation, it will be seen that this is rather in appearance than in reality. The force of both is greatly impaired for the purpose for which Catholics produce them, by the circumstance, that whatever of power or authority they may be supposed to confer upon Peter, must be regarded as shared

by him with the other apostles, inasmuch as to them also are ascribed in other passages the same qualities and powers which are promised to Peter in those under consideration. If by the former of these passages we are to understand that the church is built upon Peter, the apostle Paul informs us that it is not on him *alone* that it is built, but upon *all* the apostles (Ephes. ii. 20); and in the book of Revelation we are told, that on the twelve foundations of the New Jerusalem (the Christian church) are inscribed 'the names of the twelve apostles of the Lamb' (xxi. 14). As for the declaration in the latter of these passages, it was in all its essential parts repeated by our Lord to the other disciples immediately before his passion, as announcing a privilege which, as his apostles, they were to possess in common (Matt. xviii. 18; John xx. 23). It is, moreover, uncertain in what sense our Lord used the language in question. In both cases his words are metaphorical; and nothing can be more unsafe than to build a theological dogma upon language of which the meaning is not clear, and to which, from the earliest ages, different interpretations have been affixed. And, finally, even granting the correctness of that interpretation which Catholics put upon these verses, it will not bear out the conclusion they would deduce from them, inasmuch as the judicial supremacy of Peter over the other apostles does not necessarily follow from his possessing authority over the church. On the other side, it is certain that there is no instance on record of the apostle's having ever claimed or exercised this supposed power; but, on the contrary, he is oftener than once represented as submitting to an exercise of power upon the part of others, as when, for instance, he went forth as a messenger from the apostles assembled in Jerusalem to the Christians in Samaria (Acts viii. 14), and when he received a rebuke from Paul, as already noticed. This circumstance is so fatal, indeed, to the pretensions which have been urged in favour of his supremacy over the other apostles, that from a very early age attempts have been made to set aside its force, by the hypothesis that it is not of Peter the apostle, but of another person of the same name, that Paul speaks in the passage referred to. This hypothesis, however, is so plainly contradicted by the words of Paul, who explicitly ascribes apostleship to the Peter of whom he writes, that it is astonishing how it could have been admitted even by the most blinded zealot (vers. 8, 9). Whilst, however, it is pretty well established that Peter enjoyed no judicial supremacy over the other apostles, it would, perhaps, be going too far to affirm that no dignity or primacy whatsoever was conceded to him on the part of his brethren. His superiority in point of age, his distinguished personal excellence, his reputation and success as a teacher of Christianity, and the prominent part which he had ever taken in his Master's affairs, both before his death and after his ascension, furnished sufficient grounds for his being raised to a position of respect and of moral influence in the church and amongst his brother apostles. These circumstances, taken in connection with the prevalent voice of Christian antiquity, would seem to authorize the opinion that Peter occupied some such position as that of president in the apostolical college, but without

any power or authority of a judicial kind over his brother apostles.

PETER, EPISTLES OF. Of the seven Catholic Epistles, there are two ascribed to St. Peter. The first of these is one of those universally received in the early church. The second ranks among the controverted.

THE FIRST EPISTLE OF ST. PETER.—The external evidence in favour of the genuineness of this Epistle is complete. 'One Epistle of Peter,' says Eusebius, 'called the first, is universally received.' 'In fact,' says De Wette, 'if we except its omission in the ancient catalogue in Muratori, and its rejection by the Paulicians, it has been never called in question.'

The internal evidence is equally complete. The author calls himself the apostle Peter (ch. i. 1), and the whole character of the Epistle shows that it proceeds from a writer who possessed great authority among those whom he addresses, who were most probably composed chiefly of Jewish Christians. The writer describes himself as 'an elder,' and 'a witness of Christ's sufferings' (v. 1). The vehemence and energy of the style are altogether appropriate to the warmth and zeal of Peter's character; and every succeeding critic, who has entered into its spirit, has felt impressed with the truth of the observation of Erasmus, 'that this epistle is full of apostolical dignity and authority, and worthy of the prince of the apostles.'

The only indication as to the place from whence this letter was addressed to the five provinces, is contained in ch. v. ver. 13: 'She in Babylon, elected with you, saluteth you.' For whether 'she in Babylon' refers to the church or to an individual (in which latter case Peter's wife is the person generally believed to be referred to), the letter must have been written in, or at least in the neighbourhood of Babylon.

The Epistle must have been written before A.D. 67-68, the year of St. Peter's martyrdom. Lardner places the date in A.D. 63 or 64, chiefly from the fact that an earlier date than A.D. 63 cannot be assigned for his arrival at Rome. Hug fixes the date in the eleventh year of Nero's reign, or A.D. 65, a year after the conflagration of the city, and five before the destruction of Jerusalem.

To afford consolation to the persecuted appears to have been the main object of this Epistle. To this the moral instructions are subsidiary. The exhortations to a pure conscience, to rebut the calumnies of the time by their innocence, to abstain from violent disputes, to pay respect to the existing authorities, to exercise increasing love and fidelity, were exhortations all given with a view to alleviate their fate, or enable them to bear it. The repeated references to the example of Jesus in his death and sufferings are designed to strengthen them for the endurance of calamities. The exhortation to the slaves, too, has reference to the unhappy days, in which, for real or imaginary wrongs and hardships, they frequently became the accusers and betrayers of their masters.

The following is a summary of the contents:—The salutation and introduction, in which the inhabitants of the five provinces who were purchased by the sufferings of Christ, are exhorted to prepare themselves for a reward higher than the enjoyments of this fleeting life (i. 1-13). They are, therefore, recommended to lay aside anything

which could render them unworthy of Christ, the centre of their hopes, their pattern and their Saviour, and so to regulate their conduct to their superiors that none should be able to reproach them as 'evildoers.' These precepts were to extend to slaves, to whom the meek and suffering Jesus should be an example. Women, too, were to render their submissive noiseless virtue their chiefest ornament, and men should cherish and honour them. All should be full of sympathy and love, and mutual indulgence. Their innocence should be so marked as to shame the calumniator, and they should make preparation for the approaching catastrophe, when they should have an opportunity of imitating Jesus in their sufferings; hoping for them all to have no other reproach than that of being his disciples. The presbyters are enjoined to watch over their flocks, and the subordinate to pay them respect, and all should be on the watch, and lay aside their worldly cares. All these exhortations are enforced by the example of Christ, and by the punishment of the disobedient in the days of Noah, those spirits in prison to whom Christ went and preached (iii. 19, 20).

THE SECOND EPISTLE OF ST. PETER has been the subject of more discussion than any other book in the New Testament, and its genuineness has been contested by not a few of the ablest critics. We are informed both by Origen and Eusebius that though it was generally received in their time, doubts were entertained respecting its right to a place among the Catholic Epistles. Before the close of the fourth century, however, these doubts had subsided, and this epistle was received as genuine by Athanasius, Jerome, Augustine, and other eminent fathers.

It is enumerated in the canon of Laodicea (A.D. 360?), and in the 85th apostolical canon, and was finally adopted by the councils of Hippo and Carthage, which included among the canonical books all those which are now commonly received.

Although before this period certain books were rejected from the defect of historical evidence, or from internal grounds of suspicion, an undeviating uniformity now took place, and no controversy was raised respecting any of the books of the New Testament until the inquiring age which ushered in the Reformation. The genuineness of this epistle was then called in question by Erasmus and Calvin. It was, however, received by all the Reformed Confessions, as well as by the Council of Trent. It has been since that period rejected by Grotius, Scaliger, Salmasius, Semler, Eichhorn, Schmidt, Walker, Schott, Guericke, Credner, De Wette, Ullman, to some extent, and Neander. Among its numerous defenders it will be sufficient to mention the names of Michaelis, Lardner, Pott, Augusti, Platt, Dahl, Bertholdt, who, however, rejects the second chapter; Nietzsche and Olshausen, with the learned Roman Catholics Hug and Feilmoser: the latter, however, fluctuates in his opinion.

Before proceeding to consider the grounds for and against the rejection of this epistle, it may be useful to inquire into its internal structure and contents.

The writer designates himself here as the apostle Peter (2 Pet. i. 1) more clearly than in the first epistle; as personally known to Jesus (i. 14); as a

beloved brother of Paul (iii. 15); and as the author of the first epistle (iii. 1). It is addressed to the same persons with the first, whom he presupposes to be acquainted with the writings of St. Paul (iii. 15; comp. Rom. ii. 4). He refers to his approaching death (i. 14). The main object is the refutation of erroneous teachers. He, therefore, as an eyewitness of the acting and teaching of Jesus, is enabled to give them more accurate instruction than those who would mislead them. He exhorts them to advance in the knowledge and doctrine of Jesus, by adding to their faith fortitude, and every other excellent quality. He denounces (ch. ii.) punishment against false teachers, by examples drawn from the disobedient angels, the world before the flood, and Sodom and Gomorrah. He inveighs against those teachers for resigning themselves to impurity, and speaking evil of God and angels, whereas angels have not ventured to do this even of Satan. He compares them to the false prophet Balaam, and to clouds filled with wind. He rebukes those mockers who doubted of the coming of Christ, which was only delayed in mercy, but predicts the dissolution of the world by fire, and warns them to keep themselves in readiness for the new heavens and the new earth.

The main reasons which induced many of the ancients to reject this epistle arose from the difference in style and structure between the first and second epistle. But in compensation for these alleged differences the resemblances are remarkably striking, and there are several words used in a peculiar sense in both epistles.

Some critics have, indeed, vindicated the genuineness of the epistle principally on the ground of resemblance in both sentiment and diction. Of these it will be sufficient for our purpose to refer to Hug and Michaelis. The former of these observes that the resemblance between the two is 'so thorough as to denote an identity of authorship,' and Michaelis had before this asserted that the agreement between them appeared to him to be such, 'that if the second was not written by St. Peter, the person who forged it not only possessed the power of imitation in a very unusual degree, but understood likewise the design of the first epistle, with which the ancients do not appear to have been acquainted.' The principal difference of style, however, is found in the second chapter, the character of which is totally unlike anything contained in the first epistle. The resemblance, indeed, between this chapter and the short epistle of St. Jude is so striking, that it has been at all times perceived that one must have at least read, if not copied from the other.

All those theologians who have disputed the genuineness of Peter's second epistle, have maintained that its writer adopted the sentiments and language of Jude, and this opinion is favoured even by many of the modern advocates of its genuineness, including Olshausen and Hug. But which of the two wrote first is, notwithstanding, a question impossible to decide. 'St. Jude's Epistle is so like the second chapter of St. Peter's Second Epistle,' says Bishop Sherlock, 'the figures and images in both are so much the same, . . . that it has been commonly thought that St. Jude copied after St. Peter's Epistle.' This was the more generally received opinion, and was held among the ancients by Eusebius, and maintained at the time of the Reformation by Luther. One set

of critics have supposed that one of the writers of these epistles had intended to illustrate at large what the other had briefly stated; others, that one sought to abridge what the other had stated diffusely. The former of these views is maintained by Hug and Olshausen. The latter writer founds his view on the fact that Peter does not give the minute statements found in Jude, especially in regard to the history of angels; in which passages Jude alone goes into details, while Peter advances a general historical fact,—which he conceives to be characteristic of a later composition.

Dr. Sherlock, bishop of London, adopted a middle course, and endeavoured to account for the remarkable resemblance between the two writers by supposing that each quotes from a common Hebrew document. But this ingenious conjecture has been found untenable. Attempts have been made to support these arguments against the genuineness of this epistle by other alleged internal marks of spuriousness, such as the anachronisms which it is said to contain. But these arguments have been successfully combated by Nietzsche, Olshausen, and other writers.

It is fully conceded that there is no other book in the New Testament against whose authority so many arguments can be adduced as against this epistle. One of the most impartial as well as ablest critics of modern times, after weighing them all, comes to the conclusion that neither its genuineness nor its spuriousness can be demonstrated by undoubted arguments; but, while he admits that unfriendly critics will see occasion for doubt, yet, relying on subjective grounds, he is persuaded of the authenticity of the epistle, and that the arguments which go to disprove its genuineness are not of sufficient weight to establish its spuriousness, or cause it to be 'stricken from the number of inspired books.'

By those who acknowledge its genuineness its date is generally fixed about the year A.D. 65, or not long before Peter's death, which they deduce from 2 Pet. i. 14. Wetstein concludes from 2 Pet. iii. that it must have been written before the destruction of Jerusalem, in which case none will allege that any but Peter could have been its author. If it were proved that Peter had Jude's epistle before him, this must have been written not long before the same period, which agrees with the time assigned by Dr. Lardner, between 64 and 66 [Jude]. But if Jude certainly quoted the book of Enoch, and if the result of the investigation of Lücke, who concludes that this book was written in the first century, at the time of the Jewish war, and probably after the destruction of Jerusalem, be correct, this circumstance would of itself, *ceteris paribus*, settle the question in favour of the priority of St. Peter's second epistle [Jude]. Bishop Sherlock maintains that there are no less than five years intervening between the date of the two epistles of Peter.

PETRA was the capital of the Nabathæan Arabs in the land of Edom, and seems to have given name to the kingdom and region of *Arabia Petraea*. As there is mention in the Old Testament of a stronghold which successively belonged to the Amorites (Judg. i. 36), the Edomites (2 Kings xiv. 7) and the Moabites (Isa. xvi. 1, comp. in H-b. ch. xlii. 11), and bore in Hebrew the name of *Selah*, which has the same meaning

as *Petra* in Greek, viz., 'a rock,' that circumstance has led to the conjecture that the Petra of the Nabathæans had been the *Selah* of Edom. But the consideration of that point in a work of this nature falls more naturally under the Bible head of *SELAH*, to which article accordingly the reader is referred; and there likewise the question will be disposed of as to whether (on the supposition of Petra being the *Selah* of Scripture) its site is to be identified with that of the modern *Kerek*, or with the locality of the far famed *Wady Musa* [ARABIA; IDUMÆA; NEBAIOTH].

PHA'RAOH, the general title of the kings of Egypt in the Old Testament, and found only there and in the writers who have drawn from that source. It often stands simply like a proper name (Gen. xii. 15; xxxvii. 36; xl. 2, sq.; xlv. 1, sq.; and so generally throughout the Pentateuch, and also in Cant. i. 9; Isa. xix. 11; xxx. 2). 'King of Egypt' is sometimes subjected to it (1 Kings iii. 1; 2 Kings xvii. 7; xviii. 21); and sometimes also the more specific designation or real proper name of the monarch is indicated, as Pharaoh Necho (2 Kings xxiii. 33), Pharaoh Hophra (Jer. xlv. 30). Josephus intimates that the word signifies 'the king' in the Egyptian language (*Antiq.* viii. 6. 2). The idea has, however, been more recently started that Pharaoh corresponds to the Egyptian *phra*, 'the sun,' which is written as an hieroglyphic symbol over the titles of kings. It seems to us that this explanation might be admitted without contradicting the other, seeing that it is not only possible, but highly probable, that the Egyptians should make the name of the sun a royal title, and that at length custom rendered it equivalent to 'king.' The practice of ancient, and, indeed, modern Oriental kings, of associating the idea of their own dignity with the glory of the sun, is well known.

PHA'RAOH-HOPH'RA. [HOPHRA.]

PHA'RAOH-NE'CHO. [NECHO.]

PHARISEES. The name denotes those who are separated, i.e. from ordinary persons, of course, by the correctness of their opinions and the holiness of their lives. They were a Jewish sect who had the dominant influence in the time of our Lord, to whose faults the overthrow of the state may be attributed, and who have to bear the awful burden of having crucified the Lord and giver of life.

The precise period when the Pharisees appeared as a sect, history does not supply us with the means of determining. That they, however, as well as their natural opponents, the Sadducees, existed in the priesthood of Jonathan—in the interval, that is, between 159 and 144 before Christ—is known from Josephus, who makes mention of them as well as of the sect of the Essenes. The terms he employs warrant the conviction that they were then no novelties, but well known, well defined, and two established religious parties. But from the time of Jonathan to that of Ezra (about 400 B.C.), there had taken place no great formative event such as could of itself cause so great a change in the Hebrew system as was the rise of these sects; whereas the influences to which the Israelites had been subject in the Medo-Persian dominions, and the necessarily somewhat new direction which things took on the rebuilding of the Temple and the restoration of the civil and

religious polity, could hardly fail, considering the distance from Moses at which these changes happened, and the great extent to which the people had lost even the knowledge of the institutions and language of their forefathers, to lead to diversities of views, interests, and aims, whence sects would spring as a natural if not inevitable result. There is, therefore, good reason to refer the origin of the Pharisees to the time of the return from the Babylonish captivity, a period which constitutes a marked epoch, as dividing the Hebraism of the older and purer age from the Judaism of the later and more corrupt times. Nor, did our space allow, should we find it difficult to trace the leading features of the Pharisaic character back to those peculiar opinions and usages with which the old Israelitish type of mind had been made familiar, and at the same time corrupt, in the Persian empire.

But as we think it more for the reader's instruction to lay before him the very words in which this sect is described, than to give a philosophical account of the rise and connection of their principles, to which of necessity our own views would impart a colouring, we shall proceed to transcribe a nearly literal translation of the most important passages in the writings of Josephus referring to the opinions and practices of this powerful sect.

'The Pharisees have delivered to the people a great many observances by succession from their fathers, which are not written in the law of Moses, and for that reason it is that the Sadducees reject them, and say that we are to esteem those observances to be obligatory which are in the written word, but are not to observe what are derived from the tradition of our forefathers. Hence great disputes. The Sadducees are able to persuade none but the rich, and have not the populace obsequious to them, but the Pharisees have the multitude on their side.' 'The Pharisees are not apt to be severe in punishments' (Joseph. *Antiq.* xiii. 10, 5 and 6; *Epiphan. Har.* 15).

'The Pharisees live meanly and despise delicacies in diet; and they follow the conduct of reason, and what that prescribes to them as good they do. They also pay respect to such as are in years; nor are they so bold as to contradict them in anything which they have introduced; and when they determine that all things are done by fate, they do not take away from men the freedom of acting as they think fit, since their notion is that it hath pleased God to make a constitution of things whereby what he wills is done, but so that the will of man can act virtuously or viciously. They also believe that souls have an immortal vigour in them, and that under the earth there will be rewards or punishments, according as men have lived virtuously or viciously in this life. The latter are to be detained in an everlasting prison; but the former shall have power to revive and live again: on account of which doctrine they are able greatly to persuade the body of the people; and whatsoever is done about divine worship, prayers, and sacrifices, is performed according to their directions, inasmuch that the cities gave great attestations to them on account of their entire virtuous conduct' (Joseph. *Antiq.* xviii. 1, 3).

'The Pharisees are those who are esteemed most skilful in the exact interpretation of the

laws. They ascribe all to Fate (or Providence) and to God, and yet allow that to act what is right, or the contrary, is for the most part in the power of man. They say that all souls are incorruptible, but that the souls of good men only are removed into other bodies, and that the souls of bad men are subject to eternal punishment. Moreover, the Pharisees are friendly to one another, and are for the exercise of concord and regard for the public' (Joseph. *De Bell. Jud.* ii. 8, 14).

'The Pharisees are a sect of Jews which appear to be more pious than others, and to expound the laws more accurately. These Pharisees artfully insinuated themselves into her (Queen Alexandra's) favour by little and little, and became the real administrators of public affairs; they banished and restored whom they pleased; they bound and loosed at their pleasure; they had the enjoyment of the royal authority, whilst the expenses and the difficulties of it belonged to Alexandra. She was a sagacious woman in the management of great affairs, and became not only very powerful at home, but terrible also to foreign potentates; while she governed other people, the Pharisees governed her. She was so superstitious as to comply with their desires, and accordingly they slew whom they pleased' (Joseph. *De Bell. Jud.* i. 5, 2, 3).

'There was a certain sect that were Jews, who valued themselves highly upon the exact skill they had in the law of their fathers, and made men believe they were highly favoured by God, by whom this set of women were inveigled. These are those that are called the sect of the Pharisees, who were able to make great opposition to kings; a cunning sect they were, and soon elevated to a pitch of open fighting and doing mischief. Accordingly, when all the people of the Jews gave assurance of their good will to Caesar and to the king's government, these men did not swear, being about 6000; and when the king imposed a fine upon them, Phrerosas' wife paid it. In order to requite this kindness, since they were believed to have a foreknowledge of things to come by divine inspiration, they foretold how God had decreed that Herod's government should cease, and that the kingdom should come to her and Phrerosas, and to their children; so the king Herod slew such of the Pharisees as were principally accused, and all who had consented to what the Pharisees had foretold' (Joseph. *Antiq.* xvii. 2, 4).

'The Pharisees say that some actions, but not all, are the work of fate; that some of them are in our own power, and that they are liable to fate, but are not caused by fate' (Joseph. *Antiq.* xiii. 5, 9).

'The sect of the Pharisees are supposed to excel others in the accurate knowledge of the laws of their country' (Joseph. *Vita*, § 35).

'The Pharisees have so great a power over the multitude that when they say anything against the king or against the high-priest, they are generally believed' (Joseph. *Antiq.* xiii. 10, 5).

'The bodies of all men are mortal, and are created out of corruptible matter; but the soul is ever immortal, and is a portion of the divinity that inhabits our bodies' (*De Bell. Jud.* iii. 8, 5).

'Being now nineteen years old, I began to conduct myself according to the rule of the sect of the Pharisees, which is of kin to the sect of Stoics, as the Greeks call them' (Joseph. *Vita* § 2).

There is another source of our knowledge of the Pharisees—the books of the New Testament. The light in which they here appear varies, of course, with the circumstances to which its origin is due. The reader has just had before him the account of a friend and an adherent, an account which, therefore, we may believe, is conceived and set forth in the most favourable manner. The Gospels present the character of the Pharisees in a darker hue, inasmuch as here a higher standard is brought into use, a loftier morality is the judge. To pass on to the views given in the New Testament. The high repute in which the Pharisees were held, as expositors of the national laws, whether civil or religious, may be seen in John vii. 48; Acts xxii. 3; the casuistry which they employed in expounding the Scriptures, in Matt. ix. 34; xv. 5; xxiii. 16; Mark vii. 7, sq.; their excessive zeal in proselytism, Matt. xxiii. 15; yet their concealment of light and hindrance of progress, Matt. xxiii. 13; their inordinate regard for externals, and oppressive but self-sparing rule, Matt. xxiii. 3, sq., 25; their affectation of grandeur and distinction, Matt. xxiii. 5, sq.; their shocking hypocrisy, Matt. xxiii. 14, 27, sq.; their standing on inconsiderable points, while they neglected such as were of consequence, preferring ceremonial rites to justice and charity, Matt. xxiii. 24; xii. 2-7; Luke vi. 7; John ix. 16, sq.; Mark vii. 1; the display which they affected even in works of religion, Matt. vi. 1, sq.; xxiii. 5; their pride and self-gratulation as assuredly, and before others, religious men, Luke xviii. 9, sq.; their regard to tradition, Matt. xv. 2; Mark vii. 3; they formed schools which had masters and disciples, Matt. xxii. 16; Luke v. 33; agreeably with their general doctrines, they regarded the act rather than the motive, Luke xi. 39; xviii. 11, sq.; and were given to fasts, prayers, washing, paying of tithes, alms, &c., Matt. ix. 14; xxiii. 15, 23; Luke xi. 39, sq.; xviii. 12; exhibiting themselves to the people, in order to gain their favour, as self-denying, holy men, zealous for God and the law, a kind of Jewish stoics, Matt. ix. 11; Luke v. 30; vi. 2; Matt. xxiii. 5, 15, 29; while in reality they were fond of the pleasures of sense, and were men of lax morals, Matt. v. 20; xv. 4, 8; xxiii. 3, 14, 23, 25; John viii. 7. At an early period they determined in the Sanhedrim to withstand and destroy Jesus, instigated doubtless by the boldness with which he taught the necessity of personal righteousness and pure worship (Matt. xii. 14).

In regard to the opinions of the Pharisees, the New Testament affords only fragments of information, which are, however, in accordance with the fuller particulars furnished by Josephus. From Acts xxiii. 6, 8, we learn that they believed in the existence of higher created beings than man, doubtless the good and bad spirits of the Chaldee philosophy. The same places also instruct us that they held a resurrection of the dead (comp. Matt. xxii. 24, sq.).

It thus appears that the Pharisees were in general a powerful religious party, or rather the predominant influence, in the Jewish state, who aspired to the control of the civil and religious institutions, affected popularity among the people, exerted influence in the councils of kings, queens, and people of rank; were the recognised teachers and guides of the national mind, proud of their

orthodoxy, pluming themselves on their superior sanctity, practising austerities outwardly, but inwardly indulging their passions, and descending to unworthy and shameful acts; and withal of narrow spirit, contracted views, seeking rather their own aggrandisement than the public good, of which they used the name merely as a pretext and a cover.

We are not to suppose, however, that there were no individuals in the body free from its prevailing vices. There did not fail to be upright and pure-minded men, who united inward piety to outward correctness of conduct, and were indeed superior to the principles of their sect; such was Nicodemus (John iii. 1); such also Gamaliel may have been (Acts v. 34). Of men of this kind many were led to embrace the Gospel (Acts xv. 5).

In general, however, their power was all directed against Jesus and his work. With what force they must have acted appears obvious from the preceding remarks. Nor is the reader to imagine that they were merely a few learned men, congregated together in the capital, engaged in learned pursuits or religious practices, and in consequence leaving our Lord at liberty to pursue his ordinary duties up and down the land. The capital was doubtless their head-quarters, but they pervaded the entire country in considerable numbers, and were therefore present in all parts to withstand the publication of the Gospel of that kingdom every feature of which they hated (Luke v. 17); and as they constituted a large portion of the Sanhedrim (Acts v. 34; xxiii. 6, sq.), and had an almost unlimited influence with the people, great indeed was the power which they wielded in their conflict with the infant church. Perhaps there never was an instance in any social condition in which the elements of power supplied by religion, politics, high life, and humble condition were more thoroughly or more densely combined in order to oppose and destroy the young power of new ideas and lofty aims. The victory, however, was for man, because it was also of God. Darkness, indeed, prevailed for three days, covering the land, and casting a thick shadow over the world. But the sun of righteousness arose, and still shines.

Pharisaism, how compact soever might be its appearance outwardly, and as against a common enemy, had its own internal dissensions. The question of more or less of moderate or extreme views, of what on one side would be called temporising and on the other consistency, agitated this school as it has agitated most others. In the age of our Lord there were two leading parties, that of Hillel and that of Schammai, the former representing a moderate Pharisaism, the latter 'the strictest sect,' to which Paul had probably belonged.

PHARPAR, one of the rivers of Damascus [ABANA and PHARPAR].

PHEBE. [PHŒBE.]

PHENICE, a city on the south-east of Crete, with a harbour, in the attempt to reach which the ship in which Paul voyaged as a prisoner to Rome, was driven out of its course, and eventually wrecked (Acts xxvii. 12).

PHICOL (*mouth of all*, i. e. *all commanding*), the proper or more probably the titular name of the commander of the troops of Abimelech, the

Philistine king of Gerar. If the Abimelech of the time of Isaac was the son of the Abimelech of the time of Abraham, we may conclude that the Phicol who attended on the second Abimelech was the successor of the one who was present with the first at the interview with Abraham (Gen. xxi. 22; xxvi. 26). But the whole subject of these interviews is beset with difficulties [ABIMELECH; ABRAHAM; ISAAC].

PHILADELPHIA, a city of Lesser Asia, and one of the seven containing the Christian churches to which the Apocalyptic admonitions were addressed. The town stood about twenty-five miles south-east from Sardis, in N. lat. $32^{\circ} 28'$, E. long. $28^{\circ} 30'$, in the plain of Hermus, about midway between the river of that name and the termination of Mount Tmolus. It was the second in Lydia, and was built by King Attalus Philadelphus, from whom it took its name. In *n.c.* 133 the place passed, with the dominion in which it lay, to the Romans. The site is reputed by Strabo to have been very liable to earthquakes; but it continued a place of importance and of strength down to the Byzantine age; and of all the towns in Asia Minor it withstood the Turks the longest. It was taken by Bajazet I. in *A.D.* 1392.

Philadelphia still exists as a Turkish town, under the name of Allah Shehr, 'city of God,' i.e. High-town. It covers a considerable extent of ground, running up the slopes of four hills, or rather of one hill with four flat summits. The country, as viewed from these hills, is extremely magnificent—gardens and vineyards lying at the back and sides of the town, and before it one of the most extensive and beautiful plains of Asia. The town itself, although spacious, is miserably built and kept, the dwellings being remarkably mean, and the streets exceedingly filthy. Across the summits of the hill between the town and the small valleys between them runs the town wall, strengthened by circular and square towers, and forming also an extensive and long quadrangle in the plain below. The missionaries Fisk and Parsons, in 1822, were informed by the Greek bishop that the town contained 3000 houses, of which he assigned 250 to the Greeks, and the rest to the Turks. On the same authority it is stated that there are five churches in the town, besides twenty others which were too old or too small for use. Six minarets, indicating as many mosques, are seen in the town; and one of these mosques is believed by the native Christians to have been the church in which assembled the primitive Christians addressed in the Apocalypse. There are few ruins; but in one part there are still found four strong marble pillars, which supported the dome of a church. The dome itself has fallen down, but its remains may be observed, and it is seen that the arch was of brick. On the sides of the pillars are inscriptions, and some architectural ornaments in the form of the figures of saints. One solitary pillar of high antiquity has been often noticed, as reminding beholders of the remarkable words in the Apocalyptic message to the Philadelphian church:—'Him that overcometh will I make a pillar in the temple of my God; and he shall go no more out' (Rev. iii. 12).

PHILEMON, EPISTLE TO. That this epistle was written by the apostle Paul is the constant tradition of the ancient church. It is ex-

pressly cited as such by Origen; it is referred to as such by Tertullian; and both Eusebius and Jerome attest its universal reception as such in the Christian world.

This epistle was evidently written during the apostle's imprisonment (ver. 9, 10), and, as we have already endeavoured to show [COLOSSIANS; EPISTLE TO THE], during his two years' imprisonment at Rome. It was occasioned by his sending back to Philemon his runaway slave Onesimus, who, having found his way to Rome, was there, through the instrumentality of the apostle, converted to Christianity; and, after serving Paul for a season, was by him restored to his former master, without whose consent the apostle did not feel at liberty to retain him. The epistle commences with the apostle's usual salutation to those to whom he wrote; after which he affectionately alludes to the good reputation which Philemon, as a Christian, enjoyed, and to the joy which the knowledge of this afforded him (ver. 1-7). He then gently and gracefully introduces the main subject of his epistle by a reference to the spiritual obligations under which Philemon lay to him, and on the ground of which he might utter as a command what he preferred urging as a request. Onesimus is then introduced; the change of mind and character he had experienced is stated; his offence in deserting his master is not palliated; his increased worth and usefulness are dwelt upon, and his former master is intreated to receive him back, not only without severity, but with the feeling due from one Christian to another (ver. 8-16). The apostle then delicately refers to the matter of compensation for any loss which Philemon might have sustained either through the dishonesty of Onesimus, or simply through the want of his service; and though he reminds his friend that he might justly hold the latter his debtor for a much larger amount (seeing he owed to the apostle his own self), he pledges himself, under his own hand, to make good that loss (ver. 17-19). The epistle concludes with some additional expressions of friendly solicitude; a request that Philemon would prepare the apostle a lodging, as he trusted soon to visit him; and the salutations of the apostle and some of the Christians by whom he was surrounded at the time (ver. 20-25).

This epistle has been universally admired as a model of graceful, delicate, and manly writing. 'It is a voucher,' says Eichhorn, 'for the apostle's urbanity, politeness, and knowledge of the world. His advocacy of Onesimus is of the most insinuating and persuasive character, and yet without the slightest perversion or concealment of any fact. The errors of Onesimus are admitted, as was necessary, lest the just indignation of his master against him should be roused anew; but they are alluded to in the most admirable manner: the good side of Onesimus is brought to view, but in such a way as to facilitate the friendly reception of him by his master, as a consequence of Christianity, to which he had, during his absence, been converted; and his future fidelity is vouched for by the noble principles of Christianity which he had embraced. The apostle addresses Philemon on the softest side: who would wilfully refuse to an aged, a suffering, and an unjustly imprisoned friend a request? And such was he who thus pleaded for Onesimus. The person recommended is a Christian, a dear friend of the

apostle's, and one who had personally served him: if Philemon will receive him kindly, it will afford the apostle a proof of his love, and yield him joy. What need, then, for long urgency? The apostle is certain that Philemon will, of his own accord, do even more than he is asked. More cogently and more courteously no man could plead.

PHILETUS, an apostate Christian, mentioned by Paul in connection with Hymenæus, 2 Tim. ii. 17 [HYMENÆUS].

1. PHILIP, one of the twelve apostles. He was of Bethsaida, 'the city of Andrew and Peter' (John i. 44). He became one of the disciples of John the Baptist, and was in the neighbourhood where John was baptizing, at the time of our Lord's baptism. Andrew and John, who were also disciples of the Baptist, heard the testimony concerning Jesus which the latter gave, and thenceforth attached themselves to him as the promised Messiah. Through Andrew his brother, Simon (Peter) was brought to Christ; and as on the next day Philip unhesitatingly accompanied Jesus when called to follow him, it is probable that his townsmen had previously spoken to him of Jesus as the long-expected Saviour (John i. 35-44). Philip was thus the fourth of the apostles who attached themselves to the person of Jesus—of those 'who left all and followed him.' The first act of Philip was to bring to the Lord Nathanael, who is supposed to have also become an apostle under the name of Bartholomew (John i. 45-51). Little more is recorded of Philip in the Scriptures; but it is remarkable that when Christ beheld the five thousand people whom he afterwards fed with five loaves and two fishes, he singled out Philip for the question, 'Whence shall we buy bread that these may eat?' It is added, 'This he said to prove him, for he himself knew what he would do.' Bengel and others suppose that this was because the charge of providing food had been committed to Philip, while Chrysostom and Theodore of Mopsuestia rather suppose it was because this apostle was weak in faith. The answer of Philip agrees well enough with either supposition, 'Two hundred pennyworth of bread is not sufficient for them, that every one of them may take a little' (John vi. 1-7). But it is well to compare this with John xiv. 8, where the inappropriate remark of Philip, 'Lord, show us the Father, and it sufficeth us,' evinces that he experienced in a degree beyond his brother apostles the difficulty which they generally felt in raising themselves above the things of sense.

Immediately, we find recorded the application to Philip of certain 'Greeks' (proselytes of the gate) at Jerusalem, who wished to be introduced to Jesus, of whom they had heard so much. Knowing that his Master was not forward to gratify mere curiosity, Philip was uncertain whether to comply with their wish or not, but first consulted Andrew, who went with him to mention the circumstance to Jesus (John xii. 21, 22). This incident, although slight, is indicative of character, as we feel sure that some of the other apostles, Peter for instance, would at once have complied with or declined this application on their own responsibility. The sacred history only adds to these facts, that Philip was present with the other apostles at the religious assembly following the Lord's resurrection (Acts i. 13).

The later traditions concerning this apostle are

vague and uncertain; but there is nothing improbable in the statement that he preached the Gospel in Phrygia, and that he met his death at Hierapolis in Syria.

2. PHILIP, one of the seven first deacons (Acts vi. 5); also called an 'Evangelist' (xxi. 8), which denotes one of those ministers of the primitive church, who, without being attached to any particular congregation, preached the Gospel from place to place (Eph. iv. 11; 2 Tim. iv. 5). Being compelled to leave Jerusalem by the persecution which ensued on Stephen's death, Philip was induced to take refuge in Samaria. He there came to a city where Simon Magus was held in high reverence through the wonders which he wrought. But the substantial and beneficent miracles which were performed by Philip in the name of Jesus, drew away their attention from the impostor, and prepared their minds for the reception of the Gospel. Simon himself seems to have regarded him as in league with some superhuman being, and looking upon baptism as the initiatory rite of a compact through which he might obtain the same powers, he solicited and obtained baptism from the Evangelist [SIMON MAGUS]. After Peter and John had come to Samaria to complete and carry on the work which Philip had been the means of commencing, the Evangelist himself was directed by a divine impulse to proceed towards Gaza, where he met the treasurer of Candace, queen of Ethiopia [CANDACE; ETHIOPIA], by whose conversion and baptism he became the instrument of planting the first seeds of the Gospel in Ethiopia (Acts viii. 1-39). Philip then retraced his steps, and after pausing at Azotus, preached the Gospel from town to town till he came to Caesarea (ver. 40). At this place he seems to have settled; for when Paul was on his last journey to Jerusalem, he and his party were entertained in the house of Philip, on which occasion it is mentioned that he had 'four daughters, virgins, who did prophesy' (Acts xxi. 9), or who were endued with the faculty of speaking under divine inspiration and of predicting future events, together with other supernatural gifts vouchsafed to the primitive Christians in accordance with the prophecy in Acts ii. 18. With this fact the Scriptural history of Philip closes, and the traditions which refer to his subsequent proceedings are uncertain and conflicting.

3. PHILIP, son of Herod the Great, and tetrarch of Batanaea, Trachonitis, and Auranitis (Luke iii. 1) [HERODIAN FAMILY].

4. PHILIP, called by Josephus Herod, son of Herod the Great, and first husband of Herodias [HERODIAN FAMILY].

PHILIPPI, a city of the proconsular Macedonia, situated eastward of Amphipolis, within the limits of ancient Thrace (Acts xvi. 12; xx. 6; Phil. i. 1). It was anciently called Krenides (*fountain*) from its many fountains; but having been taken and fortified by Philip of Macedon, he named it, after himself, Philippi. In the vicinity were mines of gold and silver; and the spot eventually became celebrated for the battle in which Brutus and Cassius were defeated. Paul made some stay in this place on his first arrival in Greece, and here founded the church to which he afterwards addressed one of his epistles. It was here that the interesting circumstances related in Acts xvi. occurred; and

the city was again visited by the Apostle on his departure from Greece (Acts. xx. 6). In the former passage (xvi. 12) Philippi is called a colony, and this character it had in fact acquired through many of the followers of Antony having been colonized thither by Augustus (Dion. Cass. xlviii. 432). The fact that Philippi was a colony was formerly disputed; but its complete verification has strongly attested the minute accuracy of the sacred narrative. The plain in which the ruins of Philippi stand is embraced by the parallel arms of mountains extended from the Necropolis, which pour into the plain many small streams, by which it is abundantly watered and fertilized. The acropolis is upon a mount standing out into the plain from the north-east, and the city seems to have extended from the base of it to the south and south-west. The remains of the fortress upon the top consist of three ruined towers and considerable portions of walls of stone, brick, and very hard mortar. The plain below does not now exhibit anything but ruins—heaps of stone and rubbish, overgrown with thorns and briars; but nothing of the innumerable busts and statues, thousands of columns, and vast masses of classic ruins, of which the elder travellers speak. Ruins of private dwellings are still visible; also something of a semicircular shape, probably a forum or market-place, 'perhaps the one where Paul and Silas received their undeserved stripes.' The most prominent of the existing remains is the remainder of a palatial edifice, the architecture of which is grand, and the materials costly. The pilasters, chapters, &c., are of the finest white marble, and the walls were formerly encased with the same stone. These marble blocks are gradually knocked down by the Turks, and 'wrought into their silly gravestones.' The travellers were informed that many of the ruins are now covered by stagnant water, at the bottom of which they may be seen; but they did not visit this spot.

PHILIPPIANS, EPISTLE TO THE. Of this part of the Apostle Paul's writings the authenticity has never been questioned. Professing to be written by that distinguished servant of Christ, it bears on every part of it the impress of his peculiar style, manner of thought, and form of doctrine; and the internal evidence of authenticity arising from the incidental allusions in it to persons and circumstances is very strong.

From allusions in the epistle itself, it is evident that it was written at Rome during the period of the apostle's two years' imprisonment in that city, and in all probability towards the close of that period (i. 13, 14, 23, 26; ii. 18, 25). It seems to have been composed on the occasion of the return to Philippi of Epaphroditus, a member of the church in that place, who had been deputed to Rome with a pecuniary contribution from the church in aid of the apostle. Full of gratitude for this work of friendly remembrance and regard, Paul addressed to the church in Philippi this epistle, in which, besides expressing his thanks for their kindness, he pours out a flood of eloquence and pathetic exhortation, suggested partly by his own circumstances, and partly by what he had learned of their state as a church. That state appears to have been on the whole very prosperous, as there is much commendation of

the Philippians in the epistle, and no censure is expressed in any part of it either of the church as a whole, or of any individuals connected with it. At the same time the apostle deemed it necessary to put them on their guard against the evil influences to which they were exposed from Judaizing teachers and false professors of Christianity. These cautions he interposes between the exhortations suggested by his own state and by the news he had received concerning the Philippians, with which his epistle commences and with which it closes. We may thus divide the epistle into three parts. In the first of these (i., ii.), after the usual salutation and an outpouring of warm-hearted affection towards the Philippian church (i. 1-11), the apostle refers to his own condition as a prisoner at Rome; and lest they should be cast down at the thought of the unmerited indignities he had been called upon to suffer, he assures them that these had turned out rather to the furtherance of that great cause on which his heart was set, and for which he was willing to live and labour, though, as respected his personal feelings, he would rather depart and be with Christ, which he deemed to be 'far better' (12-24). He then passes by an easy transition to a hortatory address to the Philippians, calling upon them to maintain steadfastly their profession, to cultivate humanity and brotherly love, to work out their own salvation with fear and trembling, and concluding by an appeal to their regard for his reputation as an apostle, which could not but be affected by their conduct, and a reference to his reason for sending to them Epaphroditus instead of Timothy, as he had originally designed (i. 25; ii. 30). In part second he strenuously cautions them, as already observed, against Judaizing teachers, whom he stigmatizes as 'dogs' (in reference probably to their impudent, snarling, and quarrelsome habits), 'evil-workers,' and 'the concision;' by which latter term he means to intimate, as Theophylact remarks (*in loc.*), that the circumcision in which the Jews so much gloried had now ceased to possess any spiritual significance, and was therefore no better than a useless mutilation of the person. On this theme he enlarges, making reference to his own standing as a Jew, and intimating, that if under the Christian dispensation Jewish descent and Jewish privileges were to go for anything, no one could have stronger claims on this ground than he; but at the same time declaring, that however he had once valued these, he now counted them 'all but lost for the excellency of the knowledge of Christ' (iii. 1-12). A reference to his own sanctified ambition to advance in the service of Christ leads him to exhort the Philippians to a similar spirit; from this he passes to caution them against unnecessary contention, and against those who walk disorderly, concluding by reminding them of the glorious hopes which, as Christians, they entertained (ver. 13-21). In the third part we have a series of admonitions to individual members of the church at Philippi (iv. 1-3), followed by some general exhortations to cheerfulness, moderation, prayer, and good conduct (ver. 4-9); after which come a series of allusions to the apostle's circumstances and feelings, his thanks to the Philippians for their seasonable aid, and his concluding benedictions and salutations (ver. 10-23).

This epistle is written throughout in a very animated and elevated style. It is full of the most sublime thoughts and the most affectionate exhortations. It resembles more the production of a father addressing his children, than that of an apostle laying down authoritatively what is to be received and followed. The whole of it shows, as Thophylact observes, how very much he loved and estimated those to whom it was addressed.

PHILISTINES, a tribe which gave its name to the country known as Palestine, though it occupied only a portion of the southern coast, namely, that which was bounded on the west by the hill country of Ephraim and Judah, and on the south extended from Joppa to the borders of Egypt, thus touching on the Israelite tribes Dan, Simeon, and Judah. Indeed the portions of Simeon and Dan covered a large part of Philistia, but its possession by the Israelites was disputed, and was never entirely achieved. This country was originally held by the Avims, who were destroyed and their land seized by the Caphtorims, coming forth out of Caphtor (Deut. ii. 23). In Jer. xlvii. 4 the Philistines are denominated 'the remnant of the country (or isle) of Caphtor.' In Amos ix. 7, the Divine Being asks, 'Have I not brought the Philistines from Caphtor?' The Caphtorim and the Philistim are also associated together as kindred tribes in the genealogical list of nations given in Gen. x. 14, both being descendants of Mizraim. Some imagine that Caphtor is Cappadocia: others with more reason affirm that it is Crete, and that the Philistines, being a part of the great Shemitic family, went westward under pressure from the wave of population which came down from the higher country to the seacoast, but afterwards returned eastward from Crete to Palestine. Another opinion, which is supported by very plausible arguments, is, that the Philistines are to be identified with the Hycksos or Shepherd-kings, who were expelled from Egypt, and taking possession of Canaan gave to it the name of *Palisthan*, i. e., Shepherd-land. This view appears to be countenanced by Gen. x. 13, 14, where the Philistines are derived from Mizraim, that is from Egypt.

If now we follow the Biblical accounts, we find the history of the Philistines to be in brief as follows. They had established themselves in their land as early as the time of Abraham, when they had founded a kingdom at Gerar (Gen. xxi. 32; xxvi. 1). When the Israelites left Egypt, they were deterred by fear of the power of the Philistines from returning by the shortest road—that which the caravans still take—because it lay through the country of the Philistines (Exod. xiii. 17). In the time of Joshua (xiii. 3) the Philistines appear in a league of five princes, governors of so many tribes or petty states—all the borders of the Philistines from Sihor which is before Egypt even unto the borders of Ekron northward counted to the Canaanites.' Joshua appears to have thought it prudent to attempt nothing for the dispossession of the Philistines, and he therefore had no hostile relations with them; for the division of Philistia among the tribes was nothing more than a prospective but unfulfilled arrangement (Josh. xv. 45; xix. 43). The days of the Judges, however, brought conflicts between the Israelites and the Philistines, who dwelt wide over the land, and even exercised

dominion over their Hebrew neighbours (Judg. iii. 31; x. 7; xiii. 1; xiv. 2, 4, 5; xv. 11).

In the time of Eli the Philistines succeeded in getting the ark into their possession (1 Sam. iv.); but a defeat which they suffered under Sammel put an end to their dominion, after it had lasted forty years (1 Sam. vii.). This subjection of the Israelites began after the death of Jair, and continued to the termination of the period embraced in the book of Judges. Within this space of time fell the life and the heroic actions of Samson. Notwithstanding the total defeat which the Philistines had undergone, and the actual termination of their political supremacy, they continued to be troublesome neighbours. 'There was sore war against the Philistines all the days of Saul' (1 Sam. xiv. 52); a conflict which was carried on with various success, and in which the king found great support in the prudent bravery of his son Jonathan and the high courage of David (1 Sam. xiii. 4; xiv. xvii. 18; xix. 8; xxiii. 28). Even after his separation from Saul David inflicted many blows on the Philistines (1 Sam. xxiii.); but soon saw himself obliged to seek refuge in Gath (1 Sam. xxvii.), and was in consequence near making common cause with them against Saul (1 Sam. xxix.), who met with his death at their hands while engaged in battle (1 Sam. xxxi.). They also raised their arms against David, when he had become king of all Israel, but were several times beaten by that brave monarch (2 Sam. v. 17, sq.; viii. 1). 'Mighty men,' performing valorous deeds in imitation of David's rencontre with Goliath, gave the king their support against this brave and persevering enemy (2 Sam. xxiii. 8, sq.). Solomon appears to have been undisturbed by the Philistines, but they had settlements in the land of Israel under the early Ephraimitic kings (1 Kings xv. 27; xvi. 15). To Jehoshaphat they became tributary (2 Chron. xvii. 11). Under Jehoram, however, they, in union with the Arabians, fell on Jerusalem, and carried off the king's substance, as well as his wives and children (2 Chron. xxi. 16). On the other hand, in the reign of king Jehoash, their city Gath was taken by Hazael, king of Syria, who also threatened Jerusalem (2 Kings xii. 17). But in the time of Ahaz they revolted, and carried with them a part of western Judah, having 'invaded the cities of the low country and of the south of Judah, and taken Bethshemesh and Ajalon,' &c. (2 Chron. xxviii. 18; comp. Isa. xiv. 29). Hezekiah in the first years of his reign obtained some advantages over them (2 Kings xviii. 8). Soon, however, Assyrian armies went against Philistia, and, with a view to an invasion of Egypt, got into their power the strong frontier-fortress of Ashdod (Isa. xx. 1), which at a later time Psammetichus took from them, after a siege of twenty-nine years (Herod. ii. 157). In consequence of the hostile relations between Assyria and Egypt, Philistia suffered for a long period, as the troops of the former power took their way through that land, and Pharaoh-Necho captured the stronghold Gaza (Isa. xlvi. 1). The same was done by Alexander the Great in his expedition to Egypt. On the destruction of the Jewish state, the Philistines, like other neighbouring peoples, acted ill towards the Jews, having 'taken vengeance with a spiteful heart' (Ezek. xxv. 15). Many of those who returned from the cap-

tivity 'had married wives of Ashdod, and their speech spoke half in the speech of Ashdod' (Neh. xiii. 23, sq.). In the Maccabean period the Philistines were Syrian subjects, and had at times to suffer at the hands of the Jews (1 Macc. x. 86; xi. 60, sq.). King Alexander (Balus) gave Jonathan a part of their territory, Accaron, with the borders thereof in possession (1 Macc. x. 89). The Jewish monarch Alexander Jannæus overcame and destroyed Gaza. By Pompey Azotus, Jamnia, and Gaza were united to the Roman province of Syria; but Gaza was given by Augustus to King Herod.

The Philistine cities were greatly distinguished. Along the whole coast from north to south there ran a line of towns—in the north the Phœnicia, in the south the Philistia—which were powerful, rich, and well-peopled. The chief cities of the Philistines were five—Gaza, Ashdod, Askalon, Gath, and Ekron (Josh. xiii. 3; Judg. iii. 3). Several of these Palestinian cities flourished at the same time; and though now these now those cities gained at different periods pre-eminence in power, wealth, and population, and though some did not rise till others had declined or perished, yet is it true that from the earliest times till the century after Christ a number of important towns existed on the narrow strip of land which borders the Mediterranean sea, such as was never seen in any other part of the world, the Iouian coast of Asia Minor not excepted.

The greatness of these cities was mainly owing to commerce, for the coast of Palestine was in the earliest ages exclusively in possession of the trade which was carried on between Europe and Asia. Besides a great transit trade, they had internal sources of wealth, being given to agriculture (Judg. xv. 5). In the time of Saul they were evidently superior in the arts of life to the Israelites; for we read (1 Sam. xiii. 20) that the latter were indebted to the former for the utensils of ordinary life. Their religion was not essentially different from that of the Phœnicians. The idol which they most revered was Astarte, the Assyrian Semiramis, or Derketo, who was also honoured as Dagon, in a very ancient temple at Askalon and at Gaza, also at Ashdod (Judg. xvi. 23; 1 Sam. v. 1, sq.; 1 Macc. x. 83). This was a species of fish-worship, a remnant of which may still be found in the special care taken of certain holy fish in some parts of Syria. In Ekron Baalzebub had his chief seat. Priests and soothsayers were numerous (1 Sam. vi. 2). Their magicians were in repute (Isa. ii. 6), and the oracle of Baalzebub was consulted by foreigners (2 Kings i. 2). They had the custom of carrying with them in war the images of their gods (2 Sam. v. 21). Tradition makes the Philistines the inventors of the bow and arrow.

PHILOLOGUS, one of the Christians at Rome to whom Paul sent his salutations (Rom. xvi. 15). Dorotheus makes him one of the seventy disciples, and alleges that he was placed by the apostle Andrew as bishop of Sinope, in Pontus. But this seems altogether improbable.

PHINEHAS (*mouth of brass*), son of Eleazar and grandson of Aaron the high-priest. An incident which illustrates the zealous and somewhat passionate character of Phinehas, occurred before the Israelites entered the Promised Land. The Israelites were encamped in the plains of Moab,

and were lamenting the sin into which they had been seduced by the Midianites, when a prince of Judah named Zimri was beheld conducting a woman of Midian named Cozbi to his tent. The licentious effrontery of this act kindled the wrath of Phinehas, who hastened after them into the tent, and transfixed them both with his javelin (Num. xxv. 7, sq.). This bold act pointed out Phinehas to Moses as a proper person to accompany as priest the expedition which was immediately after sent forth, under the command of Joshua, against the Midianites, and by which the cause of the deluded Israelites was abundantly avenged (Num. xxxi. 6, sq.). After the conquest of the Promised Land, when the warriors of the two and half tribes beyond the Jordan were permitted to return to their homes, Phinehas was at the head of the deputation sent after them to inquire and remonstrate concerning the altar which, on their way, they had set up on the bank of the Jordan; and it was he doubtless who pronounced the forcible address to the supposed offenders. He was certainly the first to express his satisfaction and joy at the explanation which was given, and which, with a lightened heart, he bore back to the tribes assembled at Shiloh (Josh. xxii. 5, sq.).

It appears that while his father lived Phinehas filled the post of superintendent or chief of the Levites, probably after Eleazar became high-priest (Num. iii. 32; 1 Chron. ix. 20). At the death of his father he succeeded to the pontificate (Josh. xxiv. 33); but the only case in which he appears officially in the Bible is in connection with the unhappy circumstances recorded at the end of the book of Judges, in which he comes forward as high-priest to consult Jehovah. This mention of his name enables us to conclude that the chronological place of these occurrences would be rather towards the beginning than at the latter end of the book in which they are found [JUDGES; PRIEST].

2. PHINEHAS, son of Eli the high-priest, and brother of Hophni [ELI; HOPHNI; SAMUEL].

PHLEG'ON, one of the Christians of Rome to whom Paul sent his salutations (Rom. xvi. 14). The legend (*ap. Dorotheus*) makes him to have been one of the seventy disciples, and bishop of Marathon.

PHI'EBE, a deaconess of the church at Cenchrea, recommended to the kind attention of the church of Rome by St. Paul, who had received hospitable treatment from her (Rom. xvi. 1). It is probable that she was the bearer of the Epistle to the Romans.

PHœNICIA, and the PHœNICIANS. This name was used by the ancients sometimes in a wider, sometimes in a narrower sense. Phœnicia, in its widest signification, embraces the whole coast of the Mediterranean situated between the river Orontes and Pelusium. In a more restricted sense it was regarded as the territory between the river Eleutheros on the north, and Dora on the south.

Phœnicia is situated between about lat. 33° and 35° N., and under long. 33° E. The whole of Phœnicia is situated at the western declivity of Mount Lebanon. Compare the article LIBANUS.

Phœnicia was distinguished by the variety of its vegetable productions. This variety was occasioned by the great diversity of climate produced

by the diversity in the elevation of the soil. The Lebanon is said to bear winter on its head, spring on its shoulders, autumn in its lap, and to have summer at its feet. The fertility of Phœnicia is increased by the numerous streams whose springs are in Mount Lebanon. Even in the Song of Solomon we read the praises of the spring of living waters which flows down from Lebanon. The dense population assembled in the great mercantile towns greatly contributed to augment by artificial means the natural fertility of the soil. The population of the country is at present very much reduced, but there are still found aqueducts and artificial vineyards formed of mould carried up to the terraces of the naked rock. Even now Phœnicia is among the most fertile in Western Asia. It produces wheat, rye, and barley, and, besides the more ordinary fruits, also apricots, peaches, pomegranates, almonds, citrons, oranges, figs, dates, sugar-cane, and grapes, which furnish an excellent wine. In addition to these products, it yields cotton, silk, and tobacco. The country is also adorned by the variegated flowers of oleander and cactus. The higher regions are distinguished from the bare mountains of Palestine by being covered with oaks, pines, cypress-trees, acacias, and tamarisks; and above all by majestic cedars, of which there are still a few very old trees, whose stems measure from thirty to forty feet in circumference. The inhabitants of Sur still carry on a profitable traffic with the produce of Mount Lebanon, namely, wood and charcoal. Phœnicia produces also flocks of sheep and goats; and innumerable swarms of bees supply excellent honey. In the forests there are bears, wolves, panthers, and jackals. The sea furnishes great quantities of fish, so that Sidon, the most ancient among the Phœnician towns, derived its name from fishing.

The inhabitants of Phœnicia might at the first view appear to have derived their origin from the same source (pre-Abrahamic) as the Hebrews; for they spoke the same language.

In the Old Testament the Phœnicians and Canaanites are, however, described as descending, not from Shem, but from Ham. Herodotus, also, in the authority of some Persian historians, states that the Phœnicians came as colonists to the Syrian coasts from the Erythraean Sea.

The first Phœnician colony was Sidon, which is therefore called in Genesis (x. 15) the first-born of Canaan. But soon other colonies arose, like Arka (Gen. x. 17), Aradus, and Smyrna (Gen. x. 18), &c., whose power extended beyond the Jordan, and who drove out before them the earlier inhabitants of Palestine. Hence it arose that the appellation, 'the land of Canaan' (the *utelandis* or *hælandis*), was transferred to the whole of Palestine, although it is by no means a country of a low level, but is full of high elevations. However, the Canaanites, in a stricter sense, were the people who resided in the lower regions along the coast, and on the banks of the Jordan.

When the Israelites conquered the country, the Canaanites on the Phœnician coast, who resided in powerful maritime towns, preserved their independence, and were called Canaanites in particular. Thus we read, in Isa. xxiii. 11, Canaan, in the signification of Phœnicia.

The Carthaginians, as Phœnician colonists,

maintained, even in the days of St. Augustine, that they were Canaanites.

During the period of the conquest of Canaan by the Israelites, the Phœnicians possessed the following towns, which we will enumerate successively, in the direction from south to north:—Dora (Josh. xi. 2; xvii. 11, sq.); Ptolemais (Judg. i. 33); Ecdippa (Josh. xix. 29); Tyre (Josh. xix. 29); Sampta (1 Kings xvii. 9, sq.; Luke iv. 26); Sidon (Gen. x. 15); Berytus (Ezek. xlvii. 16; 2 Sam. viii. 8); Byblus (Josh. xiii. 5); Tripolis, Smyrna (Gen. x. 18); Arka (Gen. x. 17); Simua (Gen. x. 16); Aradus (Gen. x. 18).

Heeren, in his work, *On the Commerce and Politics of the Ancients*, vol. i. part ii. p. 9. Göttingen, 1824, justly observes that the numerous towns which were crowded together in the narrow space of Phœnicia covered almost the entire coast, and, together with their harbours and fleets, must have presented an aspect which has scarcely ever been equalled, and which was calculated to impress every stranger on his arrival with the ideas of wealth, power, and enterprise.

As the annals and public documents of the Phœnicians have all been lost, our knowledge of their history is consequently confined to occasional notices in the Hebrew and classical authors of antiquity. This deficiency of historical information arises also from the circumstance that the facts of Phœnician history were less connected than the events in the history of other nations. The Phœnicians never formed one compact body politic, and consequently did not always gradually advance in their political constitution and in the extent of their power. Every town endeavoured to advance its commerce in its own way. Thus there constantly entered into the life of the Phœnicians new elements, which disturbed a gradual historical progress. Phœnicia was a country favourable to the growth of maritime towns, but did not afford room for great political events. The history of the Phœnicians is that of their external commerce.

A mercantile nation cannot bear despotic government, because the greatest external liberty is requisite in order constantly to discover new sources of gain, and to enlarge the roads of commerce. The whole of Phœnicia consisted of the territories belonging to the various towns. Each of these territories had its own constitution, and in most of them a king exercised supreme power. We hear of kings of Sidon, Tyre, Aradus, and Byblus. It seems that after Nebuchadnezzar had besieged Tyre in vain, the royal dignity ceased for some time, and that there existed a kind of republican administration, under *suffetes* or judges. The regal power was always limited by the magistracy and the priesthood. The independent Phœnician states seem to have formed a confederation, at the head of which stood for some time Sidon, and at a later period Tyre. Tripolis was built conjointly by the various states in order to form the seat of their congress. The smaller states were sometimes so much oppressed by Tyre, that they preferred rather to submit to external enemies.

The position of Phœnicia was most favourable for the exchange of the produce of the East and West. The Libanus furnished excellent timber

for ships. Corn was imported from Palestine. Persians, Lydians and Lycians frequently served as mercenaries in the Phœnician armies (Ezek. xxvii. 10, 11). Phœnicia exported wine to Egypt. Purple garments were best manufactured in Tyre. Glass was made in Sidon and Sarepta. In Phœnicia was exchanged the produce of all known countries. After David had vanquished the Edomites and conquered the coasts of the Red Sea, King Hiram of Tyre entered into a confederacy with Solomon, by which he ensured for his people the right of navigation to India. The combined fleet of the Israelites and Phœnicians sailed from the seaports of Ezion-geber and Elath. These ports were situated on the eastern branch of the Red Sea, the Sinus Ælaniticus, or Gulf of Akaba. Israelitish-Phœnician mercantile expeditions proceeded to Ophir, perhaps Abhira, situated at the mouth of the Indus. It seems, however, that the Indian coasts in general were also called Ophir. Three years were required in order to accomplish a mercantile expedition to Ophir and to return with cargoes of gold, albugwood, ivory, silver, monkeys, peacocks, and other Indian produce.

It seems, however, that these mercantile expeditions to India were soon given up, probably on account of the great difficulty of navigating the Red Sea. King Jehoshaphat endeavoured to recommence these expeditions, but his fleet was wrecked at Ezion-geber (1 Kings xxii. 49). About B.C. 616 or 601, Phœnician seamen undertook, at the command of Pharaoh-Necho, a voyage of discovery, proceeding from the Red Sea round Africa, and returning after two years through the columns of Hercules to Egypt (Herod. iv. 42). The 27th chapter of Ezekiel mentions the commerce by land between India and Phœnicia. The names of mercantile establishments on the coasts of Arabia along the Persian Gulf have partly been preserved to the present day. In these places the Phœnicians exchanged the produce of the west for that of India, Arabia, and Ethiopia. Arabia especially furnished incense, gold, and precious stones. The Midianites (Gen. xxxvii. 28) and the Edomites (Ezek. xxvii. 16) effected the transit by their caravans. The fortified Idumæan town Petra contained probably the storehouses in which the produce of southern countries was collected. From Egypt the Phœnicians exported especially byssus (Ezek. xxvii. 7) for wine. According to an ancient tradition, the tyrant of Thebes, Busiris, having soiled his hands with the blood of all foreigners, was killed by the Tyrian Hercules. This indicates that Phœnician colonists established themselves and their civilization successfully in Upper Egypt, where all strangers usually had been persecuted.

At a later period Memphis was the place where most of the Phœnicians in Egypt were established. Phœnician inscriptions found in Egypt prove that even under the Ptolemies the intimate connection between Phœnicia and Egypt still existed.

From Palestine the Phœnicians imported, besides wheat, especially from Judæa, ivory, oil, and balm; also wool, principally from the neighbouring nomadic Arabs. Damascus furnished wine (Ezek. xxvii. 5, 6, 17, 18, 21,) and the mountains of Syria wool. The tribes about the shores of the Caspian Sea furnished slaves and

iron. Horsemen, horses, and mules, came from the Armenians.

The treasures of the East were exported from Phœnicia by ships which sailed first to Cyprus, the mountains of which are visible from the Phœnician coast. Cyprus was subject to Tyre up to the time of Alexander the Great. There are still found Phœnician inscriptions which prove the connection of Cyprus with Tyre. At Rhodes also are found vestiges of Phœnician influence. From Rhodes the mountains of Crete are visible. This was of great importance for the direction of navigators before the discovery of the compass. In Crete, and also in the Cycladic and Sporadic Isles, are vestiges of Phœnician settlements. On the Isle of Thasos, on the southern coast of Thrace, the Phœnicians had gold mines; and even on the southern shores of the Black Sea they had factories. However, when the Greeks became more powerful, the Phœnicians sailed more in other directions. They occupied also Sicily and the neighbouring islands, but were, after the Greek colonization, confined to a few towns, Motya, Soloes, Panormus. The Phœnician mercantile establishments in Sardinia and the Balearic Isles could scarcely be called colonies.

Carthage was a Phœnician colony, which probably soon became important by commerce with the interior of Africa, and remained connected with Tyre by means of a common sanctuary. After Phœnicia had been vanquished by the Assyrians, Babylonians, and Persians, the settlements in Sicily, Sardinia, and Spain came into the power of Carthage. The Phœnicians had for a long period exported from Spain gold, silver, tin, iron, lead (Ezek. xxxviii. 13), fruit, wine, oil, wax, fish, and wool. Their chief settlement was Tarshish.

There are other names of towns in Spain which have a Phœnician derivation, such as Gades, Malaga, and Belon.

The voyage to Tarshish was the most important of those undertaken by the Phœnicians. Hence it was that their largest vessels were all called *ships of Tarshish*, although they sailed in other directions (1 Kings x. 22).

It appears, also, that the Phœnicians exported tin from the British Isles, and amber from the coasts of Prussia. Their voyages on the western coasts of Africa seem to have been merely voyages of discovery, without permanent results. The Spanish colonies were probably the principal sources of Phœnician wealth, and were founded at a very remote period. The migration of the Phœnician, Cadmus, into Boœtia, likewise belongs to the earlier period of Phœnician colonization.

Phœnicia flourished most in the period from David to Cyrus, B.C. 1050-550. In this period were founded the African colonies, Carthage, Utica, and Leptis. These colonies kept up a frequent intercourse with the mother country, but were not politically dependent. This preserved Phœnicia from the usual stagnation of Oriental states. The civilization of the Phœnicians had a great influence upon other nations. Their voyages are described in Greek mythology as the expeditions of the Tyrian Hercules. The course of the Tyrian Hercules was not marked like that of other conquerors—viz., Medes and Assyrians—

by ruined cities and devastated countries, but by flourishing colonies, by agriculture, and the arts of peace.

According to the Phœnician religion, the special object of worship was the vital power in nature, which is either producing or destroying. The productive power of nature, again, is either procreative, *masculine*, or receptive, *feminine*. These fundamental ideas are represented by the Phœnician gods, who appear under a great variety of names, because these leading ideas may be represented in many different ways.

We need not here enter into details concerning the Phœnician gods, as the principal of them have been noticed under their names [BAAL, ASHTORETH]. It suffices to state generally, that the procreative principle was worshipped as Baal, *lord*, and as the sun. The rays of the sun are, however, not only procreative, but destructive; and this destructive power is especially represented in the Ammonitish fire-god Moloch. Thus Baal represented both the generative and destructive principles of nature; in which latter capacity the Hebrews worshipped him by human sacrifice (1 Kings xviii. 28; Jer. xix. 5). He was the tutelary god of Tyre, and hence had the name of Melkar, equivalent to Melech-kereth, 'king of the city,' whom the Greeks called the Tyrian Hercules.

Of Baaltis, or Astarte, which are usually identified, although they seem to have been originally different, we shall here add nothing to what has been already stated under ASHTORETH.

Besides these principal deities, the Phœnicians worshipped seven *kabirim*, mighty ones, whose numbers corresponded with the seven planets. These *kabirim* were considered as protectors of men in using the powers of nature, especially navigation. With these seven *kabirim* was associated Esmun (*the eighth*), representing the sky full of fixed stars, surrounding the seven planets, the refreshing air and the warmth of life. Many Phœnician names are compounded with Esmun. Hence we infer that he was frequently worshipped.

PHRYGIA, an inland province of Asia Minor, bounded on the north by Bithynia and Galatia, on the east by Cappadocia and Lycaonia, on the south by Lycia, Pisidia, and Isauria, and on the west by Caria, Lydia, and Mysia. In early times Phrygia seems to have comprehended the greater part of the peninsula of Asia Minor. It was subsequently divided into Phrygia Major on the south, and Phrygia Minor or Epictetus (*acquired*) on the north-west. The Romans divided the province into three districts: Phrygia Salutaris on the east, Phrygia Pacatiana on the west, and Phrygia Katakekanemene (*the burnt*) in the middle. The country, as defined by the specified limits, is for the most part level, and very abundant in corn, fruit, and wine. It had a peculiar and celebrated breed of cattle, and the fine raven-black wool of the sheep around Laodicea on the Lycus was in high repute. The Meander and the Hermus were its chief rivers. The Phrygians were a very ancient people, and are supposed to have formed, along with the Pelasgi, the aborigines of Asia Minor. Jews from Phrygia were present in Jerusalem at the Feast of Pentecost (Acts ii. 10), and the province was afterwards twice traversed by St. Paul in his missionary

journeys (Acts xvi. 6; xviii. 23). The cities of Laodicea, Hierapolis, and Colossæ, mentioned in the New Testament, belonged to Phrygia, and Antioch in Pisidia was also within its limits.

PHUL. [POL.]

PHUT, a son of Ham (Gen. x. 6), progenitor of an African people of the same name, sometimes rendered 'Libya' (Jer. xlv. 9; Ezek. xxvii. 10; xxx. 5; xxxviii. 5; Nah. iii. 9).

PHYLACTERY, strips of parchment inscribed with particular passages of Scripture (Dent. vi. 4-9; xi. 13-21; Exod. xiii. 1-10, 11-16). They were folded up and enclosed in a small leather box, and worn upon the forehead nearly between the eyes, or upon the left arm near to the heart, being attached by straps of leather. They were considered as thus reminding the wearers to fulfil the law with the head and heart; and they were also regarded as amulets, protecting the wearer from the powers of evil, especially demons. These

x79.

appendages were used during the stated prayers, and only by men. The whole observance is founded on the authority of the texts which are written on the strips of parchment, as Exod. xiii. 16: 'It shall be for a token upon thine hand, and for frontlets (bands, fillets) between thine eyes;' which, although in all probability only figurative expressions, have been literally understood, and acted upon by the Jews since the Exile. In existing usage the skin employed in making the phylacteries is prepared with much care, and the writing traced with minute accuracy and neatness. The Hebrew ritualists give very exact and numerous directions on this subject, which are required to be closely observed. The case itself is composed of several layers of parchment or of black calfskin. The phylacteries for the head have four cavities, in each of which is put one of the four texts to which we have referred; but the phylacteries for the arm have only one cavity, containing the same texts all written on one slip of parchment. Lightfoot thinks it not unlikely that our Saviour himself wore the Jewish phylacteries, as well as the fringes, according to the custom of his nation; and that in Matt. xxiii. 5, our Lord condemns not the wearing of them, but the pride and hypocrisy of the Pharisees in making them broad and visible, to obtain respect and reputation for wisdom and piety.

PHYSIC; PHYSICIANS. There can be no question that the Israelites brought some knowledge of medicine with them from Egypt, whose

physicians were celebrated in all antiquity. To the state of medical knowledge in that country there are indeed some allusions in Scripture, as contained in the notice of the corps of physicians in the service of Joseph (Gen. i. 2); of the use of artificial help and practised midwives in childbirth (Exod. i. 16); and of the 'many medicines' which their medical practice had brought into use (Jer. lvi. 11).

In the early stage of medical practice attention was confined among all nations to surgical aid and external applications: even down to a comparatively late period outward maladies appear to have been the chief subjects of medical treatment among the Hebrews (Isa. i. 6; Ezek. xxx. 21; 2 Kings viii. 29; ix. 15); and although they were not altogether without remedies for internal or even mental disorders (2 Chron. xvi. 12; 1 Sam. xvi. 16), they seem to have made but little progress in this branch of the healing art. The employment of the physician was, however, very general both before and after the Exile (2 Chron. xvi. 12; Jer. viii. 22; Sirach xxxviii. 1; Mark v. 26; comp. Luke iv. 23; v. 31; viii. 43).

The medicines most in use were salves, particularly balms (Jer. viii. 21; xvi. 11), plasters or poultices (2 Kings xx. 7), oil-baths, mineral baths, river bathing (2 Kings v. 10). The remedies for internal complaints were mostly very simple, such as our old herbalists would have been disposed to recommend.

Amulets were also much in use among the Jews. Strict persons, however, discountenanced such practices as belonging to 'the ways of the Amorites.' Enchantments were also employed by those who professed the healing art, especially in diseases of the mind; and they were much in the habit of laying their hands upon the patient (2 Kings v. 11; Joseph. *Antiq.* ii. 5).

The part taken by the priest in the judgment on leprosy, &c., has led to an impression, that the medical art was in the hands of the Levitical body. This may in some degree be true; not because they were Levites, but because they, more than any other Hebrews, had leisure, and sometimes inclination for learned pursuits. The acts prescribed for the priest by the law do not, however, of themselves, prove anything on this point, as the inspection of leprosy belonged rather to sanitary police than to medicine—although it was certainly necessary that the inspecting priest should be able to discriminate, according to the rules laid down in the law, the diagnosis of the disease placed under his control (Lev. xii. 13; xiv. 15). The priests themselves were apt to take colds, &c., from being obliged to minister at all times of the year with naked feet; whence there was in latter times a medical inspector attached to the temple to attend to their complaints.

Of anatomical knowledge some faint traces may be discerned in such passages as Job ix. 8, sq. It does not appear that the Hebrews were in the habit of opening dead bodies to ascertain the causes of death. We know that the Egyptians were so, and their practice of embalment must have given them much anatomical knowledge. But to the acquisition of such knowledge there were great obstacles among a people to whom simple contact with a corpse conveyed pollution.

PI-BESETH, a city of Egypt, named with

several others in Ezek. xxx. 17. The name was derived from the goddess Bubastis, whom the Greeks identified with their Artemis. A great festive pilgrimage was yearly made to her temple in this place by great numbers of people. Bubastus was taken by the Persians, who destroyed the walls; but it was still a place of some consideration under the Romans. It was near Bubastus that the canal leading to Arsinoë (Suez) opened to the Nile; and although the mouth was afterwards often changed and taken more southward, it has now returned to its first locality, as the present canal of Tel-el-Wadee commences in the vicinity of Tel Basta. This Tel Basta, which undoubtedly represents Bubastus, is in N. lat. 30° 36'; E. long. 31° 33'. The site is occupied by mounds of great extent, which consist of the crude brick houses of the town, with the usual heaps of broken pottery. The temple, of which Herodotus states that, although others in Egypt were larger and more magnificent, none were more beautiful, is entirely destroyed; but the remaining stones, being of the finest red granite, confirm the historian's testimony.

PIGEON. [DOVE; TURTLE-DOVE.]

PI-HAHIR'ROTH, a place near the northern end of the Gulf of Suez, east of Baal-zephon (Exod. xiv. 2, 9; Num. xxxiii. 7). The Hebrew signification of the words would be equivalent to 'mouth of the caverns'; but it is doubtless an Egyptian name, and as such would signify a 'place where grass or sedge grows.'

PILATE, PONTIUS, was the sixth Roman Procurator of Judaea (Matt. xxvii. 2; Mark xv. 1; Luke iii. 1; John xviii. xix.), under whom our Lord taught, suffered, and died (Acts iii. 13; iv. 27; xiii. 28; 1 Tim. vi. 13; Tacit. *Annal.* xv. 44). The testimony of Tacitus on this point is no less clear than it is important; for it fixes beyond a doubt the time when the foundations of our religion were laid. The words of the great historian are: 'The author of that name (Christian) or sect was Christ, who was capitally punished in the reign of Tiberius by Pontius Pilate.'

Pilate was the successor of Valerius Gratus, and governed Judaea, as we have seen, in the reign of Tiberius. He held his office for a period of ten years. The agreement on this point between the accounts in the New Testament and those supplied by Josephus, is entire and satisfactory.

Pilate's conduct in his office was in many respects highly culpable. Josephus has recorded two instances in which Pilate acted very tyrannically (*Antiq.* xviii. 3. 1; comp. *De Bell. Jud.* ii. 9. 2, sq.) in regard to the Jews. He conducted himself with equal injustice and cruelty to the Samaritans also. His own misconduct led the Samaritans to take a step which in itself does not appear seditious or revolutionary, when Pilate seized the opportunity to slay many of the people, not only in the fight which ensued, but also in cold blood after they had given themselves up. 'But when this tumult was appeased, the Samaritan Senate sent an embassy to Vitellius, now President of Syria, and accused Pilate of the murder of those who had been slain. So Vitellius sent Marcellus, a friend of his, to take care of the affairs of Judaea, and ordered Pilate to go to Rome to answer before the emperor to the

accusation of the Jews. Pilate, when he had tarried ten years in Judæa, made haste to Rome, and this in obedience to the orders of Vitellius, which he durst not contradict; but before he could get to Rome, Tiberius was dead' (Joseph. *Antiq.* xviii. 4. 2). This removal took place before the Passover, in A.D. 36, probably about September or October, A.D. 35; Pilate must, therefore, as he spent ten years in Judæa, have entered on his government about October, A.D. 25, or at least before the Passover, A.D. 26, in the twelfth year of Tiberius's sole empire.

To be put out of his government by Vitellius, on the complaints of the people of his province, must have been a very grievous mortification to Pilate; and though the emperor was dead before he reached Rome, he did not long enjoy such impunity as guilt permits; for, as Eusebius states, he shortly afterwards made away with himself out of vexation for his many misfortunes.

Owing to the atrocity of the deed in which Pilate took a principal part, and to the wounded feelings of piety with which that deed has been naturally regarded by Christians, a very dark idea has been formed of the character of this Roman governor. That character was undoubtedly bad; but moral depravity has its degrees, and the cause of religion is too sacred to admit any spurious aid from exaggeration. It is therefore desirable to form a just conception of the character of Pilate, and to learn specifically what were the vices under which he laboured. For this purpose a brief outline of the evangelical account seems necessary. The narratives on which the following statement is founded may be found in John xviii., xix.; Matt. xxvii.; Mark xv.; Luke xxiii.

Jesus having been betrayed, apprehended, and found guilty of blasphemy by the Jewish Sanhedrim, is delivered to Pilate in order to undergo the punishment of death, according to the law in that case provided. This delivery of Jesus to Pilate was rendered necessary by the fact, that the Jews, though they retained for the most part their laws and customs, both civil and religious, did not possess the power of life and death which was in the hands of the Roman governor. Pilate could not have been ignorant of Jesus and his pretensions. He might, had he chosen, have immediately ordered Jesus to be executed, for he had been tried and condemned to death by the laws of the land; but he had an alternative. As the execution of the laws, in the case at least of capital punishments, was in the hands of the Roman Procurator, so without any violent straining might his tribunal be converted into a court of appeal in the last instance. At any rate, remonstrance against an unjust verdict was easy and proper on the part of a high officer, who, as having to inflict the punishment, was in a measure responsible for its character. And remonstrance might easily lead to a revision of the grounds on which the verdict had been given, and thus a cause might virtually be brought, *de novo*, before the Procurator: this took place in the case of our Lord. Pilate gave him the benefit of a new trial, and pronounced him innocent.

This review of the case was the alternative that lay before Pilate, the adoption of which speaks undoubtedly in his favour, and may justify us in declaring that his guilt was not of the deepest dye.

That the conduct of Pilate was, however, highly criminal cannot be denied. But his guilt was light in comparison of the criminal depravity of the Jews, especially the priests. His was the guilt of weakness and fear, theirs the guilt of settled and deliberate malice. His state of mind prompted him to attempt the release of an accused person in opposition to the clamours of a misguided mob; theirs urged them to compass the ruin of an acquitted person by instigating the populace, calumniating the prisoner, and terrifying the judge. If Pilate yielded against his judgment under the fear of personal danger, and so took part in an act of unparalleled injustice, the priests and their ready tools originated the false accusation, sustained it by subornation of perjury, and when it was declared invalid, enforced their own unfounded sentence by appealing to the lowest passions. Pilate, it is clear, was utterly destitute of principle. He was willing, indeed, to do right, if he could do right without personal disadvantage. Of gratuitous wickedness he was perhaps incapable, certainly in the condemnation of Jesus he has the merit of being for a time on the side of innocence. But he yielded to violence, and so committed an awful crime. In his hands was the life of the prisoner. Convinced of his innocence he ought to have set him at liberty, thus doing right regardless of consequences. But this is an act of high virtue which we hardly look for at the hands of a Roman governor of Judæa; and though Pilate must bear the reproach of acting contrary to his own declared convictions, yet he may equally claim some credit for the apparently sincere efforts which he made in order to defeat the malice of the Jews and procure the liberation of Jesus.

If now we wish to form a judgment of Pilate's character, we easily see that he was one of that large class of men who aspire to public offices, not from a pure and lofty desire of benefiting the public and advancing the good of the world, but from selfish and personal considerations, from a love of distinction, of power, of self-indulgence; being destitute of any fixed principles, and having no aim but office and influence, they act right only by chance and when convenient, and are wholly incapable of pursuing a consistent course, or of acting with firmness and self-denial in cases in which the preservation of integrity requires the exercise of these qualities. Pilate was obviously a man of weak, and therefore, with his temptations, of corrupt character. This want of strength will readily account for his failing to rescue Jesus from the rage of his enemies, and also for the acts of injustice and cruelty which he practised in his government—acts which, considered in themselves, wear a deeper dye than does the conduct which he observed in surrendering Jesus to the malice of the Jews. And this same weakness may serve to explain to the reader how much influence would be exerted on this unjust judge, not only by the stern bigotry and persecuting wrath of the Jewish priesthood, but specially by the not concealed intimations which they threw out against Pilate, that, if he liberated Jesus, he was no friend of Tiberius and must expect to have to give an account of his conduct at Rome. And that this was no idle threat, Pilate's subsequent disposition by Vitellius shows very plainly; nor could the procurator have been

ignorant either of the stern determination of the Jewish character, or of the offence he had by his acts given to the heads of the nation, or of the insecurity, at that very hour, when the contest between him and the priests was proceeding regarding the innocent victim whom they lust to destroy, of his own position in the office which he held, and which, of course, he desired to retain. On the whole, then, viewing the entire conduct of Pilate, his previous iniquities as well as his bearing on the condemnation of Jesus—viewing his own actual position and the malignity of the Jews, we cannot, we confess, give our vote with those who have passed the severest condemnation on this weak and guilty governor.

That Pilate made an official report to Tiberius of the condemnation and punishment of Jesus Christ, is likely in itself, and is confirmed by the voice of antiquity. Lardner, who has fully discussed the subject, decides that 'it must be allowed by all that Pontius Pilate composed some memoirs concerning our Saviour, and sent them to the emperor.' These documents have in some way been lost, and what we now have under the title of the *Acts of Pontius Pilate* and his letter to Tiberius, are manifestly spurious, though they have probably been fabricated in some keeping with the genuine pieces, the loss of which the composers of the existing documents sought as well as they could to repair.

PINE-TREE. The Hebrew name, *Oren*, occurs only once in Scripture, and is variously translated; but from the manner in which it is introduced, it is impossible to determine whether any of the translations are correct. The *oren* is mentioned with other trees, of whose timber idols were made, in Isa. xlv. 14: 'He heweth him down cedars (*eres*) and taketh the cypress (*tirzah*), and the oak (*allon*), which he strengtheneth for himself among the trees of the forest; he planteth an ash (*oren*), and the rain doth nourish it.' Though the English version renders it *ash*, others consider *pine-tree* to be the correct translation; but for neither does there appear to be any decisive proof, nor for the rubus or bramble, adopted for *oren* in the fable of the Cedar and Rubus.

PINNACLE. In the account of our Lord's temptation (Matt. iv. 5), it is stated that the devil took him to Jerusalem, 'and set him on a pinnacle of the temple.' The part of the temple denoted by this term has been much questioned by different commentators, and the only certain conclusion seems to be that it cannot be understood in the sense usually attached to the word, i. e. the point of a spiral ornament. Grotius, Hammond, Doddridge, and others, take it in the sense of balustrade or pinnated battlement. But it is now more generally supposed to denote what was called the king's portico, which is mentioned by Josephus (*Antiq.* xv. 11. 5), and is the same which is called in Scripture 'Solomon's porch.'

PIPE [MUSICAL INSTRUMENTS.]

PI'RATHON, a town in the land of Ephraim, to which Abdon, judge of Israel, belonged, and in which he was buried (*Judg.* xii. 13. 15).

PIS'GAH, a mountain ridge in the land of Moab, on the southern border of the kingdom of Sihou (*Num.* xxi. 20; xxiii. 14; *Deut.* iii. 27; *Josh.* xii. 3). In it was Mount Nebo, from which Moses viewed the Promised Land before he died (*Deut.* xxxiv. 1) [*NEBO*].

PISIDIA, a district of Asia Minor, lying mostly on Mount Taurus, between Pamphylia, Phrygia, and Lycaonia. Its chief city was Antioch, usually called Antioch in Pisidia, to distinguish it from the metropolitan city of the same name [*ANTIOCH*, 2].

PITCH. [*ASPHALTUM*.]

PI'THOM, one of the 'treasure-cities' which the Israelites built in the land of Goshen 'for Pharaoh' (*Exod.* i. 11) [*EGYPT*; *GOSHEN*]. The site is by general consent identified with that of the Patmos of Herodotus (ii. 158). Speaking of the canal which connected the Nile with the Red Sea, this author says, 'The water was admitted into it from the Nile. It began a little above the city Bubastus [*PI-BEETH*], near the Arabian city Patmos, but it discharged itself into the Red Sea.' According to this, Patmos was situated on the east side of the Pelusiac arm of the Nile, not far from the canal which unites the Nile with the Red Sea, in the Arabian part of Egypt. We gather from the *Itinerarium of Antoninus* that this city was twelve Roman miles distant from Heropolis, the ruins of which are found in the region of the present Abu-Keisheid. All these designations are appropriate if, with the scholars who accompanied the French expedition, we place Pithom on the site of the present Abhaseh, at the entrance of the Wady Fumilat, where there was at all times a strong military post.

PLANE-TREE. The tree called in Hebrew *Armon* is named thrice in the Scriptures. It occurs among the 'speckled rods' which Jacob placed in the watering-troughs before the sheep (*Gen.* xxx. 37): its grandeur is indicated in *Ezek.* xxxi. 8, as well as in *Eccles.* xxiv. 19: it is noted for its magnificence, shooting its high boughs aloft. This description agrees well with the plane-tree which is adopted by all the ancient

280. [*Platanus Orientalis*—Plane-tree.]

translators, to which the balance of critical opinion inclines, and which actually grows in Palestine. The beech, the maple, and the chestnut have been adopted, in different modern versions, as representing the Hebrew *Armon*; but

scarcely any one now doubts that it means the plane-tree. It may be remarked that this tree is in Genesis associated with others—the willow and the poplar—whose habits agree with it; they are all trees of the low grounds, and love to grow where the soil is rich and humid.

PLAGUE. [PESTILENCE.]

PLEDGE. [LOAN.]

PLOUGH. [AGRICULTURE.]

POLLUX. [CASTOR AND POLLUX.]

POLYGAMY. [MARRIAGE.]

POMEGRANATE. The pomegranate is a native of Asia; and we may trace it from Syria, through Persia, even to the mountains of Northern India. It is common in Northern Africa, and was early cultivated in Egypt: hence the Israelites in the desert complain (Num. xx. 5), 'It is no place of seed, or of figs, or of vines, or of pomegranates.' Being common in Syria and Persia, it must have early attracted the attention of Eastern nations. In the present day it is highly valued, and travellers describe the pomegranate as being delicious throughout Persia. The late Sir A. Burnes states that the famous pomegranates without seeds are grown in gardens under the snowy hills, near the river Cabul. The bright and dark-green foliage of the pomegranate, and its flowers conspicuous for the crimson colour both of the calyx and petals, must have made it an object of desire in gardens; while its large reddish-coloured fruit, filled with numerous seeds, each surrounded with juicy pleasant-tasted pulp, would make it still more valuable as a fruit in warm countries. The pulpy grains of this fruit are sometimes eaten by themselves, sometimes sprinkled with sugar; at other times the juice is pressed out and made into wine, or one of the esteemed sherbets of the East. This seems also to have been the custom in ancient times, for it is said in Canticles, viii. 2, 'I would cause thee to drink of spiced wine of the juice of my pomegranate.'

The pomegranate was well known to the Greeks. It was employed as a medicine by Hippocrates, and is mentioned by Homer. Various parts of the plant were employed medicinally, as, for instance, the root, or rather its bark, the flowers, and the double flowers; also the rind of the pericarp. Some of the properties which these plants possess, make them useful both as drugs and as medicines. We have hence a combination of useful and ornamental properties, which would make the pomegranate an object sure to command attention: and these, in addition to the showy nature of the flowers, and the roundish form of the fruit, crowned by the protuberant remains of the calyx, would induce its selection as an ornament to be imitated in carved work. Hence we find frequent mention of it as an ornament on the robes of the priests (Exod. xxviii. 33; xxxix. 24); and also in the temple (1 Kings vii. 18, 20, 42; 2 Kings xxv. 17; 2 Chron. iii. 16; iv. 13). It might, therefore, well be adduced by Moses among the desirable objects of the land of promise (Deut. viii. 8): 'a land of wheat, and barley, and vines, and fig-trees, and pomegranates; a land of oil-olive and honey.'

PONTIUS PILATE. [PILATE.]

PONTUS, the north-eastern province of Asia Minor, which took its name from the sea [Pontus Euxinus] that formed its northern frontier. On

the east it was bounded by Colchis, on the south by Cappadocia and part of Armenia, and on the west by Paphlagonia and Galatia. Ptolemy and Pliny regard Pontus and Cappadocia as one province; but Strabo rightly distinguishes them, seeing that each formed a distinct government with its own ruler or prince. The family of Mithridates reigned in Pontus, and that of Ariarathes in Cappadocia. The two countries were also separated naturally from each other by the Lithrus and Ophlimus mountains. The kingdom of Pontus became celebrated under Mithridates the Great, who waged a long war with the Romans, in which he was at length defeated, and his kingdom annexed to the Roman empire by Pompey. That Jews had settled in Pontus, previous to the time of Christ, is evident from the fact, that strangers from Pontus were among those assembled at Jerusalem at the Feast of Pentecost (Acts ii. 9). Christianity also became early known in this country, as the strangers 'in Pontus' are among those to whom Peter addressed his first epistle (1 Pet. i. 1). Of this province Paul's friend, Aquila, was a native (Acts xviii. 2). The principal towns of Pontus were Amasia, the ancient metropolis, and the birth-place of the geographer Strabo, Themiscyra, Cerasus, and Trapezus; which last is still an important town under the name of Trebizond.

POPLAR. (The word thus rendered (*Libneh*) occurs in two places of Scripture, viz. Gen. xxx. 37; Hos. iv. 13, and is supposed to indicate either the *white poplar* or the *storax tree*. The arguments in support of the respective claims of these are nearly equally balanced, although those in favour of the storax appear to us to preponderate. The white poplar is said to be called *white*, not on account of the whiteness of its bark, but of that of the under surface of its leaves. It may perhaps be so designated from the whiteness of its hairy seeds, which have a remarkable appearance when the seed-covering first bursts. The poplar is certainly common in the countries where the scenes are laid of the transactions related in the above passages of Scripture. *Libneh*, both in Arabic and in Persian, is the name of a tree, and of the fragrant resin employed for fumigating, which exudes from it, and which is commonly known by the name of Storax. This resin was well known to the ancients, and is mentioned by Hippocrates and Theophrastus. Dioscorides describes several kinds, all of which were obtained from Asia Minor; and all that is now imported is believed to be the produce of that country. But the tree is cultivated in the south of Europe, though it does not there yield any storax. It is found in Greece, and is supposed to be a native of Asia Minor, whence it extends into Syria, and probably farther south. It is therefore a native of the country which was the scene of the transaction related in the above passage of Genesis.

From the description of Dioscorides, and his comparing the leaves of the styrax to those of the quince, there is no doubt of the same tree being intended: especially as in early times, as at the present day, it yielded a highly fragrant balsamic substance which was esteemed as a medicine, and employed in fumigation. From the similarity of the Hebrew name *libneh* to the Arabic *libne*, and from the Septuagint having in Genesis translated the former by *styrax*, it

seems most probable that this was the tree intended. It is capable of yielding white wands as well as the poplar; and it is also well qualified to afford complete shade under its ample foliage, as in the passage of Hos. iv. 13. We may also suppose it to have been more particularly alluded to, from its being a tree yielding incense. 'They sacrifice upon the tops of the mountains, and burn incense upon the hills, under the terebinth and the storax trees, because the shadow thereof is good.'

PORCIUS FESTUS. [FESTUS.]
POSSESSION. [DEMONIACS.]

POTIPHAR (contract of Potipherah), an officer of Pharaoh, probably the chief of his body-guard (Gen. xxxix. 1). Of the Midianitish merchants he purchased Joseph, whose treatment by him is described under that head. The keeper of the prison into which the son of Jacob was eventually cast treated him with kindness, and confided to him the management of the prison; and this confidence was afterwards sanctioned by the 'captain of the guard' himself, as the officer responsible for the safe custody of prisoners of state. It is sometimes denied, but more usually maintained, that this 'captain of the guard' was the same with the Potiphar who is before designated by the same title. We believe that this 'captain of the guard' and Joseph's master were the same person. It would be in accordance with Oriental usage that offenders against the court, and the officers of the court, should be in custody of the captain of the guard; and that Potiphar should have treated Joseph well after having cast him into prison, is not irreconcilable with the facts of the case. After having imprisoned Joseph in the first transport of his choler, he might possibly discover circumstances which led him to doubt his guilt, if not to be convinced of his innocence. The mantle left in the hands of his mistress, and so triumphantly produced against him, would, when calmly considered, seem a stronger proof of guilt against her than against him: yet still, to avoid bringing dishonour upon his wife, and exposing her to new temptation, he may have deemed it more prudent to bestow upon his slave the command of the state prison, than to restore him to his former employment.

POTIPH'ERAH, the priest of On, or Heliopolis, whose daughter Azenath became the wife of Joseph [AZENATH]. The name is Egyptian, and means '*who belongs to the sun*.'

POTSHERD. Potsherd is figuratively used in Scripture to denote a thing worthless and insignificant (Ps. xxii. 15; Prov. xxvi. 23; Isa. xlv. 9). It may illustrate some of these allusions to remind the reader of the fact, that the sites of ancient towns are often covered at the surface with great quantities of broken pottery. The present writer has usually found this pottery to be of coarse texture, but coated and protected with a strong and bright-coloured glaze, mostly bluish-green, and sometimes yellow. These fragments give to some of the most venerable sites in the world the appearance of a deserted pottery rather than of a town. The fact is, however, that they occur only upon the sites of towns which were built with crude brick; and this suggests that the heaps of ruin into which these had fallen being disintegrated, and worn at the surface by the action of the weather, bring to view and leave ex-

posed the broken pottery, which is not liable to be thus dissolved and washed away. This explanation was suggested by the actual survey of such ruins; and we know not that a better has yet been offered in any other quarter. It is certainly remarkable that of the more mighty cities of old time, nothing but potsherds now remain visible at the surface of the ground.

Towns built with stone, or kiln-burnt bricks, do not exhibit this form of ruin, which is, therefore, not usually met with in Palestine.

POTTER. The potter, and the produce of his labours, are often alluded to in the Scriptures. The fragility of his wares, and the ease with which they are destroyed, supply apt emblems of the facility with which human life and power may be broken and destroyed. It is in this figurative use that the potter's vessels are most frequently noticed in Scripture (Ps. ii. 9; Isa. xxx. 14; Jer. xix. 11; Rev. ii. 27). In one place, the power of the potter to form with his clay, by

281. [Modern Egyptian Potter.]

the impulse of his will and hand, vessels either for honourable or for mean uses, is employed with great force by the apostle to illustrate the absolute power of God in moulding the destinies of men according to his pleasure (Rom. ix. 21). The first distinct mention of earthenware vessels is in the case of the pitchers in which Gideon's men concealed their lamps, and which they broke in pieces when they withdrew their lamps from them (Judg. vii. 16, 19). Pitchers and bottles are indeed mentioned earlier; but the 'bottle' which contained Hagar's water (Gen. xxi. 14, 15) was undoubtedly of skin; and although Rebekah's pitcher was possibly of earthenware (Gen. xxiv. 14, 15), we cannot be certain that it was so.

POTTER'S-FIELD. [ACELDAMA.]

PRÆTORIUM. This word denotes the general's tent in the field, and also the house or palace of the governor of a province, whether a prætor or not. In the Gospels it is applied to the palace built by Herod the Great, at Jerusalem, and which eventually became the residence of the Roman governors in that city (Matt. xxvii. 27; Mark xv. 16; John xviii. 28, 38; xix. 9). In the two first of these texts it may, however, denote the court in front of the palace, where the procurator's guards were stationed [JERUSALEM]. Herod built another palace at Cesarea, and this

also is called the *Prætorium* in Acts xxiii. 35, probably because it had, in like manner, become the residence of the Roman governor, whose headquarters were at *Cæsarea*. In Philipp. i. 13, the word denotes the *Prætorian* camp at Rome, i. e. the camp or quarters of the *Prætorian* cohort at Rome.

PRIEST, HIGH-PRIEST, &c. A priest may be defined as one who officiates or transacts with God on behalf of others stately, or for the occasion (Heb. v. 1).

The designation and call of Aaron and his sons to the priesthood are commanded in Exod. xxviii. 1; and holy garments to be made for Aaron, 'for glory and for beauty' (ver. 2), and for his sons (ver. 40), by persons originally skilful, and now also inspired for the purpose (ver. 3), the chief of whom were Bezaleel and Aholiab (xxxi. 2-6). As there were some garments common both to the priests and the high-priest, we shall begin with those of the former, taking them in the order in which they would be put on. 1. The first was 'linen-breeches,' or drawers (xxviii. 42). These were to be of fine twined linen, and to reach from the loins to the middle of the thighs. Such drawers were worn universally in Egypt. No

282. [Drawers and girdle.]

mention occurs of the use of drawers by any other class of persons in Israel except the priests, on whom it was enjoined for the sake of decency. 2. The coat of fine linen or cotton (Exod. xxxix. 27). This was worn by men in general (Gen. xxxvii. 3); also by women (2 Sam. xiii. 18; Cant. v. 3), next to the skin. It was to be of woven work. Josephus states that it reached down to the feet, and sat close to the body; and had sleeves, which were tied fast to the arms; and was girdled to the breast a little above the elbows by a girdle. It had a narrow aperture about the neck, and was tied with certain strings hanging down from the edge over the breast and back, and was fastened above each shoulder. But this garment, in the case of the priests and high-priest, was to be brodered (xxviii. 4), 'a brodered coat,' by which Gesenius understands a coat of cloth worked in checkers or cells. 3. The girdle (xxviii. 40). This was also worn by magistrates (Isa. xxii. 21). The girdle for the priests was to be made of fine twined linen, and blue, and

purple, and scarlet, of needlework (xxxix. 29). Josephus describes it as often going round, four fingers broad, but so loosely woven that it might be taken for the skin of a serpent; and that it was

283. [Girdle and tunic.]

embroidered with flowers of scarlet, and purple, and blue, but that the warp was nothing but linen. The mode of its hanging down is illustrated by the cut No. 285, where the girdle is also richly embroidered; while the imbricated appearance of the girdle may be seen very plainly in No. 282. The next cut, No. 283, of a priestly scribe of ancient Egypt, offers an interesting specimen of both tunic and girdle. 4. The bonnet, cap, or turban, (xxviii. 40). The bonnet was to be of fine linen (xxxix. 28). In the time of Josephus it was circular, covering about half the head, something like a crown, made of thick linen swathes doubled round many times, and sewed together, surrounded by a linen cover to hide the seams of the swathes, and sat so close that it would not fall off when the body was bent down (*Antiq.* iii. 7. 3). The dress of the high-priest was precisely the same with that of the common priests in all the foregoing particulars; in addition to which he had (1) a robe (xxviii. 4). This was

284. [Egyptian tunic.]

2 x 2

not a mantle, but a second and larger coat without sleeves; a kind of surtout worn by the laity, especially persons of distinction (Job. i. 20; ii. 12; by kings, 1 Sam. xv. 27; xviii. 4; xxiv. 5, 12). This garment, when intended for the high-priest, and then called 'the robe of the ephod,' was to be of one entire piece of woven work, all of blue, with an aperture for the neck in the middle of the upper part, having its rim strengthened and adorned with a border. The hem had a kind of fringe, composed of tassels, made of blue, purple, and scarlet, in the form of pomegranates; and between every two pomegranates there was a small golden bell, so that there was a bell and a pomegranate alternately all round (xxviii. 31-35). The use of these bells may have partly been, that by the high-priest shaking his garment at the time of his offering incense on the great day of expiation, &c., the people without might be apprised of it, and unite their prayers with it (comp. Eccles. xlv. 9; Luke i. 10; Acts x. 4; Rev. viii. 3, 4). Josephus describes this robe of the ephod as reaching to the feet, and consisting of one entire piece of woven-work, and parted where the hands came out (John xix. 23). He also states that it was tied round with a girdle, embroidered with the same colours as the former, with a mixture of gold interwoven (*Antiq.* iii. 7. 4). The fringe of bells and pomegranates seems to have been the priestly substitute for the fringe bound with a blue riband, which all the Israelites were commanded to wear. Many traces of this fringe occur in the Egyptian remains. (2.) The ephod (*Exod.* xxviii. 4). This was a short cloak covering the shoulders and breast. It is said to have been worn by Samuel while a youth minis-

285. [Ephod and girdle.]

tering before the Lord (1 Sam. ii. 18); by David, while engaged in religious service (2 Sam. vi. 14); and by inferior priests (1 Sam. xxii. 18). But in all these instances it is distinguished as a linen ephod, and was not a sacred but honorary vestment; but the ephod of the high-priest was to be made of gold, of blue, of purple, of scarlet, and fine twined linen, with cunning work. Though it probably consisted of one piece, woven throughout, it had a back part and a front part, united by

shoulder-pieces. It had also a girdle; or rather strings went out from each side and tied it to the body. On the top of each shoulder was to be an onyx stone, set in sockets of gold, each having engraven upon it six of the names of the children of Israel, according to the precedence of birth, to memorialize the Lord of the promises made to them (*Exod.* xxviii. 6-12, 29). Josephus gives sleeves to the ephod (*Antiq.* iii. 7. 5). It may be considered as a substitute for the leopard-skin worn by the Egyptian high-priests in their most sacred duties, as in No. 285, where the ephod appears no less plainly. Then came (3) the breastplate, a gorget, ten inches square, made of the same sort of cloth as the ephod, and doubled so as to form a kind of pouch or bag (*Exod.* xxxix. 9), in which was to be put the *URIM* and *THUMMIM*, which are also mentioned as if already known (xxviii. 30). The external part of this gorget was set with four rows of precious stones; the first row, a sardius, a topaz, and a carbuncle; the second, an emerald, a sapphire, and a diamond; the third, a ligure, an agate, and an amethyst; and the fourth, a beryl, an onyx, and a jasper,—set in a golden socket. Upon each of these stones was to be engraven the name of one of the sons of Jacob. In the ephod, in which there was a space left open sufficiently large for the admission of this pectoral, were four rings of gold, to which four others at the four corners of the breastplate corresponded; the two lower rings of the latter being fixed inside. It was confined to the ephod by means of dark blue ribands, which passed through these rings; and it was also suspended from the onyx stones on the shoulder by chains of gold, or rather cords of twisted gold threads, which were fastened at one end to two other larger rings fixed in the upper corners of the pectoral, and by the other end going round the onyx stones on the shoulders, and returning and being fixed in the larger ring. The breastplate was further kept in its place by a girdle, made of the same stuff, which Josephus says was sewed to the breastplate, and which, when it had gone once round, was tied again upon the seam and hung down. It appears in No. 287. 4. The remaining portion of dress peculiar to the high-priest was the mitre (xxviii. 4). The Bible says nothing of the difference between this and the turban of the common priests. It is, however, called by a different name. It was to be of fine linen (ver. 39). Josephus says it was the same in construction and figure with that of the common priest, but that above it there was another, with swathes of blue, embroidered, and round it was a golden crown, polished, of three rows, one above another, out of which rose a cup of gold, which resembled the calyx of the herb called by Greek botanists *hyoscyamus*. He ends a most laboured description by comparing the shape of it to a poppy (iii. 7. 6). Upon comparing his account of the bonnet of the priests with the mitre of the high-priests, it would appear that the latter was conical. The cut, No. 286, presents the principal forms of the mitres worn by the ancient priests of Egypt, and affords a substantial resemblance of that prescribed to the Jews, divested of idolatrous symbols, but which were displaced to make way for a simple plate of gold, bearing the inscription, 'Holiness to Jehovah.' This plate extended from one ear to the other, being bound to the forehead by strings

tied behind, and further secured in its position by a blue riband attached to the mitre (Exod. xxviii. 36-39; xxxix. 30; Lev. viii. 9). The

286. [Egyptian mitres.]

magnificent dress of the high-priest was not always worn by him. It was exchanged for one wholly of linen, and therefore white, though of similar construction, when on the day of expiation he entered into the Holy of Holies (Lev. xvi. 4, 23); and neither he nor the common priests wore their appropriate dress, except when officiating. The garments of the inferior priests appear to have been kept in the sacred treasury (Ezra ii. 69; Neh. vii. 70).

The next incident in the *history* is, that Moses receives a *command to consecrate Aaron* and his sons to the priests' office (Exod. xxviii. 41), with the following ceremonies. They were to be washed at the door of the tabernacle of the congregation (xxix. 4), where the altar of burnt offering stood (xl. 6, 29). Aaron was then robed in his pontifical garments (vers. 4-6), and anointed with a profusion of oil (ver. 7); whence he was called 'the priest that is anointed' (Lev. iv. 3, &c.; Ps. cxxxiii. 2). This last act was the peculiar and only distinguishing part of Aaron's consecration; for the anointing of his sons (xxx. 30) relates only to the unction (xxix. 31), by a mixture made of the blood of the sacrifice and of the anointing oil, which was sprinkled upon both Aaron and his sons, and upon their garments, as part of their consecration. Hence then Aaron received two unctions. In after-times the high-priest took an oath (Heb. vii. 23) to bind him, as the Jews say, to a strict adherence to established customs. The other details of this ceremony of consecration are all contained in one chapter (Exod. xxix.), to which we must be content to refer the reader. The entire ceremony lasted seven days, on each of which all the sacrifices were repeated (Lev. viii. 33), to which a promise was added, that God would sanctify Aaron and his sons, that is, declare them to be sanctified, which he did, by the appearance of his glory at their first sacrifice, and by the fire which descended and consumed their burnt-offerings (Lev. ix. 23, 24). Thus were Aaron and his sons and their descendants separated for ever, to the office of the priesthood, from all other Israelites. There was consequently no need of any further consecration for them or their descendants. The first-born son of Aaron succeeded him in the office, and the elder son among all his de-

scendants; a rule which, though deviated from in after-times, was ultimately resumed. The next successor was to be anointed and consecrated in his father's holy garments (ver. 29), which he must wear seven days when he went into the tabernacle of the congregation to minister (ver. 30; comp. Num. xx. 26-28; xxxv. 25), and make an atonement for all things and persons (Lev. xvi. 32-34), and for himself (comp. ver. 11), besides the offering (vi. 20-22). The common priests were required to prove their descent from Aaron. No age was prescribed for their entrance on their ministry, or retirement from it.

We shall now give a summary of the *duties and emoluments* of the high-priest and common priests respectively. Besides his lineal descent from Aaron, the high-priest was required to be free from every bodily blemish or defect (Lev. xxi. 16-23); but though thus incapacitated, yet, his other qualifications being sufficient, he might eat of the food appropriated to the priests (ver. 22). He must not marry a widow, nor a divorced woman, or profane, or that had been a harlot, but a virgin Israelitess (ver. 14). In Ezekiel's vision a general permission is given to the priests to marry a priest's widow (xlv. 22). The high-

287. [High-priest.]

priest might not observe the external signs of mourning for any person, or leave the sanctuary upon receiving intelligence of the death of even father or mother (ver. 10-12; comp. x. 7). Public calamities seem to have been an exception, for Joacim the high-priest, and the priests, in such circumstances ministered in sackcloth with ashes on their mitres (Judith iv. 14, 15; comp. Joel i. 13). He must not eat anything that died of itself, or was torn of beasts (Lev. xxii. 8); must wash his hands and feet when he went into the tabernacle of the congregation, and when he came near to the altar to minister (Exod. xxx. 19-21). At first Aaron was to burn incense on the golden altar every morning when he dressed the lamps, and every evening when he lighted them, but in

later times the common priest performed this duty (Luke i. 8, 9); to offer, as the Jews understand it, daily, morning and evening, the peculiar meat-offering he offered on the day of his consecration (Exod. xxix.); to perform the ceremonies of the great day of expiation (Lev. xvi.); to arrange the shew-bread every Sabbath, and to eat it in the holy place (xxiv. 9); must abstain from the holy things during his uncleanness (xxii. 1-3); also if he became leprous, or contracted uncleanness (ver. 4-7). If he committed a sin of ignorance he must offer a sin-offering for it (iv. 3-13); and so for the people (ver. 12-22); was to eat the remainder of the people's meat-offerings with the inferior priests in the holy place (vi. 16); to judge of the leprosy in the human body or garments (xiii. 2-59); to adjudicate legal questions (Deut. xvii. 12). Indeed, when there was no divinely inspired judge, the high-priest was the supreme ruler till the time of David, and again after the captivity. He must be present at the appointment of a new ruler or leader (Num. xxvii. 19), and ask counsel of the Lord for the ruler (ver. 21). Eleazar with others distributes the spoils taken from the Midianites (Num. xxxi. 21, 26). To the high-priest also belonged the appointment of a maintenance from the funds of the sanctuary to an incapacitated priest (1 Sam. ii. 36, margin). Besides these duties, peculiar to himself, he had others in common with the inferior priests. Thus, when the camp set forward, 'Aaron and his sons' were to take the tabernacle to pieces, to cover the various portions of it in cloths of various colours (iv. 5-15), and to appoint the Levites to their services in carrying them; to bless the people in the form prescribed (vi. 23-27), to be responsible for all official errors and negligences (xviii. 1), and to have the general charge of the sanctuary (ver. 5).

Emoluments of the High-Priest.—Neither the high-priest nor common priests received 'any inheritance' at the distribution of Canaan among the several tribes (Num. xviii. 20; Deut. xviii. 1, 2), but were maintained, with their families, upon certain fees, dues, perquisites, &c., arising from the public services, which they enjoyed as a common fund. Perhaps the only distinct prerogative of the high-priest was a tenth part of the tithes assigned to the Levites (Num. xviii. 28; comp. Neh. x. 38); but Josephus represents this also as a common fund (*Antiq.* iv. 4. 4).

Duties of the Priests.—Besides those duties already mentioned as common to them and the high-priests, they were required to prove their descent from Aaron, to be free from all bodily defect or blemish (Lev. xxi. 16-23); must not observe mourning, except for near relatives (xxi. 1-5); must not marry a woman that had been a harlot, or divorced, or profane. The priest's daughter who committed whoredom was to be burnt, as profaning her father (xxi. 9). The priests were to have the charge of the sanctuary and altar (Num. xviii. 5). The fire upon the altar, being once kindled (Lev. i. 7), the priests were always to keep it burning (vi. 13). In later times, and upon extraordinary occasions, at least, they flayed the burnt-offerings (2 Chron. xxix. 34), and killed the Passover (Ezra vi. 20). They were to receive the blood of the burnt-offerings in basins (Exod. xxiv. 6), and sprinkle it round about the altar, arrange the wood and the fire,

and to burn the parts of the sacrifices (Lev. i. 5-10). If the burnt-sacrifice were of doves, the priest was to nip off the head with his finger-nail, squeeze out the blood on the edge of the altar, pluck off the feathers, and throw them with the crop into the ash-pit, divide it down the wings, and then completely burn it (ver. 15-17). He was to offer a lamb every morning and evening (Num. xxviii. 3), and a double number on the Sabbath (ver. 9), the burnt-offerings ordered at the beginning of months (ver. 11), and the same on the Feast of Unleavened Bread (ver. 19), and on the day of the First Fruits (ver. 26); to receive the meat-offering of the offerer, bring it to the altar, take of it a memorial, and burn it upon the altar (Lev. ii.); to sprinkle the blood of the peace-offerings upon the altar round about, and then to offer of it a burnt-offering (iii.); to offer the sin-offering for a sin of ignorance in a ruler or any of the common people (iv. 22-25); to eat the sin-offering in the holy-place (vi. 26; comp. x. 16-18); to offer the trespass-offering (ver. 6-19; vi. 6, 7), to sprinkle its blood round about the altar (vii. 2), to eat of it, &c. (ver. 6); to eat of the shew-bread in the holy place (xxiv. 9); to offer for the purification of women after child-birth (xii. 6, 7); to judge of the leprosy in the human body or garments; to decide when the leper was cleansed, and to order a sacrifice for him (xiv. 3, 4); to administer the rites used at pronouncing him clean (ver. 6, 7); to present him and his offering before the Lord, and to make an atonement for him (ver. 10-32); to judge of the leprosy in a house (xiv. 33-47), to decide when it was clean (ver. 48), and to make an atonement for it (ver. 49-53); to make an atonement for men cleansed from an issue of uncleanness (xv. 14, 15), and for women (ver. 29, 30); to offer the sheaf of First Fruits (xxiii. 10, 11); to estimate the commutation in money for persons in cases of a singular or extraordinary vow (xxvii. 8), or for any devoted unclean beast (ver. 11, 12), or for a house (ver. 14), or field (xxvii. 23); to conduct the ordeal of the bitter water (Num. v. 12-31); to make an atonement for a Nazirite who had accidentally contracted uncleanness (vi. 13); to offer his offering when the days of his separation were fulfilled (ver. 14, 16); to blow with the silver trumpets on all occasions appointed (vi. 13-17), and ultimately at morning and evening service (1 Chron. xvi. 6); to make an atonement for the people and individuals in case of erroneous worship (Num. xv. 15, 24, 25, 27); to make the ointment of spices (1 Chron. ix. 30); to prepare the water of separation (Num. xix. 1-11); to act as assessors in judicial proceedings (Deut. xvii. 9; xix. 7); to encourage the army when going to battle, and probably to furnish the officers with the speech (ver. 5-9); to superintend the expiation of an uncertain murder (xxi. 5), and to have charge of the law (xxxi. 9).

Christians are figuratively called priests (Re. i. 6; xx. 6). The student will observe the important distinction, that the term 'priest,' with which term the idea of a sacrifice was always connected in ancient times, is never applied to the pastor of the Christian church.

PRISCILLA. [PRISCILLA.]

PRISCILLA, or PRISCA, wife of Aquila, and probably, like Phæbe, a deaconess. She shared the travels, labours, and dangers of her husband,

and is always named along with him (Rom. xvi. 3; 1 Cor. xvi. 19; 2 Tim. iv. 19) [AQUILA].

PRISON. [PUNISHMENT.]

PRIZE. [GAMES.]

PROCHORUS, one of the seven first deacons of the Christian church (Acts vi. 5). Nothing is known of him.

PROCONSUL, a Roman officer appointed to the government of a province with consular authority. He was chosen out of the body of the senate; and it was customary, when any one's consulate expired, to send him as a proconsul into some province. He enjoyed the same honour with the consul, but was allowed only six lictors with the fasces before him.

The proconsuls decided cases of equity and justice, either privately in their palaces, where they received petitions, heard complaints, and granted writs under their seals; or publicly in the common hall, with the formalities generally observed in the courts at Rome. These duties were, however, more frequently delegated to their assessors, or other judges of their own appointment. As the proconsuls had also the direction of justice, of war, and of the revenues, these departments were administered by their lieutenants, or *legati*, who were usually nominated by the senate. The office of the proconsuls lasted generally for one year only, and the expense of their journeys to and from their provinces was defrayed by the public. After the partition of the provinces between Augustus and the people, those who presided over the provinces of the latter were especially designated proconsuls, for whom it appears to have been customary to decree temples. Livy (viii. and xxvi.) mentions two other classes of proconsuls: those who, being consuls, had their office continued beyond the time appointed by law; and those who, being previously in a private station, were invested with this honour, either for the government of provinces, or to command in war. Some were created proconsuls by the senate without being appointed to any province, merely to command in the army, and to take charge of the military discipline; others were allowed to enter upon their proconsular office before being admitted to the consulship, but having that honour in reserve.

When the Apostle Paul was at Corinth, he was brought before Gallio, the proconsul of Achaia, one of the provinces of Greece, of which Corinth was the chief city, and arraigned by the Jews as one who 'persuadeth men to worship God contrary to the law' (Acts xviii. 13); but Gallio refused to act as a judge of such matters, and 'drove them from the judgment-seat' (ver. 16).

PROGNOSTICATORS. The phrase 'monthly prognosticators' occurs in the Authorized Version of Isa. xlvii. 13, where the prophet is enumerating the astrological superstitions of the Chaldeans. The original might perhaps be more exactly rendered, as by Dr. Henderson, 'prognosticators at the new moons.' It is known that the Chaldean astrologers professed to divine future events by the positions, aspects, and appearances of the stars, which they regarded as having great influence on the affairs of men and kingdoms; and it would seem, from the present text, that they put forth accounts of the events which might be expected to occur from month to month, like our old almanac-makers. Some carry the

analogy further, and suppose that they also gave monthly tables of the weather; but *such* prognostications are only cared for in climates where the weather is uncertain and variable; while in Chaldaea, where (as we know from actual experience) the seasons are remarkably regular in their duration and recurrence, and where variations of the usual course of the weather are all but unknown, no prognosticator would gain much honour by foretelling what every peasant knows.

PROPHECY. The principal considerations involved in this important subject may be arranged under the following heads:—

1. *The nature of Prophecy, and its position in the economy of the Old Testament.*—Divine inspiration is only the general basis of the prophetic office, to which two more elements must be added:—

1. Inspiration was imparted to the prophets in a *peculiar form*. This appears decisively from Num. xii. 6, &c., which states it as characteristic of the prophet, that he obtained divine inspiration in *visions and dreams*, consequently in a state different from that in which inspirations were conveyed to Moses and the apostles.

2. Generally speaking, every one was a prophet to whom God communicated his mind in this peculiar manner. When the Mosaic economy had been established, a new element was added; the prophetic gift was after that time regularly connected with the prophetic office, so that the latter came to form part of the idea of a prophet. Speaking of office, we do not of course mean one conferred by men, but by God; the mission to Israel, with which the certainty of a continued, not temporary, grant of the *donum propheticum* was connected.

That the Lord would send such prophets was promised to the people by Moses, who by a special law (Deut. xviii. 1) secured them authority and safety. As his ordinary servants and teachers, God appointed the Priests: the characteristic mark which distinguished the prophets from them was inspiration; and this explains the circumstance that, in times of great moral and religious corruption, when the ordinary means no longer sufficed to reclaim the people, the number of prophets increased. The regular religious instruction of the people was no part of the business of the prophets: their proper duty was only to rouse and excite. In this point, however, there was a difference between the kingdom of Israel and the kingdom of Judah. In the latter the agency of the prophets was only subsidiary to that of the regular servants of God, the priests and the Levites. But in the former the prophets were the regular servants of God, for the priesthood there had no divine sanction, and was corrupt in its very source. With the office of the prophets therefore all stood or fell, and hence they were required to do many things besides what the original conception of the office of a prophet implied.

In their labours, as respected their own times, the prophets were strictly bound to the Mosaic law, and not allowed to add to it or to diminish ought from it; what was said in this respect to the whole people (Deut. iv. 2; xiii. 1) applied also to them. We find, therefore, prophecy always takes its ground on the Mosaic law, to which it refers, from which it derives its sanction, and

with which it is fully impressed and saturated. They were indeed commissioned to foretell days when a new covenant will be made with the house of Israel and with the house of Judah (Jer. xxxi. 31.). But for their own times they never once dreamt of altering any, even the minutest and least essential precept, even as to its form; how much less as to its spirit, which even the Lord himself declares (Matt. v. 18) to be immutable and eternal.

As to prophecy in its circumscribed sense, or the foretelling of future events by the prophets, some expositors would explain all predictions of special events; while others assert that no prediction contains anything but general promises or threatenings, and that the prophets knew nothing of the particular manner in which their predictions might be realized. Both these classes deviate from the correct view of prophecy; the former resort often to the most arbitrary interpretations, and the latter are opposed by a mass of facts against which they are unable successfully to contend.

Some interpreters, misunderstanding passages like Jer. xviii. 8; xxvi. 13, have asserted that all prophecies were conditional; and have even maintained that their revocability distinguished the true predictions from soothsaying. But beyond all doubt, when the prophet denounces the divine judgments, he proceeds on the assumption that the people will not repent, an assumption which he knows from God to be true. Were the people to repent, the prediction would fail; but because they will not, it is uttered *absolutely*. It does not follow, however, that the prophet's warnings and exhortations are useless. These serve 'for a witness against them'; and besides, amid the ruin of the mass, individuals might be saved. Viewing prophecies as conditional predictions nullifies them.

The sphere of action of the prophets was limited to Israel. Many predictions of the Old Testament concern, indeed, the events of foreign nations, but they are always uttered and written with reference to Israel, and the prophets thought not of publishing them among the heathens themselves.

II. *Duration of the Prophetic office.*—Although we meet with cases of prophesying as early as the age of the patriarchs, still the roots of prophetism among Israel are properly fixed in the Mosaic economy. The main business of Moses was not that of a prophet, but he was occasionally commissioned to foretell what was to befall Israel in the latter days, and he instilled into the congregation of Israel those truths which form the foundation of prophecy, and thus prepared the ground from which it could spring up. In the age of the Judges, prophecy, though existing only in scattered instances, exerted a powerful influence. From this time to the Babylonian exile, there happened hardly any important event in which the prophets did not appear as performing the leading part. About a hundred years after the return from the Babylonian exile, the prophetic profession ceased. The Jewish tradition uniformly states that Haggai, Zechariah, and Malachi were the last prophets.

III. *Manner of Life of the Prophets.*—The prophets went about poorly and coarsely dressed (2 Kings i. 8), not as a mere piece of asceticism,

but that their very apparel might teach what the people ought to do. Generally the prophets were not anxious of attracting notice by ostentatious display; nor did they seek worldly wealth, most of them living in poverty and even want (1 Kings xiv. 3; 2 Kings iv. 1). Insult, persecution, imprisonment, and death, were often the reward of their godly life. Repudiated by the world in which they were aliens, they typified the life of Him whose appearance they announced, and whose spirit dwelt in them. The prophets addressed the people of both kingdoms: they were not confined to particular places, but prophesied where it was required. For this reason they were most numerous in capital towns, especially in Jerusalem, where they generally spoke in the temple. Sometimes their advice was asked, and then their prophecies take the form of answers to questions submitted to them (Isa. xxxvii., Ez. xx., Zech. vii.). But much more frequently they felt themselves inwardly moved to address the people without their advice having been asked, and they were not afraid to stand forward in places where their appearance, perhaps, produced indignation and terror. Whatever lay within or around the sphere of religion and morals, formed the object of their care. Priests, princes, kings, all must hear them—must, however reluctantly, allow them to perform their calling as long as they spoke in the name of the true God, and as long as the result did not disprove their pretensions to be the servants of the invisible King of Israel (Jer. xxxvii. 15-21). There were institutions for training prophets; the senior members instructed a number of pupils and directed them. These schools had been first established by Samuel (1 Sam. x. 8; xix. 19); and at a later time there were such institutions in different places, as Bethel and Gilgal (2 Kings ii. 3; iv. 38; vi. 1). The pupils of the prophets lived in fellowship united, and were called 'sons of the prophets'; whilst the senior or experienced prophets were considered as their spiritual parents, and were styled fathers (comp. 2 Kings ii. 12; vi. 21). Samuel, Elijah, and Elisha, are mentioned as principals of such institutions. From them the Lord generally chose his instruments. Amos relates of himself (vii. 14, 15), as a thing uncommon, that he had been trained in no school of prophets, but was a herdsman, when the Lord took him to prophesy unto the people of Israel. At the same time, this example shows that the bestowal of prophetic gifts was not limited to the schools of the prophets. Women also might come forward as prophetesses, as instanced in Miriam, Deborah, and Huldah, though such cases are of comparatively rare occurrence. We should also observe, that only as regards the kingdom of Israel we have express accounts of the continuance of the schools of prophets. What is recorded of them is not directly applicable to the kingdom of Judah, especially since, as stated above, prophecy had in it an essentially different position. We cannot assume that the organization and regulations of the schools of the prophets in the kingdom of Judah should have been as settled and established as in the kingdom of Israel. The prophets of the kingdom of Israel stood in a hostile position to the priests. These points of difference in the situation of the prophets of the two kingdoms must not be lost sight of; and we further add, that prophecy in the

kingdom of Israel was much more connected with extraordinary events than in the kingdom of Judah: the history of the latter offers no prophetic deeds equalling those of Elijah and Elisha.

IV. *Symbolic Actions of the Prophets.*—In the midst of the prophetic declarations symbolic actions are often mentioned, which the prophets had to perform. The opinions of interpreters on these are divided. Some assert that they always, at least generally, were really done; others assert that they had existence only in the mind of the prophets, and formed part of their visions. The latter view, which was espoused by Calvin, is probably the correct one. Some of the symbolic actions prescribed to the prophets could not have been performed by them (Ezek. ii. 9; iii. 2, 3; iv. 4-8); others are inconsistent with decorum (Hos. i. 2-11; Ezek. iv. 12-15). These are therefore to be regarded as internal, not external facts.

V. *Criteria by which True and False Prophets were distinguished.*—As Moses had foretold, a host of false prophets arose in later times among the people, who promised prosperity without repentance, and preached the Gospel without the law. But how were the people to distinguish true and false prophets? In the law concerning prophets (Deut. xviii. 20; comp. xiii. 7-9), the following enactments are contained.

1. The prophet *who speaks in the name of other Gods* is to be considered as false, and to be punished capitally.

2. The same punishment is to be inflicted on him who speaks in the name of the true God, but whose predictions are not accomplished.

3. From the above two criteria of a true prophet, flows the third, that *his addresses must be in strict accordance with the law.*

4. In the above is also founded the fourth criterion, that *a true prophet must not promise prosperity without repentance*; and that he is a false prophet, 'of the deceit of his own heart,' who does not reprove the sins of the people, and who does not inculcate on them the doctrines of divine justice and retribution.

In addition to these negative criteria, there were positive ones to procure authority to true prophets. First of all, it must be assumed that the prophets themselves received, along with the divine revelations, assurance that these were really divine. Now, when the prophets themselves were convinced of their divine mission, they could in various ways prove it to others, whom they were called on to enlighten.

(a.) To those who had any sense of truth, the Spirit of God gave evidence that the prophecies were divinely inspired.

(b.) The prophets themselves utter their firm conviction that they act and speak by divine authority, not of their own accord. Their pious life bore testimony to their being worthy of a nearer communion with God, and defended them from the suspicion of intentional deception; their sobriety of mind distinguished them from all fanatics, and defended them from the suspicion of self-delusion; their fortitude in suffering for truth proved that they had their commission from no human authority.

(c.) Part of the predictions of the prophets referred to proximate events, and their accomplishment was divine evidence of their divine origin.

(See 1 Sam. iii. 19; Isa. xxxvii. 21, sq.; Jer. xxii. 11, 12; Ezek. xii. 12, 13; xxiv.) Whoever had been once favoured with such a testimonial, his authority was established for his whole life.

(d.) Sometimes the divine mission of the prophets was also proved by miracles, but this occurred only at important crises, when the existence of the kingdom of Israel was in jeopardy, as in the age of Elijah and Elisha.

VI. *Promulgation of the Prophetic Declarations.*—Usually the prophets promulgated their visions in public places before the congregated people. Still some portions of the prophetic books, as the entire second part of Isaiah and the description of the new temple (Ezek. xl. xlviii.), probably were never communicated orally. In other cases the prophetic addresses, first delivered orally, were next, when committed to writing, revised and improved. Especially the books of the lesser prophets consist, for the greater part, not of separate predictions, independent of each other, but form, as they now are, a whole, that is, give the quintessence of the prophetic labours of their authors. There is evidence to prove that the later prophets sedulously read the writings of the earlier, and that a prophetic canon existed before the present was formed. Zechariah explicitly alludes to writings of former prophets; 'to the words which the Lord has spoken to earlier prophets, when Jerusalem was inhabited and in prosperity' (Zech. i. 4; vii. 7, 12). In consequence of the prophets being considered as organs of God, much care was bestowed on the preservation of their publications. Ewald himself, though he thinks that a great number of prophetic compositions has been lost, cannot refrain from observing (p. 56), 'We have in Jer. xxvi. 1-19 a clear proof of the exact knowledge which the better classes of the people had of all that had, a hundred years before, happened to a prophet, of his words, misfortunes, and accidents.'

The collectors of the Canon arranged the prophets chronologically, but considered the whole of the twelve lesser prophets as one work, which they placed after Jeremiah and Ezekiel, inasmuch as the three last lesser prophets lived later than they. The collection of the lesser prophets themselves was again chronologically disposed; still Hosea is, on account of the extent of his work, allowed precedence before those lesser prophets, who, generally, were his contemporaries, and also before those who flourished at a somewhat earlier period.

PROSELYTE, the name applied in the New Testament and the Septuagint to converts from heathenism to Judaism. In the Old Testament such persons are called *strangers* and *settlers*. For the reception and treatment of these, provision was made in the law of Moses (Exod. xii. 48; Lev. xvii. 8; Num. xv. 15, &c.); and the whole Jewish state was considered as composed of the two classes, Jews, and strangers within their gates, or proselytes. In later years this distinction was observed even to the second generation.

It has been customary to make a distinction between two classes of Jewish proselytes, the one denominated proselytes of the gate, and the other proselytes of the covenant, or of righteousness. Under the former have been included those converts from heathenism who had so far renounced idolatry as to become worshippers of the one God,

and to observe, generally, what have been called the seven Noachic precepts, viz., against idolatry, profanity, incest, murder, dishonesty, eating blood, or things strangled, and allowing a murderer to live, but had not formally enrolled themselves in the Jewish state. The latter is composed of those who had submitted to circumcision, and in all respects become converts to Judaism. The accuracy of this distinction, however, has been called in question by several, especially by Lardner, whose arguments appear decisive of the question (*Works*, vol. vi. pp. 522-533; vol. xi. pp. 313-324, 8vo. edit. 1788). That there were, in later times especially, many among the Jews who had renounced the grosser parts of heathenism without having come over entirely to Judaism, is beyond all doubt; but that these were ever counted *proselytes* admits of question. Certain it is that the proselytes mentioned in the New Testament were all persons who had received circumcision, and entered the pale of the Jewish community.

The rites by which a proselyte was initiated are declared by the Rabbins to have been, in the case of a man, *three, viz., circumcision, baptism, and a free-will sacrifice*. In the case of a woman the first was of necessity omitted. As to the first and last of these, their claim to be regarded as accordant with the ancient practice of the Jews has been on all hands admitted without scruple; but it has been matter of keen question whether the second can be admitted to have been practised before the Christian era. The substance of much learned discussion on this head we shall attempt summarily to state.

There is no *direct* evidence that this rite was practised by the Jews before the second or third century of the Christian era; but the fact that it was practised by them then necessitates the inquiry: when and how did such a custom arise among them? That they borrowed it from the Christians is an opinion which cannot be for a moment admitted by any who reflect on the implacable hatred with which the Jews for many centuries regarded Christianity, its ordinances, and its professors. Some learned men have adopted the notion that the custom of baptizing proselytes arose gradually out of the habit which the Jews had of purifying by ablution whatever they deemed unclean, and that it was not formally adopted as an initiatory rite till after the destruction of the temple service, and when in consequence of imperial edicts it became difficult to circumcise converts. But as the Rabbins prescribed *both* baptism and circumcision as initiatory rites for proselytes, it is manifestly absurd to say that the former was instituted in consequence of the difficulty of performing the latter. And this hypothesis still leaves unremoved the master difficulty of that side of the question which it is designed to support, viz., the great improbability of the Jews adopting for the first time subsequently to the death of Christ, a religious rite which was well known to be the initiatory rite of Christianity. On the other hand we have, in favour of the hypothesis that proselyte baptism was practised anterior to the time of our Lord, some strongly corroborative evidence. We have, in the first place, the unanimous tradition of the Jewish Rabbins, who impute to the practice an antiquity commensurate almost with that of their nation. 2dly. We have the fact that the Baptism

of John the Baptist was not regarded by the people as aught of a novelty, nor was represented by him as resting for its authority upon any special divine relation. 3dly. We have the fact that the Pharisees looked upon the baptism both of John and Jesus as a mode of proselyting men to their religious views (John iv. 1-3), and that the disputes between the Jews and some of John's disciples about purifying was apparently a dispute as to the competing claims of John and Jesus to make proselytes (John iii. 25, sq.). 4thly. We have the fact, that on the day of Pentecost Peter addressed to a multitude of persons collected from several different and distant countries, Jews and proselytes, an exhortation to 'Repent and be baptized' (Acts ii. 38), from which it may be fairly inferred that they all knew what baptism meant, and also its connection with repentance or a change of religious views. 5thly. We have the fact that, according to Josephus, the Essenes were in the habit, before admitting a new convert into their society, solemnly and ritually to purify him with waters of cleansing, a statement which cannot be understood of their ordinary ablutions before meals, for Josephus expressly adds, that even after this lustration two years had to elapse before the neophyte enjoyed the privilege of living with the proficients. And, 6thly. We have the mode in which Josephus speaks of the baptism of John, when, after referring to John's having exhorted the people to virtue, righteousness, and godliness, as preparatory to baptism, he adds, 'For it appeared to him that baptism was admissible not when they used it for obtaining forgiveness of some sins, but for the purification of the body when the soul had been already cleansed by righteousness' (*Antiq.* xviii. 5, 2); which seems to indicate the conviction of the historian that John did not introduce this rite, but only gave to it a peculiar meaning.

On these grounds we adhere to the opinion that proselyte baptism was known as a Jewish rite anterior to the birth of Christ.

From the time of the Maccabees the desire to make proselytes prevailed among the Jews to a very great extent, especially on the part of the Pharisees, whose intemperate zeal for this object our Lord pointedly rebuked (Matt. xxiii. 15). The greater part of their converts were females, which has been ascribed to the dislike of the males to submit to circumcision. Josephus tells us that the Jews at Antioch were continually converting great numbers of the Greeks, and that nearly all the women at Damascus were attached to Judaism.

PROSEUCHA, a word signifying 'prayer,' and always so translated in the Auth. Version. It is, however, applied, *per meton.*, to a place of prayer,—a place where assemblies for prayer were held, whether a building or not. In this sense it seems also to be mentioned in Luke vi. 12, where the words rendered by our translators, 'in prayer to God,' might rather signify, 'in an oratory of God,' or a place that was devoted to his service, especially for prayer. In the same sense the phrase must, still more certainly, be understood in Acts xvi. 13, where the Syriac has, 'because there was perceived to be a house of prayer;' and the Arabic, 'a certain place which was supposed to be a place of prayer.'

That there really were such places of devotion

among the Jews is unquestionable. They were mostly outside those towns in which there were no synagogues, because the laws or their administrators would not admit any. They appear to have been usually situated near a river, or the sea-shore, for the convenience of ablution (Joseph. *Antiq.* xiv. 10, 23). Sometimes the *proseucha* was a large building, as that at Tiberias (*l. c.* § 54), so that the name was sometimes applied even to synagogues. But, for the most part, the *proseuchæ* appear to have been places in the open air, in a grove, or in shrubberies, or even under a tree, although always, as we may presume, near water, for the convenience of those ablutions which with the Jews always preceded prayer.

PROVERBS, THE BOOK OF. That Solomon was the author of the Book of Proverbs has never been questioned. Some have indeed thought that he composed a part only of the Proverbs included in that book, and collected the others from various sources. It is probable, indeed, that he availed himself of any sayings already current which he regarded as useful and important. Whether he ever made any collection of his proverbs in writing is, however, doubtful. From the twenty-fifth chapter to the end, we are expressly informed, was written out and added to the previous portion, by order of King Hezekiah. The divine authority of the book is sufficiently proved by the quotations made from it in the New Testament (Rom. xii. 16; Heb. xii. 5, 6; 1 Pet. iv. 8; 1 Thess. v. 15).

The characteristics of the proverbial style (in the more restricted sense of the word) are, according to Bishop Lowth, 1. Brevity; 2. Obscurity; 3. Elegance. The first of these is, however, the only one that can be considered as all universal. Many of the Proverbs of Solomon can hardly lay claim to elegance, according to the most liberal application of the term, and comparatively few of them are at all obscure as to meaning. The same remark applies with even greater force to the proverbs of every-day life, *e. g.* *Time and tide tarry for no man. Haste makes waste. Make hay while the sun shines. A fool and his money are soon parted.* We should be rather inclined to name, as a characteristic of the proverb, a pointed and sometimes antithetical form of expression; and this, in addition to brevity or sententiousness, constitutes perhaps the only universal distinction of this species of composition. Conciseness indeed enters into the very essence of the proverb.

We were about to adduce examples from the book of Proverbs, of these two excellencies—sententiousness and point—but it is impossible to select, where almost every verse is an illustration. Nor should it be forgotten that the structure of the Hebrew language admits of a much higher degree of excellence in this particular than is possible in the English tongue. We give two examples taken at random. '*A man's heart deviseth his way: but the Lord directeth his steps.*' Here are twelve words; in the original seven only are employed. '*When a man's ways please the Lord, he maketh even his enemies to be at peace with him.*' Eighteen words; in the Hebrew eight.

From its brevity, its appositeness, and its epigrammatic point, a proverb once heard remains fixed in the memory. Like an outline sketch

which pleases more than a finished drawing, because it leaves more to the imagination, a proverb is peculiarly fitted to impress the mind, because it suggests more than it expresses. The same effect is produced by the obscurity observable in some proverbs; an obscurity consequent in part on their sententiousness, and in part on their figurative dress.

But Solomon must have had other reasons for selecting it, peculiar to the age and country in which he lived. The Hebrews have been called a nation of children. The mode of teaching by aphorisms is especially adapted to men in an early stage of culture, who have not yet learned to arrange and connect their various *knowledge*s into a system. Accordingly we find this mode of writing employed in the most remote ages; and *wise sayings*, maxims, apophthegms, constitute a large part of the early literature of most nations. Especially is this true of the Oriental nations. The fondness of the people of the East for parables, enigmas, allegories, and pithy sayings, has itself become a proverb.

As an example of the former we may refer to Prov. ii. 1-5, and of the latter to Prov. x. 27-29.

The first nine chapters of the book of Proverbs are remarkably distinguished from the remainder, and form a continuous discourse, written in the highest style of poetry, adorned with apt and beautiful illustrations, and with various and striking figures.

At the tenth chapter a different style commences. From ch. x. to ch. xxii. 17, is a series of pithy disconnected maxims, on various subjects, and applicable to the most diverse situation. From ch. xxii. 17 to ch. xxv, a style resembling that of the exordium, though inferior in elegance and sublimity, prevails; and at the twenty-fifth chapter the separate maxims recommence. These compose the remainder of the book, with the exception of the thirtieth chapter, which is ascribed to Agur, and the thirty-first, which is said to be the advice given to king Lemuel by his mother. Who these persons are is not known. The supposition that Lemuel is another name of Solomon does not appear to be supported by proof.

The thirtieth chapter affords an example of another species of writing, closely allied to the proverb, and equally in favour among the Orientals. It is that of riddles or enigmas, designed to exercise the wit and ingenuity of the hearer, and to impart instruction through the medium of amusement.

The concluding chapter, containing the counsels addressed to King Lemuel by his mother, needs no elucidation. It presents a beautiful picture of female excellence in an age and country where modesty, industry, submission, and the domestic and matronly virtues, were esteemed the only appropriate ornaments of woman.

If we turn our attention to the maxims which compose the greater part of the book of Proverbs, we shall find enough to excite our wonder and admiration. Here are not only the results of the profoundest human sagacity, the counsels and admonitions of the man who excelled in wisdom all who went before, and all who came after him, but of such a man writing under divine inspiration. And how numerous, how various how profound, how important are his instructions!

These directions are adapted to the wants of

every class and rank of men, and to every relation of life. The rich and the poor, the learned and the ignorant, the master and the servant, the monarch and the subject, may here find the counsels they need. 'Apples of gold in baskets of silver' are fit emblems of such prudent and wholesome counsels, clothed in such an attractive garb.

PROVIDENCE. The word Providence originally meant *foresight*. By a well-known figure of speech, called metonymy, we use a word denoting the means by which we accomplish anything to denote the end accomplished; we exercise care over anything by means of foresight, and indicate that care by the word foresight. On the same principle the word Providence is used to signify the care God takes of the universe. As to its inherent nature, it is the power which God exerts, without intermission, in and upon all the works of his hands. But defined as to its visible manifestations, it is God's preservation and government of all things. As a thing is known by its opposites, the meaning of Providence is elucidated by considering that it is opposed to fortune and fortuitous accidents.

Providence, considered in reference to all things existing, is termed by Knapp *universal*; in reference to moral beings, *special*; and in reference to holy or converted beings, *particular*.

Providence is usually divided into three divine acts: preservation, co-operation, and government. 1. By preservation is signified the causing of existence to continue. 2. Co-operation is the act of God which causes the powers of created things to remain in being. 3. Government, as a branch of Providence, is God's controlling all created things so as to promote the highest good of the whole.

Among the *proofs* of divine Providence may be reckoned the following:—One argument in proof of Providence is analogous to one mode of proving a *creation*. If we cannot account for the existence of the world without supposing its coming into existence, or beginning to be; no more can we account for the world *continuing* to exist, without supposing it to be *preserved*; for it is as evidently absurd to suppose any creature *prolonging* as *producing* its own being.

A *second* proof of Providence results from the admitted fact of *creation*. Whoever has made any piece of mechanism, therefore takes pains to preserve it. Parental affection moves those who have given birth to children to provide for their sustentation and education. It is both reasonable and Scriptural to contemplate God as sustaining the universe because he made it.

A *third* proof of Providence is found in the *divine perfections*. Since, among the divine perfections, are all power and all knowledge, the non-existence of Providence, if there be none, must result from a want of will in God. But no want of will to exercise a Providence can exist, for God wills whatever is for the good of the universe, and for his own glory; to either of which a Providence is clearly indispensable. God therefore has resolved to exercise his power and knowledge so as to subserve the best ends with his creation.

A *fourth* proof of God's Providence appears in the order which *prevails* in the universe. That summer and winter, seed-time and harvest, cold and heat, day and night, are fixed by a law, was

obvious even to men who never heard of God's covenant with Noah. But our sense of order is keenest where we discern it in apparent confusion. The motions of the heavenly bodies are eccentric and interwolved, yet are most regular when they seem most lawless. They were therefore compared by the earliest astronomers to the discords which blend in a harmony, and to the wild starts which often heighten the graces of a dance. Modern astronomy has revealed to us so much miraculous symmetry in celestial phenomena, that it shows us far more decisive proofs of a Ruler seated on the circle of the heavens, than were vouchsafed to the ancients.

A *fifth* proof of a Providence is furnished by the fact that so many men are here rewarded and punished according to a righteous law. The wicked often feel compunctious visitings in the midst of their sins, or smart under the rod of civil justice, or are tortured with natural evils. With the righteous all things are in general reversed. The miser and envious are punished as soon as they begin to commit their respective sins; and some virtues are their own present reward. But we would not dissemble that we are here met with important objections, although infinitely less, even though they were unanswerable, than beset such as would reject the doctrine of Providence. It is said, and we grant, that the righteous are trodden under foot, and the vilest men exalted; that the race is not to the swift, nor the battle to the strong; that virtue starves while vice is fed; and that schemes for doing good are frustrated, while evil plots succeed. But we may reply, 1. The prosperity of the wicked is often apparent, and well styled a *shining misery*. 2. We are often mistaken in calling such or such an afflicted man good, and such or such a prosperous man bad. 3. The miseries of good men are generally occasioned by their own fault, since they have been so foolishly as to run counter to the laws by which God acts, or have aimed at certain ends while neglecting the appropriate means. 4. Many virtues are proved and augmented by trials, and not only proved, but produced, so that they would have had no existence without them. 5. The unequal distribution of good and evil, so far as it exists, carries our thoughts forward to the last judgment, and a retribution according to the deeds done in the body, and can hardly fail of throwing round the idea of eternity a stronger air of reality than it might otherwise wear. All perplexity vanishes as we reflect that, 'He cometh to judge the earth.' 6. Even if we limit our views to this world, but extend them to all our acquaintance, we cannot doubt that the *tendencies*, though not always the effects, of vice are to misery, and those of virtue to happiness. These tendencies are especially clear if our view embraces a whole lifetime, and the clearer the longer the period we embrace. Indeed, as soon as we leave what is immediately before our eyes, and glance at the annals of the world, we behold so many manifestations of God, that we may adduce as

A *sixth* proof of Providence the *facts of history*. The giving and transmission of a revelation, it has been justly said,—the founding of religious institutions, as the Mosaic and the Christian,—the raising up of prophets, apostles, and defenders of the faith,—the ordering of particular events,

such as the Reformation,—the more remarkable deliverances noticed in the lives of those devoted to the good of the world, &c.—all indicate the wise and benevolent care of God over the human family. But the historical proof of a Providence is perhaps strongest where the wrath of man has been made to praise God, or where efforts to dishonour God have been constrained to do him honour.

As a *seventh* ground for believing in Providence, it may be said that Providence is the necessary basis of all religion. For what is religion? One of the best definitions calls it the belief in a superhuman Power, which has great influence in human affairs, and ought therefore to be worshipped. But take away this influence in human affairs, and you cut off all motive to worship. To the same purpose is the text in Hebrews: 'He that cometh to God must believe that he is, and that he is a rewarder of such as diligently seek him.' If then the religious sentiments thrill us not in vain,—if all attempts of all men to commune with God have not always and everywhere been idle,—there must be a Providence.

In the *eighth* place, we may advert to the proof of Providence from the common consent of mankind, with the single exception of atheists.

In the *last* place, the doctrine of Providence is abundantly proved by the Scriptures.

PRUNING-HOOK. [VINE.]

PSALMS, BOOK OF. This collection of sacred poetry received its name in consequence of the *lyrical* character of the pieces of which it consists, as intended to be sung to stringed and other instruments of music.

In Ps. lxxii. 20 we find all the preceding compositions (Ps. i.-lxxii.) styled *Prayers of David*, because many of them are strictly prayers, and all are pervaded by the spirit and tone of supplication.

All the Psalms, except thirty-four, bear supercriptions. The *authority* of the titles is a matter of doubt. By most of the ancient critics they were considered genuine, and of equal authority with the Psalms themselves, while most of the moderns reject them wholly or in part. It deserves to be noticed, however, that they are received by Tholuck and Hengstenberg in their works on the Psalms. Of the *antiquity* of the inscriptions there can be no question, for they are found in the Septuagint. They are supposed to be even much older than this version, since they were no longer intelligible to the translator, who often makes no sense of them.

A good deal may be plausibly said both for and against the authority of these titles, but on the whole it seems the part of sober criticism to receive the titles as historically valid, except when we find strong internal evidence against them.

The *design* of these inscriptions is to specify either the author, or the chief singer, or the historical subject or occasion, or the use, or the style of poetry, or the instrument and style of music. Some titles simply designate the author, as in Ps. xxv., while others specify several of the above particulars, as in Ps. li. The longest and fullest title of all is prefixed to Ps. lx., where we have the author, the chief musician (not by name), the historical occasion (comp. 2 Sam. viii.), the use or design, the style of poetry, and the instrument or style of music. It is confessedly very difficult,

if not impossible, to explain all the terms employed in the inscriptions, and hence critics have differed exceedingly in their conjectures. The difficulty, arising no doubt from ignorance of the Temple music, was felt, it would seem, as early as the age of the Sept.; and it was felt so much by the translators of our Authorized Version, that they generally retained the Hebrew words, even though Luther had set the example of translating them to the best of his ability.

Of the terms left *untranslated* or *obscure* in our Bible, it may be well to offer some explanation in this place, taking them in alphabetical order for the sake of convenience.

Ajeleth shahar, 'hind of the morning,' i. e. the sun, or the dawn of day. This occurs only in Ps. xxii., where we may best take it to designate a song, perhaps commencing with these words, or bearing this name, to the melody of which the psalm was to be sung.

Alamoth, Ps. xvi., probably signifies 'virgins,' and hence denotes music for female voices, or the *treble*.

Al-taschith, 'destroy thou not,' is found over Ps. lvii., lviii., lix., lxxv., and signifies, by general consent, some well-known ode beginning with the expression, to the tune of which these compositions were to be sung.

Degrees appears over fifteen Psalms (cxxx.-cxxxiv.), called *Songs of Degrees*, and has been explained in various ways, of which the following are the chief. 1. The ancients understood by it *stairs* or *steps*; and in accordance with this, Jewish writers relate that these Psalms were sung on fifteen steps, leading from the court of Israel to the court of the women. This explanation is now exploded. 2. Luther, whom Tholuck is inclined to follow, renders the title a *song in the higher choir*, supposing the Psalms to have been sung from an elevated place or ascent, or with elevated voice. 3. Gesenius and De Wette think the name refers to a peculiar rhythm in these songs, by which the sense advances by *degrees*, and so *ascends* from clause to clause. 4. According to the most prevalent and probable opinion, the title signifies *song of the ascents*, or *pilgrim song*, meaning a song composed for, or sung during the journeyings of the people up to Jerusalem, whether as they returned from Babylon, or as they stately repaired to the national solemnities. Journeys to Jerusalem are generally spoken of as *ascents*, on account of the elevated situation of the city and temple (see Ezra vii. 9, and especially Ps. cxxii. 4). This explanation of the name is favoured by the brevity and the contents of these songs.

Githith appears over Ps. viii., lxxxi., lxxxiv., and is of very uncertain meaning, though not improbably it signifies an instrument or tune brought from the city of *Gath*. In the opinion of not a few the word denotes either an instrument or a melody used in the vintage.

Higgaion is found over Ps. ix. 16, and probably means either *musical sound*, according to the opinion of most, or *meditation*, according to Tholuck and Hengstenberg.

Jeduthun is found over Ps. xxxix., lix., lxxvii., and is generally taken for the name of choristers descended from Jeduthun, of whom we read in 1 Chron. xxv. 1, 3, as one of David's three chief musicians or leaders of the Temple music.

Jonath-elem-rechokim, 'the mute dove among strangers,' found only over Ps. lvi., may well denote the subject of the song, viz., David himself, 'when the Philistines took him in Gath'; or it is the name or commencement of an ode to the air of which this psalm was sung.

Leannoth, in the title of Ps. lxxxviii., means to sing, denoting that it was to be sung in the way described.

Mahalath occurs in Ps. liii. and lxxxviii., and denotes, according to some, a sort of flute; according to Gesenius, in his last edition of his *Thesaurus*, a lute; but in the opinion of Fürst, a tune, named from the first word of some popular song. Upon *Mahalath*, *Leannoth*, Ps. lxxxviii., is accordingly a direction to chant it to the instrument or tune called *mahalath*.

Maschil is found in the title of thirteen psalms. According to Gesenius, De Wette, and others, it means a poem, so called either for its skilful composition or for its wise and pious strain. The common interpretation, which Tholuck and Hengstenberg follow, makes it a didactic poem.

Michtam is prefixed to Ps. xvi., lvi., lx., and is subject to many conjectures. But the true explanation is most likely that offered by Gesenius, De Wette, Rosenmüller, and Tholuck, who hold it to signify a 'writing' or 'poem.'

Muth-labben (Ps. ix.) presents a perfect riddle, owing to the various readings of MSS., and the contradictory conjectures of the learned. Some explain it as the subject or occasion of the song, but most refer it to the music. Gesenius, in his last edition, renders it—*with virgins' voice for the boys*, i. e. to be sung by a choir of boys in the temple.

Neginoth, Ps. iv. and four others. This name clearly denotes 'stringed instruments' in general.

Nehiloth (Ps. v.) denotes 'pipes' or 'flutes.'

Selah is found seventy-three times in the Psalms, generally at the end of a sentence or paragraph; but in Ps. lv. 19 and lvii. 3 it stands in the middle of the verse. While most authors have agreed in considering this word as somehow relating to the music, their conjectures about its precise meaning have varied greatly. But at present these two opinions chiefly obtain: first, that it signifies a raising of the voice or music; or, second, a pause in the singing. Probably *selah* was used to direct the singer to be silent, or to pause a little, while the instruments played an interlude or symphony. In Ps. ix. 16 it occurs in the expression *higgaon selah*, which Gesenius, with much probability, renders *instrumental music, pause*, i. e. let the instruments strike up a symphony, and let the singer pause. By Tholuck and Hengstenberg, however, the two words are rendered *meditation, pause*, i. e. let the singer meditate or reflect while the music stops.

Sheminith (Ps. vi. and xii.) means properly eighth, and denotes either, as some think, an instrument with eight chords, or, more likely, music in the lower notes, or bass.

Shiggaton (Ps. vii.) denotes, according to Gesenius and Fürst, a song or hymn; but Ewald and Hengstenberg understand by it 'error or wandering,' supposing that the aberrations of the wicked are the subject of the Psalm. According to Rosenmüller, De Wette, and Tholuck, it means a 'plaintive song or elegy.'

Shushan (Ps. lx.), and in plural *shoshannim*

(Ps. xlv., xlix., lxxx.). This word commonly signifies lily, and probably denotes either an instrument bearing some resemblance to a lily (perhaps cymbal), or a melody named lily for its pleasantness.

Respecting the authors of the Psalms, many of the ancients, both Jews and Christians, maintained that they were all written by David: which is one of the most striking proofs of their uncritical judgment. The titles and the contents of the Psalms most clearly show that they were composed at different and remote periods, by several poets, of whom David was only the largest and most eminent contributor. According to the inscriptions we have the following list of authors:—

1. *David*, 'the sweet Psalmist of Israel' (2 Sam. xxiii. 1). To him are ascribed seventy-three Psalms in the Hebrew text; and at least eleven others in the Sept., namely, xxxiii., xliii., xci., xciv.-xcix., civ., cxxxvii.; to which may be added Ps. x., as it forms part of Ps. ix. in that version. From what has been advanced above respecting the authority of the titles, it is obviously injudicious to maintain that David composed all that have his name prefixed in the Hebrew, or to suppose that he did not compose some of the eleven ascribed to him in the Sept., and of the others which stand without any author's name at all. We cannot feel sure that Ps. cxxxix. is David's, for its Chaldaisms (ver. 2, 8, 16, 17) betray a later age; and Ps. cxiii. can scarcely be his, for its style resembles the later Hebrew, and its description of Jerusalem can hardly apply to David's time. Besides, it is worthy of notice that the Sept. gives this and the other Songs of Degrees without specifying the author. Of those which the Sept. ascribes to David, it is not improbable that Ps. xcix. and civ. are really his; and of those which bear no name in either text, at least Ps. ii. appears to be David's.

David's compositions are generally distinguished by sweetness, softness, and grace; but sometimes, as in Ps. xviii., they exhibit the sublime. His prevailing strain is plaintive, owing to his multiplied and sore trials, both before and after his occupation of the throne. The celebrated singers who were contemporaries of David were men, like himself, moved by the divine afflatus not only to excel in music, but also to indite hallowed poetry. Of these Psalmists the names of several are preserved in the titles.

2. *Asaph* is named as the author of twelve Psalms, viz., l., lxxiii.-lxxxiii. He was one of David's chief musicians [AARAH]. All the poems bearing his name cannot be his; for in Ps. lxxiv., lxxix., and lxxx., there are manifest allusions to very late events in the history of Israel. Asaph appears from Ps. l., lxxiii., and lxxxviii., to have been the greatest master of didactic poetry, excellently alike in sentiment and in diction.

3. *The sons of Korah* was another family of choristers (see KORAH, at the end), to whom eleven of the most beautiful Psalms are ascribed.

4. *Heman* was another of David's chief singers (1 Chron. xv. 19): he is called the Ezrahite, as being descended from some Ezrah, who appears to have been a descendant of Korah: at least Heman is reckoned a Kohathite (1 Chron. vi. 33-38), and was therefore probably a Korahite; for the Kohathites were continued and counted in

the line of Korah; see 1 Chron. vi. 22, 37, 38 [HEMAN]. Thus Heman was both an Ezrahite and of the sons of Korah. That Ps. lxxxviii. was written by him is not unlikely, though many question it.

5. *Ethan* is reputed the author of Ps. lxxxix. He is doubtless the Levite of Merari's family whom David made chief musician along with Asaph and Heman (1 Chron. vi. 44; xxv. 1, 6). The Psalm could not, however, be composed by him, for it plainly alludes (ver. 38-44) to the downfall of the kingdom.

6. *Solomon* is given as the author of Ps. lxxii. and cxxvii., and there is no decided internal evidence to the contrary, though most consider him to be the subject and not the author of Ps. lxxii.

7. *Moses* is reputed the writer of Ps. xc., and there is no strong reason to doubt the tradition.

Jeduthun is sometimes, without just ground, held to be named as the author of Ps. xxxix. Many conjectures have been formed respecting other writers, especially of the anonymous psalms. The Sept. seemingly gives, as authors, Jeremiah, (Ps. cxxxvii.), and Haggai and Zechariah (Ps. cxxxviii.). But these conjectures are too uncertain to call for further notice in this place.

The dates of the Psalms, as must be obvious from what has been stated respecting the authors, are very various, ranging from the time of Moses to that of the Captivity—a period of nearly 1000 years.

The Psalter is divided in the Hebrew into five books, and also in the Sept. version, which proves the division to be older than B.C. 200.

The first book (i.-xli.) consists wholly of David's songs, his name being prefixed to all except i., ii., x., and xxxiii.; and it is evidently the first collection, having been possibly made in the time of Hezekiah, who is known to have ordered a collection of Solomon's proverbs (Prov. xxv. 1), and to have commanded the Levites to sing the words of David (2 Chron. xxix. 30).

The second book (xlii.-lxxii.) consists mainly of pieces by the sons of Korah (xlii.-xlix.), and by David (li.-lxxii.), which may have been separate minor collections. It is not likely that this collection was made till the period of the Captivity, if interpreters are right in referring Ps. xlii. to the days of Jeremiah.

The third book (lxxiii.-lxxxix.) consists chiefly of Asaph's psalms, but comprises apparently two smaller collections, the one Asaphitic (lxxiii.-lxxxiii.), the other mostly Korahitic (lxxxiv.-lxxxix.). The collector of this book had no intention to bring together songs written by David, and therefore he put the above notice at the end of the second book. The date of this collection must be as late as the return from Babylon, for Ps. lxxxv. implies as much.

The fourth book (xc.-cvi.) and the fifth (cvii.-cl.) are made up chiefly of anonymous liturgic pieces, many of which were composed for the service of the second temple. In the last book we have the Songs of Degrees (cxv.-cxxxiv.), which seem to have been, originally a separate collection.

The inspiration and canonical authority of the Psalms are established by the most abundant and convincing evidence. They never were, and never can be, rejected, except by impious impugnors of all divine revelation. Not to mention other

ancient testimonies, we find complete evidence in the New Testament, where the book is quoted or referred to as divine by Christ and his apostles at least seventy times. No other writing is so frequently cited; Isaiah, the next in the scale of quotation, being cited only about fifty-five times.

PSALTERY. [MUSICAL INSTRUMENTS.]

PTOLEMA'IS. [ACCHO.]

PTOLEMY. This common name of the Greek kings of Egypt does not occur in the canonical Scripture, but is frequent in the books of Maccabees and in Josephus (see the article EGYPT).

PUBLICAN, a person who farmed the taxes and public revenues. This office was usually held by Roman knights, an order instituted as early as the time of Romulus, and composed of men of great consideration with the government, 'the principal men of dignity in their several countries,' who occupied a kind of middle rank between the senators and the people. Although these officers were, according to Cicero, the ornament of the city and the strength of the commonwealth, they did not attain to great offices, nor enter the senate, so long as they continued in the order of knights. They were thus more capable of devoting their attention to the collection of the public revenue.

The publicans were distributed into three classes: the farmers of the revenue, their partners, and their securities, corresponding to the Mancipes, Socii, and Prædes. They were all under the Quæstores Ærarii, who presided over the finances at Rome. Strictly speaking, there were only two sorts of publicans, the Mancipes and the Socii. The former, who were generally of the equestrian order, and much superior to the latter in rank and character, are mentioned by Cicero with great honour and respect; but the common publicans, the collectors or receivers of the tribute, as many of the Socii were, are covered both by heathens and Jews with opprobrium and contempt.

The name and profession of a publican were, indeed, extremely odious among the Jews, who submitted with much reluctance to the taxes levied by the Romans. The Galileans or Herodians, the disciples of Judas the Gaulonite, were the most turbulent and rebellious (Acts v. 37). They thought it unlawful to pay tribute, and founded their refusal to do so on their being the people of the Lord, because a true Israelite was not permitted to acknowledge any other sovereign than God (Joseph. *Antiq.* xviii. 2). The publicans were hated as the instruments by which the subjection of the Jews to the Roman emperor was perpetuated; and the payings of tribute was regarded as a virtual acknowledgment of his sovereignty. They were also noted for their imposition, rapine, and extortion, to which they were, perhaps, more especially prompted by having a share in the farm of the tribute, as they were thus tempted to oppress the people with illegal exactions, that they might the more speedily enrich themselves. Those Jews who accepted the office of publican were execrated by their own nation equally with heathens: 'Let him be unto thee as an heathen man and a publican' (Matt. xviii. 17). It is said they were not allowed to enter the temple or synagogues, to engage in the public prayers, fill offices of judicature, or even give testimony in courts of justice.

According to the Rabbins, it was a maxim that a religious man who became a publican was to be driven out of the religious society. They would not receive their presents at the temple any more than the price of prostitution, of blood, or of anything wicked and offensive.

PUBLIUS, governor of Melita at the time of Paul's shipwreck on that island (Acts xxviii. 7, 8). Paul having healed his father, probably enjoyed his hospitality during the three months of his stay in the island [MELITA].

PUDENS, one of the persons whose salutations Paul, writing from Rome, sends to Timothy (2 Tim. iv. 21). Nothing is really known of him; but the martyrologies make him to have been a person of figure at Rome, of the senatorial order, and father of two pious virgins, Praxidis and Pudenciana.

PUL, king of Assyria. [ASSYRIA.]

PULSE. [BEANS.]

PUNISHMENTS. This subject is properly restricted to the penalty imposed on the commission of some crime or offence against law. It is thus distinguished from private retaliation or revenge, cruelty, torture, popular violence, certain customs of war, &c. Human punishments are such as are inflicted immediately on the person of the offender, or indirectly upon his goods, &c. For the leading points in the literature of the question concerning future and divine punishment see SOUL. *Capital punishment* is usually supposed to have been instituted at the deluge (Gen. ix. 5, 6). Aruheim, however, thus explains the precept: if one stranger slay another, the kinsmen of the murdered man are the avengers of blood; but if he be slain by one of his own kindred, the other kinsmen must not spare the murderer, for if they do, then divine providence will require the blood—that is, will avenge it. This interpretation would account for the custom of blood-revenge among all the ancient and Asiatic nations. The extensive prescription of capital punishment by the Mosaic law, which we cannot consider as a dead letter, may be accounted for by the peculiar circumstances of the people. They were a nation of newly-emancipated slaves, and were by nature perhaps more than commonly intractable; and if we may judge by the laws enjoined on them, which Mr. Hume well remarks are a safe index to the manners and disposition of any people, we must infer that they had imbibed all the degenerating influences of slavery among heathens.

The mode of capital punishment, which constitutes a material element in the character of any law, was probably as humane as the circumstances of Moses admitted. It was probably restricted to lapidation or stoning, which, by skillful management, might produce instantaneous death. It was an Egyptian custom (Exod. viii. 26). The public effusion of blood by decapitation cannot be proved to have been a Mosaic punishment. The appearance of decapitation, 'slaying by the sword,' in later times (2 Sam. iv. 8, 20, 21, 22; 2 Kings x. 6-8), has no more relation to the Mosaic law than the decapitation of John the Baptist by Herod (Matt. xiv. 8-12); or than the hewing to pieces of Agag before the Lord by Samuel, as a punishment in kind (1 Sam. xv. 33). Execution was ordered by Moses, probably adopting an ancient custom, to be begun first by the witnesses, a regulation which constituted a tremendous appeal to

their moral feelings, and afterwards to be completed by the people (Deut. xiii. 10; xvii. 7; Josh. vii. 25; John viii. 7). It was a later innovation that immediate execution should be done by some personal attendant, by whom the office was probably considered as an honour (2 Sam. i. 15; iv. 12). Stoning therefore was, probably, the only capital punishment ordered by Moses. It is observable that neither this nor any other punishment was, according to his law, attended with insult or torture (comp. 2 Macc. vii.). Nor did his laws admit of those horrible mutilations practised by other nations. Mutilation of such a nature amounts to a perpetual condemnation to infamy and crime. It will shortly be seen that the *lex talionis*, 'an eye for an eye,' &c., was adopted by Moses as the principle, but not the mode of punishment. He seems also to have understood the true end of punishment, which is not to gratify the antipathy of society against crime, nor moral vengeance, which belongs to God alone, but prevention. 'All the people shall hear and fear, and do no more so presumptuously' (Deut. xvii. 13; xxix. 20). His laws are equally free from the characteristic of savage legislation, that of involving the family of the offender in his punishment. He did not allow parents to be put to death for their children, nor children for their parents (Deut. xxiv. 16), as did the Chaldeans (Dan. vi. 24), and the kings of Israel (comp. 1 Kings xxi.; 2 Kings ix. 26). Various punishments were introduced among the Jews, or became known to them by their intercourse with other nations,—viz., precipitation, or throwing, or causing to leap, from the top of a rock: to which ten thousand Idumæans were condemned by Amaziah, king of Judah (2 Chron. xxv. 12). The inhabitants of Nazareth intended a similar fate for our Lord (Luke iv. 29). This punishment resembles that of the Tarpeian rock among the Romans. *Cutting asunder* appears to have been a Babylonian custom (Dan. ii. 5; iii. 29; Luke xii. 46; Matt. xxiv. 51); but the passages in the Gospels admit of the milder interpretation of scourging with severity, discarding from office, &c. *Beating to death* was a Greek punishment for slaves. It was inflicted on a wooden frame, on which the criminal was bound and beaten to death (2 Macc. vi. 19, 28; comp. v. 30). *Fighting with wild beasts* was a Roman punishment, to which criminals and captives in war were sometimes condemned (Adam, *Roman Antiq.*, p. 314; 2 Tim. iv. 17; comp. 1 Cor. xv. 32). *Drowning* with a heavy weight around the neck, was a Syrian, Greek, and Roman punishment. For Crucifixion, see the Article.

Posthumous insults offered to the dead bodies of criminals, though common in other nations, were very sparingly allowed by Moses. He permitted only hanging on a tree or gibbet; but the exposure was limited to a day, and burial of the body at night was commanded (Deut. xxi. 22). Such persons were esteemed 'cursed of God' (comp. Josh. viii. 29; x. 26; 2 Sam. iv. 12)—a law which the later Jews extended to crucifixion (John xix. 31, &c.; Gal. iii. 13). *Hanging alive* may have been a Canaanite punishment, since it was practised by the *Gibeonites* on the sons of Saul (2 Sam. xxi. 9). Another posthumous insult in later times consisted in heaping stones on the body or grave of the executed criminal (Josh. vii. 23, 26). To 'make heaps' of houses or cities is a

phrase denoting complete and ignominious destruction (Isa. xxv. 2; Jer. ix. 11). *Burning the dead body* seems to have been a very ancient posthumous insult: it was denounced by Judah against his daughter-in-law, Tamar, when informed that she was with child (Gen. xxxviii. 24). Selden thinks that this means merely branding on the forehead. Moses retained this ancient ignominy for two offences only, which from the nature of things must have been comparatively rare, viz., for *bigamy* with a mother and her daughter (Lev. xx. 4), and for the case of a priest's daughter who committed whoredom (xxi. 9). Though 'burning' only be specified in these cases, it may be safely inferred that the previous death of the criminals, probably by lapidation, is to be understood (comp. Josh. vii. 25). Among the heathens this merciful preliminary was not always observed, as for instance in the case of Shadrach, Meshach, and Abednego (Dan. iii.).

Among the *minor corporal punishments* ordered by Moses, was scourging; or the infliction of blows on the back of an offender with a rod. It was limited by him to forty stripes, a number which the Jews in later times were so careful not to exceed, that they inflicted but thirty-nine (2 Cor. xi. 24). It was to be inflicted on the offender lying on the ground, in the presence of a judge (Lev. xix. 20; Deut. xxii. 18; xxv. 2, 3). We have abundant evidence that it was an ancient Egyptian punishment. Corporal punishment of this kind was allowed by Moses, by masters to servants or slaves of both sexes (Exod. xxi. 20). Scourging was common in after times among the Jews, who associated with it no disgrace or inconvenience beyond the physical pain it occasioned, and from which no station was exempt (Prov. xvii. 26; comp. x. 13; Jer. xxxvii. 15-20). Hence it became the symbol for correction in general (Ps. lxxxix. 32). Solomon is a zealous advocate for its use in education (Prov. xiii. 24; xxiii. 13, 14; comp. Eccles. xxx. 1). It was inflicted for ecclesiastical offences in the synagogue (Matt. x. 17; Acts xxvi. 11). The Mosaic law, however, respecting it, affords a pleasing contrast to the extreme and unlimited scourging known among the Romans, but which, according to the Porcian law, could not be inflicted upon a Roman citizen (Acts xvi. 22-37; xxii. 25). Reference to the scourge with scorpions, i.e. a whip or scourge armed with knots or thorns, occurs in 1 Kings xii. 11.

Retaliation is doubtless the most natural of all kinds of punishment, and would be the most just of all, if it could be instantaneously and universally inflicted. But when delayed it is apt to degenerate into revenge. Hence the desirableness that it should be regulated and modified by law. Moses accordingly adopted the principle, but lodged the application of it in the judge. 'If a man blemish his neighbour, as he hath done, so shall it be done to him. Life for life, eye for eye, tooth for tooth, wound for wound, stripe for stripe, breach for breach' (Exod. xxi. 23-25; Lev. xxiv. 19-22). His system of compensations, &c., occurs in Exod. xxi. He, however, makes wilful murder, even of a slave, always capital, as did the Egyptians. The Egyptians doomed the false accuser to the same punishment which he endeavoured to bring on his victim, as did Moses (Deut. xix. 19). Im-

prisonment, not as a punishment, but custody, till the royal pleasure was known, appears among the Egyptians (Gen. xxxix. 20, 21). Moses adopted it for like purposes (Lev. xxvi. 12). In later times, it appears as a punishment inflicted by the kings of Judah and Israel (2 Chron. xvi. 10; 1 Kings xxii. 27; Jer. xxxvii. 21); and during the Christian era, as in the instance of John (Matt. iv. 12), and Peter (Acts xii. 4). Murderers and debtors were also committed to prison; and the latter 'tormented' till they paid (Matt. xviii. 30; Luke xxiii. 19). A common prison is mentioned (Acts v. 18); and also an inner prison or dungeon, which was sometimes a pit (Jer. xxxviii. 6), in which were 'stocks' (Jer. xx. 2; xxix. 26; Acts xvi. 24). Prisoners are alluded to (Job iii. 18), and stocks (xiii. 27). Banishment was impracticable among the Jews. It was inflicted by the Romans on John (Rev. i. 9). *Cutting or plucking off the hair* is alluded to (Isa. l. 6; Nehem. xiii. 25). *Excision*, or 'cutting off from his people,' is denounced against the uncircumcised as early as the covenant with Abraham (Gen. xvii. 14). This punishment is expressed in the Mosaic law by the formulae—'that soul shall be destroyed from its people' (Lev. xvii. 20, 21); 'from Israel' (Exod. xii. 15); 'from the midst of the congregation' (Num. xix. 20); 'it shall be destroyed' (Lev. xvii. 14; xx. 17); which terms sometimes denote capital punishment (Exod. xxxi. 14; comp. xxxv. 2; Num. xv. 32, &c.) [ANATHEMA].

Ecclesiastical punishments are prescribed, as might be expected under a theocracy, but these were moderate. Involuntary transgressions of the Levitical law, whether of omission or commission, were atoned for by a sin-offering (Lev. iv. 2, &c.; v. 1, 4-7). This head embraced a rash or neglected oath, keeping back evidence in court (Lev. iv. 2, &c.; v. 1; iv. 7), breach of trust, concealment of property when found, or theft, even when the offender had already cleared himself by oath, but was now moved by conscience to make restitution. By these means, and by the payment of twenty per cent. beyond the amount of his trespass, the offender might cancel the crime as far as the church was concerned (Lev. vi. 1-7; Num. v. 6-10). Adultery with a slave was commuted from death to stripes and a trespass-offering (Lev. xix. 20-22). All these cases involved public confession, and the expenses of the offering.

Future punishment.—Though the doctrine of a future state was known to the ancient Hebrews, yet temporal punishment and reward were the immediate motives held out to obedience. Hence the references in the Old Testament to punishment in a future state are obscure and scanty. See HADES; HEAVEN; HELL.

PU'NON, one of the stations of the Israelites in the desert. [WANDERING.]

PURIFICATIONS. [ABLUTION.]

PURIM (Esther iii. 7; ix. 24, sq.), a celebrated Jewish festival instituted by Mordecai, at the suggestion of Esther, in the reign of Ahasuerus, king of Persia, to commemorate the deliverance of the Jews from the designs of Haman [ESTHER; HAMAN; MORDECAI]. It derived its name from the *lots* cast every day for twelve months in presence of Haman, with the view of discovering an auspicious day for the destruction

of all the Jews in the Persian dominions; when the lot fell on the 13th day of Adar (February and part of March) [FESTIVALS].

The particulars of the mode in which the Jews observe this festival will be found detailed by Buxtorf. We shall select a few of the most striking. The book of Esther is read from beginning to end; and even the reading of the law is on this day postponed to it. It may be also read in any language which the reader understands. When Mordecai's name occurs, the whole congregation exclaim, *Bless! be Mordecai!* and, on mention of that of Haman, they say, *May his name perish!* and it is usual for the children to hiss, spring rattles, strike the walls with hammers, and make all sorts of noises. These noisy portions of the ceremony have, however, been long discontinued in England, except in the synagogues of some foreign Jews. The remainder of the day is spent in festivity, in commemoration of Esther's feast: upon which occasion the Jews send presents to each other, the men to the men, and the women to the women. They also bestow alms on the poor, from the benefit of which Christians and other Gentiles are not excluded. Plays and masquerades follow; nor is it considered a breach of the law of Moses on this occasion, for men and women to assume the garb of the other sex. Purim is the last festival in the Jewish ecclesiastical year, being succeeded by the next Passover.

PURPLE, BLUE, CRIMSON, SCARLET. There is no reason to doubt that this colour was obtained, like the far-famed Tyrian purple, from the juice of certain species of shell-fish. The dye called purple by the ancients, and its various shades, were obtained from many kinds of shell-fish all of which are, however, ranged by Pliny under two classes: one called 'buccinum,' because shaped like a horn, found, he says, in cliffs and rocks, and yielding a sullen blue dye; the other called 'porpura,' or 'pelagia,' the proper purple shell, taken by fishing in the sea, and

288. [*Murex trunculus*.]

yielding the deep red colour which was chiefly valued. Both sorts were supposed to be as many years old as they had spirals round. The juice of the whole shell-fish was not used, but only a little thin liquor called the flower, contained in a white vein or vessel in the neck. The larger purples were broken at the top to get at this vein without injuring it, but the smaller were pressed in mills. The *Murex trunculus* was the species used by the ancient Tyrians. It is of common occurrence now on the same coasts, and through-

out the whole of the Mediterranean, and even of the Atlantic. The ancients applied the word translated 'purple,' not to one colour only, but to the whole class of dyes manufactured from the juices of shell-fish, as distinguished from the vegetable dyes, and comprehending not only what is commonly called purple, but also light and dark purple, and almost every shade between.

Purple was employed in religious worship both among Jews and Gentiles. It was one of the colours of the curtains of the tabernacle; of the veil; of the curtain over the grand entrance; of the ephod of the high priest, and of its girdle; of the breast-plate; of the hem of the robe of the ephod, &c. The Babylonians arrayed their idols in it. It was at an early period worn by kings (Judg. viii. 26). Homer speaks as if it were almost peculiar to them. In Acts x. 14, reference is found to Lydia, of the city of Thyatira, a seller of purple cloth. The manufacture seems to have decayed with its native city, a colony of Jews, which was established at Thebes in Greece in the twelfth century, carried on an extensive manufactory for dyeing purple. It ultimately became superseded by the use of indigo, cochineal, &c., whence a cheaper and finer purple was obtained, and free from the disagreeable odour which attended that derived from shell-fish.

2. *Blue*, a colour almost constantly associated with purple, is supposed to have been obtained

289. [*Helix ianthina*.]

from another purple shell-fish of the Mediterranean, the *conchylium* of the ancients, the *Helix ianthina* of Linnaeus. The Scriptures afford no clue to this colour: some suppose it to be dark-coloured and deep purple, but Josephus evidently takes the Hebrew word to mean 'sky-colour.' These statements may be reconciled by the fact, that in proportion as the sky is clear and serene, it assumes a dark appearance, which is still more observable in an eastern climate. The chief references to this colour in Scripture are as follows:—The robe of the high-priest's ephod was to be all of blue (Exod. xxviii. 31); so the loops of the curtains to the tabernacle; the ribbon for the breast-plate, and for the plate for the mitre; the people were commanded to wear a ribbon of blue above the fringe of their garments (Num. xv. 38).

3. *Crimson* occurs in 2 Chron. ii. 7-14; iii. 14. This word is by some supposed to signify another kind of shell-fish, yielding a crimson dye, so called because found on the shore near Mount Carmel.

4. *Scarlet*, often associated with purple and blue. It is supposed to have been derived from the *coccus*, from which the ancients procured a blood-red crimson dye. It was the female of this remarkable insect that was employed; and though

supplanted by the cochineal, it is still used for the purpose in India and Persia. It attains the size and form of a pea, is of a violet black colour, covered with a whitish powder adhering to plants, chiefly various species of oak, and so closely resembling grains, that its insect nature was not generally known for many centuries. The word *scarlet* signified crimson in the time of our translators, rather than the colour now called by that name, and which was unknown in the time of James I. This insect is widely distributed over many of the south-eastern countries of the ancient world. It occurs abundantly in Spain, and is found on the *Quercus coccifera*, or *hermes* oak in Palestine.

290. [*Coccus ilicis*, on a branch.]

PUTEOLI, a maritime town of Campania, in Italy, on the north shore of the bay of Naples, and about eight miles north-west from the city of that name, where it still exists under the name of Pozzuoli. It derived its name from its tepid baths, whence the district in which it exists is now called Terra di Lavoro. It was a favourite watering-place of the Romans, as its numerous hot-springs were judged efficacious for the cure of various diseases. It was also the port where ships usually discharged their passengers and cargoes, partly to avoid doubling the promontory of Circeium, and partly because there was no commodious harbour nearer to Rome. Hence the ship in which Paul was conveyed from Melita, landed the prisoners at this place, where the apostle staid for a week (Acts xxviii. 13). The harbour was protected by a celebrated mole, the remains of which are still to be seen.

Q.

QUAIL occurs in Exod. xvi. 13; Num. xi. 31, 32; Ps. cv. 40. Quails form a subdivision of the *Tetraonidae*, or grouse family, being distin-

guished from partridges by their smaller size, finer bill, shorter tail, and the want of a red naked eyebrow and of spurs on the legs. There are several species, whereof the common, now distinguished by the name of *Coturnix dactylisonans*, is abundant in all the temperate regions of Europe and Western Asia, migrating to and from Africa in the proper season.

Of a bird so well known no figure or further particular description appears to be necessary, beyond mentioning the enormous flights which, after crossing an immense surface of sea, are annually observed at the spring and fall to take a brief repose in the islands of Malta, Sicily, Sardinia, Crete, in the kingdom of Naples, and about Constantinople, where on those occasions there is a general shooting-match, which lasts two or three days. The providential nature of their arrival within and around the camp of the Israelites, in order that they might furnish meat to a murmuring people, appears from the fact of its taking place where it was not to be expected: the localities, we presume, being out of the direction of the ordinary passage; for, had this not been the case, the dwellers in that region, and the Israelites themselves, accustomed to tend their flocks at no great distance from the spot, would have regarded the phenomenon as a well-known periodical occurrence.

QUARTUS, a Christian resident at Corinth, and, from his name, apparently a Roman, whose salutations Paul communicated to the Church of Rome in his epistle thereto (Rom. xvi. 23).

QUATER'NION. A 'quaternion of soldiers' (Acts xii. 4) was a detachment of four men, which was the usual number of a Roman night-watch. Peter, therefore, was guarded by four soldiers; two within the prison, and two outside the doors; and as the watch was usually changed every three hours, it was necessary that the 'four quaternions' mentioned in the text should be appointed for the purpose.

QUEEN. The Hebrews had no word properly answering to our term 'queen,' which is the feminine of 'king'; neither had they the dignity which that word denotes. Among them there was neither a 'queen regnant' nor a 'queen consort.' The Jewish kings however had, like other eastern monarchs, a chief wife in their harem, and this is no doubt the rank indicated in the Bible by the words which we render 'queen.'

Very different was, and is to this day, in Western Asia, the position of the king's mother, whose state is much the nearest to that of an European queen of any with which the East is acquainted. It is founded on that essential principle of Oriental manners which in all cases considers the mother of the husband as a far superior person to his wife, and as entitled to more respect and attention. This principle should be clearly understood, for it extends throughout the Bible, and is yet entirely different from our own social arrangements, under which the mother, as soon as she becomes widowed, abandons her place as head of the family to the daughter-in-law. Examples of the great influence possessed by the king's mother occur frequently in Scripture.

In how marked a manner does the mother of Solomon come forward at the end of her husband's and the beginning of her son's reign! She takes an active part in securing her son's succession;

it is in the conviction of her commanding influence that Adonijah engages her to promote his suit, alleging 'he will not say thee nay;' and then, when Bathsheba appears before her son, the monarch rises from his place, advances to meet her, bows himself before her, and seats her on the right hand of his throne (1 Kings i, ii.). That the king's mother possessed high dignity is further evinced by the fact that Asa found it necessary to remove his mother Maachah 'from being queen,' on account of her abuse of the power which that character conferred (1 Kings xv. 13). Jezebel was, as already stated, very powerful in the lifetime of her husband; but it is only under her son that she is called 'the queen;' and the whole history of his reign evinces the important part which she took in public affairs (2 Kings ix. 22, 30, 37; x. 13). Still more marked was the influence which her daughter Athaliah exercised in Judah during the reign of her son Ahaziah, which was indeed such as enabled her at his death to set the crown on her own head, and to present the anomaly in Jewish history of a regnant queen (2 Kings xi.).

QUEEN OF HEAVEN. [ASHTORETH.]

QUEEN OF SHEBA. [SHEBA.]

QUIVER. [ARMOUR, ARMS.]

R.

RA'AMAH, a city of the Cushites, or of Cushite origin (Gen. x. 7; 1 Chron. i. 9; Ezek. xxvii. 22). Its situation is not clearly known.

RAAM'SES. [RAMESES.]

RAB'BATH. This name, which properly denotes a great city or metropolis, is given in Scripture to the capital of the Ammonites (Josh. xiii. 25; 2 Sam. xi. 1; xii. 27; 1 Chron. xx. 1; Jer. xlix. 3); the full name of which, however, as given in Deut. iii. 11, appears to have been Rabbath-beni-Ammon. It was in this place that the great iron bedstead of Og king of Bashan was preserved (Deut. iii. 11). It was besieged by Joab, and when on the point of yielding to that general, was surrendered to David in person (2 Sam. xi. 12). After this Rabbah was included in the tribe of Gad. After the separation of the ten tribes, Rabbah, with the whole territory beyond the Jordan, adhered to the kingdom of Israel, till it was ravaged by the Assyrians under Tiglathpileser, and the inhabitants expatriated to Media. The Ammonites then recovered possession of Rabbah and the other cities and territories which had in former times been taken from them by the Israelites. Some centuries later, when these parts were subject to Egypt, Rabbah was restored or rebuilt by Ptolemy Philadelphus, and called by him Philadelphia, and under this name it is often mentioned by Greek and Roman writers.

Rabbah appears to have consisted, like Aroer, of two parts; the city itself, and 'the city of waters,' or royal city, which was probably a detached portion of the city itself, insulated by the stream on which it was situated. The 'city of waters' was taken by Joab; but against the city itself he was obliged to call for the assistance of David with a reinforcement (2 Sam. xii. 29).

The ruins of Rabbah stand about 19 miles

south-east of Szalt, in a long valley traversed by a stream, the Moiet Amman, which at this place is arched over, the bed as well as the banks being paved. The prophet Ezekiel foretold that Rabbah should become 'a stable for camels,' and the country 'a couching place for flocks' (Ezek. xxv. 5). This has been literally fulfilled, and Burckhardt actually found that a party of Arabs had stabled their camels among the ruins of Rabbah.

The Rabbah of Josh. xv. 60 was in the tribe of Judah.

RAB'BATH-AM'MON. [RABBAH.]

RAB'BATH MOAB. [AR.]

RABBI, a title of honour given to the teachers of the law in the time of Christ, and for which there is no exact equivalent in our language, though perhaps in purport and usage it comes near to 'doctor' or 'master'; a word combining both these significations would fairly represent it.

RABBONI, the title of highest honour applied by the Jews to the teachers of the law (RABBI).

RAB'SARIS, one of the three Assyrian generals in command of the army which appeared before Jerusalem (2 Kings xviii. 17) [RAB-SHAKEN]. The word means 'chief of the eunuchs,' who is always an officer of high rank and dignity in the Oriental courts; and his cares are not confined to the harem, but many high public functions devolve upon him.

RAB-SHAKEN (*chief-cup-bearer*). Notwithstanding its seemingly official significance, it appears to have been used as a proper name, as Butler with us; for the person who bore it was a military chief in high command, under Sennacherib king of Assyria. Yet it is not impossible, according to Oriental usages, that a royal cup-bearer should hold a military command; and the office itself was one of high distinction. He is the last named of three Assyrian generals who appeared before Jerusalem; and was the utterer of the insulting speeches addressed to the besieged. 2 Kings xviii. 17, 19, 26, 28, 37; xix. 4, 8; Isa. xxxvi. 2, 4, 12, 13, 22; xxxvii. 4, 8.

RACHEL (*an ewe*), one and the most beloved of the two daughters of Laban, whom Jacob married (Gen. xxix. 16, seq.), and who became the mother of Joseph and Benjamin, in giving birth to the latter of whom she died near Bethlehem, where her sepulchre is shown to this day (Gen. xxx. 22; xxxv. 16). For more minute particulars see Jacob, with whose history Rachel's is closely involved.

RAGU'EL, or REUEL (*friend of God*). 1. A son of Esau (Gen. xxxvi. 4, 10). 2. The father of Jethro (Exod. ii. 18; Num. x. 29). Some confound him with Jethro; but in the text last cited, he is called the father of Hobab, who seems to have been the same as Jethro. In the same passage, indeed, the daughters of the 'priest of Midian' relate to 'Reuel their father' their adventure with Moses; which might seem to support his identity with Jethro; but it is quite a Scriptural usage to call a grandfather 'father,' and a granddaughter, 'daughter' [HOBAB]. 3. Another person of this name occurs in 1 Chron. ix. 8.

1. RA'HAB, a name signifying 'sea-monster,' which is applied as an appellation to Egypt in Ps. lxxiv. 13, 14; lxxxvii. 4; lxxxix. 10; Isa. li. 9 (and sometimes to its king, Ezek. xxix. 3; xxxiii. 3, comp. Ps. lxxvii. 31); which meta-

phorical designation probably involves an allusion to the crocodiles, hippopotami, and other aquatic creatures of the Nile.

2. RA'HAB, properly RACHAB (*large*), a woman of Jericho who received into her house the two spies who were sent by Joshua into that city; concealed them under the flax laid out upon the house-top, when they were sought after; and, having given them important information, which showed that the inhabitants were much disheartened at the miracles which had attended the march of the Israelites, enabled them to escape over the wall of the town, upon which her dwelling was situated. For this important service Rahab and her kindred were saved by the Hebrews from the general massacre which followed the taking of Jericho (Josh. ii. 1-21; vi. 17; comp. Heb. xi. 31).

In the narrative of these transactions Rahab is called *zonah*, which our own, after the ancient versions, renders 'harlot.' The Jewish writers, however, being unwilling to entertain the idea of their ancestors being involved in a disreputable association at the commencement of their great undertaking, chose to interpret the word 'hostess,' one who keeps a public house. But the word signifies harlot in every other text where it occurs, the idea of 'hostess' not being represented by this or any other word in Hebrew, as the function represented by it did not exist. There were no inns; and when certain substitutes for inns eventually came into use, they were never, in any Eastern country, kept by women. On the other hand, strangers from beyond the river might have repaired to the house of a harlot without suspicion or remark. The house of such a woman was also the only one to which they, as perfect strangers, could have had access, and certainly the only one in which they could calculate on obtaining the information they required without danger from male inmates. If we are concerned for the morality of Rahab, the best proof of her reformation is found in the fact of her subsequent marriage to Salmon: this implies her previous conversion to Judaism, for which indeed her discourse with the spies evinces that she was prepared.

RAIN. [PALESTINE.]

RAM. [SHEEP.]

RA'MAH (*a high place, height*), the name of several towns and villages in Palestine, which it is not in all cases easy to distinguish from one another.

1. RAMAH, a town of Benjamin (Josh. xviii. 25), in the vicinity of Gibeah and Geba; on the way from Jerusalem to Bethel (Judg. iv. 5), and not far from the confines of the two kingdoms. Jerome places it six Roman miles north of Jerusalem, and Josephus places it forty stadia from Jerusalem. In accordance with these intimations, at the distance of two hours' journey north of Jerusalem, upon a hill a little to the east of the great northern road, a village still exists under the name of er-Ram, in which we cannot hesitate to recognise the representative of the ancient Ramah.

2. RAMAH, of Samuel, so called, where the prophet lived and was buried (1 Sam. i. 19; ii. 11; vii. 17; viii. 4; xv. 34; xvi. 13, 19; xviii. 19, 22, 23; xxv. 1; xxviii. 3). It is probably the same with the Ramathaim-Zophim to which

his father Elkanah belonged (1 Sam. i. 1, 19). The position of this Ramah was early lost sight of by tradition, and the variety of conflicting opinions regarding it shows that nothing is known with certainty on the subject.

3. RAMAH, a city of Naphtali (Josh. xix. 36).

4. RAMAH, a town of Gilead (2 Kings viii. 29), the name of which is given more fully in Josh. xiii. 26, as Ramoth-Mizpeh.

RAMESES, an Egyptian city in the land of Goshen, built, or at least fortified, by the labour of the Israelites (Gen. xlvii. 11; Exod. i. 11; xii. 37; Num. xxxiii. 3-5). The name of the city seems to have been sometimes given to the whole province (Gen. xlvii. 11), by which it would appear to have been the chief city of the district. It was probably situated on the water-shed between the Bitter Lakes and the Valley of the Seven Wells, not far from Heroöpolis, but not identical with that city. The name means 'son of the sun,' and was borne by several of the ancient kings of Egypt, one of whom was probably the founder of the city.

RAMOTH (*heights*, pl. of Ramah). There were several places of this name, usually with some addition to distinguish them from one another.

1. RAMOTH-GILEAD, called also RAMOTH-MIZPEH, or simply RAMOTH, a town in Gilead, within the borders of Gad (Josh. xiii. 26), which belonged to the Levites (Josh. xxi. 38; 1 Chron. vi. 65, 80). It was one of the cities of refuge (Deut. iv. 43; Josh. xx. 8), and one of the towns in which an attendant was stationed by Solomon (1 Kings iv. 13). It was the last of their conquests which the Syrians held; and Ahab was killed (1 Kings xxii. 1-37; 2 Chron. xviii.), and fourteen years after his son Joram was wounded (2 Kings viii. 28), in the attempt to recover it. The strength of the place is attested by the length of time the Syrians were enabled to hold it, and by Ahab and Joram having both been solicitous to obtain the aid of the kings of Judah when about to attack it; these being two of the only three expeditions in which the kings of Judah and Israel ever co-operated. It was here also that Jehu was proclaimed and anointed king (2 Kings ix. 1-6); but it is not very clear whether the army was then still before the town, or in actual possession of it. Eusebius places Ramoth-Gilead on the river Jabbok, fifteen Roman miles west of Philadelphia (Rabbah), where the ruins of a town are still to be seen. Buckingham is, however, more disposed to seek the site of Ramoth-Gilead in a place now called Ramtha, or Rameza, which is about twenty-three miles N.W.N. from Philadelphia, and about four miles north of the Jabbok, where he noticed some ruins which he could not examine.

RA'MATH-LE'HI. This name, which means *height of the jawbone*, belonged to a place on the borders of Philistia, and is referred by the sacred writer to the jaw-bone with which Samson slaughtered the Philistines (Judg. xv. 17).

RA'MOTH-NE'GEB (*Ramoth of the south*), a city in the tribe of Simeon (Josh. xix. 8; 1 Sam. xxx. 27).

RAMS' HORNS. [MUSICAL INSTRUMENTS.]

RAMS' SKINS, RED. Occurs in Exod. xxv. 5, and xxxv. 7. There is little doubt that the red rams' skins here noticed are to be understood

as the produce of the African Aoudad, the *Ovis tragelaphus* of naturalists, whereof the bearded sheep are a domesticated race. We agree with Dr. Mason Harris, that the skins in question were most likely tanned and coloured crimson.

RAVEN. The raven is very generally confounded with the carrion crow, but though very similar is quite distinct from it. Its size is larger, its black colour more iridescent; it is gifted with greater sagacity; is naturally observant and solitary, while the crow is gregarious in its habits; lives in pairs; has a most acute scent; and flies to a great height.

Whether the raven of Palestine is the common species, or the *Corvus Montanus* of Temminck, is not quite determined; for there is of the ravens, or greater form of crows, a smaller group including two or three others, all similar in manners, and unlike the carrion crows, which are gregarious, and seemingly identical in both hemispheres. Sometimes a pair of ravens will descend without fear among a flight of crows, take possession of the carrion that may have attracted them, and keep the crows at a distance till they themselves are gorged. The habits of the whole genus render it unclean in the Hebrew law; and the malignant, ominous expression of the raven, together with the colour of its plumage, powers of voice, and solitary habits, are the causes of that universal and often superstitious attention with which mankind have ever regarded it. This bird is the first mentioned in the Bible, as being sent forth by Noah out of the ark on the subsiding of the waters; and in 1 Kings xvii. 4, ravens bring flesh and bread at morning and eve to the prophet Elijah.

REBEK'AH (*a noosed cord*); daughter of Bethuel, and sister of Laban, who became the wife of Isaac, and the mother of Jacob and Esau. The particulars of her history and conduct, as given in Scripture, chiefly illustrate her preference of Jacob over Esau, and have been related in the article JACOB: see also ISAAC.

RECHAB (*ridder*), son of Hemath the Kenite, and probably a descendant of Jehro [KENITES]: he is only known as the father of Jonadab, the founder of the sect of Rechabites, which took from him its name (2 Kings x. 15; 1 Chron. ii. 55; Jer. xxxv. 6).

RECHABITES. The tribe or family of Kenites, whom Jonadab, the son of Rechab, subjected to a new rule of life; or rather bound to the continued observance of ancient usages which were essential to their separate existence, but which the progress of their intercourse with towns seemed likely soon to extinguish. By thus maintaining their independent existence as a pastoral people, they would keep themselves from being involved in the distractions and internal wars of the country, would be in no danger of becoming objects of jealousy and suspicion to the Israelites, and would be able at all times to remove from a country in which they were strangers. The Rechabites found so much advantage in these rules, that they observed them with great strictness for about 300 years, when we first become aware of their existence. Jeremiah put to the proof their adherence to their founder's rules, and they stood the test (Jer. xxxv. 6, 7).

What eventually became of the Rechabites is not known. The probability is that, when they

found themselves no longer safe among the Hebrews, they withdrew into the desert from which they at first came, and which was peopled by men of similar habits of life, among whom, in the course of time, they lost their separate existence.

RECORDER, the title of a high officer in the court of the kings of Judah (2 Sam. viii. 16; 1 Kings iv. 3; 2 Kings xviii. 18). 'Remembrancer' would perhaps be a more exact translation of the title. The officer thus designated seems to have been not only the grand custodian of the public records, but to have kept the responsible registry of the current transactions of the government. This was an employment of the very first rank and dignity in the courts of the ancient East.

REED. The word thus translated in the Old Testament is *Kaneh*, which occurs in 1 Kings xiv. 15; 2 Kings xviii. 21; Job xl. 21; Isa. xix. 6; xxxv. 7; xxxvi. 6; xlii. 3; Ezek. xix. 6. It is the probable source of our word *cane*, a term which seems to have been used at the time our translation was made in a more general sense than at present, when the term cane has been applied more particularly to the stems of the *Calamus rotang*, and other species of rattan canes, which we have good grounds for believing were unknown to the ancients. In most of the passages of the Old Testament the word *Kaneh* seems to be applied strictly to reeds of different kinds growing in water, that is, to the hollow stems or culms of grasses, which are usually weak, easily shaken about by wind or by water, fragile, and breaking into sharp-pointed splinters.

RED SEA. [SEA.]

RED SEA, PASSAGE OF. [EXODUS.]

REFINER. [METALA.]

REFUGE, CITIES OF. [CITIES OF REFUGE.]

REHOB, called also BETH-REHOB, a town on the northern border of Palestine (Num. xiii. 22), not far from Dan (Judg. xviii. 27-29). It was assigned to the tribe of Asher (Josh. xix. 28), and was a Levitical city (Josh. xxi. 31; 1 Chron. vi. 73). It does not, however, appear that the Israelites ever had it in actual possession (comp. Judg. i. 31; 2 Sam. x. 6, 8).

REHOB, the father of Hadadezer, king of Zobah, in Syria (2 Sam. viii. 3).

REHOB'AM (*he enlarges the people*), only son of Solomon, born of an Ammonitess, called Naamah (1 Kings xiv. 21, 31). His reign commenced B.C. 975, when he was at the age of forty-one, and lasted seventeen years. This reign was chiefly remarkable for the political crisis which gave rise to it, and which resulted in the separation of the previously single monarchy into two kingdoms, of which the smaller, which took the name of Judah, adhered to the house of David. All the points involved in this important event, and its immediate results, have been considered in the articles ISRAEL, JEROBOAM, JUDAH.

REHOBOTH, a name meaning 'wide places,' or 'ample room,' as is indicated by Isaac in giving it to some of the wells which he dug in the south of Palestine (Gen. xxvi. 22).

REHOBOTH-IR (*Rehoboth-city*), a town of ancient Assyria (Gen. x. 11), the site of which has not been ascertained.

REHOBOTH-HAN'NAHAR, or *Rehoboth of the river*, the birth-place of one of the Edomitish kings, named Saul (Gen. xxxvi. 37). The river is, doubtless, the Euphrates, and the place is probably represented by the modern er-Rahabeh, upon the west bank of that river, between Rakkah and Anah.

REPH'PHAN, or **REPHAN**, a name quoted in Acts vii. 43, from Amos v. 26. But according to the received pointing, the passage would better read, 'Ye bore the tabernacle of your king (idol), and the statue (or statues) of your idols, the star of your god, which ye make to yourselves.' According to this reading, the name of the idol so worshipped by the Israelites is in fact not given, although the mention of a star still suggests that some planet is intended. The reference is probably to Saturn, who was worshipped by the Semitic nations along with Mars as an evil demon to be propitiated with sacrifices.

REPH'AIM, an ancient people of unusual stature, who, in the time of Abraham, dwelt in the country beyond the Jordan, in and about Ashtoreth-Karnaïm (Gen. xiv. 5). There seems reason to think that the Rephaim were the most ancient or aboriginal inhabitants of Palestine prior to the Canaanites, by whom they were gradually dispossessed of the regions west of the Jordan, and driven beyond that river. Only a remnant of the race remained at the time of the ingress of the Israelites under Joshua.

REPHAIM, VALLEY OF, a valley beginning adjacent to the valley of Hinnom, south-west of Jerusalem, and stretching away south-west on the right of the road to Bethlehem (Josh. xv. 8; xvii. 5; xviii. 6; 2 Sam. v. 18, 22). This name corroborates the presumption that the Rephaim were originally west of the Jordan.

REPH'IDIM, a station of the Israelites in proceeding to Sinai. [SINAI.]

RE'SEN, an ancient town of Assyria, described as a great city lying between Nineveh and Calah (Gen. x. 12). Its site is unknown.

RESURRECTION OF CHRIST. After our Lord had completed the work of redemption by his death upon the cross, he rose victorious from the grave, and to those who through faith in him should become members of his body, he became 'the prince of life.' Since this event, however, independently of its importance in respect to the internal connection of the Christian doctrine, was manifestly a miraculous occurrence, the credibility of the narrative has been denied by some, while others who have admitted the facts as recorded to be beyond dispute, yet have attempted to show that Christ was not really dead; but that, being stunned and palsied, he wore for a time the appearance of death, and was afterwards restored to consciousness by the cool grave and the spices.

Objections of this nature do not require notice here; but a few words upon the apparent discrepancies of the Gospel narratives will not be misplaced. These discrepancies were early perceived; and various writers have commented on them with the view of throwing uncertainty and doubt over the whole of this portion of Gospel history. A numerous host of theologians, however, rose to combat and refute these objections; among others Griesbach, who remarks that all the discrepancies are trifling, and not of such moment as to render the narrative uncertain and

suspected, or to destroy or even diminish the credibility of the Evangelists; but rather serve to show how extremely studious they were of truth, 'and how closely and even scrupulously they followed their documents.'

RESURRECTION OF THE BODY. This expression is used to denote the revivification of the human body after it has been forsaken by the soul, or the re-union of the soul hitherafter to the body which it had occupied in the present world. Considerable diversity of opinion has prevailed respecting the extent to which the doctrine of the resurrection was known to the ancient Jews. In the time of Christ, however, the belief of this doctrine in connection with a state of future retribution, was held by the Pharisees and the great body of the Jewish people, and was only disputed by the Sadducees.

But although the doctrine of the resurrection was thus prevalent among the Jews in the time of Christ, it might still have been doubtful and obscure to us, had not Christ given to it the sanction of his authority, and declared it a constituent part of his religion (e. g., Matt. xxii.; John v., viii. xi.).

The principal points which can be collected from the New Testament on this subject are the following:—1. The raising of the dead is every where ascribed to Christ, and is represented as the last work to be undertaken by him for the salvation of man (John v. 21; xi. 25; 1 Cor. xv. 22, sq.; 1 Thess. iv. 15; Rev. i. 18). 2. All the dead will be raised, without respect to age, rank, or character in this world (John v. 28, 29; Acts xxiv. 15; 1 Cor. xv. 22). 3. This event is to take place not before the end of the world, or the general judgment (John v. 21; vi. 39, 40; xi. 24; 1 Cor. xv. 22-28; 1 Thess. iv. 15; Rev. xx. 11). 4. The manner in which this marvellous change shall be accomplished is necessarily beyond our present comprehension; and, therefore, the Scripture is content to illustrate it by figurative representations, or by proving the possibility and intelligibility of the leading facts. Some of the figurative descriptions occur in John v.; Matt. xxiv.; 1 Cor. xv. 52; 1 Thess. iv. 16; Phil. iii. 21. 5. The possibility of a resurrection is powerfully argued by Paul in 1 Cor. xv. 32, sq., by comparing it with events of common occurrence in the natural world. (See also ver. 12-14, and compare Acts iv. 2.) But although this body shall be so raised as to preserve its identity, it must yet undergo certain purifying changes to fit it for the kingdom of heaven, and to render it capable of immortality (1 Cor. xv. 35, sq.), so that it shall become a glorified body like that of Christ (ver. 49; Rom. vi. 9; Phil. iii. 21); and the bodies of those whom the last day finds alive, will undergo a similar change without tasting death (1 Cor. xv. 51, 53; 2 Cor. v. 4; 1 Thess. iv. 15, sq.; Phil. iii. 21).

REUBEN (*behold a son*), eldest son of Jacob by Leah (Gen. xxix. 32; xxxv. 23; xli. 8). His improper intercourse with Bilhah, his father's concubine wife, was an enormity too great for Jacob ever to forget, and he spoke of it with abhorrence even on his dying bed (Gen. xxxii. 22; xlix. 4). For his conduct in this matter, Jacob, in his last blessing, deprived him of the pre-eminence and double portion which belonged to his birth-right, assigning the former to Judah,

and the latter to Joseph (Gen. xlix. 3, 4; comp. ver. 8-10; xlviii. 5). The doom, 'Thou shalt not excel,' was exactly fulfilled in the destinies of the tribe descended from Reuben, which makes no figure in the Hebrew history, and never produced any eminent person. At the time of the Exodus, this tribe numbered 46,500 adult males, which ranked it as the seventh in population; but at the later census before entering Canaan, its numbers had decreased to 43,730, which rendered it the ninth in population (Num. i. 21; xxvi. 5). The Reubenites received for their inheritance the fine pasture-land (the present Beika) on the east of the Jordan, which to a cattle-breeding people, as they were, must have been very desirable (Num. xxxii. 1 sq.; xxxiv. 14; Josh. i. 14; xv. 17). This lay south of the territories of Gad (Deut. iii. 12, 16), and north of the river Arnon. Although thus settled earlier than the other tribes, excepting Gad and half Manasseh, who shared with them the territory beyond the Jordan, the Reubenites willingly assisted their brethren in the wars of Canaan (Num. xxxii. 27, 29; Josh. iv. 12); after which they returned to their own lands (Josh. xxii. 15); and we hear little more of them till the time of Hazael, king of Syria, who ravaged and for a time held possession of their country (2 Kings x. 33). The Reubenites, and the other tribes beyond the river, were naturally the first to give way before the invaders from the East, and were the first of all the Israelites sent into exile by Tiglath-pileser, king of Assyria, B.C. 773 (1 Chron. v. 26).

REVELATION. BOOK OF. In respect to the authorship of this book, it is to be observed that the writer styles himself John, but does not call himself an apostle (i. 4, 9; xxii. 8). Hence some have attributed the book to another John, usually designated the presbyter. But there is no direct evidence that this was the case; while on the other hand Justin Martyr, Tertullian, Clement of Alexandria, and Origen, all ascribe it to the Apostle. We are disposed, therefore, to abide by the ancient opinion that the book was written by the beloved disciple. Ecclesiastical tradition clearly favours this view, while the objections from alleged internal evidence, so earnestly urged by recent German critics, do not appear sufficiently strong to overturn it.

But the entire question of authorship is more curious than profitable. The book may not have been written by an apostle, and yet be equal in authority to any acknowledged production of an apostle. Luke was only an evangelist; and yet his writings are infallibly true and correct in every particular, because they proceeded from the Holy Spirit. The question whether the Apocalypse was written by an apostle or not, is of trifling importance as long as its inspiration is maintained. If any imagine that, in attempting to destroy the *directly apostolic* authorship, they lessen the value or disturb the canonical credit of the book, they are mistaken.

The canonical authority of the book has been called in question, both in ancient and modern times. But the external evidence in favour of its authenticity and genuineness is overwhelming, while internal circumstances amply confirm it.

The style, language, and manner of the book cannot be mistaken. In dignity and sublimity it is equal to any of the New Testament writings,

if not superior to them all. The variety and force of the images impress the mind of every reader with conceptions of a divine origin. Surely no uninspired man could have written in such a strain.

There is considerable difficulty in ascertaining the time and place at which it was written. The prevalent opinion is, that the book was written A.D. 96 or 97, at Patmos or Ephesus, after Domitian's death, i. e. under Nerva. There is no definite external evidence on this point, and, judging from internal circumstances, some writers assign it to the time of Nero, and the locality of Patmos, A.D. 67 or 68. Sir Isaac Newton fixed upon this date.

The books of the New Testament, like those of the Old, were designed to promote the instruction of God's people in all ages. They were adapted to teach, exhort, and reprove all mankind. They do not belong to the class of ephemeral writings that have long since fulfilled the purpose for which they were originally composed. Their object was not merely a local or partial one. So of the Apocalypse. It is suited to all. 'Blessed is he that readeth, and they that hear the words of this prophecy.' But this general characteristic is perfectly consistent with the fact that it arose out of specific circumstances, and was primarily meant to subserve a definite end. When first written, it was destined to suit the peculiar circumstances of the early Christians. The times were troublous. Persecution had appeared in various forms. The followers of Christ were exposed to severe sufferings for conscience sake. Their enemies were fierce against them. Comparatively few and feeble, the humble disciples of the Lamb seemed doomed to extinction. But the writer of the Apocalypse was prompted to present to them such views as were adapted to encourage them to steadfastness in the faith—to comfort them in the midst of calamity—and to arm them with resolution to endure all the assaults of their foes. Exalted honours, glorious rewards, are set before the Christian soldier who should endure to the end. A crown of victory—the approbation of the Redeemer—everlasting felicity;—these are prepared for the patient believer. In connection with such representations the final triumph of Christianity and the Messiah's peaceful reign with his saints, form topics on which the writer dwells with emphatic earnestness (See chap. i. 1-3; ii. 1; iii. 22; xxii. 6, 7, 10-17). The suffering Christians of primitive times may have sorrowfully thought that they should never be able to stand the shock of their bitter and bloody assailants, the power and policy of the world being leagued against them—but the statements of the writer all tend to the conclusion that truth should make progress in the earth, and the church, emerging out of all struggles, wax stronger and stronger. If such be the primary and principal aim of the book, it follows that we should not look in it for a history of the kingdoms of the world. To compose a civil history did not comport with the writer's object. The genius of Christ's kingdom is totally different from that of the kingdoms of the world. It advances steadily and silently, independently of, and frequently in opposition to them. Hence the Apocalypse cannot contain a history of the world. It exhibits a *history of the church*.

specially of its early struggles with the powers of darkness and the malice of superstition. Trials impending over the church, and judgments over her enemies,—these form the burden of the prophecy.

The body of the work is contained in chaps. iv.-xxii. 6, and is almost entirely a series of symbolic representations. To this is prefixed a prologue (i.-iv). A brief epilogue is subjoined (xxii. 6-21). The prologue is of considerable length, embracing separate epistles to the seven churches in Asia Minor, peculiarly fitted to admonish and console amid the sufferings which were impending. After the prologue or introduction, we come to the body of the work itself, commencing with the fourth chapter. With regard to the symbolical predictions of which this part of the work consists, the mere statement of the various conflicting theories which have been propounded would occupy a large volume. We cannot therefore enter upon a subject so extensive, but must content ourselves with referring the reader to the works in which the interpretation of these prophecies is discussed in all its bearings.

REZEPH, a city which occurs among those subdued by the Assyrians (2 Kings xix. 12; Isa. xxxvii. 12). It is possibly the same with the Rasapha which Abulfeda places at nearly a day's journey west of the Euphrates.

RE'ZIN, the last king of Damascus-Syria, slain by Tiglath-pileser (2 Kings xv. 37; xvi. 5-10; Isa. vii. 1; viii. 4-7) [**DAMASCUS**].

RE'ZON (*prince*); an officer of Hadadezer, king of Zobah, who established the independence of Damascus, and made it the seat of the kingdom of Damascus-Syria, so often mentioned in the history of the Hebrew kingdoms (1 Kings xi. 23, 24) [**DAMASCUS**].

RHEGIUM, a city on the coast of Italy, near its south-western extremity, opposite Messina in Sicily (Acts xviii. 13). It is now called Reggio, and is the capital of Calabria.

RHODA (*Rose*), a servant maid mentioned in Acts xii. 13.

RHODES, an island in the Mediterranean, near the coast of Asia Minor, celebrated from the remotest antiquity as the seat of commerce, navigation, literature, and the arts, but now reduced to a state of abject poverty by the devastations of war and the tyranny and rapacity of its Turkish rulers. It is of a triangular form, about forty-four leagues in circumference, twenty leagues long from north to south, and about six broad. It was famed in ancient times, and is still celebrated, for its delightful climate and the fertility of its soil. It contains two cities—Rhodes, the capital, inhabited chiefly by Turks, and a small number of Jews; and the ancient Lindus, now reduced to a hamlet, peopled by Greeks, who are almost all engaged in commerce. Besides these there are five villages occupied by Turks and a small number of Jews; and five towns and forty-one villages inhabited by Greeks. The whole population is estimated at 20,000. The city of Rhodes is famous for its huge brazen statue of Apollo, called Colossus, which stood at the mouth of the harbour, and was so high that ships passed in full sail between its legs. There is not a single vestige of this celebrated work of art now remaining. St. Paul appears to have visited

Rhodes while on his journey to Jerusalem, A.D. 58 (Acts xxi. 1).

The antiquities of Rhodes reach no farther back than the residence of the knights of St. John of Jerusalem. The remains of their fine old fortress, of great size and strength, are still to be seen. In modern times Rhodes has been chiefly celebrated as one of the last retreats of this military order, under whom it obtained great celebrity by its heroic resistance to the Turks; but in the time of Solymán the Great a capitulation was agreed upon, and the island was finally surrendered to the Turks, under whom it has since continued.

RIB'LAH, a town on the northern border of Palestine, in the district of Hamath, through which the Babylonians, both in their irruptions and departures, were accustomed to pass (Num. xxxiv. 11; 2 Kings xxiii. 33; xxv. 26; Jer. xxxix. 5; lii. 10). This place is nowhere mentioned but in the Bible.

RIDDLE, literally, 'something intricate or complicated.' An example of a riddle occurs in Judg. xiv. 12-19, where Samson proposes to the thirty young Philistines who attended his nuptials, an enigma, derived from the circumstance of his having lately found a swarm of bees and honey in the skeleton of the lion, which he had killed some months before, when he had come to espouse his wife. This riddle or enigma, though unfair in regard to those who accepted the pledge to unravel it, because they were ignorant of the particular fact by the knowledge of which alone it could be explained by them, nevertheless answers to the approved definition of an enigma, as consisting of an artful and abstruse proposition, put in obscure, ambiguous, and even contrary terms, in order to exercise the ingenuity of others in finding out its meaning.

RIM'MON, the name of several places in Palestine, probably distinguished by the presence of pomegranate-trees.

1. A city of the tribe of Simeon, in the south of Palestine (Josh. xv. 32; xix. 7; 1 Chron. iv. 32; Zech. xiv. 10).

2. A town on a high conical chalky rock or peak, north-east of Gibeath and Michmash, near the desert (Judg. xx. 45, 47; xxi. 13). The *Onomasticon* places it fifteen miles north of Jerusalem, which corresponds to the situation of this rock, which is still crowned by a village bearing the name of Rummon.

3. A city of Zebulun (Josh. xix. 3; 1 Chron. vi. 62).

4. A station of the Israelites after leaving Sinai (Num. xxxiii. 19).

RIM'MON, an idol worshipped by the Syrians (2 Kings v. 18). As this name is found nowhere but in the Bible, and there only in the present text, nothing positive can be affirmed concerning the power it symbolized.

RI'PHATH, a northern people descended from Gomer (Gen. x. 3).

RIZ'PAH (*a coal*); a concubine of Saul, memorable for the touching example of maternal affection which she afforded, in watching the dead bodies of her sons, and driving the birds away from them, when they had been gibbeted by the Gibeonites (2 Sam. iii. 7; xxi. 8, 10, 11).

ROSE. The Hebrew word rendered 'rose' in Sol. Song xi. 1, and Isa. xxxv. 1, is not now

generally understood to denote a rose, but probably a species of narcissus. But by the Greek word rendered 'rose' in the Apocryphal books (Ecclesi. xxiv. 14; xxxix. 13; l. 8; Wisd. xi. 8), that flower is generally allowed to be designated.

The rose was as highly esteemed among ancient, as it is among modern nations, if we may judge by the frequent references to it in the poets of antiquity. As we know that it continues to be the favourite flower of the Persians, and is much cultivated in Egypt, we might expect more frequent mention of some of its numerous species and varieties in the Jewish writings. This, however, is not the case, and probably arises from its being less common in a wild state in a comparatively dry and warm climate like that of Syria. It is, however, indigenous in some parts. Mouro, as quoted in Kitto's *Physical History of Palestine*, 'found in the valley of Baalbek, a creeping rose of a bright yellow colour in full bloom, about the end of May. About the same time, on advancing towards Rama and Joppa from Jerusalem, the hills are found to be to a considerable extent covered with white and pink roses.' Mariti found the greatest quantity of roses in the hamlet of St. John, in the desert of the same name. 'In this place the rose-plants form small forests in the gardens. The greatest part of the roses reared there are brought to Jerusalem, where rose-water is prepared from them, of which the scent is so very exquisite, that in every part of Lycia, and also in Cyprus, it is in request above all other rose-waters.' Burckhardt was struck with the number of rose-trees which he found among the ruins of Hozra beyond the Jordan. That the rose was cultivated in Damascus is well known. Indeed one species is named *Rosa Damascena* from being supposed to be indigenous there. 'In the gardens of the city roses are still much cultivated.' Mouro says that in size they are inferior to our damask rose, and less perfect in form; but that their odour and colour are far more rich. The only variety that exists in Damascus is a white rose, which appears to belong to the same species, differing only in colour.'

ROE. The Arabian gazelle is possibly denoted by the Hebrew word translated 'roe' in the Authorized Version.

ROLL. [WARRICK.]

ROMANS, THE EPISTLE TO THE. This epistle claims our interest more than the other didactic epistles of the Apostle Paul, because it is more systematic, and because it explains especially that truth which became subsequently the principle of the reformation, viz., righteousness through faith.

At the period when the apostle wrote the Epistle to the Romans, he was between fifty and sixty years old. After having spent two years and a half at Ephesus, he planned a journey to Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 21). Having spent about three months in travelling, he arrived at Corinth, where he remained three months (Acts xx. 2); and during this second abode at Corinth he wrote the Epistle to the Romans (comp. 1 Cor. xvi. 1-3, and 2 Cor. ix. with Rom. xv. 25). Paul dispatched this letter by a Corinthian woman, who was just then travelling to Rome (xvi. 1), and sent greetings from an inhabitant of Corinth (xvi. 23; comp. 1 Cor. i. 14).

It is probable that the epistle was written about the year 58 or 59. The congregation of Christians at Rome was formed at a very early period, but its founder is unknown. Paul himself mentions two distinguished teachers at Rome, who were converted earlier than himself. According to Rom. i. 8, the Roman congregation had then attained considerable celebrity, as their faith was spoken of throughout the whole world. It is probable that the Jews at Rome were first converted to Christianity. But at the time when this epistle was written it appears that the Gentile Christians in the Roman church were then more numerous than the converted Jews.

In the introduction the apostle states that he had long entertained the wish of visiting the metropolis, in order to confirm the faith of the church, and to be himself comforted by that faith. But having hitherto been hindered from carrying his intention into effect, he avails himself of the opportunity afforded by the journey of Phœbe to Rome, to send in writing the sum and substance of the Christian doctrine which he had been prevented from preaching in that city.

The apostle commences his epistle by describing the two great divisions of the human race, viz., those who underwent the preparatory spiritual education of the Jews, and those who did not undergo such a preparatory education. The chief aim of all nations, according to him, should be the *righteousness before the face of God*, or absolute realization of the moral law. According to the apostle, the heathen also have their law, as well religious as moral internal revelation (Rom. i. 19, 32; ii. 15). The heathen have, however, not fulfilled that law which they knew, and are in this respect like the Jews, who also disregarded their own law (ii.). Both Jews and Gentiles are transgressors, or by the law separated from the grace and sonship of God (Rom. ii. 12; iii. 23); consequently if blessedness could only be obtained by fulfilling the demands of God, no man could be blessed. God, however, has gratuitously given righteousness and blessedness to all who believe in Christ (iii. 21-31); the Old Testament also recognises the value of religious faith (iv.): thus we freely attain to peace and sonship of God presently, and have before us still greater things, viz., the future development of the kingdom of God (v. 1-11). The human race has gained in Christ much more than it lost in Adam (v. 12, 21). This doctrine by no means encourages sin (vi.): on the contrary, men who are conscious of divine grace fulfil the law much more energetically than they were able to do before having attained to this knowledge, because the law alone is even apt to sharpen the appetite for sin, and leads finally to despair (vii.); but now we fulfil the law by means of that new spirit which is given unto us, and the full development of our salvation is still before us (viii. 1-27). The sufferings of the present time cannot prevent this development, and must rather work for good to them whom God from eternity has viewed as faithful believers; and nothing can separate such believers from the eternal love of God (viii. 28-39). It causes pain to behold the Israelites themselves shut out from salvation; but they themselves are the cause of this exclusion, because they wanted to attain salvation by their own resources and exertions, by their descent from Abraham, and by their fulfil-

ment of the law : thus, however, the Jews have not obtained that salvation which God has freely offered under the sole condition of faith in Christ (ix.); the Jews have not entered upon the way of faith, therefore the Gentiles were preferred, which was predicted by the prophets. However, the Jewish race, as such, has not been rejected; some of them obtain salvation by a selection made not according to their works, but according to the grace of God. If some of the Jews are left to their own obduracy, even their temporary fall serves the plans of God, viz., the vocation of the Gentiles. After the mass of the Gentiles shall have entered in, the people of Israel also, in their collective capacity, shall be received into the church (xi.).

The authenticity of this epistle has never been questioned.

ROME, the famous capital of the Western World, and the present residence of the Pope, stands on the river Tiber, about fifteen miles from its mouth, in the plain of what is now called the Campagna, in lat. 41° 54' N., long. 12° 28' E. The country around the city is not a plain, but a sort of undulating table-land, crossed by hills, while it sinks towards the south-west to the marshes of Maremma, which coast the Mediterranean. In ancient geography the country, in the midst of which Rome lay, was termed Latium, which, in the earliest times, comprised within a space of about four geographical square miles the country lying between the Tiber and the Numicius, extending from the Alban Hills to the sea, having for its chief city Laurentum. Here, on the Palatine Hill, was the city of Rome founded, but it was extended, by degrees, so as to take in six other hills, at the foot of which ran deep valleys that, in early times, were in part overflowed with water, while the hill sides were covered with trees. The site occupied by modern Rome is not precisely the same as that which was at any period covered by the ancient city: the change of locality being towards the north-west, the city has partially retired from the celebrated hills. About two-thirds of the area within the walls (traced by Aurelian) are now desolate, consisting of ruins, gardens, and fields, with some churches, convents, and other scattered habitations. Originally the city was a square mile in circumference. The ground on which the modern city is built covers about one thousand acres, or one mile and a half square; its walls form a circuit of fifteen miles, and embrace an area of three thousand acres. Three of the seven hills are covered with buildings, but are only thinly inhabited. The greatest part of the population is now comprised within the limits of the Campus Martius. The ancient city, however, was more than treble the size of the modern, for it had very extensive suburbs beyond the walls. The population in 1836 consisted of 153,678, exclusive of Jews, who amount to 3700.

The connection of the Romans with Palestine caused Jews to settle at Rome in considerable numbers. On one occasion, in the reign of Tiberius, when the Jews were banished from the city by the emperor, for the misconduct of some members of their body, not fewer than four thousand enlisted in the Roman army which was then stationed in Sardinia. From Philo also it appears that the Jews in Rome were allowed the free

use of their national worship, and generally the observance of their ancestral customs. Then, as now, the Jews lived in a part of the city appropriated to themselves, where with a zeal for which the nation had been some time distinguished, they applied themselves with success to proselytising. They appear, however, to have been a restless colony; for when, after their expulsion under Tiberius, numbers had returned to Rome, they were again expelled from the city by Claudius. It is probable that the Christians, as well as the Jews, properly so called, were included in this expulsion.

The question, Who founded the church at Rome? is one of some interest as between Catholic and Protestant. The former assigns the honour to Peter, and on this grounds an argument in favour of the claims of the papacy. There is, however, no sufficient reason for believing that Peter was ever even so much as within the walls of Rome.

ROOF. [HOUSE.]

ROOM. [HOUSE.]

RUBY. The word rendered 'ruby' in the Authorized Version (Job xxviii. 18; Prov. iii. 15; viii. 11; xx. 15; xxxi. 10; Lam. iv. 7) appears rather to indicate 'pearls.' The ruby is, however, generally supposed to be represented by the word rendered 'agates' in Ezek. xxvii. 6, and Isa. liv. 12. The Oriental ruby is distinguished for its vivid red colour, and was regarded as the most valuable of precious stones next after the diamond.

RUE. The word *rue* occurs only in Luke xi. 42. 'But woe unto you, Pharisees! for ye tithe mint and rue and all manner of herbs, and pass over judgment,' &c. In the parallel passage, Matt. xxiii. 23, *dill*, translated *anise* in the English Version, is mentioned instead of rue. Both dill and rue were cultivated in the gardens of Eastern countries in ancient times as they are at the present day. Rue was highly esteemed as a medicine, even as early as the time of Hippocrates. Pliny says, 'Rue is an herbe as medicinale as the best. That of the garden hath a broader leafe, and brauncheth more than the wild, which is more hottie, vehement, and rigorous in all operations; also that is it sowed usually in Februarie, when the western wind, Favonius, bloweth.' That it was employed as an ingredient in diet, and as a condiment, is abundantly evident from Apicius, as noticed by Celsius, and is not more extraordinary than the fondness of some Eastern nations for assafetida as a seasoning to food. That one kind was cultivated by the Israelites is evident from its being mentioned as one of the articles of which the Pharisees paid their tithes, though they neglected the weightier matters of the law. Rosenmüller states that in the Talmud the rue is indeed mentioned amongst kitchen herbs; but, at the same time, it is there expressly stated, that it is tithe free, it being one of those herbs which are not cultivated in gardens, according to the general rule established in the Talmud.

RUFUS. A person of this name was one of the sons of Simon the Cyrenian, who was compelled to bear the cross of Christ (Mark xv. 21): he is supposed to be the same with the Rufus to whom Paul, in writing to the Romans, sends his greeting in the remarkable words, 'Salute Rufus, chosen in the Lord, and his mother and mine'

(Rom. xvi. 13). He is said to have been one of the seventy disciples, and eventually to have had charge of the church at Thebes.

RUSH. The Hebrew word *gome*, translated 'rush' and 'bulrush' in our Authorized Version (Job viii. 11; Isa. xxxv. 7; Exod. ii. 3; Isa. xviii. 2) should be rendered *papyrus*.

291.

This plant is now well known: it belongs to the tribe of *sedges*, and is not a rush or bulrush, as in the Authorized Version. It may be seen growing to the height of six or eight feet, even in tubs, in the hothouses of this country, and is described by the ancients as growing in the shallow parts of the Nile. The root is fleshy, thick, and spreading; the stems triangular, eight or ten feet in height, of which two or so are usually under water, thick below but tapering towards the apex, and destitute of leaves; those of the base broad, straight, and sword-shaped, but much shorter than the stem. Cassiodorus, as quoted by Carpenter, graphically described it as it appears on the banks of the Nile, 'There rises to the view this forest without branches, this thicket without leaves, this harvest of the waters, this ornament of the marshes.'

The *papyrus* was well known to the ancients as a plant of the waters of Egypt. It was found in almost every part of Egypt inundated by the Nile, in the Delta, especially in the Sebennytic nome, and in the neighbourhood of Memphis, &c. By some it was thought peculiar to Egypt; by others it was thought to be a native also of India, of the Euphrates near Babylon, of Syria, and of Sicily; and there is no reason why it should not grow in the waters of hot countries, as, for instance, near Babylon or in India.

A brief description of the uses of this plant, as given in the works of the ancients, is thus summed up by Parkinson in his *Herbal*, p. 1207: 'The plant, say the ancients, is sweete, and used by the Egyptians, before that bread of corne was known

unto them, for their food, and in their time was chewed, and the sweetnesse sucked forth, the rest being spit out; the roote serveth them not only for fawell to burne, but to make many sorts of vessels to use, for it yielded much matter for the purpose. The stalke is profitable to many uses, as to make ships, and of the bark to weave, and make sailes, mats, carpets, some kinds of garments, and ropes also.' The construction of *papyrus* boats is mentioned by Theophrastus; and Plutarch says, 'Isis circumnavigated the marshes in a *papyrus* wherry for the purpose of collecting the pieces of Osiris's body.' From Heliodorus's account it appears that the Ethiopians made use of similar boats; for he relates that the Ethiopians passed in reed wherries over the Astaboras; and he adds that these reed wherries were swift sailing, being made of a light material, and not capable of carrying more than two or three men. Bruce relates that a similar kind of boat was made in Abyssinia even in his time, having a keel of acacia wood, to which the *papyrus* plants, first sewed together, are fastened, being gathered up before and behind, and the ends of the plants thus tied together. Representations of some Egyptian boats are given in the *Pictorial Bible* (ii. p. 135); where the editor remarks that when a boat is described as being of reeds or rushes or *papyrus* (as in Egypt), a covering of skin or bitumen is to be understood. That the *papyrus* was employed for making paper is also well known, and Wilkinson mentions that from ancient paper being found at Thebes and elsewhere, it is evident that this application of it was much anterior to the time of Alexander the Great.

RUTH, a Moabitish woman, brought, under peculiar circumstances, into intimate relation with the stock of Israel, and whose history is given in one of the books of the sacred canon which bears her name. The narrative that brings her into the range of inspired story is constructed with idyllic simplicity and pathos, and forms a pleasant relief to the sombre and repulsive shades of the picture which the reader has just been contemplating in the later annals of the Judges. It is the domestic history of a family compelled, by the urgency of a famine, to abandon the land of Canaan, and seek an asylum in the territories of Moab. Elimelech, the head of the emigrating household, dies in the land of his sojourn, where his two surviving sons 'took them wives of the women of Moab; the name of the one was Orpah, and the name of the other Ruth.' On the death of the sons, the widowed parent resolving to return to her country and kindred, the filial affection of the daughters-in-law is put to a severe test, and Ruth determines at all hazards to accompany Naomi. She accordingly arrives at Bethlehem with her mother, where, in the extremity of want, she goes to glean after the reapers in the harvest-field of Boaz, a wealthy kinsman of her deceased father-in-law, Elimelech. Attracted by her appearance, and informed of her exemplary conduct towards her mother-in-law, Boaz bade her return from day to day, and directed his servants to give her a courteous welcome. An omen so propitious could not but be regarded as a special encouragement to both, and Naomi therefore counselled Ruth to seek an opportunity for intimating to Boaz the claim she had upon him as the nearest kinsman of her deceased husband. Boaz received

this intimation favourably, yet he replied that there was another person more nearly related to the family than himself, whose title must first be disposed of. Without delay he applied himself to ascertain whether the kinsman in question was inclined to assert his right—a right which extended to a purchase of the ransom (at the Jubilee) of Elimelech's estate. Finding him indisposed to the measure, he obtained from him a release, ratified according to the legal forms of the time, and then proceeded himself to redeem the patrimony of Elimelech, and espoused the widow of his son, in order 'to raise up the name of the dead upon his inheritance.' From this union sprang David, the illustrious king of Israel, whose line the writer traces up, in conclusion, through Boaz, to Pharez, son of Judah.

THE BOOK OF RUTH is inserted in the Canon, according to the English arrangement, between the book of Judges and the books of Samuel, as a sequel to the former and an introduction to the latter. The true date and authorship of the book are alike unknown, though the current of opinion is in favour of Samuel as the writer. Its canonical authority has never been questioned.

RYE. The word thus rendered (*Kussemeth*) in Exod. ix. 32; Isa. xxviii. 25, is translated *fitches* in Ezek. iv. 9; but its true meaning still remains uncertain. It was one of the cultivated grains both of Egypt and of Syria, and one of those employed as an article of diet. It was also sown along with wheat, or, at least, its crop was in the same state of forwardness; for we learn from Exod. ix. 32, that in the seventh plague the hail-storm smote the barley which was in the ear, and the flax which was balled; but that the wheat and the *kussemeth* were not smitten, for they were not grown up. That *kussemeth* was cultivated in Palestine we learn from Isa. xxviii. 25, where it is mentioned along with ketzah and cumin, wheat and barley; and sown, according to some translators, 'on the extreme border of the fields,' as a kind of fence for other kinds of corn. This is quite an Oriental practice, and may be seen in the case of flax and other grains in India, at the present day. The rye is a grain of cold climates, and is not cultivated even in the south of Europe. Korte declares that no rye grows in Egypt; and Shaw states that rye is little known in Barbary and Egypt. That the *kussemeth* was employed for making bread by the Hebrews we know from Ezek. iv. 9, where the prophet is directed to 'take wheat, and barley, and beans, and lentiles, and millet, and *kussemeth*, and put them in a vessel, and make bread thereof.'

Though it is very unlikely that *kussemeth* can mean rye, it is not easy to say what cultivated grain it denotes. The principal kinds of grain, it is to be observed, are mentioned in the same passages with the *kussemeth*. Celsius has, as usual, with great labour and learning, collected together the different translations which have been given of this difficult word. In the Arabic translation of Exod. ix. 32, it is rendered *julban*, a species of pulse. By other Arabian writers it is considered to mean peas, and also beans. Many translate it vetches, as in the Authorized Version of Exod. ix. 32. The majority, however, instead of a legume, consider *kussemeth* to indicate one of the cereal grains, as the rye or the oat, neither of which is it likely to have been. Several eminent

authors consider that 'spelt' is the grain referred to, and it seems very probable that this is the true meaning. There are two kinds of spelt, both of which were cultivated and esteemed as food in Egypt and Syria. That it was highly esteemed by the ancients is evident from Dioscorides describing it as more nourishing than barley, and grateful in taste. The goodness of this grain is also implied from the name of semen having been especially applied to it.

Triticum Spelta, or *Spelt*, is in many respects so closely allied to the common wheats as to have been thought by some old authors to have been the original stock of the cultivated kinds; but for this there is no foundation, as the kind cultivated for ages in Europe does not differ from specimens collected in a wild state. These were found by a French botanist, Michaux, in Persia, on a mountain four days' journey to the north of Hamadan. It is cultivated in many parts of Germany, in Switzerland, in the south of France, and in Italy. It is commonly sown in spring, and collected in July and August. Though some circumstances seem to point to this species as the *kussemeth* of Scripture, the subject is still susceptible of further investigation, and can only be finally determined by first ascertaining the modern agriculture of eastern countries, and comparing it with the ancient accounts of the agriculture of Syria and Egypt.

S.

SABBATH. The original word signifies simply rest, cessation from labour or employment.

The term, however, became appropriated in a specific religious sense, to signify the dedication of a precise portion of time to cessation from worldly labour, and a peculiar consecration by virtue of which a sanctity was ascribed to the portion of time so set apart.

Was there any Sabbath before the Law? This is a question of great importance; for Paley distinctly admits that, 'if the divine command was actually delivered at the creation, it was addressed, no doubt, to the whole human species alike, and continues, unless repealed by some subsequent revelation, binding upon all who come to the knowledge of it.' The mention made of the Sabbath in Gen. ii. 3, would seem to decide this question in the affirmative. The meaning of the passage admits of no dispute. To sanctify the seventh day clearly means, to set it apart for a sacred use. An attempt has been made to evade the force of this passage by assuming it to be an anticipation of an event which took place upwards of 2000 years afterwards. That God did not then bless and sanctify the Sabbath, but that when he did so, it was for the reason mentioned in the text. But this argument proceeds on the assumption that the book of Genesis was not written till after the giving of the law from Sinai. Of this there is not the slightest evidence, and it is in itself exceedingly improbable; besides this interpretation does evident violence to the context.

The division of time into periods of seven days of which mention is made in the account of the deluge, and which is found among all ancient nations, Egyptians, Arabians, Greeks, Romans, and

even among the American Indians, furnishes a strong confirmation of the opinion that the Sabbath is coeval with the creation. Besides, there is evidence that the Sabbath was known and observed by the Israelites before the law was delivered on Mount Sinai. This did not occur until the third month after the departure out of Egypt, whereas we are informed that in the second month the people of their own accord gathered a double portion of manna on the sixth day, because the seventh day was the Sabbath (Exod. xvi. 22). This is corroborated by the language of the fourth commandment, 'Remember the Sabbath day to keep it holy'—a mode of expression which is not used in reference to the Passover or any other festival which Moses had instituted. It is unnecessary to dwell on the fact that its position in the midst of the moral law distinctly points to its perpetual and universal obligation, while the circumstance that it had a peculiar relation to the Israelites did not alter its relation to other nations, or take it out of the class of laws to which it originally belonged.

That the Sabbath was binding under the Mosaic law, all are agreed, but some affirm that it is conclusively proved by Col. ii. 16 that the obligation ceased when the Jewish economy was abolished. 'The truth, however,' saith Bishop Horsley, 'is, that in the apostolical age, the first day of the week, though it was observed with great reverence, was not called the Sabbath-day, but the Lord's day; that the separation of the Christian church from the Jewish communion might be marked by the name as well as by the day of their weekly festival; and the name of the sabbath-days was appropriated to the Saturdays and certain days in the Jewish church which were likewise called Sabbaths in the law, because they were observed with no less sanctity. The sabbath days, therefore, of which St. Paul in this passage speaks, were not the Sundays of the Christians, but the Saturday and other sabbaths of the Jewish calendar. The Judaizing heretics, with whom St. Paul was all his life engaged, were strenuous advocates for the observance of these Jewish festivals in the Christian church; and his (St. Paul's) admonition to the Colossians is, that they should not be disturbed by the censures of those who reproached them for neglecting to observe these sabbaths with Jewish ceremonies.'

The transfer of the day on which the Sabbath is observed from the seventh to the first day of the week, is justified on the ground that the change was made under the authority of the Apostles. Some divines of great authority are of opinion that the day itself was not an essential part of the original enactment, which ordains not necessarily every seventh day, but one day in seven, as holy time. In the primitive ages of man, the creation of the world was the beneficence by which God was principally known, and for which he was chiefly to be worshipped. The Jews, in their religious assemblies, had to commemorate other blessings—the political creation of their nation out of Abraham's family, and their deliverance from Egyptian bondage. Christians have to commemorate, besides the common benefit of the creation, the transcendent blessing of our redemption,—our new creation to the hope of everlasting life, of which our Lord's resurrec-

tion on the first day of the week was a sure pledge and evidence. Thus in the progress of ages, the Sabbath acquired new ends, by new manifestations of the divine mercy; and these new ends justify corresponding alterations of the original institution. Horsley, and those who agree with him, allege, that upon our Lord's resurrection, the Sabbath was transferred in memory of that event, the great foundation of the Christian's hope, from the last to the first day of the week. 'The alteration seems to have been made by the authority of the Apostles, and to have taken place the very day in which our Lord arose; for on that day the Apostles were assembled; and on that day sevennight they were assembled again. The celebration of these two first Sundays was honoured by our Lord's presence. It was, perhaps, to set a mark of distinction upon this day in particular, that the intervening week passed off, as it would seem, without any repetition of his first visit to the eleven Apostles. From that time, the Sunday was the constant Sabbath of the primitive church. The Christian, therefore, who devoutly sanctifies one day in seven, although it be on the first day of the week, not the last, as was originally ordained, may rest assured, that he fully satisfies the spirit of the ordinance' (Horsley, l. 334, 335; compare Holden's *Christian Sabbath*, pp. 286, 287).

In justification of the change, it has also been well remarked, that the same portion of time which constituted the seventh day from the creation could not be simultaneously observed in all parts of the earth, and that it is not therefore probable that the original institution expressed more than one day in seven—a seventh day of rest after six days of toil, from whatever point the enumeration might set out or the weekly cycle begin. If more had been intended, it would have been necessary to establish a rule for the reckoning of days themselves, which has been different in different nations; some reckoning from evening to evening, as the Jews do now; others from midnight to midnight, &c. Even if this point were determined, the difference of time produced by difference of latitude and longitude would again throw the whole into disorder; and it is not probable that a law intended to be universal would be fettered with that circumstantial exactness which would render difficult and sometimes doubtful astronomical calculations necessary in order to its being obeyed according to the intentions of the law-giver.

SABBATH-DAY'S JOURNEY (Acts i. 12), the distance which the Jews were permitted to journey from and return to their places of residence upon the Sabbath-day (Exod. xvi. 29). There is some diversity of sentiment with respect to the precise distance indicated. But taking all circumstances into account, it seems likely that the ordinary Sabbath-day's journey was a somewhat loosely determined distance, seldom more than the whole and seldom less than three-quarters of a geographical mile.

SABBATIC YEAR. [**JOBILEE.**]

SABZEANS. [**SHERA**]

SACKCLOTH. The sackcloth mentioned in Scripture was, as it is still in the East, a coarse black cloth, commonly made of hair (Rev. vi. 12), and was used for straining liquids, for sacks, and for mourning garments. In the latter case it was

worn instead of the ordinary raiment, or bound upon the loins, or spread under the mourner on the ground (Gen. xxxvii. 34; 1 Kings xxiii. 2; Isa. lviii. 5; Jerl. i. 8; Jon. iii. 5) [MOURNING]. Such garments were also worn by prophets, and by ascetics generally (Isa. xx. 2; Zech. iii. 4; comp. 2 Kings i. 8; Matt. v. 4).

SACRIFICES. The sacrifices and other offerings required by the Hebrew ritual have been enumerated under OFFERING; and in this place it is only requisite to offer a few remarks upon the great and much controverted questions—Whether sacrifice was in its origin a human invention, or a divine institution; and whether any of the sacrifices before the law, or under the law, were sacrifices or expiation.

From the universality of sacrifice, it is obvious that the rite arose either from a common source, or from a common sentiment among nations widely dispersed, and very differently constituted. Remembering that Noah, the common ancestor of the post-diluvian nations, offered sacrifice, we are enabled to trace back the custom through all nations to him; and he doubtless derived it through the antediluvian fathers, from the sacrifices which the first men celebrated, of which we have an example in that of Abel. The question concerning the divine or human origin of sacrifices, therefore, centres upon the conclusions which we may be able to draw from the circumstances and preliminaries of that transaction. Abel brought for sacrifice one of the lambs of his flock, for he was a shepherd; and with his offering God was well pleased: Cain brought of the fruits of the ground, for he was a husbandman; and with his offering God was not well pleased. We are told by the Apostle (Heb. xi. 4) that it was 'by faith that Abel offered a more acceptable sacrifice than Cain,' which presupposes a divine revelation; otherwise we cannot see how faith could have been exercised, or to what object it could be directed.

That this was not the first sacrifice is held by many to be proved by the fact, that 'unto Adam and his wife the Lord made coats of skin, and clothed them' (Gen. iii. 21); for, it is urged, that as animal food does not appear to have been used before the deluge, it is not easy to understand whence these skins came, probably before any animal had died naturally, unless from beasts offered in sacrifice. And if the first sacrifices had been offered by Adam, the arguments for the divine institution of the rite are of the greater force, seeing that it was less likely to occur spontaneously to Adam than to Abel, who was a keeper of sheep. Further, if the command was given to Adam, and his sons had been trained in observance of the rite, we can the better understand the merit of Abel, and the demerit of Cain, without further explanation. Apart from any considerations arising out of the skin-vestures of Adam and his wife, it would seem that if sacrifice was a divine institution, and, especially, if the rite bore a peculiar significance, it would have been at once prescribed to Adam, after sin had entered the world, and death by sin, and not have been postponed till his sons had reached manhood.

Among the considerations urged in support of the opinion, that sacrifice must have originated in a divine command, it has been suggested as exceedingly doubtful, whether, independently of

such a command, and as distinguished from vegetable oblations, animal sacrifice, which involves the practice of slaughtering and burning an innocent victim, could ever, under any aspect, have been adopted as a rite likely to gain the favour of God. Our own course of scriptural education prevents us, perhaps, from being competent judges on this point; but we have means of judging how so singular a rite must strike the minds of thinking men, not in the same degree prepossessed by early associations. The ancient Greek masters of thought not unfrequently expressed their astonishment how, and upon what rational principles, so strange an institution as that of animal sacrifice could ever have originated; for as to the notion of its being *pleasing* to the Deity, such a thing struck them as a manifest impossibility.

A strong moral argument in favour of the divine institution of sacrifice, somewhat feebly put by Hallet (*Comment* on Heb. xi. 4, cited by Magee, *On the Atonement*), has been reproduced with increased force by Faber (*Prim. Sacrifice*, p. 183). It amounts to this:—

Sacrifice, when uncommanded by God, is a mere act of gratuitous superstition. Whence, on the principle of St. Paul's reprobation of what he denominates will-worship, it is neither acceptable nor pleasing to God.

But sacrifice, during the patriarchal ages, was accepted by God, and was plainly honoured with his approbation.

Therefore sacrifice, during the patriarchal age, could not have been an act of superstition uncommanded by God.

If, then, such was the character of primitive sacrifice: that is to say, if primitive sacrifice was *not* a mere act of gratuitous superstition uncommanded by God,—it must, in that case, indubitably have been a divine, and not a human institution.

If it be held that any of the ancient sacrifices were expiatory or piacular, the argument for their divine origin is strengthened; as it is hard to conceive the combination of ideas under which the notion of expiatory sacrifice could be worked out by the human mind. The doctrine of an atonement by animal sacrifice cannot be deduced from the light of nature, or from the principles of reason. If, therefore, the idea existed, it must either have arisen in the fertile soil of a guessing superstition, or have been divinely appointed. Now we know that God cannot approve of unwarranted and presumptuous superstition; if therefore he can be shown to have received with approbation a species of sacrifice undiscoverable by the light of nature, or from the principles of reason, it follows that it must have been of his own institution.

That piacular sacrifices existed under the law of Moses can scarcely admit of denial. But the question, of the existence of expiatory sacrifice before the law, is more difficult, and is denied by many, who believe that it was revealed under the law. The arguments already stated in favour of the divine institution of primitive sacrifice, go equally to support the existence of piacular sacrifice; the idea of which seems more urgently to have required a divine intimation. Besides, expiatory sacrifice is found to have existed among all nations, in conjunction with eucharistic and impetratory sacrifices; and it lies at the root of

the principle on which human sacrifices were offered among the ancient nations. This being the case, it is difficult to believe but that the idea was derived, along with animal sacrifice itself, from the practice of Noah, and preserved among his various descendants. This argument, if valid, would show the primitive origin of piscular sacrifice. Now there can be no doubt that the idea of sacrifice which Noah transmitted to the post-diluvian world, was the same that he had derived from his pious ancestors, and the same that was evinced by the sacrifice of Abel, to which we are, by the course of the argument, again brought back. Now if that sacrifice was expiatory, we have reason to conclude that it was divinely commanded: and the supposition that it was both expiatory and divinely commanded, makes the whole history far more clear and consistent than any other which has been or can be offered. It amounts then to this—that Cain, by bringing an eucharistic offering, when his brother brought one which was expiatory, denied virtually that his sin deserved death, or that he needed the blood of atonement.

These are the principal considerations which seem suitable to this place, on a subject to the complete investigation of which many large volumes have been devoted.

SACRIFICE, HUMAN. The offering of human life, as the most precious thing on earth, came in process of time to be practised in most countries of the world. All histories and traditions darken our idea of the earlier ages with human sacrifices. But the period when such prevailed was not the earliest in time, though probably the earliest in civilization. The practice was both a result and a token of barbarism more or less gross. In this, too, the dearest object was primitively selected. Human life is the most precious thing on earth, and of this most precious possession the most precious portion is the life of one's child. Children therefore were offered in fire to the false divinities, and in no part of the world with less regard to the claims of natural affection than in the land where, at a later period, the only true God had his peculiar worship and highest honours.

It is under these circumstances a striking fact that the Hebrew religion, even in its most rudimentary condition, should be free from the continuation of human sacrifices. The case of Isaac and that of Jephthah's daughter cannot impair the general truth, that the offering of human beings is neither enjoined, allowed, nor practised in the Biblical records. On the contrary, such an offering is strictly prohibited by Moses, as adverse to the will of God, and an abomination of the heathen. 'Thou shalt not let any of thy seed pass through the fire to Moloch: defile not yourselves with any of these things' (Lev. xviii. 21; see also ch. xx. 2; Deut. xii. 31; Ps. cvi. 37; Isa. lxvi. 3; Jer. xxiii. 37). We do not hesitate to urge this fact as not least considerable among many proofs not only of the superior character, but of the divine origin of the Hebrew worship.

SADDUCEES: one of the three sects of Jewish philosophers, of which the Pharisees and the Essenes were the others, who had reached their highest state of prosperity about the commencement of the Christian era.

The peculiar doctrines of the Sadducees natu-

rally sprung out of Pharisaic errors; but the time when this sect came into existence history does not define. There can be no doubt, however, that they were posterior to the Pharisees. And although so soon as the Pharisaic elements began to become excessive, there existed in Judaism itself a sufficient source for Sadduceism, yet, as a fact, we have no doubt that Grecian philosophy lent its aid to the development of Sadduceism. Whence we are referred for the rise of the latter to the period when the conquests and the kingdoms which ensued from the expedition of Alexander had diffused a very large portion of Grecian civilization over the soil of the East, and especially over Western Asia.

As may be inferred from what has been advanced, the Sadducees stood in direct opposition to the Pharisees. So they are described by Josephus, and so they appear in the New Testament. Hostile, however, as these two sects were, they united for the common purpose of opposing our Lord (Matt. iii. 7; xvi. 1, 6, 11, sq.; xxii. 23, 34; Acts iv. 1; v. 17). In opposing the Pharisees the Sadducees were led to impeach the principal doctrines, and so to deny all the 'traditions of the elders,' holding that the law alone was the written source of religious truth. By more than one consideration, however, it might be shown that they are in error who so understand the fact now stated, as if the Sadducees received no other parts of the Jewish canon than the Pentateuch; for in truth they appear to have held the common opinion regarding the sacred books. The Sadducees taught that the soul of man perished together with his body, and that of course there was neither reward nor punishment after death (Joseph. *De Bell. Jud.* ii. 8. 14; comp. Matt. xxii. 23). Indeed they appear to have disowned the moral philosophy which obtrudes the idea of recompense.

They held that the Scriptures did not contain the doctrine of a future life. They were thus naturally led also to deny the existence of angels and spirits (Acts xxiii. 8). They taught the absolute freedom of the human mind, and according to Josephus, while 'the Pharisees ascribe all to fate and to God, the Sadducees take away fate entirely, and suppose that God is not concerned in our doing or not doing evil; and they say that to act what is good or what is evil is in man's own choice; and that all things depend on our own selves.' An inference injurious to them has been deduced from this position, as if they denied divine providence altogether; but their reception of the canonical books, and their known observance of the usages for divine worship therein prescribed, are incompatible with such a denial.

As might be expected from the nature of their system, their doctrines held sway over but comparatively few persons, and those mostly men distinguished by wealth or station. What Josephus says of the repulsiveness of their manners is in keeping with their general principles. A sceptical materialism is generally accompanied by an undue share of self-confidence and self-esteem, which are among the least sociable of human qualities.

The Sadducees, equally with the Pharisees, were not only a religious but a political party. Indeed as long as the Mosaic polity retained an

influence, social policy could not be sundered from religion; for religion was everything. Accordingly the Sadducees formed a part of the Jewish parliament, the Sanhedrim (Acts xxiii. 6), and sometimes enjoyed the dignity of supreme power in the high-priesthood. Their possession of power, however, seems to have been owing mainly to their individual personal influence, as men of superior minds or eminent position, since the general current of favour ran adversely to them, and their enemies, the Pharisees, spared no means to keep them and their opinions in the background.

SAFFRON occurs only once in the Old Testament, viz. in Cant. iv. 14, where it is mentioned along with several fragrant and stimulant substances, such as spikenard, calamus, and cinnamon, trees of frankincense, myrrh, and aloes; we may, therefore, suppose that it was some substance possessed of similar properties. Saffron has from the earliest times been cultivated in Asiatic countries, as it still is in Persia and Cashmere. Dioscorides describes the different kinds of it, and Pliny states that the benches of the public theatres were strewed with saffron: indeed 'the ancients frequently made use of this flower in perfumes. Not only saloons, theatres, and places which were to be filled with a pleasant fragrance were strewed with this substance, but all sorts of viscous tinctures retaining the scent were made of it, and this costly perfume was poured into small fountains, which diffused the odour that was so highly esteemed. Even fruit and comfures placed before guests and the ornaments of the rooms were spread over with it. It was used for the same purpose as the modern pot-pourri.' In the present day a very high price is given in India for saffron imported from Cashmere; native dishes are often coloured and flavoured with it, and it is in high esteem as a stimulant medicine.

The name *saffron*, as usually applied, does not denote the whole plant, nor even the whole flower of *crocus sativus*, but only the stigmas, with part of the style, which, being plucked out, are carefully dried. These, when prepared, are dry, narrow, thread-like, and twisted together, of an orange-yellow colour, having a peculiar aromatic and penetrating odour, with a bitterish and somewhat aromatic taste, tinging the mouth and saliva of a yellow colour. Sometimes the stigmas are prepared by being submitted to pressure, and thus made into what is called *cake saffron*, a form in which it is still imported from Persia into India. Hay saffron is obtained in this country chiefly from France and Spain, though it is also sometimes prepared from the native *crocus* cultivated for this purpose. Saffron was formerly highly esteemed as a stimulant medicine, and still enjoys high repute in Eastern countries, both as a medicine and as a condiment.

SA'LAH (a shoot), a son or grandson of Arphaxad (Gen. x. 24; xi. 13; Luke iii. 35).

SAL'AMIS, one of the chief cities of Cyprus, on the south-east coast of the island (Acts xiii. 5). It was afterwards called Constantia, and in still later times Famagusta [CYPRUS].

SALA'THIEL. [SHEAL'TIEL.]

SA'LEM (peace), the original name of Jerusalem (Gen. xiv. 18; Heb. vii. 1, 2), and which

continued to be used poetically in later times (Ps. lxxvi. 2) [JERUSALEM].

SAL'IM, a place near Enon, where John baptized (John iii. 23). Nothing is known of this site.

SAL'MON (clothed), the father of Boaz (Ruth iv. 21; Matt. i. 4, 5; Luke iii. 32).

SALMO'NE, a promontory forming the eastern extremity of the island of Crete (Acts xxvii. 7).

SALO'ME, a woman of Galilee, who accompanied Jesus in some of his journeys, and ministered unto him; and was one of those who witnessed his crucifixion and resurrection (Mark xv. 40; xvi. 1). It is gathered by comparing these texts with Matt. xxvii. 56, that she was the wife of Zebedee, and mother of the apostles James and John.

SALOME was also the name (though not given in Scripture) of that daughter of Herodias, whose dancing before her uncle and father-in-law, Herod Antipas, was instrumental in procuring the decapitation of John the Baptist [HERODIAN FAMILY; JOHN THE BAPTIST].

SALT was procured by the Hebrews from two sources: first, from rock-salt, obtained from hills of salt which lie about the southern extremity of the Dead Sea; and secondly, from the waters of that sea, which, overflowing the banks yearly, and being exhaled by the sun and the heat, left behind a deposit of salt both abundant and good.

From Job vi. 6 it is clear that salt was used as a condiment with food. Salt was also mixed with fodder for cattle (Isa. xxx. 24). As offerings, viewed on their earthly side, were a presentation to God of what man found good and pleasant for food, so all meat-offerings were required to be seasoned with salt (Lev. ii. 13). Salt, therefore, became of great importance to Hebrew worshippers; it was sold accordingly in the temple market, and a large quantity was kept in the Temple itself, in a chamber appropriated to the purpose. The incense, 'perfume,' was also to have salt as an ingredient (Exod. xxx. 35; marginal reading 'salted'), where it appears to have been symbolical, as well of the divine goodness as of man's gratitude, on the principle that of every bounty vouchsafed of God, it became man to make an acknowledgment in kind.

As salt thus entered into man's food, so, to eat salt with any one, was to partake of his fare, to share his hospitality; and hence, by implication, to enjoy his favour, or to be in his confidence. Hence, also, salt became an emblem of fidelity and of intimate friendship. At the present hour the Arabs regard as their friend him who has eaten salt with them, that is, has partaken of their hospitality. The domestic sanctity which thus attached itself to salt was much enhanced in influence by its religious applications, so that it became symbolical of the most sacred and binding of obligations. Accordingly 'a covenant of salt' was accounted a very solemn bond (Num. xviii. 19; 2 Chron. xiii. 5; Lev. ii. 13): a signification to which force would be given by the preservative quality of salt.

But salt, if used too abundantly, is destructive of vegetation and causes a desert. Hence arose another class of figurative applications. Destroyed

cities were sown with salt to intimate that they were devoted to perpetual desolation (Judg. ix. 45); salt became a symbol of barrenness (Deut. xxix. 23; Zeph. ii. 9); and 'a salt land' (Jer. xvii. 6) signifies a sterile and unproductive district (Job xxxix. 6).

We have reserved to the end reference to a singular usage among the Israelites, namely, washing new-born infants in salt water; which was regarded as so essential that those could have hardly any other than an ill fate who were deprived of the rite (Ezek. xvi. 4). The practice obviously arose from a regard to the preserving, the domestic, the moral, and the religious uses to which salt was applied, and of which it became the emblem.

SALUTATION. The forms of salutation that prevailed among the Hebrews, so far as can be collected from Scripture, are the following:—

1. *'Blessed be thou of the Lord,'* or equivalent phrases.

2. *'The Lord be with thee.'*

3. *'Peace be unto thee,'* or *'upon thee,'* or *'with thee.'* In countries often ravaged, and among people often ruined by war, 'peace' implied every blessing of life; and this phrase had therefore the force of *'Prosperous be thou.'* This was the commonest of all salutations (Judg. xix. 20; Ruth ii. 4; 1 Sam. xxv. 6; 2 Sam. xx. 9; Ps. cxxix. 8).

4. *'Live, my lord,'* was a common salutation among the Phœnicians, and was also in use among the Hebrews, but was by them only addressed to their kings in the extended form of *'Let the king live for ever!'* (1 Kings i. 31); which was also employed in the Babylonian and Persian courts (Dan. ii. 4; iii. 9; v. 10; vi. 7, 22; Neh. ii. 3).

5. *'Joy to thee! joy to you!'* rendered by *Hail!* an equivalent of the Latin *Ave! Salve!* (Matt. xxvii. 29; xxviii. 9; Mark xv. 18; Luke i. 28; John xix. 3).

The gestures and inflections used in salutation varied with the dignity and station of the person saluted; as is the case with the Orientals at this day. It is usual for the person who gives or returns the salutation, to place at the same time his right hand upon his breast, or to touch his lips, and then his forehead or turban, with the same hand. In some cases the body is gently inclined,

292.

while the right hand is laid upon the left breast. A person of the lower orders, in addressing a

superior, does not always give the salam, but shows his respect to high rank by bending down his hand to the ground, and then putting it to his lips and forehead. It is a common custom for a man to kiss the hand of his superior instead of his own (generally on the back only, but sometimes on both back and front), and then to put it to his forehead in order to pay more particular respect. Servants thus evince their respect towards their masters. The son also thus kisses the hand of his father, and the wife that of her husband. Very often, however, the superior does

293.

not allow this, but only touches the hand extended to take his; whereupon the other puts the hand that has been touched to his own lips and forehead. The custom of kissing the beard is still preserved, and follows the first and preliminary gesture; it usually takes place on meeting after an absence of some duration, and not as an every-day compliment. In this case, the person who gives the kiss lays the right hand under the beard, and raises it slightly to his lips, or rather supports it while it receives his kiss. This custom strikingly illustrates 2 Sam. xx. 9. In Arabia Petraea, and some other parts, it is more usual for persons to lay the right sides of their cheeks together.

294.

Among the Persians, persons in saluting under the same circumstances, often kiss each other on the lips; but if one of the individuals is of high rank, the kiss is given on the cheek instead of the

ships. This seems to illustrate 2 Sam. xx. 9; Gen. xxix. 11, 13; xxxiii. 4; xlviii. 10-12; Exod. iv. 27; xviii. 7.

SAMARIA (*watch-height*), a city, situated near the middle of Palestine, built by Omri, king of Israel, on a mountain or hill of the same name, about *n.c.* 925. It was the metropolis of the kingdom of Israel, or of the ten tribes. The hill was purchased from the owner, Shemer, from whom the city took its name (1 Kings xvi. 23, 24). Samaria continued to be the capital of Israel for two centuries, till the carrying away of the ten tribes by Shalmaneser, about *n.c.* 720 (2 Kings xvii. 3, 5). During all this time it was the seat of idolatry, and is often as such denounced by the prophets, sometimes in connection with Jerusalem. It was the seat of a temple of Baal, built by Ahab, and destroyed by Jehu (1 Kings xvi. 32, 33; 2 Kings x. 18-28). It was the scene of many of the acts of the prophets Elijah and Elisha, connected with the various famines of the land, the unexpected plenty of Samaria, and the several deliverances of the city from the Syrians. After the exile of the ten tribes, Samaria appears to have continued, for a time at least, the chief city of the foreigners brought to occupy their place; although Shechem soon became the capital of the Samaritans as a religious sect. John Hyrcanus took the city after a year's siege, and razed it to the ground. Yet it must soon have revived, as it is not long after mentioned as an inhabited place in the possession of the Jews. Pompey restored it to its former possessors; and it was afterwards rebuilt by Gabinius. Augustus bestowed Samaria on Herod; who eventually rebuilt the city with great magnificence, and gave it the name of Sebaste. Here Herod planted a colony of 6000 persons, composed partly of veteran soldiers, and partly of people from the environs; enlarged the circumference of the city; and surrounded it with a strong wall twenty stades in circuit. In the midst of the city—that is to say, upon the summit of the hill—he left a sacred place of a stade and a half, splendidly decorated, and here he erected a temple to Augustus, celebrated for its magnitude and beauty. The whole city was greatly ornamented, and became a strong fortress. Such was the Samaria of the time of the New Testament, where the Gospel was preached by Philip, and a church was gathered by the apostles (Acts viii. 5, 9, sq.). At what time the city of Herod became desolate, no existing accounts state; but all the notices of the fourth century and later lead to the inference that its destruction had already taken place. A few scanty notices of Samaria are found scattered through the works of ancient travellers, but it was not till the present century that it was fully explored and described.

The hill of Samaria is an oblong mountain of considerable elevation, and very regular in form, situated in the midst of a broad deep valley. Beyond this valley, which completely isolates the hill, the mountains rise again on every side, forming a complete wall around the city. They are terraced to the tops, sown in grain, and planted with olives and figs, in the midst of which a number of handsome villages appear to great advantage, their white stone cottages contrasting strikingly with the verdure of the trees. 'The hill of Samaria' itself is cultivated from

its base, the terraced sides and summits being covered with corn and with olive-trees. The most conspicuous ruin of the place, is the church dedicated to John the Baptist, erected on the spot which an old tradition fixed as the place of his burial, if not of his martyrdom. It is said to

293. [Samaria: Church of St. John.]

have been built by the Empress Helena; but the architecture limits its antiquity to the period of the crusades, although a portion of the eastern end seems to have been of earlier date. On the summit of the hill is an arva, once surrounded by limestone columns, of which fifteen are still standing, and two prostrate. There is no trace of the order of their architecture, nor any indications of the nature of the edifice to which they belong. On the W.S.W. descent of the hill there is a very remarkable colonnade, of which eighty-two columns are still standing, and the number of those fallen and broken must be much greater. They may without much hesitation be referred to the time of Herod the Great, and must be regarded as belonging to some one of the splendid edifices with which he adorned the city.

SAMARITANS. In the books of Kings there are brief notices of the origin of the people called Samaritans. The ten tribes which revolted from Rehoboam, son of Solomon, chose Jeroboam for their king. After his elevation to the throne he set up golden calves at Dan and Bethel, lest repeated visits of his subjects to Jerusalem, for the purpose of worshipping the true God, should withdraw their allegiance from himself. Afterwards Samaria, built by Omri, became the metropolis of Israel, and thus the separation between Judah and Israel was rendered complete. The people took the name *Samaritans* from the capital city. In the ninth year of Hosea, Samaria was taken by the Assyrians under Shalmaneser, who carried away the inhabitants into captivity, and introduced colonies into their place from Babylon, Cuthah, Ava, Hamath, and Sepharvaim. These new inhabitants carried along with them their own idolatrous worship; and on being infested with lions, sent to Esarhaddon, king of Assyria.

A priest of the tribe of Levi was accordingly dispatched to them, who came and dwelt in Bethel, teaching the people how they should fear the Lord. Thus it appears that the people were a mixed race. The greater part of the Israelites had been carried away captive by the Assyrians, including the rich, the strong, and such as were able to bear arms. But the poor and the feeble had been left. With them, therefore, the heathen colonists became incorporated. As the people were a *mixed* race, their religion also assumed a *mixed* character. In it the worship of idols was associated with that of the true God. But apostasy from Jehovah was not universal. On the return of the Jews from the Babylonish captivity, the Samaritans wished to join them in rebuilding the temple (Ezra iv. 2). But the Jews declined the proffered assistance; and from this time the Samaritans threw every obstacle in their way. Hence arose that inveterate enmity between the two nations which afterwards increased to such a height as to become proverbial. In the reign of Darius Nothus, Manasses, son of the Jewish high-priest, married the daughter of Sanballat the Samarian governor; and to avoid the necessity of repudiating her, as the law of Moses required, went over to the Samaritans, and became high-priest in the temple which his father-in-law built for him on Mount Gerizim. From this time Samaria became a refuge for all malcontent Jews; and the very name of each people became odious to the other. About the year a.c. 109, John Hyrcanus, high priest of the Jews, destroyed the city and temple of the Samaritans; but a.c. 25, Herod rebuilt them at great expense. In their new temple, however, the Samaritans could not be induced to offer sacrifices, but still continued to worship on Gerizim. At the present day they have dwindled down to a few families. Shechem, now called Nablus, is their place of abode. They still possess a copy of the Mosaic law, which, it is well known, forms the only portion of Scripture the Samaritans have ever received or acknowledged. The opinion that copies of the Pentateuch must have been in the hands of *Israel* from the time of Rehoboam, as well as among *Judah*, has been held by many distinguished critics, and appears to be correct. The prophets, who frequently inveigh against the Israelites for their idolatry and their crimes, never accuse them of being destitute of the law, or ignorant of its contents. It is wholly improbable, too, that the people, when carried captive into Assyria, took with them *all* the copies of the law. Thus we are brought to the conclusion, that the Samaritan, as well as the Jewish copy, originally flowed from the autograph of Moses. The two constitute, in fact, *different recensions of the same work*, and coalesce in point of antiquity.

SAMOS, an island in the *Ægean* Sea, near the coast of Lydia, in Asia Minor, and separated only by a narrow strait from the promontory which terminates in Cape Trogyllium. The apostle Paul touched at the island in his voyage from Greece to Syria (Acts xx. 15). Samos contained, some years ago, about 60,000 people, inhabiting eighteen large villages, and about twenty small ones.

SAMOTHRACE, an island in the north-east part of the *Ægean* Sea, above the Hellespont, with a lofty mountain, and a city of the same

name. The island was celebrated for the mysteries of Ceres and Proserpine, and was a sacred asylum. Paul touched at this island on his first voyage to Europe (Acts xvi. 11). The island is now called Samandracchi. It is but thinly peopled, and contains only a single village.

SAM'SON. This celebrated champion and judge of Israel, was the son of Manoah, of the tribe of Dan, and born a.m. 2848, of a mother whose name is nowhere given in the Scriptures. His birth was announced by a heavenly messenger, who declared to his mother that the child with which she was pregnant was to be a son, who should be a Nazarite from his birth, upon whose head no razor was to come, and who was to prove a signal deliverer to his people. She was directed, accordingly, to conform her own regimen to the tenor of the Nazarite law, and strictly abstain from wine and all intoxicating liquor, and from every species of impure food [*NAZARITE*]. According to the prophecy going before upon him, Samson was born in the following year, and his destination to great achievements began to evince itself at a very early age by the illapses of superhuman strength which came from time to time upon him. Those specimens of extraordinary prowess, of which the slaying of the lion at Timnath without weapons was one, were doubtless the result of that special influence of the Most High which is referred to in Judg. xiii. 25.

As the position of the tribe of Dan, bordering upon the territory of the Philistines, exposed them especially to the predatory incursions of this people, it was plainly the design of heaven to raise up a deliverer in that region where he was most needed. The Philistines, therefore, became very naturally the objects of that retributive course of proceedings in which Samson was to be the principal actor, and upon which he could only enter by seeking some occasion of exciting hostilities that would bring the two peoples into direct collision. Such an occasion was afforded by his meeting with one of the daughters of the Philistines at Timnath, whom he besought his parents to procure for him in marriage.

At his wedding-feast, the attendance of a large company of friends of the bridegroom, convened ostensibly for the purpose of honouring his nuptials, but in reality to keep an insidious watch upon his movements, furnished the occasion of a common Oriental device for enlivening entertainments of this nature. He propounded a riddle, the solution of which referred to his obtaining a quantity of honey from the carcase of a slain lion, and the clandestine manner in which his guests got possession of the clue to the enigma cost thirty Philistines their lives. The next instance of his vindictive policy was prompted by the ill-treatment which he had received at the hands of his father-in-law, who, upon a frivolous pretext, had given away his daughter in marriage to another man, and was executed by securing a multitude of foxes, or rather *jackals*, and, by tying firebrands to their tails, setting fire to the cornfields of his enemies. The indignation of the Philistines, on discovering the author of the outrage, vented itself upon the family of his father-in-law, who had been the remote occasion of it, in the burning of their house, in which both father and daughter perished. This was a fresh provocation, for which Samson threatened to be

revenged; and thereupon falling upon them without ceremony he smote them, as it is said, 'hip and thigh with a great slaughter.'

Having subsequently taken up his residence in the rock Etam, he was thence dislodged by consenting to a pusillanimous arrangement on the part of his own countrymen, by which he agreed to surrender himself in bonds provided they would not themselves fall upon him and kill him. Being brought in this apparently helpless condition to a place called from the event *Lehi*, a *jaw*, his preternatural potency suddenly put itself forth, and snapping the cords asunder, and snatching up the jaw-bone of an ass, he dealt so effectually about him, that a thousand men were slain on the spot. That this was altogether the work, not of man, but of God, was soon demonstrated. Wearied with his exertions, the illustrious Danite became faint from thirst, and as there was no water in the place, he prayed that a fountain might be opened. His prayer was heard; God caused a stream to gush from a hollow rock hard by, and Samson in gratitude gave it the name of *Ei-hakkore*, a word that signifies 'the well of him that prayed,' and which continued to be the designation of the fountain ever after.

The Philistines were from this time held in such contempt by their victor, that he went openly into the city of Gaza, where he seems to have suffered himself weakly to be drawn into the company of a woman of loose character, the yielding to whose enticements exposed him to the most imminent peril. His presence being soon noised abroad, an attempt was made during the night forcibly to detain him, by closing the gates of the city and making them fast; but Samson, apprised of it, rose at midnight, and breaking away bolts, bars, and hinges, departed, carrying the gates upon his shoulders, to the top of a neighbouring hill that *looks towards Hebron* (not 'before Hebron,' as the words are rendered in the Authorized Version). After this his enemies strove to entrap him by guile rather than by violence; and they were too successful in the end. Falling in love with a woman of Sorek, named Delilah, he became so infatuated by his passion, that nothing but his bodily strength could equal his mental weakness. The princes of the Philistines, aware of Samson's infirmity, determined by means of it to get possession, if possible, of his person. For this purpose they propose a tempting bribe to Delilah, and she enters at once into the treacherous compact. She employs all her art and blandishments to worm from him the secret of his prodigious strength. Having for some time amused her with fictions, he at last, in a moment of weakness, disclosed to her the fact that it lay in his hair, which if it were shaved would leave him a mere common man. Not that his strength really lay in his hair, for this in fact had no natural influence upon it one way or the other. His strength arose from his *relation* to God as a Nazarite, and the preservation of his hair unshorn was the *mark* or *sign* of his Nazariteship, and a *pledge* on the part of God of the continuance of his miraculous physical powers. If he lost this sign, the badge of his consecration, he broke his vow, and consequently forfeited the thing signified. God abandoned him, and he was thenceforward no more, in this respect, than an ordinary man. His treacherous paramour

seized the first opportunity of putting his declaration to the test. She shaved his head while he lay sleeping in her lap, and at a concerted signal he was instantly arrested by his enemies lying in wait. Having so long presumptuously played with his ruin, Heaven leaves him to himself, as a punishment for his former guilty indulgence. He is made to reap as he had sown, and is consigned to the hands of his relentless foes. His punishment was indeed severe, though he amply revenged it, as well as redeemed in a measure his own honour, by the manner in which he met his death. The Philistines having deprived him of sight, at first immured him in a prison, and made him grind at the mill like a slave, thus reducing him to the lowest state of degradation and shame.

In process of time, while remaining in this confinement, his hair recovered its growth, and with it such a profound repentance seems to have wrought in his heart as virtually re-invested him with the character and the powers he had so culpably lost. Of this fact his enemies were not aware. Still exulting in their possession of the great scourge of their nation, they kept him, like a wild beast, for mockery and insult. On one of these occasions, when an immense multitude, including the princes and nobles of the Philistines, were convened in a large amphitheatre, to celebrate a feast in honour of their god Dagon, who had delivered their adversary into their hands, Samson was ordered to be brought out to be made a laughing-stock to his enemies, a butt for their scoffs, insults, mockeries, and merriment. Secretly determined to use his recovered strength to tremendous effect, he persuaded the boy who guided his steps to conduct him to a spot where he could reach the two pillars upon which the roof of the building chiefly rested. Here, after pausing for a short time, while he prefers a brief prayer to Heaven, he grasps the massy pillars, and bowing with resistless force, the whole building rocks and totters, and the roof, encumbered with the weight of the spectators, rushes down, and the whole assembly, including Samson himself, are crushed to pieces in the ruin.

This terminated the career of one of the most remarkable personages of all history, whether sacred or profane. The enrolment of his name by an apostolic pen (Heb. xi. 32) in the list of the ancient worthies, 'who had by faith obtained an excellent repute,' warrants us undoubtedly to entertain a favourable estimate of his character on the whole, while at the same time the fidelity of the inspired narrative has perpetuated the record of infirmities which must for ever mar the lustre of his noble deeds.

SAMUEL, the last of those extraordinary regents that presided over the Hebrew commonwealth under the title of Judges. The circumstances of his birth are detailed at length in the first chapter of the book of Samuel. His mother vowed that if Jehovah should give her a man-child, she would devote him to the Lord all the days of her life. Her prayer was heard, and when the birth of a son fulfilled her hopes, this child of prayer was named SAMUEL (*heard of God*). In consequence of his mother's vow, the boy was from his early years set apart to the service of Jehovah, under the immediate tutelage of Eli.

The degeneracy of the people at this time was extreme. The tribes seem to have administered their affairs as independent republics, the national confederacy was weak and disunited, and the spirit of public patriotic enterprise had been worn out by constant turmoil and invasion. The theocratic influence was also scarcely felt, its peculiar ministers being withdrawn, and its ordinary manifestations, except in the routine of the Levitical ritual, having ceased; 'the word of the Lord was precious in those days, there was no open vision' (iii. 1). The young devotee, 'the child Samuel,' was selected by Jehovah to renew the deliverance of his oracles. As he lay in his chamber adjoining the sacred edifice, the Lord, by means adapted to his juvenile capacity, made known to him his first and fearful communication—the doom of Eli's apostate house. Other revelations speedily followed this; the frequency of God's messages to the young prophet established his fame; and the exact fulfilment of them secured his reputation. The fearful fate pronounced on the head and family of the pontificate was soon executed. Hophni and Phinehas, Eli's sons, both fell in one day; the Israelites were defeated with a great slaughter, and the ark of God was taken. Their father sat by the wayside to gather the earliest news of the battle, for his 'heart trembled for the ark of God'; and as a fugitive from the scene of conflict reported to him the sad disaster—Israel routed and fleeing in panic, Hophni and Phinehas both slain, and the ark of God taken—this last and overpowering intelligence so shocked him, that he fainted and fell from his seat, and in his fall 'broke his neck and died' (iv. 18). When the feeble administration of Eli, who had judged Israel forty years, was concluded by his death, Samuel was too young to succeed to the regency, and the actions of this earlier portion of his life are left unrecorded. The ark, which had been captured by the Philistines, soon vindicated its majesty, and after being detained among them seven months, was sent back to Israel. It did not, however, reach Shiloh, in consequence of the fearful judgment of Bethshemesh (vi. 19), but rested in Kirjath-jearim for no fewer than twenty years (vii. 2). It is not till the expiration of this period that Samuel appears again in the history. This long season of national humiliation was to some extent improved. 'All the house of Israel lamented after the Lord,' and Samuel, seizing upon the crisis, issued a public manifesto, exposing the sin of idolatry, urging on the people religious amendment, and promising political deliverance on their reformation. The people obeyed, the oracular mandate was effectual, and the principles of the theocracy again triumphed (vii. 4). The tribes were summoned by the prophet to assemble in Mizpeh, and at this assembly of the Hebrew comitia, Samuel seems to have been elected regent (vii. 6).

This mustering of the Hebrews at Mizpeh on the inauguration of Samuel alarmed the Philistines, and their 'lords went up against Israel.' Samuel assumed the functions of the theocratic viceroys, offered a solemn oblation, and implored the immediate protection of Jehovah. He was answered with propitious thunder. A fearful storm burst upon the Philistines they were signally defeated, and did not recur their strength again during the administration of the prophet-

judge. The grateful victor erected a stone of remembrance, and named it Ebenezer (*the stone of help*). From an incidental allusion (vii. 14) we learn, too, that about this time the Amorites, the Eastern foes of Israel, were also at peace with them. The presidency of Samuel appears to have been eminently successful. From the very brief sketch given us of his public life, we infer that the administration of justice occupied no little share of his time and attention. He went from year to year in circuit to Bethel, Gilgal, and Mizpeh, places not very far distant from each other, but chosen perhaps because they were the old scenes of worship.

The dwelling of the prophet was at Ramah, where religious worship was established after the patriarchal model, and where Samuel, like Abraham, built an altar to the Lord.

In Samuel's old age two of his sons were appointed by him deputy-judges in Beersheba. These young men possessed not their father's integrity of spirit, but 'turned aside after lucre, took bribes, and perverted judgment' (1 Sam. viii. 3). The advanced years of the venerable ruler himself, and his approaching dissolution, the certainty that none of his family could fill his office with advantage to the country, the horror of a period of anarchy which his death might occasion, the necessity of having some one to put an end to tribal jealousies and concentrate the energies of the nation, especially as there appeared to be symptoms of renewed warlike preparations on the part of the Ammonites (xii. 12)—these considerations seem to have led the elders of Israel to adopt the bold step of assembling at Ramah and soliciting Samuel 'to make a king to judge them.' The proposed change from a republican to a regal form of government displeased Samuel for various reasons. Besides its being a departure from the first political institute, and so far an infringement on the rights of the divine head of the theocracy, it was regarded by the regent as a virtual charge against himself, and might appear to him as one of those examples of popular fickleness and ingratitude which the history of every realm exhibits in profusion. Jehovah comforts Samuel in this respect by saying, 'They have not rejected thee, but they have rejected me.' Being warned of God to accede to their request for a king, and yet to remonstrate with the people, and set before the nation the perils and tyranny of a monarchical government (viii. 10), Samuel proceeded to the election of a sovereign. Saul, son of Kish, 'a choice young man and a goodly,' whom he had met unexpectedly, was pointed out to him by Jehovah as the king of Israel, and by the prophet was anointed and saluted as monarch. Samuel again convened the nation at Mizpeh, again with honest zeal condemned their project, but caused the sacred lot to be taken. The lot fell on Saul. The prophet now formally introduced him to the people, who shouted in joyous acclamation 'God save the king.'

Not content with oral explanations, this last of the republican chiefs not only told the people the manner of the kingdom, 'but wrote it in a book and laid it up before the Lord.' What is here asserted of Samuel may mean, that he extracted from the Pentateuch the recorded provision of Moses for a future monarchy, and added to it such

warnings, and counsels, and safeguards as his inspired sagacity might suggest. Saul's first battle being so successful, and the preparations for it displaying no ordinary energy and promptitude of character, his popularity was suddenly advanced, and his throne secured. Taking advantage of the general sensation in favour of Saul, Samuel cited the people to meet again in Gilgal, to renew the kingdom, to ratify the new constitution, and solemnly instal the sovereign (xi. 14). Here the upright judge made a powerful appeal to the assembly in vindication of his government, and the whole multitude responded in unanimous approval of his honesty and intrepidity (xii. 3, 4). Then he, still jealous of God's prerogative and the civil rights of his people, briefly narrated their history, showed them how they never wanted chieftains to defend them when they served God, and declared that it was distrust of God's raising up a new leader in a dreaded emergency that excited the outcry for a king. In proof of this charge he appealed to Jehovah, who answered in a fearful hurricane of thunder and rain. The terrified tribes confessed their guilt, and besought Samuel to intercede for them in his disinterested patriotism.

It is said (vii. 15) that Samuel judged Israel all the days of his life. The assertion may mean that even after Saul's coronation Samuel's power, though formally abdicated, was yet actually felt and exercised in the direction of state affairs. No enterprise could be undertaken without Samuel's concurrence. His was an authority higher than the king's. We find Saul, having mustered his forces, about to march against the Philistines, yet delaying to do so till Samuel consecrated the undertaking. He came not at the time appointed, as Saul thought, and the impatient monarch proceeded to offer sacrifice—a fearful violation of the national law. The prophet arrived as the religious service was concluded, and rebuking Saul for his presumption, distinctly hinted at the short continuance of his kingdom. Again we find Samuel charging Saul with the extirpation of the Amalekites. The royal warrior proceeded on the expedition, but obeyed not the mandate of Jehovah. His apologies, somewhat craftily framed, for his inconsistencies, availed him not with the prophet, and he was by the indignant seer virtually dethroned. He had forfeited his crown by disobedience to God. Yet Samuel mourned for him. But now the Lord directed him to make provision for the future government of the country (xvi. 1). To prevent strife and confusion it was necessary, in the circumstances, that the second king should be appointed ere the first sovereign's demise. Samuel went to Bethlehem and set apart the youngest of the sons of Jesse, 'and came to see Saul no more till the day of his death.' At length Samuel died (xxv. 1), and all Israel mourned for him, and buried him in his house at Ramah.

SAMUEL, BOOKS OF. The two books of Samuel were generally reckoned as but one among the Jews, and that they form only one treatise is apparent from their structure.

The contents of these books belong to an interesting period of Jewish history. The preceding book of Judges refers to the affairs of the republic as they were administered after the Conquest, when the nation was a congeries of inde-

pendent cantons, sometimes partially united for a season under an extraordinary dictator. As, however, the mode of government was changed, and remained monarchical till the overthrow of the kingdom, it was of national importance to note the time, method, and means of the alteration. This change happening under the regency of the wisest and best of their sages, his life became a topic of interest. The first book of Samuel gives an account of his birth and early call to the duties of a seer, under Eli's pontificate; describes the low and degraded condition of the people, oppressed by foreign enemies; proceeds to narrate the election of Samuel as judge; his prosperous regency; the degeneracy of his sons, the clamour for a change in the civil constitution; the installation of Saul; his rash and reckless character; his neglect of, or opposition to, the theocratic elements of the government. Then the historian goes on to relate God's choice of David as king; his endurance of long and harassing persecution from the reigning sovereign; the melancholy defeat and death of Saul on the field of Gilboa; the gradual elevation of the man 'according to God's own heart' to universal dominion; his earnest efforts to obey and follow out the principles of the theocracy; his formal establishment of religious worship at Jerusalem, now the capital of the nation; and his series of victories over all the enemies of Judaea that were wont to molest its frontiers. The annalist records David's aberrations from the path of duty; the unnatural rebellion of his son Absalom, and its suppression; his carrying into effect a census of his dominions, and the Divine punishment which this act incurred; and concludes with a few characteristic sketches of his military staff. The second book of Samuel, while it relates the last words of David, yet stops short of his death. As David was the real founder of the monarchy and arranger of the religious economy; the great hero, legislator, and poet of his country; as his dynasty maintained itself on the throne of Judah till the Babylonian invasion; it is not a matter of wonder that the description of his life and government occupies so large a portion of early Jewish history. The books of Samuel thus consist of three interlaced biographies—those of Samuel, Saul, and David.

The attempt to ascertain the authorship of this early history is attended with difficulty. Ancient opinion is in favour of the usual theory, that the first twenty-four chapters were written by Samuel, and the rest by Nathan and Gad. Various arguments have of late been brought against this opinion, but they are more ingenious than solid. The striking circumstance that these books do not record David's death, though they give his last words—his last inspired effusion—afford, to say the least of it, a strong presumption that they must have been composed before that monarch 'slept with his fathers.'

The design of these books is not very different from that of the other historical treatises of the Old Testament. The books of Kings are a history of the nation as a theocracy; those of Chronicles have special reference to the form and ministry of the religious worship, as bearing upon its re-establishment after the return from Babylon. Samuel is more biographical, yet the theocratic element of the government is not overlooked. It

is distinctly brought to view in the early chapters concerning Eli and his house, and the fortunes of the ark; in the passages which describe the change of the constitution; in the blessing which rested on the house of Obed-Edom; in the curse which fell on the Bethshemites, and Uzzah and Saut, for intrusive interference with holy things. The book shows clearly that God was a jealous God; that obedience to him secured felicity; that the nation sinned in seeking another king; that Saul's special iniquity was his impious oblivion of his station as only Jehovah's viceroy, for he contemned the prophets and slew the priesthood; and that David owed his prosperity to his careful culture of the sacred principle of the Hebrew administration. This early production contained lessons both for the people and for succeeding monarchs, bearing on it the motto, 'Whatever things were written aforetime were written for our learning.'

SANBAL'LAT, a native of Horonaim, beyond the Jordan (Neh. ii. 10), and probably also a Moabitish chief, whom (perhaps from old national hatred) we find united in council with the Samaritans, and active in attempting to deter the returned exiles from fortifying Jerusalem (Neh. iv. 1, sq.; vi. 1, sq.). Subsequently, during the absence of Nehemiah in Persia, a son of Joiada, the high priest, was married to his daughter (Neh. xiii. 28).

SANDAL, a covering for the feet, usually denoted by the word translated 'shoe' in the Authorized Version. It was usually a sole of hide, leather, or wood, bound on to the foot by thongs; but it may sometimes denote such shoes and buskins as eventually came into use.

Ladies of rank appear to have paid great attention to the beauty of their sandals (Cant. vii. 1); though, if the bride in that book was an Egyptian princess, as some suppose, the exclamation, 'How beautiful are thy feet with sandals, O prince's daughter!' may imply admiration of a luxury properly Egyptian, as the ladies of that country were noted for their sumptuous sandals. But this taste was probably general; for, at the present day, the dress slippers of ladies of rank are among the richest articles of their attire, being elaborately embroidered with flowers and other figures wrought in silk, silver, and gold.

295. [Ancient Egyptian Sandals.]

It does not seem probable that the sandals of the Hebrews differed much from those used in Egypt, excepting, perhaps, that from the greater roughness of their country, they were usually of

more substantial make and materials. The Egyptian sandals varied slightly in form: those worn by the upper classes, and by women, were usually pointed and turned up at the end, like our skates and many of the Eastern slippers at the present day. They were made of a sort of woven or interlaced work of palm-leaves and papyrus-stalks or other similar materials, and sometimes of leather; and were frequently lined with cloth, on which the figure of a captive was painted: that humiliating position being considered suited to the enemies of their country, whom they hated and despised. It is not likely that the Jews adopted this practice; but the idea which it expressed, of treading their enemies under their feet, was familiar to them (Josh. x. 24). Those of the middle classes who were in the habit of wearing sandals, often preferred walking bare-footed.

297. [Greek and Roman Sandals.]

In transferring a possession or domain it was customary to deliver a sandal (Ruth iv. 7), as in our middle ages, a glove. Hence the action of throwing down a shoe upon a region or territory, was a symbol of occupancy. So Ps. lx. 10. In Ruth, as above, the delivering of a sandal signified that the next of kin transferred to another a sacred obligation; and he was hence called 'sandal-loosed.'

It was undoubtedly the custom to take off the sandals on holy ground, in the act of worship, and in the presence of a superior. Hence the command to take the sandals from the feet under such circumstances (Exod. iii. 5; Josh. v. 15). This is still the well-known custom of the East—an Oriental taking off his shoe in cases in which a European would remove his hat. The shoes of the modern Orientals are, however, made to slip off easily, which was not the case with sandals, that required to be unbound with some trouble. This operation was usually performed by servants; and hence the act of unloosing the sandals of another became a familiar symbol of servitude (Mark I. 7; Luke iii. 16; John I. 27; Acts xiii. 25).

SANHEDRIM, more properly SANHEDRIM, the supreme judicial council of the Jews, especially for religious affairs. This council consisted of seventy members. To this number the high priest was added, provided he was a man endowed with wisdom. According to Dr. Jost, the members of the council 'consisted of the most

eminent priests, and of the scribes of the people, who were chosen for life, but each of whom had to look to his own industry for his support.' In the New Testament they are frequently termed *Priests, Elders, and Scribes*. By the first are to be understood, not such as had sustained the office of high-priest, but the chief men among the priests; probably the presidents of the twenty-four classes into which the priesthood was divided. By the second, we are probably to understand the select men of the people—persons whose rank or standing led to their being raised to this distinction. And by the last are designated those, whether of the Levitical family or not, who gave themselves to the pursuit of learning, especially to the interpretation of Scripture, and of the traditions of the fathers.

In the council the office of president belonged to the high-priest, if he was a member of it. Next in rank to him was the vice-president, who bore the title of *Father of the House of Judgment*; whose duty it was to supply the place of the president in case he should be prevented by any accidental cause from discharging his duties himself. The third grade of rank was that of the *sage*, whose business was to give counsel to the assembly. The assembly, when convened, sat in the form of a semicircle, or half-moon, the president occupying the centre. At each extremity stood a scribe, whose duty it was to record the sentence pronounced by the council. The meetings of this council were usually held in the morning. Their place of meeting was a hall, close by the great gate of the temple, and leading from the outer court of the women to the holy place. In cases of urgency the Sanhedrim might be convened in the house of the high-priest (Matt. xxvi. 3).

The functions of the Sanhedrim were, according to the Jewish writers, co-extensive with the civil and religious relations of the people. But in the notices of this body, contained in the New Testament, we find nothing which would lead us to infer that their powers extended beyond matters of a religious kind. Questions of blasphemy, of sabbath-breaking, of heresy, are those alone which we find referred to their judicature (comp. Matt. xxvi. 57-65; John v. 11, 18; Matt. xii. 14, sq.; Acts v. 17, sq. &c.). On those guilty of these crimes they could pronounce sentence of death; but under the Roman government, it was not competent for them to execute this sentence.

At what period in the history of the Jews the Sanhedrim arose, is involved in much uncertainty. The Jews trace this council to the times of Moses, and find the origin of it in the appointment of a body of elders as the assistants of Moses in the discharge of his judicial functions (Num. xi. 16, 17). There is no evidence, however, that this was any other than a temporary arrangement for the benefit of Moses; nor do we, in the historical books of the Old Testament, detect any traces whatever of the existence of this council in the times preceding the Babylonish captivity, nor in those immediately succeeding the return of the Jews to their own land. The earliest mention of the existence of this council by Josephus, is in connection with the reign of Hyrcanus II., B.C. 125. It is probable, however, that it existed before this time—that it arose gradually after the cessation of the prophetic office in Judah, in conse-

quence of the felt want of some supreme direction and judicial authority—that the number of its members was fixed so as to correspond with that of the council of elders appointed to assist Moses—and that it first assumed a formal and influential existence in the later years of the Macedo-Grecian dynasty.

SAPPHIRA, the wife of Ananias, and his accomplice in the sin for which he died (Acts v. 1-10). Unaware of the judgment which had befallen her husband, she entered the place about three hours after, probably to look for him; and being there interrogated by Peter, repeated and persisted in the 'lie unto the Holy Ghost,' which had destroyed her husband; on which the grieved apostle made known to her his doom, and pronounced her own—'Behold, the feet of those who have buried thy husband are at the door, and shall carry thee out.' On hearing these awful words, she fell dead at his feet [ANANIAS].

SAPPHIRE, a precious stone, mentioned in Exod. xxiv. 10; xxviii. 18; Job xxviii. 16; Ezek. xxviii. 13; Rev. xxi. 19. It is next in hardness and value to the diamond, and is mostly of a blue colour of various shades. It is often found in collections of ancient gems.

SARAH (*a princess, a noble lady*), the wife of Abraham, and mother of Isaac. She was at first called Sarai, which Ewald explains to mean *contentious, quarrelsome*. As Sarah never appears but in connection with some circumstance in which her husband was principally concerned, all the facts of her history have already been given in the article ABRAHAM, and her conduct to Hagar is considered in the article which bears her name.

SARDIS, the capital of the ancient kingdom of Lydia, situated at the foot of Mount Tmolus, in a fine plain watered by the river Pactolus, is in N. lat. 38° 30'; E. long. 27° 57'. Sardis was a great and ancient city, and from its wealth and importance was the object of much cupidity and of many sieges. When taken by Cyrus, under Cræsus, its last king, who has become proverbial for his riches, Sardis was one of the most splendid and opulent cities of the East. After their victory over Antiochus it passed to the Romans, under whom it rapidly declined in rank and importance. In the time of Tiberius it was destroyed by an earthquake, but was rebuilt by order of the emperor. The inhabitants of Sardis bore an ill repute among the ancients for their voluptuous habits of life. The place that Sardis holds in the Apocalypse, as one of the 'Seven Churches of Asia,' is the source of the peculiar interest with which the Christian reader regards it. From what is said it appears that it had already declined much in real religion, although it still maintained the name and external aspect of a Christian church, 'having a name to live, while it was dead' (Rev. iii. 1).

Successive earthquakes, and the ravages of the Saracens and Turks, have reduced this once flourishing city to a heap of ruins, presenting many remains of its former splendour. The habitations of the living are confined to a few miserable cottages, forming a village called Eart.

SARDIUS, one of the precious stones in the breastplate of the high-priest (Exod. xxviii. 17; xxxix. 10), and also mentioned in Ezek. xxviii. 13. The sardius is the stone now called the car-

nelian, from its colour, which resembles that of raw flesh. The Hebrew name is derived from a root which signifies being red. The sardius or carnelian is of the flint family, and is a kind of chalcedony. The more vivid the red in this stone, the higher is the estimation in which it is held. It was anciently, as now, more frequently engraved on than any other stone. The ancients called it sardius, because Sardis in Lydia was the place where they first became acquainted with it; but the sardius of Babylon was considered of greater value. The Hebrews probably obtained the carnelian from Arabia. In Yemen there is found a very fine dark-red carnelian, which is called *el-Akik*. The Arabs wear it on the finger, on the arm above the elbow, and in the belt before the abdomen. It is supposed to stop hemorrhage when laid on a fresh wound.

SARDONYX, a precious stone exhibiting a milk-white variety of the onyx or chalcedony, intermixed with shades or stripes of the sardian (or carnelian); hence the compound name of sardonyx. It is mentioned in Rev. xxi. 20.

SAREPTA (Luke iv. 25), Hebrew *Zarephath*, a Phœnician town between Tyre and Sidon, mentioned in 1 Kings xvii. 9, 10; Obad. 20. It is the place where Elijah went to dwell, and where he performed the miracle of multiplying the barrel of meal and cruse of oil, and where he raised the widow's son to life. It still subsists as a large village, under the name of Sarafend.

SARGON, king of Assyria. [ASSYRIA.]

SAT'AN (*the adversary or opposer*). The doctrine of Satan and of Satanic agency is to be made out from revelation, and from reflection in agreement with revelation.

Besides Satan, he is called the Devil, the Dragon, the Evil One, the Angel of the Bottomless Pit, the Prince of this World, the Prince of the Power of the Air, the God of this World, Apollyon, Abaddon, Belial, Beelzebub. Satan and Devil are the names by which he is oftener distinguished than by any other, the former being applied to him about forty times, and the latter about fifty times.

The word Satan occurs in its *specific* sense as a proper name in Zech. iii. 1, 2, and in the 1st and 2nd chapters of Job. See also 1 Chron. xxi. 1. When we pass from the Old to the New Testament, this doctrine of an invisible evil agent becomes more clear. With the advent of Christ and the opening of the Christian dispensation, the great opposer of that kingdom, the particular adversary and antagonist of the Saviour, would naturally become more active and more known. The antagonism of Satan and his kingdom to Christ and his kingdom runs through the whole of the New Testament.

Devil is the more frequent term of designation given to Satan in the New Testament. With one or two exceptions, which go to confirm the rule, the *usus loquendi* of the New Testament shows this term to be a proper name, applied to an extraordinary being, whose influence upon the human race is great and mischievous (Matt. iv. 1-11; Luke viii. 12; John viii. 44; Acts xiii. 10; Ephes. vi. 11; 1 Pet. v. 8; 1 John iii. 8; Rev. xii. 9). In the original this name is given exclusively to the prince of evil spirits, never to these spirits themselves, who, in connection with demoniacal possessions, are almost always termed

'demons'—a distinction which the Authorized Version has failed to observe.

We determine the personality of Satan by the same criteria that we use in determining whether Cæsar and Napoleon were real, personal beings, or the personifications of abstract ideas, viz. by the tenor of history concerning them, and the ascription of personal attributes to them. All the forms of personal agency are made use of by the sacred writers in setting forth the character and conduct of Satan. They describe him as having power and dominion, messengers and followers. He tempts and resists; he is held accountable, charged with guilt; is to be judged, and to receive final punishment. On the supposition that it was the object of the sacred writers to teach the proper personality of Satan, they could have found no more express terms than those which they have actually used. And on the supposition that they did not intend to teach such a doctrine, their use of language, incapable of communicating any other idea, is wholly inexplicable.

The class of beings to which Satan originally belonged, and which constituted a celestial hierarchy, is very numerous: 'Ten thousand times ten thousand stood before him' (Dan. vii. 10). They were created and dependent (John i. 3). Analogy leads to the conclusion that there are different grades among the angels as among other races of beings. The Scriptures warrant the same. Michael is described as one of the chief princes (Dan. x. 13); as chief captain of the host of Jehovah (Josh. v. 14). Similar distinctions exist among the fallen angels (Col. ii. 15; Eph. vi. 12). It is also reasonable to suppose that they were created susceptible of improvement in all respects, except moral purity, as they certainly were capable of apostasy. As to the time when they were brought into being, the Bible is silent; and where it is silent, we should be silent, or speak with modesty. It is probable, that as they were the highest in rank among the creatures of God, so they were the first in the order of time; and that they may have continued for ages in obedience to their Maker, before the creation of man, or the fall of the apostate angels.

The Scriptures are explicit as to the apostasy of some, of whom Satan was the chief and leader (Jude, ver. 6; 2 Pet. ii. 4). Those who followed him in his apostasy are described as belonging to him. The company is called the devil and his angels (Matt. xxv. 41). The relation marked here denotes the instrumentality which the devil may have exerted in inducing those called his angels to rebel against Jehovah and join themselves to his interests. As to what constituted the first sin of Satan and his followers, there has been a diversity of opinions. Some have supposed that it was the beguiling of our first parents. Others have believed that the first sin of the angels is mentioned in Gen. vi. 2. The sacred writers intimate very plainly that the first transgression was pride, and that from this sprang open rebellion. Of a bishop, the apostle says (1 Tim. iii. 6), 'He must not be a novice, lest, being puffed up with pride, he fall into the condemnation of the devil.' From which it appears that pride was the sin of Satan, and that for this he was condemned. This, however, marks the *quality* of the sin, and not the act.

The agency of Satan extends to all that he does

or causes to be done. To this agency the following restrictions have been generally supposed to exist: it is limited, first, by the direct power of God; he cannot transcend the power on which he is dependent for existence;—secondly, by the finiteness of his own created faculties;—thirdly, by the established connection of cause and effect, or the laws of nature. The miracles, which he has been supposed to have the power of working, are denominated lying signs and wonders (2 Thess. ii. 9). With these restrictions, the devil goes about like a roaring lion.

His agency is moral and physical. First, moral. He beguiled our first parents, and thus brought sin and death upon them and their posterity (Gen. iii.). He moved David to number the people (1 Chron. xxi. 1). He resisted Joshua the high-priest (Zech. iii. 1). He tempted Jesus (Matt. iv.); entered into Judas, to induce him to betray his master (Luke xxii. 3); instigated Ananias and Sapphira to lie to the Holy Ghost (Acts v. 3); hindered Paul and Barnabas on their way to the Thessalonians (1 Thess. ii. 18). He is the spirit that now worketh in the children of disobedience (Eph. ii. 2); and he deceiveth the whole world (Rev. xii. 9).

But his efforts are directed against the bodies of men, as well as against their souls. That the agency of Satan was concerned in producing physical diseases the Scriptures plainly teach (Job ii. 7; Luke xiii. 16). Peter says of Christ, that he went about doing good and healing all that were oppressed of the devil (Acts x. 38).

It is, no doubt, true that there are difficulties connected with the agency ascribed to Satan. But objections are of little weight when brought against well-authenticated facts. Any objections raised against the agency of Satan are equally valid against his existence. If he exists, he must act; and if he is evil, his agency must be evil. The influence exerted by wicked spirits no more militates against the benevolence of God, than does the agency of wicked men, or the existence of moral evil in any form. Evil agents are as really under the divine control as are good agents. And out of evil, God will cause good to come. He will make the wrath of devils as well as of men to praise him, and the remainder He will restrain.

SATYR. There is much to suggest the probability that the 'satyr' of Isa. xiii. 21, and xxxiv. 14, if not also the 'hairy ones' (rendered 'devils') of Lev. xvii. 7, were no other than a species of ape or baboon. The only species of ape of the baboon form known in Arabia is the *Macacus Arabicus*, remarkable for stature and aspect, having the doglike nose and approximating eyes of baboons; the skin of the face of a reddish colour; the snout, lips, and chin black; the forehead low, and the sides of the head furnished with bushy, long, white hair; the breast, arms and shoulders similarly covered, but the loins and lower extremities of a fine chestnut; the tail of the same colour, of no great length, tufted at the end, and all the hands black. It is found from the straits of Bab-el-Mandeb, through Southern Arabia to the Euphrates, and even beyond the junction of that river with the Tigris. Like other large and formidable Simiade, it is less sollicitous about the vicinity of trees, because it is armed with powerful canines; holds its enemy firmly

grasped, and fights, not singly, but assisted by the whole troop: it frequents scrubby under-wood near water, but becomes more rare eastward of Yemen. Comparing the characters of this species, we find it by configuration, colours, and manners peculiarly adapted to the purposes of idolatry in its grossest and most debasing aspect. The Hebrew people, already familiar with a similar worship in Egypt, may have copied the

296. [*Macacus Arabicus*.]

native tribes in the wilderness, and thus drawn upon themselves the remonstrance in Lev. xvii. 7, where the allusion to these animals is very descriptive, as is that in Isa. xiii. 21; and again, xxxiv. 14, where the image is perfect, when we picture to ourselves the 'hairy ones' lurking about the river in the juniper and liquorice jungle, as described by Mr. Rich in his *Memoir on the Ruins of Babylon*.

SAUL, son of Kish, of the tribe of Benjamin, was the first king of the Israelites. The corrupt administration of justice by Samuel's sons furnished an occasion to the Hebrews for rejecting that theocracy, of which they neither appreciated the value, nor, through their unfaithfulness to it, enjoyed the full advantages (1 Sam. viii.). An invasion by the Ammonites seems also to have conspired with the cause just mentioned, and with a love of novelty, in prompting the demand for a king (1 Sam. xii. 12)—an officer evidently alien to the genius of the theocracy, though contemplated as an historical certainty, and provided for by the Jewish lawgiver (1 Sam. xii. 17-20; Deut. xvii. 14-20). An explanation of the nature of this request, as not only an instance of ingratitude to Samuel, but of rebellion against Jehovah, and the delineation of the manner in which their kings—notwithstanding the restrictions prescribed in the law—might be expected to conduct themselves (1 Sam. viii. 11; x. 25), having failed to move the people from their resolution, the Lord sent Saul, who had left home in quest of his father's asses, which had strayed, to Samuel, who having informed Saul of the divine purpose regarding him, and having at a feast shown him a preference, which, no doubt, the other guests understood, privately anointed him king, and gave him various tokens, by which he might be assured that his designation was from Jehovah (1 Sam. ix. x.). Moved by the authority of Samuel, and by the fulfilment of these signs, Saul's reluctance to assume the office to which he was called was overcome. On his way home, meeting a company of prophets, he was

seized with the prophetic afflatus, and so gave occasion to a proverb afterwards in use among the Jews. Immediately after, Saul was elected at Mizpah in a solemn assembly by the determination of the miraculous lot—and both previously to that election (x. 16), and subsequently, when insulted by the worthless portion of the Israelites, he showed that modesty, humility, and forbearance which seem to have characterised him till corrupted by the possession of power. The person thus set apart to discharge the royal function, possessed at least those corporal advantages which most ancient nations desiderated in their sovereigns. His person was tall and commanding, and he soon showed that his courage was not inferior to his strength (1 Sam. ix. 1; x. 23). His belonging to Benjamin also, the smallest of the tribes, though of distinguished bravery, prevented the mutual jealousy with which either of the two great tribes, Judah and Ephraim, would have regarded a king chosen from the other; so that his election was received with general rejoicing, and a number of men, moved by the authority of Samuel (x. 20), even attached themselves to him as a body-guard, or as counsellors and assistants. In the mean time the Ammonites, whose invasion had hastened the appointment of a king, having besieged Jabesh in Gilead, and Nahash their king having proposed insulting conditions to them, the elders of that town, apparently not aware of Saul's election (1 Sam. xi. 3), sent messengers through the land imploring help. Saul acted with wisdom and promptitude; summoning the people, *en masse*, to meet him at Bezek, at the head of a vast multitude he totally routed the Ammonites. He and the people then betook themselves, under the direction of Samuel, to Gilgal, there with solemn sacrifices to reinstall the victorious leader in his kingdom (1 Sam. xi.). At Gilgal Saul was publicly anointed, and solemnly installed in the kingdom by Samuel, who took occasion to vindicate the purity of his own administration—which he virtually transferred to Saul—to censure the people for their ingratitude and impiety, and to warn both them and Saul of the danger of disobedience to the commands of Jehovah (1 Sam. xii.). [SAMUEL.]

The restrictions on which he held the sovereignty had (1 Sam. x. 25) been fully explained as well to Saul as to the people, so that he was not ignorant of his true position as merely the lieutenant of Jehovah, king of Israel, who not only gave all the laws, but whose will, in the execution of them, was constantly to be consulted and complied with. The first occasion on which his obedience to this constitution was put to the test brought out those defects in his character which showed his unfitness for his high office, and incurred a threat of that rejection which his subsequent conduct confirmed (1 Sam. xiii. 13).

Having organized a small standing army, part of which, under Jonathan, had taken a fort of the Philistines, Saul summoned the people to withstand the forces which their oppressors, now alarmed for their dominion, would naturally assemble. But so numerous a host came against Saul, that the people, panic-stricken, fled to rocks and caverns for safety—years of servitude having extinguished their courage, which the want of arms, of which the policy of the Philistines had deprived them, still further diminished. Appa-

rently reduced to extremity, and the seventh day being come, but not being ended, the expiration of which Samuel had enjoined him to wait, Saul 'offered a burnt offering,' thus intruding into the priest's office. Samuel having denounced the displeasure of Jehovah and its consequences, left him, and Saul returned to Gibeah. Left to himself, Saul's errors multiplied apace. Jonathan, having assaulted a garrison of the Philistines (apparently at Michmash, 1 Sam. xiv. 31, which, therefore, must have been situated near Migron in Gibeah, ver. 1, and within sight of it, ver. 15), Saul, aided by a panic of the enemy, an earthquake, and the co-operation of his fugitive soldiers, effected a great slaughter; but by a rash and foolish denunciation, he (1) impeded his success (ver. 30), (2) involved the people in a violation of the law (ver. 33), and (3), unless prevented by the more enlightened conscience of the people, would have ended with putting Jonathan to death for an act which, being done in ignorance, could involve no guilt.

Another trial was afforded Saul before his final rejection, the command to extirpate the Amalekites, whose hostility to the people of God was inveterate (Deut. xxv. 18; Exod. xvii. 8-16; Num. xiv. 42-45; Judg. iii. 13; vi. 3), and who had not by repentance averted that doom which had been delayed 550 years (1 Sam. xiv. 48). A second time Saul wilfully violated the divine commission with which he had been intrusted. This stubbornness in persisting to rebel against the directions of Jehovah was now visited by that final rejection of his family from succeeding him on the throne, which had before been threatened (ver. 23; xiii. 13, 14). After this second and flagrant disobedience, Saul received no more public countenance from the venerable prophet, who now left him to his sins and his punishment; 'nevertheless, he mourned for Saul,' and the Lord repented that he had made Saul king (xv. 35).

The denunciations of Samuel sunk into the heart of Saul, and produced a deep melancholy, which either really was, or which his physicians (1 Sam. xvi. 14, 15; comp. Gen. i. 2) told him, was occasioned by an evil spirit from the Lord. By the advice of his servants, music was employed for the purpose of removing the deep melancholy into which he had fallen, and David was recommended to his notice as one 'cunning in playing.' Some critics have supposed, however, and apparently with good reason, that this event occurred subsequently to the transactions recorded in chap. xviii.

Though not acquainted with the unction of David, yet having received intimation that the kingdom should be given to another, Saul soon suspected from his accomplishments, heroism, wisdom, and popularity, that David was his destined successor; and, instead of concluding that his resistance to the divine purpose would only accelerate his own ruin, Saul, in the spirit of jealousy and rage, commenced a series of murderous attempts on the life of his rival (xviii. 10, 11; xix. 10), that must have lost him the respect and sympathy of his people, which they secured for the object of his malice and envy, whose noble qualities also they both exercised and rendered more conspicuous. The slaughter of Ahimelech the priest (1 Sam. xxii.), under pretence of his being a partisan of David, and of eighty-five

other priests of the house of Eli, to whom nothing could be imputed, as well as the whole inhabitants of Nob, was an atrocity perhaps never exceeded.

Having compelled David to assume the position of an outlaw, around whom gathered a number of turbulent and desperate characters, Saul might persuade himself that he was justified in bestowing on another the hand of his younger daughter whom he had given David to wife, and in making expeditions to apprehend and destroy him. A portion of the people were base enough to minister to the evil passions of Saul (1 Sam. xxiii. 19; xxvi. 1), and others, perhaps, might colour their fear by the pretence of conscience (xxiii. 12). But his sparing Saul's life twice, when he was completely in his power, must have destroyed all colour of right in Saul's conduct in the minds of the people, as it also did in his own conscience (xxiv. 3-7; xxvi.). Though thus degraded and paralysed by the indulgence of malevolent passions, Saul still acted with vigour in repelling the enemies of his country, and in other affairs wherein his jealousy of David was not concerned (xxiii. 27, 28).

The measure of Saul's iniquity, now almost full, was completed by an act of direct treason against Jehovah the God of Israel (Exod. xxii. 18; Lev. xix. 31; xx. 27; Deut. xviii. 10, 11), in consulting a woman that had a familiar spirit. [The question as to the character of the apparition evoked by the Witch of Endor, falls more properly to be considered under the article WITCHCRAFT.] Assured by this woman of his own death the next day, and that of his sons; of the ruin of his army, and the triumph of his most formidable enemies, whose invasion had tempted him to try this unhallowed expedient; Saul, in a state of dejection which could not promise success to his followers, met the enemy next day in Gilboa, on the extremity of the great plain of Esdraelon; and having seen the total rout of his army, and the slaughter of his three sons, of whom the magnanimous Jonathan was one; and, having in vain solicited death from the hand of his armour-bearer, Saul perished at last by his own hand (1 Sam. xxxi. 1-7; 1 Chron. x. 13, 14).

When the Philistines came on the morrow to plunder the slain, they found Saul's body and the bodies of his sons, which, having beheaded them, they fastened to the wall of Bethshan; but the men of Jabesh-gilead, mindful of their former obligation to Saul (1 Sam. xi.), when they heard of the indignity, gratefully and heroically went by night and carried them off, and buried them under a tree in Jabesh, and fasted seven days. From Jabesh the bones of Saul and of his sons were removed by David, and buried in Zelah, in the sepulchre of Kish his father.

SCAPE-GOAT. [GOAT, SCAPE.]

SCARLET. [PURPLE.]

SCEPTRE. The Hebrew word thus rendered in its primary signification denotes a staff of wood (Ezek. xix. 11), about the height of a man, which the ancient kings and chiefs bore as an insigne of honour (Amos i. 5; Zech. x. 11; Ezek. xix. 11; Wisd. x. 14; comp. Gen. xlix. 10; Num. xxiv. 17; Isa. xiv. 5). As such it appears to have originated in the shepherd's staff, since the first kings were mostly nomade princes (Strabo, xvi. 783; comp. Ps. xxix.).

A golden sceptre, that is, one washed or plated with gold, is mentioned in Ezek. iv. 11. Inclining the sceptre was a mark of kingly favour (Esth. iv. 11), and the kissing it a token of submission (Esth. v. 2). Saul appears to have carried his javelin as a mark of superiority (1 Sam. xv. 10; xxii. 6).

SCRIBES, a learned body of men, otherwise denominated lawyers, whose influence with the Jewish nation was very great at the time when our Saviour appeared.

There is every probability that they must have taken their rise contemporaneously with the commencement of the Mosiac polity. They were both a learned and a sacred caste. They had the care of the law; it was their duty to make transcripts of it; they also expounded its difficulties, and taught its doctrines, and so performed several functions which are now distributed among different professions, being keepers of the records, consulting lawyers, authorized expounders of holy writ, and, finally, schoolmasters—thus blending together in one character the several elements of intellectual, moral, social, and religious influence.

In the New Testament the scribes are found as a body of high state functionaries, who, in conjunction with the Pharisees and the high-priests, constituted the Sanhedrim, and united all the resources of their power and learning in order to entrap and destroy the Saviour of mankind. The array of influence thus brought against 'the carpenter's son' was very great. That influence comprised, besides the supreme power of the state, the first legal functionaries, who watched Jesus closely in order to detect him in some breach of the law; the recognised expositors of duty, who lost no opportunity to take exception to his utterances, to blame his conduct, and misrepresent his morals; also the acutest intellects of the nation, who eagerly sought to entangle him in the web of their sophistries, or to confound him by their artful questions. Yet even all these malign influences failed. Jesus was triumphant in argument; he failed only when force interposed its revengeful arm.

SCRIPTURE (HOLY), or SCRIPTURES (HOLY), the term generally applied in the Christian Church since the second century, to denote the collective writings of the Old and New Testaments.

SCYTHIAN, a name which occurs only in Col. iii. 11. It was anciently applied sometimes

299. [1. A Scythian. 2. A Scythian General.]

to a particular people, and sometimes to all the nomadic tribes which had their seat to the north of the Black and Caspian seas, stretching indefinitely eastward into the unknown regions of Asia. It had thus much the same latitude as 'Tartars,' and was in like manner synonymous with Barbarian.

The Scythians were, in fact, the ancient representatives of the modern Tartars, and like them moved from place to place in carts drawn by oxen.

SEA. The term 'sea' was much more in use among the Hebrews than with us, being applied by them generally to all large collections of water, as they had not a set of terms such as we employ to discriminate the different kinds.

1. THE MEDITERRANEAN, being on the west, and therefore behind a person facing the east, is called in Scripture the *Hinder Sea* (Deut. xi. 24; Joel ii. 20), that is, *Western Sea*; and also, 'the Sea of the Philistines' (Exod. xxiii. 31), as that people possessed the largest proportion of its shore in Palestine. Being also the largest sea with which the Hebrews were acquainted, they called it by pre-eminence, 'the Great Sea' (Num. xxxiv. 6, 7; Josh. i. 4; ix. 1; Ezek. xlvii. 10, 15, 20); or simply 'the sea' (Josh. xv. 47).

2. THE RED SEA.—How this gulf of the Indian Ocean came by the name of Red Sea is not agreed. Prieux assumes (*Connection*, i. 14, 15) that the ancient inhabitants of the bordering countries called it *Yam Edom*, or, 'the sea of Edom' (it is never so called in Scripture), as its north-eastern part washed the country possessed by the Edomites. Now Edom means red (Gen. xxv. 30), and the Greeks, who borrowed the name from the Phœnicians, mistook it for an appellative instead of a proper name, and rendered by 'the Red Sea.' Others have conjectured that the Arabian Gulf derived its name from the coral rocks and reefs in which it abounds; but the coral of the Red Sea is white, not red. It is now in question whether the name originated from the singularly red appearance presented by some of the mountains along the western coast; or from the redness which the surface of the water sometimes assumes from its being covered to a great extent with a numberless multitude of very small molluscs.

The ancients applied the name of Erythræan Sea not only to the Arabian Gulf, but to that part of the Indian Ocean which is enclosed between the peninsulas of India and Arabia; but in modern usage the name of Red Sea is restricted to the Arabian Gulf, which enters into the land from the Indian Ocean in a westerly direction, and then, at the straits of Bab-el-Mandeb, turns N.N.W., maintaining that direction till it makes a near approach to the Mediterranean, from which its western arm is only separated by the isthmus of Suez. It thus separates the western coast of Arabia from the Eastern coast of the north-eastern part of Africa. It is about 1400 miles in length from Suez to the straits, and on an average 150 miles in breadth. On approaching its northern termination the gulf divides into two branches, which enclose between them the peninsula of Sinai. The western arm, which terminates a little above Suez, is far more extensive than the other, and is that which was crossed by the Israelites in their escape from Egypt. This arm, anciently called Heropoliticus Sinus, and now the Gulf of Suez, is 190 miles long by an average

breadth of 21 miles; but at one part (Birket el-Faroun) it is as wide as 32 miles. The eastern arm, which terminates at Akabah, and bears the name of the Gulf of Akabah, was anciently called Ælaniticus Sinus, from the port of Ælana, the Scriptural Elath, and is about 112 miles long by an average breadth of 15 miles. Towards its extremity were the ports of Elath and Eziongeber, celebrated in the history of the attempts made by the Hebrew kings to establish a maritime traffic with the East [see the several words].

3. THE SEA OF CHINNERETH (NUM. xxxiv. 11), called in the New Testament 'the Sea of Galilee' (Matt. iv. 18), the 'Sea of Tiberias' (John xxi. 1), and 'the sea' or 'lake of Genesareth' (Matt. xiv. 34; Mark vi. 53; Luke v. 17); which last is but a variation of the Hebrew name.

This lake lies very deep, among fruitful hills and mountains, from which, in the rainy season, many rivulets descend; its shape will be seen from the map. The Jordan enters it on the north, and quits it on the south; and it is said that the river passes through it without the waters mingling. Its extent has been greatly over-rated. Dr. Robinson considers that its length, in a straight line, does not exceed eleven or twelve geographical miles, and that its breadth is from five to six miles. From numerous indications it is inferred that the bed of this lake was formed by some ancient volcanic eruption, which history has not recorded: the waters are very clear and sweet, and contain various kinds of excellent fish in great abundance. It will be remembered that several of the apostles were fishermen of this lake, and that it was also the scene of several transactions in the life of Christ: it is thus frequently mentioned in the New Testament, but very rarely in the Old. The borders of the lake were in the time of Christ well peopled, being covered with numerous towns and villages; but now they are almost desolate, and the fish and water-fowl are but little disturbed.

4. THE DEAD SEA, called in Scripture the *Salt Sea* (Gen. xiv. 3), the *Sea of the Plain*, or the *Arabah* (Deut. iv. 40), and the *Eastern Sea* (Joel ii. 20; Ezek. xlvii. 18; Zech. xiv. 8). It is not named or alluded to in the New Testament. From its history and qualities, it is the most remarkable of all the lakes of Palestine; and is supposed either to have originated in, or at least to have been greatly enlarged by, the awful event which overwhelmed the cities of the plain.

It is about thirty-nine or forty geographical miles long from north to south, and nine or ten miles wide from east to west: it lies imbedded very deep between lofty cliffs on the western side, which are about 1500 feet high, and mountains on the eastern shore, the highest ridges of which are reckoned to be from 2030 to 2500 feet above the water. The water of the lake is much saltier than that of the sea. From the quantity of salt which it holds in solution it is thick and heavy, and no fish can live or marine plants grow in it. The old stories about the pestiferous qualities of the Dead Sea and its waters are mere fables or delusions; the actual appearances being the natural and obvious effects of the confined and deep saltness, the intense heat, and the uncommon saltness of the waters.

On the borders of this lake is found much sulphur, in pieces as large as walnuts, and even

larger. There is also a black shining stone, which will partly burn in the fire, and which then emits a bituminous smell: this is the 'stink-stone' of Barchhardt. At Jerusalem it is made into rosaries and toys, of which great quantities are sold to the pilgrims who visit the sacred places. Another remarkable production, from which, indeed, the lake takes one of its names, is the *asphaltum*, or bitumen. Josephus says, that 'the sea in many places sends up black masses of asphaltum, which float upon the surface, having the size and shape of headless oxen.' From recent information it appears that large masses are rarely found, and then generally only after earthquakes. The substance is doubtless produced from the bottom of the sea, in which it coagulates, and rises to the surface; or possibly the coagulation may have been ancient, and the substance adheres to the bottom until detached by earthquakes and other convulsions, when its buoyancy brings it to the surface. We know that 'the vale of Siddim' (Gen. xiv. 10) was anciently 'full of slime-pits,' or sources of bitumen; and these, now under the water, probably supply the asphaltum which is found on such occasions.

5. THE LAKE MERON is named once only in Scripture, where it is called *waters of Merom* (Josh. xi. 5, 7). By Josephus it is called *Semehonitis*, and at present bears the name of Huleh: this is the uppermost and smallest of the three lakes on the Jordan. It serves as a kind of reservoir to collect the waters which form that river, and again to send them forth in a single stream. In the spring, when the waters are highest, the lake is seven miles long and three and a half broad; but in summer it becomes a mere marsh. In some parts it is sown with rice, and its reeds and rushes afford shelter to wild fowls.

SEA, MOLTEN. The immense brazen reservoir which, with smaller lavars [*LAVAR*], stood in the court of Solomon's temple, was thus, by hyperbole, denominated. It was of a hemispherical figure, ten cubits in width, five deep, and thirty in circumference. In 1 Kings vii. 23, it is stated to have contained 2000 baths, equal to 16,000 gallons; but in 2 Chron. iv. 5, it is said to have contained 3000 baths, and the latter estimate is followed by Josephus. It was probably capable of holding the larger quantity, but did not usually contain more than the smaller. It was decorated on the upper edge with figures resembling lilies in bloom, and was enriched with various ornamental objects; and it rested, or seemed to rest, upon the backs of twelve oxen, three looking to the north, three to the east, three to the south, and three to the west (1 Kings vi. 26; vii. 40-47; 2 Chron. iv. 3-5). The conception, and still more the successful execution of this great work, gives a very favourable idea of the state of the metallurgical arts in the time of Solomon.

SEAL. There seem to have been two kinds of seals in use among the Hebrews. A notion appears to exist that all ancient seals, being signets, were rings, intended to be worn on the hand. But this was by no means the case; nor is it so now in the East, where signet rings are still, probably, as common as they ever were in ancient times. Their general use of seals was very different from ours, as they were employed not for the purpose of impressing a device on wax, but in the place

of a sign manual, to stamp the name of the owner upon any document to which he desired to affix it. The name thus impressed had the same legal validity as the actual signature, as is still the case in the East. This custom was ancient, and, no doubt, existed among the Hebrews (Gen. xxxviii. 18; Cant. viii. 6; Haggai ii. 23). These seals are often entirely of metal—brass, silver, or gold; but sometimes of stone set in metal.

If a door or box was to be sealed, it was first fastened with some ligament, over which was placed some well-compacted clay to receive the impression of the seal. Clay was used because it hardens in the heat, which would dissolve wax; and this is the reason that wax is not used in the East. There are distinct allusions to this custom in Job xxxviii. 14; Cant. iv. 12.

Signet rings were very common, especially among persons of rank. They were sometimes wholly of metal, but often the inscription was borne by a stone set in silver or gold. The impression from the signet ring of a monarch gave the force of a royal decree to any instrument to which it was affixed. Hence the delivery or transfer of it to any one gave the power of using the royal name, and created the highest office in the state (Gen. xli. 42; Esth. iii. 10, 12; viii. 2; Jer. xxii. 24; Dan. vi. 10, 13, 17; comp. 1 Kings xxi. 8).

SEBA was the eldest son of Cush (Gen. x. 7; 1 Chron. i. 9), and gave name to the country of Seba or Saba, and to one of the tribes called Sabæans, not, however, the *Shebaim*, but the *Sebaim*. There seems no reason to doubt that their ultimate settlement was in that region of Africa which was known to the Hebrews as the land of Cush, and to the Greeks and Romans as Ethiopia; and the Scriptural notices respecting them and their country have been already anticipated in the articles CUSH and ETHIOPIA.

SECUNDUS, a disciple of Thessalonica, who accompanied Paul in some of his voyages (Acts xx. 4).

SEER. [*PROPHET*.]

SE'IR (*ha'iry*). 1. A phylarch or chief of the Horim, who were the former inhabitants of the country afterwards possessed by the Edomites.

2. SEIR, MOUNT. The mountainous country of the Edomites, extending from the Dead Sea to the Elanitic Gulf. The name is usually derived from the Seir above mentioned, and as he was a great chief of the original inhabitants, it is difficult to reject such a conclusion. These mountains were first inhabited by the Horim (Gen. xiv. 6; Dent. ii. 12); then by Esau (Gen. xxxii. 3; xxxiii. 14, 16) and his posterity (Dent. ii. 4, 19; 2 Chron. xx. 16). The northern part of them now bears the designation of Jebel, and the southern that of esh-Sherah, which seems no other than a modification of the ancient name. The whole breadth of the mountainous tract between the Arabah (the great valley between the Dead Sea and Elanitic Gulf) and the eastern desert above is about 15 or 20 geog. miles. These mountains are quite different in character from those which front them on the other (west) side of the Arabah. The latter seem to be not more than two-thirds as high as the former, and are wholly desert and sterile; while those on the east appear to enjoy a sufficiency of rain, and are covered with tufts of herbs and occasional trees.

The valleys are also full of trees and shrubs and flowers, the eastern and higher parts being extensively cultivated, and yielding good crops. It is indeed the region of which Isaac said to his son Esau, 'Behold, thy dwelling shall be of the fatness of the earth, and of the dew of heaven from above' (Gen. xxvii. 39).

3. A mountain in the territory of Judah (Josh. xv. 10).

SELAH. [PSALMS.]

SELAH, or rather SELA (*rock*); Gr. Petra, which has the same signification as Selah, the metropolis of the Edomites in Mount Seir. In the Jewish history it is recorded that Amaziah, king of Judah, 'slew of Edom in the valley of Salt ten thousand, and took Selah by war, and called the name of it Joktheel unto this day' (2 Kings xiv. 7). This name seems however to have passed away with the Hebrew rule over Edom, for no further trace of it is to be found; and it is still called Selah by Isaiah (xvi. 1). These are all the certain notices of the place in Scripture. Mention is made of it by Strabo, Pliny, and other ancient writers; but from A.D. 536, down to the present century, not the slightest notice of the city is to be found in any quarter; and as no trace of it as an inhabited site is to be met with in the Arabian writers, the probability seems to be that it was destroyed in some unrecorded incursion of the desert hordes, and was afterwards left unpeopled. It was identified by Burckhardt in 1812 as the ancient capital of Arabia Petraea; and since that time has been visited by various travellers, who have given a minute description of its present condition.

300. [Petra, from above the Amphitheatre.]

The ruined city lies in a narrow valley, surrounded by lofty, and, for the most part, perfectly precipitous mountains. Those which form its southern limit are not so steep as to be impassable; and it is over these, or rather through them, along an abrupt and difficult ravine, that travellers from Sinai or Egypt usually wind their laborious way into the scene of magnificent desolation. The ancient and more interesting entrance is on the eastern side, through the deep narrow gorge of Wady Syke. The boundaries of the city are marked with perfect distinctness by the precipitous mountains by which the site is encompassed; and they give an extent of more than a mile in length, nearly from north to south, by a variable breadth of about half a mile. The sides of the valley are walled up by perpendicular rocks,

from four hundred to six or seven hundred feet high. The northern and southern barriers are neither so lofty nor so steep, and they both admit of the passage of camels.

The chief public buildings occupied the banks of the river and the high ground farther south, as their ruins sufficiently show. One sumptuous edifice, which seems to have been a palace, remains standing, though in an imperfect and dilapidated state. It is an imposing ruin, though not of the purest style of architecture, and is the only constructed edifice now standing in Petra.

In various other parts of the valley are piles of ruins—columns and hewn stones—parts no doubt of important public buildings, which indicate the great wealth and magnificence of this ancient capital, as well as its unparalleled calamities. A large surface on the north side of the river is covered with substructions, which probably belonged to private habitations.

The mountain torrents which, at times, sweep over the lower parts of the ancient site, have undermined many foundations, and carried away many a chiselled stone, and worn many a finished specimen of sculpture into unshapely masses. The soft texture of the rock secures the destructive agencies of the elements. Even the accumulations of rubbish, which mark the site of all other decayed cities, have mostly disappeared; and the extent which was covered with human habitations can only be determined by the broken pottery scattered over the surface, or mingled with the sand—the universal, and, it would seem, an imperishable memorial of popular cities that exist no longer.

The attention of travellers has however been chiefly engaged by the excavations which, having more successfully resisted the ravages of time, constitute at present the great and peculiar attraction of the place. These excavations, whether formed for temples, tombs, or the dwellings of living men, surprise the visitor by their incredible number and extent. They not only occupy the front of the entire mountain by which the valley is encompassed, but of the numerous ravines and recesses which radiate on all sides from this enclosed area. Were these excavations, instead of following all the sinuosities of the mountain and its numerous gorges, ranged in regular order, they probably would form a street not less than five or six miles in length. By far the largest number were manifestly designed as places for the interment of the dead; and thus exhibit a variety in form and size, of interior arrangement and external decorations, adapted to the different fortunes of their occupants. Some of them are plain and unadorned, but there is a vast number of excavations enriched with various architectural ornaments. The interior of these unique and sumptuous monuments is quite plain and destitute of all decoration, but the exteriors exhibit some of the most beautiful and imposing results of ancient taste and skill which have remained to our times. The front of the mountain is wrought into façades of splendid temples, rivalling in their aspect and symmetry the most celebrated monuments of Grecian art. Columns of various orders, graceful pediments, broad rich entablatures, and sometimes statuary, all hewn out of the solid rock, and still forming part of the native mass, transform the base of the mountain into a vast splendid pile of architecture.

while the overhanging cliffs, towering above in shapes as rugged and wild as any on which the eye ever rested, form the most striking and curious of contrasts.

301. [Interior of a tomb.]

But nothing contributes so much to the almost magical effect of some of these monuments, as the rich and various colours of the rock out of which, or more properly in which, they are formed. Red, purple, yellow, azure or sky blue, black and white, are seen in the same mass distinctly in successive layers, or blended so as to form every shade and hue of which they are capable—as brilliant and as soft as they ever appear in flowers, or in the plumage of birds, or in the sky when illuminated by the most glorious sunset. It is more easy to imagine than describe the effect of tall, graceful columns, exhibiting these exquisite colours in their succession of regular horizontal strata.

SELEUCIA, a city of Syria, situated west of Antioch, on the sea-coast, near the mouth of the Orontes; sometimes called Selencia Pieria, from the neighbouring Mount Pierus: and also Seleucia ad Mare, in order to distinguish it from several other cities of the same name, all of them denominated from Selencus Nicanor. Paul and Barnabas on their first journey embarked at this port for Cyprus (Acts xiii. 4).

SE'NIR. [HERMON.]

SENNACHERIB, king of Assyria, who, in the fourteenth year of King Hezekiah (B.C. 713), came up against all the fenced cities of Judah, and took them; on which Hezekiah agreed to pay the Assyrian monarch a tribute of three hundred talents of silver and thirty talents of gold. This, however, did not satisfy Sennacherib, who sent an embassy with hostile intentions, charging Hezekiah with trusting on 'this bruised reed Egypt.' The king of Judah in his perplexity had recourse to Isaiah, who counselled confidence and hope, giving a divine promise of miraculous aid. Meanwhile 'Tirhakah, king of Ethiopia,' and of Thebes in Egypt, had come out to fight against the Assyrians, who had threatened Lower Egypt without invasion. On learning this, Sennacherib sent another deputation to Hezekiah, who thereon applied for aid to Jehovah, who promised to defend the capital. 'And it came to pass that night that the angel of the Lord went out and smote in the camp of the Assyrians an hundred fourscore and five thousand; and when they arose early in the morning, behold they were all dead corpses' (2

Kings xviii. 13, sq.). On this, Sennacherib returned to Nineveh, and was shortly after murdered by two of his sons as he was praying in the house of Nisroch his god (2 Kings xix. 36, sq.; 2 Chron. xxxii.; Isa. xxxvii.).

SE'PHAR, 'a mountain of the east,' a line drawn from which to Mesha formed the boundary of the Joktanite tribes (Gen. x. 30).

SEPH'ARAD, a region to which the exiles from Jerusalem were taken (Obad. 20). It appears to have been a district of Asia Minor, or at least near to it.

SEPHARVA'IM, a city of the Assyrian empire, whence colonists were brought into the territory of Israel, afterwards called Samaria (2 Kings xvii. 24; xviii. 34; xix. 13; Isa. xxxvi. 19; xxxvii. 13). The place is probably represented by Siphara in Mesopotamia, situated upon the east bank of the Euphrates above Babylon.

SEPULCHRE. [BURIAL.]

SERAIAH (warrior of Jehovah). There are several persons of this name in Scripture.

1. SERAIAH, the scribe or secretary of David (2 Sam. viii. 17).

2. SERAIAH, the father of Ezra (Ez. vii. 1).

3. SERAIAH, the high priest at the time that Jerusalem was taken by the Chaldeans. He was sent prisoner to Nebuchadnezzar at Riblah, who put him to death (2 Kings xxv. 18; 1 Chron. vi. 14; Jer. lii. 24; Ez. vii. 1).

4. SERAIAH, son of Azriel, one of the persons charged with the apprehension of Jeremiah and Baruch (Jer. xxxvi. 26).

5. SERAIAH, son of Neriah, who held a high office in the court of King Zedekiah, the nature of which is somewhat uncertain. In the Auth. Vers. we have, 'This Seraiah was a quiet prince,' which should be rendered, according to Gesenius, 'chief of the quarters' for the king and his army, that is *quartermaster-general*. This Seraiah was sent by Zedekiah on an embassy to Babylon, probably to render his submission to that monarch, about seven years before the fall of Jerusalem. He was charged by Jeremiah to communicate to the Jews already in exile a book, in which the prophet had written out his prediction of all the evil that should come upon Babylon. It is not stated how Seraiah acquitted himself of his task; but that he accepted it at all, shows such respect for the prophet as may allow us to conclude that he would not neglect the duty which it imposed.

6. SERAIAH, son of Tanhumeth, an accomplice of Ishmael in the conspiracy against Gedaliah (2 Kings xxv. 23; Jer. xl. 8).

SE'RAH (*abundance*), daughter of Asher, named among those who went down into Egypt (Gen. xli. 17; Num. xxvi. 46; 1 Chron. vii. 30).

SERAPHIM, or SERAPHs, the plural of the word *seraph*, 'burning,' or 'fiery': celestial beings described in Isa. vi. 2-6, as an order of angels or ministers of God, who stand around his throne, having each six wings, and also hands and feet, and praising God with their voices. They were therefore of human form, and, like the Cherubim, furnished with wings as the swift messengers of God.

There is much symbolical force and propriety in the attitude in which the Seraphim are described as standing; while two of their wings were kept ready for instant flight in the service

of God, with two others they hid their face, to express their unworthiness to look upon the divine Majesty (comp. Exod. iii. 6), and with two others they covered their feet, or the whole of the lower part of their bodies—a practice which still prevails in the East, when persons appear in a monarch's presence.

SERGIUS PAULUS, a Roman proconsul in command at Cyprus, who was converted by the preaching of Paul and Barnabas (Acts xiii. 7). The title given to this functionary exhibits one of those minute accuracies which, apart from its inspiration, would substantiate the sacred book as a genuine and contemporary record. Cyprus was originally a *pratorian* province, and not *proconsular*; but it was left by Augustus under the Senate, and hence was governed by a proconsul, as stated by the Evangelist (Acts xiii. 6, 8, 12). Sergius is described by the Evangelist as a 'discreet' or 'intelligent' man; by which we are probably to understand that he was a man of large and liberal views, and of an inquiring turn of mind. Hence he had entertained Elymas, and hence also he became curious to hear the new doctrine which the apostle brought to the island. Nothing of his history subsequent to his conversion is known from Scripture.

SERPENT. Serpents may be divided generally into two very distinct sections,—the first embracing all those that are provided with moveable tubular fangs and poison-bags in the upper jaw; all regarded as ovoviviparous, and called by contraction *vipera*; they constitute not quite one fifth of the species hitherto noticed by naturalists. The second section, much more numerous, is the *colubrine*, not so armed, but not therefore always entirely innocuous, since there may

fact may be traced in the history, the legends, and creeds of most ancient nations. It is far from being obliterated at this day among the pagan, barbarian, and savage tribes of both continents, where the most virulent and dangerous animals of the viviparous class are not uncommonly adored, but more generally respected, from motives originating in fear; and others of the oviparous race are suffered to abide in human dwellings, and are often supplied with food, from causes not easily determined, excepting that the serpent is ever considered to be possessed of some mysterious superhuman knowledge or power.

The supposed winged serpent, which appears to be alluded to in 'the fiery flying serpent' of Isaiah (xiv. 29; xxx. 6), seems, as well as the 'adder,' to have been a species of *Haye*, and probably one of the more eastern species or varieties, which have the faculty of actually distending the hood, as if they had wings at the side of the head, and are the same as, or nearly allied to, the well known spectacle-snake of India.

The serpent named Ephoeih (Job xx. 16, and Isaiah xxx. 6), and which seems to be the same as the 'vipera' of the New Testament (Matt. iii. 7; xii. 34; xxiii. 33; Luke iii. 7; Acts xxviii. 3), was probably a species allied to the *Efish*, a serpent which, although not above a foot in length, is regarded as the most formidable of Northern Africa.

The serpent which in Deut. xxxii. 33; Job xx. 14, 16; Ps. lviii. 4; xci. 13; Isa. xi. 8, occurs under the Hebrew name of *Pethen*, is probably the *Betan* of Forskal; the *Coluber (vipera) Lebe-tina* of Linn., and by him characterized as one foot in length, the body spotted with black and white, and oviparous (?), though excessively poisonous. This is usually regarded as the 'asp' of the ancients, and the 'dead adder' of Ps. lviii. 5, 6. This is uncertain; and it may be remarked that the so-called 'dead adder' is not without hearing, but is only not obedient to the musical notes of the serpent-charmers.

The serpent called in the Hebrew of Deut. xiii. 15, by the name of *zimmaon*, appears to be the 'Drought' of some versions, so called because of the intolerable thirst occasioned by its bite. It would therefore seemingly form in modern nomenclature one of the genus *Hurria*, and subgenus *Dipsas* or *Bongarus*; but no species of this division of snakes has yet been found in Western Asia. Another serpent mentioned in Scripture is the *tzepha*, or *triphoni*, translated 'cockatrice' in Prov. xxiii. 32, and Isa. xi. 8. This is an indefinite English name, which belongs to no identified serpent, and now appears only in the works of ancient compilers and heralds, where it is figured with a crest, though there is no really crested or frilled species known to exist in the whole Ophidian order. There are, however, two very distinct species of horned serpents in Egypt and Northern Africa, probably extending to Syria and Arabia. They are of different genera; for the *Cerastes*, supposed to be the *shephiphon* of the Bible, is a viper with two scales on the head, one above each eye, standing erect somewhat in the form of horns. This is a dangerous species, usually burrowing in sand near the holes of jerboas, and occasionally in the cattle-paths; for there are now few or no rats of cart-wheels, where it is pretended they used to conceal them-

302. [1. Shephiphon: *Cerastes*. 2. Pethen: *Coluber Lebetina*. 3. Python: *Python regalis*; probably *Thalabanne*.]

be in some cases venomous secretions capable of penetrating into the wounds made by their fixed teeth, which in all serpents are single points, and in some species increase in size as they stand back in the jaws. The greater part, if not all, the innocuous species are oviparous, including the largest or giant snakes, and the *plamis* and *hydrophis*, or water-serpents, among which several are venomous.

Scriptural evidence attests the serpent's influence on the early destinies of mankind; and this

selves to assault unwary passers. It is still common in Egypt and Arabia.

SERVANT. (SLAVE.)

SERUG (*shoot, tendril*), son of Reu, and father of Nabor the grandfather of Abraham (Gen. xi. 20; 1 Chron. i. 6). He was 130 years old at the birth of Nabor, and died at the age of 330. The name occurs in the genealogy of Christ (Luke iii. 35). The Jewish traditions affirm that Serug was the first of his line who fell into idolatry; and this seems to be sanctioned by, and is probably built upon, the charge of idolatry brought against Terah and the fathers beyond the Euphrates in Josh. xxiv. 2.

SETH (*compensation*), the third son of Adam, to whom Eve gave this name in consequence of regarding him as sent to replace Abel, whom Cain had slain (Gen. iv. 25, 26; v. 3, sq.).

SEVEN. This word is used to express the number 6 + 1. The Lexicons generally, both ancient and modern, also assign to the word and its derivatives the further office of a round or indefinite number, to express a small number, in the sense of several (as we use *ten* or a *dozen*). It appears to us possible to resolve the passages quoted in support of this view into the idea of sufficiency, satisfaction, fullness, completeness, perfection, abundance, &c., intimated in the Hebrew root, from which the numeral in question is derived. For instance, 1 Sam. ii. 5, 'The barren hath born seven,' that is, hath been blessed with an ample family; Ruth iv. 13, 'Better to thee than seven sons,' i. e. an abundance of them; Prov. xxvi. 25, 'There are seven abominations in his heart,' i. e. completeness of depravity. Thus also the phrase, 'To flee seven ways' (Deut. xxviii. 7), denotes a total overthrow; to 'punish seven times' (Lev. xxvi. 24), to punish completely; 'Six and seven troubles,' a very great and entire calamity (Job v. 19); 'Give a portion to seven, also to eight,' but not only duly liberal, but abundant; 'Silver purified seven times,' perfectly purified (Ps. xii. 6). The word is used in the New Testament to express the same idea of abundance or completeness. Thus 'the seven spirits before the throne' would seem to be a periphrasis of perfection, denoting the Holy Spirit (Rev. i. 4). It is most likely that the idea of sufficiency and completeness became originally associated with the number seven, from the Creator having finished, completed, or made sufficient, all his work on the seventh day; and that hence also it was adopted as a sacred number, or a number chiefly employed in religious concerns, in order to remind mankind of the creation and its true author. Thus there were seven offerings in making a covenant (Gen. xxi. 28); seven lamps in the golden candlestick (Exod. xxxvii. 23); the blood was sprinkled seven times (Lev. iv. 16, 17); every seventh year was sabbatical, seven sabbaths of years in the jubilee (xxv. 8); seven trumpets, seven priests that sounded them seven days round Jericho, seven lamps, seven seals, &c. &c. Seven was considered a fortunate number among the Persians (Esth. i. 10-14; ii. 9). Cicero calls it the knot and cement of all things, as being that by which the natural and spiritual world are comprehended in one idea. Nor is this subject devoid of practical utility. The references which occur in the patriarchal history to the number seven, as denoting a week or period of seven days,

sufficiency, &c., and a sacred number, afford a minute, indirect, but not an inconsiderable argument, that the institution of the Sabbath was both established and observed from the commencement; and not, as Paley thinks, during the wandering in the wilderness: an argument abundantly confirmed by the regard to the seventh day, which has prevailed too far and wide among various nations, to be attributed to their comparatively late intercourse with the Jews.

SHAAL'BIM (*city of foxes*), called also SHAALIN, a city of the tribe of Dan (Josh. xix. 42), but of which it could not for a long while dispossess the Amorites (Judg. i. 35). In the time of Solomon it was the station of one of the twelve officers or intendants appointed to regulate the collection of provisions for the court (1 Kings iv. 9). One of David's worthies belonged to this place (2 Sam. xxiii. 32; 1 Chron. xi. 32).

SHAALIM (*foxes' region*), a district named in 1 Sam. ix. 4; probably that in which Shaalbim was situated.

SHAASH'GAZ, the appropriate name (meaning in Persian, *servant of the beautiful*) of a Persian eunuch, the keeper of the women in the court of Ahasuerus (Esth. ii. 14).

SHAD'DAI, an epithet or name applied to JEHOVAH. In Gen. xvii. 1 it is given as EL-SHADDAI in the Authorized Version; but is everywhere else rendered by 'Almighty,' which is its true signification.

SHA'DRACH, one of the three friends of Daniel, who were delivered from the burning, fiery furnace (ABEDNEGO).

SHAL'ISHA, a district in the vicinity of the mountains of Ephraim (1 Sam. ix. 4), in which appears to have been situated the city of Baal-Shalisha (2 Kings iv. 22). This city is called by Eusebius Beth-Shalisha, and is placed by him 15 miles from Diospolis (Lydda), towards the north.

SHALLOT. The original word (*shumim*) occurs only once in Scripture, and that in the passage (Num. xi. 5) where the Israelites are described as murmuring, among other things, for the leeks, the onions, and the garlic (*shumim*) of Egypt. There can be no doubt of its being correctly so translated. Ancient authors mention that garlic was cultivated in Egypt. Herodotus enumerates it as one of the substances upon which a large sum (1600 talents) was spent for feeding labourers employed in building the Pyramids. The species considered to have been thus cultivated in Egypt is *Allium Ascalonicum*, which is the most common in Eastern countries, and obtains its specific name from having been brought into Europe from Ascalon. It is now usually known in the kitchen garden by the name of 'eschalot' or 'shallot,' and is too common to require a fuller notice.

SHAL'LUM (*retribution*), the fifteenth king of Israel. In the troubled times which followed the death of Jeroboam II., B.C. 722, his son Zechariah was slain in the presence of the people by Shallum, who by this act extinguished the dynasty of Jehu. Shallum then mounted the throne (B.C. 721), but occupied it only one month, being opposed and slain by Menahem, who mounted the throne thus vacated (2 Kings xv. 10-15).

2. A king of Judah, son of Josiah (Jer. xxii. 11), better known by the name of Jehoahaz [JEHOHAZ II.].

3. The husband of Huldah the prophetess (2 Kings xxii. 14). Several other persons of this name occur in Ezra ii. 42; vii. 2; x. 24, 42; Neh. iii. 12; vii. 45; 1 Chron. ii. 40.

SHALMANESER, king of Assyria [Assyria].

SHAMGAR, son of Anath, and third judge of Israel. It is not known whether the only exploit recorded of him was that by which his authority was acquired. It is said that he 'slew of the Philistines 600 men with an ox-goad' (Judg. iii. 31). It is supposed that he was labouring in the field, without any other weapon than the long staff armed with a strong point, used in urging and guiding the cattle yoked to the plough, when he perceived a party of the Philistines, whom, with the aid of the husbandmen and neighbours, he repulsed with much slaughter. The date and duration of his government are unknown, but may be probably assigned to the end of that long period of repose which followed the deliverance under Ehud. In Shamgar's time, as the song of Deborah informs us (Judg. v. 6), the condition of the people was so deplorably insecure, that the highways were forsaken, and travellers went through by-ways, and, for the same reason, the villages were abandoned for the walled towns.

1. SHAMMIR, a city of Judah (Josh. xv. 48).

2. SHAMIR, a city in the mountains of Ephraim, where Tola lived and was buried (Judg. x. 1, 2).

SHAMMAH (*astonishment*), one of the three chief of the thirty champions of David. The exploit by which he obtained this high distinction, as described in 2 Sam. xxiii. 11, 12, is manifestly the same as that which in 1 Chron. xi. 12-14, is ascribed to David himself, assisted by Eleazar the son of Dodo. The inference, therefore, is, that Shammah's exploit lay in the assistance which he thus rendered to David and Eleazar. It consisted in the stand which the others enabled David to make, in a field of lentils, against the Philistines. Shammah also shared in the dangers which Eleazar and Jashobeam incurred in the chivalric exploit of forcing a way through the Philistine host to gratify David's thirst for the waters of Bethlehem (2 Sam. xxiii. 16).

Other persons of this name occur. 2. A son of Reuel (Gen. xxxvi. 13, 17). 3. A brother of David (1 Sam. xvi. 9; xvii. 3), who is elsewhere called Shimeah (2 Sam. xiii. 3, 32) and Shimma (1 Chron. ii. 13). 4. One of David's thirty champions, seemingly distinct from the chief of the same name (2 Sam. xxiii. 33). 5. Another of the champions distinguished as Shammah the Harodite; he is called Shammoth in 1 Chron. xi. 27, and Shamluth in 1 Chron. xxvii. 8. That three of the thirty champions should bear the same name is somewhat remarkable.

SHA'PIAN, the scribe or secretary of King Josiah (2 Kings xxii. 3, 12; Jer. xxxvi. 10; comp. Ezra viii. 11). Contemporary with him was a state officer named Ahikam, constantly mentioned as 'the son of Shaphan' (2 Kings xxii. 12; xxv. 22; Jer. xxvi. 24; xxxix. 14; and perhaps xxxix. 3); but this Shaphan, the father of Ahikam, can hardly be the same with Shaphan the scribe, although the heedless reader may be apt to confound them.

SHAREZER (Persic, *prince of fire*), a son of Sennacherib, one of those who slew his father

(2 Kings xix. 37; Isa. xxxvii. 38). Another person of this name occurs in Zech. vii. 2.

SHIA'RON, a level tract along the Mediterranean, between Mount Carmel and Caesarea, celebrated for its rich fields and pastures (Josh. xii. 18; Cant. ii. 1; Isa. xxxiii. 9; xxxv. 2; lxxv. 10; 1 Chron. xxvii. 9). See the head 'Plains,' in the art. PALESTINE.

SHIA'VEH, a valley on the north of Jerusalem called also the King's Dale (Gen. xiv. 17; comp. 2 Sam. xxviii. 18).

SHA'VEH-KIRJATHAIM (Gen. xiv. 5), a plain near the city of Kirjathaim, beyond Jordan, which eventually belonged to Reuben (Num. xxxii. 37; Josh. xiii. 19).

SHEAL'TIEL (*asked of God*), the father of Zerubbabel (Ezra iii. 2; Neh. xii. 1; Hag. i. 12, 14; ii. 2); called also *Salathiel* (1 Chron. iii. 7).

SHEAR-JASHUB (*the remnant shall return*), son of the prophet Isaiah, who accompanied his father when he proceeded to deliver to king Ahaz the celebrated prophecy contained in Isa. vii. (see verse 3). As the sons of Isaiah sometimes stood for signs in Israel (Isa. viii. 18), and the name of Maher-shalal-hazib was given to one of them by way of prophetic intimation, it has been conjectured that the somewhat remarkable name of Shear-jashub intimated that the people who had then retired within the walls of Jerusalem should return in peace to their fields and villages. But we cannot build on this, as it is not distinctly stated that the name of Shear-jashub was chosen, like that of his brother, with any prophetic intension.

SHE'BA, SABA'EANS. As much confusion has been introduced by the variety of meanings which the name *Saba'eans* has been made to bear, it may be proper to specify in this place their distinctive derivations and use. In our Authorized Version of Scripture the term seems to be applied to three different tribes. 1st. To the *Sebatim*, the descendants of Seba or Saba, son of Cush, who ultimately settled in Ethiopia. 2nd. To the *Sebatim*, the descendants of Sheba, son of Joktan, the *Sabai* of the Greeks and Romans, who settled in Arabia Felix. They are the 'Saba'eans' of Joel iii. 8, to whom the Jews were to sell the captives of Tyre. 3rd. To another tribe of *Shebans*, a horde of Bedawee marauders in the days of Job (ch. i. 15); for whether we place the land of Uz in Idumæa or in Ansisit, it is by no means likely that the Arabs of the south would extend their excursions so very far. We must, therefore, look for this tribe in Desert Arabia; and it is singular enough, that besides the Seba of Cush, and the Shaba of Joktan, there is another Sheba, son of Jokshan, and grandson of Abraham, by Keturah (Gen. xxv. 33); and his posterity appear to have been 'men of the wilderness,' as were their kinsmen of Midian, Ephah, and Dedan.

Yet, as if to increase the confusion in the use of this name of 'Saba'eans,' it has also been applied—4th. To the ancient star-worshippers of Western Asia, though they ought properly to be styled *Taabitians*, and their religion not Sabæism but *Taabitism*. 5th. The name of Saba'eans, or Sabians, has also been given to a modern sect in the East, the *Mandaites*, or, as they are commonly but incorrectly called, the 'Christians' of St. John; for they deny the Messiahship of Christ, and pay superior honour to John the Baptist.

SHEBAT, the eleventh month of the Hebrew year, from the new moon of February to the new moon of March. The name only occurs once in Scripture (Zech. i. 7), and is the same which is given in the Arabic and Syriac languages to the same month.

SHEBNA (*a youth*), the prefect of the palace to king Hezekiah (Isa. xxii. 15); afterwards promoted to be scribe or secretary to the same monarch, when his former office was given to Eliakim (Isa. xxii. 15; xxxvi. 3; 2 Kings xviii. 26, 27; xix. 2).

SHECHEM, a town of central Palestine, in Samaria, among the mountains of Ephraim (Josh. xx. 7; 1 Kings xii. 25), in the narrow valley between the mountains of Ebal and Gerizim (comp. Judg. ix. 7), and consequently within the tribe of Ephraim (Josh. xxi. 20). It is in N. lat. 32° 17', E. long. 35° 20', being thirty-four miles north of Jerusalem and seven miles south of Samaria. It was a very ancient place, and appears to have arisen as a town in the interval between the arrival of Abraham in Palestine and the return of Jacob from Padan-aram, for it is mentioned only as a place, described by reference to the oaks in the neighbourhood, when Abraham came there on first entering the land of Canaan (Gen. xii. 6). But, in the history of Jacob it repeatedly occurs as a town having walls and gates: it could not, however, have been very large or important, if we may judge from the consequence which the inhabitants attached to an alliance with Jacob, and from the facility with which the sons of the patriarch were able to surprise and destroy them (Gen. xxxiii. 18, 19; xxxiv. 1, 2, 20, 24, 26). After the conquest of the country, Shechem was made a city of refuge (Josh. xx. 7), and one of the Levitical towns (Josh. xxi. 21), and during the lifetime of Joshua it was a centre of union to the tribes (Josh. xiv. 1, 25), probably because it was the nearest considerable town to the residence of that chief in Tinnath-serah. In the time of the judges, Shechem became the capital of the kingdom set up by Abimelech (Judg. ix. 1, sq.), but was at length conquered and destroyed by him (Judg. ix. 34). It must, however, have been ere long rebuilt, for it had again become of so much importance by the time of Rehoboam's accession, that he there gave the meeting to the delegates of the tribes, which ended in the separation of the kingdom (1 Kings xii. 10). It was Shechem which the first monarch of the new kingdom made the capital of his dominions (1 Kings xii. 25; comp. xiv. 17), although later in his reign the pleasantness of Tirzah induced him to build a palace there, and to make it the summer residence of his court; which gave it such importance, that it at length came to be regarded as the capital of the kingdom, till Samaria eventually deprived it of that honour (1 Kings xiv. 7; xvi. 24) [ISRAEL]. Shechem, however, still thrives. It subsisted during the exile (Jer. xli. 5), and continued, for many ages after, the chief seat of the Samaritans and of their worship, their sole temple being upon the mountain (Gerizim), at whose foot the city stood [SAMARITANS]. The city was taken, and the temple destroyed, by John Hyrcanus, B.C. 129. In the New Testament it occurs under the name of Sychar (John iv. 5), which seems to have been a sort of nick name, such as the Jews were fond of imposing upon places they disliked. Stephen,

however, in his historical retrospect, still uses the proper and ancient name (Acts vii. 16). Not long after the times of the New Testament the place received the name of Neapolis, which it still retains in the Arabic form of Nablus, being one of the very few names imposed by the Romans in Palestine which have survived to the present day. It had probably suffered much, if it was not completely destroyed, in the war with the Romans, and would seem to have been restored or rebuilt by Vespasian, and then to have taken this new name. It has remained in the hands of the Mahometans since A.D. 1242.

There is no reason to question that the present town occupies the site of the ancient Shechem, although its dimensions are probably more contracted. The fertility and beauty of the deep and narrow valley in which the town stands, especially in its immediate neighbourhood, have been much admired by travellers, as far exceeding what they had seen in any other part of Palestine. The town itself is long and narrow, extending along the N.E. base of Mount Gerizim, and partly resting upon its declivity. The population of the place is rated by Dr. Olin at 6000 or 10,000, of whom 500 or 600 are Christians of the Greek communion, and the rest Moslems, with the exception of about 130 Samaritans, and one-third that number of Jews. The inhabitants bear the character of being an unusually valiant as well as a turbulent race, and some years since maintained a desperate struggle against the Egyptian government in some bloody rebellions.

2. **SHECHEM**, son of Hamor, prince of the country or district of Shechem, in which Jacob formed his camp on his return from Mesopotamia. This young man having seen Jacob's daughter Dinah, was smitten with her beauty, and deflowered her. This wrong was terribly and cruelly avenged by the damsel's uterine brothers, Simeon and Levi, as described in the article **DINAH** (Gen. xxxv.). It seems likely that the town of Shechem, even if of recent origin, must have existed before the birth of a man so young as Hamor's son appears to have been; and we may therefore suppose it a name preserved in the family, and which both the town and the princes inherited. Shechem's name is always connected with that of his father Hamor (Gen. xxxiii. 19; xxxv.; Acts vii. 16).

SHEEP. The normal animal, from which all or the greater part of the western domestic races of sheep are assumed to be descended, is still

303. [Syrian Sheep]

found wild in the high mountain regions of Persia, and is readily distinguished from two other wild species bordering on the same region. What

breeds the earliest shepherd tribes reared in and about Palestine can now be only inferred from negative characters; yet they are sufficient to show that they were the same, or nearly so, as the common borned variety of Egypt and continental Europe: in general white, and occasionally black, although there was on the upper Nile a speckled race; and so early as the time of Aristotle the Arabians possessed a rufous breed, another with a very long tail, and above all a broad-tailed sheep, which at present is commonly denominated the Syrian. Flocks of the ancient breed, derived from the Bedouins, are now extant in Syria, with little or no change in external characters, chiefly the broad-tailed and the common horned white, often with black and white about the face and feet, the tail somewhat thicker and longer than the European. The others are chiefly valued for the fat of their broad tails, which tastes not unlike marrow; for the flesh of neither race is remarkably delicate, nor are the fleeces of superior quality. Sheep in the various conditions of existence wherein they would occur among a pastoral and agricultural people, are noticed in numerous places of the Bible, and furnish many beautiful allegorical images, where purity, innocence, mildness, and submission are portrayed,—the Saviour himself being denominated 'the Lamb of God,' in twofold allusion to his patient meekness, and to his being the true paschal lamb, 'slain from the foundation of the world' (Rev. xiii. 8). Some commentators affirm that the Hebrew word *kesitah*, which occurs only in Gen. xxxiii. 19, and Job xlii. 11, and is in the Authorized Version rendered money, literally means *sheep or lambs*, and should be so translated. Others, with greater probability, suppose that it refers to a piece of coined money bearing the figure of a sheep; and it is certain that Phœnicia had sheep actually impressed on a silver coin.

304. [Supposed Kesitah.]

SHEKEL. [WEIGHTS AND MEASURES.]

SHEKINAH or SHECHINAH, a term applied by the ancient Jews, especially in the Chaldee Targums, to that visible symbol of the divine glory which dwelt in the tabernacle and temple. It is evident from many passages of Scripture that the Most High, whose essence no man hath seen, or can see, was pleased anciently to manifest himself to the eyes of men by an external visible symbol. As to the *precise nature* of the phenomenon thus exhibited, we can only say, that it appears to have been a concentrated glowing brightness, a preternatural splendour, an effulgent something, which was appropriately expressed by the term 'Glory;' but whether in philosophical strictness it was material or immaterial, it is probably impossible to determine. A luminous object of this description seems intrinsically the most appropriate symbol of that Being of whom, perhaps in allusion to this very mode of manifesta-

tion, it is said that 'he is light,' and that 'he dwelleth in light unapproachable, and full of glory.' The presence of such a sensible representation of Jehovah seems to be absolutely necessary in order to harmonize what is frequently said of 'seeing God' with the truth of his nature as an incorporeal and essentially invisible spirit. While we are told in one place that 'no man hath seen God at any time,' we are elsewhere informed that Moses and Aaron, and the seventy elders, 'saw the God of Israel,' when called up to the summit of the Holy Mount. So also Isaiah says of himself (Isa. vi. 1, 5) that 'in the year that king Uzziah died he saw the Lord sitting upon his throne,' and that, in consequence, he cried out, 'I am undone; for mine eyes have seen the Lord of hosts.' In these cases it is obvious that the object seen was not God in his essence, but some external visible symbol, which, because it stood for God, is called by his name.

Of all the divine appearances granted in the earlier ages of the world, the most signal and illustrious was undoubtedly that which was vouchsafed in the pillar of cloud that guided the march of the children of Israel through the wilderness on their way to Canaan. There can be little doubt that the columnar cloud was the seat of the *shekinah*. Within the towering aerial mass, we suppose, was enfolded the inner effulgent brightness, to which the appellation 'Glory of the Lord' more properly belonged, and which was only occasionally disclosed. In several instances in which God would indicate his anger to his people, it is said that they looked to the cloud and beheld the 'Glory of the Lord' (Num. xiv. 10; xvi. 19, 42). So when he would inspire a trembling awe of his Majesty at the giving of the Law, it is said, the 'Glory of the Lord appeared as a devouring fire' on the summit of the mount. Nor must the fact be forgotten in this connection, that when Nadab and Abihu, the two sons of Aaron, offended by strange fire in their offerings, a fatal flash from the cloudy pillar instantaneously extinguished their lives. The evidence would seem then to be conclusive, that this wondrous pillar-cloud was the seat or throne of the *shekinah*, the visible representative of Jehovah dwelling in the midst of his people.

SHEM (*name*), one of the three sons of Noah (Gen. v. 32), from whom descended the nations enumerated in Gen. x. 22, sq., and who was the progenitor of that great branch of the Noachic family (called from him Shemitic or Semitic) to which the Hebrews belong. The name of Shem is placed first wherever the sons of Noah are mentioned together; whence he would seem to have been the eldest brother. But against this conclusion is brought the text Gen. x. 21, which, according to the Authorized, and many other versions, has 'Shem the brother of Japheth the elder;' whence it has been conceived very generally that Japheth was really the eldest, and that Shem is put first by way of excellency, seeing that from him the holy line descended. But this conclusion is not built upon a critical knowledge of the Hebrew, which would show that 'the elder' must in this text be referred not to Japheth but to Shem, so that it should be read 'Shem . . . the elder brother of Japheth.'

1. SHEMAIAH (*whom Jehovah hears*), a prophet of the time of Rehoboam, who was commis-

stoned to enjoin that monarch to forego his design of reducing the ten tribes to obedience (1 Kings xii. 22-24). In 1 Chron. xii. 15, this Shemaiah is stated to have written the Chronicles of the reign in which he flourished.

2. **SHEMAIAH**, a person who, without authority, assumed the functions of a prophet among the Israelites in exile. He was so much annoyed by the prophecies which Jeremiah sent to Babylon, the tendency of which was contrary to his own, that he wrote to Jerusalem, denouncing the prophet as an impostor, and urging the authorities to enforce his silence. In return he received new prophecies, announcing that he should never behold that close of the bondage which he fancied to be at hand, and that none of his race should witness the re-establishment of the nation (Jer. xxix. 24-32).

SHEME'BER (*lefty, flight*), king of Zeb-aim, one of the five 'cities of the plain' (Gen. xiv. 2).

SHEMER (*lees*), the owner of the hill of Samaria, which derived its name from him. Omri bought the hill for two talents of silver, and built thereon the city, also called Samaria, which he made the capital of his kingdom (1 Kings xvi. 24) [**SAMARIA**]. As the Israelites were prevented by the law (Lev. xxv. 23) from thus alienating their inheritances, and as his name occurs without the usual genealogical marks, it is more than probable that Shemer was descended from those Canaanites whom the Hebrews had not dispossessed of their lands.

1. **SHEPHATIAH** (*whom Jehovah defends*), a son of David by Abital (2 Sam. iii. 4).

2. **SHEPHATIAH**, one of the nobles who urged Zedekiah to put Jeremiah to death (Jer. xxxviii. 1).

3. **SHEPHATIAH**, one of the heads of families who settled in Jerusalem after the exile (Neh. xi. 6).

4. **SHEPHATIAH**, the head of one of the families, numbering three hundred and seventy-two persons, of the returned exiles (Ezra ii. 4, 57).

5. **SHEPHATIAH**, a son of king Jehoshaphat (2 Chron. xxi. 2).

6. **SHEPHATIAH**, one of the chief of those valiant men who went to David when at Ziklag (1 Chron. xii. 5).

7. **SHEPHATIAH**, the governor of the tribe of Simeon in the time of David (1 Chron. xxvii. 16).

SHEPHERD. [**PASTURAGE**.]

SHE'SHACH, a name twice given by Jeremiah to Babylon (Jer. xxv. 26; li. 41). Its etymology and proper signification are doubtful.

SHE'SHAN (*lily*), a Hebrew, who during the sojourn in Egypt gave his daughter in marriage to his freed Egyptian slave (1 Chron. ii. 34) [**JARRAH**].

SHE'SHBAZZAR. [**ZERUBABEL**.]

SHE'THAR (Pers., *a star*), one of the seven princes of Persia and Media, 'who saw the king's face, and sat the first in the kingdom' (Est. i. 14).

SHE'THAR-BOZ'NAI (Pers., *shining star*), one of the Persian governors in Syria, who visited Jerusalem in company with Tatnai, to investigate the charges made against the Jews (Ezra v. 3; vi. 6) [**TATNAI**].

SHE'VA. [**SERAJAH**.]

SHEW-BREAD. In the outer apartment of the tabernacle, on the right hand, or north side, stood a table, made of acacia (*shittim*) wood, two cubits long, one broad, and one and a half high, and covered with laminae of gold. The top of the leaf of this table was encircled by a border or rim of gold. The frame of the table, immediately below the leaf, was encircled with a piece of wood of about four inches in breadth, around the edge of which was a rim or border, similar to that around the leaf. A little lower down, but at equal distances from the top of the table, there were four rings of gold fastened to the legs, through which staves covered with gold were inserted for the purpose of carrying it (Exod. xxv. 23-28; xxxvii. 10-16). These rings were not found in the table which was afterwards made for the temple, nor indeed in any of the sacred furniture, where they had previously been, except in the ark of the covenant. Twelve unleavened loaves were placed upon this table, which were sprinkled with frankincense (the Sept. adds salt; Lev. xxiv. 7). The number twelve represented the twelve tribes, and was not diminished after the defection of ten of the tribes from the worship of God in his sanctuary, because the covenant with the sons of Abraham was not formally abrogated, and because there were still many true Israelites among the apostatizing tribes. The twelve loaves were also a constant record against them, and served as a standing testimonial that their proper place was before the forsaken altar of Jehovah.

The loaves were placed in two piles, one above another, and were changed every Sabbath day by the priests. The frankincense that had stood on the bread during the week was then burnt as an oblation, and the removed bread became the property of the priests, who, as God's servants, had a right to eat of the bread that came from his table; but they were obliged to eat it in the holy place, and nowhere else. No others might lawfully eat of it; but in a case of extreme emergency the priest incurred no blame if he imparted it to persons who were in a state of ceremonial purity, as in the instance of David and his men (1 Sam. xxi. 4-6; Matt. xii. 4). The bread was called 'the bread of the face,' or, 'of the presence,' because it was set forth before the face or in the presence of Jehovah in his holy place. This is translated 'shew-bread.' It is also called 'the bread arranged in order,' and 'the perpetual bread,' because it was never absent from the table (Lev. xxiv. 6, 7; 1 Chron. xxiii. 29).

Wine also was placed upon the table of 'shew-bread,' in bowls, some larger, and some smaller, also in vessels that were covered, and in cups, which were probably employed in pouring in and taking out the wine from the other vessels, or in making libations. They appear in the Authorized Version as 'spoons' (see generally Exod. xxv. 29, 30; xxxvii. 10-16; xl. 4, 24; Lev. xxiv. 5-9; Num. iv. 7).

SHIBBOLETH. The word means a stream or flood, and was hence naturally suggested to the followers of Jephthah, when, having seized the fords of the Jordan to prevent the retreat of the defeated Ephraimites, they sought to distinguish them through their known inability to utter the aspirated sound *sh*. The fugitives gave instead the unaspirated *s*, *sibboleth*, on which

they were slain without mercy (Judg. xii. 6). The certainty which was felt that the Ephraimites could not pronounce *sh*, is very remarkable, and strongly illustrates the varieties of dialect which had already arisen in Israel, and which perhaps even served to distinguish different tribes, as similar peculiarities distinguish men of different counties with us. If what is here mentioned as the characteristic of a particular tribe had been shared by other tribes, it would not have been sufficiently discriminating as a test.

SHIELD. [ARMA.]

SHILOH, the epithet applied, in the prophetic benediction of Jacob on his death-bed (Gen. xlix. 10), to the personage to whom 'the gathering of the nations should be,' and which has ever been regarded by Christians and by the ancient Jews as a denomination of the Messiah. The oracle occurs in the blessing of Judah, and is thus worded—'The sceptre shall not depart from Judah, nor a lawgiver from between his feet, until Shiloh come: and unto him the gathering of the people shall be.' The term itself, as well as the whole passage to which it belongs, has ever been a fruitful theme of controversy between Jews and Christians, the former, although they admit for the most part the Messianic reference of the text, being still fertile in expedients to evade the Christian argument founded upon it. Neither our limits nor our object will permit us to enter largely into the theological bearings of this prediction; but it is perhaps scarcely possible to do justice to the discussion as a question of pure philology, without at the same time displaying the strength of the Christian interpretation, and trenching upon the province occupied by the proofs of Jesus of Nazareth being the Messiah of the Old Testament prophecies.

Various etymologies have been assigned to the term. Some very eminent commentators trace it to the root to *rest*, to be at *peace*, and make it equivalent to Pacificator, Tranquillizer, or Great Author of Peace. This is a sense accordant with the anticipated and realized character of the Messiah, one of whose crowning denominations is 'Prince of Peace.' Another opinion is, that it is derived from a word which signifies to *ask*, *seek*, *require*, and that its import is the *asked*, the *desired*, a designation which is, equally with the former, in accordance with the character of the predicted Messiah, and is free from some philological objections to which the other derivation is liable.

2. SHILOH, a city in the tribe of Ephraim, situated among the hills to the north of Bethel, eastward of the great northern road, where the tabernacle and ark remained for a long time, from the days of Joshua, during the ministry of all the judges, down to the end of Eli's life (Josh. xviii. 1; 1 Sam. iv. 3). To this circumstance Shiloh owed all its importance; for after the loss of the ark—which never returned thither after it had been restored to Israel by the Philistines—it sunk into insignificance. It was, indeed, the residence of Abijah the prophet (1 Kings xi. 29; xii. 15; xiv. 2), but it is more than once mentioned as accursed and forsaken (Ps. lxxviii. 60; Jer. vii. 12, 14; xxvi. 6). The last mention of it in Scripture is in Jer. xli. 5, which only shows that it survived the exile. Dr. Robinson identifies it with a place named Seilun, a city surrounded

by hills, with an opening by a narrow valley into a plain on the south. The ruins consist chiefly of an old tower with walls four feet thick, and of large stones and fragments of columns indicative of an ancient site (Robinson's *Palestine*, iii. 85-89).

SHIMEI (*renowned*), a member of the family of Saul, residing at Bahurim, who grievously insulted king David when he fled from Absalom (2 Sam. xvi. 5-13). The king not only saved him from the immediate resentment of his followers, but on his triumphant return by the same road after the overthrow of his rebellious son, he bestowed on Shimei the pardon which he implored (2 Sam. xix. 16). It seems, however, that it was policy which chiefly dictated this course, for it was by the advice of David himself (1 Kings ii. 8, 9) that Solomon, after his father's death, made Shimei a prisoner at large in Jerusalem (1 Kings ii. 36, 37). Three years after he broke his parole by leaving Jerusalem in pursuit of some runaway slaves, and was, on his return, put to death by order of the king (1 Kings ii. 39-46).

SHYNAR, the proper name of Babylonia, particularly of the country around Babylon (Gen. x. 10; xiv. 1; Isa. xi. 11; Dan. i. 2; Zech. v. 11): [BABYLONIA].

SHIP. In few things is there greater danger of modern associations misleading the reader of the Scriptures than in regard to the subject of the present article. Both the ships and the navigation of the ancients, even of the most maritime states, were as dissimilar as things of the same kind can well be to the realities which the terms now represent. Navigation confined itself to coasting, or if necessity, foul weather, or chance drove a vessel from the land, a regard to safety urged the commander to a speedy return, for he had no guide but such as the stars might afford under skies with which he was but imperfectly acquainted. And ships, whether designed for commercial or warlike purposes, were small in size and frail in structure.

The Jews cannot be said to have been a seafaring people; yet their position on the map of the world is such as to lead us to feel that they could not have been ignorant of ships and the business which relates thereunto. Phœnicia, the north-western part of Palestine, was unquestionably among, if not at the head of, the earliest cultivators of maritime affairs. Then the Holy Land itself lay with one side coasting a sea which was anciently the great highway of navigation, and the centre of social and commercial enterprise. Within its own borders it had a navigable lake. And the Red Sea itself, which conducted towards the remote east, was at no great distance even from the capital of the land. Then at different points in its long line of sea-coast there were harbours of no mean repute. Yet the decidedly agricultural bearing of the Israelitish constitution checked such a development of power, activity, and wealth, as these favourable opportunities might have called forth on behalf of seafaring pursuits. And it is evident that the Israelites must have only partially improved their local advantages, since we find Hiram, king of Tyre, acting as carrier by sea for Solomon, engaging to convey in floats to Joppa the timber cut in Lebanon for the temple, and leaving to the Hebrew prince the duty of transporting the wood

from the coast to Jerusalem. And when, after having conquered Elath and Ezion-geber on the further arm of the Red Sea, Solomon proceeded to convert them into naval stations for his own purposes, he was still, whatever he did himself,

indebted to Hiram for 'shipmen that had knowledge of the sea' (1 Kings ix. 26; x. 22).

The reader of the New Testament is well aware how frequently he finds himself with the Saviour on the romantic shores of the sea of

305. [Ancient Ship of the largest kind.]

Gennesareth. There Jesus is seen, now addressing the people from on board a vessel (Matt. xiii. 2; Luke v. 3); now sailing up and down the lake (Matt. viii. 23; ix. 1; xiv. 13; John vi. 17). Some of his earliest disciples were proprietors of barks which sailed on this inland sea (Matt. iv. 21; John xxi. 3; Luke v. 3). But it is evident that these 'ships' must have been small, though they were more than mere boats.

xxvii. 40) of a 'mainsail,' which, however, should probably be rather termed the 'topsail.' In great danger it was customary to gird the vessel with cables, in order to prevent her from falling to pieces under the force of wind and sea (Acts xxvii. 17). The captain was denominated steersman, though he was a different person from him who had the actual charge of the helm.

The dangers of the ocean to sailors on board such ships as these were, and in the then ignorance of navigation, caused sailing to be restricted to the months of spring, summer, and autumn; winter was avoided. To the Romans the sea was opened in March and closed in November (Acts xxvii. 9); and ships which towards the end of the year were still at sea earnestly sought a harbour in which to pass the winter (Acts xxvii. 12).

SHISHAK, a king of Egypt contemporary with Jeroboam, to whom he gave an asylum when he fled from Solomon (1 Kings xi. 40). This was indicative of his politic disposition to encourage the weakening of the neighbouring kingdom, the growth of which under David and Solomon was probably regarded by the kings of Egypt with some alarm. After Jeroboam had become king of Israel, and probably at his suggestion, Shishak invaded the kingdom of Judah, *b.c.* 971, at the head of an immense army; and after having taken the fortified places, advanced against Jerusalem. Satisfied with the submission of Jeroboam, and with the immense spoils of the Temple, the king of Egypt withdrew without imposing any onerous conditions upon the humbled grandson of David (1 Kings xiv. 25, 26; 2 Chron. xii. 2-9). Shishak has been identified as the first king of the 22nd or Diospolitan dynasty, the Sesouchis of profane history. His name has been found on the Egyptian monuments. He is said to have been of Ethiopian origin, and it is supposed that, with the support of the military caste, he dethroned the Pharaoh who gave his daughter to Solomon (1 Kings iii. 1). In the palace-temple of Karnak there still exists a large bas-relief representing Sesouchis, who bears to the feet of three great Theban gods the chiefs of vanquished nations. To each figure is attached an oval, indicating the town or district which he represents. One of the figures, with a pointed beard and a physiognomy

306. [Ancient Light-vessel, Pompeii.]

The vessels connected with Biblical history were for the most part ships of burden, almost indeed exclusively so, at least within the period of known historical facts. In a ship of this kind was Paul conveyed to Italy. They were, for the purposes to which they were destined, rounder and deeper than ships of war, and sometimes of great capacity. In consequence of their bulk, and when laden, of their weight, they were impelled by sails rather than by oars. On the prow stood the insignia from which the ship was named, and by which it was known. These in Acts (xxxviii. 11) are called 'sign,' which it appears consisted in this case of figures of Castor and Pollux, brilliant constellations, auspicious to navigators. Each ship was provided with a boat, intended in the case of peril to facilitate escape (Acts xxvii. 16; xxx. 32), and several anchors (Acts xxvii. 29, 40); also a plumb-line for sounding (Acts xxvii. 28). Mention is made (Acts

decidedly Jewish, bears on his oval characters which M. Champollion interprets YOODA MELCHU, or 'kingdom of Judah.' It is well to observe that this figure has not, as some have hastily conceived, been alleged to represent the king, but to personify the kingdom of Judah.

SHITTAH and SHITTIM occur in several passages of Exodus, and indicate the kind of wood which was employed in making various parts of the tabernacle while the Israelites were wandering in the wilderness. It is mentioned also as forming part of the offerings, as in Exod. xxv. 5, 'rams' skins dyed red, and badgers' skins, and shittim wood;' and in xxxv. 7, 24. In Isa. xli. 19, it is mentioned as a tree worthy of planting: 'I will plant in the wilderness the cedar, the shittah tree, and the myrtle, and the oil tree,' etc. It is exceedingly probable that the tree referred to belongs to the *Acacia*, found both in Egypt and in the deserts of Arabia. 'The acacia tree,' says Dr. Shaw, 'being by much the largest and most common tree in these deserts (Arabia Petraea), we have some reason to conjecture that the shittim wood was the wood of the acacia, especially as its flowers are of an excellent smell, for the shittah tree is, in Isa. xli. 19, joined with the myrtle and other fragrant shrubs.' Dr. Kitto says: 'The required species is found in either the *Acacia gummifera*, or in the *A. Seyal*, or rather in both. They both grow abundantly in the val-

307. [*Acacia Seyal*.]

leys of that region in which the Israelites wandered for forty years, and both supply products which must have rendered them of much value to the Israelites. We think the probability is, that the *A. Seyal* supplied the shittim wood, if, indeed, the name did not denote acacia wood in general. This tree grows from fifteen to twenty feet in height.' Robinson and Smith frequently mention the *Seyal* as occurring in the same situations. It is very probable therefore that it yielded the shittim wood of Scripture.

SHITTIM, a spot in the plain of Moab, east of the Dead Sea, where the Israelites formed their last encampment before passing the Jordan (Num. xxv. 1; comp. Micah vi. 5) [WANDERING].

SHITTIM, VALLEY OF, mentioned in Josh. iii. 18. It must certainly have been west of the Jordan, and probably in the neighbourhood of Jerusalem, although the particular vale cannot now be distinguished. The name is probably to be regarded as an appellative—'acacia vale' denoting, perhaps, as that tree delights in a dry soil, an arid, unfruitful vale.

SHOE. [SANDAL.]

SHU'NEM, a town of the tribe of Issachar (Josh. xix. 18), where the Philistines encamped before Saul's last battle (1 Sam. xxviii. 4), and to which belonged Abishag, the last wife of David (1 Kings i. 3), and 'the Shunamite woman,' with whom Elisha lodged (2 Kings iv. 8-37; viii. 1-6). Eusebius and Jerome describe it as, in their day, a village, lying five Roman miles from Mount Tabor towards the south. They call it Sulem. It has of late years been recognised in a village called Solam, three miles and a half north of Zerin (Jezreel), which is a small place on the slope of a hill, where nothing occurs to denote an ancient site.

SHUR, a city on the confines of Egypt and Palestine (Gen. xvi. 7; xx. 1; xxv. 18; 1 Sam. xv. 7; xxvii. 8). Josephus makes it the same as Pelusium (*Antiq.* vi. 7. 3; comp. 1 Sam. xv. 7); but this city bore among the Hebrews the name of Sin. More probably Shur was somewhere in the vicinity of the modern Suez. The desert extending from the borders of Palestine to Shur, is called in Exod. xv. 22, the 'desert of Shur,' but in Num. xxxiii. 8, the 'desert of Etham.'

SHU'SHAN, or Susa, the chief town of Susiana, and capital of Persia, in which the kings of Persia had their winter residence (Dan. viii. 2; Neh. i. 1; Esther i. 2, 5). It was situated upon the Euleus or Choaspes, probably on the spot now occupied by the village Shus. At that place there are extensive ruins, stretching perhaps twelve miles from one extremity to the other, and consisting, like the other ruins of this region, of hillocks of earth and rubbish covered with broken pieces of brick and coloured tile. At the foot of these mounds is the so-called tomb of Daniel, a small building erected on the spot where the remains of that prophet are locally believed to rest. It is apparently modern; but nothing but the belief that this was the site of the prophet's sepulchre could have led to its being built in the place where it stands; and it may be added that such identifications are of far more value in these parts, where occasion for them is rare, than among the crowded 'holy places' of Palestine. The city of Shus is now a gloomy wilderness, infested by lions, hyenas, and other beasts of prey. It is in N. lat. 31° 56' and E. long. 48° 26'.

SIDON. [ZIDON.]

SI'HON (*sweeping away*; i. e. a warrior sweeping all before him), the king of the Amorites, reigning at Heshlon, who was destroyed, and his kingdom subjugated, in the attempt to resist the progress of the Israelites through his dominions (Num. xxi. 21, 23, sq.) [AMORITES].

SI'HOR, more properly SI'CHOR, the Hebrew proper name for the Nile (Isa. xxiii. 3; Jer. ii. 18). The word means 'black'; and a corresponding name or epithet was by the Greeks applied to the same river on account of the black slime left after the subsidence of the inundation.

SI'HOR-LIB'NATH, a small stream or river emptying itself into the sea in the territory of Asher (Josh. xix. 26). Michaelis translates it 'glass-river,' and identifies it with the Belus, which joins the sea near Acre, and from whose sands the first glass was made by the Phœnicians.

SILAS, a contraction of **SILVANUS**, a distinguished Christian teacher in the church at Jerusalem, who, with Barnabas, was associated by that church with Paul (Acts xv. 22, 32), and accompanied him in his second journey through Asia Minor to Macedonia (Acts xv. 40; xvi. 19, 25; xvii. 4). He remained behind at Berea for a short time, when Paul was obliged to flee from that place (Acts xvii. 10, 14). They met again at Corinth (Acts xviii. 5; comp. Thess. i. 1), where Silas was active in the work of an evangelist (2 Cor. i. 19). He is invariably called Silvanus in the Epistles, but the contraction Silas is always used in the Acts. Whether this Silvanus is the same person who was the bearer of St. Peter's epistle to the churches in Asia Minor (1 Pet. v. 12), cannot be ascertained. The traditions regard Silas and Silvanus as different persons, making the former bishop of Corinth, and the latter bishop of Thessalonica.

SIL'OAII. [SILOAM.]

SILOAM or **SIL'OAII** (Neh. ii. 15; John ix. 7-11). Neither of these passages affords any clue to the situation of Siloam; but this silence is supplied by Josephus, who makes frequent mention of it as a fountain (*De Bell. Jud.* v. 4, § 1, 2), and indicates its situation at the mouth of the valley of Tyropœon, where the fountain, now and long since indicated as that of Siloam, is still found. The pool of Siloam is within and at the mouth of the valley of Tyropœon, and about eighty paces above its termination is that of Jehoshaphat. The water flows out of a small artificial basin under the cliff, the entrance to which is excavated in the form of an arch, and is immediately received into a larger reservoir, fifty-three feet in length by eighteen feet in width. The water passes out of this reservoir through a channel cut in the rock, which is covered for a short distance; but subsequently it opens and discloses a lively copious stream, which is conducted into an enclosed garden planted with fig-trees. The small upper basin or fountain excavated in the rock is merely the entrance, or rather the termination of a long and narrow subterranean passage beyond, by which the water comes from the Fountain of the Virgin. This has been established beyond dispute by Dr. Robinson, who, with his companion, had the hardihood to crawl through the passage. It is thus proved that the water of both these fountains is the same, though some travellers have pronounced the water of Siloam to be bad, and that of the other fountain good. It has a peculiar taste, sweetish and very slightly brackish, but not at all disagreeable. The most remarkable circumstance is the ebb and flow of the waters, which, although often mentioned as a characteristic of Siloam, must belong equally to both fountains. Dr. Robinson himself witnessed this phenomenon in the fountain of the Virgin, where the water rose in five minutes one foot in the reservoir, and in another five minutes sunk to its former level. The intervals and the extent of the flow and ebb in this and the fountain of Siloam, vary with the season; but the fact, though

it has not yet been accounted for, is beyond dispute.

SILVA'NUS. [SILAS.]

SILVER. There is no mention of this metal in Scripture until the time of Abraham. Before that time brass and iron appear to have been the only metals in use (Gen. iv. 22). Abraham was rich in gold and silver, as well as in flocks and herds, and silver in his day was in general circulation as money. It was uncoined, and estimated always by weight. Coin'd money was not in use among the Israelites until an advanced period of their history. The Romans are said to have had only copper money until within five years of the first Punic war, when they began to coin silver. Their coins were extensively introduced into Judæa after it became a Roman province.

Silver, as well as gold, is frequently mentioned in Scripture. They were both largely used by the Jews in the manufacture of articles of ornament, and of various vessels for domestic purposes, and also for the service of the temple. Many of the idols, and other objects belonging to the idolatrous nations, are stated to have been of silver. This metal was so abundant as to be little thought of in the days of Solomon, although it was at that time, and both before and long afterwards, the principal medium of exchange among the Jews—the only recognised standard or measure of value.

SIM'EON (*favouurable hearing*), the second son of Jacob, born of Leah (Gen. xxix. 33), and progenitor of the tribe of the same name. He was the full brother of Levi (Gen. xxxiv. 25; xxxv. 23), with whom he took part in cruelly avenging upon the men of Shechem the injury which their sister Dinah had received from the son of Hamor (Gen. xxxiv. 25-30) [DINAH]. The ferocity of character thus indicated probably furnishes the reason why Joseph singled Simeon out to remain behind in Egypt, when his other brethren were the first time dismissed (Gen. xlii. 24); but when they returned he was restored safely to them (Gen. xliii. 23). Nothing more of his personal history is known. The tribe descended from Simeon contained 59,300 able-bodied men at the time of the Exode (Num. i. 23), but was reduced to 22,000 before entering Palestine (Num. xxvi. 14). This immense decrease in the course of one generation was greater than that sustained by all the other tribes together, and reduced Simeon from the third rank to the lowest of all in point of numbers. It cannot well be accounted for but by supposing that the tribe erred most conspicuously, and was punished most severely in those transactions which drew down judgments from God. As it appeared that Judah had received too large a territory in the first distribution of lands, a portion of it was afterwards assigned to Simeon. This portion lay in the south-west, towards the borders of Philistia and the southern desert, and contained seventeen towns (Josh. xix. 1-9). However, the Judahites must afterwards have re-appropriated some of these towns, at least Beersheba (1 Kings ix. 3) and Ziklag (1 Sam. xxvii. 6) appear at a subsequent period as belonging to the kingdom of Judah. The remarkable passage in 1 Chron. iv. 41-43 points to an emigration of or from this tribe, perhaps more extensive than the words would seem to indicate,

and suggests that when they ceased to have common interests, this small tribe was obliged to give way before the greater power of Judah and the pressure of its population (comp. Gen. xlix. 7). Nothing more of this tribe is recorded, although its name occurs in unhistorical intimations (Ezek. xlviii. 24; Rev. vii. 8).

2. **SIMEON**, the aged person who, when Jesus was presented by his mother at the temple, recognised the infant as the expected Messiah, and took him in his arms and blessed him, glorifying God (Luke ii. 25-35). The circumstance is interesting, as evincing the expectations which were then entertained of the speedy advent of the Messiah; and important from the attestation which it conveyed in favour of Jesus, from one who was known to have received the divine promise that he should 'not taste of death till he had seen the Lord's Christ.' It has been often supposed that this Simeon was the same with Rabban Simeon, the son of the famous Hillel, and father of Gamaliel; but this is merely a conjecture, founded on circumstances too weak to establish such a conclusion.

SIMON, the same name, in origin and signification, as **SIMEON**.

1. **SIMON MACCABEUS**. [**MACCABEAN FAMILY**.]

2. **SIMON**, the apostle, to whom Christ gave the name of Peter, after which he was rarely called by his former name alone, but usually by that of Peter, or else Simon Peter [**PETER**].

3. **SIMON**, surnamed **ZELOTES**, one of the twelve apostles (Luke vi. 15; Acts i. 13), and probably so named from having been one of the Zealots. He is also called 'The Canaanite' in Matt. x. 4; Mark iii. 18. This, however, is not, as is usually the case, to be taken for a Gentile name, but is merely an Aramaic word signifying 'zeal,' and therefore of the same signification as Zealots. Simon is the least known of all the apostles, not a single circumstance, beyond the fact of his apostleship, being recorded in the Scriptures. He is probably to be identified with Simon the son of Cleophas; and if so, the traditions concerning that person, given by those who make them distinct, must be assigned to him. These traditions, however, assign a different destiny to this Simon, alleging that he preached the Gospel throughout North Africa, from Egypt to Mauritania, and that he even proceeded to the remote isles of Britain.

4. **SIMON**, son of Cleophas and Mary, brother of the apostles James and Jude, and a kinsman of Jesus (Matt. xiii. 55; Mark vi. 3). He is probably the same with the Simon Zealotes above mentioned, and in that case we must regard the separate traditions respecting him as apocryphal, and take those assigned to the present Simon as proper to both. They amount to this, that after St. James had been slain by the Jews in A.D. 62, his brother Simon was appointed to succeed him in the government of the church at Jerusalem, and that forty-three years after, when Trajan caused search to be made for all those who claimed to be of the race of David, he was accused before Atticus, the governor of Palestine, and after enduring great torture was crucified, being then 120 years of age.

5. **SIMON**, father of Judas Iscariot (John vi. 71; xii. 4; xiii. 2, 26).

6. **SIMON**, a Pharisee who invited Jesus to his house (Luke vii. 40, 43, 44).

7. **SIMON THE LEPER**, so called from having formerly been afflicted with leprosy (Matt. xxvi. 6; Mark xiv. 3). He was of Bethany, and after the raising of Lazarus, gave a feast, probably in celebration of that event, at which both Jesus and Lazarus were present (comp. John xii. 2). He was, therefore, probably a near friend or relation of Lazarus; some suppose that he was his brother; others that he was the husband of Mary, the sister of Lazarus, who at this feast anointed the Lord's feet, and that Lazarus abode with them. But all this is pure conjecture.

8. **SIMON THE CYRENIAN**, who was compelled to aid in bearing the cross of Jesus (Matt. xxvii. 32; Mark xv. 21; Luke xxiii. 26). Whether this surname indicated that Simon was one of the many Jews from Cyrene, who came to Jerusalem at the Passover, or that he was originally from Cyrene, although then settled at Jerusalem, is uncertain. The latter seems the more likely opinion, as Simon's two sons, Alexander and Rufus, were certainly disciples of Christ; and it was perhaps the knowledge of this fact which led the Jews to incite the soldiers to lay on him the burden of the cross. The family of Simon seems to have resided afterwards at Rome; for St. Paul, in his epistle to the church there, salutes the wife of Simon with tenderness and respect, calling her his 'mother,' though he does not expressly name her: 'Salute Rufus, and his mother and mine' (Rom. xvi. 13).

9. **SIMON THE TANNER**, with whom St. Peter lodged at Joppa (Acts ix. 43; x. 6; xvii. 32). He was doubtless a disciple. His house was by the seaside, beyond the wall, as the trade of a tanner was one which the Jews did not allow to be carried on inside their towns.

10. **SIMON MAGUS**. In the eighth chapter of the Acts we read that Philip the Evangelist, whilst preaching the Gospel in a city of Samaria, came in contact with a person of the name of Simon, who had formerly exercised immense power over the minds of the people by his skill in the resources of magic. So high were the pretensions of this impostor, and so profound the impression he had made on the minds of the multitude, that they not only received with readiness all that he taught, but admitted his claim to be regarded as an incarnation of the demiurgic power of God. The doctrines of Philip, however, concerning Christ as the true and only incarnation of Deity, supported by the unparalleled and beneficent miracles which he performed, had the effect of dispelling this delusion, and inducing the people to renounce their allegiance to Simon and receive baptism as the disciples of Christ. On the mind of Simon himself so deep an impression was produced, that he professed himself a disciple of Jesus, and as such was baptized by Philip.

On the news of Philip's success reaching Jerusalem, Peter and John went down to Samaria to confer upon the new converts the spiritual gifts which were vouchsafed to the primitive churches. During their visit Simon discovered that by means of prayer and the imposition of hands the Apostles were able to dispense the power of the Holy Ghost; and supposing probably that in this

lay the much-prized secret of their superior power, he attempted to induce them to impart to him this power by offering them money. This, which for such a man was a very natural act, intimated to the Apostles at once his true character (or rather, to express more accurately our conviction, it enabled them to manifest to the people and publicly to act upon what their own power of discerning spirits must have already taught them of his true character); and accordingly Peter indignantly repudiated his offer, proclaimed his utter want of all true knowledge of Christian doctrine, and exhorted him to repentance and to prayer for forgiveness. The words of Peter on this occasion, it is justly remarked by Neander, 'present the doctrine of the Gospel, which so expressly intimates the absolute necessity of a right state of mind for the reception of all that Christianity conveys, in direct opposition to the Magianism, which denies all necessary connection between the state of mind and that which is divine and supernatural, brings down the divine and supernatural within the sphere of ordinary nature, and imagines that divine power may be appropriated by means of something else than that which is allied to it in man's nature, and which supplies the only point of union between the two.' The solemn and threatening words of the Apostle struck dread into the bosom of the impostor, who besought the Apostle to pray for him that none of the things he had threatened might come upon him—an entreaty which shows that his mind still laboured under what Neander above describes as the chief error of the Magian doctrine.

After this we read no more of Simon Magus in the New Testament.

Simon's doctrines were substantially those of the Gnostics, and he is not without reason regarded as the first who attempted to engraft the theurgy and egotism of the Magian philosophy upon Christianity. He represented himself, according to Jerome, as the Word of God, the Perfection, the Paraclete, the Almighty, the All of Deity; and Irenæus (i. 20) tells us he carried with him a beautiful female named Helena, whom he set forth as the first idea of Deity. If this be not exaggerated fable on the part of his enemies, we must suppose that such modes of speech and representation were adopted by him as suited to the highly allegorical character of Orientalism in his day; for were we to suppose him to have meant such utterances to be taken literally, we should be constrained to look upon him in the light of a madman.

SIN, a city of Egypt, which is mentioned in Ezek. xxx. 15, 16, in connection with Thebes and Memphis, and is described as 'the strength of Egypt,' showing it to have been a fortified place. The Sept. makes it to have been Saïs, but Jerome regards it as Pelusium. This latter identification has been generally adopted, and is scarcely open to dispute. Pelusium was anciently a place of great consequence. It was strongly fortified, being the bulwark of the Egyptian frontier on the eastern side, and was considered the 'key,' or, as the prophet terms it, 'the strength' of Egypt. It was near this place that Pompey met his death, being murdered by order of Ptolemy, whose protection he had claimed. It lay among swamps and morasses on the most easterly estuary

of the Nile (which received from it the name of Ostium Pelusiæum), and stood twenty stades from the Mediterranean. The site is now only approachable by boats during a high Nile, or by land when the summer sun has dried the mud left by the inundation: the remains consist merely of mounds and a few fallen columns. The climate is very unwholesome.

SIN, the desert which the Israelites entered on turning off from the Red Sea (Exod. xvi. 1; xvii. 1; Num. xxxiii. 12) [SINAI].

SINAI. The Hebrew name, denoting a district of broken or cleft rocks, is descriptive of the region to which it is applied. That region, according to Exod. xix. 1; Lev. vii. 38; Num. i. 1, 3, 4, is a wild mountainous country in Arabia Petræa, whither the Israelites went from Rephidim, after they had been out of Egypt for the space of three months. Here the law was given to Moses, which fact renders this spot one of special and lasting interest. From the magnitude and prominence of the Sinaitic group of mountains, the entire district of which it forms a part has received the name of the peninsula of Sinai. This peninsula may be roughly described as formed by a line running from Suez to Ailah, all that lies on the south of this line falling within the peninsula. In the present day the name Sinai is given by Christians to the cluster of mountains to which we have referred; but the Arabs have no other name for this group than Jebel et-Tur, sometimes adding the distinctive epithet Sina. In a stricter sense the name Sinai is applied to a very lofty ridge which lies between the two parallel valleys of Shu'eib and el-Leja. 'Of this ridge the northern end is termed Horeb, the southern Sinai, now called Jebel Mûsa, or Moses' Mount. The entire district is a heap of lofty granite rocks, with steep gorges and deep valleys. The Sinai ridge, including Horeb, is at least three miles in length. It rises boldly and majestically from the southern end of the plain Rahah, which is two geographical miles long, and ranges in breadth from one-third to two-thirds of a mile, making at least one square mile. This space is nearly doubled by extensions of the valley on the west and east. 'The examination convinced us,' says Robinson (*Biblical Researches*, i. 141), 'that here was space enough to satisfy all the requisitions of the Scriptural narrative, so far as it relates to the assembling of the congregation to receive the law.' Water is abundant in this mountainous region, to which the Bedouins betake themselves when oppressed by drought in the lower lands. As there is water, so also is there in the valleys great fruitfulness and sometimes luxuriance of vegetation, as well as beauty. What was the exact locality from which the law was given, it may not be easy to ascertain. The book of Deuteronomy (i. 6; iv. 18, &c.) makes it to be Horeb, which seems most probable; for this, the north end of the range, rises immediately from the plain of which we have just spoken as the head-quarters of the Israelites. Sinai is, indeed, generally reputed to be the spot, and, as we have seen, the southern extremity of the range is denominated Moses' Mount; but this may have arisen from confounding together two meanings of Sinai, inasmuch as it denotes 1, a district; 2, a particular part of that district. It was no doubt on Horeb, in the region of Sinai, that the law was

promulgated. Robinson imputes the common error to tradition, and declares that 'there is not the slightest reason for supposing that Moses had anything to do with the summit which now bears his name. It is three miles distant from the plain on which the Israelites must have stood, and hidden from it by the intervening peaks of modern Horeb. No part of the plain is visible from the summit, nor are the bottoms of the adjacent valleys, nor is any spot to be seen around it where the people could have been assembled.' Robinson also ascended the northern extremity of the ridge, and had there a prospect which he thus describes:—'The whole plain, er-Râhah, lay spread out beneath our feet with the adjacent Wadys and mountains. Our conviction was strengthened that here, or on some one of the adjacent cliffs, was the spot where the Lord "descended in fire," and proclaimed the law. Here lay the plain where the whole congregation might be assembled; here was the mount that could be approached and touched, if not forbidden; and here the mountain brow where alone the lightnings and the thick cloud would be visible, and the thunders and the voice of the trumpet be heard when "the Lord came down in the sight of all the people upon Mount Sinai." We gave ourselves up to the impressions of the awful scene, and read, with a feeling that will never be forgotten, the sublime account of the transaction and the commandment there promulgated.'

Having thus given a general view of Sinai, we shall now briefly trace the Israelites in their journey to the mountain. Another article [WANDERING] will follow their course into the Land of Promise. When safe on the eastern shore, the Israelites, had they taken the shortest route into Palestine, would have struck at once across the desert in a south-easterly direction to el-Arish or Gaza. But this route would have brought them into direct collision with the Philistines, with whom they were as yet quite unable to cope. Or they might have traversed the desert of Paran, following the pilgrim road of the present day to Elath, and, turning to the north, have made for Palestine. In order to accomplish this, however, hostile hordes and nations would have to be encountered, whose superior skill and experience in war might have proved fatal to the newly liberated tribes of Israel. They were, therefore, wisely directed to take a course which necessitated the lapse of time, and gave promise of affording intellectual and moral discipline of the highest value.

Moses did not begin his arduous journey till, with a piety and a warmth of gratitude which well befitted the signal deliverance that his people had just been favoured with, he celebrated the power, majesty, and goodness of God in a triumphal ode, full of the most appropriate, striking, and splendid images; in which commemorative festivity he was assisted by 'Miriam the prophetess, the sister of Aaron,' and her associated female band, with poetry, music, and dancing. The spot where these rejoicings were held, could not have been far from that which still bears the name of Ayûn Mûsa, 'the fountains of Moses,' the situation of which is even now marked by a few palm-trees. This was a suitable place for the encampment, because well supplied with water. Here Robinson counted seven fountains, near which he saw a patch of barley, and a few cab-

bage plants. Hence the Israelites proceeded along the coast, three days' journey, into what is termed the wilderness of Shur. During this march they found no water. The district is hilly and sandy, with a few watercourses running into the Red Sea, which, failing rain, are dry. At the end of three days the Israelites reached the fountain Marah, but the waters were bitter, and could not be drunk. The stock which they had brought with them being now exhausted, they began to utter murmurings on finding themselves disappointed at Marah. Moses appealed to God, who directed him to a tree, which, being thrown into the waters, sweetened them. The people were satisfied and admonished. About this station authorities are agreed. It is identified with the fountain Hawârah. The basin is six or eight feet in diameter, and the water Robinson found about two feet deep. Its taste is unpleasant, saltish, and somewhat bitter.

The next station mentioned in Scripture is Elim, where were twelve wells of water, and three score and ten palm-trees. As is customary with travellers in these regions, 'they encamped there by the waters' (Exod. xvi. 1). This place is generally admitted to be Wady Ghurundel, lying about half a day's journey south-east from Marah. The way from Egypt to Sinai lies through this valley; and, on account of its water and verdure, it is a chief caravan station at the present day. From Elim the Israelites marched, encamping on the shore of the Red Sea, for which purpose they must have kept the high ground for some time, since the precipices of Jebel Hûmmâim—a lofty and precipitous mountain of chalky limestone—run down to the brink of the sea. They, therefore, went on the land side of this mountain to the head of Wady Taiyikeh, which passes down south-west through the mountains to the shore. On the plain at the mouth of this valley was the encampment 'by the Red Sea' (Num. xxxiii. 10).

According to Num. xxxiii. 11, the Israelites removed from the Red Sea, and encamped next in the wilderness of Sin. This Robinson identifies with 'the great plain which, beginning near el-Mûrkahâh, extends with greater or less breadth almost to the extremity of the peninsula. In its broadest part it is called el-Kâa' (i. 106). Thus they kept along the shore, and did not yet ascend any of the fruitful valleys which run up towards the centre of the district. They arrived in the wilderness of Sin on the fifteenth day of the second month after their departure out of the land of Egypt; and being now wearied with their journey, and tired of their scanty fare, they began again to murmur. The contrast between the scant supply of the desert and the abundance of Egypt, furnished the immediate occasion of the outbreak of dissatisfaction. Bread and flesh were the chief demand; bread and flesh were miraculously supplied; the former by manna, the latter by quails.

The next station mentioned in Exodus is Rephidim; but in Num. xxxiii. Dophkah and Alush are added. The two latter were reached after the people had taken 'their journey out of the wilderness of Sin.' Dophkah is probably to be found near the spot where Wady Feirân runs into the gulf of Suez. Alush may have lain on the shore near Ras Jehan. From this point a range of calcareous rocks, termed Jebel Hemam, stretches

along the shore, near the southern end of which the Hebrews took a sudden turn to the north-east, and, going up Wady Hibrân, reached the central Sinaitic district.

This was the last station before Sinai itself was reached. Naturally enough it is recorded, that 'there was no water for the people to drink.' The road was an arid gravelly plain; on either side were barren rocks. A natural supply was impossible. A miracle was wrought, and water was given. The Scripture makes it clear that it was from the Sinaitic group that the water was produced (Exod. xvii. 6). The plain received two descriptive names—Massah, 'Temptation'; and Meribah, 'Strife.' It appears that the congregation was not allowed to pursue their way to Sinai unmolested. The Arabs thought the Israelites suitable for plunder, and fell upon them. These hordes are termed Amalekites. It appears that the conflict was a severe and doubtful one, which, by some extraordinary aid, ended in favour of the children of Israel. This aggression on the part of Amalek gave occasion to a permanent national hatred, which ended only in the extermination of the tribe (Num. xxiv. 20; Exod. xvii. 14-16). In commemoration of this victory Moses was commanded to write an account of it in a book: he also erected there an altar to Jehovah, and called the name of it 'Jehovah, my banner.'

SINIM, a people whose country, 'land of Sinim,' is mentioned only in Isa. xlix. 12, where the context implies a remote region, situated in the eastern or southern extremity of the earth. Many Biblical geographers think this may possibly denote the Sinese or Chinese, whose country is Sina, China. This view is not void of probability, but objections to it are obvious and considerable. Some, therefore, think that by the Sinim the inhabitants of Pelusium (Sin) are, by synecdoche, denoted for the Egyptians. But as the text seems to point to a region more distant, others have upheld the claims of the people of Syene, taken to represent the Ethiopians [SENE].

SINITES, a people probably near Mount Lebanon (Gen. x. 17; 1 Chron. i. 15).

SISERA (*battle-array*), the general in command of the mighty army of the Canaanitish king Jabin. As this is the only instance in those early times of armies being commanded by other than kings in person, the circumstance, taken in connection with others, intimates that Sisera was a general eminent for his abilities and success. He was, however, defeated by Barak, and slain (Judg. iv. 2-22), under the circumstances which have been described in the article JABL.

SI'VAN, the third month of the Hebrew year, from the new moon of June to the new moon of July.

SLAVE (Auth. Eng. Version, *servant* and *bondman*). It is difficult to trace the origin of slavery. It may have existed before the deluge, when violence filled the earth, and drew upon it the vengeance of God. But the first direct reference to slavery, or rather slave-trading, in the Bible, is found in the history of Joseph, who was sold by his brethren to the Ishmaelites (Gen. xxxvii. 27, 28). In Ezek. xxvii. 12, 13, we find a reference to the slave-trade carried on with Tyre by Javan, Tubal, and Meshech. And in the Apocalypse we find enumerated in the mer-

chandise of the mystic Babylon, *slaves* and the souls of men (Rev. xviii. 13).

The sacred historians refer to various kinds of bondage:—

1. *Patriarchal Servitude*.—The exact nature of this service cannot be defined: there can be no doubt, however, that it was regulated by principles of justice, equity, and kindness. The servants of the patriarchs were of two kinds, those 'born in the house,' and those 'bought with money' (Gen. xvii. 13). The servants born in the house were perhaps entitled to greater privileges than the others. Eliezer of Damascus, a home-born servant, was Abraham's steward, and, in default of issue, would have been his heir (Gen. xv. 2-4). This class of servants was honoured with the most intimate confidence of their masters, and was employed in the most important services. An instance of this kind will be found in Gen. xxiv. 1-9, where the eldest or chief servant of Abraham's house, who ruled over all that he had, was sent to Mesopotamia to select a wife for Isaac, who was then forty years of age. The servants of Abraham were admitted into the same religious privileges with their master, and received the seal of the covenant (Gen. xvii. 9, 14, 24, 27).

There is a clear distinction made between the 'servants' of Abraham and the things which constituted his property or wealth. Abraham was very rich in cattle, in silver, and in gold (Gen. xiii. 2, 5). But when the patriarch's power or greatness is spoken of, then servants are spoken of as well as the objects which constituted his riches (Gen. xxiv. 34, 35). A similar distinction is made in the case of Isaac and of Jacob. In no single instance do we find that the patriarchs either gave away or sold their servants, or purchased them of third persons. Abraham had servants 'bought with money.' It has been assumed that they were bought of third parties, whereas there is no proof that this was the case. The probability is that they sold themselves to the patriarch for an equivalent; that is to say, they entered into voluntary engagements to serve him for a longer or shorter period of time, in return for the money advanced them. Probably Job had more servants than either of the patriarchs to whom reference has been made (Job i. 2, 3). In what light he regarded, and how he treated, his servants, may be gathered from Job xxxi. 13-23. And that Abraham acted in the same spirit, we have the Divine testimony in Jer. xxii. 15, 16, 17, where his conduct is placed in direct contrast with that of some of his descendants, who used their neighbour's service without wages, and gave him not for his work (ver. 13).

2. *Egyptian Bondage*.—The Israelites were frequently reminded, after their exode from Egypt, of the oppressions they endured in that 'house of bondage,' from which they had been delivered by the direct interposition of God. The design of these admonitions was to teach them justice and kindness towards their servants when they should become settled in Canaan, as well as to impress them with gratitude towards their great deliverer. The Egyptians had domestic servants, who may have been slaves (Exod. ix. 14, 20, 21; xi. 5). But the Israelites were not dispersed among the families of Egypt; they formed a special community. They had exclusive possession of the land of Goshen, 'the best'

part of the land of Egypt.' They lived in permanent dwellings, their own houses, and not in tents. Each family seems to have had its own house; and judging from the regulations about eating the Passover, they could scarcely have been small ones. They appear to have been well clothed. They owned 'flocks and herds, and very much cattle.' They had their own form of government; and, although occupying a province of Egypt, and tributary to it, they preserved their tribes and family divisions, and their internal organization throughout. They had to a considerable degree the disposal of their own time. They were not unacquainted with the fine arts. They were all armed. The women seem to have known something of domestic refinement. They were familiar with instruments of music, and skilled in the working of fine fabrics; and both males and females were able to read and write. Their food was abundant and of great variety. The service required from the Israelites by their task-masters seems to have been exacted from males only, and probably a portion only of the people were compelled to labour at any one time. As tributaries, they probably supplied levies of men, from which the wealthy appear to have been exempted. The poor were the oppressed; 'and all the service wherewith they made them serve was with rigour.' But Jehovah saw their 'afflictions and heard their groanings,' and delivered them, 'after having inflicted the most terrible plagues on their oppressors.

3. *Jewish Servitude*.—Whatever difficulties may be found in indicating the precise nature of patriarchal servitude, none exists in reference to that which was sanctioned and regulated by the Mosaic institutions.

The moral law is a revelation of great principles. It requires supreme love to God and universal love among men; and whatever is incompatible with the exercise of that love, is strictly forbidden and condemned. Hence, immediately after the giving of the law at Sinai, as if to guard against all slavery and slave-trading on the part of the Israelites, God promulgated this ordinance: 'He that stealeth a man and selleth him, or if he be found in his hands, he shall surely be put to death' (Exod. xxi. 16; Deut. xxiv. 7). The crime is stated in its threefold form, *man-stealing, selling, and holding*; the penalty for either of which was DEATH. The law punished the stealing of mere property by enforcing restitution, in some cases twofold, in others fivefold (Exod. xxii. 14). When property was stolen, the legal penalty was compensation to the person injured; but when a man was stolen, no property compensation was allowed; death was inflicted, and the guilty offender paid the forfeit of his life for his transgression. Such was the operation of this law, and the obedience paid to it, that we have not the remotest hint that the sale and purchase of slaves ever occurred among the Israelites. The cities of Judaea were not, like the cities of Greece and Rome, slave-markets; nor were there found throughout all its coasts either helots or slaves. With the Israelites, service was either voluntary, or judicially imposed by the law of God (Lev. xxv. 39, 47; Exod. xxi. 7; xxii. 3, 4; Deut. xx. 14). Strangers only, or the descendants of strangers, became their possession by purchase (Lev. xxv. 44-46); but, however acquired, the

law gave the Jewish servants many rights and privileges; they were admitted into covenant with God; they were guests at all the national and family festivals; they were statedly instructed in morals and religion; and they were released from their regular labour nearly one-half of their term of servitude. The servants of the Israelites were protected by the law equally with their masters; and their civil and religious rights were the same. Finally, these servants had the power of changing their masters, and of seeking protection where they pleased (Deut. xxiii. 15, 16); and should their masters, by any act of violence, injure their persons, they were released from their engagements (Exod. xxi. 26, 27). The term of Hebrew servitude was six years, beyond which they could not be held unless they entered into new engagements (Exod. xxi. 1-11; Deut. xv. 12); while that of strangers, over whom the rights of the master were comparatively absolute (Lev. xxv. 44-46), terminated in every case on the return of the jubilee, when liberty was proclaimed to all (Lev. xxv. 8, 10, 54).

4. *Gibeonitish Servitude*.—The condition of the inhabitants of Gibeon, Chephirah, Beeroth, and Kirjath-jearim, under the Hebrew commonwealth, was not that of slavery. It was voluntary (Josh. ix. 8-11). They were not employed in the families of the Israelites, but resided in their own cities, tended their own flocks and herds, and exercised the functions of a distinct though not independent community (Josh. x. 6-18). The injuries inflicted on them by Saul were avenged by the Almighty on his descendants (2 Sam. xxi. 1-9). They appear to have been devoted exclusively to the service of the 'house of God' or the Tabernacles, and only a few of them comparatively could have been engaged at any one time. The rest dwelt in their cities, one of which was a great city, as one of the royal cities. The service they rendered may be regarded as a natural tribute for the privilege of protection. No service seems to have been required of their wives and daughters.

The laws which the great Deliverer and Redeemer of mankind gave for the government of his kingdom, were those of universal justice and benevolence, and as such were subversive of every system of tyranny and oppression. To suppose, therefore, as has been rashly asserted, that Jesus or his Apostles gave their sanction to the existing systems of slavery among the Greeks and Romans, is to dishonour them. That the reciprocal duties of masters and servants were inculcated, admits, indeed, of no doubt (Col. iii. 22; iv. 1; Tit. ii. 9; 1 Pet. ii. 18; Eph. vi. 5-9). But the performance of these duties on the part of the masters, supposing them to have been slave-masters, would have been tantamount to the utter subversion of the relation. There can be no doubt either that 'servants under the yoke,' or the slaves of heathens, are exhorted to yield obedience to their masters (1 Tim. vi. 1). But this argues no approval of the relation; for, 1. Jesus, in an analogous case, appeals to the paramount law of nature as superseding such temporary regulations as the 'hardness of men's hearts' had rendered necessary; and, 2. St. Paul, while counselling the duties of contentment and submission under inevitable bondage, inculcates at the same

time on the slave the duty of adopting all legitimate means of obtaining his freedom (1 Cor. vii. 18-20).

5. *Roman Slavery.*—Our limits will not allow us to enter into detail on the only kind of slavery referred to in the New Testament, for there is no indication that the Jews possessed any slaves in the time of Christ. Suffice it therefore to say, that, in addition to the fact that Roman slavery was perpetual and hereditary, the slave had no protection whatever against the avarice, rage, or lust of his master. The bondsman was viewed less as a human being, subject to arbitrary dominion, than as an inferior animal, dependent wholly on the will of his owner. The master possessed the uncontrolled power of life and death over his slave,—a power which continued at least to the time of the emperor Hadrian. He might, and frequently did, kill, mutilate, and torture his slaves, for any or for no offence; so that slaves were sometimes crucified from mere caprice. He might force them to become prostitutes or gladiators; and, instead of the perpetual obligation of the marriage tie, their temporary unions were formed and dissolved at his command, families and friends were separated, and no obligation existed to provide for their wants in sickness or in health. But, notwithstanding all the barbarous cruelties of Roman slavery, it had one decided advantage over that which was introduced in modern times into European colonies, both law and custom being decidedly favourable to the freedom of the slave. The Mahomedan law also, in this respect, contrasts favourably with those of the European settlements.

Although the condition of the Roman slaves was no doubt improved under the emperors, the early effects of Christian principles were manifest in mitigating the horrors, and bringing about the gradual abolition of slavery. 'It is not,' says Robertson, 'the authority of any single detached precept in the Gospel, but the spirit and genius of the Christian religion, more powerful than any particular command, which has abolished the practice of slavery throughout the world.' Although, even in the most corrupt times of the church, the operation of Christian principles tended to this benevolent object, they unfortunately did not prevent the revival of slavery in the European settlements in the sixteenth and seventeenth centuries, together with that nefarious traffic, the suppression of which has rendered the name of Wilberforce for ever illustrious. Modern servitude had all the characteristic evils of the Roman, except, perhaps, the uncontrolled power of life and death, while it was destitute of that redeeming quality to which we have referred, its tendency being to perpetuate the condition of slavery. It has also been supposed to have introduced the unfortunate prejudice of colour, which was unknown to the ancients. It was the benevolent wish of the philosophic Herder that the time might come 'when we shall look back with as much compassion on our inhuman traffic in negroes, as on the ancient Roman slavery or Spartan helots.' This is now no longer a hope, so far as England is concerned, as she not only set the example of abolishing the traffic, but evinced the soundness of her Christian principles by the greatest national act of justice which history has yet recorded in the

total abolition of slavery throughout all her dependencies.

SLIME. [ASPHALTUM.]

SMITH. The word so rendered literally signifies a *workman* in stone, wood, or metal, but is sometimes more accurately defined by what follows. The first smith mentioned in Scripture is Tubal-Cain, whom some writers, arguing from the similarity of the names, identify with Vulcan. He is said to have been 'an instructor of every artificer in brass and iron' (Gen. iv. 22), or perhaps more properly, a whetter or sharpener of every instrument of copper or iron. As the art of the smith is one of the first essentials to civilization, the mention of its founder was worthy of a place among the other fathers of inventions. So requisite was the trade of a smith in ancient warfare, that conquerors removed these artisans from a vanquished nation, in order the more effectually to disable it. Thus the Philistines deprived the Hebrews of their smiths (1 Sam. xiii. 19; comp. Judg. v. 8). So Nebuchadnezzar, king of Babylon, treated them in later times (2 Kings xxiv. 14; Jer. xxiv. 1; xxix. 2). In the New Testament we meet with Demetrius, 'the silversmith,' at Ephesus; but the commentators are not agreed whether he was a manufacturer of small silver models of the Temple of Diana, or at least of the chapel which contained the famous statue of the goddess, to be sold to foreigners, or used in private devotion, or taken with them by travellers as a safeguard; or whether he made large coins representing the temple and image. A *coppersmith* named Alexander is mentioned as an opponent of St. Paul (2 Tim. iv. 14) [COAL; IRON; METALS].

SMYRNA, a celebrated commercial city of Ionia, situated near the bottom of that gulf of the Ægean Sea which received its name from it, at the mouth of the small river Meles, and 320 stades north of Ephesus. It is in N. lat. 38° 26', E. long. 27° 7'. Smyrna was a very ancient city, but having been destroyed by the Lydians it lay waste 400 years, to the time of Alexander the Great. It was rebuilt at the distance of twenty stades from the ancient city, and we soon find it flourishing greatly; and in the time of the first Roman emperors it was one of the finest cities of Asia. It was at this period that it became the seat of a Christian church, which is noticed in the Apocalypse, as one of 'the seven churches of Asia' (Rev. i. 11; ii. 8-11). It was destroyed by an earthquake in A.D. 177; but the emperor Marcus Aurelius caused it to be rebuilt with even more than its former splendour. It afterwards, however, suffered greatly from earthquakes and conflagrations, and must be regarded as having declined much from its ancient importance, although from the convenience of its situation it has still maintained its rank as a great city and the central emporium of the Levantine trade. The Turks call it Izmir. It is a better built town than Constantinople, and in proportion to its size there are few places in the Turkish dominions which have so large a population. It is computed at 130,000, of which the Franks compose a far greater proportion than in any other town of Turkey; and they are generally in good circumstances. Next to the Turks the Greeks form the most numerous class of inhabitants, and they have a bishop and two churches. The unusually large proportion

of Christians in the town renders it peculiarly unclean in the eyes of strict Moslems, whence it has acquired among them the name of Gaiour Ignir, or Infidel Smyrna. There are in it 20,000 Greeks, 8000 Armenians, 1000 Europeans, and 9000 Jews: the rest are Moslems.

The prosperity of Smyrna is now rather on the increase than the decline.

It stands at the foot of a range of mountains, which enclose it on three sides. The only ancient ruins are upon the mountains behind the town, and to the south. But nearly the whole of the relics of antiquity have been carried away. The stadium, of which the ground-plot only remains, is supposed to be the place where Polycarp, the disciple of St. John, and probably 'the angel of the church of Smyrna' (John ii. 8), to whom the Apocalyptic message was addressed, suffered martyrdom. The Christians of Smyrna hold the memory of this venerable person in high honour, and go annually in procession to his supposed tomb, which is at a short distance from the place of martyrdom.

SNAIL. Snails and slugs are not very common in countries so dry in summer as Palestine. Hence, perhaps, the fact, that there is only one allusion to them in Scripture. This occurs in Psalm lviii. 8, where the figure seems to be more significant, if understood of snails without shells, i. e. slugs, rather than shell-snails, though true of both.

SO, a king of Egypt, whom Hoshea, the last king of Israel, called to his help against the Assyrians under Shalmaneser (2 Kings xvii. 4). It has been questioned whether this So was the same with Sabaco, the first king of the Ethiopian dynasty in Upper Egypt, or his son and successor Sevechus, the second king of the same dynasty, and the immediate predecessor of Tirhakah.

SOAP. The word thus translated in the Auth. Version is in Hebrew *borith*. It occurs in two passages of Scripture—first, in Jerem. ii. 22, 'For though thou wash thee with nitre, and take thee much sope (*borith*), yet thine iniquity is marked before me, saith the Lord God; and again, in Malachi iii. 2, 'But who may abide the day of his coming? and who shall stand when he appeareth? for he is like a refiner's fire, and like fuller's sope (*borith*). From neither of these passages does it distinctly appear whether the substance referred to by the name of *borith* was obtained from the mineral or from the vegetable kingdom. But it is evident that it was possessed of cleansing properties.

In the above passage of Jeremiah we have *neter* (nitre) and *borith* (soap) indicated as being both employed for washing, or possessed of some cleansing properties; and yet, from occurring in the same passage, they must have differed in some respects. The nitre is, without doubt, the natural carbonate of soda; and as this is alluded to in one member of the sentence, it becomes probable that the artificial carbonates may be alluded to in the other, as both were in early times employed by Asiatic nations for the purposes of washing.

Hence it is probable that the ashes of plants, called *boruk* and *boreh* by Asiatic nations, may be alluded to under the name of *borith*, as there is no proof that soap is intended, though it may have been known to the same people at very early periods. Still less is it probable that borax is

meant, as has been supposed by some authors, apparently from the mere similarity of name.

SOD'OM, a city in the vale of Siddim, where Lot settled after his separation from Abraham (Gen. xiii. 12; xiv. 12; xix. 1). It had its own chief or 'king,' as had the other four cities of the plain (Gen. xiv. 2, 8, 10), and was along with them, Zoar only excepted, destroyed by fire from heaven, on account of the gross wickedness of the inhabitants; the memory of which event has been perpetuated in a name of infamy to all generations (Gen. xix.). The destruction of Sodom claims attention from the solemnity with which it is introduced (Gen. xviii. 20-22); from the circumstances which preceded and followed—the intercession of Abraham, the preservation of Lot, and the judgment which overtook his lingering wife (Gen. xviii. 25-33; xix.); and from the nature of the physical agencies through which the overthrow was effected. It has usually been assumed that the vale of Siddim occupied the basin of what is now the Dead Sea, which did not previously exist, but was one of the results of this catastrophe. It has now, however, been established by Dr. Robinson, that a lake to receive the Jordan and other waters must have occupied this basin long before the catastrophe of Sodom, but of much less extent than the present Dead Sea. It is extremely probable that its southern extremity covers the once fertile vale of Siddim, and the site of Sodom and the other cities which the Lord destroyed; and that, in the words of Dr. Robinson—'by some convulsion or catastrophe of nature, connected with the miraculous destruction of the cities, either the surface of this plain was scooped out, or the bottom of the sea was heaved up, so as to cause the waters to overflow, and cover permanently a larger tract than formerly. The country is, as we know, subject to earthquakes, and exhibits also frequent traces of volcanic action. It would have been no uncommon effect of either of these causes to heave up the bottom of the ancient lake, and thus produce the phenomenon in question. But the historical account of the destruction of the cities implies also the agency of fire. Perhaps both causes were therefore at work; for volcanic action and earthquakes go hand in hand; and the accompanying electric discharges usually cause lightnings to play and thunders to roll. In this way we have all the phenomena which the most literal interpretation of the sacred records can demand.'

SOL'OMON (*pacific*). The reign of Solomon over all Israel, although second in importance only to that of David, has so little variety of incident as to occupy a far less space in the Bible narrative. In the declining age of David, his eldest surviving son, Adonijah, endeavoured to place himself on the throne, by the aid of Joab the chief captain, and Abiathar one of the chief priests, both of whom had been associated with David's early sufferings under the persecution of Saul. The aged monarch did not for a moment give way to the formidable usurpation, but at the remonstrance of his favourite, Bathsheba, resolved forthwith to raise her son Solomon to the throne. To Joab he was able to oppose the celebrated name of Benaiah; to Abiathar his colleague Zadok and the aged prophet Nathan. The plot of Adonijah was at once defeated by this decisive measure; and Solomon, being anointed by Nathan,

was solemnly acknowledged as king. The date of this event is, as nearly as can be ascertained, B.C. 1015. The death of David would seem to have followed very quick upon these transactions. At least, no public measures in the interval are recorded, except Solomon's verbal forgiveness of Adonijah. But after the removal of David, the first events of which we hear are the destruction of Adonijah, Joab, and Shimei son of Gera, with the degradation of Abiathar.

After this the history enters upon a general narrative of the reign of Solomon; but we have very few notices of time, and cannot attempt to fix the order of any of the events. All the information, however, which we have concerning him may be consolidated under the following heads: (1) his traffic and wealth; (2) his buildings; (3) his ecclesiastical arrangements; (4) his general administration; (5) his seraglio; (6) his enemies.

(1.) The overflowing wealth in which he is so vividly depicted is not easy to reduce to a modern financial estimate; partly because the numbers are so often treacherous, and partly because it is uncertain what items of expenditure fell on the general funds of the government. But abandoning all attempt at numerical estimates, it cannot be doubted that the wealth of Solomon was very great.

The profound peace which the nation enjoyed as a fruit of David's victories stimulated the industry of all Israel. The tribes beyond the Jordan had become rich by the plunder of the Hagarenes, and had a wide district where their cattle might multiply to an indefinite extent. The agricultural tribes enjoyed a soil and climate in some parts eminently fruitful, and in all richly rewarding the toil of irrigation; so that, in the security of peace, nothing more was wanted to develop the resources of the nation than markets for its various produce. In food for men and cattle, in timber and fruit trees, in stone, and probably in the useful metals, the land supplied of itself all the first wants of its people in abundance. For exportation, it is distinctly stated that wheat, barley, oil, and wine, were in chief demand; to which we may conjecturally add, wool, hides, and other raw materials. The king undoubtedly had large districts and extensive herds of his own; but besides this, he received presents in kind from his own people and from the subject nations. He was himself at once monarch and merchant. By his intimate commercial union with the Tyrians he was put into the most favourable of all positions for disposing of his goods; and by the aid of their enterprise and experience carried on a lucrative trade with various countries.

The visit of the Queen of Sheba to Solomon, although not strictly commercial, rose out of commercial intercourse, and may perhaps be here noticed. The territory of Sheba, according to Strabo, reached so far north as to meet that of the Nabatheans, although its proper seat was at the southernmost angle of Arabia. The very rich presents made by the queen show the extreme value of her commerce with the Hebrew monarch; and this early interchange of hospitality derives a peculiar interest from the fact, that in much later ages—those of the Maccabees and downwards—the intercourse of the Jews with Sheba became so intimate, and their influence,

and even power, so great. Jewish circumcision took root there, and princes held sway who were called Jewish.

(2.) Besides the great work which has rendered the name of Solomon so famous—the Temple at Jerusalem—we are informed of the palaces which he built, viz., his own palace, the queen's palace, and the house of the forest of Lebanon, his porch (or piazza) for no specified object, and his porch of judgment, or law court. He also added to the walls of Jerusalem, and fortified Millo ('in the city of David,' 2 Chron. xxxii. 5), and many other strongholds. In all these works he had the aid of the Tyrians, whose skill in hewing timber and in carving stone, and in the application of machines for conveying heavy masses, was of the first importance.

(3.) The ecclesiastical arrangements of Solomon were of the most magnificent description, and for a time he zealously worshipped and faithfully served the God of his fathers. But after the death of Nathan and Zadok, those faithful friends of David, 'his wives turned away his heart after other gods, and his heart was not perfect with the Lord as was the heart of David his father' (1 Kings xi. 1-8). Side by side with the worship of Jehovah foreign idolatries were established; and the disgust which this inspired in the prophets of Jehovah is clearly seen in the address of Ahijah the Shilonite to Jeroboam, so manifestly exciting him to rebel against the son of David (1 Kings xi. 29-39).

(4.) Concerning his general administration little is recorded beyond the names of various high officers. But it is probable that Solomon's peculiar talents and taste led him to perform one function which is always looked for in Oriental royalty, viz., to act personally as *Judge* in cases of oppression. His award between the two contending mothers cannot be regarded as an isolated fact: and 'the porch of judgment' which he built for himself may imply that he devoted fixed portions of time to the judicial duties (see 2 Kings xv. 5, of Jotham). The celebrity which Solomon gained for wisdom, although founded mainly perhaps on his political and commercial sagacity, must have received great popular impetus from his administration of law, and from his readiness in seeing through the entanglements of affairs which arise in commercial transactions.

(5.) For the harem of Solomon—consisting of 700 wives and 300 concubines—no other apology can be made, than the fact that in countries where polygamy is not disreputable, an unlimited indulgence as to the number of wives is looked upon as the chief luxury of wealth, and the most appropriate appendage to royalty.

The commercial union of Tyre with Egypt, in spite of the vast diversity of genius between the two nations, was in those days very close; and it appears highly probable that the affinity to Pharaoh was sought by Solomon as a means of aiding his commercial projects. Although his possession of the Edomite ports on the gulf of Akabah made him to a certain extent independent of Egypt, the friendship of that power must have been of extreme importance to him in the dangerous navigation of the Red Sea; and was perhaps a chief cause of his brilliant success in so new an enterprise. That Pharaoh continued for some time on good terms with him, appears from a singular present which

the Egyptian king made him (1 Kings ix. 16): 'Pharaoh had gone up and taken Gezer, and burnt it with fire, and slain the Canaanites that dwelt in the city, and given it for a present unto his daughter, Solomon's wife; in consequence of which Solomon rebuilt and fortified the town. In his declining years a very different spirit is manifested towards him by Shishak, the new Egyptian king; whether after the death of the princess who had been the link between the two kingdoms, or from a different view of policy in the new king, is unknown.

(6.) The enemies especially named as rising against him in his later years, are Jeroboam, Hadad the Edomite, and Rezon of Damascus. The first is described as having had no treasonable intentions, until Solomon sought to kill him, on learning the prophecy made to him by Ahijah. Jeroboam was received and fostered by Shishak, king of Egypt, and ultimately became the providential instrument of punishing Solomon's iniquity, though not without heavy guilt of his own. As for Hadad, his enmity to Israel began from the times of David, and is ascribed to the savage butchery perpetrated by Joab on his people. He also, when a mere child, was warmly received in Egypt, apparently by the father-in-law of Solomon; but this does not seem to have been prompted by hostility to David. Having married the sister of Pharaoh's queen, he must have been in very high station in Egypt; still, upon the death of David, he begged leave to depart into Edom, and during the earlier part of Solomon's reign was probably forming his party in secret, and preparing for that dangerous border warfare which he carried on somewhat later. Rezon, on the contrary, seems to have had no personal cause against the Hebrew monarchy; but having become powerful at Damascus and on its frontier, sought, not in vain, to aggrandize himself at its expense. The revenues which would have maintained it were spent on a thousand royal wives: the king himself was unwarlike; and a petty foe, if energetic, was very formidable. Such were the vexations which darkened the setting splendours of the greatest Israelitish king. But from within also his prosperity was unsound. Deep discontent pervaded his own people, when the dazzle of his grandeur had become familiar; when it had become clear, that the royal wealth, instead of denoting national well being, was really sucked out of the nation's vitals. Having no constitutional organ to express their discontent, they waited sullenly, until the recognition of a successor to the crown should give them the opportunity of extorting a removal of burdens which could not permanently be endured.

SOLOMON'S SONG. [CANTICLES.]

SONG. [POETRY.]

SOOTHSAYER. [DIVINATION.]

SOPATER, a Christian at Beræa, and one of the party of brethren who accompanied Paul into Asia Minor from Greece (Acts xx. 4). He is supposed to be the same with the Sosipater named in Rom. xvi. 21; and, if so, was a kinsman of St. Paul.

SORCERER. [DIVINATION.]

SO'REK, a valley, probably so called from its vineyards (Judg. xvi. 4). Eusebius and Jerome place it north of Eleutheropolis, and near to Zorah.

SOSIPATER. [SOPATER.]

SOSTHENES, the chief of the synagogue at Corinth, when Paul was in that city on his second journey into Greece (Acts xviii. 17). He was seized and beaten by the people, before the judgment-seat of Gallio, on account of the tumult raised by the Jews against Paul, of which he seems to have been one of the leaders. He is supposed to have been afterwards converted to Christianity, as a Sosthenes is mentioned by Paul as 'a brother,' and coupled with himself in 1 Cor. i. 1. This identity is, however, a pure conjecture, and not remarkably probable; but apart from it, we know nothing of this second Sosthenes. Eusebius makes him one of the seventy disciples, and later tradition describes him as bishop of Kolophon.

SOUL. The present article is a sequel to that on PUNISHMENT, in which the *literature* only of the question concerning *future punishment* will be briefly stated. The literature of the question concerning the nature and duration of future punishment consists of the following particulars. First, its duration was believed by the heathens to be eternal. Secondly, there is a still more striking similarity between the descriptions both of the nature and duration of future punishment given in the Apocryphal books and those of the New Testament. Thus Judith xvi. 17: 'Wee to the nations which rise up against my kindred; the Lord Almighty will take vengeance on them in the day of judgment, in putting fire and worms in their flesh; and they shall feel them, and weep for ever' (comp. Eccles. vii. 17; Mark ix. 44). These terms seem borrowed from Isaiah's description of a different subject (ch. lxxvi. 24). Thirdly, Josephus describes the doctrine of everlasting punishment as being held by the Pharisees and Essenes: 'that the souls of the wicked should be punished with perpetual punishment, and that there was appointed for them a perpetual prison' (*De Bell. Jud.* ii. 8, 11, 14; *Antiq.* xviii. 1.3). In the New Testament the *nature* of future punishment is almost always described by figures. The most abstract description occurs in Rom. t. 9-16: 'Tribulation and anguish upon every soul of man that doeth evil, in the day when God shall judge the secrets of men.' Our Lord generally describes it under figures suggested by some comparison he had just before made, and in answer to it. Thus, having described future happiness under the figure of a midnight banquet, lighted up with lamps, then the state of the rejected is described under that of 'outer darkness,' outside the mansion, and 'gnashing' or 'chattering' of teeth, from the extreme cold of an Oriental night (Matt. viii. 12; Luke xiii. 28). If 'the end of the world' be described by him under the figure of a harvest, then the wicked, who are represented by the tares, are accordingly gathered and burned. Our Lord also frequently represents future punishment under the idea of fire, which Calvin, on Isa. lxxvi. 24, remarks, must be understood metaphorically of spiritual punishment. Indeed both the *nature* and *variety* of the figures employed by our Saviour in regard to the subject fully justify Paley's observation, 'that our Lord's discourses exhibit no particular description of the invisible world. The future happiness of the good and the future misery of the bad, which is all we want to be assured of, is directly and positively affirmed, and is represented by metaphors and

comparisons which were plainly intended as metaphors and comparisons, and nothing more. As to the rest a solemn reserve is maintained' (*Evidences of Christianity*, part ii. ch. ii.). The question of the duration of future punishment chiefly turns on the force of the words translated 'ever,' 'everlasting,' 'never,' which our Lord and his apostles apply to it, and which it is well known have sometimes a limited signification, and are very variously translated in the English version. Hence, therefore, it is urged on the one side, that we can never settle the precise import of these words, as applied in the New Testament to the duration of future punishment, until we shall be able also to answer the following questions; namely, Was it part of the commission of Christ and his apostles to determine this matter? and if so, In what sense were the terms they used in regard to it meant by themselves, and understood by their hearers—whether as denoting a punishment of *unknown* duration, or one literally co-existent with the duration of the Eternal God? On the other side it is objected, that the same word is applied both to the happiness of the righteous and the misery of the wicked, though varied in our translation of Matt. xxv. 46: 'These shall go away into everlasting punishment, but the righteous into life eternal.' Upon this truly important subject we cordially acquiesce in the remark of Doddridge: 'Miserable are they who venture their souls upon the possibility that the words in question, when applied to future punishment, may have a limited meaning.'

SOUTH. The country, or quarter of the heavens, which the Shemite, standing with his face to the east, supposes to be on his right hand. An important use of the word is as the name or designation of the desert regions lying at the south of Judæa, consisting of the deserts of Shur, Zin, and Paran, the mountainous country of Edom or Idumæa, and part of Arabia Petræa (Gen. xii. 9; xiii. 1). In this region the Amalekites are said to have dwelt, 'in the land of the south,' when Moses sent the spies to view the land of Canaan (Num. xiii. 29), viz., the locality between Idumæa and Egypt, and to the east of the Dead Sea and Mount Seir [AMALEKITES]. The inhabitants of this region were included in the conquests of Joshua (x. 40). To the same region belongs the passage, 'Turn our captivity as the streams in the south' (Ps. cxxvi. 4); which suddenly fill the wadis or valleys during the season of rain (comp. Ezek. vi. 3; xxxiv. 13; xxxv. 8; xxxvi. 4, 6). These are dry in summer (Job vi. 15-18). Through part of this sterile region the Israelites must repress in their vain application to Egypt. It is called the Wilderness of Judæa (Matt. iii. 1; Josh. xv. 61). Through part of this region lay the road from Jerusalem to Gaza, 'which is desert' (Acts viii. 26).

SOWER, SOWING. [AGRICULTURE.]

SPAIN (Rom. xv. 24, 28). This name was anciently applied to the whole Peninsula which now comprises Spain and Portugal. In the time of Paul Spain was a Roman province, and many Jews appear to have settled there. It seems clear from Rom. xv. 24, 28, that Paul formed the design of proceeding to preach the Gospel in Spain: that he ever executed this intention is necessarily denied by those who hold that the apostle sustained but one imprisonment at Rome,

namely, that in which the Acts of the Apostles leave him; and even those who hold that he was released from this imprisonment can only conjecture that, in the interval between it and the second, he fulfilled his intention. There is, in fact, during the three first centuries, no evidence on the subject, beyond a vague intimation by Clement, which is open to different explanations [PAUL]; and later traditions are of small value.

SPARROW occurs in Gen. vii. 14; Lev. xiv. 4; Ps. lxxxiv. 3; cii. 7; Matt. x. 29; Luke xii. 6, 7. The Hebrew word includes not only the sparrow, but also the whole family of small birds not exclusively feeding on grain, but denominated clean, or those that might be eaten according to the law. It includes many insectivorous and frugivorous species, all the thrushes we have in Europe, and the rose-coloured ouzel or locust-bird, rare with us, but numerous and cherished in the East, solely for the havoc it makes among locusts. It also includes perhaps the starlings, the nightingale, all the European larks, the wag-tails, and all the tribe of finches; but not fly-catchers, nor indeed swallows, which, there is reason to believe, were reckoned, along with night-hawks or goatsuckers, and crows, among the unclean and prohibited species. In Syria the sparrow is the same vivacious familiar bird we find it in Europe, and equally frequents the residence of man.

SPEAR. [ARMS.]

SPICES. This word, which occurs very frequently in our translation of the Scriptures, has usually been considered to indicate several of the aromatic substances to which the same general name is applied in the present day. And we have as much assurance as is possible in such cases that the majority of the substances referred to have been identified, and that among the spices of early times were included many of those which now form articles of commerce from India to Europe.

SPIDER occurs in Job viii. 14; Isa. lix. 5. In the first of these passages, the reference seems clear to the spider's web, or literally, house, whose fragility is alluded to as a fit representation of the hope of a *profane, ungodly, or profligate* person; for so the original word really means, and not 'hypocrite,' as in our version. The object of such a person's trust or confidence, who is always really in imminent danger of ruin, may be compared for its uncertainty to the spider's web. 'He shall lean upon his house (i.e. to keep it steady when it is shaken); he shall hold it fast (i.e. when it is about to be destroyed); nevertheless it shall not endure (ver. 15). In the second passage (Isa. lix. 5) it is said, 'The wicked weave the spider's web' (literally, 'thin threads'); but it is added, 'their thin threads shall not become garments, neither shall they cover themselves with their works'; that is, their artifices shall neither succeed, nor conceal themselves, as does the spider's web. This allusion intimates no *antipathy* to the spider itself, or to its habits when directed towards its own purposes; but simply to the adoption of those habits by man towards his fellow-creatures. There has long been a popular prejudice against spiders, and the poet Thomson has stigmatized them as

'Cunning and fierce—
Mixture abhorred';

but these epithets are in reality as unjustly applied to them (at least with reference to the mode by which they procure necessary subsistence), as to the patient sportsman, who lays snares for the birds that are to serve for the dinner of his family: while it can be further pleaded in behalf of spiders, that they are actively servicable to the human race, in checking the superfecundity of other insects, and afford in their various procedures the most astonishing displays of that Supreme Intelligence by which they are directed.

SPIKENARD. [NERD.]

SPIRIT and HOLY SPIRIT. The leading significations of the original words thus rendered may be classed under the following heads:—

1. The primary sense of the term is *wind*. 'He that formeth the mountains and createth the wind' (Amos iv. 13; Isa. xxvii. 8). 'The wind bloweth where it listeth' (John iii. 8). This is the ground idea of the term 'spirit'—air—ether—air refined, sublimated, or vitalized: hence it denotes—

2. *Breath*, as of the month. 'At the blast of the breath of his nostrils are they consumed' (Job v. 9). 'The Lord shall consume that wicked one with the breath of his mouth' (2 Thess. ii. 8).

3. The *vital* principle which resides in and vivifies the body (Eccles. viii. 8; Gen. vi. 17; rii. 15).

In close connection with this use of the word is another—

4. In which it has the sense of *apparition—spectre* (Luke xxiv. 37, 39; Matt. xiv. 26).

5. The *soul*—the rational immortal principle, by which man is distinguished from the brute creation (Luke xxiii. 46; Acts vii. 59; 1 Cor. v. 5; vi. 20; vii. 34; Heb. xii. 9).

6. The race of superhuman created intelligences.

7. The term is applied to the Deity, as the sole, absolute, and uncreated Spirit. 'God is a Spirit.' This, as a predicate, belongs to the divine nature, irrespective of the distinction of persons in that nature. But its characteristic application is to the third person in the Divinity, who is called the Holy Spirit, because of his essential holiness, and because in the Christian scheme it is his peculiar work to sanctify the people of God. He is denominated *The Spirit*, by way of eminence, as the immediate author of spiritual life in the hearts of Christians.

The words Spirit, and Holy Spirit, frequently occur in the New Testament, by metonymy, for the influence or effects of His agency.

a. As a procreative power—the power of the highest' (Luke i. 35).

b. As an influence, with which Jesus was endowed (Luke iv. 4).

c. As a divine inspiration or *afflatus*, by which the prophets and holy men wrote and spoke. Holy men of God spake as they were moved by the Holy Ghost' (2 Pet. i. 21; Num. xi. 26; Neh. ix. 30; Ezek. iii. 12, 14; Rev. i. 10; iv. 2; xvii. 3).

d. As miraculous gifts and powers, with which the Apostles were endowed, to qualify them for the work to which they were called (John xx. 22; Acts ii. 4).

But the phrase, Holy Spirit, is specially used to denote a *divine personal agent*. The Holy Spirit is associated, as a distinct person, with the

Father and the Son, in the baptismal formula and the apostolical benediction. The Father and Son are real persons. It is reasonable to think that the spirit who is joined with them in this solemn form of induction into the Christian church, is also a personal agent, and not an abstraction—a mere power or influence. The subject is baptized into the belief of three personal agents. To suppose that, in this solemn profession of faith, he avows his belief in the Father and the Son, and the *power or influence of God*, is forced and frigid.

He is baptized into the *name of each of the three* (Matt. xxviii. 19). We are not baptized into the name of an influence or a power, but into the name of a person—of three real and distinct subjects, the Father, the Son, and the Holy Ghost.

In the apostolical benedictions, the Spirit, as a person, is associated in the same way with the Father and Son (2 Cor. xiii. 13). In this uniting of the three there is the recognition of the distinct personality of each, in the separate gift which is appropriated to each.

Distinct personal acts and attributes are ascribed to the Holy Spirit too frequently and fully to admit of explanation by the prosopopœia.

The Holy Ghost speaks, by Isaiah the prophet (Acts xxviii. 25), expressly (1 Tim. iv. 1). He teaches (Luke xii. 12). He reproves the world of sin (John xvi. 8). The spirit helpeth our infirmities, and maketh intercession for the saints (Rom. viii. 26, 27). He is grieved (Eph. iv. 30).

Apostles are set apart to him in the work of the ministry, and he appoints them to that work (Acts xiii. 2; xv. 28).

These are all acts which imply a *personal agent*. And these acts and attributes distinguish the Spirit from the person of the Father on the one hand, and from the personal subjects upon which he acts on the other.

The Spirit, as a personal agent, comes from the Father, is sent by the Father, and of course cannot be the Father. As sent by the Father, he maketh intercession for the saints, according to the will of God, i.e. the Father from whom he came. The Spirit searcheth all things, yea, the deep things of God (1 Cor. ii. 10). If there be no distinct personality of the Spirit separate from that of the Father, the real import of these passages must be, that the Father comes from himself, is sent by himself, makes intercession to himself, according to the will of himself, and that he searches the deep things of himself—which is a style of writing not to be ascribed to any rational man, and certainly not to inspired apostles.

The Spirit of God (1 Cor. ii. 11) is not a created spirit; and if uncreated, it must be divine in the highest sense; but this Spirit is the Holy Spirit, and a proper person; hence he is God.

As the author of regeneration, or of the new spiritual and incorruptible life in the heart of the believer, he must be divine. This change, the Scriptures abundantly declare, is wrought by the Spirit and power of God.

Blasphemy against the Holy Ghost is the only sin for which there is no remission (Matt. xii. 31). This sin against the Holy Spirit, in whatever it may consist, is distinguished from all other sins by a degree of guilt which renders it

unpardonable. If he be not in his nature truly God, there is nothing in him to give to sin against him such a peculiar aggravation. Although it is not simply because the Spirit is God that blasphemy against him is unpardonable—for then would blasphemy against the Father and the Son also be unpardonable—yet it is a sin against God, and, as being against the third person of the Godhead, it is aggravated to a degree of enormity which it could not receive if committed against any other being than God.

The divine and incommunicable attributes of the Deity are ascribed to the Spirit. These attributes belong exclusively to the divine nature; he who possesses them must have the divine nature and honour as God.

Works truly divine are attributable to the Holy Spirit, as creation and preservation, and especially the work of sanctification.

Of the office of the Holy Spirit, it is only necessary to say, that it is not ministerial, like that of the angels and apostles, but it is the peculiar work in the salvation of man which he performs, as sent by the Father and the Son.

SPOUSE. [MARRIAGE.]

SPRING. [PALESTINE.]

STA'CHYS, an unknown person, from his name apparently a Greek, a disciple at Rome, and a friend of Paul (Rom. xvi. 9).

STACTE occurs only once in Scripture (Exod. xxx. 34). 'And the Lord said unto Moses, Take unto thee sweet spices, *stacte* (*nataf*), and onycha, and galbanum; these sweet spices with pure frankincense.' 'Thou shalt make it a perfume after the art of the apothecary' (ver. 35). *Nataf* has, however, been variously translated. Celsius is of opinion that it means the purest kind of myrrh, called *stacte* by the Greeks. But it is difficult if not impossible to arrive at certainty on the subject.

STANDARDS. Standards and ensigns are to be regarded as efficient instruments for maintaining the ranks and files of bodies of troops; and in Num. ii. 2 they are particularly noticed, the Israelites being not only enjoined to encamp 'each by the standard of his tribe and the ensign of his father's house,' but, as the sense evidently implies, in orders or lines. It is clear, when this verse is considered in connection with the religious, military, and battle pictures on Egyptian monuments, that the Hebrews had ensigns of at least three kinds, namely; 1. The great standards of the tribes, serving as rallying signals for marching, forming in battle array, and for encamping; 2. The divisional standards of clans; and, 3. Those of houses or families; which after the occupation of the Promised Land may gradually have been applied more immediately to corps and companies, when the tribes, as such, no longer regularly took the field.

It is very difficult to determine what were the form, colours, materials, and symbols of the Hebrew ensigns; but we may be certain that they could not have resembled modern banners, as has been generally supposed. We know that as early as the days of the exodus of Israel the Egyptians had ensigns of different kinds, and it is very likely that the standards in use among that people were, under proper modifications, adopted by the Israelites when they were about to become wanderers over desert regions where order and discipline,

directing signals, telegraphs, and indications of water would be most useful.

308. 1. Bactrian eagle; 2. Persian vexillum; 3. Standard of Sesostris; 4. Egyptian ensign set in a frame, signal of encampment and of direction; 5. Telegraphic ensign, varying with each Pharaoh; 6. Subordinate Egyptian ensign; 7. Tribal tablet; 8. Flume ensign used in temples.

STAR IN THE EAST. Matthew (ch. ii. 1, sq.) relates that at the time of the birth of our Lord there came wise men (magi) from the East to Jerusalem, to inquire after the newly-born king of the Jews, in order that they might offer him presents and worship him. A star, which they had seen in the East, guided them to the house where the infant Messiah was. Having come into his presence, they presented unto him gifts—gold, and frankincense, and myrrh.

Our space will not allow us to enter upon the consideration of the various theories which have been framed to explain this portion of the sacred narrative. We must content ourselves with a brief statement of the theory of the distinguished astronomer Kepler, which appears to us the right view of the case.

These wise men were Chaldean magi. A conviction had long been spread throughout the East, that about the commencement of our era a great and victorious prince, or the Messiah, was to be born. His birth was, in consequence of words of Sacred Scripture (Num. xxiv. 17), connected with the appearance of a star. Calculations seem to have led the astrological astronomers of Mesopotamia to fix the time for the advent of this king in the latter days of Herod, and the place in the land of Judæa. Accordingly, at the appointed

time two planets, Jupiter and Saturn, were in conjunction under such circumstances as to appear one resplendent heavenly body, and to marshal the way for the magi from their own homes to Jerusalem, Bethlehem, and the inn.

Kepler found by the calculations which he made that Jupiter and Saturn were in conjunction in the constellation of the Fishes (a fish is the astrological symbol of Judaea) in the latter half of the year of Rome 747, and were joined by Mars in 748. The two planets went past each other three times, came very near together, and showed themselves all night long for months in conjunction with each other, as if they would never separate again. Their first union in the East awoke the attention of the magi, told them the expected time had come, and bade them set off without delay towards Judaea (the fish land). When they reached Jerusalem the two planets were once more blended together. Then, in the evening, they stood in the southern part of the sky, pointing with their united rays to Bethlehem, where prophecy declared the Messiah was to be born. The magi followed the finger of heavenly light, and were brought to the child Jesus. The conclusion, in regard to the time of the advent, is, that our Lord was born in the latter part of the year of Rome 747, or six years before the common era.

STEPHANAS, a disciple at Corinth, whose household Paul baptized (1 Cor. i. 16), being the first converted to Christianity in Achaia (1 Cor. xvi. 15).

STEPHEN, one of the seven first deacons, and the proto-martyr, of the Christian church. There have been various conjectures respecting his early history, but the first authentic notice we find of him is in Acts vi. 5. In the distribution of the common fund that was intrusted to the Apostles (Acts iv. 35-37) for the support of the poorer brethren, the Hellenistic Jews complained that a partiality was shown to the natives of Palestine, and that the poor and sick among their widows were neglected. The complaint of the Hellenists having reached the ears of the apostles, immediate directions were given by them with a view to remove the cause of it. Unwilling themselves to be called away from their proper employment of extending the bounds of the Christian community, they told the assembled multitude of believers to select seven men of their own number, in whose faith and integrity they might repose entire confidence, for the superintendence of everything connected with the relief of the poor. The proposal of the apostles met with the approbation of the brethren, who proceeded at once with the choice of the prescribed number of individuals, among whom Stephen is first mentioned. He is distinguished in Scripture as a man 'full of faith and of the Holy Ghost' (Acts vi. 5). The newly elected individuals were brought to the apostles, who ordained them to their office, and they entered upon their duties with extraordinary zeal and success. The number of the disciples was greatly increased, and many priests were among the converts. In this work Stephen greatly distinguished himself by the miracles he performed before the people, and by the arguments he advanced in support of the Christian cause. From his foreign descent and education he was naturally led to address himself to the Hellenists, and in his dis-

putations with Jews of the Synagogue of the Libertines and Cyrenians, &c. [SYNAGOGUE and LIBERTINE], he brought forward views of the Christian scheme that could not be relished by the bigots of the ancient faith. As they were unable to withstand his powers of reasoning, their malice was excited; they suborned false witnesses against him, and dragged him before the Sanhedrim as a blasphemer. The speech which Stephen made in defending himself against this accusation is well deserving of the most careful study. He first enters upon a historical statement, involving a refutation of the charges which had been made against him of hostility to the Old Testament institutions; but at the same time showing that acceptance with God does not depend upon outward relations. Under the same form he illustrates the providential care exercised by the Almighty in regard to the Jewish people, along with the opposition exhibited by the Jews towards those sent to them by God. And he points the application of his whole discourse by charging his carnal-minded hearers with resisting, like their fathers, the Holy Ghost. The effect upon his auditors was terrible. Conscience-smitten, they united in wreaking their vengeance on the faithful denouncer of their guilt. They drowned his voice with their clamorous outcries, they stopped their ears against him, they rushed on him with one accord in a tumultuary manner, they carried him forth, and without waiting for the authority of law, they stoned him to death as a blasphemer. The frantic violence of his persecutors did not disturb the tranquillity of the martyr, and he died praying that his murderers might be forgiven (vii. 60).

The only other particular connected with Stephen, mentioned in Scripture, is, that 'devout men carried him to his burial, and made great lamentation over him' (viii. 2).

STOICS and EPICUREANS. Reference is made in Acts xvii. 18 to certain philosophers belonging to these celebrated sects as having 'encountered' Paul at Athens.

The Stoics derive their name from *stoa*, 'a porch'; because their founder Zeno (who was born from 360 to 350 years B.C.) was accustomed to teach in a certain porch at Athens.

The Epicureans were named after their founder Epicurus, who is said to have been born at Athens B.C. 344, and to have opened a school (or rather a garden) where he propagated his tenets, at a time when the doctrines of Zeno had already obtained credit and currency.

STONING. [PUNISHMENTS.]

STORAX. This tree is a native of Greece, Asia Minor, Syria, and Palestine, and is about twenty feet high, with leaves like those of the quince, and flowers somewhat resembling those of the orange. Storax was, and is still, much esteemed, both as an incense and for its medical properties. It consists chiefly of resin, a volatile oil, and some benzoic acid. It has a grateful balsamic odour, which no doubt made it valued in ancient times.

STORK. The Hebrew name of this bird implied affection, from the belief general throughout all ancient Asia in the attachment of these birds to each other, and some have supposed that their English name has a similar derivation. The strength of the affection of the parent birds

towards their young has been verified by the moderns, in cases where the mother bird has perished while endeavouring to save her progeny.

309.

Storks are about a foot less in height than the crane, measuring only three feet six inches from the tip of the bill to the end of the toes, and nearly the same to the end of the tail. They have a stout, pointed, and rather long bill, which, together with their long legs, is of a bright scarlet colour; the toes are partially webbed, the nails at the extremities flat, and but little pointed beyond the tips of the joints. The orbits are blackish, but the whole bird is white, with the exception of a few scapulars, the greater wing covers, and all the quills, which are deep black: they are doubly scalloped out, with those nearest the body almost as long as the very foremost in the wing. This is a provision of nature, enabling the bird more effectually to sustain its after weight in the air; a faculty exceedingly important to its mode of flight with its long neck, and longer legs equally stretched out, and very necessary to a migrating species believed to fly without alighting from the lower Rhine, or even from the vicinity of Strasburg, to Africa, and to the Delta of the Nile. The passage is performed in October, and, like that of cranes, in single or in double columns, uniting in a point to cleave the air; but their departure is seldom seen, because they start generally in the night: they rise always with clapping wings, ascending with surprising rapidity out of human sight, and arriving at their southern destination as if by enchantment. Here they reside until the last days of March, when they again depart for the north, but more leisurely and less congregated. A feeling of attachment, not without superstition, procures them an unmolested life in all Moslem countries, and a notion of their utility still protects them in Switzerland, Western Germany, and Holland. Storks build their nests in pine, fir, cedar, and other coniferous trees, but seem to prefer lofty old buildings, towers, and ruins. With regard to the snake-eating habits of the species, the chief resort of storks, for above half the year, is in climates where serpents do not abound: and they seem at all times to prefer eels, frogs, toads, newts, and lizards; which sufficiently accounts for their being regarded as unclean. Storks feed also on field mice; but they do not appear to relish rats, though they break their bones by repeated blows of their bills.

STREETS. [TOWNS.]

STRIPES. [PUNISHMENTS.]

1. SUC'COTH (*booths*), the first encampment of the Israelites on the Egyptian side of the Red Sea (Exod. xii. 37; xiii. 20; Num. xxxiii. 5 [Exodus]).

2. SUC'COTH, a town in the tribe of Gad (Josh. xiii. 27), on the east of the Jordan (Judg. viii. 5; 1 Kings vii. 6). The spot in which the town stood is called 'the valley of Succoth,' and must have been part of the valley of the Jordan. The place derived its name from Jacob having tarried some time there on his return from Padan-aram, and made *booths* for his cattle (Gen. xxxiii. 17).

SUMMER. [PALESTINE.]

SUPPER OF THE LORD, so called by St. Paul in his historical reference to the Passover Supper as observed by Jesus on the night in which he was betrayed (1 Cor. xi. 20; Matt. xxvi. 20-31). As regards the day on which our Lord observed the Passover, it seems more proper to say, that the Pharisees, the dominant party among the Jews, *deferred* its observance a day in accordance with their traditions, than that Jesus *anticipated* it. What one party considered the fourteenth Nisan, would to the other be the thirteenth. This supposition seems best to harmonize any apparent discrepancy in the accounts of the evangelists.

Several controverted points may perhaps be best adjusted by a connected harmony of the last Passover of the Lord, constructed from the evangelic narratives alluding to it, but filling up the various omitted circumstances from the known Passover rites [PASSOVER].

'Now, when it was evening, Jesus sat down with the twelve (Matt.) Apostles' (Mark). The first customary washing and purifications being performed, the blessing over the *first cup* of wine, which began the feast, would be pronounced, probably in the usual form—'We thank thee, O God, our Heavenly Father, who ~~has~~ created the fruit of the vine.'

Then probably the *second cup* of wine was mingled, and with the flesh of the paschal lamb, feast offerings, and other viands, placed before the Lord. 'And he said unto them, With desire have I desired to eat this Pascha with you before I suffer; for I say unto you, I shall no more eat thereof until it be fulfilled in the kingdom of God. And he took the [second] cup, and gave thanks, and said, Take this, and divide among you, for I say unto you, I will not henceforth drink of the fruit of the vine until the kingdom of God shall come' (Luke).

When the wine distributed to each would be drunk off, one of the unleavened cakes would next be broken, the blessing said over it, and a piece distributed to each disciple, probably with the usual formula:—'This is the bread of affliction which your fathers did eat in the land of Egypt'—i. e., not the identical bread, transubstantiated, but a memorial or sign of it. The company would then proceed with the proper supper, eating of the feast-offering, and, after a benediction, of the paschal lamb.

'And as they were at supper, the Devil having now put it into the heart of Judas to betray him; Jesus, knowing that the Father had given all things into his hands, and that he was come from

God, and was going to God, riseth from supper; and after due preparations 'began to wash the disciples' feet' (John). After this striking symbolic exhortation to humility and mutual service (John xiii. 6-20), 'Jesus was troubled in spirit, and bare witness, and said, Verily, verily, I say unto you, that one of you will betray me. Then the disciples looked on one another, doubting of whom he spake' (John). 'And they were very sorry, and began each of them to say unto him, Lord, is it I?' (Matt.) 'One of the disciples, leaning back on Jesus's breast, saith unto him, Lord, is it I? Jesus answered, He it is to whom I shall give a sop, when I have dipped it. And after dipping the sop he giveth it to Judas Iscariot. Then Satan entered into him. Jesus saith unto him, What thou doest, do quickly. He then, on taking the sop, went immediately out; and it was night' (John).

The supper would then proceed, until each had eaten sufficient of the paschal lamb and feast-offering.

'And as they were eating, Jesus took the bread,' the other unleavened cake left unbroken, 'and blessed' God 'and brake it, and gave it to the' eleven 'disciples, and said, Take eat; this is my body' (Matt., Mark), which is broken for you: this do in remembrance of me' (Luke, Paul, 1 Cor. xi. 24).

The supper being concluded, the hands were usually washed the second time, and the third cup or 'cup of blessing' (1 Cor. x. 16) prepared, over which the master usually gave thanks for the Covenant of Circumcision, and for the law given to Moses. Jesus, therefore, at this juncture, announced, with peculiar appropriateness, his New Covenant.

'After the same manner, also, Jesus took the cup after supper, and, having given thanks, gave it to them, saying, Drink all of you out of it; for this is my blood of the new covenant, which is shed for many for forgiveness of sins (Matt.): this do, as oft as ye drink, in remembrance of me' (1 Cor. xi. 24). 'But I say unto you, I shall not drink henceforth of this fruit of the vine, until that day when I drink it new with you in my Father's kingdom' (Matt.).

'And when they had sung a hymn' (Matt.), probably the Hallel, our Lord discoursed long with his disciples about his approaching death and departure (John xiii. 31; xiv. 31), and when he had finished he said, 'Arise, let us go hence.' 'And they went out on to the Mount of Olives' (Matt.).

SU'SA. [SHUSHAN.]

SWALLOW. The species of this bird in Syria and Palestine, so far as they are known, appear all to be the same as those of Europe: they are, 1. The chimney swallow, with a forked tail, marked with a row of white spots.

2. The martin or common window swallow.

3. Sand-martin or shore-bird, not uncommon in northern Egypt, near the mouths of the Delta, and in southern Palestine, about Gaza, where it nestles in holes, even on the sea-shore.

4. The swift or black martin, distinguished by its larger size, short legs, very long wings, forked tail, and by all the toes of the feet turning forward: these, armed with small, crooked, and very sharp claws, enable the bird to hang against the sides of walls, but it cannot rise

from the ground on account of the length of its wings.

310. [The Swift—Durul.]

SWEARING. [OATH.]

SWEET CANE, or CALAMUS, is mentioned in various passages of Scripture (Exod. xxx. 23; Jer. vi. 20, &c.), from which we learn that it was fragrant and reed-like, and that it was brought from a far country (Jer. vi. 20; Ezek. xxvii. 19): Dan also and Javan going to and fro carried bright iron, cassia, and calamus to the markets of Tyre.

If we recur to the method which we have adopted in other cases, of examining the writings of ancient heathen authors, to ascertain if they describe anything like the substances noticed in the sacred writings, we shall experience no difficulty in identifying the 'sweet cane, or reed, from a far country.' It is stated to be a produce of India, of a tawny colour, much jointed, breaking into splinters, and having the hollow stem filled with pith, like the web of a spider; also that it is mixed with ointments and fumigations on account of its odour. Theophrastus describes both the calamus and schenus as natives of Syria, or more precisely, of a valley between Mount Libanon and a small mountain, where there is a plain and a lake, in parts of which there is a marsh, where they are produced, the smell being perceived by any one entering the place. This account is virtually followed by Pliny, though he also mentions the sweet calamus as a produce of Arabia. A writer in the *Gardener's Chronicle* (ii. 756) has adduced a passage from Polybius (v. 46), as elucidating the foregoing statement of Theophrastus: 'From Laodicea Antiochus marched with all his army, and having passed the desert, entered a close and narrow valley, which lies between the Libanus and Anti-Libanus, and is called the Vale of Marsyas. The narrowest part of the valley is covered by a lake with marshy ground, from whence are gathered aromatic reeds.'

That there may be some moderately sweet-scented grass, or rush-like plant, such as the *Acorns Calamus* of botanists (long used as a substitute for the true calamus), in the flat country between Libanus and Anti-Libanus, is quite possible; but we have no proof of the fact. Burckhardt, in that situation, could find only ordinary rushes and reeds. Though Theophrastus, Polybius, and Strabo mention this locality as that producing the calamus, yet others give Arabia, or the

country of the Sabæans, as that which produced the aromatic reed; while Dioscorides, the only author who writes expressly of the drugs known to the ancients, mentions it as being the produce of India.

311. [*Andropogon calamus aromaticus*.]

As this plant is a true grass, it has necessarily reed-like stems. They are remarkable for their agreeable odour: so are the leaves when bruised, and also the delightfully fragrant oil distilled from them. Hence it appears more fully entitled to the commendations which the *calamus aromaticus* or sweet-cane has received, than any other plant that has been described, even the attar of roses hardly excepted. That a grass similar to the fragrant *andropogon*, or at least one growing in the same kind of soil and climate, was employed by the ancients, we have evidence in the fact of the Phœnicians who accompanied Alexander in his march across the arid country of Gedrosia having recognised and loaded their cattle with it, as one of the perfumes of commerce. It is in a similar country, that is, the arid plains of Central India, that the above *andropogon calamus aromaticus* is found, and where the fragrant essential oil is distilled from its leaves, culms, and roots.

If we compare the foregoing statement with the different passages of Scripture, we shall find that this fragrant grass answers to all that is required. Thus in Exod. xxx. 23, the fragrant reed, along with the principal spices, such as myrrh, sweet cinnamon, and cassia, is directed to be made into an oil of holy ointment. So the *calamus aromaticus* may be found mentioned as an ingredient in numerous fragrant oils and ointments, from the time of Theophrastus to that of the

Arabs. Its essential oil is now sold in the shops, but under the erroneous name of oil of spikenard, which is a very different substance [SPIKENARD]. In Cant. iv. 14 it is mentioned along with spikenard, saffron, cinnamon, trees of frankincense, myrrh, and aloes. Again, its value is indicated in Isa (xliii. 24), 'thou hast bought me no sweet cane with money'; and that it was obtained from a distant land is indicated in Jer. vi. 20, 'to what purpose cometh there to me incense from Sheba, and the sweet cane from a far country?'—while the route of the commerce is pointed out in Ezek. xxvii. 19, 'Dan also and Javan going to and fro occupied in thy fairs: bright iron, cassia, and calamus were in thy market.' To the Scripture notices, then, as well as to the description of Dioscorides, the tall grass which yields the fragrant grass-oil of Central India answers in every respect.

SWINE. Egyptian pictures, the parable of the Prodigal Son, and Christ's miraculous cure of the demoniac, when he permitted swine to be possessed and destroyed by rushing over a precipice into the sea of Galilee, furnish ample proofs that during the dominion of the Romans the domesticated breeds of these animals were reared in great numbers among the Jews, notwithstanding the strong prohibition in the law of Moses. Commentators ascribe this abundance of swine to the numerous Pagan sacrifices of these animals in the temples: but we do not deem this to be a sufficiently correct view of the case, since hogs of every denomination were less used for that purpose than oxen, goats, and sheep. May it not be conjectured that in those days of a greatly condensed population the poor found in swine's flesh, and still more in the fat and lard, melted for culinary purposes, as it still is in every part of Pagan Africa, a most desirable aliment, still more acceptable than the salt fish imported from Sidon, to season their usual vegetable diet?

SWORD. [ARMS.]

SYCAMINE TREE is mentioned only once in the New Testament, in Luke xvii. 6, 'And the Lord said, If ye had faith as a grain of mustard-seed, ye might say unto this *sycamine-tree*,' &c. From a slight similarity in name, this tree has often been confounded with the *sycamore*, both by ancient and modern writers. Both trees are, however, mentioned by the apostle, who must have had the technical knowledge necessary for distinguishing such things. Though the English version avoids translating the word, there can be little doubt of the mulberry-tree being intended; and it is frequently so rendered. The mulberry is a tree which we might expect to find mentioned in Scripture, since it is so common in Palestine. It is constantly alluded to by old travellers, and indeed is much cultivated in the present day, in consequence of its affording food for the silk-worm; and it must have been common also in early times, or the silk-worms would not have obtained suitable food when first introduced. As the mulberry-tree is common, as it is lofty and affords shade, it is well calculated for the illustration of the above passage of Luke.

SYCAMORE. This word occurs in several passages of the Old Testament. From the context it is evident that it must have been a tree of some size, common in the plains, unable to bear great cold, with wood of inferior quality, but

still cultivated and valued on account of its fruit. It was not what is called sycamore in this country, which is a kind of maple, and in some of its characters the reverse of what is required, but rather the mulberry tree, the *Ficus Sycomorus* of botanists, which is a genuine species of *Ficus*. The fruit in its general characters resembles that of the fig, while the leaves resemble those of the mulberry tree.

312. [Sycamore-Fig. *Ficus Sycomorus*.]

The ancients were well acquainted with it; and it is common in Egypt as well as in Syria. In Egypt, being one of the few trees indigenous in that country, its wood was proportionally much employed, as in making mummy-cases, though it is coarse grained, and would not be valued where other trees are more common. Though the wood of this sycamore is coarse grained, it is yet very durable in a dry climate like that of Egypt; hence the mummy-cases even in the present day seem as if made with fresh wood. This may, no doubt, be partly ascribed to the preservative effects of the resinous coats, paitus, &c. with which they are impregnated. That the sycamore was cultivated and esteemed in Palestine we learn from 1 Chron. xxvii. 28, 'And over the olive trees and the *sycamore* trees that were in the low plains was Baal-hanan the Gederite.' This was on account of its fruit, which it bears on its stem and branches, like the common fig, and continues to produce in succession for months. The fruit is palatable, sweetish in taste, and still used as food in the East. As the sycamore is a lofty, shady tree, it is well suited for climbing up into, as described in Luke xix. 4, where Zaccheus ascends one to see Jesus pass by.

SY'CHAR, a name of reproach applied by the Jews to Shechem [SHECHEM].

SY'CHEM, the name for Shechem in Acts vii. 16, being that also used in the Septuagint version of the Old Testament [SHECHEM].

SYENE, a city of Egypt, situated in the Thebais, on the southern extremity of the land towards Ethiopia. Ezekiel, describing the deso-

lation to be brought upon Egypt through its whole extent, says, 'Thus saith the Lord, I will make the Land of Egypt utterly desolate, from the tower of Syene even to the border of Cush (Arabia),' or, as some read, 'from Migdol to Syene,' implying, according to either version of the passage, the whole length of the country from north to south. Syene is represented by the present Assouan, which exhibits few remains of the ancient city, except some granite columns of a comparatively late date, and the sekos of a small temple.

SYN'AGOGUE, a Jewish place of worship. The Greek, from which the word is immediately derived, denotes 'an assembly'; but afterwards, by a natural deflection of meaning, came to designate the building in which such assembly met.

The precise age of the introduction of synagogues among the Israelites it does not appear easy to determine. In all probability, however, they had their origin about the period of the exile; and there were then peculiar circumstances which called for their establishment. Deprived of the solemnities of their national worship, yet still retaining their religious convictions, and keenly feeling the loss they had endured, earnestly, too, longing and praying for a restoration of their forfeited privileges, the captive Israelites could not help meeting together for the purposes of mutual sympathy, counsel, and aid, or of prayer and other devout exercises. But prayer makes every spot holy ground. Some degree of secrecy, too, may have been needful in the midst of scoffing and scornful enemies. Thus houses of prayer would arise; and the peculiar form of the synagogue worship—namely, devotion apart from external oblations—would come into being.

The authority of the Talmudists (such as it is) would go to show that a synagogue existed wherever there were ten families. What, however, is certain is, that in the times of Jesus Christ synagogues were found in all the chief cities and lesser towns of Palestine. From Acts vi. 9, it appears that every separate tribe and colony had a synagogue in Jerusalem. Synagogues were built sometimes on the outside of cities, but more frequently within, and preferably on elevated spots. At a later period they were fixed near burial-places. A peculiar sanctity was attached to these spots, even after the building had fallen to ruin. In the Synagogue pious Israelites assembled every Sabbath and festival day, the women sitting apart from the men; and at a later period, on every second and fifth day of each week, for the purposes of common prayer, and to hear portions of the sacred books read; which was performed sometimes by any one of the company (Luke ii. 16), or, according to Philo, by any one of the priests or elders, who expounded each particular as he proceeded. The writings thus read aloud and expounded were the Law, the Prophets, and other Old Testament books (Acts xiii. 15; xv. 21).

The expositor was not always the same person as the reader. A memorable instance in which the reader and the expositor was the same person, and yet one distinct from the stated functionary, may be found in Luke iv. 16, sq., in which our Lord read and applied to himself the beautiful passage found in the prophecy of Isaiah (li. 4).

After the reading and exposition were con-

cluded, a blessing was pronounced, commonly by a priest. The people gave a response by uttering the word *Amen*; when the assembly broke up (1 Cor. xiv. 16).

At the head of the officers stood the 'ruler of the synagogue,' who had the chief direction of all the affairs connected with the purposes for which the synagogue existed (Luke viii. 49; xiii. 14; Mark v. 35, seq.; Acts xviii. 8). Next in rank were the elders (Luke vii. 3), called also 'heads of the synagogue' (Mark v. 22; Acts xiii. 15), as well as 'shepherds' and 'presidents,' who formed a sort of college or governing body under the presidency of the chief ruler. There was in the third place 'the angel of the church,' who in the synagogue meetings acted commonly as the speaker, or as the Protestant minister, conducting the worship of the congregation, as well as performed on other occasions the duties of secretary and messenger. Then came, fourthly, 'the minister' (Luke iv. 20), the attendant who handed the books to the reader, was responsible for the cleanliness of the room, and for its order and decency, and opened and closed the synagogue, of which he had the general care. In addition, there probably were almoners or deacons (Matt. vi. 2), who collected, held, and distributed the alms of the charitable.

In regard to the furniture of the synagogue, seats merely are mentioned in the New Testament (Matt. xiii. 6; James ii. 3). The 'chief seats,' or rather 'front seats,' were occupied by the Scribes and Pharisees. The outfit may have been more simple in the days of Christ; still there was probably then, as well as at a later period, a sort of pulpit, and a desk or shelf, for holding the sacred books. Some sort of summary-judicature seems to have been held in the synagogues, and punishments of flogging and beating inflicted on the spot (Matt. x. 17; xxiii. 34; Mark xiii. 9; Luke xii. 11; xxi. 12; Acts xxii. 19; xxvi. 11; 1 Cor. xi. 22). The causes of which cognizance was here taken were perhaps exclusively of a religious kind. It certainly appears from the New Testament that heresy and apostasy were punished before these tribunals by the application of stripes.

SYNTYCHE, a female Christian named in Phil. iv. 2.

SYRACUSE, a celebrated city on the south-east coast of the island of Sicily. It was a strong, wealthy, and populous place. The great wealth and power of Syracuse arose from its trade, which was carried on extensively while it remained an independent state under its own kings; but about 200 B.C. it was taken by the Romans, after a siege rendered famous by the mechanical contrivances whereby Archimedes protracted the defence. Syracuse still exists as a considerable town under its original name, and some ruins of the ancient city yet remain. St. Paul spent three days at Syracuse, after leaving Melita, when being conveyed as a prisoner to Rome (Acts xviii. 12).

SYRIA. It is difficult to define the limits of ancient Syria, as the name seems to have been very loosely applied by the old geographers. In general, however, we may perceive that they made it include the tract of country lying between the Euphrates and the Mediterranean, from the mountains of Taurus and Amanus in the north, to the desert of Suez and the borders of

Egypt on the south; which coincides pretty well with the modern application of the name. It may be described as composed of three tracts of land, of very different descriptions. That which adjoins the Mediterranean is a hot, damp, and rather unwholesome, but very fruitful valley. The part next to this consists of a double chain of mountains, running parallel from south-west to north-east, with craggy precipitous rocks, devious valleys, and hollow defiles. The air is here dry and healthy; and on the western declivities of the mountains are seen beautiful and highly cultivated terraces, alternating with well-watered valleys, which have a rich and fertile soil, and are densely peopled. The eastern declivities, on the contrary, are dreary mountain deserts, connected with the third region, which may be described as a spacious plain of sand and rock, presenting an extensive and almost unbroken level.

Spring and autumn are very agreeable in Syria, and the heat of summer in the mountain districts is supportable. But in the plains, as soon as the sun reaches the equator, it becomes of a sudden oppressively hot, and this heat continues till the end of October. On the other hand, the winter is so mild, that orange-trees, fig-trees, palms, and many tender shrubs and plants flourish in the open air, while the heights of Lebanon are glittering with snow and hoar-frost. In the districts, however, which lie north and east of the mountains, the severity of winter is greater, though the heat of the summer is not less. At Antioch, Aleppo, and Damascus, there are ice and snow for several weeks every winter. Yet, upon the whole, the climate and soil combine to render this country one of the most agreeable residences throughout the East.

The principal Syrian towns mentioned in Scripture are the following, all of which are noticed under their respective names in the present work:—Antioch, Seleucia, Helbon, Rezep, Tiphsh, Rehoboth, Hamath, Riblah, Tadmor, Baal-Gad, Damascus, Hobah, Beth-Eden.

Syria, when we first become acquainted with its history, was divided into a number of small kingdoms, of which the most important of those mentioned in Scripture was that of which Damascus was the metropolis. A sketch of its history is given under **DAMASCUS**. These kingdoms were broken up, or rather consolidated by conquerors, of whom the first appears to have been Tiglath-pileser, King of Assyria, about 750 B.C. After the fall of the Assyrian monarchy, Syria came under the Chaldean yoke. It shared the fate of Babylonia when that country was conquered by the Persians; and was again subdued by Alexander the Great. At his death in B.C. 323 it was erected into a separate monarchy under the Seleucidae, and continued to be governed by its own sovereigns until, weakened and devastated by civil wars between competitors for the throne, it was finally, about B.C. 65, reduced by Pompey to the condition of a Roman province, after the monarchy had subsisted 257 years. On the decline of the Roman empire, the Saracens became the next possessors of Syria, about A.D. 622; and when the crusading armies poured into Asia, this country became the chief theatre of the great contest between the armies of the Crescent and the Cross, and its plains were deluged with Christian and Moslem blood. For nearly a century the Crusaders remained masters

of the chief places in Syria; but at length the power of the Moslems predominated, and in 1186 Saladin, Sultan of Egypt, found himself in possession of Syria. It remained subject to the sultans of Egypt till, in A.D. 1517, the Turkish sultan, Selim I., overcame the Memlook dynasty, and Syria and Egypt became absorbed in the Ottoman empire. In 1832, a series of successes over the Turkish arms gave Syria to Mehemet Ali, the Pasha of Egypt; from whom, however, after nine years, it again passed to the Turks, in consequence of the operations undertaken for that purpose by the fleet under the command of Admiral Stopford, the chief of which was the bombardment of Acre in November, 1840. The treaty restoring Syria to the Turks was ratified early in the ensuing year.

SYRO-PHœNICIA, or **PHœNICIA PROPER**, called Syro or Syrian Phœnicia, from being included in the Roman province of Syria. It includes that part of the coast of Canaan, on the borders of the Mediterranean, in which the cities of Tyre and Sidon were situated; and the same country, which is called Syro-Phœnicia in the Acts, is in the Gospels called the coasts of Tyre and Sidon. The woman also described as Syro-Phœnician in Mark vii. 2-6, is in Matt. xv. 22 called a Canaanitish woman, because that country was still occupied by the descendants of Canaan, of whom Sidon was the eldest son.

T.

T'A'ANACH, a royal city of the Canaanites (Josh. xii. 21), in the territory of Issachar, but assigned to Manasseh (Judg. i. 27; v. 19; Josh. xvii. 11-21; 1 Kings iv. 12). Schubert, followed by Robinson, finds it in the modern Taaunuk, now a mean hamlet on the south side of a small hill, with a summit of table-land. It lies on the south-western border of the plain of Esdraelon, four miles south of Megiddo, in connection with which it is mentioned in the triumphal song of Deborah and Barak (Judg. v. 19).

T'ABEAL (*God is good*), father of the unnamed person on whom Ilezin, king of Syria, and Pekah, king of Israel, proposed to bestow the crown of Judah in case they succeeded in dethroning Ahaz (Isa. vii. 6). Who 'Tabeal's son' was is unknown, but it is conjectured that he was some factious and powerful Ephraimite (perhaps Ziehlri, 2 Chron. xxviii. 7), who promoted the war in the hope of this result.

TAB'ERAH, one of the stations of the Israelites in the desert [WANDERING].

TABERNACLE (*tent of assembly*). We may distinguish in the Old Testament three sacred tabernacles: I. The **ANTE-SINAITIC**, which was probably the dwelling of Moses, and was placed by the camp of the Israelites in the desert, for the transaction of public business (Exod. xxxiii. 7).

II. The **ANTE-SINAITIC** tabernacle, which had served for the transaction of public business probably from the beginning of the exodus, was superseded by the **SINAITIC**; this was constructed by Bezaleel and Aholiab as a portable mansion-house, guildhall, and cathedral, and set up on the first day of the first month in the second year

after leaving Egypt. Of this alone we have accurate descriptions.

III. The **DAVIDIC** tabernacle was erected by David in Jerusalem for the reception of the ark (2 Sam. vi. 12), while the old tabernacle remained to the days of Solomon at Gibeon, together with the brazen altar, as the place where sacrifices were offered (1 Chron. xvi. 39, and 2 Chron. i. 3).

The second of these sacred tents is, as the most important, called the tabernacle *par excellence*. Moses was commanded by Jehovah to have it erected in the Arabian desert, by the voluntary contributions of the Israelites, who carried it about with them in their migrations until after the conquest of Canaan, when it remained stationary for longer periods in various towns of Palestine.

The materials of which this tent was composed were so costly, that sceptics have questioned whether they could be furnished by a nomadic race. The tabernacle exceeded in costliness and splendour, in proportion to the slender means of a nomadic people, the magnificence of any cathedral of the present day, compared with the wealth of the surrounding population. The mode of collecting the voluntary offerings for this great work, and the design of the structure, are fully described in Exod. xxv. to xxviii., and in xxxv. to xxxviii.

TABERNACLES, FEAST OF, one of the three great festivals of the Jews, being that of the closing year, as the Passover was of the spring. In Lev. xxiii. 34-43, directions for observing the feast are given in very clear terms (comp. Num. xxix. 13-34). It was held in commemoration of the divine goodness as exercised towards the Jews when they were wandering in the desert, as well as expressive of gratitude for the supply of the rich fruits of the earth; and so was fitted to awaken the most lively feelings of piety in the minds of the Hebrews in each successive generation. From the writings of the Rabbins we learn, 1. That those who took part in the festival bore in their left hand a branch of citron, and in their right a palm branch, entwined with willows and myrtle. 2. A libation of water took place on each of the seven days (Isa. xlii. 3; John vii. 37); at the time of the morning oblation a priest drew from the fount of Siloam water in a jar holding three logs, and poured it out, together with wine, into two channels or conduits, made on the west side of the altar, the water into the one, the wine into the other. 3. In the outer court of the women there began, on the evening of the first day, an illumination on great golden candlesticks, which threw its light over the whole of Jerusalem; and a dance by torch-light, attended by song and music, was performed before the candelabra. From these details, it appears that the Feast of Tabernacles was a season of universal joy. Jerusalem bore the appearance of a camp. The entire population again dwelt in tents, but not with the accompaniments of travel, fatigue, and solicitude; all was hilarity, all wore a holiday appearance; the varied green of the ten thousand branches of different trees; the picturesque ceremony of the water-libation, the general illumination, the sacred solemnities in and before the temple; the feast, the dance, the sacred song; the full harmony of the choral music; the bright joy that lighted up every face, and the gratitude at 'harvest home,' which swelled every bosom,

—all conspired to make these days a season of pure, deep, and lively joy, which, in all its elements, finds no parallel among the observances of men.

TABITHA (*antelope*), the Aramaean name of a Christian female, called in Greek Dorcas, resident at Joppa, whose benevolent and liberal conduct, especially in providing the poor with clothing, so endeared her to the Church in that place, that on her death they sent for Peter, then six miles off at Lydda, imploring him to come to them. The apostle complied with their urgent request, and after fervent prayer to God, bade the dead arise; on which Tabitha 'opened her eyes, and when she saw Peter, she sat up.' This great miracle was not only an act of benevolence, but tended to give authority to the teaching of the Apostles, and to secure attention for the doctrines which they promulgated (see Acts ix. 36-42).

1. TABOR, a mountain on the confines of Zebulun and Naphtali, standing out in the north-east border of the plain of Esdraelon, the name of which appears among Greek and Roman writers in the forms of Itabyrion and Atabyrion, and which is now known by the name of *Jebel Tur*. Mount Tabor stands out alone and eminent above the plain, with all its fine proportions from base to summit displayed at one view. It lies at the distance of two hours and a quarter south of Nazareth. According to the barometrical measurements of Schubert, the height of Tabor above the level of the sea is 1748 Paris feet, and 1310 Paris feet above the level of the plain at its base. Seen from the south-west, it presents a semi-globular appearance; but from the north-west, it more resembles a truncated cone. By an ancient path, which winds considerably, one may ride to the summit, where is a small oblong plain, with the foundations of ancient buildings. The view of the country from this place is very beautiful and extensive. The mountain is of limestone, which is the general rock of Palestine. The sides of the mountain are mostly covered with bushes, and woods of oak trees (*ilex* and *agilops*), with occasionally pistachio trees, presenting a beautiful appearance, and affording a fine shade.

This mountain is several times mentioned in the Old Testament (Josh. xix. 12, 22; Jndg. iv. 6, 12, 14); but not in the New. Its summit has, however, been usually regarded as the 'high mountain apart,' where our Lord was transfigured before Peter, James, and John. But the probability of this is opposed by circumstances which cannot be gainsaid. It is manifest that the Transfiguration took place in a solitary place, not only from the word 'apart,' but from the circumstance that Peter in his bewilderment proposed to build 'three tabernacles' on the spot (Matt. xvii. 1-8; Luke ix. 28-36). But we know that a fortified town occupied the top of Tabor for at least 220 years before and 60 years after the birth of Christ, and probably much before and long after; and the tradition itself cannot be traced back earlier than towards the end of the fourth century.

2. TABOR is also the name of a grove of oaks in the vicinity of Benjamin, in 1 Sam. x. 3, the topography of which chapter is usually much embarrassed by the groundless notion that Mount Tabor is meant.

3. TABOR, a Levitical city in Zebulun, situated upon Mount Tabor (1 Chron. vi. 62).

TABRET. [MUSICAL INSTRUMENTS.]

TABRET. [WEIGHTS AND MEASURES.]

TADMOR or TAMAR, a town built by king Solomon (1 Kings ix. 18; 2 Chron. viii. 4). The name Tamar signifies a palm-tree, and hence the Greek and Roman designation of PALMYRA, 'city of palms'; but this name never superseded the other among the natives, who even to this day give it the name of Tadmor. Palm trees are still found in the gardens around the town, but not in such numbers as would warrant, as they once did, the imposition of the name. Tadmor was situated between the Euphrates and Hamath, to the south-east of that city, in a fertile tract or oasis of the desert. It was built by Solomon, probably with the view of securing an interest in and command over the great caravan traffic from the east, similar to that which he had established in respect of the trade between Syria and Egypt.

Tadmor was for a long period under the sway of the Romans. But in the third century it attained independence under Odenatus and his celebrated consort Zenobia. It returned again, however, under the dominion of the Romans, and after various vicissitudes of fortune, it ultimately fell into the hands of the successors of Mohammed. From about the middle of the eighth century it seems gradually to have fallen into decay, but its magnificent ruins were scarcely known in Europe till towards the close of the seventeenth century.

The ruins cover a sandy plain stretching along the bases of a range of mountains called *Jebel Belaa*, running nearly north and south, dividing the great desert from the desert plains extending westward towards Damascus, and the north of Syria. The general aspect which these relics of ancient art and magnificence present, is well described by Volney:—'In the space covered by these ruins we sometimes find a palace, of which nothing remains but the court and walls; sometimes a temple whose peristyle is half thrown down; and now a portico, a gallery, or triumphal arch. Here stand groups of columns, whose symmetry is destroyed by the fall of many of them; there, we see them ranged in rows of such length that, similar to rows of trees, they deceive the sight and assume the appearance of continued walls. If from this striking scene we cast our eyes upon the ground, another, almost as varied, presents itself: on all sides we behold nothing but subverted shafts, some whole, others shattered to pieces, or dislocated in their joints; and on which side soever we look, the earth is strewn with vast stones, half buried; with broken entablatures, mutilated friezes, disfigured reliefs, effaced sculptures, violated tombs, and altars defiled by dust.'

The present Tadmor consists of numbers of peasants' mud huts, clustered together around the great Temple of the Sun. This temple is the most remarkable and magnificent ruin of Palmyra. The court by which it was enclosed was 179 feet square, within which a double row of columns was continued all round. They were 390 in number, of which about sixty still remain standing. In the middle of the court stood the temple, an oblong quadrangular building, surrounded with columns, of which about twenty still exist, though without capitals, of which they have been plundered, probably because they were composed

of metal. In the interior, at the south end, is now the humble mosque of the village.

TAIHPANHES, or **TEHAPHNEHES**, a city of Egypt. The former name is used by Jeremiah (ii. 16; xliii. 7-9; xlv. 1; xlv. 14), and the latter by Ezekiel (xxx. 18). This was doubtless *Daphne*, a strong boundary city on the Pelusiatic arm of the Nile. A mound called Tel Defenneh, nearly in a direct line between the modern Zan and Pelusium, is supposed from its name and position to mark the site of Daphne. Isaiah (xxx. 4) names it in the abbreviated form Hanes. It was to this place that Johanan and his party repaired, taking Jeremiah with them, after the murder of Gedaliah.

TAIHPENES (*head of the age*), a queen of Egypt, consort of the Pharaoh contemporary with David. Her sister was given in marriage to Hadad, the fugitive prince of Edom (1 Kings xi. 19) [**HADAD**].

TAL'MAI (*full of furrows*), king of Geshur, and father of David's wife Maacah, the mother of Absalom (2 Sam. iii. 3; xiii. 37; 1 Chron. iii. 1, 2) [**GESHUR**].

1. **TAMAR** (*palm-tree*), a Canaanitish woman, espoused successively to the two sons of Judah, Er and Onan; but as they both died childless, Judah hesitated to give her his third son Shelah, as patriarchal usage required. This set her upon the contrivance described in Gen. xxxviii.: and two sons, Pharez and Zarah, thus became the fruit of her criminal intercourse with Judah himself [**JUDAH**].

2. **TAMAR**, daughter of David by Maacah, who was also the mother of Absalom. The unhappy consequences of the criminal passion entertained for this beautiful damsel by her half-brother Amnon, brutally gratified by him, and terribly avenged by Absalom, formed the groundwork of the family distractions which embittered the latter years of David's reign (2 Sam. xiii.) [**ABSALOM**; **AMNON**; **DAVID**].

TAMARISK. This is supposed to be the meaning of the word *eshel*, which occurs in three places of Scripture, in one of which, in our Authorized Version, it is rendered *grove*, and in the other two *tree*. The first notice of this tree is in Gen. xxi. 33, 'And Abraham planted a *grove* (*eshel*) in Beersheba, and called there on the name of the Lord.' The second notice is in 1 Sam. xxii. 6: 'Now Saul abode in Gibeath under a *tree* (*eshel*) in Ramah, having his spear in his hand, and all his servants were standing about him.' Under such a tree also he and his sons were buried, for it is said (1 Sam. xxxi. 13), 'And they took their bones, and buried them under a *tree* (*eshel*) at Jabesh, and fasted seven days.'

From the characteristics of the tamarisk-tree of the East, it certainly appears as likely as any to have been planted in Beersheba by Abraham, because it is one of the few trees which will flourish and grow to a great size even in the arid desert. It has also a name in Arabic, *asul*, very similar to the Hebrew *eshel*. Besides the advantage of affording shade in a hot country, it is also esteemed on account of the excellence of its wood, which is converted into charcoal. It is no less valuable on account of the galls with which its branches are often loaded, and which are nearly as astringent as oak-galls. It is also one of those trees which were esteemed by the ancients.

It is very remarkable that the only tree which is found growing among the ruins of Babylon is a tamarisk. Thus, on the north side of the Kasr, where Ker Porter thought he saw traces of the hanging gardens, there stands upon an artificial

313. [Tamarisk. *Tamarix orientalis*.]

eminence a tree to which the Arabs give the name of *athela*. It is a species of tree altogether foreign to the country. Two of the attendants of Ker Porter, who were natives of Bender Bushire, assured him that there are trees of that kind in their country, which attain a very great age, and are called *guz*. 'The one in question is in appearance like the weeping-willow, but the trunk is hollow through age, and partly shattered. The Arabs venerate it as sacred, in consequence of the Calif Ali having reposed under its shade after the battle of Hillah.'

TAMMUZ, a Syrian deity, for whom the Hebrew idolatresses were accustomed to hold an annual lamentation (Ezek. viii. 14). This idol was the same with the Phœnician Adon or Adonis, and the feast itself such as they celebrated. The feast held in honour of Tammuz was solstitial, and commenced with the new moon of July, in the month also called Tammuz; it consisted of two parts, the one consecrated to lamentation, and the other to joy; in the days of grief they mourned the disappearance of the god, and in the days of gladness celebrated his discovery and return. Tammuz appears to have been a sort of incarnation of the sun, regarded principally as in a state of passion and suffering, in connection with the apparent vicissitudes in its celestial position, and with respect to the terrestrial metamorphoses produced, under its influence, upon vegetation in advancing to maturity.

TAPPUAH, or **BETH TAPPUAH**, a city in the tribe of Judah, not far from Hebron (Josh. xv. 53). Robinson identifies it with an old village, called Tefluh, which he found upon the hills north-west of Hebron. 2. Another Tappuah lay in the plain of Judah, apparently in the vicinity of Zanoah, Jarmuth, Socoh, etc. (Josh. xv. 34); which of these was the place conquered by Joshua is not very clear (Josh. xii. 17; comp. x. 6). 3. Another place of the same name occurs on the

confines of Ephraim and Manasseh (Josh. xvi. 8). 4. And in 1 Chron. ii. 43, a man of this name appears.

TARES. The word (*zizanian*) thus rendered occurs in Matt. xiii. 25, and several of the following verses. It is evident from the narrative that the wheat and the *zizanian* must have had considerable resemblance to each other in the herbageous parts, which could hardly be the case, unless they were both of the family of the grasses. That such, however, is the case, is evident from what Volney says, that the peasants of Palestine and Syria do not cleanse away the seeds of weeds from their corn, but even leave that called *Sivan* by the Arabs, which stuns people and makes them giddy, as he himself experienced. The *Zivan* of the Arabs is concluded to be our Darnel, the *Lolium temulentum* of botanists, and is well suited to the palate. It is a grass often found in corn-fields, resembling the wheat until both are in ear, and remarkable as one of the very few of the numerous family of grasses possessed of deleterious properties.

TARSHISH, a celebrated part of the ancient world, about the exact position of which opinions are much divided. From a careful examination of the various Scriptural accounts and allusions it appears that Tarshish was an old, celebrated, opulent, cultivated, commercial city, which carried on trade in the Mediterranean and with the sea-ports of Syria, especially Tyre and Joppa, and that in all probability it is to be identified with Tartessus in Spain, which appears to have lain not far from the Straits of Gibraltar and near the mouth of the Guadalquivir, consequently at no great distance from the famous Granada of later days. It is not improbable, however, that the name may have been employed in a wider sense, and may have denoted the district of southwestern Spain, comprising the several colonies which Tyre planted in that country.

TARSHISH, a precious stone, so called as brought from Tarshish, as Ophir is also put for the gold brought from thence (Exod. xxviii. 20; xxxix. 13; Ezek. i. 16; x. 9; xxviii. 13; Cant. v. 14; Dan. x. 6). The Septuagint, followed by Josephus, makes it the 'chrysolite,' i. e. the topaz of the moderns, which is still found in Spain. Others suppose it to be 'amber'; but this does not agree with the passages in Exodus, which make the Tarshish to have been one of the engraved stones of the high-priest's breast-plate. The word is translated 'beryl' in the Authorized Version.

TARSUS, a celebrated city, the metropolis of Cilicia, in Asia Minor, on the banks of the river Cydnus, which flowed through it, and divided it into two parts. Tarsus was a distinguished seat of Greek philosophy and literature, and, from the number of its schools and learned men, was ranked by the side of Athens and Alexandria. Augustus made Tarsus free. This seems to have implied the privilege of being governed by its own laws and magistrates, with freedom from tribute; but did not confer the *jus coloniarum*, nor the *jus civitatis*: and it was not therefore, as usually supposed, on this account, that Paul enjoyed the privilege of Roman citizenship. Tarsus, indeed, eventually did become a Roman colony, which gave to the inhabitants this privilege; but this was not till long after the time of Paul. We thus

find that the Roman tribune at Jerusalem ordered Paul to be scourged, though he knew that he was a native of Tarsus, but desisted on learning that he was a Roman citizen (Acts ix. 11; xxi. 39; xxii. 24, 27). In the time of Abulfeda, that is, towards the end of the thirteenth and beginning of the fourteenth century, Tarsus was still large, and surrounded by a double wall, and in the occupation of Armenian Christians. It is now a poor and decayed town, inhabited by Turks; but it is not so much fallen as many other anciently great towns of the same quarter, the population being estimated at 30,000. There are some considerable remains of the ancient city.

TARTAK, an idol of the Avites, introduced by them into Samaria (2 Kings xvii. 31).

TARTAN, an Assyrian general whom Sennacherib sent, accompanied by Rabсарis and Rabshakeh, to Jerusalem (2 Kings xviii. 17). It is not known whether this is the same officer who in a preceding reign besieged and took Ashdod for his master (Isa. xx. 1).

TATNAI (Pers., perhaps *gift*), a Persian governor, who succeeded Belshazzar in the rule of Samaria, and probably of other provinces north of Judea. He appears to have been a more just person, and more friendly to the Jews, than his predecessor. An adverse report of their proceedings at Jerusalem reached him; but he resolved to suspend his judgment till he had examined into the matter on the spot. He accordingly repaired thither, accompanied by another great officer, named Shethar-bosnai, and their colleagues, and finding that the Jews alleged the authority of a royal decree for their proceedings, he sent to the supreme government a temperate and fair report, founded on the information he had obtained, suggesting that the statement made by the Jews as to the decree of Cyrus and other matters should be verified by reference to the archives at Babylon. Then, without one word to influence the decision or to prejudice the claim advanced, Tatnai concludes with intimating that he awaits the royal orders. This official letter of the Persian governor is quite a model of exactness, moderation, and truth, and gives a very favourable idea of the administrative part of the Persian government. This took place in the second year of Darius, B.C. 519. The rescript being favourable to the claim of the Jews, whose statement had been verified by the discovery of the original decree of Cyrus, Tatnai and his colleagues applied themselves with vigour to the execution of the royal commands (Ezra v. and vi.).

TAVERNS, THE THREE. The name of a small place on the Appian way, mentioned in Acts xxviii. 15. It probably derived its name from three large inns, or eating-houses, for the refreshment of travellers passing to and from Rome. The place still remains, and is called Tre Taverna: it is about thirty-three miles from Rome.

TEBETH, the tenth month (Esth. ii. 16) of the sacred year of the Hebrews, commenced with the new moon in December, and terminated at the new moon in January.

TEIL-TREE (Isa. vi. 13) is the linden-tree, or *Tilia Europæus* of botanists.

TEKEL. [MENE, &c.]

TEKOA, a city south of Bethlehem, on the borders of the desert to which it gave name, and

noted as the residence of 'the wise woman' who interceded for Absalom; as one of the towns fortified by Rehoboam; and as the birthplace of the prophet Amos (2 Sam. xiv. 2; 1 Chron. ii. 24; 2 Chron. xx. 20; Jer. vi. 1; Amos i. 1). The site has long been known; it lies six miles south of Bethlehem, on an elevated hill, not steep, but broad at the top, and covered with ruins to the extent of four or five acres. The site commands extensive prospects, and towards the east is bounded only by the level mountains of Moab. Before and during the Crusades Tekoa was well inhabited by Christians; but in A.D. 1138 it was sacked by a party of Turks from beyond the Jordan, and nothing further is known of it till the seventeenth century, when it lay desolate, as it has ever since done.

TELEM, a city in Judah (Josh. xv. 24).

TEMA, a tract and people in the northern part of the Arabian desert, adjacent to the Syrian desert, so called from Tema, the son of Ishmael (Gen. xxv. 15; Job vi. 19; Isa. xxi. 14; Jer. xxv. 23). This tract is still called Tema by the Arabs (ARABIA).

TEMAN, a grandson of Esau (Gen. xxxvi. 11, 15); also a city, region, and people on the east of Idumaea sprung from him (Gen. xxxvi. 42; Jer. xlix. 7; Ezek. xxv. 13; Amos i. 11, 12; Ohad. 9). Like other Arabs (1 Kings v. 12), the Temanites were celebrated for wisdom (Jer. xlix. 7; Bar. iii. 22, 23; comp. Job ii. 11; xxi. 1).

TEMANITE, one belonging to the tribe or country of Tema (Job ii. 11; xxi. 1).

TEMPLE. After the Israelites had exchanged their nomadic life for a life in permanent habitations, it was becoming that they should exchange also their movable sanctuary or tabernacle for a temple. There elapsed, however, after the conquest of Palestine, several centuries during which the sanctuary continued movable, although the nation became more and more stationary. It appears that the first who planned the erection of a stone-built sanctuary was David, who, when he was inhabiting his house of cedar, and God had given him rest from all his enemies, meditated the design of building a temple in which the ark of God might be placed, instead of being deposited 'within curtains,' or in a tent, as hitherto. This design was at first encouraged by the prophet Nathan; but he was afterwards instructed to tell David that such a work was less appropriate for him, who had been a warrior from his youth, and had shed much blood, than for his son, who should enjoy in prosperity and peace the rewards of his father's victories. Nevertheless, the design itself was highly approved as a token of proper feelings towards the Divine King (2 Sam. vii. 1-12; 1 Chron. xvii. 1-14; xxviii.). We learn, moreover, from 1 Kings v., and 1 Chron. xxii., that David had collected materials which were afterwards employed in the erection of the temple, which was commenced four years after his death, about A.C. 1012, four hundred and eighty years after the Exodus from Egypt, and was about seven years in building. We thus learn that the Israelitish sanctuary had remained movable more than four centuries subsequent to the conquest of Canaan.

The site of the temple was on Mount Moriah, which was at first insufficient for the temple and altar, and therefore walls and buttresses were

built in order to gain more ground by filling up the interval with earth. The hill was also fortified by a threefold wall, the lowest tier of which was in some places more than 300 cubits high; and the depth of the foundation was not visible, because it had been necessary in some parts to dig deep into the ground in order to obtain sufficient support. The dimensions of the stones of which the walls were composed were enormous; Josephus mentions a length of 40 cubits.

The workmen and the materials employed in the erection of the temple were chiefly procured by Solomon from Hiram, king of Tyre, who was rewarded by a liberal importation of wheat. Josephus states that the foundation was sunk to an astonishing depth, and composed of stones of singular magnitude, and very durable. Being closely mortised into the rock with great ingenuity, they formed a basis adequate to the support of the intended structure.

The temple itself and its utensils are described in 1 Kings vi. and vii., and 2 Chron. iii. and iv.

Divines and architects have repeatedly endeavoured to represent the architectural proportions of the temple, which was 60 cubits long, 20 wide, and 30 high. The internal dimension of the 'holy' was 40 cubits long, 20 cubits wide, and 30 cubits high. The holy was separated from the 'holy of holies' by a partition, a large opening in which was closed by a suspended curtain. The holy of holies was on the western extremity of the entire building, and its internal dimensions formed a cube of 20 cubits. On the eastern extremity of the building was the porch, at the entrance of which stood the two columns called Jachin and Boaz, which were 23 cubits high.

The temple was also surrounded by three stories of chambers, each of which stories was five cubits high, so that there remained above, ample space for introducing the windows, which served chiefly for ventilation, as the light within the temple was obtained from the sacred candlesticks. The windows which are mentioned in 1 Kings vi. 4, consisted probably of lattice-work.

It seems from the descriptions of the temple to be certain that the holy of holies was an *adytum* without windows. To this fact Solomon seems to refer when he spake, 'The Lord said that he would dwell in the thick darkness' (1 Kings viii. 12).

From 1 Kings vii. 10, we learn that the private dwellings of Solomon were built of massive stone. We hence infer, that the framework of the temple also consisted of the same material. The temple was, however, wainscoted with cedar wood, which was covered with gold. The boards within the temple were ornamented by beautiful carvings representing cherubim, palms, and flowers. The ceiling of the temple was supported by beams of cedar wood. The wall which separated the holy from the holy of holies probably consisted not of stone, but of beams of cedar. The partitions were probably in part reticulated, so that the incense could spread from the holy to the most holy.

The floor of the temple was throughout of cedar, but boarded over with planks of fir (1 Kings vi. 15). The doors of the oracle were composed of olive-tree; but the doors of the outer temple had posts of olive-tree and leaves of fir (1 Kings vi. 31, sq.). Both doors, as well as that which led

into the temple as that which led from the holy to the holy of holies, had folding leaves, which, however, seem to have been usually kept open, the aperture being closed by a suspended curtain.

Within the holy of holies stood only the ark of the covenant; but within the holy were ten golden candlesticks, and the altar of incense (comp. the separate articles).

The temple was surrounded by an inner court, which in Chronicles is called the Court of the Priests, and in Jeremiah the Upper Court. This again was surrounded by a wall consisting of cedar beams placed on a stone foundation (1 Kings vi. 36). Besides this inner court there is mentioned a Great Court (2 Chron. iv. 9). This court was also more especially called the court of the Lord's house (Jer. xix. 12; xxvi. 2). These courts were surrounded by spacious buildings, which, however, according to Josephus, seem to have been partly added at a period later than that of Solomon. From these descriptions we learn that the temple of Solomon was not distinguished by magnitude, but by good architectural proportions, beauty of workmanship, and costliness of materials. Many English churches have an external form not unlike that of the temple of Solomon.

There was a treasury in the temple, in which much precious metal was collected for the maintenance of public worship. The gold and silver of the temple was, however, frequently applied to political purposes, and the treasury was repeatedly plundered by foreign invaders. The sacred edifice was burned down by Nebuchadnezzar, B.C. 588, having stood since its commencement 417 or 418 years. Thus terminated what the later Jews called the first house.

THE SECOND TEMPLE.—In the year B.C. 536 the Jews obtained permission from Cyrus to colonise their native land. Cyrus commanded also that the sacred utensils which had been pillaged from the first temple should be restored, and that for the restoration of the temple assistance should be granted (Ezra i. and vi.; 2 Chron. xxxvi. 22, sq.). The first colony, which returned under Zerubbabel and Joshua, having collected the necessary means, and having also obtained the assistance of Phœnician workmen, commenced in the second year after their return, B.C. 534, the rebuilding of the temple. The Sidonians brought rafts of cedar trees from Lebanon to Joppa. The Jews refused the co-operation of the Samaritans, who, being thereby offended, induced the king Artaxashta (probably Smerdis) to prohibit the building. And it was only in the second year of Darius Hystaspis, B.C. 520, that the building was resumed. It was completed in the sixth year of this king, B.C. 516.

This second temple was erected on the site of the former, and probably after the same plan. The old men who had seen the first temple were moved to tears on beholding the second, which appeared insignificant in comparison with the first (Ezra iii. 12; Haggai ii. 3, sq.). It seems, however, that it was not so much in dimensions that the second temple was inferior to the first, as in splendour, and in being deprived of the ark of the covenant, which had been burned with the temple of Solomon.

TEMPLE OF HEROD.—Herod, wishing to ingratiate himself with the people, and being

fond of architectural display, undertook not merely to repair the second temple, but to raise a perfectly new structure. As, however, the temple of Zerubbabel was not actually destroyed, but only removed after the preparations for the new temple were completed, there has arisen some debate whether the temple of Herod could properly be called the third temple.

The work was commenced in the eighteenth year of the reign of Herod; that is, about the year 734-735 from the building of Rome, or about twenty or twenty-one years before the Christian era. Priests and Levites finished the temple itself in one year and a half. The out-buildings and courts required eight years. However, some building operations were constantly in progress under the successors of Herod, and it is in reference to this we are informed that the temple was finished only under Albinus, the last procurator but one, not long before the commencement of the Jewish war in which the temple was again destroyed. It is in reference also to these protracted building operations that the Jews said to Jesus, 'Forty and six years was this temple in building' (John ii. 20).

The whole of the structures belonging to the temple were a stadium square, and consequently four stadia (or half a Roman mile) in circumference. The temple was situated on the highest point, not quite in the centre, but rather to the north-western corner of this square, and was surrounded by various courts, the innermost of which was higher than the next outward, which descended in terraces. The temple, consequently, was visible from the town, notwithstanding its various high enclosures. The outer court was called the *mountain of the house*, and had five principal gates. Annexed to the outer wall were halls which surrounded the temple. The Levites resided in these halls, and they seem likewise to have been used by religious teachers for the purpose of addressing their hearers. Thus we find that Jesus had there various opportunities for addressing the people and refuting cavillers.

Here also the first Christians could daily assemble with one accord (Acts ii. 46). Within this outer court money-changers and cattle-dealers transacted a profitable business, especially during the time of Passover. The profaneness to which this money-changing and cattle-dealing gave rise caused the indignation of our Lord, who suddenly expelled all these traffickers from their stronghold of business (Matt. xxi. 12, sq.; Mark xi. 15-17; Luke xix. 45, 46; John ii. 13-17).

The holy of holies was entirely empty, but there was a stone in the place of the ark of the covenant, on which the high-priest placed the censer. Before the entrance of the holy of holies was suspended a curtain, which was rent by the earthquake that followed after the crucifixion.

The temple was situated upon the south-eastern corner of Mount Moriah, which is separated to the east by a precipitous ravine and the Kidron from the Mount of Olives, which is much higher than Moriah. On the south the temple was bounded by the ravine which separates Moriah from Zion, or the lower city from the upper city. Opposite to the temple, at the foot of Zion, were formerly the king's gardens, and higher up, in a south-westerly direction, the stronghold of Zion, or the city of David, on a higher level than the

temple. The temple was in ancient warfare almost impregnable, from the ravines at the precipitous edge of which it stood; but it required more artificial fortifications on its western and northern sides, which were surrounded by the city of Jerusalem; for this reason there was erected at its north-western corner the tower of Antonia, which, although standing on a lower level than the temple itself, was so high as to overlook the sacred buildings, with which it was connected partly by a large staircase, partly by a subterranean communication. This tower protected the temple from sudden incursions from the city of Jerusalem, and from dangerous commotions among the thousands who were frequently assembled within the precincts of the courts, which also were sometimes used for popular meetings. Under the sons of Herod, the temple remained apparently in good order, and Herod Agrippa, who was appointed by the Emperor Claudius its guardian, even planned the repair of the eastern part, which had probably been destroyed during one of the conflicts between the Jews and Romans of which the temple was repeatedly the scene (*Antiq.* xvii. 10). Many writers on the subject have adopted a style as if they possessed much information about the archives of the temple; there are a few indications from which we learn that important documents were deposited in the tabernacle and temple. Even in Deut. xxxi. 26, we find that the book of the law was deposited in the ark of the covenant. 2 Kings xxii. 8, Hilkiah rediscovered the book of the law in the house of Jehovah. In 2 Macc. ii. 13, we find a bibliotheca or library mentioned, apparently consisting chiefly of the canonical books, and probably deposited in the temple. In Josephus it is mentioned that a book of the law was found in the temple. It appears that the sacred writings were kept in the temple. Copies of political documents seem to have been deposited in the treasury of the temple.

During the final struggle of the Jews against the Romans, A.D. 70, the temple was the last scene of the tug of war. The Romans rushed from the tower Antonia into the sacred precincts, the halls of which were set on fire by the Jews themselves. It was against the will of Titus that a Roman soldier threw a firebrand into the northern outbuildings of the temple, which caused the conflagration of the whole structure, although Titus himself endeavoured to extinguish the fire.

The sacred utensils, the golden table of the shew-bread, the book of the law, and the golden candlestick, were displayed in the triumph at Rome. Representations of them are still to be seen sculptured in relief on the triumphal arch of Titus. The place where the temple had stood seemed to be a dangerous centre for the rebellious population, until, in A.D. 136, the Emperor Hadrian founded a Roman colony, under the name *Ælia Capitolina*, on the ruins of Jerusalem, and dedicated a temple to Jupiter Capitolinus on the ruins of the temple of Jehovah. Henceforth no Jew was permitted to approach the site of the ancient temple.

The Emperor Julian undertook, A.D. 363, to rebuild the temple; but after considerable preparations and much expense, he was compelled to desist by flames which burst forth from the foun-

dations. A splendid mosque now stands on the site of the temple. This mosque was erected by the caliph Omar after the conquest of Jerusalem by the Saracens, A.D. 636.

TEMPTATION OF OUR LORD (Matt. iv. 1-11; Mark i. 12, 13; Luke iv. 1-12). The popular view of this undoubted portion of our Saviour's history, is, that it is a narrative of outward transactions; that our Saviour immediately after his baptism was conducted by the Spirit into the wilderness—either the desolate and mountainous region now called Quarantania by the people of Palestine, or the great desert of Arabia, mentioned in Deut. xxxii. 10; viii. 15; Hos. xiii. 5; Jer. ii. 6, &c.—where the devil tempted him in person, appeared to him in a visible form, spoke to him in an audible voice, removed him to the summit 'of an exceeding high mountain,' and to the top of 'a pinnacle of the temple at Jerusalem;' whereas the view taken by many learned commentators, ancient and modern, is, that it is the narrative of a *vision*, which was designed to supply that ideal experience of temptation or trial, which it was provided in the divine counsels for our Lord to receive, previously to entering upon the actual trials and difficulties of his ministry.

TENT. The patriarchal fathers of the Israelites were dwellers in tents, and their descendants proceeded at once from tents to houses. We therefore read but little of *huts* among them; and never as the fixed habitations of any people with whom they were conversant. Tents were invented before the Deluge, and appear from the first to have been associated with the pastoral life, to which a movable habitation was necessary (Gen. iv. 20). The practice of the pastoral fathers was to pitch their tents near wells of water, and, if possible, under some shady tree (Gen. xviii. 4; Judg. iv. 5). The first tents were undoubtedly covered with skins, of which there are traces in the Pentateuch (Exod. xxvi.

314. [Arabian Tent.]

14); but nearly all the tents mentioned in Scripture were, doubtless, of goats' hair, spun and woven by the women (Exod. xxxv. 26; xxxvi. 14); such as are now, in Western Asia, used by all who dwell in tents; hence their black colour (Sol. Song. i. 5). Tents of linen were, and still are, only used occasionally, for holiday or travelling purposes, by those who do not habitually live in them. The patriarchal tents were probably such as we now see in Arabia, of an oblong shape, and eight or ten feet high in the middle. They vary in size, and have, accordingly, a greater or less number of poles to support them—from three to nine. An encampment is generally ar-

ranged circularly, forming an enclosure, within which the cattle are driven at night, and the centre of which is occupied by the tent or tents of the Emir or Sheikh. If he is a person of much consequence, he may have three or four tents, for himself, his wives, his servants, and strangers respectively. The two first are of the most importance, and we know that Abraham's wife had a separate tent (Gen. xxiv. 27). It is more usual, however, for one very large tent to be divided into two or more apartments by curtains. The Holy Tabernacle was on this model (Exod. xxvi. 31-37).

TER'RAH, son of Nahor and father of Abraham, who, with his family, quitted Ur of the Chaldees to go to the land which God should show him, 'but tarried at Haran in Mesopotamia, and there died at the age of 205 years' (Gen. xi. 24-32; Acts vii. 2-4). From the latter text, it appears that the first call which prompted them to leave Ur was addressed to Abraham, not to Terah, as well as the second, which, after the death of his father, induced him to proceed from Haran to Canaan [ABRAHAM]. The order to Abraham to proceed to Canaan immediately after Terah's death seems to indicate that the pause at Haran was on his account. Whether he declined to proceed any further, or his advanced age rendered him unequal to the fatigues of the journey, can only be conjectured.

TERAPHIM were tutelar household gods, by whom families expected, for worship bestowed, to be rewarded with domestic prosperity, such as plenty of food, health, and various necessities of domestic life.

We have most remarkable proofs that the worship of teraphim co-existed with the worship of Jehovah even in pious families; and we have more than one instance of the wives of worshippers of Jehovah not finding full contentment and satisfaction in the stern moral truth of spiritual worship, and therefore carrying on some private symbolism by fondling the teraphim.

We find in Gen. xxxi. 19, that Rachel stole the images (teraphim) belonging to her father without the knowledge of her husband, who, being accused by his father-in-law of having stolen his gods, answered, 'With whomsoever thou findest thy gods, let him not live.' Laban searched, but found not the images (teraphim).

Among the ancient Israelites the worship of Jehovah was frequently blended with that of a graven image or teraphim, but on every revival of the knowledge of the written revelation of God the teraphim were swept away together with the worse forms of idolatry (2 Kings xxiii. 24).

The teraphim were consulted by persons on whom true religion had no firm hold, in order to elicit some supernatural omens similar to the auguries of the Romans (Zech. x. 2; Ezek. xxi. 21-26).

TEREBINTH. This is the proper rendering of the word (ALAH) which has been variously translated as *oak*, *teal tree*, *elm*, and *even plane*. In Palestine and the neighbouring countries, the terebint seems to be regarded with much the same distinction as the oak is in our northern latitudes. The tree is long lived. About the time of Christ, there was at Mamre near Hebron a venerable terebint, which a tradition, old in the time of Josephus, alleged to be that under which Abraham pitched his tent (Gen. xiii. 18).

Dr. Robinson states, that at the point where the roads from Gaza to Jerusalem, and from Hebron to Ramleh, cross each other, he observed an immense terebint tree, the largest he saw anywhere in Palestine; 'This species (*Pistacia Terebinthus*) is without doubt,' he adds, 'the terebint of the Old Testament, and under the shade of such a tree Abraham may well have pitched his tent at Mamre.' The terebint is not an evergreen, as has often been represented, but its small feathered lancet-shaped leaves fall in the autumn, and are renewed in the spring. The flowers are small, and are followed by small oval berries, hanging in clusters from two to five inches in length, resembling much the clusters of the vine when the grapes are just set. From incisions in the trunk, there is said to flow a sort of transparent balsam, constituting a very pure and fine species of turpentine, with an agreeable odour, and hardening gradually into a transparent gum [OAK].

315. [Terebint tree]

TERTIUS. We learn from Rom. xvi. 22 ('I Tertius, who wrote this epistle, salute you in the Lord'), that the Apostle Paul dictated that epistle to Tertius. Some writers say that Tertius was bishop of Iconium.

TERTULLUS, the Roman orator or advocate employed by the Sanhedrin, to sustain their accusation against Paul before the Roman governor (Acts xxiv. 1-8). The Jews, as well as the other peoples subject to the Romans, in their accusations and processes before the Roman magistrates, were obliged to follow the forms of the Roman law, of which they knew little. The different provinces, and particularly the principal cities, consequently abounded with persons who, at the same time advocates and orators, were equally ready to plead in civil actions or to harangue on public affairs. This they did, either in Greek or Latin, as the place or occasion required.

TESTAMENT. [BIBLE.]

TET'RAR'CH, a prince or sovereign who holds or governs a fourth part of a kingdom, without wearing the diadem or bearing the title of

king. Such was the original import of the word, but it was afterwards applied to any petty king or sovereign, and became synonymous with ethnarch.

In the reign of Tiberius Cæsar Herod's kingdom of Judæa was divided into three parts, which were called tetrarchies, and the sovereign tetrarchs. His sons were made the heirs to his kingdom. Archelaus became tetrarch of Judæa, Samaria, and Idumæa; Philip of Trachonitis and Ituræa; and Herod Antipas of Galilee and Peræa (Luke iii. 1). Herod Agrippa, the nephew of Herod Antipas, who afterwards obtained the title of king (Acts xxv. 13), was in the reign of Caligula invested with royalty, and appointed tetrarch of Abilene; to which was afterwards added Galilee and Peræa, Judæa and Samaria; until at length his dominion extended over the whole land of Palestine [HERODIAN FAMILY]. The title of tetrarch was frequently conferred upon the descendants of Herod the Great by the Roman emperors.

THADDEUS, a surname of the Apostle Jude, who was also called Lebbaeus (Matt. x. 3; Mark iii. 18; comp. Luke vi. 16) [JUDE].

THAM'MUZ. [TAMMUZ.]

THEBES is a name borne by two of the most celebrated cities in the ancient world. Thebes in Æthiopia, and Thebes in Egypt. Of the latter it is that we have here to speak in brief, referring those who wish for detailed information to the works of Wilkinson, especially his *Modern Egypt and Thebes*.

The name Thebes is corrupted from the Tâpe of the ancient Egyptian language, the meaning of which appears to be 'the head,' Thebes being the capital of the Thebais in Upper Egypt. It is termed in Scripture No and No-Ammon (Jerem. xvi. 25; Ezek. xxx. 14; Nahum iii. 8). Thebes was situated on both sides of the river Nile, and had canals cutting the land in all directions. It was probably the most ancient city of Egypt, and the residence in very early ages of Egyptian kings who ruled the land during several dynasties. The plain was adorned not only by large and handsome dwellings for man, but by temples and palaces, of whose grandeur words can give but a faint conception. Of these edifices there are still in existence ruins that astound and delight the traveller. The most ancient remains now existing are in the immense temple, or rather cluster of temples, of Karnak, the largest and most splendid ruin of which either ancient or modern times can boast, being the work of a number of successive monarchs, each anxious to surpass his predecessor by increasing the dimensions of the part he added. Osirtasen I., the contemporary of Joseph, is the earliest monarch whose name appears on the monuments of Thebes. On the western shore the chief points of interest are the palace and temple of Rameses II., erroneously called the Memnonium; the temples of Medinet Habu, the statue of Memnon, and the tombs of the kings. On the eastern shore are the temple of Luxor, and the temple of Karnak, already mentioned. 'It is impossible,' says Robinson (*Bib. Researches*, i. 29), 'to wander among these scenes and behold these hoary yet magnificent ruins without emotions of astonishment and deep solemnity. Everything around testifies of vastness and of utter desolation. Here

lay once that mighty city whose power and splendour were proverbial throughout the ancient world.' Yet, like all earthly things, Thebes had her period of death. She sprang up, flourished, declined, and sank. Memphis rose to be her rival when Thebes began to part with her glory. She was plundered by Cambyzes, and destroyed by Ptolemy Lathyrus. In Strabo's time the city was already fallen; yet its remains then covered eighty stadia, and the inhabited part was divided into many separate villages, as the ruins now are portioned out between nine hamlets. The period in which Thebes enjoyed the highest prosperity Robinson considers to have been coeval with the reigns of David and Solomon. This, however, appears too late a date. From the passage in Nahum (iii. 8, sq.), it would seem that in his day (according to Josephus, cir. 750 B.C.) the city had suffered a terrible overthrow—how long previously is not recorded, for we do not know what conquest or what conqueror was here intended by the prophet. The walls of all the temples at Thebes are covered with sculptures and hieroglyphics, representing in general the deeds of the kings who founded or enlarged these structures. Many of these afford happy illustrations of Egyptian history.

THE'BÊZ, a place near Shechem, where Abimelech met his death (Judg. ix. 50; 2 Sam. xi. 21). It seems to be the same with the place now called Tubas.

THEOPH'ILUS (*lover of God*), a person of distinction, to whom St. Luke inscribed his Gospel and the Acts of the Apostles (Luke i. 3; Acts i. 1). The title given him, translated 'most excellent,' is the same which is given to governors of provinces, as Felix and Festus (Acts xxiii. 26; xxvi. 25); whence he is conceived by some to have been a civil magistrate in some high office.

THESSALONIANS, EPISTLES TO THE.—FIRST EPISTLE.—The authenticity and canonical authority of this epistle have been from the earliest ages admitted; nor have these points ever been called in question, either in ancient or modern times, by those who have received any of Paul's Epistles.

This epistle has generally been regarded as the first written by Paul of those now extant. In the Acts of the Apostles (xvii. 5, sq.) we are told that Paul, after preaching the Gospel with success at Thessalonica, had to flee from that city in consequence of the malice of the Jews; that he thence betook himself to Berea, in company with Silas; that, driven by the same influence from Berea, he journeyed to Athens, leaving Silas and Timothy (the latter of whom had probably preceded him to Berea) behind him; and that after remaining in that city for some time, he went to Corinth, where he was joined by Timothy and Silas. It appears also from this epistle (iii. 17, 2, 5), that whilst at Athens he had commissioned Timothy to visit the infant church at Thessalonica; and from Acts xvii. 15, 16, we learn that he expected to be joined by Timothy and Silas in that city. Whether this expected meeting ever took place there, is a matter involved in much uncertainty.

But whatever view we adopt on this point, it seems indisputable that this epistle was not written until Paul met Timothy and Silas at Corinth. The ancient subscription, indeed, testifies that it

was written at Athens; but that this could not be the case is clear from the epistle itself. It must, however, have been written very soon after his arrival at Corinth; for, at the time of his writing, Timothy had just arrived from Thessalonica, and Paul had not been long in Corinth before Timothy and Silas joined him there (Acts xvii. 1-5).

The design of this epistle is to comfort the Thessalonians under trial, and to encourage them to the patient and consistent profession of Christianity. The epistle may be conveniently divided into two parts. The former of these, which comprises the first three chapters, is occupied with statements chiefly of a retrospective character: it details the apostle's experience among the Thessalonians, his confidence in them, his deep regard for them, and his efforts and prayers on their behalf. The latter part of the epistle (iv. 5) is, for the most part, of a hortatory character: it contains the apostle's admonitions to the Thessalonians to walk according to their profession; to avoid sensuality, dishonesty, and pride; to cultivate brotherly love, to attend diligently to the duties of life, to take the comfort which the prospect of Christ's second coming was calculated to convey, but not to allow that to seduce them into indolence or idle speculations; to render due respect to their spiritual superiors; and, by attention to a number of duties which the apostle specifies, to prove themselves worthy of the good opinion he entertained of them. He concludes the epistle by offering fervent supplication on their behalf, and the usual apostolic benediction.

SECOND EPISTLE.—The apostle's allusion in his former epistle to the second coming of Christ, and especially his statement in ch. iv. 15-18, appear to have been misunderstood by the Thessalonians or wilfully perverted by some among them, so as to favour the notion that that event was near at hand. This notion some inculcated as a truth specially confirmed to them by the Spirit; others advocated it as part of the apostolic doctrine; and some claimed for it the specific support of Paul in a letter (ii. 2). Whether the letter here referred to is the apostle's former epistle to the Thessalonians, or one forged in his name by some keen and unscrupulous advocates of the notion above referred to, is uncertain.

On receiving intelligence of the trouble into which the Thessalonians had been plunged, in consequence of the prevalence among them of the notion (from whatever source derived) that the second coming of Christ was nigh at hand, Paul wrote to them this second epistle, in which he beseechingly adjures them by the very fact that Christ is to come a second time, not to be shaken in mind or troubled, as if that event were near at hand. He informs them that much was to happen before that should take place, and especially predicts a great apostacy from the purity and simplicity of the Christian faith (ii. 5-12). He then exhorts them to hold fast by the traditions they had received, whether by word or epistle, and commends them to the consoling and sustaining grace of God (ver. 15-17). The rest of the epistle consists of expressions of affection to the Thessalonians, and of confidence in them: of prayers on their behalf, and of exhortations and directions suited to the circumstances in which they were placed.

There is the strongest reason for believing that this second epistle was written very soon after the first, and at the same place, viz. Corinth. The internal evidence in favour of the genuineness of this epistle is equally strong with that which attests the first.

THESSALONICA, now called Salonichi, is still a city of about sixty or seventy thousand inhabitants, situated on the present gulf of Salonichi, which was formerly called Sinus Thermaicus, at the mouth of the river Echedorus. It was the residence of a *præses*, the principal city of the second part of Macedonia, and was by later writers even styled *metropolis*. Under the Romans it became great, populous, and wealthy. It had its name from Thessalonice, wife of Cassander, who built the city on the site of the ancient Therma, after which town the Sinus Thermaicus was called. Thessalonica was 267 Roman miles east of Apollonia and Dyrrachium, 66 miles from Amphipolis, 89 from Philippi, 433 west from Byzantium, and 150 south of Sophia. A great number of Jews were living at Thessalonica in the time of the apostle Paul, and also many Christian converts, most of whom seem to have been either Jews by birth or proselytes before they embraced Christianity by the preaching of Paul. Jews are still very numerous in this town, and possess much influence there. They are unusually exclusive, keeping aloof from strangers. The apostolical history of the place is given in the preceding article. The present town stands on the acclivity of a steep hill, rising at the north-eastern extremity of the bay. It presents an imposing appearance from the sea, with which the interior by no means corresponds. The principal antiquities are the propylæa of the hippodrome, the rotunda, and the triumphal arches of Augustus and Constantine.

THEUDAS, a Jewish insurgent, who was slain, while a band of followers that he had induced to join him were scattered and brought to nought. This statement was made by Gamaliel at the meeting of the Sanhedrim held about A.D. 33, to consider what measures should be taken for the suppression of the Gospel now preached and recommended by the virgin zeal of Peter and the apostles (Acts v. 29, 34, sq.). Josephus (*Antiq.* xx. 5. 1) tells us of a Theudas who, under the procurator Phadus (A.D. 44), set up for a prophet, and brought ruin on himself and many whom he deluded, and attempts have been made, though not very successfully, to identify the Theudas of Gamaliel with the insurgent spoken of by Josephus, who appeared eleven years later.

These remarks have been made to meet the ordinary view of the case. But the name Theudas is an Aramaic form of the Greek *Theodotos*, which is a literal translation of the Hebrew *Matthias* or *Matthew*. It is, then, of a Matthew that Luke speaks; and in Josephus (*Antiq.* xvii. 6. 2-4) we find a detailed account of one Matthew, a distinguished teacher among the Jews, who, in the latter days of Herod the Great, raised a band of his scholars to effect a social reform in the spirit of the old Hebrew constitution, by 'destroying the heathen works which the king had erected contrary to the law of their fathers.' A large golden eagle, which the king had caused to be erected over the great gate of the Temple, in defiance of the law that forbids images or repre-

sentations of any living creatures, was an object of their special dislike, which, on hearing a false report that Herod was dead, Matthias and his companions proceeded to demolish; when the king's captain, supposing the undertaking to have a higher aim than was the fact, came upon the riotous reformers with a band of soldiers, and arrested the proceedings of the multitude. Dispersing the mob, he apprehended forty of the bolder spirits, together with Matthias and his fellow-leader Judas. Matthias was burnt.

THIEF, PENITENT, ON THE CROSS (Luke xxiii. 39-43). It has been assumed that this man had been very wicked; that he continued so till he was nailed to the cross; that he joined the other malefactor in insulting the Saviour; and that then, by a miracle of grace, he was transformed into a penitent Christian. Some eminent writers, however, are of opinion, that he was, in all probability, not a thief who robbed for profit, but one of the insurgents who had taken up arms on a principle of resistance to the Roman oppressious, and to what they thought an unlawful burden, the tribute-money. They are of opinion, also, that it is far from certain that either his faith or repentance was the fruit of this particular season. He must have known something of the Saviour, otherwise he could not have said 'he hath done nothing amiss.' He was convinced of our Lord's Messiahship: 'Lord, remember me when thou comest into thy kingdom.' Koecher tells us that it is a very ancient tradition that the thief was not converted at the cross, but was previously imbued with a knowledge of the Gospel.

THIGH, the part of the body from the legs to the trunk, of men, quadrupeds, &c. *Putting the hand under the thigh* appears to have been a very ancient custom, upon occasion of taking an oath to any one. Abraham required this of the oldest servant of his house, when he made him swear that he would not take a wife for Isaac of the daughters of the Canaanites (Gen. xxiv. 2-9). Jacob required it of his son Joseph, when he bound him by oath not to bury him in Egypt, but with his fathers in the land of Canaan (xlvii. 29-31). The origin, form, and import of this ceremony in taking an oath, are very doubtful. *Smiting on the thigh* denotes penitence (Jer. xxxi. 19), grief, and mourning (Ezek. xxi. 12).

THISTLE. [THORNS.]

THOMAS. The word is equivalent to the Greek *Didymus*, twin.

The Apostle Thomas (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13) has been considered a native of Galilee, like most of the other apostles (John xxi. 2); but according to tradition he was a native of Antiochia, and had a twin-sister called Lysia.

In the character of Thomas was combined great readiness to act upon his convictions, to be faithful to his faith even unto death, so that he even exhorted his fellow-disciples, on his last journey to Jerusalem, 'Let us also go, that we may die with him' (John xi. 16), together with that careful examination of evidence which will be found in all persons who are resolved really to obey the dictates of their faith. Whoever is misled, like most religionists who complain of the scepticism of Thomas, to follow in the common transactions of life the dictates of vulgar

prudence, may easily abstain from putting his hands into the marks of the nails and into the side of the Lord (John xx. 25); but whosoever is ready to die with the Lord, will be inclined to avail himself of extraordinary evidence for extraordinary facts, since nobody likes to suffer martyrdom by mistake. These remarks are directed against Winer and others, who find in the character of Thomas what they consider contradictory traits, viz., inconsiderate faith, and a turn for exacting the most rigorous evidence. We find that a resolute and lively faith is always necessarily combined with a sense of its importance, and with a desire to keep its objects unalloyed and free from error and superstition. Christ himself did not blame Thomas for availing himself of all possible evidence, but only pronounced those blessed who would be open to conviction even if some external form of evidence should not be within their reach.

Thomas preached the Gospel in Parthia (Origen), and, according to Jerome, in Persia; and was buried at Edessa. According to a later tradition Thomas went to India, and suffered martyrdom there.

THORNS AND THISTLES. There are a considerable number of words in Scripture which have been considered to indicate brambles, briars, thorns, thistles. Rabbinical writers state that there are no less than twenty-two words in the Bible signifying thorny and prickly plants; but some of these are probably so interpreted only because they are unknown, and may merely denote insignificant shrubs.

316. [*Zizyphus Spina Christi.*]

The cut given above represents the *Zizyphus Spina Christi*, of which Hasselquist says, 'Is all probability this is the tree which afforded the crown of thorns put upon the head of Christ. It is very common in the East. This plant is very

fit for the purpose, for it has many small and sharp spines, which are well adapted to give pain: the crown might easily be made of these soft, round, and plant branches; and what in my opinion seems to be the greater proof is, that the leaves very much resemble those of ivy, as they are of a very deep glossy green. Perhaps the enemies of Christ would have a plant somewhat resembling that with which emperors and generals were crowned, that there might be a calumny even in the punishment.'

THRESHING. [AGRICULTURE.]

THRONE, the ornamented seat on which royal personages gave audience on state occasions among the Hebrews (1 Kings ii. 19; xxii. 10; comp. Esth. v. 1). It was originally a decorated arm-chair, higher than an ordinary seat, so as to require a foot-stool to support the feet. Sometimes the throne was placed on a platform ascended by steps (Isa. vi. 1). Solomon made a throne of ivory overlaid with gold, which had six steps, with six lions on each side (1 Kings x. 18). Archelaus addressed the multitude from 'an elevated seat and a throne of gold.' A throne became the emblem of regal power (Gen. xli. 40); whence the phrases, 'to sit on the throne of his kingdom' (Deut. xvii. 18), that is, to rule as a monarch; and 'to sit on the throne of a person' (1 Kings i. 13; 2 Kings x. 30), which signifies, to be his successor.

THUMMIM. [URIM AND THUMMIM.]

THYATIRA, a city on the northern border of Lydia, about twenty-seven miles from Sardis, the seat of one of the seven Apocalyptic churches (Rev. i. 11; ii. 18). Its modern name is Ak-hissar, or *the white castle*. According to Pliny, it was known in earlier times by the names Pelopia and Ehippa (*Hist. Nat.* v. 29). Strabo asserts that it was a Macedonian colony (xiii. p. 928). The Roman road from Pergamus to Sardis passed through it. It was noted for the art of dyeing, as appears from Acts xvi. 14. It still maintains its reputation for this manufacture, and large quantities of scarlet cloth are sent weekly to Smyrna. The town consists of about two thousand houses, for which taxes are paid to the government, besides two or three hundred small huts; of the former 300 are inhabited by Greeks, 30 by Armenians, and the rest by Turks. The common language of all classes is the Turkish; but in writing it, the Greeks use the Greek, and the Armenians the Armenian characters. There are nine mosques and one Greek church.

THYINE WOOD is mentioned as one of the articles of merchandise which would cease to be purchased in consequence of the fall of Babylon (Rev. xviii. 12). This wood was in considerable demand by the Romans, being much employed by them in the ornamental wood-work of their villas, and also for tables, bowls, and vessels of different kinds. It is noticed by most ancient authors, from the time of Theophrastus. It was the citron-wood of the Romans, and was produced only in Africa, in the neighbourhood of Mount Atlas, and in Granada. It grew to a great size.

This cedar or citron-wood was most likely produced by *Callitris quadrivalvis*, the *Thuja articulata* of Linnaeus, which is a native of Mount Atlas, and of other uncultivated hills on the coast of Africa.

317. [*Callitris quadrivalvis*.]

TIBERIAS is a small town situated about the middle of the western bank of the lake of Gennesareth; according to Joliffe, about twenty English miles from Nazareth and ninety from Jerusalem. Tiberias was chiefly built by the tetrarch Herodes Antipas, and called by him after the emperor Tiberius.

From the time of Herodes Antipas to the commencement of the reign of Herodes Agrippa II., Tiberias was the principal city of the province. It was one of the four cities which Nero added to the kingdom of Agrippa. Sepphoris and Tiberias were the largest cities of Galilee. In the last Jewish war the fortifications of Tiberias were an important military station.

According to Josephus, the inhabitants of Tiberias derived their maintenance chiefly from the navigation of the lake of Gennesareth, and from its fisheries. After the destruction of Jerusalem Tiberias was celebrated during several centuries for its famous Rabbinical academy.

Not far from Tiberias, in the immediate neighbourhood of the town of Emmaus, were warm mineral springs, whose celebrated baths are sometimes spoken of as belonging to Tiberias itself. These springs contain sulphur, salt, and iron; and were employed for medicinal purposes.

According to Joliffe (*Travels*, pp. 48, 49, sq.), the modern Tabaria has about four thousand inhabitants, a considerable part of whom are Jews.

TIBERIUS, the third Emperor of Rome. He is mentioned by name only by St. Luke, who fixes in the fifth year of his reign the commencement of the ministry of John the Baptist, and of Christ (Luke iii. 1). The other passages in which he is mentioned under the title of Cæsar, offer no points of personal allusion, and refer to him simply as the emperor (Matt. xxii. 17, sq.;

Mark xii. 14, sq.; Luke xx. 22, sq.; xxiii. 2, sq.; John xix. 12, sq.).

TIB'NI (*building of God*), one of those factious men who took a prominent part in the troubles which followed the violent death of Elah. He disputed the throne of Israel with Omri, and the civil war which was thus kindled between the two factions lasted for about three years with varying success, till the death of Tibui left his adversary master of the crown, B.C. 929 (1 Kings xvi. 21-23).

TIDAL (*generation*), one of the allies who with Chedorlaomer invaded Palestine in the time of Abraham (Gen. xiv. 1). Tidal bears the somewhat singular title of 'king of nations' or 'Gentiles' (*goyim*). We cannot tell who these Goyim were over whom Tidal ruled; but it seems probable that he was a chief of several confederated tribes, whose military force he contributed to the expedition of Chedorlaomer.

TIG'LATH-PIE'SER, the Assyrian king who subjected the kingdom of Israel in B.C. 747 [ASSYRIA; ISRAEL].

TIGRIS, one of the four rivers of Paradise, twice mentioned in Scripture under the name of **HIDDEKEL** (Gen. ii. 14; Dan. x. 4), which signifies 'the rapid Tigris.'

The Tigris rises in the mountains of Armenia, about fifteen miles south of the sources of the Euphrates, and pursues nearly a regular course south-east till its junction with that river at Korna, fifty miles above Basrah (Bassorah). The Tigris is navigable for boats of twenty or thirty tons' burden as far as the mouth of the Odorneh, but no further; and the commerce of Mosul is consequently carried on by rafts supported on inflated sheep or goats' skins. The Tigris, between Bagdad and Korna, is, on an average, about two hundred yards wide; at Mosul its breadth does not exceed three hundred feet. The banks are steep, and overgrown for the most part with brushwood, the resort of lions and other wild animals. The middle part of the river's course, from Mosul to Korna, once the seat of high culture and the residence of mighty kings, is now desolate, covered with the relics of ancient greatness in the shape of fortresses, mounds, and dams, which had been erected for the defence and irrigation of the country. At the ruins of Nimrod, eight leagues below Mosul, is a stone dam quite across the river, which, when the stream is low, stands considerably above the surface, and forms a small cataract; but when the stream is swollen, no part of it is visible, the water rushing over it like a rapid, and boiling up with great impetuosity. It is a work of great skill and labour, and now venerable for its antiquity. At some short distance below there is another Zikr (dyke), but not so high, and more ruined than the former. The river rises twice in the year: the first and great rise is in April, and is caused by the melting of the snows in the mountains of Armenia; the other is in November, and is produced by the periodical rains.

TIMBRELS. [MUSICAL INSTRUMENTS.]

TIM'NA (*restraint*), a concubine of Eliphaz, the son of Esau (Gen. xxxvi. 12-22; 1 Chron. i. 36). From her the name passed over to an Edomitish tribe (Gen. xxxvi. 40; 1 Chron. i. 51).

TIM'NAH or **TIMNATH**, an ancient city of the Canaanites (Gen. xxxviii. 12), first assigned

to the tribe of Judah (Josh. xv. 10-57), and afterwards to Dan (Josh. xix. 43); but it long remained in the possession of the Philistines (Judg. xiv. 1; 2 Chron. xxviii. 18; comp. Joseph. *Antiq.* v. 8. 5). It is chiefly noted as the abode of Samson's bride, and the place where he held his marriage feast. It is probably represented by a deserted site now called Tibneh, which is about one hour's journey south-west of Zerah, the residence of Samson. Another Timnah lay in the mountains of Judah (Josh. xxv. 57; Gen. xxviii. 12-14).

TIM'NATH-HE'RES. [TIMNATH-SERAH.] **TIM'NATH-SERAH** (*portion of abundance*, i.e. *remaining portion*), a town in the mountains of Ephraim, which was assigned to Joshua, and became the place of his residence and burial (Josh. xix. 50; xxiv. 30). In Judg. ii. 9, it is called Timnath-heres (*portion of the sun*); but the former is probably the correct reading, since a possession thus given to Joshua after the rest of the land was distributed (Josh. xix. 49), would strictly be a portion remaining. This was probably the same with the Timnah of Josephus, the head of a toparchy lying between those of Gophna and Lydda; which seems to be recognised in a place called Tibneh, lying north-west of Gophna on the Roman road to Antipatris.

TIMOTHY, a young Christian of Derbe, grandson of Lois, and son of Eunice, a Jewess, by a Greek father, who was probably a proselyte (Acts xvi. 1; xx. 4). He seems to have been brought up with great care in his family, and to have profited well by the example of the 'unfeigned faith' which dwelt in the excellent women named in 2 Tim. i. 5; iii. 15. The testimonials which Paul received in Lycaonia in favour of this young disciple, induced the apostle to make him the companion of his journeys and labours in preaching the Gospel (Acts xvi. 2, 3; 1 Tim. iv. 12). He became his most faithful and attached colleague; and is frequently named by Paul with truly paternal tenderness and regard. Timothy appears to have been with the apostle at Rome, and to have been, like him, a prisoner there, though liberated before him (Heb. xiii. 23). His subsequent history is, however, unknown. It appears from 1 Tim. i. 3, that when Paul went into Macedonia he left Timothy in charge of the church at Ephesus, and there are indications that he was still at Ephesus when the apostle was (as usually understood) a second time captive at Rome, and without hope of deliverance (1 Tim. iii. 14). The tradition is that Timothy retained the charge of the church at Ephesus till his death, and eventually suffered martyrdom in that city.

TIMOTHY, EPISTLES TO. The authenticity of these epistles is proved by the testimony of the earliest ecclesiastical writers, Barnabas, Clement of Rome, Polycarp, Ignatius, and many others; and though modern German critics have attempted to set aside this weighty mass of external evidence by minute and carping critical objections, they have completely failed. With regard to the time when they were composed, it is clear that the first epistle was written not long after Paul had left Ephesus for Macedonia (ch. i. 3), and in all probability after the departure from Ephesus mentioned Acts xxi. 1. With respect to the second epistle, it is certain

that it was written at Rome, and while Paul was a prisoner there (i. 8-16; ii. 9; i. 17; iv. 21). Whether this was during his first or second imprisonment has been matter of dispute, and though not without difficulties, the opinion that this epistle was written during his second imprisonment seems upon the whole the preferable.

The design of the first epistle is partly to instruct Timothy in the duties of that office with which he had been intrusted, partly to supply him with credentials to the churches which he might visit, and partly to furnish through him guidance to the churches themselves. It may be divided into *three* parts, exclusive of the introduction (i. 1, 2), and the conclusion (vi. 20, 21). In the *first* of these parts (i. 3-20) the apostle reminds Timothy generally of his functions, and especially of the duties he had to discharge in reference to certain false teachers, who were anxious to bring the believers under the yoke of the law. In the *second* (ii.-vi. 2) he gives Timothy particular instructions concerning the orderly conducting of divine worship, the qualifications of bishops and deacons, and the proper mode of behaving himself in a church. In the *third* (vi. 3-19) the apostle discourses against some vices to which the Christians at Ephesus seem to have been prone.

The design of the second epistle is partly to inform Timothy of the apostle's trying circumstances at Rome, and partly to utter a last warning voice against the errors and delusions which were corrupting and disturbing the churches. It consists of an inscription (i. 1-5); of a series of exhortations to Timothy, to be faithful in his zeal for sound doctrine, patient under affliction and persecution, careful to maintain a deportment becoming his office, and diligent in his endeavours to counteract the unhalloved efforts of the false teachers (i. 6; iv. 8); and a conclusion in which Paul requests Timothy to visit him, and sends the salutations of certain Christians at Rome to Timothy, and those of the apostle himself to some believers in Asia Minor.

TIN. If this substance be really intended by the Hebrew word, which seems somewhat doubtful, it is first mentioned among the metals which were to be purified by fire found among the prey taken from the Midianites (Num. xxxi. 22). It is also named among the articles of commerce which the Tyrians received from Tarshish (Ezek. xxvii. 12); and a levelling instrument of this metal used by builders is noticed in Zech. iv. 10. The Hebrew word also denotes the alloy of lead, tin, and other inferior metals, combined with silver in the ore and separated from it by smelting (Isa. i. 25).

TINSHMETH (**SWAN**, Lev. xi. 18; Deut. xiv. 16). There is good reason to believe that this is not the true meaning of the word thus rendered in our common version, for the swan is not a bird which, in migrating to the south, even during the coldest seasons, appears to proceed further than France or Spain, though no doubt individuals may be blown onwards in hard gales to the African shore. In all probability the bird referred to is the porphyryion or purple gallinula. The porphyryion is superior in bulk to our water-hen or gallinula, has a hard crimson shield on the forehead, and flesh-coloured legs; the head, neck, and sides are of a beautiful

turquoise blue, the upper and back parts of a dark but brilliant indigo.

The porphyryion is a remarkable bird, abounding in the southern and eastern parts of Europe and Western Asia, feeding itself standing on one leg, and holding its food in the claws of the other. It was anciently kept tame in the precincts of pagan temples, and therefore perhaps was unmarked unclean, as most, if not all, the sacred animals of the heathens were.

318. [The Porphyryion.]

TIPH'SAH, a large and opulent city on the western bank of the Euphrates. It is doubtless the same as the Thapsacus of the Greeks and Romans. The name means 'ford'; and the town was, in fact, situated at the lowest fording-place of the Euphrates; whence it became the point of trading-communication between the natives east and west of the river. On this account, and as commanding the ford, the possession of the place was deemed of great importance by the ruling powers of the day. This circumstance explains the contentions of the kings of Syria and Egypt respecting Carchemish, which was a strong place a little lower down the river, at the junction of the Chaboras. Solomon obtained possession of Tiphshah (1 Kings iv. 24), probably in connection with the series of operations (of which the building or fortification of Tadmor was one) adopted by him for the purpose of drawing the Eastern trade into his own dominions [**SOLOMON**; **TADMOR**]. Nothing remains of Tiphshah at the present day except the name; but the site is supposed to be marked by the village of Ed-Deyr.

TIRHA'KAH, king of Cush (Ethiopia in the Common Version), who in the days of Hezekiah came out against Sennacherib when he was making war on Judah (2 Kings xix. 9; Isa. xxxvii. 9). He is the Tarakos of Manetho, the third king of the twenty-fifth dynasty, and the Tearkon of Strabo (xv. 687), with whom the twenty-fifth Ethiopic dynasty came to an end. His successful opposition to the power of Assyria is recorded on the walls of a Theban temple, for at Medinet Abu are the figure and the name of this king and the captives he took. That Tirhakah ruled at Napata, now Gebel Barkel, and in the Thebaid at the same period, is proved by the additions he made to the temples of Thebes, and by the monuments he built in Ethiopia. That he was a very potent monarch is evident from his defeat of Sennacherib, as well as from the monuments he has left both in Egypt and

Ethiopia, and his maintenance of the Egyptian possessors in Asia.

TIR'SHATA, a title borne by Zerubbabel and Nehemiah as Persian governors of Judea (Esra ii. 63; Neh. vii. 65, 70; viii. 9; x. 2). It seems to come from the Persian *torsh*, 'severe,' and, in that case, would be equivalent to 'your severity:' comp. 'dread sovereign.'

TIR'ZAH, an ancient Canaanitish city (Josh. xii. 24), pleasantly situated (Cant. vi. 4), which Jeroboam made the capital of his kingdom, and which retained that rank till Samaria was built by Omri (1 Kings x.; xv. 21; xvi. 24; 2 Kings xv. 4). The site is entirely unknown.

TISH'BITE, the Gentile name of Elijah—'Elijah the Tishbite' (1 Kings xvii. 1, 2; xxi. 17)—derived from a town called Tishbi in the tribe of Naphtali, the name of which occurs only in the apocryphal book of Tobit, i. 2.

TISKI was the first month of the civil, and the seventh month of the ecclesiastical year, in which fell the Festival of Atonement and that of Tabernacles. In 1 Kings viii. 2, it is termed the month of Ethanim, that is, the month of streaming rivers, which are filled during this month by the autumnal rains. It corresponds with our September—October.

TITHE, &c. (Lev. xxvii. 30, 31, 32), derived from the word signifying 'ten,' which also means 'to be rich;' hence ten is the *rich* number, because including all the units under it. This number seems significant of completeness or abundance in many passages of Scripture. Jacob said unto Laban, 'Thou hast changed my wages these ten times' (Gen. xxxi. 41); 'Am not I better to thee than ten sons?' (1 Sam. i. 8); 'These ten times have ye reproached me' (Job xix. 3); 'Thy pound hath gained ten pounds' (Luke xix. 16), &c. This number, as the end of less numbers and beginning of greater, and as thus signifying perfection, sufficiency, &c., may have been selected for its suitability to those Eucharistic donations to religion, &c., which mankind were required to make probably in primeval times. Abraham gave to Melchizedec, 'a priest of the most high God,' a tenth of all the spoils he had taken from Chedorlaomer (Gen. xiv. 20; Heb. vii. 4). The incidental way in which this fact is stated, seems to indicate an established custom. Jacob's vow (Gen. xxviii. 22) seems simply to relate to compliance with an established custom; his words are, literally, 'And all that thou shalt give me, I will assuredly tithe it unto thee.' The Mosaic law, therefore, in this respect, as well as in others, was simply a reconstitution of the patriarchal religion. Thus, the tenth of military spoils is commanded (Num. xxxi. 31). For the law concerning tithes generally, see Lev. xxvii. 30, &c., where they are first spoken of as things already known. These tithes consisted of a tenth of all that remained after payment of the first-fruits of seeds and fruits, and of calves, lambs, and kids. This was called the first tithe, and belonged to God as the sovereign and proprietor of the soil (Lev. xxvii. 30-32; 2 Chron. xxxi. 1, 6). The proceeds of this rent, God, as king, appropriated to the maintenance and remuneration of his servants the Levites, to be paid to them in their several cities (Num. xviii. 21-24). A person might redeem or commute in money his tithes of seeds and fruits, by adding the value

of a fifth part to them (Lev. xxvii. 31). Out of this tithe the Levites paid a tenth to the priests, called the tithe of tithes, or tithe of holy things (Num. xviii. 26-28); and another tithe of the produce of the fields belonging to their cities (ver. 29). The first tithe being paid, the proprietor had to set apart out of the remainder a second tithe, to be expended by him in the courts of the tabernacle, in entertaining the Levites and his own family, &c. (Deut. xii. 18). If the trouble and expense of transporting this second tithe in kind to the tabernacle were too great, he might turn it into money, but this he must take in person, and expend there for the appointed purpose (ver. 24-28). It seems that the people were left to their own consciences in regard to the just payment of their tithes, subject, however, to the solemn declaration 'before the Lord,' which they were required to make concerning it every third year (Deut. xxvi. 12-16). Possibly the Levites were not prohibited from taking due care that they received their rights, inasmuch as in later times, at least, they paid their own tithes to the priests under sacerdotal supervision (Neh. x. 58).

Upon examination it will be found that the payments required by Moses of the Jewish people were exceedingly moderate, and were no doubt easily borne till they chose to incur the additional expenses of a regal establishment. It pleased God, while sustaining the relation to them of sovereign and proprietor of the land, to require the same quit-rent of one-tenth which was usually paid to the kings in other nations (1 Sam. viii. 14, 15, 17; comp. 1 Macc. ii. 35). Aristotle speaks of it as 'an ancient law' at Babylon. In Egypt one-fifth was paid to the king, which was more than the first-fruits and first and second tithes put together. This quit-rent God appointed to be paid to the Levites for their subsistence, since their festive share in the second tithes can hardly be accounted part of their income. They had, as a tribe of Israel, an original right to one-twelfth of the land, for which they received no other compensation than the tithes, subject to the sacerdotal decimation, their houses, and glebes. In return for these, they consecrated their time and talents to the service of the public [Levites]. The payment of tithes, &c., was re-established at the restoration of religion by Hezekiah (2 Chron. xxxi. 5, 6, 12), and upon the return from the captivity by Nehemiah (x. 37; xii. 44; xiii. 5). The prophet Malachi reproves the people for their detention of the tithes, &c., for which they had brought a divine chastisement by famine upon themselves, and promises a restoration of plenty upon their amendment (iii. 8-12; comp. iii. 9; Eccles. xxxv. 9). In our Saviour's time the Pharisees scrupulously paid their tithes, but neglected the weightier matters of the law. His comment on their conduct conveys no censure on their punctiliousness on this point, but on their neglect of more important duties: 'These ought ye to have done, and not to leave the other undone' (Matt. xxiii. 23; Luke xviii. 12).

TITUS, a Christian teacher, and companion and fellow-labourer of St. Paul. He was of Greek origin, but was converted by the apostle, who therefore calls him his own son in the faith (Gal. ii. 3; Tit. i. 4). He was one of the persons sent by the church of Antioch to Jerusalem

to consult the apostles, and it was not judged necessary that he should receive circumcision (Acts xv. 2; Gal. ii. 1). After a time we find him in company with Paul at Ephesus, whence he was sent to Corinth (2 Cor. xii. 18), where he was well received, discharged with discretion the task confided to him, and declined to suffer the church to defray his expenses (2 Cor. viii. 13, sq.; xii. 18). He then proceeded to Macedonia, and at Philippi rejoined his master, who had vainly been expecting him at Troas (2 Cor. vii. 6; ii. 12, 13). He was then employed by Paul in preparing the collection for the poor saints in Judæa, and, as an incident of this mission, became the bearer of the second epistle to the Corinthians (2 Cor. viii. 16, 17, 23). On a subsequent journey, Titus was left by the apostle in Crete, to establish and regulate the churches in that island (Tit. i. 5), and he was still there when he received the epistle from St. Paul which bears his name (Tit. iii. 12). He is therein desired to join the apostle at Nicopolis; and it is presumed that he did so, and afterwards accompanied him in his last journey to Rome, whence he was sent into Dalmatia (2 Tim. iv. 10). Tradition states that Titus eventually returned to Crete, and died there at an advanced age.

TITUS, EPISTLE TO. The genuineness of this Epistle is attested by a large body of evidence, and seems never to have been questioned, except by the heretic Marcion, and that upon the most frivolous grounds, until, in recent times, it was attacked by Eichhorn and De Wette. But their objections are of such a nature that it is unnecessary to enter upon any examination of them here.

It has been supposed, on apparently good grounds, that the apostle wrote this epistle at Ephesus shortly after he had visited Crete (ch. i. 5), and when he was about to spend the winter in Nicopolis (iii. 12). From the close resemblance between this epistle and the first epistle to Timothy, we are naturally led to conclude that both must have been written while the same leading ideas and forms of expression were occupying the apostle's mind.

The task which Paul had committed to Titus, when he left him in Crete, was one of no small difficulty. The character of the people was unsteady, insincere, and quarrelsome; they were given to greediness, licentiousness, falsehood, and drunkenness, in no ordinary degree; and the Jews who had settled among them appear to have even gone beyond the natives in immorality. Among such a people it was no easy office which Titus had to sustain when commissioned to carry forward the work Paul had begun, and to set in order the affairs of the churches which had arisen there, especially as heretical teachers had already crept in among them. Hence Paul addressed to him this Epistle, the main design of which is to direct him how to discharge with success the duties to which he had been appointed. For this purpose the apostle dilates upon the qualifications of elders, and points out the vices from which such should be free (ch. i.).

He then describes the virtues most becoming in aged persons, in the female sex, in the young, in servants, and in Christians generally (ch. ii.). From this he proceeds to enjoin obedience to civil rulers, moderation, gentleness, and the avoidance

of all idle and unprofitable speculations (iii. 1-11). He then invites Titus to join him at Nicopolis, commends to him certain brethren who were about to visit Crete, and concludes with the apostolic benediction (ver. 12-15).

TOB, a region or district beyond the Jordan, into which Jephthah withdrew when expelled from Gilead (Judg. xi. 5). As the name occurs nowhere else, it is impossible to determine with certainty its position.

TOBI'AH, a base Samaritan, who, having raised himself from a state of slavery to be a trusted favourite of Sanballat, did his utmost to gratify his master by resisting the proceedings of Nehemiah in rebuilding the walls of Jerusalem. His dishonest practices and threats proved alike unsuccessful; but during the temporary absence of Nehemiah, Tobiah succeeded, with the aid of his relative Eliashib, the priest, in getting himself comfortably and splendidly established in 'a great chamber in the house of God' (ch. xiii. 4). But his glory was short-lived. Nehemiah returned, and caused him and his household-stuff to be ignominiously cast out of the temple. This is the last that we know of this member of that vile class who are ready and unscrupulous tools in the hands of their superiors for any dishonourable undertaking.

TO'BIT, BOOK OF [APOCRYPHA], one of the deuterocanonical books, containing the private history of a venerable and pious old man of this name, who was carried captive into Assyria by Shalmaneser.

Nothing is known with certainty respecting either the author or the age of the book. Professor Stewart ascribes it to an early period of the exile. All ancient writers looked upon the narrative as historical and authentic. But the question has been raised in modern times, whether the book is to be regarded as a true history or a moral fiction. Luther was the first who adopted the latter view; others have maintained that the book is partly historical, partly mythical. Gutmann, a modern Jewish Rabbi, adopts the opinion that it is a fiction founded on facts.

Its authority in the early Christian church is beyond question.

TOGARMAH is the Hebrew name of Armenia. The Armenians consider themselves to be descended from Gomer, through Torgom, and therefore they call themselves the *house of Torgom*. The sons of Gomer were Ashkenaz, Riphath, and Togarmah (Gen. x. 3; 1 Chron. i. 6).

Armenia was, according to Strabo, distinguished by the production of good horses. This account harmonizes with the statement that the house of Togarmah traded in the fairs of Tyre in horses, and horsemen, and mules (Ezek. xxvii. 14). The situation of Togarmah was north of Palestine: 'Gomer and all his bands; the house of Togarmah of the north quarters' (Ezek. xxxviii. 6).

TOMB. [BURIAL.]

TONGUE is used, 1. *literally*, for the human tongue. 'Every one that lappeth the water with his tongue, as a dog lappeth' (Judg. vii. 5). Various explanations have been offered, why Gideon's three hundred followers should have been selected because they lapped water out of their hands, standing or perhaps moving onward, while they who stayed and 'bowed down to drink' were rejected. Josephus says, that the former

thereby showed their timorousness and fear of being overtaken by the enemy, and that these poor-spirited men were chosen on purpose to illustrate the power of God in the victory (*Antiq.* v. 6. 3.) 2. It is *personified*. 'Unto me every tongue shall swear,' that is, every man (*Isa.* xiv. 23; comp. *Rom.* xiv. 11; *Phil.* ii. 11; *Isa.* liv. 17.) 3. It is used by *metonymy* for speech generally. 'Let us not love in tongue only' (1 John iii. 18). 4. For a *particular language* or dialect, spoken by any particular people. 'Every one after his tongue' (*Gen.* x. 5, 20, 31). 5. For the *people speaking a language* (*Isa.* lxvi. 18; *Dan.* iii. 4, 7, &c.; *Rev.* v. 9). 6. It is used *figuratively* for anything resembling a tongue in shape. Thus, 'a wedge of gold,' literally a 'tongue' (*Josh.* vii. 21, 24). The miraculous gift of tongues, as well as its corresponding gift of interpretation, has been the subject of two opinions. It was promised by Christ to believers (*Mark* xvi. 17); and fulfilled at Pentecost (*Acts* ii. 4, 11). In 1 Cor. xiv. 2, 39, we have 'to pray in a tongue' (ver. 14), 'to speak words in a tongue' (ver. 19). The obvious explanation of most of these passages is, to speak in *other living languages*, the supernatural acquisition of which demonstrated the truth of the Gospel, and was a means of diffusing it. Some verses however in 1 Cor. xiv. have given rise to the notion of a *strange, ecstatic, inspired, unearthly language*; but these all admit of a different solution. In ver. 2, 'he who speaketh in a tongue' evidently means, he who speaks some foreign living language; the supplied word 'unknown' in the Auth. Vers. is needless, and misleads the English reader. It is further said that 'he edifieth himself' (which, as Macknight justly pleads, required that he should understand himself), and edifieth the church also if an interpreter were present (ver. 28). The key to the difficulties of this subject is the supposed absence of an inspired interpreter (ver. 28), in which case the gift would not be *profitable* to the hearers. The gift of tongues was to cease (1 Cor. xiii. 8).

TONGUES, CONFUSION OF. The part of the primeval history which relates this fact, so remarkable and influential upon the subsequent fortunes of mankind, is contained in *Gen.* xi. 1-10. This narrative, which is given in the style best adapted to the comprehension of mankind in the infantile state of our race, may, we conceive, be resolved into a statement to this effect:—

An orderly and peaceful distribution and migration of the families descended from Noah had been directed by divine authority, and carried into general effect. But there was a part of mankind who would not conform themselves to this wise and benevolent arrangement. This rebellious party, having discovered a region to their taste, determined to remain in it. They proceeded to erect a lofty edifice, which was to be a *signal house*, a rallying point, and probably to erect around it groups of habitations, not mere tents, but houses with brick walls, so that the adventurers had both a city and a tower. This was an act of rebellion against the divine government. The omniscient and righteous God therefore frustrated it, by inflicting upon them a remarkable affection of the organs of speech, which produced discord and separation.

II. The date of this event we cannot satisfac-

torily place so early as at 100 years after the flood, as it is in the commonly received chronology. Every view that we can take of the previous history inclines us to one of the larger systems, that of the Septuagint, which gives 530 years, or that of Josephus, adopted with a little emendation by Dr. Hales, which gives 600 years; and thus we have at least five centuries for the intervening period.

III. Upon the question, Whether all of mankind were engaged in this act of concerted disobedience, or only a part? we confess ourselves unable to adduce irrefragable evidence on either side, but we think that there is a great preponderance of argument on the part of the latter supposition.

IV. Admitting, however, our inability to determine, with absolute certainty, on which side of this alternative the truth lies, no difference accrues to the subject of this article. What were the phenomena of the case? In *WHAT* did the Confusion of Tongues *actually consist*? For the answer a considerable variety of opinions has been promulgated.

But the hypothesis of a change in the pronunciation, leading to diversified results, some of which might be of permanent influence, appears to us to have the most of probability and reason on its side.

TOPAZ, a precious stone; one of those which were in the breastplate of the high-priest (*Exod.* xxviii. 17), and the origin of which is referred to Cush (*Job* xxviii. 19). It has been identified with the gem to which the moderns have applied that name. This is a precious stone, having a strong glass lustre. Its prevailing colour is wine-yellow of every degree of shade. The dark shade of this colour passes over into carnation red, and sometimes, although rarely, into lilac; the pale shade of the wine-yellow passes into greyish; and from yellowish-white into greenish-white and pale green, tinctal and celadon-green. It may thus be difficult to determine whether the stone in question was the yellow topaz; but that it was a topaz there is little reason to doubt.

It is clear that the stone was highly prized by the Hebrews. Job declares that wisdom was more precious than the topaz of Cush (*Job* xxviii. 19); and as the name Cush includes Southern Arabia and the Arabian Gulf, the intimation coincides with the statement of Pliny and others, that the topazes known to them came from the Topaz Island in the Red Sea, whence they was probably brought by the Phœniciana. In *Ezek.* xxviii. 13, the topaz is named among the precious stones with which the king of Tyre was decked.

TOPHET, a place very near to Jerusalem, on the south-east, in the valley of the children of Hinnom, where the ancient Canaanites, and afterwards the apostate Israelites, made their children to pass through the fire to Moloch (comp. *Pi.* cvi. 38; *Jer.* vii. 31). After the return from the captivity, the Jews resumed the ancient name for the whole valley, viz., the valley of Hinnom; and in order to perpetuate the disgrace of idolatry, they made it the common receptacle of the filth, &c. of the city, in which 'fires' were *continually* kept burning, to consume the carcasses of animals, executed criminals, &c., the uncon-

sumed portions of which, as well as the off-scourings in general, became the nidus of insects, whose larvae, or 'worms,' revelled in the corruption. These circumstances furnished the most apt representation to the Jewish mind of future punishment.

TOWNS. We use the term in its general signification, so as to embrace any assemblage of inhabited human dwellings of larger size than a hamlet or a village.

The formation of towns was obviously a work of time, and they were, no doubt, originally built around a stronghold or fort, to which the inhabitants looked for protection against the incursions of enemies. In the time of the Patriarchs we find towns existing in Palestine which were originally surrounded with fortifications, so as to make them 'fenced cities.' In these dwelt the agricultural population, who by means of these places of strength defended themselves and their property from the nomad tribes of the neighbouring desert, who then, as they do now, lived by plunder. Nor were works of any great strength necessary. In Palestine at the present day, while walls are in most parts an indispensable protection, and agriculture can be advantageously prosecuted only so far as sheltered by a fortified town, erections of a very slight nature are found sufficient for the purpose, the rather because the most favourable localities offer themselves on all sides, owing to the natural inequality of the ground.

Of the ancient method of building in towns and cities we have no accurate knowledge. But the law of sameness which prevails so rigidly in Eastern countries, gives us an assurance that a modern town in Palestine may be roughly taken as a type of its ancient predecessors.

At the gates of the town, which were frequented as the court of justice, the town's market, the rendezvous for loungers, news-mongers, pleasure-seekers, there were wide open places of greater or less dimensions, where on important occasions the entire population assembled for consultation or for action (Neh. viii. 1, 16; 2 Chron. xxxii. 6; 2 Sam. xxi. 12; Job xxix. 7; 2 Kings vii. 1). The streets were not so narrow as streets generally are in modern Oriental towns. Their names were sometimes taken from the wares or goods that were sold in them: thus in Jer. xxxvii. 21, we read of 'the bakers' street.' The present bazaars seem to be a continuation of this ancient custom. The streets of Jerusalem at least were paved; but the streets of most cities of Palestine would not need paving, in consequence of the rocky nature of the foundations on which they lay. Herod the Great laid an open road in Antioch with polished stone. In regard to the earlier periods, we find only a notice to the effect that Solomon caused the fore-court of the temple to be laid with flags. Besides paved streets, Jerusalem before the exile had an extensive system of watercourses or aqueducts, which seems to have been rendered necessary by the natural supply having been limited to one or two spots in the immediate vicinity. The population of towns cannot now be ascertained with any degree of accuracy, for the materials are not only scanty and disconnected, but in a measure uncertain. Respecting the government of towns, we have no detailed information relating to the ante-exilian

periods, though it was probably in the hands of the elders; and in Deut. xvi. 18, Moses commands, 'Judges and officers shalt thou make thee in all thy gates, and they shall judge the people with just judgment.' In the post-exilian era magistrates occur under the name of Council, at whose head was a president or mayor.

TRACHONITIS was, in the days of the Herodian dynasty, the name of the country situated between the Antilibanus and the Arabian mountains south of Damascus and west of the provinces of Batanea, Gaulonitis, Iturea, and Auranitis, under about the thirty-third degree of northern latitude. It is at present called *Ledja*. The eastern range of mountains is now called *Jebel Maanai*, and contains great caverns in chalk rocks. The southern portions of the ancient Trachonitis, or the present *Ledja*, consist chiefly of basalt rocks.

TRANSC (Gen. ii. 21, &c.), a supernatural state of body and mind, the nature of which has been well conjectured by Doddridge, who defines it—'Such a rapture of mind as gives the person who falls into it a look of astonishment, and renders him insensible of the external objects around him, while in the meantime his imagination is agitated in an extraordinary manner with some striking scenes which pass before it and take up all the attention.'

TRANSFIGURATION. One of the most wonderful incidents in the life of our Saviour upon earth, and one so instructive that we can never exhaust its lessons, is the Transfiguration. The apostle Peter, towards the close of his life, in running his mind over the proofs of Christ's majesty, found none so conclusive and irrefragable as the scenes when he and others were with him in the holy mount, as eye-witnesses that he received from God the Father honour and glory, when there came such a voice to him from the excellent glory, 'This is my beloved Son, in whom I am well pleased.' If we divide Christ's public life into three periods—the first of miracles to prove his divine mission, the second of parables to inculcate virtue, and the third of suffering, first clearly revealed and then endured, to atone for sin—the transfiguration may be viewed as his baptism or initiation into the third and last. He went up the mount of transfiguration on the eighth day after he had bidden every one who would come after him take up his cross, declaring that his kingdom was not of this world, that he must suffer many things, and be killed, &c.

The mount of transfiguration was long thought to have been Mount Tabor; but as this height is fifty miles from Cæsarea Philippi, where Jesus last taught, it is now supposed to have been a mountain much less distant, namely, Mount Hermon.

The final causes of the transfiguration, although in part wrapped up in mystery, appear to be in part plain. Among its intended lessons may be the following:—First, to teach that, in spite of the calumnies which the Pharisees had heaped on Jesus, the old and new dispensations are in harmony with each other. To this end the author and the restorer of the old dispensation talk with the founder of the new, as if his scheme, even the most repulsive feature of it, was contemplated by theirs, as the reality of which they had promulgated only types and shadows.

Secondly, to teach that the new dispensation was superior to the old. Moses and Elias appear as inferior to Jesus, not merely since their faces did not, so far as we know, shine like the sun, but chiefly because the voice from the excellent glory commanded to hear *him*, in preference to them. Thirdly, to gird up the energies of Jesus for the great agony which was so soon to excruciate him. Fourthly, to comfort the hearts of the disciples, who, being destined to see their master, whom they had left all to follow, nailed to a cross, to be themselves persecuted, and to suffer the want of all things, were in danger of despair. But by being eye-witnesses of his majesty they became convinced that his humiliation, even though he descended into the place of the dead, was voluntary, and could not continue long.

TRIAL. [PUNISHMENT.]

TRIBES.—the name of the great groups of families into which the Israelitish nation, like other Oriental races, was divided. The modern Arabs, the Bedouins, and the Berbers, and also the Moors on the northern shores of Africa, are still divided into tribes. The clans in Scotland are also analogous to the tribes of the ancient Israelites. In Gen. xlix. the tribes are enumerated according to their progenitors; viz., 1, REUBEN, the first-born; 2, SIMEON, and 3, LEVI, instruments of cruelty; 4, JUDAH, whom his brethren shall praise; 5, ZABULON, dwelling at the haven of the sea; 6, ISSACHAR, the strong; 7, DAN, the judge; 8, GAD, whom a troop shall overcome, but who shall vanquish at last; 9, ASHER, whose bread shall be fat; 10, NAPHTALI, giving goodly words; 11, JOSEPH, the fruitful bough; 12, BENJAMIN, the wolf; all these were originally the twelve tribes of Israel. In this enumeration it is remarkable that the subsequent division of the tribe of Joseph into the two branches of Ephraim and Manasseh, is not yet alluded to. After this later division of the very numerous tribe of Joseph into the two branches of Ephraim and Manasseh had taken place, there were, strictly speaking, thirteen tribes. It was, however, usual to view them as comprehended under the number twelve, which was the more natural, since one of them, namely, the caste of the Levites, did not live within such exclusive geographical limits as were assigned to the others after they exchanged their nomadic migrations for settled habitations, but dwelt in towns scattered through all the other twelve tribes. Concerning the arrangement of these tribes on their march through the wilderness, in their encampments around the ark, and in their occupation of the land of Canaan, see the cognate articles, such as EXODUS, ENCAMPMENT, GENEALOGIES, LEVITES, WANDERING, and the names of the several tribes.

TRIBUTE, a tax which one prince or state agrees, or is compelled, to pay to another, as the purchase of peace, or in token of dependence.

The Israelites were at various times subjected to heavy taxes and tributes by their foreign conquerors. After Judaea was reduced to a Roman province, a new poll of the people and an estimate of their substance were taken by command of Augustus, in order that he might more correctly regulate the tribute to be exacted. This was a capitation-tax levied at so much a head, and imposed upon all males from 14, and all females from 12, up to 65 years of age.

To oppose the levying of this tribute Judas the Gaulonite raised an insurrection of the Jews, asserting that it was not lawful to pay tribute to a foreigner, that it was a token of servitude, and that the Jews were not allowed to acknowledge any for their master who did not worship the Lord. They boasted of being a free nation, and of never having been in bondage to any man (John viii. 33). These sentiments were extensively promulgated, but all their efforts were of no avail in restraining or mitigating the exactions of their conquerors.

The Pharisees who sought to entangle Jesus in his talk, sent unto him demanding whether it was lawful to give tribute unto Caesar or not; but knowing their wicked designs, he replied, 'Why tempt ye me, ye hypocrites?' 'Render unto Caesar the things which are Caesar's, and unto God the things that are God's.'

The apostles Peter and Paul severally recommended submission to the ruling powers, and inculcated the duty of paying tribute: 'tribute to whom tribute is due' (Rom. xiii. 1-8; 1 Peter ii. 13).

TRIBUTE-MONEY. The money collected by the Romans in payment of the taxes imposed upon the Jews. The phrase may apply to money of any description, coined or uncoined. The piece shown to our Saviour at his own request was a Roman coin, bearing the image of one of the Cæsars, and must have been at that time current in Judæa, and received in payment of the tribute in common with other descriptions of money. There is no reason to suppose that the tribute was collected exclusively in Roman coins, or that the tribute-money was a description of coin different from that which was in general circulation [MONEY].

TRO'AS, more fully Alexandria-Troas, a city of northern or Lesser Mysia, in Asia Minor, situated on the coast at some distance southward from the site of Troy, upon an eminence opposite the island of Tenedos. Paul was twice at this place (Acts xvi. 8, 9; xx. 6; 2 Cor. ii. 12; 2 Tim. iv. 13). The name Troas, or Troad, strictly belonged to the whole district around Troy. Alexandria-Troas is represented by the present Eski-Stamboul, and its ruins are now concealed in the heart of a thick wood of oaks, with which the country abounds.

TROGYLIUM, a town and promontory on the western coast of Asia Minor, opposite Samos, at the foot of Mount Mycale (Strabo, xiv. p. 636). It is mentioned in Acts xx. 15.

TROPHIMUS, a disciple of Ephesus, who accompanied St. Paul into Judæa, and was the innocent cause of the dangers which the apostle there encountered; for having been recognised by some Jews of Asia Minor, and seen in company with Paul, they took occasion to accuse Paul of having brought Greeks into the temple (Acts xx. 4; xxi. 29). His name does not again occur till after, seemingly, the first imprisonment of Paul. In one of the ensuing journeys he remained behind at Miletus sick (2 Tim. iv. 20). This circumstance is regarded as furnishing a strong fact to show that Paul was twice imprisoned at Rome; for Trophimus, in the first passage to Miletus (Acts xx. 15), was not left behind, but proceeded to Judæa; after which we do not lose sight of Paul for one day, and know that he was

not again at Miletus before his first imprisonment at Rome.

TRUMPET. [MUSICAL INSTRUMENTS.]

TRUMPETS, FEAST OF. [FESTIVALS.]

TRYPHENA and TRYPHOSA, female disciples at Rome, who laboured to extend the Gospel and to succour the faithful (Rom. xvi. 12). Their history is unknown; but, from their names, they were probably sisters.

TU'BAL, a son of Japhet, and a people descended from him (Gen. x. 2; Isa. lxvi. 19; Ezek. xxvii. 13; xxxii. 26; xxxviii. 2, 3; xxxix. 1), supposed to have been settled in Asia Minor near the Euxine [NATIONS, DISPERSION OF].

TU'BAL-CA'IN, son of Lamech and Zillah, to whom the invention of the art of forging metals is ascribed in Gen. iv. 22 [SMITH].

TURTLE-DOVE occurs in Gen. xv. 9; Lev. i. 14; v. 7, 11, &c.; Luke ii. 24.

319.

The birds of this subgenus are invariably smaller than pigeons properly so called; they are mostly marked with a patch of peculiarly coloured scutellated feathers on the neck, or with a collar of black, and have often other markings on the smaller wing-covers. The species *Columba Turtur*, with several varieties merely of colour, extends from the west of Europe through the north of Africa, to the islands south of China. The turtle-dove of Palestine is specifically the same; but there is also a second, we believe local: both migrate further south in winter, but return very early; when their cooing voice in the woods announces the spring. In the rites of the Hebrew law, full-grown or old turtle-doves might be offered in pairs, but only the young of pigeons not full grown. They were the usual offering of the poor, a circumstance, Bochart remarks, indicating the humble station of the Virgin Mary, since at her purification she offered a pair of turtle-doves instead of a lamb.

TYCHICUS is the name of an assistant and companion of the Apostle Paul. He accompanied Paul on his third missionary journey (Acts xx. 4), and was, at a later period, the bearer of Paul's letter from Rome to the Colossians. Paul styled him a beloved brother, faithful minister, and fellow-servant in the Lord, who should declare all his state unto the Colossians, to whom he was sent that he might know their estate and comfort their hearts (Col. iv. 7, 8). For a similar purpose Tychicus was sent to the Ephesians also (Eph. vi. 21, 22; 1 Tim. iv. 12), and employed in various missionary journeys (Tit. iii. 12). According to tradition, Tychicus was made bishop of Chalcedon.

TYPE. The best definition of this word, in its theological sense, is that which Heb. x. 1 supplies:

a type is a shadow of good things to come, or as the apostle elsewhere expresses it (Col. ii. 17), 'a shadow of things to come; but the body is of Christ.' Adopting this definition as the correct one, we proceed briefly to point out the different types by which God was pleased in various ages to adumbrate the person and work of the Redeemer.

1. Before the law, Adam, Enoch, Noah, Melchizedec, Abraham, Isaac, and Joseph were eminently typical of Christ. Again, under the law, Moses, Joshua, Samson, David, Solomon, Elijah, Elisha, Jonah, Zerubbabel, and Joshua the high priest, were, in many points, singularly types of Christ.

2. The first-born, the Nazarites, prophets, priests, and kings, were typical orders of persons.

3. Under the head of things typical may be noticed: Jacob's ladder, the burning bush, the pillar of cloud and fire, the manna, the rock, and the brazen serpent.

4. Actions typical were: the deliverance out of Egypt, passage of the Red sea, sojourn in the wilderness, passage over the Jordan, entrance into Canaan, and restoration from Babylon.

5. Rites typical were: circumcision, various sacrifices, and sundry purifications.

6. Places typical were: the land of Canaan, the cities of refuge, the tabernacle, and the temple.

The above types were designed to shadow forth Christ and the blessings of his salvation; but there were others also which pointed at our miseries without him. There were ceremonial uncleannesses; the leprosy, for instance, was a type of our natural pollution; and Hagar and Ishmael a type of the covenant of works.

As there must be a similarity or analogy between the type and the antitype, so there is also a disparity or dissimilitude between them.

It is not in the nature of type and antitype that they should agree in all things; else, instead of similitude, there would be identity. Hence the apostle, whilst making Adam a type of Christ, yet shows how infinitely the latter excelled the former (1 Cor. xv. 47). So the priests or old were types of Christ, though he infinitely excelled them both as to his own person and as to the character of his priesthood (see Heb. vii., viii., ix., and x.).

TYRAN'NUS, a sophist or rhetorician of Ephesus, who kept one of those schools of philosophy and eloquence so common at that period. St. Paul preached for two years daily in his school after quitting the synagogue (Acts xix. 9). This proves that the school was Greek, not Jewish. It does not appear whether Tyrannus was himself a convert or not; for it may be that he let to the apostle the house or hall which he used; but it is more pleasant to suppose that he was a convert, and that the apostle was hospitably entertained by him and obtained the use of the hall in which he himself taught.

TYRE. The original position of this famous city was on the eastern coast of the Mediterranean, about midway between Egypt and Asia Minor, near the north-western frontier of Palestine. It was a colony of Zidon, and was founded before the records of history.

As early as the eleventh century before the advent of Christ, the Tyrians had become famous for skill in the arts. About 1142 B.C. (2 Sam. v. 11), their king Hiram sent cedar-trees to Jerusalem, and workmen who built David a house. A

generation later, when Solomon, preparing to build the temple, sent to the same monarch for similar assistance, he said to him (1 Kings v. 6), 'Thou knowest that there is not among us any that can skill to hew timber like unto the Sidonians.' He also (1 Kings vii. 13) sent and fetched Hiram out of Tyre, a widow's son, filled with cunning to work all works in brass. In subsequent ages, every king coveted a robe of Tyrian purple, and Ezekiel (xxvii. 16) speaks of 'the multitude of wares of its making,'—emeralds, purple, and brodered work, and fine linen, and coral, and agate.

The commerce of Tyre was commensurate with its manufactures. Situate at the entry of the sea, it became a merchant of the people for many isles. It was inhabited by seafaring men, and was styled by way of eminence 'the merchant-city,' whose merchants were princes, whose traffickers were the honourable of the earth' (Isa. xxiii. 8). Among their other colonies, whither their own feet carried them afar off to sojourn, were Cyprus, Utica, and Carthage. In the 27th chapter of Ezekiel, Syria, Persia, and Egypt, Spain, Greece, and every quarter of the ancient world, are portrayed hastening to lay their most precious things at the feet of Tyre, who sat enthroned on ivory, covered with blue and purple from the isles of Elishah; while the Gammadims were in her towers, hanged their shields upon her walls round about, and made her beauty perfect.

Near the close of the eighth century before the Christian era, Shalmaneser, the king of Assyria who captured Samaria, was led by cupidity to lay siege to Tyre. He cut off its supplies of water which aqueducts had furnished, but wells within the walls supplied their place; and at the end of five years he gave up his blockade as hopeless.

It was against a city such as this, so confident, and to all appearance so justifiably confident, of sitting a queen for ever, that several prophets, particularly Isaiah and Ezekiel, fulminated the denunciations which Jehovah dictated. They prophesied that it should be overthrown by Nebuchadnezzar, that it should revive, but at length be destroyed and never rebuilt.

Before a generation had passed away, according to Josephus, Philostratus, and the Seder Olam, Nebuchadnezzar came up, as had been predicted (Ezek. xxvi. 7-13), making a fort, casting a mound, and lifting up the buckler. At the end of thirteen years (about A.M. 3422) he took the city, and Tyre was forgotten seventy years, as had been foretold by Isaiah (xxiii. 15). In the year B.C. 332 Tyre, which had been rebuilt on an island half a mile from the shore, and had again become a flourishing emporium for all the kingdoms of the world upon the face of the earth, 'and heaped up silver as the dust, and fine gold as the mire of the streets,' was assailed by Alexander the Great in the midst of his Oriental career of conquest. It sustained a siege of seven months, and was at length taken only by means of a mole, by which the island was turned into a peninsula, and rendered accessible by land forces. In constructing this mole Alexander made use of the ruins of the old city, and thereby fulfilled two prophecies (Ezek. xxvi. 12, and ver. 21). So utterly were the ruins of old Tyre thrown into

the sea, that its exact site is confessedly undeterminable.

The mole of Alexander has prevented Tyre from becoming insulated again. The revival of the city was long retarded by the rivalry of the newly-founded Alexandria, and by other causes, but it was at length partially restored, and was often the subject of contest during the crusades. It was in the hands of the Europeans till 1291, when it was finally yielded to the Moslems. Its fortifications, which were almost impregnable, were demolished, and it has never since been a place of consequence. Travellers of every succeeding century describe it as a heap of ruins, broken arches and vaults, tottering walls and towers, with a few starveling wretches housing amid the rubbish. It was half ruined by an earthquake in 1837. One of the best accounts of its present appearance is given by Dr. Robinson, who spent a sabbath there in 1838 (*Biblical Researches*, iii. 395): 'I continued my walk,' says he, 'along the shore of the peninsula, part of which is now unoccupied, except as "a place to spread nets upon," musing upon the pride and fall of ancient Tyre. Here was the little isle, once covered by her palaces and surrounded by her fleets: but alas! thy riches and thy fame, thy merchandise, thy mariners and thy pilots, thy caulkers, and the occupiers of thy merchandise that were in thee,—where are they? Tyre has indeed become like the "top of a rock." The sole tokens of her more ancient splendour—columns of red and grey granite, sometimes forty or fifty heaped together, or marble pillars—lie broken and strewn beneath the waves in the midst of the sea; and the hovels that now nestle upon a portion of her site present no contradiction of the dread decree, "Thou shalt be built no more."

U.

U'LAI, a river which flowed by Susa [*Shushan*] into the united stream of the Tigris and Euphrates. It is mentioned in Dan, viii. 2. It is called by Pliny *Euleus*, but is described by Greek writers under the name of *Choaspes*, and is now known by the name of *Kerah*, called by the Turks *Karasu*. This river is formed by the junction of many streams in the province of Ardelan, in Kurdistan. It runs through the plain of Kermanshah, and being greatly increased in magnitude by the junction of two small rivers, proceeds with a furious course towards Khuzistan, receiving numerous tributaries in its passage. It passes on the west of the ruins of *Shus* [*Susa*; see *SHUSHAN*], and enters the *Shat-ul-Arab* about twenty miles below Korna.

UNCLEAN BIRDS. The species which the law forbade the Israelites to use for food (Levit. xi. and Dent. xiv.) include bats, because in the most ancient classifications of animals, all flying animals were considered to belong more to birds than quadrupeds; in other respects the list is confound nearly to the same genera and species as are at the present day rejected in all Christian countries. There are only twenty named; but in the text the additional words 'of the like kind' clearly imply sometimes even more than genera, and the explanations of the law superadded by

human authority indicate several which do not occur in either list. Every ornithologist who reviews this question with care will feel that, with certain exceptions, the proposed identifications cannot be regarded as claiming entire confidence.

UNICORN. The radical meaning of the Hebrew word (*reem*) thus rendered furnishes no evidence that an animal such as is now understood by 'unicorn' was known to exist, or that a rhinoceros is thereby absolutely indicated; and here is no authority whatever for the inference that either was at any time resident in Western Asia.

320. [*Bibos cavifrons*.]

The Indian rhinoceroses are essentially tropical animals, and there is no indication extant that in a wild state they ever extended to the west of the Indus. Early colonies and caravans from the East most probably brought rumours of the power and obstinacy of these animals to Western Asia, and it might have been remarked that under excitement the rhinoceros raises its head and horn on high, as it were in exultation, though it is

321. [Horn of the unknown species of Rhinoceros.]

most likely because the sense of smelling is more potent in it than that of sight, which is only lateral, and confined by the thickness of the folds of skin projecting beyond the eye-balls. The rhinoceros is not absolutely untamable—a fact implied even in Job. Thus we take this species as the original type of the unicorn; but the active invention of Arabic minds, accidentally, perhaps, in the first instance, discovered a species of *Oryx* (generically bold and pugnacious ruminants), with the loss of one of its long, slender, and destructive horns. In this animal the *reem* of the Hebrews and the far East became personified, being most probably an *Oryx Leucoryx*, since individuals of that species have been repeatedly exhibited in subsequent ages as unicorns, when accident or artifice had deprived them of one of their frontal weapons. In Africa, however, among three or four known species of rhinoceros, and vague rumours of a *Bisulcate* species of unicorn, probably only the repetition of Arabian reports, there appears to exist between Congo, Abyssinia, and the Cape, precisely the *terra incognita* of Africa, a real pachydermous animal, which seems to possess the characteristics

of the poetical unicorn. In the narratives of the natives of the different regions in question there is certainly both exaggeration and error; but they all incline to a description which would make the animal indicated a pachyderm of the rhinoceros group, with a long and slender horn proceeding from the forehead, perhaps with another incipient behind it, and in general structure much lighter than other rhinoceroses.

U'PHAZ, a country from which gold was obtained (Jer. x. 9; Dan. x. 5). It is generally supposed to be a corruption of Ophir.

UPPER-ROOM. [*HOUSE*.]

UR, of the Chaldees, was the native place of the family of Abraham, whence he migrated first to Haran and then to Canaan (Gen. xi. 28, 31; xv. 7; Neh. ix. 7; Acts vii. 4). It is supposed to be a district identical with the modern pashalic of Urfa, to which there belong several districts, among others Rouha, which is the ancient Edessa.

UR'BAN, a disciple at Rome, and one of Paul's companions in labour (Rom. xvi. 9). Nothing is known of him; but his name shows him to have been a Roman.

UR'IAH (*flame of Jehovah*), a Hittite, and therefore a descendant of the ancient inhabitants of Palestine, whose name occurs in the list of the 'worthies' or champions of king David, in whose army he was an officer. He was the husband of Bathsheba; and while he was absent with the army before Rabbah, David conceived and gratified a criminal passion for his wife. The king then directed Joab to send him to Jerusalem, but failing to make his presence instrumental in securing Bathsheba from the legal consequences of her misconduct, he sent him back with a letter directing Joab to expose him to the enemy in such a manner as to ensure his destruction. This the unscrupulous Joab accomplished; and David then took the widow into his own harem (2 Sam. xi.; xxiii. 39) [*DAVID; BATHSHEBA*].

1. **UR'IAH** (*flame of Jehovah*), high priest of the Jews in the time of King Ahaz. He received from this young prince, who was then at Damascus, the model of an altar which had there engaged his attention, with orders to make one like it at Jerusalem. It was his duty to refuse compliance with this dangerous order; but he made such haste in his obedience that the altar was completed by the time Ahaz returned; and he afterwards went so far in his subservience as to offer upon this new and unauthorized altar the sacrifices prescribed by the law of Moses (2 Kings xvi. 10-12). He was probably not so fully aware as he ought to have been of the crime and danger involved in this concession to a royal caprice, being a transgression of the law which fixed the form of the Mosaic altar (Exod. xxvii. 1-8; xxxviii. 1-7); for he appears to have been in intention a good man, as he is one of the 'faithful witnesses' chosen by Isaiah (viii. 2) to attest one of his prophecies.

2. **UR'IAH**, a prophet, son of Shemaiah of Kirjath-jearim in Judah, who, in the time of Jehoiakim, uttered prophecies against Judah and Jerusalem, of the same tenor as those which Jeremiah was commissioned to deliver. Menaced with death by the king, Urijah sought refuge in Egypt; but Judah was at that time subject to

Pharaoh-Necho, who had no interest in protecting a proscribed fugitive who foretold the conquests of the Babylonians. He was therefore delivered up on the demand of Jehoiakim, who put him to death, and ordered him to be buried dishonourably in one of the graves of the meanest of the people (Jer. xxvi. 20, 21).

URIM and THUMMIM. There are two principal opinions respecting the Urim and Thummim. One is, that these words simply denote the four rows of precious stones in the breastplate of the high-priest, and are so called from their brilliancy and perfection; which stones, in answer to an appeal to God in difficult cases, indicated his mind and will by some supernatural appearance. Thus, as we know that upon each of the stones was to be engraven the name of one of the sons of Jacob, it has been conjectured that the letters forming the divine response became some way or other distinguished from the other letters. It has been conjectured by others that the response was given by an audible voice to the high-priest arrayed in full pontificals, and standing in the holy place with his face turned towards the ark. The other principal opinion is, that the Urim and Thummim were two small oracular images, similar to the Teraphim, personifying *revelation and truth*, which were placed in the cavity or pouch formed by the folds of the breastplate, and which uttered oracles by a voice. The latter is corroborated by the authority of Philo, and seems to be best supported by external evidence.

USURY, an unlawful contract for the loan of money, to be returned again with exorbitant increase. By the laws of Moses the Israelites were forbidden to take usury from their brethren upon the loan of money, victuals, or anything else, not, it has been observed by Michaelis, as if he absolutely and in all cases condemned the practice, for he expressly permitted interest to be taken from strangers, and from the Canaanites, but only out of favour to the poorer classes. After the return of the Jews from captivity, they were required by Nehemiah to 'leave off this usury,' and to restore to their brethren what they had exacted from them—'their lands, their vineyards, their olive-yards, and their houses; also the hundredth part of the money, and of the corn, the wine, and the oil' (Neh. v. 10, 11). Our Saviour denounced all extortion, and promulgated a new law of love and forbearance:—'Give to every man that asketh of thee, and of him that taketh away thy goods, ask them not again.' 'Love ye your enemies, and do good, and lend, hoping for nothing again' (Luke vi. 30, 35).

UZ, a region and tribe named in Job i. 1; Jer. xxv. 20; Lam. iv. 21; now generally supposed to have been situated in the south of Arabia Deserta, between Idumæa, Palestine, and the Euphrates.

UZAL, a descendant of Joktan, founder of one of the numerous tribes of Joktanide in Yemen (Gen. x. 27).

UZZAH (strength), son of Abinadab, a Levite, who, with his brother Ahio, conducted the new cart on which the ark was taken from Kirjath-jearim to Jerusalem. When the procession reached the threshing-floor of Nachon, the oxen drawing the cart became unruly, and Uzzah hastily put forth his hand to stay the ark, which was shaken by their movements. For this the anger of the Lord smote him, and he died on the spot. This

judgment appeared to David so severe, or even harsh, that he was much distressed by it, and becoming afraid to take the ark any farther, left it there, in charge of Obed-edom, till three months after, when he finally took it to Jerusalem (2 Sam. vi. 1-11). The whole proceeding was very irregular, and contrary to the distinct and far from unmeaning regulations of the law, which prescribed that the ark should be carried on the shoulders of the Levites (Exod. xxv. 14), whereas here it was conveyed in a cart drawn by oxen. The ark ought to have been enveloped in its coverings, and thus wholly concealed before the Levites approached it; but it does not appear that any priest took part in the matter, and it would seem as if the ark was brought forth, exposed to the common gaze, in the same manner in which it had been brought back by the Philistines (1 Sam. vi. 13-19). It was the duty of Uzzah, as a Levite, to have been acquainted with the proper course of proceeding: he was therefore the person justly accountable for the neglect; and the judgment upon him seems to have been the most effectual course of ensuring attention to the proper course of proceeding, and of checking the growing disposition to treat the holy mysteries with undue familiarity. That it had this effect is expressly stated in 1 Chron. xv. 2, 13.

UZZEN-SHERAH, a small city, founded by Sherah, the daughter of Ephraim (1 Chron. vii. 24).

UZZIAH (might of Jehovah), otherwise called **AZARIAH**, a king of Judah, who began to reign B.C. 809, at the age of sixteen, and reigned fifty-three years, being, with the sole exception of Manasseh's, the longest reign in the Hebrew annals. Uzziah was but five years old when his father was slain. He was sixteen before he was formally called to the throne; and it is disputed by chronologers, whether to count the fifty-two years of his reign from the beginning or from the end of the eleven intervening years. In the first half of his reign, Uzziah behaved well, and was mindful of his true place as viceroy of the Divine King. He accordingly prospered in all his undertakings. His arms were successful against the Philistines, the Arabians, and the Ammonites. He restored and fortified the walls of Jerusalem, and planted on them engines for discharging arrows and great stones; he organized the military force of the nation into a kind of militia, composed of 307,500 men, under the command of 2600 chiefs, and divided into bands liable to be called out in rotation; for these he provided vast stores of all kinds of weapons and armour,—spears, shields, helmets, breastplates, bows, and slings.

Nor were the arts of peace neglected by him: he loved and fostered agriculture; and he also dug wells, and constructed towers in the desert, for the use of the flocks. At length, when he had consolidated and extended his power, and developed the internal resources of his country, Uzziah fell. His prosperity engendered the pride which became his ruin. In the twenty-fourth year of his reign, incited probably by the example of the neighbouring kings, who united the regal and pontifical functions, Uzziah, unmindful of the fate of Dathan and Abiram, dared to attempt the exercise of one of the principal functions of the priests, by entering the holy place to burn incense at the golden altar. But, in the very act, he was smitten with leprosy, and was thrust forth

by the priests. He continued a leper all the rest of his life, and lived apart as such, the public functions of the government being administered by his son Jotham, as soon as he became of sufficient age (2 Kings xv. 27, 28; 2 Chron. xxvi.).

V.

VASH'TI (*beauty*), the wife of Ahasuerus, king of Persia, whose refusal to present herself unveiled before the complottors of the king led to her degradation, and eventually to the advancement of Esther (Esth. i. 9-12) [AHASUERUS; ESTHER].

VAT, the receptacle in which grapes and olives were trodden with the feet. Vats were either formed with stones and covered with insoluble cement, or were, in favourable localities, hewn out of the rock, forming raised reservoirs, into which the picked grapes were cast and trodden upon by men to press out the *must*, or new wine, which flowed out through gratings or spouts into large vessels placed outside. In the Egyptian paintings these vats are represented as having a temporary beam extended over them, with short ropes hanging down, by which the treaders held fast, and which greatly helped them in their labour, inasmuch as the beam acted as a lever in its rebound, lifting them up from the mass of grapes into which they sank.

323. [Wine-press.]

This work, although laborious, was performed with great animation, accompanied by vintage-songs, and with a peculiar shout or cry, and sometimes by instrumental music (Isa. xvi. 9, 10; Jer. xxv. 30; xlviii. 32, 33).

VEIL. In ancient as in modern times there were different kinds of this essential article of an Eastern female's attire. These are essentially of two descriptions. The first, and which alone offer any resemblance to the veils used among us, are

those which the Eastern women wear in-doors, and which are usually of muslin or other light texture, attached to the head-dress and falling down over the back. They are of different kinds and names, some descending only to the waist, while others reach nearly to the ground. These are not used to conceal the face.

323. [Dress Veils, &c. In-door.]

The veils mentioned in Scripture were, no doubt, mostly analogous to the wrappers of different kinds in which the Eastern women envelop

324. [Out-door Veils.]

themselves when they quit their houses. These are of great amplitude, and, among the common people, of strong and coarse texture, like that in which Ruth carried home her corn (Ruth iii. 15).

VEIL OF THE TABERNACLE AND TEMPLE. [TABERNACLE; TEMPLE.]

VERMILION. [PURPLE.]

VINE, THE, with its fruit, the grape, as well as wine, is very frequently mentioned in Scripture, as might be expected from its being a native of the East, well known to ancient nations, and highly esteemed for its various natural and artificial products. The vine is a native of the hilly region on the southern shores of the Caspian, and in the Persian province of Ghilan. Every part of it was and still continues to be highly valued. The sap was at one time used in medicine. Ver-

juice expressed from wild grapes is well known for its acidity. The late Sir A. Burnes mentions that in Caubul they use grape powder, obtained by drying and powdering the unripe fruit, as a pleasant acid. When ripe, the fruit is everywhere highly esteemed, both fresh and in its dried state as raisins. The juice of the ripe fruit, called *must*, is valued as a pleasant beverage. By fermentation, wine, alcohol, and vinegar are obtained; the lees yield tartar; an oil is sometimes expressed from the seeds; and the ashes of the twigs were formerly valued in consequence of yielding a salt, which we now know to be carbonate of potash.

It is not surprising, therefore, that the vine is so frequently mentioned both in the Old and in the New Testament, for it was one of the most valuable products of Palestine, and of particularly fine quality in some of the districts. Those of Esheol, Sorek, Jibmah, Jazer, and Abel, were particularly distinguished.

VINE, WILD. It is related in 2 Kings iv. 38-40, that Elisha having come again to Gilgal, when there was a famine in the land, and many sons of the prophets were assembled there, he ordered his servant to prepare for them a dish of vegetables: 'One went out into the field to gather herbs (*oroth*), and found a wild vine, and gathered thereof wild gourds (*pakyoth sadeh*) his lap-full, and came and shred them into the pot of pottage, for they knew them not.' 'So they poured out for the men to eat: but as they were eating of the pottage, they cried out, 'O thou man of God, there is death in the pot; and they could not eat thereof.' From this it appears that the servant mistook the fruit of one plant (*pakyoth*) for something else, called *oroth*, and that the former was vine like, that is, with long weak slender stems, and that the fruit had some remarkable taste, by which the mistake was discovered whenever the pottage was tasted. Though a few other plants have been indicated, the *pakyoth* has almost universally been supposed to be one of the family of the gourd or cucumber-like plants, several of which are conspicuous for their bitterness, and a few poisonous, while others, it is well known, are edible. Therefore one of the former may have been mistaken for one of the latter, or the *oroth* may have been some similarly shaped fruit, as for instance the egg-plant, used as a vegetable.

The plant referred to has usually been supposed to be the *colocynthis*, which is essentially a desert plant. Dr. Kitto says, 'In the desert parts of Syria, Egypt, and Arabia, and on the banks of the rivers Tigris and Euphrates, its tendrils run over vast tracts of ground, offering a prodigious number of gourds, which are crushed under foot by camels, horses, and men. In winter we have seen the extent of many miles covered with the connecting tendrils and dry gourds of the preceding season, the latter exhibiting precisely the same appearance as in our shops, and when crushed, with a crackling noise, beneath the feet, discharging, in the form of a light powder, the valuable drug which it contains.' 'The Globe Cucumber, Dr. Kitto continues, 'derives its specific name (*Cucumis prophetarum*) from the notion that it afforded the gourd which "the sons of the prophets" shred by mistake into their pottage, and which made them declare, when they came to taste it, that there was "death in the pot."

This plant is smaller in every part than the common melon, and has a nauseous odour, while its fruit is to the full as bitter as the *Colocynthis*. The fruit has a rather singular appearance from the manner in which its surface is armed with prickles, which are, however, soft and harmless' (*Pictorial Palestine: Physical Geog.* p. cclxxxix.). But this plant, though it is nauseous and bitter as the *Colocynthis*, yet the fruit, not being bigger than a cherry, does not appear likely to have been that which was shred into the pot. Celsius, however, was of opinion that the *Cucumis agrestis* of the ancients, and which was found by Belon in descending from Mount Sinai, was the plant. This plant is now called squiring cucumber, and is a well known drastic purgative, violent enough in its action to be considered even a poison. Its fruit is ovate, obtuse, and scabrous. But it is not easy to say whether this or the *Colocynthis* is most likely to have been the plant mistaken for *oroth*; but the fruit of this species might certainly be mistaken for young gherkins. Both are bitter and poisonous.

A fruitful vine is often adduced as an emblem of the Hebrew nation, and also the vine that was brought out of Egypt. A period of security and repose is signified by every one sitting under his own vine and fig-tree; and prosperity by 'Judah, a lion's whelp, binding his foal to the vine, and his ass's colt to the choice vine'; both indications of Eastern manners, where sitting in the shade is most pleasant, and tying cattle in similar situations a common practice.

The vine must have been cultivated in very early times, as we are informed in Gen. ix. 20, that Noah planted the vine immediately after the deluge; and bread and wine are mentioned in Gen. xiv. 18. In Egypt also we have early notice of it (Gen. xl. 9, 10), as Pharaoh's chief butler saw in a dream a vine with three branches; and the Israelites complain (Num. xx. 5) that Moses and Aaron had brought them out of Egypt into that dry and barren land, where there were neither figs nor vines. The wines of Syria were in early times also highly esteemed; and though the growth of the vine has much decreased, from the diminished population and the Mohammedan rule, yet travellers still speak with enthusiasm of some of the wines, as of the vino d'oro of Lebanon.

VINEGAR. [WINE.]

VIOL. [MUSICAL INSTRUMENTS.]

VIPER. [SERPENT.]

VOW may be defined as a religious undertaking, either, 1. Positive, to do or perform; 2. or Negative, to abstain from doing or performing a certain thing. The morality of vows we shall not here discuss, but merely remark that vows were quite in place in a system of religion which so largely consisted of doing or not doing certain outward acts, with a view of pleasing Jehovah and gaining his favour. The Israelite, who had been taught by performances of daily recurrence to consider particular ceremonies as essential to his possessing the divine favour, may easily have been led to the conviction which existed probably in the primitive ages of the world, that voluntary oblations and self-imposed sacrifices had a special value in the sight of God. And when once this conviction had led to corresponding practice, it could not be otherwise than of the highest consequence that these sacred pro-

misers, which in sanctity differed little from oaths, should be religiously and scrupulously observed.

Vows, which rest on a human view of religious obligations, assuming as they do that a kind of recompense is to be made to God for good enjoyed, or consideration offered for good desiderated, or a gratuity presented to buy off an impending or threatened ill, are found in existence in the antiquities of all nations, and present themselves in the earliest Biblical periods (Gen. xxviii. 20; Judg. xi. 30; 1 Sam. i. 11; 2 Sam. xv. 8). With great propriety the performance of these voluntary undertakings was accounted a highly religious duty (Judg. xi. 35; Eccles. v. 4, 5). The words of the last vow are too emphatic, and in the present day too important, not to be cited: 'Better is it that thou shouldst not vow, than that thou shouldst vow and not pay' (comp. Ps. lxxi. 13, sq.; lxxvi. 11; cxvi. 18). The views which guided the Mosaic legislation were not dissimilar to those just expounded. Like a wise lawgiver, Moses, in this and in other particulars, did not attempt to sunder the line of continuity between the past and the present. He found vows in practice; he aimed to regulate what it would have been fully to try to root out (Deut. xxiii. 21, sq.). The words in the 22nd verse are clearly in agreement with our remarks: 'If thou shalt forbear to vow, it shall be no sin in thee.'

VULTURE. An unclean bird (Lev. xi. 14). The species of vulture, properly so called, have the head naked or downy, the crop external, and very long wings; they have all an offensive smell, and we know of none that even the scavenger-ants will eat. When dead they lie on the ground untouched till the sun has dried them into mummies. Those found in and about the Egyptian territory are *Vultur fulvus*, *V. gyps* (Savigny), *V. Aegyptius* (Savigny), *V. monachus* (Arabian vulture), *V. cinereus*, *V. Nubicus*, and a black species, which is often figured on Egyptian monuments as the bird of victory, hovering over the head of a national hero in battle, and sometimes with a banner in each talon. It is perhaps the *gypæctus barbatus* (peres), or *lammer geger*; for though neither a vulture nor an eagle, it is the largest bird of prey of the old continent, and is armed like the eagle with formidable claws. The head is wholly feathered; its courage is equal to its powers, and it has a strength of wing probably superior to all raptorial, excepting the condor. It is found with little or no difference from Norway to the Cape of Good Hope, and from the Pyrenees to Japan. Most of the above-named species are occasionally seen in the north of Europe. The voice varies in different species, but those of Egypt, frequenting the Pyramids, are known to bark in the night like dogs. Excepting the carrion vultures, all the other species are of large size; some superior in bulk to the swan, and others a little less.

There can be no doubt that the White Carrion Vulture (*Vultur percnopterus*) is the bird called in Hebrew (as it still is in Arabic) *Racham*, rendered Gier-eagle in Lev. xi. 18; Deut. xiv. 17. It forms a small group of Vulturidæ, subgenerically distinguished by the name of *Percnopterus* and *Neophron*, differing from the other vultures in the bill being longer, straight, more attenuated, and then uncinated, and in the back of the head

and neck being furnished with longish, narrow, suberectile feathers. In size the species is little bulkier than a raven, but it stands high on the legs. Always soiled with blood and garbage, offensive to the eye and nose, it yet is protected in Egypt both by law and public opinion for the services it renders in clearing the soil of dead carcasses putrefying in the sun, and the cultivated fields of innumerable rats, mice, and other vermin. It extends to Palestine in the summer season, but becomes scarce towards the north, where it is not specially protected; and it accompanies caravans, feasting on their leavings and on dead camels, &c.

525. [*Vultur percnopterus*.]

W.

WAGES. The word rendered in the English Version by this term, signifies primarily 'to purchase,' to obtain by some consideration on the part of the purchaser; thence to obtain on the part of the seller some consideration for something given or done, and hence to hire, to pay, or receive wages. Wages, then, according to the earliest usages of mankind, are a return made by a purchaser for something of value—specifically for work performed. And thus labour is recognised as property, and wages as the price paid or obtained in exchange for such property. In this relation there is obviously nothing improper or humiliating on the side either of the buyer or the seller. They have each a certain thing which the other wants, and in the exchange which they in consequence make, both parties are alike served. In these few words lies the theory and also the justification of all service. The entire commerce of life is barter. In hire, then, there is nothing improper or discreditable. It is only a hiring, that is, a mercenary, a mean sordid spirit, that is wrong. So long as a human being has anything to give which another human being wants, so long has he something of value in the great market of life; and whatever that some-

thing may be, provided it does not contribute to evil passions or evil deeds, he is a truly respectable capitalist, and a useful member of the social community. The Scriptural usage in applying the term translated 'wages' to sacred subjects—the Almighty himself says to Abraham (Gen. xv. 1), 'I am thy exceeding great reward'—tends to confirm these views, and to suggest the observance of caution in the employment of the words 'hire' and 'hiring,' which have acquired an offensive meaning by no means originally inherent in themselves, or in the Hebrew words for which they stand (Gen. xxx. 13, 32, 33).

WAGGON. [CART.]

WAIL. [MOORNING.]

WALLS. [FORTIFICATIONS; TOWNS.]

WALNUT. Walnuts are probably intended in the Song of Solomon, vi. 11, 'I went into the garden of nuts.' The Hebrew name (*eyor*) is evidently the same as the Persian *gowz*, which has been converted by the Arabs into *jowz*, by a process common in the case of many other words beginning with the interchangeable letters *gaf* and *jim*. In both languages these words, when they stand alone, signify the walnut, *gouz-bun* being the walnut-tree: when used in composition they may signify the nut of any other tree; thus *jonz-i-bod* is the nutmeg, *jonz-i-hindi* is the Indian or cocoa-nut, &c. So the Greeks employed *καρύον*, and the Romans *nux*, to denote the walnut, which last remains in modern languages, as Ital. *noce*, Fr. *noix*, Span. *nuez*, and Ger. *nusz*. The walnut was also called royal nut, and also Persian, from having been so highly esteemed, and from having been introduced into Greece from Persia. That the walnut was highly esteemed in the East we learn from Abulpharagius, and that it is found in Syria has been recorded by several travellers. That it was planted at an early period is well known, and might be easily proved from a variety of sources.

The walnut-tree is well known as a lofty, wide-spreading tree, affording a grateful shade, and of which the leaves have an agreeable odour when bruised. The flowers begin to open in April, and the fruit is ripe in September and October. The tree is much esteemed for the excellence of its wood; and the kernel of the nut is valued not only as an article of diet, but for the oil which it yields. Being thus known to, and highly valued by, the Greeks in early times, it is more than probable that, if not indigenous in Syria, it was introduced there at a still earlier period, and that therefore it may be alluded to in the above passage, more especially as Solomon has said, 'I made me gardens and orchards, and planted trees in them of all kind of fruits' (Eccles. ii. 5).

WANDERING. In our office of tracing the steps of the Israelites from Goshen to Palestine, we have conducted them across the Red Sea to their first great station on its eastern bank, and thence onward along the shore and over the cliffs of that sea, till, following them up Wady Hebron, we placed and left them before Mount Horeb, in the capacious plain Rahab, which, having its widest part in the immediate front of that immense mass of rock, extends as if with two arms, one towards the north-west, the other towards the north-east. A belief prevailed that there was no

spot in the Sinaitic district on which the people of Israel could assemble. But Dr. Robinson has shown that this opinion is incorrect, and that in all probability the plain er-Râhah, over which Mount Horeb impends, is the spot where the congregation of Israel assembled. 'We were surprised,' says he, 'as well as gratified to find here, in the inmost recesses of these dark granite cliffs, this fine plain spread out before the mountain, and I know not where I have felt a thrill of stronger emotion than when, in first crossing the plain, the dark precipices of Horeb rising in solemn grandeur before us, we became aware of the entire adaptedness of the scene to the purposes for which it was chosen by the Great Hebrew legislator.'

After having been about a year in the midst of this mountainous region, the Israelites broke up their encampment, and began their journey in the order of their tribes, Judah leading the way with the ark of the covenant, under the guidance of the directing cloud (Num. ix. 15, sq.; x. 11, sq.). They proceeded down Wady Seikh, haring the wilderness of Paran before them, in a north-westerly direction; but having come to a gorge in the mountains, they struck in a north-north-easterly direction across a sandy plain, and then over the Jebel et-Tih, and came down Wady Zulakah, to the station Taberah. It took the army three days to reach this station. Whatever name the place bore before, it now received that of Taberah (fire), from a supernatural fire with which murmurers, in the extreme parts of the camp, were destroyed as a punishment for their guilt. Here, too, the mixed multitude that was among the Israelites not only fell a-lusting themselves, but also excited the Hebrews to remember Egyptian fish and vegetables with strong desire, and to complain of the divinely supplied manna. The discontent was intense and widely spread. Moses became aware of it, and forthwith felt his spirit misgive him. He brings the matter before Jehovah, and receives Divine aid by the appointment of seventy elders to assist him in the important and perilous office of governing the gross, sensuous, and self-willed myriads whom he had to lead to Canaan. Moreover, an abundance of flesh meat was given in a most profuse supply of quails. It appears that there were now 600,000 footmen in the congregation.

The next station was Kibroth-hattaavah, near which there are fine springs and excellent pasturage. This spot, the name of which signifies 'graves of lust,' was so denominated from a plague inflicted on the people in punishment of their rebellious disposition (Num. xi. 33; 1 Cor. x. 6). Thence they journeyed to Hazeroth, which Robinson, after Burckhardt, finds in el-Hudhera, where is a fountain, together with palm-trees. At Hazeroth, where the people seem to have remained a short time, there arose a family dissension to increase the difficulties of Moses. Aaron, apparently led on by his sister Miriam, who may have been actuated by some feminine pique or jealousy, complained of Moses on the ground that he had married a Cushite, that is, an Arab wife, and the malcontents went so far as to set up their own claims to authority as not less valid than those of Moses. An appeal is made to Jehovah, who vindicates Moses, rebukes Aaron, and punishes Miriam (Num. xii.).

'And afterward the people removed from Hazeroth, and pitched in the wilderness of Paran,' at Kadesh (Num. xii. 16; xiii. 26). Here it was that twelve men (spies) were sent into Canaan to survey the country, who went up from the wilderness of Zin (Num. xiii. 21) to Hebron; and returning after forty days, brought back a very alarming account of what they had seen. It is evident that at this point there is a great blank in the Scripture narrative of the wanderings of the Israelites. They were ordered to turn back into the desert 'by the way of the Red Sea.' In this wilderness they wandered eight-and-thirty years, but little can be set forth respecting the course of their march. The next notice of the Israelites is, that in the first month they came into the desert of Zin and abode again at Kadesh; here Miriam dies; Moses and Aaron bring water from the rock; a passage is demanded through the land of Edom, and refused; and they then journeyed from Kadesh to Mount Hor, where Aaron dies in the fortieth year of the departure from Egypt, in the first day of the fifth month, corresponding to a part of August and September. Here, then, between August of the second year and August of the fortieth year, we have an interval of thirty-eight years of wandering in the desert.

In this way the Scriptural account of the journeyings of the Israelites becomes perfectly harmonious and intelligible. The eighteen stations mentioned only in the general list in the book of Numbers as preceding the arrival at Kadesh, are then apparently to be referred to this eight and thirty years of wandering, during which the people at last approached Ezion-geber, and afterwards returned northwards a second time to Kadesh, in the hope of passing directly through the land of Edom. Their wanderings extended, doubtless, over the western desert; although the stations named are probably only those head-quarters where the tabernacle was pitched, and where Moses and the elders and priests encamped; while the main body of the people was scattered in various directions.

Where, then, was Kadesh? Clearly, on the borders of Palestine. We agree with Robinson and Raumer in placing it nearly at the top of the Wady Arabah, where, indeed, it is fixed by Scripture, for in Numbers xii. 16 we read, 'Kadesh, a city in the uttermost of thy (Edom) border.' The precise spot it may be difficult to ascertain, but here, in the wilderness of Zin, which lay in the more comprehensive district of Paran, is Kadesh to be placed.

When we begin to take up the thread of the story at the second visit to Kadesh, we find time had, in the interval, been busy at its destructive work, and we thus gain confirmation of the view which has been taken of such second visit. No sooner has the sacred historian told us of the return of the Israelites to Kadesh, than he records the death and burial of Miriam, and has, at no great distance of time, to narrate that of Aaron and Moses. While still at Kadesh a rising against these leaders takes place, on the alleged ground of a want of water. Water is produced from the rock at a spot called hence Meribah (strife). But Moses and Aaron displeased God in this proceeding, probably because they distrusted God's general providence and applied for extraordinary resources. On account of this displeasure it was

announced to them that they should not enter Canaan. A similar transaction has been already spoken of as taking place in Rephidim (Exod. xvii. 1). The same name, Meribah, was occasioned in that as in this matter. Hence it has been thought that we have here two versions of the same story. But there is nothing surprising, under the circumstances, in the outbreak of discontent for want of water, which may well have happened even more than twice. The places are different, very wide apart; the time is different; and there is also the great variation arising out of the conduct and punishment of Moses and Aaron. On the whole, therefore, we judge the two records to speak of different transactions.

Relying on the ties of blood (Gen. xxxii. 8) Moses sent to ask of the Edomites a passage through their territory into Canaan. The answer was a refusal, accompanied by a display of force. The Israelites, therefore, were compelled to turn their face southward, and making a turn round the end of the Elanitic gulf reached Mount Hor, near Petra, on the top of which Aaron died. Finding the country bad for travelling, and their food unpleasant, Israel again broke out into rebellious discontent, and was punished by fiery serpents which bit the people, and much people died, when a remedy was provided in a serpent of brass set on a pole (Num. xxi. 4, sq.). Still going northward, and probably pursuing the caravan route from Damascus, they at length reached the valley of Zared (the brook), which may be the present Wady Karak, that runs from the east into the Dead Sea. Hence they 'removed and pitched on the other side of Arnon, which is in the border of Moab, between Moab and the Amorites' (Num. xxi. 13). Beer (the well) was the next station, where, finding a plentiful supply of water, and being rejoiced at the prospect of the speedy termination of their journey, the people indulged in music and song, singing 'the song of the well' (Num. xxi. 17, 18). The Amorites being requested, refused to give Israel a passage through their borders, and so the nation was again compelled to proceed still in a northerly course. At length having beaten the Amorites, and Og, king of Bashan, they reached the Jordan, and pitched their tents at a spot which lay opposite Jericho. Here Balak, king of the Moabites, alarmed at their numbers and their successful prowess, invited Balaam to curse Israel, in the hope of being thus aided to overcome them and drive them out. The intended curse proved a blessing in the prophet's mouth. While here the people gave way to the idolatrous practices of the Moabites, when a terrible punishment was inflicted, partly by a plague which took off 24,000, and partly by the avenging sword. Moses, being commanded to take the sum of the children of Israel, from twenty years upwards, found they amounted to 600,730, among whom there was not a man of them whom Moses and Aaron numbered in the wilderness of Sinai (Num. xxvi. 47, 64). Moses is now directed to ascend Abarim, to Mount Nebo, in the land of Moab, over against Jericho, in order that he might survey the land which he was not to enter on account of his having rebelled against God's commandment in the desert of Zin (Num. xxvii. 12; Deut. xxxii. 49). Conformably with the divine command, Moses went up from the plains of Moab unto the mountain of Nebo, to the top of

Pisgah, and there he died, at the age of 120 years: 'His eye was not dim, nor his natural force abated' (Deut. xxxiv.). Under his successor, Joshua, the Hebrews were forthwith led across the Jordan, and established in the Land of Promise.

Thus a journey, which they might have performed in a few months, they spent forty years in accomplishing, bringing on themselves unspeakable toil and trouble, and in the end, death, as a punishment for their gross and sensual appetites, and their unbending indolence to the divine will (Num. xiv. 23; xxvi. 65). Joshua, however, gained thereby a great advantage; inasmuch as it was with an entirely new generation that he laid the foundations of the civil and religious institutions of the Mosiac polity in Palestine. This advantage assigns the reason why so long a period of years was spent in the wilderness.

WAR. Under this head we may notice some of the usages of Hebrew warfare which have not been considered under other heads, referred to at the end of this article.

The army of Israel was chiefly composed of infantry, formed into a trained body of spearmen, and, in greater numbers, of slingers and archers, with horses and chariots in small proportion, excepting during the periods when the kingdom extended over the desert to the Red Sea. The irregulars were drawn from the families and tribes, particularly Ephraim and Benjamin, but the heavy armed derived their chief strength from Judah, and were, it appears, collected by a kind of conscription, by tribes, like the earlier Roman armies; not through the instrumentality of selected officers, but by genealogists of each tribe, under the superintendence of the princes. Of those returned on the rolls, a proportion greater or less was selected, according to the exigency of the time; and the whole male population might be called out on extraordinary occasions. When kings had rendered the system of government better organised, there was a sort of muster-master, who had returns of the effective force, or number of soldiers ready for service, but who was a kind of secretary of state. These officers, or the *shoterim*, struck out, or excused from service:—1st, those who had built a house without having yet inhabited it; 2nd, those who had planted an olive or vineyard, and had not tasted the fruit—which gave leave of absence for five years; 3rd, those who were betrothed, or had been married less than one year; 4th, the *saint-hearted*, which may mean the constitutionally delicate, rather than the cowardly.

The levies were drilled to march in ranks (1 Chron. xii. 38), and in column by fives abreast (Exod. xiii. 18); hence it may be inferred that they borrowed from the Egyptian system a decimal formation, two fifties in each division making a solid square, equal in rank and file: for twice ten in rank and five in file being told off by right hand and left hand files, a command to the left hand files to face about and march six or eight paces to the rear, then to front and take one step to the right would make the hundred a solid square, with only the additional distance between the right hand or unmoved files necessary to use the shield and spear without hindrance; while the depth being again reduced to five files, they could face to the right or left, and march firmly

in column, passing every kind of ground without breaking or lengthening their order.

With centuries thus arranged in masses, both movable and solid, a front of battle could be formed in simple decimal progression to a thousand, ten thousand, and to an army at all times formidable by its depth, and by the facility it afforded for the light troops, chariots of war, and cavalry, to rally behind and to issue from thence to the front. Archers and slingers could ply their missiles from the rear, which would be more certain to reach an enemy in close conflict, than was to be found the case with the Greek phalanx, because from the great depth of that body missiles from behind were liable to fall among its own front ranks. These divisions were commanded, it seems, by *ketanim*, officers in charge of one thousand, who, in the first ages, may have been the heads of houses, but in the time of the kings were appointed by the crown, and had a seat in the councils of war; but the commander of the host, such as Joab, Abner, Benaiah, &c., was either the judge, or under the judge or king, the supreme head of the army, and one of the highest officers in the state. He, as well as the king, had an armour-bearer, whose duty was not only to bear his shield, spear, or bow, and to carry orders, but, above all, to be at the chief's side in the hour of battle (Judg. ix. 54; 1 Sam. xiv. 6; xxxi. 4, 5). Beside the royal guards, there was, as early at least as the time of David, a select troop of heroes, who appear to have had an institution very similar in principle to our modern orders of knighthood.

In military operations, such as marches in quest of, or in the presence of, an enemy, and in order of battle, the forces were formed into three divisions, each commanded by a chief captain or commander of a corps, or third part, as was also the case with other armies of the east; these constituted the centre, and right and left wing, and during a march formed the van, centre, and rear.

The war-cry of the Hebrews was not intimated by the ensign-bearers, as in the West, but by a Levite; for priests had likewise charge of the trumpets, and the sounding of signals; and one of them, called 'the anointed for war,' who is said to have had the charge of animating the army to action by an oration, may have been appointed to utter the cry of battle (Deut. xx. 2). It was a mere shout (1 Sam. xvii. 20), or, as in later ages, *Hallelujah!* while the so-called mottoes of the central banners of the four great sides of the square, of Judah, Reuben, Ephraim, and Dan, were more likely the battle-songs which each of the fronts of the mighty army had sung on commencing the march or advancing to do battle (Num. x. 34, 35, 36; Deut. vi. 4).

Before an engagement the Hebrew soldiers were spared fatigue as much as possible, and food was distributed to them; their arms were enjoined to be in the best order, and they formed a line, as before described, of solid squares of hundreds, each square being ten deep, and as many in breadth, with sufficient intervals between the files to allow of facility in the movements, the management of the arms, and the passage to the front or rear of slingers and archers. These last occupied posts according to circumstances, on the flanks, or in advance, but in the heat of battle were sheltered behind the squares of spear-

men; the slingers were always stationed in the rear, until they were ordered forward to cover the front, in pede an hostile approach, or commence an engagement. Meantime, the king, or his representative, appeared clad in holy ornaments, and proceeded to make the final dispositions for battle, in the middle of his chosen braves, and attended by priests, who, by their exhortations, animated the ranks within hearing, while the trumpets waited to sound the signal. It was now, with the enemy at hand, we may suppose, that the slingers would be ordered to pass forward between the intervals of the line, and, opening their order, would let fly their stone or leaden missiles, until, by the gradual approach of the opposing fronts, they would be hemmed in and recalled to the rear, or ordered to take an appropriate position. Then was the time when the trumpet-bearing priests received command to sound the charge, and when the shout of battle burst forth from the ranks. The signal being given, the heavy infantry would press forward under cover of their shields, the rear ranks might then, when so armed, cast their darts, and the archers, behind them all, shoot high, so as to pitch their arrows over the lines before them, into the dense masses of the enemy beyond. If the opposing forces broke through the line, we may imagine a body of charioteers reserve, rushing from their post, and charging in among the disjointed ranks of the enemy, before they could reconstruct their order; or wheeling round a flank, fall upon the rear; or being encountered by a similar manœuvre, and perhaps repulsed, or rescued by Hebrew cavalry. The king, meanwhile, surrounded by his princes, posted close to the rear of his line of battle, and in the middle of showered missiles, would watch the enemy and strive to remedy every disorder. Thus it was that several of the sovereigns of Judah were slain (2 Chron. xviii. 33; xxxv. 23), and that such an enormous waste of human life took place; for two hostile lines of masses, at least ten in depth, advancing under the confidence of breastplate and shield, when once engaged hand to hand, had difficulties of no ordinary nature to retreat; because the hindermost ranks not being exposed personally to the first slaughter, would not, and the foremost could not, fall back; neither could the commanders disengage the line without a certainty of being routed. The fate of the day was therefore no longer within the control of the chief, and nothing but obstinate valour was left to decide the victory. Sometimes a part of the army was posted in ambush, but this manœuvre was most commonly practised against the garrisons of cities (Josh. viii. 12; Judg. xx. 38). In the case of Abraham, (Gen. xiv. 15), when he led a small body of his own people, suddenly collected, and falling upon the guard of the captives, released them, and recovered the booty, it was a surprise, not an ambush; nor is it necessary to suppose that he fell in with the main army of the enemy. At a later period there is no doubt the Hebrews formed their armies, in imitation of the Romans, into more than one line of masses, and modelled their military institutions as near as possible upon the same system. [ARMS; ARMOUR; ENCAMPMENT; ENGINES; FORTIFICATIONS; STANDARDS.]

WASHING. [ABLUCTION.]

WASHING OF FEET. The custom of washing the feet held, in ancient times, a place among the duties of hospitality, being regarded as a mark of respect to the guest, and a token of humble and affectionate attention on the part of the entertainer. It had its origin in circumstances for the most part peculiar to the East.

In general, in warm Oriental climes, cleanness is of the highest consequence, particularly as a safeguard against the leprosy. The East knows nothing of the factitious distinctions which prevail in these countries between sanitary regulations and religious duties; but the one, as much as the other, is considered a part of that great system of obligations under which man lies towards God. What, therefore, the health demands, religion is at hand to sanction. Cleanness is in consequence not next to godliness, but a part of godliness itself.

As in this Oriental view may be found the origin and reason of much of what the Mosaic law lays down touching clean and unclean, so the practice of feet-washing in particular, which considerations of purity and personal propriety recommended, hospitality adopted and religion sanctioned.

In temperate climes bathing is far too much neglected; but in the East the heat of the atmosphere and the dryness of the soil would render the ablution of the body peculiarly desirable, and make feet-washing no less grateful than salutary to the weary traveller. The foot, too, was less protected than with us. In the earliest ages it probably had no covering; and the sandal worn in later times was little else than the sole of our shoe bound under the foot. Even this defence, however, was ordinarily laid aside on entering a house, in which the inmates were either barefoot or wore nothing but slippers.

The washing of the feet is among the most ancient, as well as the most obligatory, of the rites of Eastern hospitality. From Gen. xviii. 4, xix. 2, it appears to have existed as early as the days of the patriarch Abraham. In Gen. xxiv. 32, also, 'Abraham's servant' is provided with water to wash his feet, and the men's feet that were with him. The same custom is mentioned in Judg. xix. 21. From 1 Sam. xxv. 41, it appears that the rite was sometimes performed by servants and sons, as their appropriate duty, regarded as of an humble character. Hence, in addition to its being a token of affectionate regard, it was a sign of humility.

The most remarkable instance is found in the 13th chapter of John's Gospel, where our Saviour is represented as washing the feet of his disciples, with whom he had taken supper. Minute particulars are given in the sacred narrative, which should be carefully studied, as presenting a true Oriental picture. From ver. 12, sq., it is clear that the act was of a symbolical nature, designed to teach brotherly humility and goodwill.

It was specially customary in the days of our Lord to wash before eating (Matt. xv. 2; Luke xi. 38). But Jesus did not pay a scrupulous regard to the practice, and hence drew blame upon himself from the Pharisees (Luke xi. 38). In this our Lord was probably influenced by the superstitious abuses and foolish mis-interpretations connected with washing before meat. For the same reason he may purposely have postponed

the act of washing his disciples' feet till after supper, lest, while he was teaching a new lesson of humility, he might add a sanction to current and baneful errors [ABLUCTION].

The union of affectionate attention and lowly service is found indicated by feet-washing in 1 Tim. v. 10, where, among the signs of the widows that were to be honoured—supported, that is, at the expense of the church—this is given, if any one 'have washed the saints' feet.'

Feet-washing became, as might be expected, a part of the observances practised in the early Christian church. The real signification, however, was soon forgotten, or overloaded by superstitious feelings and mere outward practices. Traces of the practice abound in ecclesiastical history, and remnants of the abuse are still to be found, at least in the Romish church.

WATCH. Watching must have been coeval with danger, and danger arose as soon as man became the enemy of man, or had to guard against the attacks of wild animals. Accordingly we find traces of the practice of watching in early portions of the Hebrew annals. Watching must have been carried to some degree of completeness in Egypt, for we learn from Exod. xiv. 24, that the practice had, at the time of the Exodus, caused the night to be divided into different watches or portions, mention being made of the 'morning watch.' Compare 1 Sam. xi. 11. In the days of the Judges (vii. 19) we find 'the middle watch' mentioned. See Luke xii. 38. At a later period Isaiah plainly intimates (xxi. 5, 6), that there was a watch-tower in Jerusalem, and that it was customary on extraordinary occasions to set a watchman. Watchmen were, however, even at an earlier day, customarily employed in the metropolis, and their post was at the gates (2 Sam. xviii. 24, sq.; 2 Kings ix. 17, sq.; Ps. cxxvii. 1; Prov. viii. 34), where they gave signals and information, either by their voice or with the aid of a trumpet (Jer. vi. 17; Ezek. xxxiii. 6). At night watchmen were accustomed to perambulate the city (Cant. iii. 3; v. 7). In the New Testament we find mention made of the second, the third, and the fourth watch (Luke xii. 38; Matt. xiv. 25). The space of the natural night, from the setting to the rising of the sun, the ancient Jews divided into three equal parts of four hours each. But the Romans, imitating the Greeks, divided the night into four watches, and the Jews, from the time they came under subjection to the Romans, following this Roman custom, also divided the night into four watches, each of which consisted of three hours (Mark xiii. 35). The terms by which the old Hebrew division of the night was characterized are, 1. the first watch, beginning of the watches (Lam. ii. 19); 2. 'the middle-watch' (Judg. vii. 19); 3. 'the morning-watch' (Deut. xiv. 24; 1 Sam. xi. 11). The first extended from sun-set to our ten o'clock, the second from ten at night till two in the morning, and the third from that hour till sun-rise.

WATER. No one can read far in the sacred Scriptures without being reminded of the vast importance of water to the Hebrews in Palestine, and indeed in every country to which their history introduces us; and more particularly in the deserts in which they wandered on leaving Egypt, as well as those into which they before or afterwards sent their flocks for pasture. The natural

waters have already been disposed of in the articles PALESTINE and RIVER; and in CISTERN and JERUSALEM notice has been taken of some artificial collections. It now remains to complete the subject, under the present head, by the addition of such details as may not have been comprehended under the articles referred to.

It has been shown that the absence of small rivers, through the want of rain in summer, renders the people of the settled country, as well as of the deserts, entirely dependent upon the water derived from wells, and that preserved in cisterns and reservoirs, during the summer and autumn; and gives an importance unknown in our humid climate to the limited supply thus secured.

With respect to reservoirs, the articles to which reference has been made, will supply all the information necessary, except that we may avail ourselves of this opportunity of noticing the so-called Pools of Solomon, near Bethlehem. 'They consist of three enormous tanks,' says Dr. Wilde, 'sunk in the side of a sloping ground, and which from time immemorial have been considered to be the workmanship of Solomon; and certainly they are well worthy the man to whom tradition has assigned their construction. These reservoirs are each upon a distinct level, one above the other, and are capable of holding an immense body of water. They are so constructed, both by conduits leading directly from one another, and by what may be termed anastomosing branches, that when the water in the upper one has reached to a certain height, the surplus flows off into the one below it, and so on into the third. These passages were obstructed and the whole of the cisterns were out of repair when we visited them, so that there was hardly any water in the lowest, while the upper one was nearly full of good pure water. Small aqueducts lead from each of these cisterns to a main one that conducts the water to Jerusalem. They are all lined with a thick layer of hard whitish cement, and a flight of steps leads to the bottom of each, similar to some of those in the holy city. Where the lowest cistern joins the valley of Etham it is formed by an embankment of earth, and has a sluice to draw off the water occasionally. A short distance from the upper pool I descended into a narrow stone chamber, through which the water passes from the neighbouring spring on its course to the cisterns.

'On our return to the city we followed the track of the aqueduct as far as Bethlehem, and afterwards crossed it in several places on the road. It is very small, but the water runs in it with considerable rapidity, as we could perceive by the open places left in it here and there. From the very tortuous course that this conduit takes in following the different sinuosities of the ground, being sometimes above and sometimes beneath the surface, it is difficult to persuade oneself that it does not run up hill, as many have supposed. Finally, it crosses over the valley of Kephaim, on a series of arches, to the north of the lower pool of Gihon, and winding round the southern horn of Zion, is lost to view in the ruins of the city. It very probably supplied the pool of Bethesda, after having traversed a course of certainly not less than from thirteen to fifteen miles.'

With respect to wells, their importance is very great, especially in the desert, where the means

of forming them are deficient, as well as the supply of labour necessary for such undertakings, which, after all, are not always rewarded by the discovery of a supply of water. Hence in such situations, and indeed in the settled countries also, the wells are of the utmost value, and the water in most cases is very frugally used (Num. xx. 17-19; Deut. ii. 6, 28; Job xxii. 7). We are not, however, to seek an explanation of the contests about wells which we find in the histories of Abraham and Isaac (Gen. xxi. 25-31; xxvi. 15-22) merely in the value of the well itself, but in the apprehension entertained by the Philistines that by the formation of such wells the patriarchs would be understood to create a lien on the lands in which they lay, and would acquire an indefeasible right of occupation, or rather of possession; and it might seem to them inconvenient that so powerful a clan should acquire such a right in the soil of so small a territory as that which belonged to them. Hence their care, when Abraham afterwards left their part of the country, to fill up the wells which he had digged; and hence, also, the renewed and more bitter strife with Isaac when he, on arriving there, proceeded to clear out those wells and to dig new ones himself.

326. [Well and Bucket at Jaffa.]

It appears in Scripture that the wells were sometimes owned by a number of persons in common, and that flocks were brought to them for watering on appointed days, in an order previously arranged. A well was often covered with a great stone, which being removed, the person descended some steps to the surface of the water, and on his return poured into a trough that which he had brought up (Gen. xxiv. 11-15; xxix. 3-10; Exod. ii. 16; Judg. v. 11). There is, in fact, no intimation of any other way of drawing water from wells in Scripture. But as this could only be applicable in cases where the well was not deep, we must assume that they had the use of those contrivances which are still employed in the East, and some of which are known from the Egyptian monuments to have been very ancient. This conclusion is the more probable as the wells in Palestine are mostly deep (Prov. xx. 5; John iv. 11). Jacob's well near Shechem is said to be 120 feet deep, with only fifteen feet of water in it; and the labour of drawing from so deep a well probably originated the first reluctance of the woman of Samaria to draw water for Jesus: 'Sir, thou hast nothing to draw with, and the well is deep.' From this deeper kind of well the water is drawn by hand in a leathern bucket not too heavy, sometimes by a windlass, but oftener, when the water is only of moderate depth, by the *shadowf*, which is the most common and simple of all the machines used in the East for raising

water, whether from wells, reservoirs, or rivers. This consists of a tapering lever unequally balanced upon an upright body variously constructed, and from the smaller end of which is suspended the bucket by a rope. This, when lowered into the well, is raised full of water by the weight of the heavier end. By this contrivance the manual power is applied in lowering the bucket into the well, for it rises easily, and it is only necessary to regulate the ascent. This machine is in use under slight modifications from the Baltic to the Yellow Sea, and was so from the most remote ages to the present day. The specimen in the annexed woodcut occurs in the neighbourhood of Jaffa. The water of wells, as well as of fountains, was by the Hebrews called 'living water,' translated 'running water,' and was highly esteemed (Lev. xiv. 5; Num. xix. 17). It was thus distinguished from water preserved in cisterns and reservoirs.

WEAPONS. [ARMS.]

WEASEL. The *Viverridae* and *Mustellidae* appear, both anciently and among ourselves, collected into a kind of group, under an impression that they belong to the feline family; hence we, like the ancients, still use the words civet-cat, tree-cat, pole-cat, &c.; and, in reality, a considerable number of the species have partially retractile claws, the pupils of the eyes being contractile like those of cats, of which they even bear the spotted and streaked liveries. All such naturally have arboreal habits, and from their low lengthy forms are no less disposed to burrow; but many of them, chiefly in other hemispheres, are excellent swimmers. One of these species, allied to if not the same as *genetta barbara*, is the *Thela Elan*, by Bochart described as having 'various colours, and as being spotted like a pard.' There are besides, in the same region, the *nimse* ferret or pole-cat, for these two are not specifically distinct, the weasel differing from ours chiefly in its superior size and darker colours. A *paradoxurus*, identical with or nearly allied to *P. typus*, occurs in Arabia;

327. [Paradoxurus Typus—the Palm-Martin.]

for it seems these animals are found wherever there are *palmiferae*, the date-palm in particular being a favourite residence of the species. Two or three varieties, or perhaps species, of *nems* occur in Egypt solely. Arabia Proper has several other animals not clearly distinguished, though belonging to the families here noticed.

WEAVING is too necessary an art not to have existed in the early periods of the world. It ap-

pears, indeed, to have in all nations come into existence with the first dawns of civilization. The Egyptians had, as might be expected, already made considerable progress therein when the Israelites tarried amongst them; and in this as well as in many other of the arts of life, they became the instructors of that people. Textures of cotton and of flax were woven by them; whence we read of the 'vestures of fine linen' with which Pharaoh arrayed Joseph (Gen. xli. 42); terms which show that the art of fabricating cloth had been successfully cultivated. Indeed Egypt was celebrated among the Hebrews for its manufacturing skill. Thus Isaiah (xix. 9) speaks of 'them that work in fine flax, and them that weave net-works.' That these fabrics displayed taste as well as skill may be inferred from Ezekiel xxvii. 7, 'Fine linen with broidered work from Egypt.' So in Prov. vii. 16, 'I have decked my couch with coverings of tapestry, with fine linen of Egypt.' If, however, the Hebrews learnt the art of weaving in Egypt, they appear to have made progress therein from their own resources, even before they entered Palestine; for having before them the prospect of a national establishment in that land, they would naturally turn their attention to the arts of life, and had leisure as well as occasion, during their sojourn of forty years in the wilderness, for practising those arts; and certainly we cannot but understand the words of Moses to imply that the skill spoken of in Exod. xxxv. 30, sq., came from a Hebrew and not a foreign impulse. Among the Israelites weaving, together with spinning, was for the most part in the hands of females (Prov. xxxi. 13, 19); nor did persons of rank and distinction consider the occupation mean (Exod. xxxv. 25; 2 Kings xliii. 7). But as in Egypt males exclusively, so in Palestine men conjointly with women, wove (Exod. xxxv. 35). From 1 Chron. iv. 21 it may be inferred that there were in Israel a class of master-manufacturers. The loom, as was generally the case in the ancient world, was high, requiring the weaver to stand at his employment.

Connected with the loom are, 1. the shuttle (Job vii. 6); 2. the weaver's beam (1 Sam. xvii. 7; 2 Sam. xxi. 19); 3. a weaver's pin (Judg. xvi. 14). The degree of skill to which the Hebrews attained it is difficult to measure. The stuffs which they wove were of linen, flax, and wool. Among the latter must be reckoned those of camels' and goats' hair, which were used by the poor for clothing and for mourning (Exod. xxvi. 7; xxxv. 6; Matt. iii. 4). Garments woven in one piece throughout, so as to need no making, were held in high repute; whence the Jews have a tradition that no needle was employed on the clothing of the high priest, each piece of which was of one continued texture. This notion throws light on the language used by John xix. 23—'the coat was without seam,'—words that are explained by those which follow, and which Wetstein regards as a gloss—'woven from the top throughout.' This seamless coat, which has lately given occasion to the great religious reformatory movement begun by the priest Rougé, would seem to indicate that our Lord, knowing that his time was now come, had arrayed himself in vestments suitable to the dignity of his Messianic office.

WEDDING. [MARRIAGE.]

WEEK. [SABBATH.]

WEEKS, FEAST OF. [PENTECOST.]

WEIGHTS AND MEASURES. This is a subject on which our knowledge is by no means complete and satisfactory, as the notices respecting it which the Bible supplies are fragmentary and scattered.

With respect to the coins in use among the Hebrews, it is evident that there prevailed among the Hebrews at an early period a very considerable and much employed metallic medium. Mention is made of talents, shekels, half-shekels, and gerahs. It is impossible to determine with absolute certainty the relative value of these coins, but the following table has been constructed from an examination of the coins of Simon Maccabæus, and is probably very nearly correct:—

Gerah	=	13.7	Paris grains.
Bekah, or common shekel	"	137	"
Sacred shekel	"	274	"
Maneh	"	13,700	"
Talent	"	822,000	"

These conclusions find corroboration by being compared with the weights of other Eastern nations, and the whole inquiry authorizes the inference that one general system prevailed in the more civilized nations, being propagated from the East, from an early period of history.

In the New Testament (Matt. xvii. 24) the Temple-tax is a didrachm; from other sources we know that this 'tribute' was half a shekel; and in verse 27 the stater is payment of this tax for two persons. Now the stater—a very common silver Attic coin, the tetradrachm—weighed 328.8 Paris grains; thus not considerably surpassing the sacred shekel (274 Paris grains). And there is reason in the passage of Matthew and in early writers for regarding the stater of the New Testament as the same with the Attic tetradrachm.

Names of measures of length are for the most part taken from members of the human body, which offered themselves, so to say, naturally for the purpose, and have generally been used in all times and places in instances where minute accuracy was not demanded.

At the basis of the Hebrew system of measures of length lies the cubit, the fore-arm, or the distance from the point of the elbow to the tip of the third finger.

A longer measure, applied in measuring buildings, was the reed, or more properly 'rod' (Ezek. xli. 8; Apoc. xxi. 15). Smaller measures of length were, 1. a span, from a root meaning to expand (the hand). 2. The breadth of the hand (1 Kings vii. 26; Exod. xxv. 25). 3. The finger (Jerem. lii. 21), the denomination of the smallest measure of length. Thus we have the breadth of the finger, of the hand, of the span—the length from the tip of the little finger to the point of the thumb,—and the cubit.

As we have no unit of measure given us in the Scriptures, nor preserved to us in the remains of any Hebrew building, and as neither the Rabbins nor Josephus afford the information we want, we have no resource but to apply for information to the measures of length used in other countries. We go to the Egyptians. The longer Egyptian

subit contained about 234·333 Paris lines, the shorter about 204·8. According to this the Heron measures of length were these:—

Sacred cubit	234·333	Paris lines.
The span	117·166	"
The palm	39·055	"
The finger	9·7637	"
Common cubit	204·8	"
The span	102·4	"
The palm	34·133	"
The finger	8·533	"

The two sets of measures, one for dry, another for liquid things, rest on the same system, as appears from the equality of the standard for dry goods, namely the ephah, with that for liquids, namely bath. Mention is made of the homer, cab, bath and ephah—which are the same, bin, and log. The relations of these measures to the homer, the greatest of them, is exhibited in the following table:—

Homer	1				
Bath and Ephah	10	1			
Seah	30	3	1		
Hin	60	6	2	1	
Gomer	100	10	3½	1½	1
Cab	180	18	6	3	1½
Log	720	72	24	12	7½

The actual size of these measures, as stated by Josephus, is as follows:—

	SIZE.	WHEAT IN WATER.
	Par. cub. in.	Par. gr.
Homer	19857·7	7398000
Ephah	1985·77	739800
Seah	661·92	246600
Hin	330·96	123300
Gomer	198·577	73980
Cab	110·32	41100
Log	27·58	10275

Böckh has proved that it is in Babylon we are to look for the foundations of the metrological systems of the ancient world; for the entire system of measures, both eastern and western, must be referred to the Babylonish foot as to its basis. On Babylon also the ancient world was dependent for its astronomy. Hence Babylon appears as the land which was the teacher of the east and the west in astronomical and mathematical knowledge, standing as it were in the middle of the ancient world, and sending forth rays of light from her two extended hands. Palestine could not be closed against these illuminations, which in their progress westward must have enlightened its inhabitants, who appear to have owed their highest earthly culture to the Babylonians and the Egyptians.

WELL. [WATER.]

WEST. The Shemite, in speaking of the quarters of the heavens, &c., supposes his face turned towards the east; so that the east is before him; the south on his right hand; the north on his left hand, and the west behind him; and the various words employed to designate the quarters of the heavens have literally the signification mentioned (*Voyage en Syrie*, tom. i. p. 297; Shaw's *Travels*, p. 329).

WHALE occurs in several places of the Old Testament, and once in the New Testament. In the passages where scales and feet are mentioned as belonging to the animals so designated, com-

mentators have shown that the crocodile is intended, which then is synonymous with the leviathan; and they have endeavoured also to demonstrate, where they draw the dogs to suckle their young, that seals are meant, although cetacea nourish theirs in a similar manner. It may be doubted whether, in most of the cases, the poetical diction points absolutely to any specific animal, particularly as there is more force and grandeur in a generalized and collective image of the huge monsters of the deep, not inappropriately so called, than in the restriction to any one species, since all are in Gen. i. 26 made collectively subservient to the supremacy of man. But criticism is still more inappropriate when, not contented with pointing to some assumed species, it attempts to rationalise miraculous events by such arguments; as in the case of Jonah, where the fact of whales having a small gullet, and not being found in the Mediterranean, is adduced to prove that the huge fish was not a cetacean, but a shark! It may be observed, besides, of cetaceous animals, that though less frequent in the Mediterranean than in the ocean, they are far from being unknown there.

WHEAT occurs in various passages of Scripture, and there can be no doubt that the word so rendered has this signification.

Wheat having been one of the earliest cultivated grains, is most probably of Asiatic origin, as no doubt Asia was the earliest civilized, as well as the first peopled country. As both wheat and barley are cultivated in the plains of India in the winter months, where none of the species of these

329. [Triticum compositum—Egyptian Wheat.]

genera are indigenous, it is probable that both have been introduced into India from the north, that is, from the Persian, and perhaps from the Tartarian region, where these and other species of barley are most successfully and abundantly cultivated. Different species of wheat were no doubt cultivated by the ancients; but both barley and wheat are too well known to require further illustration in this place.

WHIRLWIND. [WINDS.]
WILDERNESS. [DESERTS.]

WILLOW-TREE (Ezek. xvii. 5). The species of willow here referred to is supposed to be a peculiar sort called *safesf*, the *Salix Egyptiaca*

329. [*Salix Egyptiaca*.]

of botanists. The stems and twigs are long, thin, weak, and of a pale yellow-colour; on their twigs here and there are shoots of a span long, like unto the Cypriotish wild fig-trees, which put forth in the spring tender and woolly flowers, like unto the blossoms of the poplar-tree, only they are of a more drying quality, of a pale colour, and a fragrant smell. The inhabitants pull of these great quantities, and distil a very precious and sweet water out of them.

WIMPLE. [VEIL.]

WIND. The Hebrew word signifies *air in motion* generally, as breath, wind, &c. It is used, 1. for the wind as a *natural phenomenon* (Gen. iii. 8; Job xxi. 18; xxx. 15, 22; xxxvii. 21; Ps. i. 4; ciii. 16; Prov. xxx. 4; Eccles. i. 6; xi. 4; Isa. vii. 2; xvii. 13; xl. 7; Jer. x. 13; li. 16; Amos xiv. 13). It is poetically ascribed to the immediate agency of God (Ps. cxxxv. 7; cxlvii. 18). 2. The wind occurs as the *medium of the divine interposition, or agency* (Gen. i. 2; viii. 1; Ex. xv. 10; Num. xi. 31; 1 Kings xviii. 45; xix. 11; Job i. 19; Isa. xi. 5; Jonah i. 4). In the New Testament, the wind was supernaturally employed at the day of Pentecost, like the 'sound' and 'fire' (Acts ii. 3). [SPIRIT.] To this class of instances we refer Gen. i. 2, 'and the Spirit of God moved upon the face of the waters.' Along with Patrick and Rosenmüller, we construe the phrase, 'a wind of God,' a wind employed as the medium of divine agency. 3. The wind is used *metaphorically* in the following instances: 'The wings of the wind' denote the most rapid motion (2 Sam. xxii. 11). Anything light or trifling is

called wind (Job vii. 7; Isa. xli. 29; Ps. lxxviii. 39; comp. Eph. iv. 14; Eccles. v. 9). Violent yet empty speech is called 'a strong wind,' or a mere tempest of words (Job vii. 2). 'Vain knowledge' is called knowledge of wind (Job xv. 2); 'vain words,' words of wind (xvi. 3). Many expressive phrases are formed with this word. 'To inherit the wind,' denotes extreme disappointment (Prov. xi. 29); 'to hide the wind,' impossibility (xxvii. 16); 'to labour for the wind,' to labour in vain (Ecc. v. 16); 'to bring forth wind,' great patience and pains for no purpose (Isa. xxvi. 18; comp. Hos. viii. 7; xii. 1); 'to become wind,' to result in nothingness (Jer. v. 13). 'The four winds' denote the four quarters of the globe (Ezek. xxxvii. 9); 'to scatter to all winds,' to disperse completely (Ezek. v. 10; xii. 41; xvii. 21); 'to cause to come from all winds,' to restore completely (xxxvii. 9). 'The wind hath bound her upon her wings,' means deportation into a far country (Hos. iv. 19); 'to sow the wind and reap the whirlwind,' unwise labour and a fruitless result (viii. 7); 'to feed on the wind,' to pursue delusory schemes (xii. 1); 'to walk in wind,' to live and act in vain (Micah ii. 11); 'to observe the wind,' to be over cautious (Eccles. xi. 4); 'to winnow with every wind,' to be credulous, apt to receive impressions (v. 9). 4. The east wind. Dr. Shaw remarks, that every wind is called by the Orientals an east wind which blows from any point of the compass between the east and north, and between the east and south (*Travels*, p. 285). If the east wind happens to blow a few days in Palestine during the months of May, June, July, and August, it occasions great destruction to the vines and harvests on the land, and also to the vessels at sea on the Mediterranean. It is accordingly often used to denote any pernicious wind, as in Ps. xlviii. 7. It is used *metaphorically* for pernicious speech, a storm of words (Job xv. 2); calamities, especially by war (Isa. xxvii. 8; Jer. xviii. 17; Ezek. xvii. 10; xix. 12; xxvii. 26; Hos. xiii. 15). The east wind denotes divine judgment (Job xxvii. 21). Phrases.—'To follow the east wind,' is to pursue a delusory and fatal course (Hos. xii. 1). 5. West wind. 6. North wind (Prov. xxv. 23). 7. South wind (Job xxxvii. 17; Ps. lxxviii. 26; Luke xii. 55); Sirocco (Acts xxvii. 13). 8. The four winds. This phrase is equivalent to the four quarters of the world (Ezek. xxxvii. 9; 2 Esdras xiii. 5), the several points of the compass, as we should say (Dan. viii. 8). Phrases.—'Striving of the four winds,' is great political commotions (Dan. vii. 2; comp. Jer. iv. 11, 12; li. 1); 'to hold the four winds,' is by contrary to secure peace (Rev. vii. 1); 'to be divided to the four winds,' implies utter dispersion (Dan. xi. 4; Jer. xlix. 32; Ezek. v. 10, 12; xvii. 2). The Hebrews, like other ancient nations, had but few names of winds. One Greek name of a wind occurs in Acts xvii. 14, *Euroclydon*, a tempestuous wind in the Mediterranean, now called a *Levanter*. *Εἰπός, Eurros*, 'east wind,' and *κλύδων*, 'a wave,' quasi an eastern tempest. Other MSS. read *Εὐρυκλύδων*, *Euryclydon*, from *εὐρύς*, 'broad,' and *κλύδων*, 'a wave,' or rough wavy sea; and then the word would mean the wind which peculiarly excites the waves. Shaw defends the common reading, and describes the wind as blowing in all directions from the N.E. round by the N. to the S.E.

(*Travels*, p. 330, &c. 4to.; see Bowyer's conjectures, and Doddridge, *in loc.*). The Hebrews had no single terms indicating the relative velocity of the air in motion, like our words breeze, gale, &c. Such gradations they expressed by some additional word, as 'great,' רוח גדולה, 'a great wind' (Jonah i. 4), 'rough,' קשה, &c. Nor have we any single word indicating the destructive effects of the wind, like their verbs סעך and שם, ואסעם (Zech. vii. 14, &c.), and answering to the Greek word *νεμεφωρος* (see Sept. of Gen. xli. 6, 23). Our metaphorical use of the word *storm* comes nearest. The phrase רוח סערה, 'stormy wind,' *νεμεφωρὸς καταιγίλος*, *spiritus procella*, occurs in Ps. cvii. 25; cxlviii. 8. It is metaphorically used for the divine judgments (Ezek. xiii. 11, 13). The word usually translated 'whirlwind' means more properly a storm (2 Kings ii. 1, 11; Job xxxviii. 1; xl. 6; Zech. ix. 14). The Hebrew word is used metaphorically for the divine judgments (Isa. xl. 24; xli. 16); and to describe them as sudden and irresistible (Jer. xxiii. 19; xxv. 32; xxx. 23). Total defeat is often compared to 'chaff scattered by a whirlwind' (Isa. xvii. 13). It denotes the rapidity and irresistibility of the divine judgments (Isa. lxi. 5). The phrase 'to reap the whirlwind' denotes useless labour (Hos. viii. 7); 'the day of the whirlwind,' destruction by war (Amos i. 14). A beautiful comparison occurs in Prov. x. 25: 'As the whirlwind passeth, so is the wicked no more: but the righteous is an everlasting foundation.'

WINDOW. [HOUSE.]

WINE. No fewer than thirteen distinct Hebrew and Greek terms are rendered in our common version by the word 'wine.' Besides the pure juice of the grape, frequent mention is made in Scripture of a kind of boiled wine or syrup, the thickness of which rendered it necessary to mingle water with it previously to drinking (Prov. ix. 2, 5), and also of a mixed wine, made strong and enebriating by the addition of drugs, such as myrrh, mandragora, and opiates (Prov. xxiii. 30; Isa. v. 22). This custom has prevailed from the earliest ages, and is still extant in the East. We are not, however, to conclude that all mixed wine was pernicious or improper. There were two very opposite purposes sought by the mixture of drinks. While the wicked sought out a drugged mixture, and was 'mighty to mingle strong drink,' Wisdom, on the contrary, mingled her wine with water or with milk (Prov. ix. 2, 5) merely to dilute it and make it properly drinkable. Of the latter mixture Wisdom invites the people to drink freely, but on the use of the former an emphatic woe is pronounced. In Isa. xxv. 6, mention is made of 'wines on the lees.' The original signifies 'preserves' or 'jellies,' and is supposed to refer to the *wine cakes* which are esteemed a great delicacy in the East.

WINNOWER. [AGRICULTURE.]

WINTER. [PALESTINE.]

WISDOM OF SOLOMON [APOCRYPHA] is the name of one of the deuterocanonical books. The anonymous author personates King Solomon, whom he introduces as speaking; but from the citations of the prophets Isaiah and Jeremiah, it may be inferred that the writer had no intention of giving it to be understood that it was written

by Solomon; but that he only followed a common custom of Greek and other writers, in employing the name of this distinguished royal penman. It is divided into two, or, according to some, into three parts. The first six chapters contain encomiums on Wisdom, which all, and especially kings, are admonished to acquire, as the true security against present evils, and as leading to future glory and immortality, while a contrary course tends to misery here, and still greater misery hereafter. In chaps. vii. and viii. Solomon is introduced, teaching how wisdom is to be acquired; and in chap. x. is given his prayer for this inestimable gift. Chaps. x.-xix. contain historical examples, drawn from the Old Testament showing the happiness which had resulted from the pursuit of wisdom, and the fatal consequences of sin, especially the sin of idolatry. The book concludes with divers pious and philosophical observations.

The Book of Wisdom has been always 'admired for the sublime ideas which it contains of the perfections of God, and for the excellent moral tendency of its precepts' (Horne's *Introd.*). Its style, observes Bishop Lowth, after Calmet, 'is unequal, often pompous and turgid, as well as tedious and diffuse, and abounds in epithets directly contrary to the practice of the Hebrews: it is, however, sometimes temperate, poetical, and sublime.' Calmet supposes that the author had read the works of the Greek poets and philosophers.

Although there have not been wanting individuals who have contended for a Hebrew, Syriac, or Chaldean original, there can be little doubt that it was written in Greek.

Nothing is known with certainty respecting the author. All that can be concluded with any degree of probability is, that he was an Alexandrian Jew, who lived after the transplanting of the Greek philosophy into Egypt, and who seems to refer to the oppressions of the later Ptolemies. John conceives that the book was written at the close of the first or beginning of the second century before the Christian era.

WISDOM OF JESUS, SON OF SIRACH, one of the books of the Apocrypha, consists of a collection of moral sentences after the manner of the Proverbs of Solomon (i.-ix. xxiv. comp. with Prov. i.-ix.). The work is arranged upon no systematic plan, but abounds in directions relating to religion and human conduct. Wisdom is represented here, as in Proverbs, as the source of human happiness, and the same views of human life, founded on the belief of a recompense, pervade the instructions of this book also, wherein, however, a more matured reflection is perceptible. It is in fact the composition of a philosopher who had deeply studied the fortunes and manners of mankind, and did not hesitate to avail himself of the philosophy of older moralists. It abounds in grace, wisdom, and spirit, although sometimes more particular in inculcating principles of politeness than those of virtue. It is not unfrequently marked by considerable beauty and elegance of expression, occasionally rising to the sublimest heights of human eloquence. It has been observed of it by Addison (see Horne's *Introd.*, vol. iv.) that 'it would be regarded by our modern wits as one of the most shining tracts of morality that are extant, if it appeared under the name

of a Confucius or of any celebrated Grecian philosopher.'

The author calls himself Jesus, son of Sirach, of Jerusalem, but we know nothing further of him.

The original of the book was Hebrew. Its age is not easily determined; but according to the most probable hypothesis the author lived *a.c.* 180, and the translator, who was his grandson, *a.c.* 130.

WITCH. The fem., a sorceress, is found in Exod. xxii. 18; the mas., a sorcerer or magician, in Exod. vii. 11; Deut. xviii. 10; Dan. ii. 2; Mal. iii. 5. In the New Testament 'sorcerer' occurs in Rev. xxi. 8; xxii. 15.

WITCHCRAFTS occurs in 2 Kings ix. 22; Isa. lviii. 9, 12; Mic. v. 12; Nah. iii. 4; and in the New Testament, Gal. v. 20; Rev. ix. 21; xviii. 23. The precise idea, if any, now associated with the word 'witch,' but, however, devoutly entertained by nearly the whole nation in the time of our translators, is that of a female, who, by the agency of Satan, or rather, of a familiar spirit or gnome appointed by Satan to attend on her, performs operations beyond the powers of humanity, in consequence of her compact with Satan, written in her own blood, by which she resigns herself to him for ever. Among other advantages resulting to her from this engagement is the power of transforming herself into any shape she pleases; which was, however, generally that of a hare; transporting herself through the air on a broomstick, sailing 'on the sea in a sieve,' gliding through a keyhole, inflicting diseases, &c. upon mankind or cattle. The belief in the existence of such persons cannot be traced higher than the middle ages, and was probably derived from the wild and gloomy mythology of the northern nations, amongst whom the Fatal Sisters, and other impersonations of destructive agency in a female form, were prominent articles of the popular creed. A very different idea was conveyed by the Hebrew word, which probably denotes a sorceress or magician, who pretended to discover, and even to direct the effects ascribed to the operation of the elements, conjunctions of the stars, the influence of lucky and unlucky days, the power of invisible spirits, and of the inferior deities. Sir Walter Scott well observes, that 'the sorcery or witchcraft of the Old Testament resolves itself into a trafficking with idols and asking counsel of false deities, or, in other words, into idolatry.' Accordingly, sorcery is in Scripture uniformly associated with idolatry (Deut. xviii. 9-14; 2 Kings ix. 22; 2 Chron. xxxiii. 5, 6, &c.; Gal. v. 20; Rev. xxi. 8). The modern idea of witchcraft, as involving the assistance of Satan, is inconsistent with Scripture, where, as in the instance of Job, Satan is represented as powerless till God gave him a limited commission; and when 'Satan desired to sift Peter as wheat,' no reference is made to the intervention of a witch. Nor do the actual references to magic in Scripture involve its reality. The mischiefs resulting from the *pretension*, under the theocracy, to an art which involved idolatry, justified the statute which denounced it with death; though instead of the unexampled phrase, 'thou shalt not suffer to live,' Michaelis conjectures, 'shall not be' (Exod. xxii. 18), which also better suits the parallel, 'There shall not be found among you, &c., a witch' (Deut. xviii. 10). Indeed, as 'we know that an idol is nothing in the world, and that there is

none other gods but one' (1 Cor. viii. 4), we must believe all pretensions to traffic with the one, or ask counsel of the other, to be equally vain. Upon the same principle of suppressing idolatry, however, the prophets of Baal also were destroyed, and not because Baal had any real existence, or because they could avail anything by their invocations. 'The witch of Endor,' as she is commonly but improperly called, belongs to another class of pretenders to supernatural powers [DIVINATION]. She was a necromancer, or one of those persons who pretended to call up the spirits of the dead to converse with the living (see Isa. viii. 19; xxix. 4; lxx. 3). It is related as the last and crowning act of Saul's rebellion against God, that he consulted 'a woman who had a familiar spirit' (1 Sam. xxviii. 7), literally 'a mistress of the *Ob*,'—an act forbidden by the divine law (Lev. xx. 6), which sentenced the pretenders to such a power to death (ver. 27), and which law Saul himself had recently enforced (1 Sam. xxviii. 3, 9), because, it is supposed, they had freely predicted his approaching ruin; although after the well-known prophecies of Samuel to that effect, the disasters Saul had already encountered, and the growing influence of David, there 'needed no ghost to come from the grave to tell them this.' Various explanations of this story have been offered. It has been attempted to resolve the whole into *imposture and collusion*. Saul, who was naturally a weak and excitable man, had become, through a long series of vexations and anxieties, absolutely 'delirious,' as Patrick observes: 'he was afraid and his heart greatly trembled,' says the sacred writer. In this state of mind, and upon the very eve of his last battle, he commissions his *own servants* to seek him a woman 'that had a familiar spirit,' and, attended by two of them, he comes to her 'by night,' the most favourable time for imposture. He converses with her alone, his two attendants, whether his secret enemies or real friends, being absent, *somewhere*, yet, however, close at hand. 'Might not one of these, or some one else, have agreed with the woman to personate Samuel in another room?—for it appears that Saul, though he spoke with, did not *see* the ghost (ver. 13, 14): who, it should be observed, told him nothing but what his own attendants could have told him, with the exception of those words, 'to-morrow shalt thou and thy sons be with me' (ver. 19); to which, however, it is replied, that Saul's death did not occur upon the morrow, and that the word so translated is sufficiently ambiguous, for though it means 'to-morrow' in some passages, it means the future, indefinitely, in others. It is further urged, that her 'crying with a loud voice,' and her telling Saul, at the same time, that she knew him, were the well-timed arts of the sorceress, intended to magnify her pretended skill. Others are of opinion that the story may be accounted for by the theory of ventriloquism. But it is objected against this, or any other hypothesis of collusion, that the sacred writer not only represents the Pythones as affirming, but also himself affirms, that she saw Samuel, and that Samuel spoke to Saul, nor does he drop the least hint that it was not the real Samuel of whom he was speaking. Others have given a *literal interpretation* of the story, and have maintained that Samuel actually appeared to Saul. Such also is the view Josephus takes

(*Antiq.* vi. 14. 3, 4), where he bestows a laboured eulogium upon the woman. It is, however, objected, that the actual appearance of Samuel is inconsistent with all we are taught by revelation concerning the state of the dead; involves the possibility of a spirit or soul assuming a corporeal shape, conversing audibly, &c.; and further, that it is incredible that God would submit the departed souls of his servants to be summoned back to earth, by rites either utterly futile, or else deriving their efficacy from the co-operation of Satan. Others have supposed that the woman induced Satan or some evil spirit to personate Samuel. But this theory, beside other difficulties, attributes nothing less than miraculous power to the devil; for it supposes the apparition of a spiritual and incorporeal being, and that Satan can assume the appearance of any one he pleases. Others have maintained another interpretation, that the whole account is the narrative of a miracle, a *divine representation or impression*, partly upon the senses of Saul, and partly upon those of the woman, and intended for the rebuke and punishment of Saul. It is urged that God interposed with a miracle previously to the use of any magical formulae, as he did when the king of Moab had recourse to sorceries to overrule the mind of Balaam, so that he was compelled to bless those whom Balak wanted him to curse (Num. xxiii.).

WITNESS. It occurs, 1st, in the sense of a person who deposes to the occurrence of any fact, a witness of any event. It means a *judicial witness* in Exod. xxiii. 1; Lev. v. 1; Num. v. 13; xxxv. 30 (comp. Deut. xvii. 6; xix. 15; Matt. xviii. 16; 2 Cor. xiii. 1); Prov. xiv. 5; xxiv. 28; Matt. xxvi. 65; Acts vi. 13; 1 Tim. v. 19; Heb. x. 28. It is applied, generally, to a person who certifies, or is able to certify, to any fact which has come under his cognizance (Josh. xxiv. 22; Isa. viii. 2; Luke xxiv. 48; Acts i. 8, 22; 1 Thess. ii. 10; 1 Tim. vi. 12; 2 Tim. ii. 2; 1 Pet. i. 5). So in allusion to those who witness the public games (Heb. xii. 1). It is also applied to any one who testifies to the world what God reveals through him (Rev. xi. 3). In the latter sense the Greek word is applied to our Lord (Rev. i. 5; iii. 14). It is further used in the ecclesiastical sense of *martyr*.

WIZARD. [DIVINATION.]

WOLF. (Gen. xlix. 27; Isa. xi. 6; lxx. 25; Jer. v. 6, &c.; Matt. vii. 15; x. 16; Luke x. 3; John. x. 12; Acts xx. 29; Eccles. viii. 17), a fierce carnivorous animal, very nearly allied to the dog, and so well known in Europe as to require no particular description; but the identity of the species in Palestine, though often asserted, is by no means established: for no professed zoologist has obtained the animal in Syria, while other travellers only pretend to have seen it. Unquestionably a true wolf, or a wild canine with very similar manners, was not infrequent in that country during the earlier ages of the world, and even down to the commencement of our era. The prophets, as well as the Messiah, allude to it in explicit language. At this day the true wolf is still abundant in Asia Minor, as well as in the gorges of Cilicia, and from the travelling disposition of the species, wolves may be expected to reside in the forests of Libanus; but there is no satisfactory evidence that this is at present the case. It may be, as there are no

forests to the south of Lebanon, that these ravenous beasts, who never willingly range at a distance from cover, have forsaken the more open country.

330. [Egyptian Wolf.]

WOMAN. Like our own term Woman, the Hebrew word now so translated is used of married and unmarried females. The derivation of the word shows that according to the conception of the ancient Israelites woman was man in a modified form—one of the same race, the same genus, as man; a kind of female man. How slightly modified that form is, how little in original structure woman differs from man, physiology has made abundantly clear. Different in make as man and woman are, they differ still more in character; and yet the great features of their hearts and minds so closely resemble each other, that it requires no depth of vision to see that these twain are one. This most important fact is characteristically set forth in the Bible in the account given of the formation of woman out of one of Adam's ribs (Gen. ii. 21-24). Those who have been pleased to make free with this simple narrative may well be required to show how a rude age could more effectually have been taught the essential unity of man and woman—a unity of nature which demands, and is perfected only in, a unity of soul. The conception of the Biblical writer goes beyond even this, but does not extend farther than science and experience unite to justify. There was solid reason why it was not good for Adam 'to be alone.' Without an help meet he would have been an imperfect being. The genus homo consists of man and woman. Both are necessary to the idea of man. The one supplements the qualities of the other. They are not two, but one flesh, and as one body so one soul.

It will at once be seen that under the influence of a religion, at the bottom of which lay those ideas concerning the relations of the sexes one to another, slavery on the part of the woman was impossible. This fact is the more noticeable, and it speaks the more loudly in favour of the divine origin of the religion of the Bible, because the East has in all times, down to the present day, kept woman everywhere, save in those places in which Judaism and Christianity have prevailed, in a state of low, even if in some cases gilded, bondage, making her the mere toy, plaything, and instrument of man.

The singular beauty of the Hebrew women, and the natural warmth of their affections, have conspired to throw gems of domestic loveliness

over the pages of the Bible. In no history can there be found an equal number of charming female portraits. From Hagar down to Mary

331. [Syro-Arabian costume. In-door dress.]

and Martha, the Bible presents pictures of womanly beauty that are unsurpassed and rarely paralleled. But we should very imperfectly represent in these general remarks the formative influence of the female character as seen in the Bible, did not we refer these amiable traits of character to the pure and lofty religious ideas which the Biblical books present. If woman there appears as the companion and friend of man, she owes her elevation in the main to the religion of Moses and to that of Jesus. The first system—as a preparatory one—did not and could not complete the emancipation of woman. There was

332. [Young lady in full dress.]

needed the finishing touch which the Great Teacher put to the Mosaic view of the relations between the sexes. Recognising the fundamental truths which were as old as the creation of man, Jesus proceeded to restrain the much-abused facility of divorce, leaving only one cause why the marriage-bond should be broken, and at the same time teaching that as the origin of wedlock was divine, so its severance ought not to be the work of man. Still further—bringing to bear on the domestic ties his own doctrine of immortality, he

made the bond co-existent with the undying soul, only teaching that the connection would be refined with the refinement of our affections and our liberation from these tenements of clay in which we now dwell (Matt. v. 32; xix. 3, sq.; xxii. 23, sq.). With views so elevated as these, and with affections of the tenderest benignity, the Saviour may well have won the warm and gentle hearts of Jewish women. Accordingly, the purest and richest human light that lies on the pages of the New Testament, comes from the band of high-minded, faithful, and affectionate women, who are found in connection with Christ from his cradle to his cross, his tomb and his resurrection. These ennobling influences have operated on society with equal benefit and power. Woman, in the better portions of society, is now a new being. And yet her angelic career is only just begun. She sees what she may, and what under the Gospel she ought to be; and ere very long, we trust, a way will be found to employ in purposes of good, energies of the finest nature which now waste away, from want of scope, in the ease and refinements of affluence, if not in the degradations of luxury—a most precious offering made to the Moloch of fashion, but which ought to be consecrated to the service of that God who gave these endowments, and of that Saviour who has brought to light the rich capabilities, and exhibited the high and holy vocation of the female sex.

WOMEN appear to have enjoyed considerably more freedom among the Jews than is now allowed them in western Asia, although in other respects their condition and employments seem to have been not dissimilar.

The employments of the women were very various, and sufficiently engrossing. In the earlier or patriarchal state of society, the daughters of men of substance tended their fathers' flocks (Gen. xxix. 9; Exod. ii. 16). In ordinary circumstances the first labour of the day was to grind corn and bake bread, as already noticed. The other cares of the family occupied the rest of the day. The women of the peasantry and of the poor consumed much time in collecting fuel, and in going to the wells for water. The wells were usually outside the towns, and the labour of drawing water from them was by no means confined to poor women. This was usually, but not always, the labour of the evening; and the water was carried in earthen vessels borne upon the shoulder (Gen. xxiv. 15-20; John iv. 7, 28). Working with the needle also occupied much of their time, as it would seem that not only their own clothes but those of the men were made by the women. Some of the needlework was very fine, and much valued (Exod. xxvi. 36; xxviii. 39; Judg. v. 30; Ps. xlv. 14). The women appear to have spun the yarn for all the cloth that was in use (Exod. xxxv. 25; Prov. xxxi. 19); and much of the weaving seems also to have been executed by them (Judg. xvi. 13, 14; Prov. xxxi. 22). The tapestries for bed-coverings, mentioned in the last cited text, were probably produced in the loom, and appear to have been much valued (Prov. vii. 16).

We have no certain information regarding the dress of the women among the poorer classes; but it was probably coarse and simple, and not

materially different from that which we now see among the Bedouin women, and the female peasantry of Syria. This consists of drawers, and a long and loose gown of coarse blue linen, with some ornamental bordering wrought with the needle, in another colour, about the neck and bosom. The head is covered with a kind of tur-

333. [Matron in full dress.]

ban, connected with which, behind, is a veil, which covers the neck, back, and bosom [VEIL]. We may presume, with still greater certainty, that women of superior condition wore over their inner dress a frock or tunic like that of the men, but more closely fitting the person, with a girdle formed by an unfolded kerchief. Their head-dress was a kind of turban, with different sorts of

334. [Nose-jewel.]

veils and wrappers used under various circumstances. The hair was worn long, and, as now, was braided into numerous tresses, with trinkets and ribands (1 Cor. xi. 15; 1 Tim. ii. 9; 1 Pet.

iii. 3). With the head-dress the principal ornaments appear to have been connected, such as a jewel for the forehead, and rows of pearls (Sol. Song, i. 10; Ezek. xvi. 12). Ear-rings were also worn (Isa. iii. 20; Ezek. xvi. 12), as well as a nose-jewel, consisting, no doubt, as now, either of a ring inserted in the cartilage of the nose, or an ornament like a button attached to it. The nose-jewel was of gold or silver, and sometimes set with jewels (Gen. xxiv. 47; Isa. iii. 21). Bracelets were also generally worn (Isa. iii. 19; Ezek. xvi. 11), and anklets, which, as now, were probably more like fetters than ornaments (Isa. iii. 16, 20). The Jewish women possessed the art of staining their eye-lids black, for effect and expression (2 Kings ix. 30; Jer. iv. 30; Ezek. xxiii. 40); and it is more than probable that they had the present practice of staining the nails, and the palms of their hands and soles of their feet, of an iron-rust colour, by means of a paste made from the plant called *henna*. This plant appears to be mentioned in Sol. Song, i. 14, and its present use is probably referred to in Deut. xxi. 12; 2 Sam. xix. 24.

The customs concerning marriage, and the circumstances which the relation of wife and mother involved, have been described in the article MARRIAGE.

The Israelites eagerly desired children, and especially sons. Hence the messenger who first brought to the father the news that a son was born, was well rewarded (Job iii. 3; Jer. xx. 15). The event was celebrated with music; and the father, when the child was presented to him, pressed it to his bosom, by which act he was understood to acknowledge it as his own (Gen. i. 23; Job iii. 12; Ps. xxii. 10). On the eighth day from the birth the child was circumcised (Gen. xvii. 10); at which time also a name was given to it (Luke i. 59). The first-born son was highly esteemed, and had many distinguishing privileges. He had a double portion of the estate (Deut. xxi. 17); he exercised a sort of parental authority over his younger brothers (Gen. xxv. 23, &c.; xxvii. 29; Exod. xii. 29; 2 Chron. xxi. 3); and before the institution of the Levitical priesthood he acted as the priest of the family (Num. iii. 12, 13; viii. 18). The patriarchs exercised the power of taking these privileges from the firstborn, and giving them to any other son, or of distributing them among different sons; but this practice was overruled by the Mosaic law (Deut. xxi. 15-17).

The child continued about three years at the breast of the mother, and a great festival was given at the weaning (Gen. xxi. 8; 1 Sam. i. 22-24; 2 Chron. xxxi. 6; Matt. xxi. 16). He remained two years longer in charge of the women; after which he was taken under the especial care of the father, with a view to his proper training (Deut. vi. 20-25; xi. 19). It appears that those who wished for their sons better instruction than they were themselves able or willing to give, employed a private teacher, or else sent them to a priest or Levite, who had perhaps several others under his care. The principal object was, that they should be well acquainted with the law of Moses; and reading and writing were taught in subservience to this leading object.

The authority of a father was very great among the Israelites, and extended not only to his sons,

but to his grandsons—indeed to all who were descended from him. His power had no recognised limit, and even if he put his son or grandson to death, there was, at first, no law by which he could be brought to account (Gen. xxi. 14; xxxviii. 24). But Moses circumscribed this power, by ordering that when a father judged his son worthy of death, he should bring him before the public tribunals. If, however, he had struck or cursed his father or mother, or was refractory or disobedient, he was still liable to capital punishment (Exod. xxi. 15, 17; Lev. xx. 9; Deut. xxi. 18-21).—Ed.

WOOL. [SHEEP.]

WORMWOOD, STAR OF (Rev. viii. 10, 11), the Apocalyptic appellation for the national demon of Egypt, set forth in the vision of Patmos as a luminous *idol* presiding over 'the third part of the waters.' The vocation of this star was to destroy by *poison*, not by fire, sword, or famine.

St. John seems to employ this symbol of Egyptian poison and bitterness, as the prototype of a great Anti-Christian Power, which would poison and embitter the pure waters of Christian life and doctrine, converting them into 'worm-wood.'

WORMWOOD. This proverbially bitter plant is used in the Hebrew, as in most other languages, metaphorically, to denote the moral bitterness of distress and trouble (Dent. xxix. 17; Prov. v. 4; Jer. ix. 15; xxiii. 15; Lam. iii. 15, 19; Amos v. 7; vi. 12). Thence also the name given to the fatal star in Rev. viii. 10, 11. *Artemisia* is the botanical name of the genus of plants in which the different species of wormwoods are found. The plants of this genus are easily recognised by the multitude of fine divisions into which the leaves are usually separated, and the numerous clusters of small, round, drooping, greenish-yellow or brownish flower-heads with which the branches are laden.

335. [*Artemisia Judaica*.]

It must be understood that our common wormwood does not appear to exist in Palestine, and cannot therefore be that specially denoted by the Scriptural term. Indeed it is more than probable that the word is intended to apply to *all* the plants of this class that grew in Palestine, rather than to any one of them in particular. The examples of this genus that have been found in that country are:—1. *Artemisia Judaica*, which, if a particular species be intended, is probably the Absinthium of Scripture. Rauwolf found it about Bethlehem, and Shaw in Arabia and the deserts of Numidia plentifully. This plant is erect and shrubby, with stem about eighteen inches high. Its taste is very bitter; and both the leaves and seeds are much used in Eastern medicine, and are reputed to be tonic, stomachic, and antihelminthic. 2. *Artemisia Romana*, which was found by Hasselquist on Mount Tabor. This

species is herbaceous, erect, with stem one or two feet high (higher when cultivated in gardens), and nearly upright branches. The plant has a pleasantly aromatic scent; and the bitterness of its taste is so tempered by the aromatic flavour as scarcely to be disagreeable. 3. *Artemisia abrotanum*, found in the south of Europe, as well as in Syria and Palestine, and eastward even to China. This is a hoary plant, becoming a shrub in warm countries; and its branches bear loose panicles of nodding yellow flower-heads. It is bitter and aromatic, with a very strong scent. It is not much used in medicine; but the branches are employed in imparting a yellow dye to wool.

WRESTLING. [GAMES.]

WRITING is an art by which facts or ideas are communicated from one person to another by means of given signs, such as symbols or letters. It has been a generally received and popular opinion that writing was first used and imparted to mankind when God wrote the Ten Commandments on the tables of stone; but the silence of Scripture upon the subject would rather suggest that so necessary an art had been known long before that time, or otherwise the sacred historian would probably have added this extraordinary and divine revelation to the other parts of his information respecting the transactions on Mount Sinai.

After the gift of language (which was indispensable to rational creatures), it would seem that *writing* was the most highly beneficial and important boon which could be conferred on men possessed of intellect and understanding, who from their circumstances must divide and spread over the whole earth, and yet be forced from various necessities to maintain intercourse with each other. Even in the first ages of the world writing was requisite to transmit and receive accurately intelligence from the scattered communities, to convey to posterity events which were destined to act upon all time, and especially to preserve unimpaired the knowledge of God. Is it then too much to believe that God by revelation immediately imparted to mankind the power of writing? For it does not appear that any person ever invented an alphabet who had not previously heard of or seen one; and every nation which possessed the art always professed to have derived its knowledge from a God.

It was a matter of the utmost consequence that the most exact accounts should have been preserved of the creation, the fall of man, and many prophecies of deepest interest to unborn generations. The ages and genealogies of the patriarchs; the measures of the ark; the first kingly government in Assyria; the history of Abraham and his descendants for 430 years, including minute circumstances, changes, and conversations, in many different countries; could scarcely have been perfectly preserved by *oral* descent for twenty centuries, unless the antediluvians and their immediate posterity did not partake of the failings of Christians in the defects of forgetfulness and exaggeration; but allowing the art of *writing* to have been given with language, there is no difficulty, and it becomes obvious that each transaction would be recorded and kept exactly as it was either revealed or happened.

It is evident from the allusions made to the subject in the sacred Scriptures, that the know-

ledge of writing was possessed by the human family at a very early period. In the fifth chapter of Genesis it is said, 'This is the *book* of the generations.' If there had been merely a traditionary recollection of 'the generations of Adam,' preserved only by transmission from one memory to another for more than a thousand years, the term *book* would have been most inapplicable, and could not have been used.

In the book of Job, which is considered to be the most ancient written document extant, it is said (chap. xix. 23, 24), 'Oh, that my words were now written! Oh, that they were printed in a *book*! that they were graven with an iron pen!' Also Job xxxi. 35, 'mine adversary had written a *book*.' Such expressions could not have been used, and would have had no meaning, if the art of writing had been unknown; nor could there have been such terms as *book* and *pen*, if the things themselves had not existed.

If, then, it be granted that the book of Job was written, and such expressions were current before the Exode, it becomes evident from sacred history that writing was not only in use before the law was given on Mount Sinai, but that it was also known amongst other patriarchal tribes than the children of Israel.

Before the law was given by God to Moses, he had been commanded to write the important transactions which occurred during the progress of the Israelites from Egypt to Canaan; for in Exod. xvii. 14 it is recorded, 'And the Lord said unto Moses, Write this for a memorial in a *book*.' An account of the discomfiture of the Amalekites is the first thing said to have been written by Moses. This battle was fought ere the people left Rephidim (Exod. xvii. 13), from whence they departed into the wilderness of Sinai (Exod. xix. 2), and therefore that writing was drawn up before the events on the mount took place. The law was 'written by the finger of God' (Exod. xxxi. 18) B.C. 1491, and since that time there is no question as to the existence of the art of writing.

336. [Ancient Writing materials.]

Books and writing must have been familiar to Moses, 'who was learned in all the wisdom of the Egyptians' (Acts vii. 22), for at the time of his birth that people had arrived at a high pitch of civilization; and now that the mysterious hieroglyphics have been deciphered, it has been found that from the earliest era Egypt possessed a knowledge of writing, and that many of the

inscriptions were written before the Exodus of the Hebrews.

Letters are generally allowed to have been introduced into Europe from Phœnicia, and to have been brought from thence by Cadmus into Greece, about fifteen centuries before Christ, which time coincides with the eighteenth Egyptian dynasty; but whilst none may deny such to have been the origin of European alphabetical characters, it does not prove the Phœnicians to have been the inventors of writing. That people occupied Phœnicia in very early times after the Deluge; and if the patriarch and his sons possessed the knowledge of letters, their posterity would doubtless preserve the remembrance and practice of such an invaluable bequest, which would be conveyed by their colonists into Greece and Africa. In the New World it was found that the Peruvians had no system of writing, whilst the Mexicans had made great advances in hieroglyphical paintings. The Aztecs, who preceded the Mexicans, had attained much proficiency in the art, such as was adequate to the wants of a people in an imperfect state of civilization.

Various have been the materials and implements used for writing. Paper made from the papyrus is now in existence which was fabricated 2000 years B.C. Moses hewed out of the rock two tables of *stone* on which the Commandments were written (Exod. xxxiv. 1). After that time the Jews used rolls of *skins* for their sacred writings. They also engraved writing upon gems or gold plates (Exod. xxxix. 30).

Before the discovery of paper the Chinese wrote upon thin boards with a sharp tool. Reeds and canes are still used as writing implements amongst the Tartars; and the Persians and other Orientals write for temporary purposes on leaves, or smooth sand, or the bark of trees. The Arabs in ancient times wrote their poetry upon the shoulder-blades of sheep.

The Greeks occasionally engraved their laws on tables of brass. Even before the days of Homer table-books were used, made of wood, cut in thin slices, which were painted and polished, and the pen was an iron instrument called a style. In later times these surfaces were waxed over, that the writing might be obliterated for further use. Table-books were not discontinued till the fourteenth century of the Christian era.

At length the superior preparations of paper, parchment, and vellum, became general, and superseded other materials in many, and all entirely civilized, nations.

Y.

YEAR. The Hebrew year consisted of twelve unequal months, which, previously to the exile, were lunar. The twelve solar months made up only 354 days, constituting a year too short by no fewer than eleven days. This deficiency would have soon inverted the year, and could not have existed even for a short period of time without occasioning derangements and serious inconvenience to the Hebrews, whose year was so full of festivals. At an early day, then, we may well believe a remedy was provided for this evil. The

course which the ancients pursued is unknown, but Ideler (*Chronol.* i. 490) may be consulted for an ingenious conjecture on the subject. The later Jews intercalated a month every two or every three years, taking care, however, to avoid making the seventh an intercalated year. The supplementary month was added at the termination of the sacred year, the twelfth month (February and March), and as this bore the name of Adar, so the interposed month was called Vendar, or Adar the Second. The year, as appears from the ordinary reckoning of the months (*Lev.* xxiii. 34; *xxv.* 9; *Num.* ix. 11; 2 Kings xxv. 8; *Jer.* xxxix. 2; comp. 1 Macc. iv. 52; x. 21), began with the month Nisan (*Esth.* iii. 7), agreeably to an express direction given by Moses (*Exod.* xii. 2; *Num.* ix. 1). This commencement is generally thought to be that of merely the ecclesiastical year; and most Jewish, and many Christian authorities, hold that the civil year originally began, as now, with the month Tisri. The ancient Hebrews possessed no such thing as a formal and recognised era. Their year and their months were determined and regulated, not by any systematic rules of astronomy, but by the first view or appearance of the moon. In a similar manner they dated from great national events, as the departure from Egypt (*Exod.* xix. 1; *Num.* xxxiii. 38; 1 Kings vi. 1); from the ascension of monarchs, as in the books of Kings and Chronicles; or from the erection of Solomon's temple (1 Kings viii. 1; ix. 10); and at a later period, from the commencement of the Babylonish captivity (*Ezek.* xxxiii. 21; xl. 1). When they became subjects of the Græco-Syrian empire they adopted the Secucid era, which began with the year B.C. 312, when Seleucus conquered Babylon.

Z.

1. ZABAD (*God given*), a person of the tribe of Judah, mentioned in 1 Chron. ii. 36, among the descendants of Sheshan, by the marriage of his daughter with an Egyptian servant [*JARHA*; *SHESHAN*].

2. ZABAD, a grandson of Ephraim, who, with others of the family, was killed during the lifetime of Ephraim, by the men of Gath, in an attempt which the Hebrews seem to have made to drive off their cattle (1 Chron. vii. 21). [See *EPHRAIM*.]

3. ZABAD, son of an Ammonitess named Shimeath, who, in conjunction with Jehozabad, the son of a Moabitess, slew King Joash, to whom they were both household officers, in his bed (2 Kings xii. 21; 2 Chron. xxiv. 25, 26). In the first of these texts he is called Jozachar. The sacred historian does not appear to record the mongrel parentage of these men as suggesting a reason for their being more easily led to this act, but as indicating the sense which was entertained of the enormity of Joash's conduct, that even they, though servants to the king, and though only half Jews by birth, were led to conspire against him 'for the blood of the sons of Jehoiada the priest.' It would seem that their murderous act was not abhorred by the people; for Amaziah, the son of Joash, did not venture to call them to account till he felt himself well established on

the throne, when they were both put to death (2 Kings xiv. 5, 6; 2 Chron. xxv. 3, 4).

4. ZABAD, one of the persons who, at the instance of Ezra, put away the foreign wives they had taken after the return from captivity (*Ezra* x. 27).

ZABUD (*bestowed*), a son of Nathan the prophet, who held under Solomon the important place of 'king's friend,' or favourite (1 Kings iv. 5), which Hushai had held under David (1 Chron. xxvii. 33), and which a person named Elkanah held under Ahaz (2 Chron. xxviii. 7). Azariah, another son of Nathan, was 'over all the (household) officers' of king Solomon; and their advancement may doubtless be ascribed not only to the young king's respect for the venerable prophet, who had been his instructor, but to the friendship he had contracted with his sons during the course of education. The office, or rather honour, of 'friend of the king,' we find in all the despotic governments of the East. It gives high power, without the public responsibility which the holding of a regular office in the state necessarily imposes. It implies the possession of the utmost confidence of, and familiar intercourse with, the monarch, to whose person 'the friend' at all times has access, and whose influence is therefore often far greater, even in matters of state, than that of the recognised ministers of government.

ZABULUN. [*ZEBULUN*.]

ZACCHÆUS, a superintendent of taxes at Jericho. Having heard of the Redeemer, he felt a great desire to see him as he drew near that place; for which purpose he climbed up into a sycamore-tree, because he was little of stature. Jesus, pleased with this manifestation of his eagerness, and knowing that it proceeded from a heart not far from the kingdom of God, saw fit to honour Zacchæus by becoming his guest. This offended the self-righteous Jews, who objected that 'he was gone to be a guest with a man that is a sinner.' This offensive imputation was met by Zacchæus in the spirit of the Mosiac conception of goodness—'The half of my goods I give to the poor; and if I have taken anything from any man by false accusation, I restore him fourfold.' He that knew the heart of man knew not only the truth of this statement, but that the good works of Zacchæus emanated from right motives, and therefore terminated the conversation with the words, 'This day is salvation come to this house, forasmuch as he also is a son of Abraham'—a declaration which, whether Zacchæus was by birth a Jew or not, signifies that he had the same principle of faith which was imputed to Abraham, the father of the faithful, for righteousness (*Luke* xix. 2, sq.).

Tradition represents Zacchæus as the first Christian bishop of Cæsarea.

ZACHARIAH. [*ZACHARIAH*.]

ZACHARIAS. [*ZACHARIAH*.]

ZADOK (*just*). There are several men of this name mentioned in the Old Testament.

1. In the reign of David, ZADOK (the son of Ahiub and father of Ahimaaz) (1 Chron. vi. 8) and Ahimelech were the priests (2 Sam. viii. 17). ZADOK and the Levites were with David, when, after the middle of the eleventh century B.C., he fled from Absalom; but the king ordered Zadok to carry back the ark of God into the city (2 Sam.

xx. 24, 25, 27, 29, 35, 36; xviii. 19, 22, 27). The king also, considering Zadok a seer, commanded him to return to the city, stating that he would wait in the plain of the wilderness until he should receive such information from him and his son Ahimanz, and also from the son of Abiathar, as might induce him to remove farther away. On hearing that Ahithophel had joined Absalom, David requested Hushai, his friend, to feign himself to be also one of the conspirators, and to inform Zadok and Abiathar of the counsels adopted by Absalom and his rebellious confederates. The request of David was complied with, and the plans of the rebels made known to David by the instrumentality of Zadok and the others.

After Absalom was vanquished, David sent to Zadok and Abiathar, the priests, saying, 'Speak unto the elders of Judah. Why are ye the last to bring the king back to his house?' &c. (2 Sam. xix. 11; xx. 25). When Adonijah attempted to succeed to the throne, Abiathar countenanced him, but Zadok was not called to the feast at which the conspirators assembled. King David sent for Zadok and Nathan the prophet to anoint Solomon king (1 Kings i. 32-45).

2. In 1 Chron. vi. 12, and Neh. xi. 11, another ZADOK is mentioned, the father of whom was also called Ahitub, and who begat Shallum. This Zadok descended from Zadok the priest in the days of David and Solomon, and was the ancestor of Ezra the scribe (Ezra vii. 2). We learn from Ezek. xl. 46; xliii. 19; xlv. 15; xlviii. 11, that the sons of Zadok were a pre-eminent sacerdotal family.

3. ZADOK was also the name of the father-in-law of Uzziah and the grandfather of king Jotham, who reigned about the middle of the eighth century before Christ (2 Kings xv. 33; 2 Chron. xxvii. 1).

4 and 5. Two priests of the name of Zadok are mentioned in Neh. iii. 4-29, as having assisted in rebuilding the wall of Jerusalem about A.C. 445.

The Zadok mentioned in Neh. x. 22 as having sealed the covenant, and Zadok the scribe named in Neh. xiii. 13, are probably the same who helped to build the wall.

ZAL'MON, a mountain in Samaria near to Shechem (Judg. ix. 48). Many suppose this to be the same with the Zalmon of Ps. lxxviii. 15: 'where the Almighty scattered kings in it (the land), there was snow as in Zalmon; i. e. the fields were whitened with the bones of the slain.

ZALMUN'NA. [ZEBAH and ZALMUNNA.]

ZAMZUM'MIMS, a race of giants dwelling anciently in the territory afterwards occupied by the Ammonites, but extinct before the time of Moses (Deut. ii. 20).

ZANO'AH (*marsh, bog*), one of the towns of Judah 'in the valley' (Josh. xv. 34); which Jerome identifies with a village called in his time Zanua, on the borders of Eleutheropolis, on the road to Jerusalem. The name of Zanua is still connected with a site on the slope of a low hill not far east of Ain Shems (Beth-shemesh).

ZAPHNATH-PAANEAH, an Egyptian name given by Pharaoh to Joseph in reference to his public office. Rosellini interprets it to mean 'the salvation' or 'saviour of the age.' But Gesenius and others incline rather to regard it as signifying 'sustainer of the age.'

ZAREPHATH. [SAREPTA.]

ZEALOTS, the followers of Judas the Galilonite or Galilean [JUDAS]. Josephus speaks of them as forming the 'fourth sect of Jewish philosophy,' and as distinguished from the Pharisees chiefly by a quenchless love of liberty and a contempt of death. Their leading tenet was the unlawfulness of paying tribute to the Romans, as being a violation of the theocratic constitution. This principle, which they maintained by force of arms against the Roman government, was soon converted into a pretext for deeds of violence against their own countrymen; and during the last days of the Jewish polity, the Zealots were lawless brigands or guerrillas, the pest and terror of the land. After the death of Judas, and of his two sons, Jacob and Simon (who suffered crucifixion), they were headed by Eleazar, one of his descendants, and were often denominated *Sicarii*, from the use of a weapon resembling the Roman Sica.

ZEBAH and ZALMUN'NA, chiefs of the Midianites, whom Gideon defeated and slew [GIDEON].

ZEBEDEE (*Jehovah's gift*), husband of Salome, and father of the apostles James and John (Matt. x. 2; xx. 20; xxvi. 37; xxvii. 56; Mark iii. 17; x. 35; John xxi. 2). He was the owner of a fishing boat on the lake of Genesareth, and, with his sons, followed the business of a fisherman. He was present, mending the nets with them, when Jesus called James and John to follow him (Matt. iv. 21; Mark i. 19; Luke v. 10); and as he offered no obstacle to their obedience, but remained alone without murmuring in the vessel, it is supposed that he had been previously a disciple of John the Baptist, and, as such, knew Jesus to be the Messiah. At any rate, he must have known this from his sons, who were certainly disciples of the Baptist. It is very doubtful whether Zebedee and his sons were of that very abject condition of life which is usually ascribed to them. They seem to have been in good circumstances, and were certainly not poor. Zebedee was the owner of a 'ship,' or fishing smack, as we should call it—and, perhaps, of more than one; he had labourers under him (Mark i. 20); his wife was one of those pious women whom the Lord allowed 'to minister unto him of their substance;' and the fact that Jesus recommended his mother to the care of John, implies that he had the means of providing for her; whilst a still further proof that Zebedee's family was not altogether mean, may be found, perhaps, in the fact, that John was personally known to the high-priest (John xviii. 16).

1. ZEBO'IM, a valley and town in the tribe of Benjamin (1 Sam. xiii. 18; Neh. xi. 34).

2. ZEBO'IM, a city in the vale of Siddim, destroyed along with Sodom and Gomorrah (Gen. x. 19; xiv. 2; Hos. xi. 8). [SODOM.]

ZEBUL (*a dwelling*), an officer whom Abimelech left in command at Shechem in his own absence; and who discharged with fidelity and discretion the difficult trust confided to him (Judg. ix. 29-41). See the particulars in ABIMELECH.

ZEBULUN (*habitation*), the sixth and last son of Jacob by Leah (Gen. xxx. 19, seq.; xxxv. 23), who, in the order of birth, followed his brother Issachar, with whom, in history, as in the promised land, he was closely connected (Deut. xxxiii. 18). Zebulun was the founder of the

tribe which bore his name (Gen. xlv. 14), and which, while yet in the wilderness, was respectable for numbers (Num. i. 30; xxvi. 26). Zebulun obtained its lot in north Palestine between Naphtali on the north and Issachar on the south, while Asher stretched along both it and Naphtali on the west (Josh. xix. 10, seq.). The country of the Zebulonites bordered towards the east on the south-western side of the lake of Tiberias, and was connected with the Mediterranean by means of Carmel (Gen. xlix. 13). Its inhabitants in consequence took part in seafaring concerns. They failed to expel all the native race, but made those of them that remained tributaries (Judg. i. 30). One of the judges of Israel, Elon, was a Zebulonite (Judg. xii. 11). A city lying on the borders of Asher also bore the name of Zebulun (Josh. xix. 27).

ZECHARIAH (*whom Jehovah remembers*), a very common name among the Jews, borne by the following persons mentioned in Scripture.

1. ZECHARIAH, son of Jeroboam II., and fourteenth king of Israel. He ascended the throne in B.C. 772, and reigned six months. The few months of Zechariah's reign just sufficed to evince his inclination to follow the bad course of his predecessors; and he was then slain by Shallum, who usurped the crown. With his life ended the dynasty of Jehu (2 Kings xiv. 29; xv. 8-12).

2. ZECHARIAH, high priest in the time of Joash, king of Judah. He was son, or perhaps grandson, of Jehoiada and Jehosheba; the latter was the aunt of the king, who owed to her his crown, as he did his education and throne to her husband [JOASH]. Zechariah could not bear to see the evil courses into which the monarch eventually fell, and by which the return of the people to their old idolatries was facilitated, if not encouraged. Therefore, when the people were assembled at one of the solemn festivals, he took the opportunity of lifting up his voice against the growing corruptions. This was in the presence of the king, in the court of the temple. The people were enraged at his honest boldness; and with the connivance of the king, if not by a direct intimation from him, they seized the pontiff, and stoned him to death, even in that holy spot, 'between the temple and the altar.' His dying cry was not that of the first Christian martyr, 'Lord, lay not this sin to their charge' (Acts vii. 60), but 'The Lord look upon it, and require it' (2 Chron. xxiv. 20-22). It is to this dreadful affair that our Lord is supposed to allude in Matt. xxiii. 35; Luke xi. 51.

3. ZECHARIAH, described as one 'who had understanding in the visions of God' (2 Chron. xxvi. 7). It is doubtful whether this eulogium indicates a prophet, or simply describes one eminent for his piety and faith. During his lifetime Uziah, king of Judah, was guided by his counsels, and prospered; but went wrong when death had deprived him of his wise guidance. Nothing is known of this Zechariah's history. It is possible that he may be the same whose daughter became the wife of Ahaz, and mother of Hezekiah (2 Kings xvi. 1, 2; 2 Chron. xxix. 1).

4. ZECHARIAH, son of Jeberchiah, a person whom, together with Urijah the high priest, Isaiah took as a legal witness of his marriage with 'the prophetess' (Isa. viii. 2). This was in the reign of Ahaz, and the choice of the prophet

shows that Zechariah was a person of consequence.

5. ZECHARIAH, the eleventh in order of the minor prophets, was 'the son of Berechiah, the son of Iddo, the prophet.' He seems to have entered upon his office in early youth (Zech. ii. 4). The period of his introduction to it is specified as the eighth month of the second year of Darius, a very short time later than the prophet Haggai. The mission of Zechariah had especial reference to the affairs of the nation that had been restored to its territory. The second edict, granting permission to rebuild the temple, had been issued, and the office of Zechariah was to incite the flagging zeal of the people, in order that the auspicious period might be a season of religious revival as well as of ecclesiastical reorganization; and that the theocratic spirit might resume its former tone and energy in the breasts of all who were engaged in the work of restoring the 'holy and beautiful house,' where their fathers had praised Jehovah. The prophet assures them of success in the work of re-erecting the sacred edifice, despite of every combination against them; for Zerubbabel 'should bring forth the head stone with shouting, Grace, grace unto it'—comforts them with a solemn pledge that, amidst fearful revolutions and conquests by which other nations were to be swept away, they should remain uninjured; for, says Jehovah, 'He that toucheth you toucheth the apple of mine eye'—sketches in a few vivid touches the blessings and glory of the advent of Messiah—imparts consolation to those who were mourning over their unworthiness, and pronounces a heavy doom on the selfish and disobedient, and on such as in a remote age, imbibing their spirit, 'should fall after the same example of unbelief.' The pseudo-Epiphanius records some prodigies wrought by Zechariah in the land of Chaldaea, and some wondrous oracles which he delivered; and he and Dorotheus both agree in declaring that the prophet died in Judaea in a good old age, and was buried beside his colleague Haggai.

The book of Zechariah consists of four general divisions.

I. The introduction or inaugural discourse (ch. i. 1-16).

II. A series of nine visions, extending onwards to ch. vii., communicated to the prophet in the third month after his installation. These visions were,—

1. A rider on a roan horse among the myrtle-trees, with his equestrian attendants, who report to him the peace of the world, symbolizing the fitness of the time for the fulfilment of the promises of God, his people's protector.

2. Four horns, symbols of the oppressive enemies by which Judah had been on all sides surrounded, and four carpenters, by whom these horns are broken, emblems of the destruction of these anti-theocratic powers.

3. A man with a measuring-line describing a wider circumference for the site of Jerusalem, as its population was to receive a vast increase, foreshowing that many more Jews would return from Babylon and join their countrymen, and indicating the conversion of heathen nations under the Messiah, when out of Zion should go forth the law and the word of the Lord from Jerusalem.

4. The high-priest Joshua before the angel of the Lord, with Satan at his right hand to oppose him. The sacerdotal representative of the people, clad in the filthy garments in which he had returned from captivity, seems to be a type of the guilt and degradation of his country; while forgiveness and restoration are the blessings which the pontiff symbolically receives from Jehovah, when he is re-clad in holy apparel and crowned with a spotless turban, the vision at the same time stretching into far futurity, and including the advent of Jehovah's servant the BRANCH.

5. A golden lamp-stand fed from two olive-trees, one growing on each side, an image of the value and divine glory of the theocracy as now seen in the restored Jewish church, supported, not 'by might nor by power, but by the Spirit of Jehovah,' and of the spiritual development of the old theocracy in the Christian church, which enlightens the world through the continuous influence of the Holy Ghost.

6. A flying roll, the breadth of the temple-porch, containing on its one side curses against the ungodly, and on its other anthems against the immoral, denoting that the head of the theocracy, the Lord of the temple, would from his place punish those who violated either the first or the second table of his law.

7. A woman in an ephah (at length pressed down into it by a sheet of lead laid over its mouth), borne along in the air by two female figures with storks' wings, representing the sin and punishment of the nation. The fury, whose name is WICKEDNESS, is repressed, and transported to the land of Shinar; i.e. idolatry, in the persons of the captive Jews, ~~was~~ for ever removed at that period from the Holy Land, and, as it were, taken to Babylon, the home of image-worship.

8. Four chariots issuing from two copper mountains, and drawn respectively by red, black, white, and spotted horses, the vehicles of the four winds of heaven, a hieroglyph of the swiftness and extent of divine judgments against the former oppressors of the covenant people. Judgments seem issuing from God's holy habitation in the midst of the 'mountains which are round about Jerusalem,' or from between those two hills, the ravine dividing which forms the valley of Jehoshaphat, directly under the temple mountain, where dwelt the head of the theocracy.

9. The last scene is not properly a vision, but an oracle in connection with the preceding visions, and in reference to a future symbolical act to be performed by the prophet. In presence of a deportation of Jews from Babylon, the prophet was charged to place a crown on the head of Joshua the high priest, a symbol which, whatever was its immediate signification, was designed to prefigure the royal and sacerdotal dignity of the man whose name is BRANCH, who should sit as 'a priest upon his throne.'

The meaning of all the preceding varied images and scenes is explained to the prophet by an attendant angelic interpreter.

III. A collection of four oracles delivered at various times in the fourth year of Darius, and partly occasioned by a request of the nation to be divinely informed, whether, now on their happy return to their fatherland, the month of Jerusalem's overthrow should be registered in

their sacred calendar as a season of fasting and humiliation. The prophet declares that these times should in future ages be observed as festive solemnities.

IV. The 8th, 9th, 10th, and 11th chapters contain a variety of prophecies unfolding the fortunes of the people, their safety in the midst of Alexander's expedition, and their victories under the Macedonian chieftains, including the fate of many of the surrounding nations, Hadrach (Persia), Damascus, Tyre, and Philistia.

V. The remaining three chapters graphically portray the future condition of the people, especially in Messianic times, and contain allusions to the siege of the city, the means of escape by the cleaving of the Mount of Olives, with a symbol of twilight breaking into day, and living water issuing from Jerusalem, concluding with a blissful vision of the enlarged prosperity and holiness of the theocratic metropolis, when upon the bells of the horses shall be inscribed 'holiness unto the Lord.'

The language of Zechariah has not the purity and freshness of a former age. A slight tinge of Chaldaism pervades the composition. The symbols with which he abounds are obscure, and their prosaic structure is diffuse and unvaried. The rhythm of his poetry is unequal, and its parallelisms are inharmonious and disjointed. His language has in many phrases a close alliance with that of the other prophets, and occasional imitations of them, especially of Ezekiel, characterize his oracles. He is also peculiar in his introduction of spiritual beings into his prophetic scenes.

6. ZACHARIAH, the father of John the Baptist [JOHN THE BAPTIST].

ZEDEKIAH, son of Josiah, the twentieth and last king of Judah, was, in place of his brother Jehoiskin, set on the throne by Nebuchadnezzar, who changed his name from Mattaniah to that by which he is ordinarily spoken of. As the vassal of the Babylonian monarch, he was compelled to take an oath of allegiance to him, which, however, he observed only till an opportunity offered for throwing off his yoke. Success in such an undertaking was not likely to attend his efforts. His heart was not right before God, and therefore was he left without divine succour. Corrupt and weak, he gave himself up into the hands of his nobles, and lent an ear to false prophets; while the faithful lessons of Jeremiah were unwelcome, and repaid by incarceration. Like all of his class, he was unable to follow good, and became the slave of wicked men, afraid alike of his own nobility and of his foreign enemies. By his folly and wickedness he brought the state to the brink of ruin. Yet the danger did not open his eyes. Instead of looking to Jehovah, he threw himself for support on Egypt, when the Chaldean came into the land and laid siege to his capital. The siege was begun on the tenth day of the tenth month in the ninth year of his reign. For a year and a half did Jerusalem effectually withstand Nebuchadnezzar. At the end of that time, however, the city was stormed and taken (B.C. 588), when Zedekiah, who had fed, was captured on the road to Jericho. Judgment was speedily executed: his sons were slain before his eyes, and he himself was deprived of sight and sent in chains to Babylon, where he died in prison (2 Kings

xxiv. 17, seq.; xxv. 1, seq.; 2 Chron. xxxvi. 10, seq.; Jer. xxviii.; xxxiv.; xxxvii.; xxxviii.; xxxix.; lii.; Ezek. xvii. 15).

ZELOPHEAD, son of Hopher, a descendant of Joseph, who had no sons, but five daughters. These came to Moses and Eleazar when now at the edge of the promised land, to lay their case before them for adjudication. Their father had died in the wilderness, leaving no male child. The daughters thought themselves entitled to take their father's share of the land. Moses on this brought their cause before Jehovah, who ordered that they should receive their father's inheritance, taking occasion to establish the general rule: 'If a man die, and have no son, then ye shall cause his inheritance to pass unto his daughter,' and failing daughters, to his next of kin (Num. xxvi. 33; xxvii. 1, sq. Compare Josh. xvii. 3, sq.).

ZENAS, a disciple who visited Crete with Apollos, bearing seemingly the epistle to Titus, in which Paul recommends the two to his attentions (Tit. iii. 13). He is called 'the lawyer,' and as his name is Greek, it seems doubtful whether he is so called as being, or having been, a doctor of the Jewish law, or as being a pleader at the Roman tribunals. The most probable opinion is, perhaps, that which makes him an Hellenistic Jew, and a doctor of the Mosaic law.

ZEPHANIAH, the ninth in order of the minor prophets. The name seems to have been a common one among the Jews. Contrary to usual custom, the pedigree of the prophet is traced back for four generations—'the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hizkiah.' As there was at least another Zephaniah, a conspicuous personage at the time of the captivity, the parentage of the prophet may have been recounted so minutely to prevent any reader from confounding the two individuals. The so-called Epiphanius asserts that Zephaniah was of the tribe of Simeon, of the hill Sarabatha. The existence of the prophet is known only from his oracles, and these have no biographical sketches; so that our knowledge of this man of God comprises only the fact and the results of his inspiration. It may be safely inferred, however, that he laboured with Josiah in the pious work of re-establishing the worship of Jehovah in the land.

It is recorded (ch. i.) that the word of the Lord came to him 'in the days of Josiah, the son of Amon, king of Judah.' We have reason for supposing that he flourished during the earlier portion of Josiah's reign. In the second chapter (vers. 13-15) he foretells the doom of Nineveh, and the fall of that ancient city happened about the eighteenth year of Josiah. In the commencement of his oracles also, he denounces various forms of idolatry, and specially the remnant of Baal. The reformation of Josiah began in the twelfth, and was completed in the eighteenth year of his reign. So thorough was his extirpation of the idolatrous rites and hierarchy which defiled his kingdom, that he burnt down the groves, dismissed the priesthood, threw down the altars, and made dust of the images of Baalim. Zephaniah must have prophesied prior to this religious revolution, while some remains of Baal were yet secreted in the land, or between the twelfth and eighteenth years of the royal reformer. So Hitzig and Movers place him; while Eichhorn, Bertholdt, and Jaeger incline to give him a somewhat later

date. At all events, he flourished between the years B.C. 642 and B.C. 611; and the portion of his prophecy which refers to the destruction of the Assyrian empire must have been delivered prior to the year B.C. 625, the year in which Nineveh fell. The publication of these oracles was, therefore, contemporary with a portion of those of Jeremiah, for the word of the Lord came to him in the thirteenth year of the reign of Josiah. Indeed, the Jewish tradition is, that Zephaniah had for his colleagues Jeremiah and the prophetess Huldah, the former fixing his sphere of labour in the thoroughfares and market-places, the latter exercising her honourable vocation in the college in Jerusalem.

The book consists of only three chapters. In the first, the sins of the nation are severely reprimanded, and a day of fearful retribution is menaced. The circuit of reference is wider in the second chapter, and the ungodly and persecuting states in the neighbourhood of Judah are also doomed; but in the third section, while the prophet inveighs bitterly against Jerusalem and her magnates, he concludes with the cheering prospect of her ultimate settlement and blissful theocratic enjoyment.

The style of this prophet has not the sustained majesty of Isaiah, or the sublime and original energy of Joel: it has no prominent feature of distinction; yet its delineations are graphic, and many of its touches are bold and striking. For example, in the first chapter the prophet groups together in his descriptions of the national idolatry several characteristic exhibitions of its forms and worship. The verses are not tame and prosaic portraiture, but form a series of vivid sketches. The poet seizes on the more strange peculiarities of the heathen worship—uttering denunciations on the remnant of Baal, the worshippers of Chemarim—the star-adorsers, the devotees of Molech, the fanatics who clad themselves in strange apparel, and those who in some superstitious mummerly leapt upon the threshold. Not a few verses occur in the course of the prophecy which, in tone and dignity, are not unworthy to be associated with the more distinguished effusions of the Hebrew bards. The language is pure: it has not the classic ease and elegance of the earlier compositions, but it wants the degenerate feebleness and Aramaic corruption of the succeeding era. Zephaniah is not expressly quoted in the New Testament; but clauses and expressions occur which seem to have been formed from his prophecy (Zeph. iii. 9; Rom. xv. 6, &c.). He was, in fine, as Cyril of Alexandria terms him, 'a true prophet, and filled with the Holy Ghost, and bringing his oracles from the mouth of God.'

ZE'PHATH, a Canaanitish city, afterwards called Hormah (Judg. i. 17). The ancient designation is perhaps retained in the modern Sufah, the name of a difficult pass leading up from the Arabah to the south of Judah.

ZE'PHATHAH, a valley at Mareshah, in the tribe of Judah (2 Chron. xiv. 10), where Asa defeated Zerah the Cushite. Mareshah was near Eleutheropolis, and Robinson thinks the valley may have been the broad wady which comes down from Beit Jibrin (Eleutheropolis) towards Tell es-Saifeh; in which last name a trace of Zephathah may perhaps be recognised.

1. ZE'RAH (*a rising*), son of Judah and Tamar, and younger but twin brother of Pharez (Gen. xxxviii. 30; Matt i. 3).

2. ZERAH, son of Reuel and grandson of Esau (Gen. xxxvi. 13, 17).

3. ZERAH, son of Simeon and founder of a family in Israel (Num. xxvi. 13). He is called Zohar in Gen. xli. 10; his descendants are called Zarhites in Num. xxvi. 13, 20.

4. ZERAH, the Cushite king or leader who invaded Judah in the tenth year of king Asa (n.c. 941), with an army of 'a thousand thousands' (i. e. very many thousands) of men, and three hundred chariots. Asa defeated them in the valley of Zephathah at Marashah, utterly routed them, pursued them to Gerar, and carried back much plunder from that neighbourhood. We are left uncertain as to the country from which Zerah came, and no conjecture has yet been made which is without serious difficulties.

ZE'RED, the name of a valley (Num. xxi. 12) and of the stream flowing through it, east of the Dead Sea [River].

ZE'REDA, a city of Manasseh, near Beth-shan (1 Kings xi. 26; 2 Chron. iv. 17).

ZE'RESH (Pers. *gold*), the wife of Haman (Esth. v. 10; vi. 13), and well worthy of him, if we may judge from the advice she gave him to prepare a gibbet and ask the king's leave to hang Mordecai thereon (HAMAN; MORDECAI).

ZERU'AH (*leprous*), the widowed mother of Jeroboam (1 Kings xi. 26).

ZERUB'BABEL (*son in Babylon*), called also 'Sheshbazzar, prince of Judah' (Ezra i. 8), son (comp. 1 Chron. iii. 17) of Shealtiel, of the royal house of David (1 Chron. iii.), was the leader of the first colony of Jews that returned from captivity to their native land under the permission of Cyrus, carrying with them the precious vessels belonging to the service of God. With the aid of Joshua and his body of priests, Zerubbabel proceeded, on his arrival in Palestine, to rebuild the fallen city, beginning with the altar of burnt-offerings, in order that the daily services might be restored. The Samaritans, however, having been offended at being expressly excluded from a share in the land, did all they could to hinder the work, and even procured from the Persian court an order that it should be stopped. Accordingly, everything remained suspended till the second year of Darius Hystaspis (n.c. 521), when the restoration was resumed and carried to completion, according to Josephus, owing to the influence of Zerubbabel with the Persian monarch (*Antiq.* xi. 3; Ezra; Haggai i. 14; ii. 1).

ZERU'AH (*wounded*), daughter of Jesse, sister of David (1 Chron. ii. 16), and mother of Joab, Abishai, and Asahel (2 Sam. ii. 18; iii. 39; viii. 16; xvi. 9).

ZI'BA (*statue*), a servant of the house of Saul, of whom David inquired if there was any one left of the house of Saul to whom the monarch might show favour. Mephibosheth was in consequence found, and having been certified of David's friendship, Ziba, who was at the head of a large family, having fifteen sons and twenty slaves, was appointed to till the land for the prince, and generally to constitute his household and do him service (2 Sam. ix. 2-10). This position Ziba employed for his master's harm. When David had to fly from Jerusalem in consequence of the

rebellion of Absalom, Ziba met the king with a large and acceptable present:—'But where is Mephibosheth?' asked the fugitive monarch; 'in Jerusalem,' was the answer; 'for he said, To-day shall the house of Israel restore me the kingdom of my father.' Enraged at this, which looked like ingratitude as well as treachery, David thereupon gave to the faithless Ziba all the property of Mephibosheth (2 Sam. xvi. 1, sq.). On David's return to his metropolis an explanation took place, when Mephibosheth accused Ziba of having slandered him; and David, apparently not being perfectly satisfied with the defence, gave his final award, that the land should be divided between the master and his servant (2 Sam. xix. 24, sq.).

ZIBEON (*dged*), a son of Seir, phylarch or head of the Hivites (Gen. xxxvi. 2, 20, 24, 29).

ZICH'Ri (*renowned*), an Ephraimite, probably one of the chiefs of the tribe, and one of the generals of Pekah king of Israel. It has been supposed that he took advantage of the victory of this monarch over the army of Judah to penetrate into Jerusalem, where he slew one of the sons of Ahaz, the governor of the palace, and the king's chief minister or favourite. It is difficult without this supposition to explain 2 Chron. xxviii. 17. There is some probability in the conjecture, that he was the 'Tabael's son whom Pekah and Rezin designed to set upon the throne of Judah' [TABAEI].

ZI'DON. 1. The eldest son of Canaan (Gen. x. 15). 2. One of the most ancient cities in Phœnicia. Justin derives the name from the Phœnician word for *fish*; but Josephus, from the son of Canaan. It had a very commodious harbour, which is now nearly choked up with sand: it was distant one day's journey from the fountains of the Jordan, 400 stadia from Berytus, and 200 stadia from Tyre (Strabo, xvi. pp. 756, 757). It was situated in the allotment of the tribe of Asher, but never conquered (Judg. i. 31); on the contrary, it was sometimes a formidable enemy (Judg. x. 12). Even in Joshua's time it was called Tsidon-Rabba, or Great Zidon (Josh. xii. 28). It was noted in very early times for its extensive traffic (Isa. xxiii. 2; Ezek. xxvii. 8) and manufactures, particularly glass. Frequent reference to it occurs in Homer. The best vessels in the fleet of Xerxes were Sidonian. Its modern name is Saïde. In Hasselquist's time (1750) its exports to France were considerable; but at present its traffic is chiefly confined to the neighbouring towns; the population is about 15,000.

ZIF (*bloom-month*), an ante-Exilian name of the second Hebrew month (1 Kings vi. 1-37), corresponding with our April and May. This, the second month of the sacred, was the eighth of the civil year. The second month bore also the name Iyar.

ZIK'LAG, a city belonging to the tribe of Simeon (Josh. xv. 31; xix. 5), but at times subject to the Philistines of Gath, whose king, Achish, bestowed it upon David for a residence; after which it pertained to Judah (1 Sam. xxvii. 6; xxx. 1, 14, 26; 2 Sam. i. 1; 1 Chron. iv. 30; Neh. xi. 28).

While David was absent with his men to join Achish, Ziklag was burned and plundered by the Amalekites; and on his return, after receiving the spoil from them, he remained here till called to assume the crown after the death of Saul. It

was during his stay in this place that he was joined by many considerable and valiant persons, whose adhesion to his cause was of much importance to him, and who were ever after held in high esteem in his court and army.

ZIL'LAH (*shade*), one of the wives of Lamech, and mother of Tubal-cain (Gen. iv. 19) [LAMECH].

ZIL'PAH (*a dropping*), a female servant of Laban, whom he gave to Leah on her marriage with Jacob (Gen. xxix. 24), and whom Leah eventually induced him to take as a concubine-wife; in which capacity she became the mother of Gad and Asher (Gen. xxx. 9-13; xxxv. 26; xxxvii. 2; xlv. 18).

ZIM'RAN (*sung, i. e. celebrated in song*), a son of Abraham by Keturah, and the name of an Arabian tribe descended from him (Gen. xxv. 2; 1 Chron. i. 32). This name may perhaps be connected with the Zabram mentioned by Ptolemy as a city with a king, situated between Mecca and Medina.

ZIMRI. There are four persons of this name mentioned in the Old Testament:—

1. A son of Zerah, who was a son of Judah by Tamar (1 Chron. ii. 6).

2. The name of the Israelite slain, together with the Midianitish woman, in Shittim, by Phinehas, was **ZIMRI**, the son of Salu, a prince of a chief house among the Simeonites (Num. xxv. 14).

3. King Saul begat Jonathan, who begat Merib-baal, who begat Micah, who begat Ahaz, who begat Jehoahaz, whose sons were Alemeth, Azmaveth, and **ZIMRI**. **Zimri** begat Moza, &c. (1 Chron. viii. 36; ix. 42).

4. In the twenty-sixth year of Asa, king of Judah, Elah, the son of Baasha, began to reign over Israel in Tirzah. After he had reigned two years, **ZIMRI**, the captain of half his chariots, conspired against him when he was in Tirzah, drunk in the house of his steward. **Zimri** went in and smote and killed him, and reigned in his stead, about B.C. 928; and he slew all the house of Baasha, so that no male was left. **Zimri** reigned only seven days at Tirzah. The people who were encamped at Gibbethon, which belonged to the Philistines, heard that **Zimri** had slain the king. They made Omri, the captain of the host, king over Israel in the camp. Omri besieged Tirzah and took it. **Zimri**, seeing that the city was taken, went into the king's palace, set it on fire, and perished in it for his sins in walking in the way of Jeroboam, and for making Israel to sin (1 Kings xvi. 1-20; 2 Kings ix. 31).

5. The kings of **Zimri**, mentioned in Jer. xxv. 25, seem to have been the kings of the Zimranites, the descendants of **Zimran**, son of Abraham by Keturah (Gen. xxv. 2; 1 Chron. i. 32).

ZIN, a desert on the south of Palestine, and westward from Idumaea, in which was situated the city of Kadesh-barnea (Num. xiii. 22; xx. 1; xxvii. 14). Its locality is therefore fixed by the considerations which determine the site of Kadesh to the western part of the Arabian south of the Dead Sea.

Z'ON. [JERUSALEM.]

ZIPH, the name of a city in the tribe of Judah (Josh. xv. 55; 2 Chron. xi. 8), and of a desert in its vicinity (1 Sam. xxiii. 14, 15). It is mentioned by Jerome (*Onomast.* s. v.), but had not

been since noticed till Dr. Robinson found the name in the Tell Zif (Hill of Zif), which occurs about four miles and a half S. by E. from Hebron, and is a round eminence about a hundred feet high, situated in a plain. A site also called Zif, lies about ten minutes east of this, upon a low hill or ridge between two small wadis, which commence here and run towards the Dead Sea. There is now little to be seen besides broken walls and foundations, mostly of unhewn stones, but indicative of solidity.

ZIPPOR'AH (*little bird*), one of the seven daughters of Reuel (comp. Exod. xviii.), priest of Midian, who, in consequence of aid rendered to the young women when, on their going to procure water for their father's flocks, they were set on by a party of Bedouins, was given to Moses in marriage (Exod. ii. 16, sq.). A son, the fruit of this union, remained for some time after his birth uncircumcised, but an illness into which Moses fell in a khan when on his way to Pharaoh, being accounted a token of the divine displeasure, led to the circumcision of the child, when Zipporah, having it appears reluctantly yielded to the ceremony, exclaimed, 'Surely a bloody husband thou art to me' (Exod. iv. 26). This event seems to have caused some alienation of feeling, for Moses sent his wife back to her father, by whom she is again brought to her husband while in the desert, when a reconciliation took place, which was ratified by religious rites (Gen. xlviii. 1, sq.).

ZIPPORIS, or **SEPPHORIS**, was, about the beginning of the Christian era, a principal and strongly fortified city of Galilee, under latitude 32° 44'. It was surrounded by many villages, and situated near Mount Asamon in the centre of Galilee, in a very strong and secure situation. It is also called Diocesarea, Sepphoris, and Sephorum, and described as contiguous to Mount Carmel and Cana, six miles west of Nazareth, and twenty from Tiberias. Zipporis is celebrated in the works of Josephus as a military station, and in the Talmud on account of its famed rabbinical academy. Rabbi Judah Hakkadosh, or *the Saint*, resided seventeen years in Zipporis, and he used frequently to say that Jacob sojourned in Egypt seventeen years, and Judah in Zipporis seventeen years. He resided also in Beth-shaarim, but died in Zipporis. Josephus mentions Sepphoris frequently as the greatest town of Galilee, and built in a well-fortified situation. It was one of the five cities in which the assemblies of the Sanhedrium were held. It was destroyed A.D. 334, in consequence of the rebellion of its citizens.

ZIZ, a cliff or pass leading up from the Dead Sea towards Jerusalem, by which the bands of the Moabites and Ammonites advanced against Jehoshaphat (2 Chron. xx. 16). They seem to have come round the south end of the Dead Sea, and along the western shore as far as Engedi, where there is a pass which leads out northward towards Tekoa. This is the route which is taken by the Arabs in their marauding expeditions at the present day.

ZO'AN, an ancient city of Lower Egypt, situated on the eastern side of the Tanitic branch of the Nile. Zoan is of considerable Scriptural interest. It was one of the oldest cities in Egypt, having been built seven years after Hebron,

which already existed in the time of Abraham (Num. xiii. 22; comp. Gen. xxii. 2). It seems also to have been one of the principal capitals, or royal abodes, of the Pharaohs (Isa. xix. 11, 13; xxx. 4); and accordingly 'the field of Zoan,' or the fine alluvial plain around the city, is described as the scene of the marvellous works which God wrought in the time of Moses (Ps. lxxviii. 12, 33). The destruction predicted in Ezek. xxx. 14, has long since befallen Zoan. The field is now a barren waste; a canal passes through it without being able to fertilize the soil; 'fire has been set in Zoan;' and the royal city is now the habitation of fishermen, the resort of wild beasts, and infested by reptiles and malignant fevers. The locality is covered with mounds of unusual height and extent, full of the fragments of pottery which such sites usually exhibit. These extend for about a mile from north to south, by about three-quarters of a mile. The area in which the sacred enclosure of the temple stood, is about 1500 feet by 1250, surrounded by the mounds of fallen houses, whose increased elevation above the site of the temple is doubtless attributable to the frequent change in the level of the houses to protect them from the inundation, and the unaltered position of the sacred buildings. There is a gateway of granite and fine griststone to the enclosure of this temple, bearing the name of Rameses the Great. Though in a very ruinous condition, the fragments of walls, columns, and fallen obelisks sufficiently attest the former splendour of the building to which they belonged. The obelisks are all of the time of Rameses the Great (n.c. 1355). The name of this king most frequently occurs; but the ovals of his successor Pthamen, of Osirtasen III., and of Tirhakah, have also been found. The time of Osirtasen III. ascends nearly to that of Joseph, and his name, therefore, corroborates the Scriptural account of the antiquity of the town. Two black statues, and a granite sphinx, with blocks of hewn and occasionally sculptured granite, are among the objects which engage the attention of the few travellers who visit this desolate place. The modern village of San consists of mere huts, with the exception of a ruined kasr of modern date.

ZOAR, a town originally called Bala, and one of the five cities of the plain of Siddim. It was doomed with the rest to destruction, but spared at the intercession of Lot as a place to which he might escape. He alleged the smallness of the city as a ground for asking this favour; and hence the place acquired the name of Zoar, or 'SMALLNESS' (Gen. xiii. 10; xiv. 2, 8; xix. 20, 22, 30). It is only again mentioned in Deut. xxxiv. 3; Isa. xv. 5; Jer. xlviii. 34; which passages indicate that it belonged to the Moabites, and was a place of some consequence. Eusebius and Jerome describe it as having in their day many inhabitants, and a Roman garrison. Stephen of Byzantium calls it a large village and fortress. In the Ecclesiastical Notitia it is mentioned as the seat of a bishop of the Third Palestine, down to the centuries preceding the Crusades. The Crusaders seem to have found it under the name of Segor, and they describe the place as pleasantly situated, with many palm-trees. Dr. Robinson supposes that it must have lain on the east of the Dead Sea, and he thinks that Irby and Mangles

have rightly fixed its position at the mouth of the Wady Kerak, at the point where the latter opens upon the isthmus of the long peninsula which stands out from the eastern shore of the lake towards its southern end. At this point Irby and Mangles discovered the remains of an ancient town. Here 'stones that have been used in building, though for the most part unknown, are strewn over a great surface of uneven ground, and mixed with bricks and pottery. This appearance continues without interruption, during the space of at least half a mile, quite down to the plain, so that it would seem to have been a place of considerable extent. We noticed one column, and we found a pretty specimen of antique variegated glass. It may possibly be the site of the ancient Zoar' (Travels, p. 448).

ZORAH, a Syrian kingdom, whose king made war with Saul (1 Sam. xiv. 47), with David (2 Sam. viii. 3; x. 6), and with Solomon (2 Chron. viii. 3).

1. ZO' HAR (whiteness), a son of Simeon [Zerah].

2. ZOHAR, the father of Ephron the Hittite (Gen. xxiii. 8; xxv. 9).

3. ZOHAR (in Keri; in Chetib, Jezoar), a descendant of Judah (1 Chron. iv. 7).

ZOPHAR (*sparrow?*), one of Job's three friends and opponents in argument (Job ii. 11; xi. 1; xx. 1; xlii. 9). He is called a Naamathite, or inhabitant of Naamah, a place whose situation is unknown, as it could not be the Naamah mentioned in Josh. xv. 41. Wernys, in his *Job and his Times* (p. 111), well characterizes this interlocutor:—'Zophar exceeds the other two, if possible, in severity of censure; he is the most inveterate of the accusers, and speaks without feeling or pity. He does little more than repeat and exaggerate the arguments of Bildad. He unfeelingly alludes (ch. xi. 15) to the effects of Job's disease as appearing in his countenance. This is cruel and invidious. Yet in the same discourse how nobly does he treat of the divine attributes, showing that any inquiry into them is far beyond the grasp of the human mind! And though the hortatory part of the first discourse bears some resemblance to that of Eliphaz, yet it is diversified by the fine imagery which he employs. He seems to have had a full conviction of the providence of God, as regulating and controlling the actions of men; but he limits all his reasonings to a present life, and makes no reference to a future world. This circumstance alone accounts for the weakness and fallacy of these men's judgments. In his second discourse there is much poetical beauty in the selection of images, and the general doctrine is founded in truth; its fallacy lies in its application to Job's peculiar case. The whole indicates great warmth of temper, inflamed by misapprehension of its object and by mistaken zeal.'

It is to be observed that Zophar has but two speeches, whereas the others have three each. When Job had replied (ch. xxvi.-xxxi.) to the short address of Bildad (ch. xxv.), a rejoinder might have been expected from Zophar; but he said nothing, the three friends, by common consent, then giving up the contest in despair (ch. xxxii. 1) [Job].

ZORAH (*hornet's town*), a town reckoned as in the plain of Judah (Josh. xv. 33), but inha-

bited by Danites (xix. 41), not far from Eshtaol, and chiefly celebrated as the birthplace of Samson (Judg. xiii. 2, 25; xviii. 2, 8, 11; comp. 2 Chron. xi. 12; Neh. xi. 29). The site may still be recognised under the name of Surah, situated upon a spur of the mountains running into the plain north of Beth-shemesh.

ZURIEL (*God is my rock*), son of Abihail, and family chief or genesarch of the Merarites at the organization of the Levitical establishment.

(Num. iii. 35). It does not appear to which of the two great divisions of the Merarites he belonged.

ZU'ZIMS, one of the ancient tribes or nations conquered by Chedorlaomer and his allies (Gen. xiv. 5). The Zuzims were settled beyond the Jordan, and are perhaps the same as the Zamzummins of Deut. ii. 20. The Syriac and Onkelos, like the Septuagint, take the word for an appellative, signifying 'strong' or 'valiant.'
